**Albany, N. Y.*—Arthur W. Luce, 100 Bway., N. Y. City, has secured contract for work on Contract 14, in connection with New York State Canal work bids opened July 31), at the following bid (Winslow M. Mead, Deputy Supt. State Bd. Pub. Wks.): Clearing, lump sum, $100; 3,000 cu. yds. grubbing, 34 cts.; 810,000 cu. yds. all excav., 73.5 cts.; 150 M ft. sheeting and bracing, $50; 174,000 cu. yds. forming embkmt., 1st class, 17 cts.; 31,000 cu. yds. forming embkmt., 2d class, 11 cts.; 1,300 cu. yds. lining, $1.70; 212 cu. yds. puddle, $1.70; 158 M ft. sawed lumber (yellow pine or Douglas fir), $55; 400 M ft. sawed lumber (hemlock), $40; 23 M ft. white oak lumber in miter sills and gates, $100; 75 M ft. sawed lumber (white oak), $80; 62 M ft. sawed lumber (creosoted yellow pine or Douglas fir), $100; 27,000 lin. ft. round timber in cribs, 15 cts.. 10,300 cu. yds. stone filling in cribs, $1.50; 70 foundation piles 10 ft. long, ea., $4.40; 70 foundation piles 12 ft. long, ea., $5; 1,500 foundation piles 14 ft. long, ea., $5.60; 3,401 foundation piles 16 ft. long, ea., $6; 84 foundation piles 20 ft. long, ea., $6.15; 40 mooring piles 20 ft. long, ea., $5.50; 200 M ft. wooden sheet piling, $50; 21,000 cu. yds. 1st-class concrete, $8; 210,000 cu. yds. 2d-class concrete, $7.50; 1,250 cu. yds. 3d-class concrete, $6.50; 55 cu. yds. reinforced concrete, $11.40; 3,300 cu. yds. wash wall, $2.50; 3,720 sq. yds. 2d-class stone paving, $1.50; 460 sq. yds. 3d-class stone paving, $1.50; 200 sq. yds. cobblestone paving, 75 cts.; 2,500 cu. yds. ballast, $1.50; 2,600 cu. yds. 1st-class riprap, $3; 15,400 cu. yds. 2d-class riprap, $3; 900 cu. yds 3d-class riprap, $2.85. 8,400 cu. yds. 4th-class riprap, $2.50; 200 cu. yds. 24-in. vitr. pipe, laid, $2; 2,427,000 lbs. structural steel, 4 cts.; 580,000 lbs. metal in uprights for dams, 6 cts.; 830,000 lbs. metal in gates for dams, 7.5 cts.; 810,000 lbs. metal in lock gates, 7 cts.; 330,000 lbs. metal in needle dams, 6 cts.; 128,000 lbs. metal in lock valves, 12 cts.; 280,000 lbs. metal in head gates, 10 cts.; 133,000 lbs. metal reinforcement, 4 cts.; 7,000 lbs. steel castings, 5 cts.; 163,000 lbs. iron castings plain, 3.5 cts.; 55,000 lbs. iron castings, machined, 6 cts.; 86,000 lbs. cast-iron shoes for uprights, 5 cts.; 1,000 lin. ft. wooden fence, 20 cts.; 870 fender fastenings, ea., $3; 2 24x36-in. sluice-gates with hoists and standards, ea., $200; 135,000 lbs. wrought-iron chain, 6 cts.;. 4,030 lin. ft. wrought-iron pipe railing, $1. deduct price to be paid to State for buildings removed by contractor, $100; total, $2,935,763.

*The Gilmour-Horton-Allen Co., of Sandy Hill, has secured the contract for work on Contract 35, New York State Canal (bids opened July 31), at the following detailed bid: (Winslow M. Mead, Deputy Supt. State Bd. of Pub. Wks.): 206,000 cu. yds. all excav., $1.1[illegible]; 100 M ft. sheeting and bracing, $45; 11,000 cu. yds. forming embkmt., 12.5 cts.; 320 cu. yds. lining, $1; 500 cu. yds. puddle, $2.20; 11 M ft. sawed lumber (yellow pine or Douglas fir), $52; 6 M ft. sawer lumber (spruce), $52; 5 M ft. white oak lumber in miter sills and gates, $95; 45 M ft. sawed lumber (white oak), $76; 12 M ft. sawed lumber (creosoted yellow pine or Douglas fir), $95; 51,000 cu. yds. 2d-class concrete, $7.20; 2,700 cu. yds. reinforced concrete, $9.20; 15 cu. yds. 1st-class masry., $25; 4 cu. yds. 1st-class masry. bridge coping, $32; 650 cu. yds. laying masry., $11; 3,400 lin. ft. pointing old masry., 5 cts.; 90 sq. yds. cobblestone paving, 90 cts.; 30 cu. yds. ballast, $1.25; 90 cu. yds. 4th-class riprap, $1.75. 6960 lbs. 4-in. w.-iron pipe and specials, 10 cts.; 880 lbs. 5-in. w.-iron pipe and specials, 10 cts.; 342,000 lbs. structural steel, 5 cts.; 390,000 lbs. metal in lock gates, 7 cts.; 73,000 lbs. metal in needle dams, 6 cts.; 33,000 lbs. metal in lock valves, 12 cts.; 334,000 lbs. metal reinforcement, 4 cts.; 51,400 lbs. iron castings, plain 3.5 cts.; 17,300 lbs. iron castings, machined, 6 cts.; 500 sq. yds. wood-block pavement, $2.50; 120 lin. ft. wooden fence, 20 cts.; 1,070 fender fastenings, ea., $3; 115 expansion bolts in place, ea., 40 cts.; 1,580 lin. ft. wrought-iron pipe railings, $1.40; 440 lin. ft. scroll railing, $1.90; 2 gate hoists, Class "A," ea., $600; 2 gate hoists, Class "B," ea., $500; 2 gate hoists, Class "C," ea., $700; 5 gate hoists, Class "D," ea., $600; 2 gate hoists, Class "E," ea., $800. removing old bridge superstructures, lump sum, $100; moving bridge and bulkhead gates, lump sum, $1,700; raising buildings, lump sum, $900; maintaining highway traffic, lump sum, $500; moving Weighlock House, lump sum, $1,000; deduct price to be paid to State for buildings, lump sum, $100; total, $739,261.

Saugerties, N. Y.—Bids will be received by Col. John G. D. Knight, Corps Engrs., U. S. A., New York City, until Sept. 30 for rock removal and dredging in Saugerties Harbor, N. Y., as advertised in The Engineering Record.

Philadelphia, N. Y.—See "Power Plants, Gas and Electricity."

New York, N. Y.—See "Water."

Oswego, N. Y.—The following are the bids opened on Aug. 17 by Col. H. M. Adams, Corps. Engrs., U. S. A., Buffalo, for constructing stone-concrete superstructure on outer breakwater at Oswego: (*a*) Barnett Contr. Co., Oswego; (*b*) Patk. Keohane, Fayetteville.

	a	*b*
1,175 lin. ft. removing old superstructure	$11.50	$10.00
20 M ft. timber above 1 ft. below water	20.00	50.00
5 M ft. timber below 1 ft. below water	25.00	150.00
24,750 tons rubble stone in place	2.60	2.25
21,500 cu. yds. rubble stone in place (alternative bids)	3.00	2.75
50,000 tons capping stone in place	6.00	4.95
750 cu. yds. concrete blocks	13.00	12.00
1,300 cu. yds. concrete in place	8.50	10.00
12 mooring posts	70.00	50.00
Totals	$400,027	$339,287

**Brunswick, Ga.*—Bids were opened on Aug. 22 by Lieut. Col. Dan. C. Kingman, Corps. Engrs., U. S. A., Savannah, for dredging Brunswick inner and outer harbor, and the bid of P. Sanford Ross, Inc., Jersey City, N. J., was recommended for acceptance for Lot No. 1, consisting of 520,000 cu. yds., at 14.8 cts. and the bid of the Coastwise Dredging Co., of Norfolk, Va., for Lot 2, about 230,000 cu. yds., 16½ cts., and Los. 3, 1,500,000 cu. yds., 23 cts.

Cando, N. D.—The Business men are reported to have decided to lay a drain tile from the main street to a coulee a half mile east.

Cincinnati, O.—Bids will be received by Maj. J. T. Warren, Corps. Engrs. U. S. A., Custom House, Cincinnati, until Sept. 30, for constructing dredge, as advertised in The Engineering Record.

Panama.—Bids will be received at the office of H. F. Hodges, Gen. Purchasing Officer Isthmian Canal Comn., Washington, D. C., until Sept. 25 for steam shovels, steam churn drills, air compressor plant, pumps, generator, induction motors, transformers, etc., as advertised in The Engineering Record.

Charleston, S. C.—The following are the bids opened on Aug. 20 by Capt. E. R. Stuart, Corps. Engrs., U. S. A., for dredging canal between Sewee Bay and McClellanville (price given per cu. yd.): Edw. M. Graves, 17 Commercial Bank Bldg., Cleveland, O., 20 cts.; Simons-Mayrant Co., Charleston, 27.7 cts.; Savannah Dredging Co., Savannah, Ga., 23⅝ cts.; Southern Dredging Co., Mobile, Ala., 37 cts.

Woonsocket, S. D.—It is stated that bids will be received by the Co. Comrs. until Sept. 4, for constructing drainage ditch No. 3. Lewis Strand is Co. Aud.

**Galveston, Tex.*—Capt. J. C. Oakes, Engr., is reported to have decided to recommend the acceptance of the bid of Chas. Clarke & Co., of Galveston, for the Brazos River jetty repair work. They bid $3.58 per ton, or a total of about $32,000.

Seattle, Wash.—Plans are reported to have been prepared for a new wharf to be built by the Standard Oil Co. on its property on the east waterway, Railroad Ave. and Whatcom St.

Wheeling, W. Va.—The lowest bid opened on Aug. 14 by Capt. F. C. Boggs, Corps Engrs., U. S. A., for furnishing and delivering iron and steel for bear-trap gates for Dam No. 18, Ohio River, was submitted by the Penn Bridge Co., of Beaver Falls, Pa., as follows: 158,000 lbs. structural steel, 3.94 cts.; 5,250 lbs. forgings, 8.2 cts.; 385 lbs. pins, etc., 8.2 cts.; 1,420 lbs. bolts, etc., 7.2 cts.; 4,840 lbs. steel castings 17.25 cts.; 1,000 lbs. iron castings, 6 cts.; 27 lbs. bronze cap screws, $1; total, $7,711. Totals of other bids: The Leetonia Boiler Co., Leetonia, O., $11,013; Lawrence D. Weaning, Cleveland O., $8,803; Pittsburgh Industrial Iron Wks., Pittsburg, Pa., $8,290; Excelsior Equipment Co., Pittsburg, Pa., $13,414; J. & J. B. Milbolland Co., Pittsburg, Pa., $9,866.

Racine, Wis.—The lowest bid opened on Aug. 2 by Maj. W. V. Judson, Corps Engrs., U. S. A., Milwaukee, for building 196 ft. of crib breakwater at Racine harbor, was submitted by P. W. Galloway, of Racine, as follows: Framing 398 M ft. timber and plank furnished by U. S., per M ft., B M., $11; 30,000 lbs. drift bolts, 4 cts. per lb.; 3,000 lbs. screw bolts, 5 cts.; 2,500 lbs. spikes, 5 cts., and 10,000 tons stone, per ton of 2,000 lbs., $1.48; total, $20,653. Totals of other bids: Edw. Gillen Dock. Dredge & Constr. Co., Racine, $23,670; Wm. H. Gillen, Milwaukee, $23,148, and Burk, Smith & Nelson, Muskegon, Mich., $24,236.

Kenosha, Wis.—The lowest bid opened on Aug. 2 by Maj. W. V. Judson, Corps Engrs., U. S. A., Milwaukee, for building 196 ft. of crib breakwater at Kenosha harbor, was submitted by P. W. Galloway, of Racine, at the following bid: Framing 425 M ft. timber and plank, furnished by U. S., per M ft., $11.50; 32,000 lbs. drift bolts, per lb., 4 cts.; 3,000 lbs. screw bolts, 5 cts.; 2,500 lbs. spikes, 5 cts.; 12,000 tons stone, per ton of 2,000 lbs., $1.55; total, $25,042. Totals of other bids: Edw. Gillen Dock, Dredge & Constr. Co., Racine, Wis., $27,370; Wm. H. Gillen, Milwaukee, $26,812; Burk, Smith & Nelson, Muskegon, Mich., $28,237.

**Mimico, Ont.*—H. F. McNaughton, of Toronto, Secy. Bd. Pub. Wks., writes that the contract for constructing concrete superstructure to wharf at Mimico Asylum (bids opened Aug. 20) has been awarded to Miller & Cumming, 50 Front St., Toronto.

Honolulu, H. I.—Bids will be received until October 15, by Capt. C. W. Otwell, Corps. Engrs., U. S. A., at Honolulu, for furnishing and delivering 14,000 bbls. Portland cement, 16,500 tons broken stone and 7,000 tons of sand.

PROPOSALS OPEN.

THE COLLAPSE OF THE QUEBEC BRIDGE.

At 5.30 p. m., August 29, the whole of the superstructure of the Quebec bridge so far erected collapsed without warning and 75 of the 86 men known to be on it were killed. The substructure remained entirely uninjured. The superstructure was entirely wrecked and incredibly distorted. It lies on shore between the piers and under water in the river. The completed south anchor and cantilever arms, one-fourth of the suspended center span, the center span traveler, part of the main traveler, one locomotive and two material cars went down. The 215-ft. south approach span is intact and erection had not been commenced on the north half of the superstructure.

The wrecked portion weighed about 17,000 tons. But little of that on the river side of the main pier can be recovered. Most of the anchor arm eyebars have little or no injuries except bending; many are still perfect. Most connections endured when their members were destroyed. Nearly all parts of the structure fell 150 feet or more, some of them fell 400 feet. Many of the heaviest members were completely shattered and deformed by the fall.

No conditions or appearances have so far been observed that may not be satisfactorily attributed to the collapse, that is, nothing is indicative of cause rather than effect, and nothing yet points to the manner of the failure. Except the anchor arm eyebars, most of the truss members visible have been destroyed. Every failure visible can well be attributed to the collapse and almost any one of them, if occurring before the general collapse, would have inevitably caused it.

All bracing was complete and all connections fully made in all parts of the structure up to the fourth panel of the suspended span, where only the two lower chord sections had been erected. These were still fully supported by the traveler tackles, although fitters had commenced to bolt up the field-rivet holes and other men were making them extra secure for the night. No hoisting of any description was being done.

The main traveler had been dismontled, and its forward overhangs and some of the many upper transverse girders removed, reducing its weight of 1,104 tons (including suspended falsework) to about 800 tons. It had been for over nine months securely anchored on the ninth panel of the cantilever arm and besides being much lighter and less top heavy than ever before was stiffer on account of the skeleton of the erection platform and some temporary wind bracing recently added. None of its connections had been disturbed except those of members completely removed.

The small overhead center span traveler and its equipment weighed approximately 400,000 lbs. and had been for about 32 hours completely and securely anchored on the third panel of the center span, within two moves of its final position.

The truss stresses were about the same as had long been sustained and were only about three fourths of the live and dead load working stresses which the bridge was proportioned to endure after erection. No erection operations were in progress. The anemometer on top of the main post, over 400 ft. above the water, automatically recorded in the office a 26-mile wind. It had previously recorded a maximum of about 56 miles in the severest storms when the main traveler was in the same position and only a slight vibration was observed. Erection work was habitually maintained up to a wind velocity of 40 miles.

The locomotive, weighing perhaps 40 tons, had just delivered an 8-ton load to the traveler's suspended platform, had returned on the other track with the duplicate load and was near the end of the cantilever arm, moving slowly.

Preliminary adjustments of the connections between center and cantilever spans had been satisfactorily and easily made several weeks previously, and the connections not again disturbed.

The tops of the center posts had moved, as planned, 14 ins. from their original positions to within ½ in. of plumb, and the trusses were in perfect alignment. All joints were perfectly closed. The last two lower-chord splices in the anchor arm were being riveted and 90 per cent. of all field rivets had been driven in the anchor arm. In the cantilever arm 50 per cent. of all field rivets had been driven. In connections where all field rivets had not yet been driven from 90 to 100 per cent. of all open holes were filled with the largest bolts that could be entered.

All conditions were normal or more favorable than usual when a loud noise and screams were heard and immediately men on shore saw the end of the cantilever descend unbroken almost to the water's edge, the main traveler fall north, and the 315-ft. center posts and the anchor arm collapse. Only one man, who was within 75 ft. of the anchor pier, succeeded in reaching the approach span. Witnesses estimate the time from the noise till all was over from 20 to 40 seconds. None of the witnesses was within several hundred feet and none of them, or of the survivors, has yet reported any details of the destruction, which was complete and almost instantaneous.

All of the erection foremen were on the bridge, and all perished. They were A. B. Yenser, general foreman; J. L. Worley, foreman of erection; A. H. Birks, resident engineer for Phoenix Bridge Co.; James W. Aderholdt, assistant foreman, and C. A. Meredith, riveting foreman. Of the remaining victims, 35 were Indians from Montreal, mostly expert riveters, 29 were Canadians and the rest were experienced bridge men from the United States. All of the survivors are injured but are expected to recover.

The tremendous distortion and tearing apart of the members of the superstructure subjected the workmanship, design and materials to tests of the utmost severity and in no case observed was there any indication of poor quality or defect. At the annual meeting of the Quebec Bridge Co., held Sept. 3, the chief engineer, Mr. Hoare, stated that two days before the disaster he was notified by an inspector of a deflection of some parts at one point in the lower chord of the west truss. The inspector who made this report assured a representative of The Engineering Record that he never saw anything at the bridge which indicated dangerous conditions and Mr. Hoare was unwilling to state at the bridge company's meeting that the collapse was due to the deflection mentioned. When the matter was reported to Mr. Theodore Cooper, the latter advised the builders to stop loading the bridge any more until an inspection could be made. His telegram to this effect was sent but a short time before the bridge fell. At a hearing before the coroner's jury on Sept. 4, Mr. Hoare testified that other deflections of a similar character had been noticed, but none of such amount, and they had all been remedied.

Work on the preliminary and final designs had been in continuous progress for ten years and the latter were in accordance with usual American long-span practice. Special tests had been made of some of the large members, an exhaustive investigation was made of the proportions and general dimensions of the trusses and great care was taken in detailing the members and connections. Equal care was taken to secure the best structural results, to conform to the best shop practice and to facilitate the simplicity and safety of erection. All details were rigidly examined by the consulting engineer and none were adopted until finally approved by him. Several alternative designs were made for some of them before entirely satisfactory ones were obtained. Maximum stresses were limited, as stated in The Engineering Record of Dec. 1, 1906, and the highest quality of materials and workmanship was required and secured.

Great pains were taken to analyze all erection operations in advance and the steps of the work were accurately worked out in conference between the designing and erection departments. All positions and stresses and the arrangement of plant, location of travelers, derricks, tackles, etc., were precisely fixed before the members were shipped from the shops. The sequence of assembling all members, the treatment of connections, provisions for changing stresses and displacements due to varying conditions of the partially erected structure were made, and elaborate diagrams were furnished to the field force showing sequence and methods of all operations. A large number of special appliances were made for handling the truss members and erecting apparatus. Besides this all of the erection foremen and principal assistants were provided with copies of a 79-page book containing additional sketches and explicit instructions detailing the precautions and operations necessary for different parts of the work, such as making connections, adjustments, field-riveting splices, moving traveler, shifting tackles, hoisting pieces, etc. In this way nothing was left to judgement or individual choice, all was worked out and checked up in advance and provision made for all conditions of the work.

Materials, workmanship and finished members were rigidly inspected at the shop and mills by the contractor's employees and by representatives of the chief engineer, the consulting engineer and the Canadian government. After the members were received at the site, they were assorted and stored and received a final rigid inspection by the foreman in charge, who examined them for possible injury in shipment, verified their condition, tested clearances, performed necessary fitting and field riveting, attached hoisting and handling devices, placed them in the proper position for hoisting and loaded them on service cars which delivered them to the erecting traveler. As the work advanced, it was constantly watched by the general inspectors, rivet inspectors, foremen and by the resident engineers representing the chief engineer, the consulting engineer and the contractor. Precise instrumental observations and regular reports were constantly made.

Just before the collapse, the levels and alignment of the masonry piers were taken and when these observations were repeated after the collapse they were identical, showing no displacement whatever. Accurate levels were always taken of the chord panel points after each movement of the traveler and the last one taken showed the height of the last completed panel of the suspended span to be within ¾ in. of the calculated position, which latter had been very recently verified by a final repetition of the computations lasting five weeks and involving several thousand results.

After one or two panels of the center span had been erected, the adjustment devices at the ends of the cantilever arms were operated slightly to correct an inequality of about ¼ in. in the tops of the last vertical posts. The toggles were adjusted to about mean position, securely shimmed solid and the jacks removed. The thrust from center span on the cantilever end lower chord was only about 300 tons, much less than the final stress provided for there.

During the progress of erection the tops of the main vertical posts, at first set about 15 in. out of plumb towards the shore, had approached the vertical as intended and had almost attained exact verticality. The main

diagonals from the tops of the center posts were calculated to experience a change of sign of stress and had about arrived at the neutral intermediate stage; their joints were closed but not yet field-riveted. Other joints in the trusses had been open on account of camber and changing lengths and stresses, and had all been satisfactorily closed and riveting on them was being completed. Eyebars showing over 1/64-in. error in length had been rejected, and a preliminary inspection showed approximate uniformity of tension and universal tightness of all eyebars in any one member. All compression joints were at all times scrupulously maintained fully secured with at least 90 per cent. of the holes filled with the largest bolts that would enter until the field rivets were driven. Most of the lower chord joints contained 1,000 or more 1-in. rivets. They were made with thick double web and single flange cover splice plates, and the most explicit instructions were given and enforced that the top flange cover plate should never be removed for any consideration whatever, and that if the removal of the lower flange cover plate was unavoidable the webs must first be secured by special angles. This requirement had been very rigidly maintained by the inspectors, and it was stated that the riveters seldom or never removed the lower flange cover plate and never removed more than five bolts at a time in any part of the splice. The rivet gangs had become well trained and the inspectors had few condemnations to make in their work. The accuracy of the shop work was demonstrated by the fact that one air reamer in operation half the time sufficed to fit the connections for nine gangs of riveters.

Frequent observations on the longitudinal alignment of the trusses showed them to be maintained with great accuracy; the last one showed a deviation of less than 1 in. transversely, an amount within the deflections caused by the varying position of the sun.

The main traveler was very securely anchored to the span one panel from the end of the cantilever arm, and its weight, not including its suspended falsework, had been reduced to about 400 tons by the removal of its equipment, the forward top and bottom cantilever trusses, the suspended working platform and some of the massive overhead transverse girders. Otherwise its tower and rear trusses were intact and none of their remaining connections had been disturbed. It was additionally strengthened by temporary wind bracing above the trusses and by the movable erecting platform stringers by which the successive stories were to be removed, so that it was more stable, much less topheavy and developed a far less moment than ever before. All calculations were made on the assumption that this 2,250,000-lb. traveler would erect the whole structure and would move out to the center of the suspended span, nearly 900 ft. from the pier, thus developing an enormous bending moment. These stresses in the anchor and cantilever arms were of the same character and within the maximum working limits of those allowed for dead and live loads in the finished structure. They had, however, never been nearly attained, but for commercial reasons it had been decided to erect the suspended span with a 400,000-lb. overhanging derrick traveler on the top chords, and at the time of the accident the main traveler was being taken down and carried across the river for use in erecting the north anchor and cantilever arms. Care was taken not to add new materials in the suspended span erection faster than corresponding weight was removed from the main traveler, so that the erection stresses were much less than the maximum provided for in the design. Three of the most competent and experienced erectors were constantly stationed on top of the traveler to shift the tackles and inspect them, and whenever any incipient failure or wear was noticed by them or by anyone else, the rope or appliance was immediately replaced by new from a large duplicate reserve stock.

Work had recently been somewhat delayed by a scarcity of workmen, and new men had been hired in the United States in accordance with a written agreement with a labor union which fixed their wages and paid their transportation to and from the bridge in case they worked through the season. Some of these men failed entirely to report at the bridge, and others, after working a short time, wished to quit and demanded their return fare. This was refused on account of their not having worked through to the end of the season, as agreed, and in consequence a strike was declared. The old employees did not wish to lose time in the short working season on this account and the strike was soon declared off, but bitter feelings were said to exist a few days before the disaster.

At 5:30 p. m. all the erectors and their foremen and the engineer were on the bridge making everything secure for quitting at 5:45. Three four-man gangs of riveters and one hoisting engine man were on the anchor arm, and six gangs of riveters were on the cantilever arm, the erecting gang was busy on the travelers and everything is believed to have been in normal condition. Mr. E. J. Wickzer, an experienced foreman who had been on this bridge three years in charge of the erection of falsework and travelers, was 1,200 ft. or more away in the axis of the bridge on the north side of the river, where he was erecting the steel and wooden falsework for the anchor arm. He was watching the foremen directing the fitting of the splices on the 34-ton lower chord pieces still suspended from the traveler, when he heard a very loud noise like the report of a cannon or explosion and saw the end of the cantilever and center span commence to descend, moving somewhat up and down stream as it did so. As it seemed to approach near the surface of the water the main traveler fell north, the main vertical posts collapsed and the entire structure instantly collapsed and disappeared, the whole taking but a few seconds. This account was corroborated by one of the workmen who was on the south shore about 500 ft. west of the bridge and had his attention attracted by a loud explosion. He looked up and saw what seemed to him to be a cloud of smoke and saw the cantilever arm descend and the traveler fall before the collapse of the main post. Other accounts were substantially the same, but it was impossible to secure any statement from the survivors on the structure, who are rumored to have said that rivet heads flew off before the disaster.

All of the cantilever arm and suspended span, except a small part of the first panel of the cantilever which remains on top of the main pier, has disappeared under water which rapidly deepens from nothing at low tide at the foot of the pier to 200 ft. or more at the end of the cantilever arm, making it impossible to determine the position or condition of the trusses. The 315-ft. main center posts are each broken in several places and have their feet on the ground on the south side of the main pier and their tops on the north side with the finials only projecting above the surface of the water. The anchor span, which of course was not self-supporting without the reactions from the cantilever span, and, owing to lack of compressive strength in its top chord, must have necessarily collapsed with the failure of the cantilever span, if not before, fell flat on the ground almost in its vertical plane, deviating laterally a surprisingly small amount. The bottom chords and some of the truss members projected in some places a few feet beyond the original planes of the trusses on both sides of the bridge, but the top chords in general moved a little east. There was no connection between the anchor arm and approach span except the four lines of track rails, three of which pulled off from the anchor arm and hung down vertically almost to the bottom of the pier, and the compressed air pipe which pulled free at one connection near a long transverse arm without displacing the latter. The approach span remained entirely unaffected by the collapse. The anchor pier bent, 95½ ft. high from top of masonry to roadway level, has two vertical posts which enclose the anchor eyebars and are 17 ft. wide at the base parallel to the bridge axis. These revolved to the north about their lower ends, to a position a little beyond the horizontal, and the trusses in collapsing moved still farther north until the panel points, up to eight (counting the from the shore end) at least, were 100 ft. or more beyond their original positions.

The top chords of the fallen trusses remain continuous to and across the main pier. All of the top chord connections are substantially complete, many of the caps remaining on the pins, and these and all other eyebars visible are in remarkably good condition, many of them entirely uninjured and evidently suitable to use again, including most of those which have been twisted and bent. Only one bar, that in the second panel from shore, of the west truss is broken through the body. It is reported that none of the pinholes have been found elongated and none of the pins injured, but very few of either are yet accessible. Especial notice was taken of the fact that in all cases where visible the heavy transverse plates riveted across the vertical posts to receive the eyebars on separate pins were found in perfect condition.

Most of the members of the top lateral system are in approximate position, and in general the connections at their ends and intersections appear to have endured well, but many of the struts are badly broken and distorted. Below them few members of the span could be readily examined except such of the compression posts and lower chords as projected beyond the edges of the pile. Most of the posts were completely destroyed, being bent and twisted in all shapes and often broken quite across. The lattice angles and their rivets failed in many places and allowed the webs to bend and buckle, and in three instances the shop rivets through the several thicknesses of heavy plates forming a single web were all sheared off for a length of 20 ft. or more, allowing the individual plates to separate. In another case one of the long posts was split 60 or 70 ft., resolving it into its component built channels, one of which was exposed to view.

Under each panel point of the anchor span a large pit several feet deep had been dug for the grillage foundations of the steel falsework bents. The timber had been recently removed for use on the north shore foundations, and when the lower chords fell they rested on the surface of the ground between the pits with their panel points approximately over the middles of the pits, thus forming girders spanning the excavations. The vertical posts of the trusses concentrated the weight at these points, and the enormous momentum of the thousands of tons of steel falling from 50 to 150 ft. drove them down to the bottom of the pits, breaking the bottom chords in many places at both the shop-riveted splices on pin centers and at the field-riveted splices a few feet on the river side of each panel point. At the eighth panel point of the west truss, the two inner webs were broken through at the splice and the two outer webs were not broken. In the same panel a piece of chord about 12 ft. long was broken entirely free at both ends. In the first panel of the east truss the lower chord was bent at right angles in two places, forming a horizontal connection between two vertical portions extending from the pier bent to the ground. The worst effects were observed in the ninth panels of both trusses; in the west truss the lower chord was bent in the shape of a letter S, and the east truss chord was about the same.

At the time of the disaster field riveters were at work on the last two lower chord splices. Afterwards both were found to have been fully secured with all splice plates and angles bolted or riveted and both were broken through the splice on the line of the finished ends, with many rivets and bolts sheared off. At joint 5-6 of the east truss, the fully riveted web plates for the center ribs were sheared through. The outside rib was fully riveted and the rivets were sheared in one end. The inside rib splice plates were bolted at both ends, one end remained secured and at the other end all the bolts were sheared off. At the 5 end, where the rivets and bolts were sheared, the flange angles of the outside web were broken off through the rivet holes 3 and 4 ft. from the splice. Both top and bottom cover plates were fully riveted and remained attached to 6 chord and had all rivets sheared in 5 chord.

The top strut of the anchor pier bent broke square in two at the center through the connection for the end lateral anchorage. The end floorbeam remained intact with its stringers all attached and bent down nearly vertical, the web of the beam being twisted and bent and the connections to the truss sheared off. The portal between the main pier vertical posts was broken through all members.

At the feet of the vertical posts in the anchor pier bent, the webs on the river side sheared off from the main part for a height of about 8 ft., crumpling up as the posts revolved down on top of the pier masonry. Otherwise the posts were practically uninjured and in each case pulled out eight of the twelve 1-in. anchor bolts 3 ft. long grouted into the masonry on the shore side. Two or three others in each case were pulled partly out and sheared off. The vertical anchor eyebars inside the post remained pin connected together at this point, and the lower sets, projecting about 6 ft. above the top of masonry were moved about 2 ft. north at the top, taking a smooth, regular curve, edgeways, and elongating in the body about 1 inch, as indicated by the displaced cement line. The masonry was uninjured.

The destruction and mutilation of members was most terrific on the main pier, across which fell the 3,000,000-lb. vertical bent with 4x10-ft. four-web vertical posts 315 ft. high on centers with stresses of over 10,000,000 lb. each. Each post was made in five sections and weighed 712,000 lb., exclusive of the top and bottom pin connection pieces. They were connected by two massive plate girders and three deep lattice girders, all double. The foot of the east truss post, with its shoe and the V-shaped special lower chord section connected to it, fell on the shore side of the pier and formed one leg of a letter N with the top of the other leg resting against and rising a few feet above the top of the pier, where it was broken through and separated 20 ft. or more from the remainder of the post which formed a letter V on the river side of the pier with the vertex under water and the finial, projecting 40 ft. above the pin center, emerging nearly horizontal and pointing northeast. A portion of the west truss main post extends horizontally across the pier obliquely, from about 1 to 4 ft. clear of the east side of the west pedestal and 12 or 15 ft. above the masonry. In the middle of this section two or three of the webs are broken through and at one end are rolled up close, the remaining one or two webs are continuous but very badly shattered and twisted. Beyond this place, on both sides of the pier, the lattice bars are destroyed and the post webs mashed up together and bent at right angles, connecting the horizontal part of the post with vertical parts on each side of the pier. The wide, thick web plates and 8-in. flange angles are shattered, twisted and broken and look like rags. Between the bolsters the twisted and torn steelwork is piled up in a jagged mass about 20 ft. high above the bolster tops. In the upper part of the wreckage lie the top chords, still connected, and displaced transversely about 8 ft. east of their original positions.

The top of west post P4 lies across the west end of the pier just east of the west pedestal, with its eyebar connections intact. Both end panel lower chord sections of the cantilever arm are reported to lie in longitudinal planes with their center points about on the middle of the pier. Both of the great bolsters are intact and not displaced. They are only slightly injured in a few places by bending the edges of the cap plates and outside angle flanges. All the bolts between their cap plates and the pedestals are sheared off. The masonry of the main pier is uninjured, except where the sharp corners are broken by impact.

Throughout the wreck the eyebars and all connections, except those of the lower chords which were subjected to

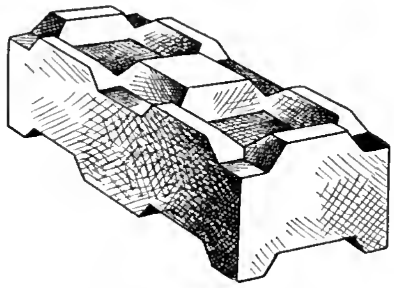
shearing conditions in the pits, endured remarkably well, but the latticing, even when made with well-riveted large angles, as in the main posts and chords, broke and sheared its rivets in many places, failing to develop the compressive strength of the webs and allowing them to buckle and twist between tieplates where, as a rule, they retained their original cross section. It was observed that in most cases where plates and angles were sheared it was through the rivet holes. In numberless cases very thick plates and angles were sheared, twisted, curled and bent at sharp angles, and their behavior and the texture of the fracture invariably indicated high-grade steel in which no sign of flaw or other defect was anywhere observed.

That anybody on the bridge should have escaped alive is miraculous, when it is considered that the least distance any part fell was over 150 ft. and that some of them fell over 400 ft., the bulk falling over 150 ft. Notwithstanding, eleven of the men who went down with the steelwork escaped alive and will probably recover from their injuries. Two brothers were riveting at the top of post P1, over 200 ft. above the rocky ground, one was inside the post and the other inside the transverse strut, both holding on rivets. The massive post was bent, crumpled and torn to pieces and the men escaped. Another riveter who was also holding on inside the lower chord near the main pier, more than 50 feet above the ground, went down in it and emerged alive. One man on top of the main traveler fell with it about 400 ft. into the water and was rescued, another on top of the small traveler fell about 250 ft. into the water and was also rescued.

The Canadian government has appointed a commission composed of Mr. H. Holgate and Mr. Kerry, of Montreal, and Professor Galbraith, of Toronto, to investigate the accident, and every effort is being made by the Quebec Bridge Co. and the Phœnix Bridge Co. to determine the cause of the disaster and fix the responsibility where it belongs, regardless of who may be at fault. No facts have been concealed and every facility was extended for the examination from which these notes have been prepared.

AN INTERLOCKING CEMENT BLOCK.

The accompanying illustration shows a new form of concrete building block recently put on the market in San Francisco. The shapes of the upper and under surfaces are the reverse of each other, and are arranged in such a manner that the blocks may be laid as headers or stretchers, with vertical joints having a horizontal distance apart equal to 1/4, 1/2, 3/4 or 1 times the length of



INTERLOCKING CONCRETE BLOCK.

the building block. This arrangement will make it possible to build concrete walls with any of the usual kinds of bond used for brickworks. The concrete block construction has the advantage that there is a bond in all of the horizontal joints, while in brickwork there is none. The blocks are supplied by the Interlocking Brick Co., 958 Market St., San Francisco.

PERSONAL NOTES.

Mr. F. C. Miller has resigned as resident engineer of the Sacramento division of the Southern Pacific Railway at Sacramento, Cal.

Mr. J. A. Purdam has been appointed superintendent of bridges, buildings and water supply in connection with the construction of the relocated line of the Panama R. R., with offices at Colon.

Willis G. Hale, a well-known architect of Philadelphia, died yesterday in a hospital there after a long illness, aged 55 years. He designed many of the handsome business buildings in Philadelphia.

Messrs. D. C. & Wm. B. Jackson, consulting engineers, have removed their Western office from Madison, Wis., to 508 Commercial National Bank Building, Chicago, and will open an Eastern office at Boston soon.

Mr. George Wildin, formerly assistant superintendent of motive power of the Lehigh Valley R. R., is now mechanical superintendent of the New York, New Haven & Hartford R. R., succeeding Mr. F. T. Hyndman.

Mr. H. W. Durham has resigned as resident engineer of the Isthmian Canal Commission at Panama to take charge of preliminary work on the Cape Cod Canal for the firm of Wm. Barclay Parsons, consulting engineers.

Henry Troth Townsend, president of the Logan Iron & Steel Co., Lewistown, Pa., for many years and a director of the Southwark Foundry & Machine Co., died recently at his home in Bryn Mawr, Pa. He was 56 years old.

Mr. John H. Griffith, Assoc. M. Am. Soc. C. E., formerly engineer of construction for the Metallurgical Company of America, New York City, has accepted an appointment as assistant professor of civil engineering at the University of Michigan.

The New York State Civil Service Commission will hold examinations Sept. 28 of candidates for the following positions: Bridge designer, $1,500 to $2,100 per year; bridge draftsman, $1,200 to $1,500 per year; architectural draftsman, $15 to $25 per week.

Mr. G. D. Fowle, signal engineer of the Pennsylvania R. R., has been appointed consulting signal engineer. Mr. A. H. Rudd, assistant signal engineer, succeeds Mr. Fowle as signal engineer, and Mr. C. C. Anthony, heretofore inspector of signals, has been appointed assistant signal engineer in place of Mr. Rudd.

The veterans of the Fifteenth and Fiftieth Brigades of New York Engineers, Army of the Potomac, met for their thirty-seventh annual reunion recently in New York City. Mr. Daniel M. Hulse, of Canadaigua, N. Y., was elected president of the organization for the succeeding year, and Canadaigua was chosen as the next meeting place.

Mr. Arthur E. Loder, formerly first assistant engineer of the Office of Public Roads of the Department of Agriculture, Washington, D. C., has been appointed chief engineer to the Los Angeles County Highway Commission, which is preparing plans for the construction of a system of permanent highways for Los Angeles County, to cost approximately three million dollars.

Congressman Theodore E. Burton, of Ohio, has resigned as chairman of the Rivers and Harbors Committee of the House of Representatives, his reason being that he requires more time for the consideration of general legislation than was available during his service as chairman of the committee. Mr. Burton will not, however, sever all connection with the problem of public waterway development. Recently he was appointed by the President to be chairman of the Inland Waterways Commission.

The appointment of Prof. E. R. Dewsnap as professor of railroad administration and management at the University of Illinois has been announced. Prof. Dewsnap, born in England of American parents, was educated at the University of Manchester, and at the Royal Technical College of Manchester. After graduating he spent considerable time studying the operation, construction and management of railroads in the United Kingdom, in France and in Germany, and was for a time an official on an English railway.

Col. Amos Stickney, Corps of Engineers, U. S. A., was retired from the army Aug. 27 with the grade of brigadier-general, having reached the age of 64 years, the limit of active service in the army. He was born in Missouri and was graduated from the Military Academy in 1864. He served as first lieutenant in the Corps of Engineers during the last two years of the Civil War and was honored successively during that time with the brevet titles of captain and major. From 1867 to 1881 he served in the Corps of Engineers as captain, being engaged mainly on river improvement work on the Des Moines and Mississippi rivers. In 1881 he was promoted to the rank of major and was transferred to river and harbor work in the South, on the Mississippi and other rivers. He was president of the Mississippi River Commission for nearly two years, and later was president of the Missouri River Commission. Since 1903 he has been stationed in New York City as chief engineer officer of the Atlantic division. He retired from that office and from his membership on the New York Harbor Line Board and the Lighthouse Board June 4, 1907, when he was granted leave of absence until the date of his retirement.

Rear-Admiral William A. Windsor, U. S. N., retired, died at his home in New York City, Aug. 29, aged 65 years. He studied engineering in the shops and drafting room of the Baltimore & Ohio R. R., and in 1862 was appointed a third assistant engineer in the navy. He was made a second assistant engineer in 1864, first assistant engineer in 1868, and chief engineer in 1889. Ten years later his rank was changed to commander. He was made a captain in 1901, and was placed on the retired list with the rank of rear-admiral in 1902. He was chief engineer and head of the department of steam engineering at the Brooklyn navy yard in 1898 and 1899.

Mr. W. J. Wilgus, vice-president of the New York Central & Hudson River R. R., under whose direction the electrification of the New York Central lines out of New York has been carried out, has been asked by Mayor Busse, of Chicago, to make a study of the problem of electrifying the trunk lines out of Chicago. The whole matter will be brought to the attention of the Council by Mayor Busse at once, as Mr. Wilgus, after Oct. 1, when his resignation from the Central Company takes effect, will be at liberty to entertain any proposition to act in a consulting capacity that may be made to him. Chicago's trunk system embraces twenty-three lines, all of which are now being elevated to avoid grade crossings.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Columbiana, Ala.—See "Power Plants, Gas and Electricity."

Phoenix, Ariz.—Robt. A. Craig, Supt., writes that about $150,000 will be expended in improving the plant of the Phoenix Water Co. purchased by the city, and that some time in September bids for improving the pipe system will be received. The pumping station is to be enlarged later. Howard S. Reed, C. E., Engr., Phoenix.

Russellville, Ark.—The following are reported to be the two lowest bids opened on Aug. 20 by the Bd. of Water Comrs. for constructing water works: Jas. G. Lyons, of Muskogee, Ind. Ter., $36,920, and the Southern Eng. & Constr. Co., Pine Bluff, $42,500.

Sunnyside, Cal.—W. L. Rice & Co., according to reports, are planning to install wells, pumps, tanks and mains in Sunnyside.

Delta, Colo.—Bids will be received until Sept. 10 for constructing a reservoir in Delta and Gunnison Counties to cost about $60,000.E. P. Martin, of Paonia, Colo., is the engineer; C. C. Hawkins may be able to give further information.

Canon City, Colo.—Bids will be received until Sept. 20 by the City Clk. for furnishing material and constructing an additional system of water works, consisting of a reservoir, located at and near Cottonwood Creek, and a pipe line connecting said reservoir with the present city water main, as advertised in The Engineering Record. A. H. Seely, Mayor.

Hudson, Colo.—It is reported that the Hudson Reservoir Co. is about to be formed here, by C. M. Ireland, J. N. and H. S. Bowles and others, to build an irrigation system to cost about $300,000. The company will acquire Bootleg reservoir and ditch, Jim Creek reservoir and others in Weld County.

Denver, Colo.—The Colorado Irrigation Lands Co. is reported incorporated by R. J. Bardwell, Albion K. Vickory and Willis F. Wolf, to do business all over the West; capital, $600,000.

Leadville, Colo.—The Colorado Fuel & Iron Co., it is reported, intends draining Turquoise Lake and constructing a new concrete dam to replace present dam at Sugar Loaf reservoir.

Wilmington, Del.—Bids are wanted for the new city filtration plant as advertised in The Engineering Record. Theo. A. Leisen, Ch. Engr.

Ft. Barrancas, Fla.—Bids will be received by Lieut. A. L. Rhoades, Q. M., U. S. A., until Sept. 26, for constructng a 200,000-gal reinforced-concrete reservoir, installing 1 steam pump and 1 steam air compressor, and extending water main at this post.

Athens, Ga.—The city is planning additions to the filter plant at the water works. Address J. W. Barnett, City Engr.

Pavo, Ga.—Jos. M. Brannon, Clk., writes that water works to cost $6,000 are to be constructed. Bonds for this improvement will be on the market about Oct. 15.

Atlanta, Ga.—It is reported that the Water Bd. and Special Council Com. has declared off all the bids received recently for the filter plant and the Gen. Mgr. of the Water Wks. has been directed to ask new bids.

Blue Ridge, Ga.—See "Power Plants, Gas and Electricity."

Dallas City, Ill.—See "Power Plants, Gas and Electricity."

Fairbury, Ill.—The City Council is reported to have decided to issue $3,000 bonds for water works.

Marion, Kan.—Fred. Lewis, Chm. Water Wks. Com., writes that Burns & McDonald, of Kansas City, Mo., are the engineers for the water works to be constructed with the $33,000 recently voted.

Baltimore, Md.—Water Engr. Quick is reported to be planning the laying of additional mains.

Baltimore, Md.—Press reports state that Building Inspector Preston estimates the cost for the repairs, new foundations, etc., for the Mt. Royal Pumping Station, which cares for the city's high-service supply at about $[illegible]5,000. This is independent of the cost for the new vertical pump which Water Engr. Quick will have placed in the pumping station in order to insure a good supply of water for this particular service, the estimated cost of which will be $150,000.

Saginaw, Mich.—The increasing of the water service by the installing of larger mains, is reported under consideration by the Water Bd.

Milan, Mich.—It is reported that an election will be held Sept. 10 to vote on the issuing of $30,000 bonds for water works.

Winona, Minn.—The city water is reported to have been condemned. Two plans are under consideration. One is to build an entirely new plant across the river in Wisconsin, and the other is to install a complete filtering plant.

Hastings, Minn.—The City Council is stated to have awarded the contract for drilling an artesian well for the new system of city water works to S. Swenson Artesian Well Co., of Minneapolis, at $3 per lin. ft., 10-in. pipe; $1.80 7⅝-in. casing, and below this well incased, $1.40; for testing, $1.25 an hour.

Hattiesburg, Miss.—Burke Jones, Supt. Water Wks., writes that about $20,000 worth of improvements are to be made to the water works. All the machinery has been purchased and the work is to be done by the city.

California, Mo.—Burns & McDonald, of Kansas City, Mo., are the engineers for the proposed water works which is to cost $60,000. Bonds are to be issued for this improvement. Edw. C. Nischwartz, Mayor.

Wonder, Nev.—The Wonder Water Co. is reported to have developed a supply of 125,000 gal. of water 7 miles distant, which it is proposed to pipe into town.

Highlands, N. J.—Bids will be received until Sept. 25 by the Mayor and Council for furnishing material and constructing a municipal water works. The work includes power house and foundation, stand pipe, pipe line, compound duplex steam pump, air compressor, driven wells and receiving tank, steam boiler and piping. Tunis H. Lane, Boro. Clk.; Runyon & Carey, 122 Market St., Newark, are the engineers.

Jersey City, N. J.—Bids will be received by the Bd. Street and Water Comrs. (Geo. T. Bouton, Clk.) until Sept. 9, for laying water pipe in Henderson St. Approximate estimates of quantities: 4,300 lin. ft. 24-in. pipe; 600 lin. ft. 6-in., 100 lin. ft. 8-in., 200 lin. ft. 12-in., vitr. pipe; 30 M ft. sheathing, 20 M ft. flooring, etc.

Washington, N. J.—The Washington Water Co., it is stated, intends making improvements to its plant at a cost of about $20,000 which will include the construction of a storage reservoir on the Isaac Case Farm above Roaring Rock and the laying of about 2 miles of new mains in the boro.

**Auburn, N. Y.*—The Water Comrs. are stated to have received bids as follows for water wheels at the lower pumping station: S. Morgan Smith Co., $4,400, and Trump Mfg. Co., $4,500 (awarded contract).

Rome, N. Y.—Bids will be received until Sept. 25 by Bd. of Water & Sewer Comrs. (Harvey S. Bedell, Chmn.) for constructing a dam on Fish Creek with accessories; also a tunnel about 5,500 ft. long, as advertised in The Engineering Record.

Oswego, N. Y.—It is reported that arrangements are being made to meet State Engr. Hill and go over preliminary plans for the new city water plant.

Fishkill, N. Y.—Brown & Freeman, of New York City, have been granted a franchise to lay pipes throughout the village to sell water to consumers. The source of supply will be Van Wyck Lake.

Shelby, N. C.—J. F. Tiddy, City Clk., writes that the water works and sewerage system are to be constructed at a cost of about $100,000, but bids for the construction will not be opened until after bonds have been sold. H. E. Knox, Jr., of Charlotte, is the engr.

Wilmington, N. C.—The city is said to be considering the purchase of the plant of the Clarendon Water Works Co.

Mandan, N. D.—The Commercial Club is said to be considering a proposition made to the city by P. H. Michaels, of Mansfield, O., to install water works.

Cincinnati, O.—Frank Borns is stated to have bid $2,532 for laying pipe in Grand, Warsaw and Rice Aves., Price Hill, and $1,983 for laying 3,515 ft. of 8-in. pipe at the river and main pumping stations.

Bids will be received by the Bd. Pub. Service (M. J. Keefe, Clk.) until Sept. 12, for furnishing material and laying c. i. water pipe, special castings and valves in portions of numerous streets.

New Carlisle, O.—J. E. Johnson, Village Clk., writes that it is not proposed to construct water works.

Cleveland, O.—Preliminary plans for the West Side water works tunnel are not yet completed. It may be 3 or 4 months before definite steps are taken. C. F. Schultz, Ch. Engr.

Bryan, O.—Bids will be received until Sept. 10 by the Bd. Trus. Pub. Affairs (R. L. Starr, Pres.), for furnishing and delivering f. o. b. cars Bryan, 6,600 ft. 4-in. c. i. water main pipe to operate under water pressure of 150 lbs. and 7 fire hydrants with steamer connections.

Ashland, O.—The following are reported to be the bids opened Aug. 26 by the Bd. Pub. Affairs on (*a*) pump engine and (*b*) 2 boilers for the water works plant: Snow Steam Pump Co., Buffalo, *a* $15,250; Columbus Equipment Co., *b* $5,590. Columbus Equipment Co., Rob Mumphard boiler, *b* $5,050; Springfield Boiler & Manufacturing Co., *b*, f. o. b. Ashland, $3,881; Canton Hughes Pump Co., *a* $7,975; Gem City Boiler Co., *b* $6,250; D. Connelly, *b* $6,100; Marine Engine & Machine Co., *a* $14,975; Platt Iron Works Co., *a* $10,225; Kingsford Fdry. & Machine Wks., *b* $3,290; D'Olier Engineering Co., *a* $14,950; Canton Hughes, *a* (2 bids) $6,725 and $6,170.

Guthrie, Okla.—W. W. Miller, City Engr., writes that the citizens have voted to issue $40,000 water bonds, $30,000 for storm sewers, $10,000 for sanitary sewers, and $10,000 for street improvements.

Pawnee, Okla.—M. H. Brejz, City Clk., writes that he will receive bids until Sept. 18 for $20,000 water works bonds. Improvements are contemplated to the water works system.

Lebanon, Pa.—It is stated that the enlarging of the water supply is being agitated.

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

Reedsville, Pa.—The Reedsville Water Co. is reported to be considering the construction of a reservoir.

**Belle Fourche, S. D.*—Contracts for work in connection with the irrigation project at Belle Fourche, it is stated, have been awarded as follows: For the construction of 2.8 miles of lateral, involving 30,700 cu. yds. of excav., Harry L. Shevling, Belle Fourche, $8,706; eight miles of lateral construction, involving 43,700 cu. yds. of excav., Primus & Wilson, of Orman, S. D., $4,975.

Newport, Tenn.—See "Power Plants, Gas and Electricity."

Brownsville, Tex.—See "Power Plants, Gas and Electricity."

Pierce, Tex.—It is stated that bids will be received by A. P. Borden, executor A. P. Pierce Estate, Pierce, until Sept. 10, for constructing pumping plant to consist of two 36-in. centrifugal pumps, direct connected to cross compound condensing Corliss engines of about 500 h. p. Water tube boilers will be used.

R[illegible] City, Tex.—A. F. Davis, City Secy., writes that bids will be called for in about 30 days for the construction of water works, to cost about $15,000.

Salem, Va.—See "Power Plants, Gas and Electricity."

Menasha, Wis.—See "Power Plants, Gas and Electricity."

Toppenish, Wash.—See "Power Plants, Gas and Electricity."

Winlock, Wash.—Secor Bros. & Mears, of Portland, Ore., it is stated, have made an offer to the city to install a complete water system of 2,000 ft. of 8-in. water main and 7 hydrants, at $1,800. Action has been postponed until plans and specifications are completed by the engineers.

London, Ont.—Two propositions are to be submitted to the people, one to provide $293,500 for extending the domestic water supply, and one for $182,000 to provide for a hydraulic power plant and reservoir.

Weyburn, Sask.—The citizens are reported to have voted to issue $50,000 bonds to install a water works system.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Oakland, Cal.—Bids will be received until Sept. 18 by the Bd. Pub. Wks. (Walter B. Fawcett, Secy.), for furnishing material and constructing a concrete and ironstone intercepting sewer in a portion of Wood St.

Pasadena, Cal.—City Engr. S. J. Van Ornum is said to be preparing an estimate of the cost for a main sewer to accommodate the recently annexed portion of the city. The building of the sewer is to be submitted to a vote of the people.

New Haven, Conn.—Bids will be received until Sept. 16 at the office of C. W. Kelly, City Engr., for constructing sewers in portions of several streets.

Joliet, Ill.—The Bd. Local Improv. Aug. 26 authorized the construction of the First Ward sewer trunk system. Probable cost, $31,000. H. A. Stevens, City Engr.

Elgin, Ill.—The building of storm and sanitary sewers in the west side district is reported under consideration.

Springfield, Ill.—Frank H. Hamilton, City Engr., writes that it is proposed to construct a brick sewer in the south part of the city at a cost of $50,000.

Chicago, Ill.—Bids will be received until Sept. 11 by John J. Hanberg, Comr. Pub. Wks., for constructing a 6½-ft. sewer in 35th St. extended and the Illinois Central right of way.

**Collinsville, Ill.*—We are informed that Johnson & Co., of Collinsville, have secured the contract for constructing sanitary septic sewer system in Dist. 1 (bids opened Aug. 20 by the Bd. of Local Improv.) at the following bid (Engineers, Burns & McDonnell, Scarritt Bldg., Kansas City, Mo.): Excav., 8 ft. deep, 35 cts. per cu. yd.; excav., 8 to 12 ft. deep, 75 cts.; excav., 12 to 16 ft. deep, $1.10; vitr. pipe, 8-in., 21½ cts. per lin. ft.; 10-in., 26¾ cts., 12-in., 32½ cts.; 6-in. on 8-in. Y connections, 35 cts.; 6-in. on 10-in. Y connections, 47 cts.; 6-in. on 12-in. Y connections, 57 cts.; 12-in. c. i. pipe, $1.90 per ft.; 10-ft. manholes, ea., $57; 15-ft. manholes, ea., $72.25; flushtanks, ea., $105.60; lamp holes, ea., $10; concrete, $9.75 per cu. yd.; total, $18,831. Time of completion, Jan. 1, 1908. Totals of other bids: John Hamm, Litchfield, Ill., $20,700; Staultz & Gass, Belleville, Ill., $18,875.

**Evansville, Ind.*—The contract to construct the Kentucky Ave. sewer (bids opened Aug. 30) has been awarded to the Hallerbach & May Contr. Co., of Evansville, for a concrete sewer at $168,926.

Huntington, Ind.—It is stated that bids will be received by the Common Council until Sept. 10, for constructing sewer in Market St. and Grayston Ave. J. B. Vernon, City Engr.

Richmond, Ind.—No bids were received Aug. 30 for sewer improvements. F. R. Charles, City Engr.

South Bend, Ind.—It is reported that the Bd. Pub. Wks. will soon ask bids for constructing a sewer in Cherry St. and in Notre Dame Ave.

Remsen, Io.—This city is reported to be planning the construction of a sewerage system.

Wapello, Ia.—It is reported that it is proposed to construct a sewer at a cost of $6,515. E. F. Christie, City Recorder.

Des Moines, Ia.—The lowest bid opened on Aug. 23 by the Bd. of Pub. Works for the construction of the Center Drive sewer system is reported to have been submitted by the Geo. M. King Constr. Co., at $1.37 per lin. ft.; total, $21,920. The L. L. and T. A. Hansman Co. bid for this sewer $1.45 per lin. ft.

Paducah, Ky.—Bids will be received until Oct. 1 by the Bd. Pub. Wks. for constructing about 14 miles of 6-in. vitrified pipe sewer laterals ranging in depth from 12 to 6 ft., as advertised in The Engineering Record.

**Louisville, Ky.*—The following are the bids opened Aug. 28 by the Comrs. of Sewers (J. B. F. Breed, Ch. Engr.) for constructing Happy Hollow Sewer: R. L. Clark & Co., 605 W. Market St., $25,641 (awarded contract); Paul & Kershner, Dayton, O., $31,489; F. W. Folz & Co., Cincinnati, O., $31,770; Kentucky Constr. Co., Louisville, $35,289; C. F. Fitch & Co., Louisville, $43,050. The detailed bid of the successful bidder, R. L. Clark & Co., was as follows: 3,551 lin. ft. earth excav. and cover embankments for main sewer, 61.5 cts.; 40 cu. yds. earth excav. and embankment for junction section, $10 (lump sum); 1,987 cu. yds. concrete masonry, class A, exclusive of cement and steel, $6; 25 cu. yds. concrete masonry, class B, of cement, $3.50; 172,419 lbs. reinforcing metal in place, 03.5 cts.; 25 cu. yds. excav. in trench below masonry, $1; 40 cu. yds. gravel refilling in trench below masonry, $1.25; culvert section, complete across 26th St. cement and steel, $225; 25 cu. yds. masonry, class A, junction section, $10; 2,317 bbls. Portland cement used in work, $2; 87 lin. ft. manholes complete exclusive of cement and steel, 90 cts.; connections with existing sewers, $50 (lump sum); cleaning of grounds and work on completion of contract, $50 (lump sum).

New Bedford, Mass.—City Engr. Williams has prepared plans and estimated for a sewerage system for the northerly portion of the city.

St. Paul, Minn.—The following are reported to be the bids opened on Aug. 22 by the Bd. of Pub. Wks. for sewer on Reaney St., to consist of 625 lin. ft. of sewer of concrete and steel, 350 ft. of 20-in. pipe, 327 ft. of 15-in. pipe, and 600 or more ft. of smaller pipe. John Lind, $7,300; Ryan & Johnson, $7,372; Jas. Forrestal, $7,422; Nicholas Feyen, $7,783, and O'Neil & Preston, $8,498.

Albert Lea, Minn.—The City Council has been petitioned to take steps immediately to construct the trunk sewer.

Winona, Minn.—See "Paving and Roadmaking."

Canton, Miss.—Bids will be received until Sept. 19 for furnishing material and constructing system of house sewers complete, approximately 7 miles of 18 to 6-in. pipe sewer. O. S. Miller, Mayor. Engineer, Walter G. Kirkpatrick, of Jackson.

Billings, Mont.—Bids will be received until Oct. 1 [illegible] Main St. sewer at a cost of about $85,000. Henry Gerharz, City Engr. J. D. Matheson, City Clk.

Aurora, Neb.—Bids will be received until Sept. 21 by Dennis Saylor, City Clk., for constructing a sewer system, as advertised in The Engineering Record.

Jersey City, N. J.—Bids will be received until Sept. 9 by the Bd. Street and Water Comrs. (Geo. T. Bouton, Clk.), for constructing sewers in Union St., Jackson, Claremont, Garfield and Carteret Aves. Approximate estimate of quantities: 1,757 lin. ft. 96-in. steel pipe; 21,000 lbs. steel I-beams; 36,500 lin. ft. piles driven; 67,600 ft. capping; 122,500 ft. flooring; 123 M ft. sheathing; 2,000 cu. yds. concrete, etc.

Brooklyn, N. Y.—Bids will be received until Sept. 18 by Bird S. Coler, Boro. Pres., for furnishing material and constructing sewers in Flatbush Ave. extension, westerly side, from Nassau St. to Fleet St., etc., Sect. Nos. 1 and 2.

Bids will be received by Bird S. Coler, Boro. Pres., until Sept. 18, for furnishing material and reconstructing sewer basins in Roebling St., at the north corner of S. 4th St., at the northerly and westerly corners of S. 3d, etc., in all about 32 sewer basins.

Shelby, N. C.—See "Water."

Hamilton, O.—The following are reported to be the bids recently received here for the construction of the Market St. storm sewer: Frank J. Davis, $17,552; W. H. Louthan, $16,992, and Thos. Bridge & Sons, $16,505.

Local press reports state that bids will be received on Sept. 21 by the Bd. of Pub. Service for constructing sewers and paving on S. D St.

Springfield, O.—It is stated that bds are wanted until Sept. 10 for $24,042 sewer bonds. S. M. Harris, City Aud.

**Canal Dover, O.*—The following are the bids received for constructing the sewer: Adam Schwab, New Philadelphia, O., $16,723 (awarded contract. Sheets and Lyon, Newcomerstown, O., $16,802, Parshall & Co., Akron, O., $20,608.

Dayton, O.—The Clerk, it is stated, has been authorized to receive bids for constructing a storm water sewer from the present terminus of the Chicago Ave. sewer.

Cleveland, O.—Bids will be received until Sept. 11 by the Bd. Pub. Service (A. R. Callow, Secy.), for constructing sewers in portions of Dawning and Columbia Aves., and culverts over branch of Doan Brook at Murray Hill Rd., S. E., and at E. 114th St., Caswell.

**Fostoria, O.*—Geo. M. Fink is reported to have secured the contract to construct a sewer from Main and Jones Sts. to the Bulk & Bottle Glass factory at $3,300.

St. Joseph, Mo.—The holding of an election next spring to vote on the question of issuing $250,000 bonds for sewer extensions is being agitated.

Delaware, O.—All bids opened Aug. 23 by the Bd. Trus. Girls' Industrial Home (T. F. Dye, Secy.) for constructing a sewage disposal plant at above home, to consist of about 5,040 ft. 3, 6, 8, 10 and 12-in. sewer pipe, 2,004 lbs. c. i. specials, 4,764 lbs. steel, 1,378 cu. yds. crushed stone, etc., have been rejected and new bids will be received on Sept. 27. E. G. Bradbury and G. P. Shute, Engrs., 85 N. High St., Columbus.

Guthrie, Okla.—See "Water."

El Reno, Okla.—D. Adams, City Clk., writes that the city is getting ready to sell bonds to the amount of $25,000 for pipe sewers. Engineer, R. N. Whittlesey, of El Reno.

York, Pa.—The issuing of $750,000 bonds for paving, sewer and park improvements is reported under consideration.

Allegheny, Pa.—The Common Council in special session Aug. 27 passed finally ordinances authorizing the employing of an architect to prepare plans and specifications for a sewer plant at the City Home.

Canton, Pa.—It is reported that the State Bd. of Health has refused to renew the permit to this boro. to discharge sewage into Mill Creek and that the building of a sewage disposal plant at a cost of about $30,000 is being agitated.

Groton, S. D.—Bids will be received by F. E. Bandimere, City Audr., it is stated, until Sept. 11, for constructing about 2,568 lin. ft. of sewers.

Salem, S. D.—The election which was to have been held Aug. 30 on the question of issuing $20,000 bonds to construct a sewerage system has been postponed until spring on account of unsatisfactory plans. F. H. Putnam, City Aud.

Portsmouth, Va.—On Oct. 1 the city expects to construct an outlet for the Fifth Ward sewerage system by day labor.

Salem, Va.—See "Power Plants, Gas and Electricity."

**Centralia, Wash.*—S. A. D. Eaton, City Engr., writes that the contract to construct a trunk sewer (bids opened Aug. 27) has been awarded to the Northern Bridge Co., of Tacoma, at $22,150.

* *Items marked thus give the names of parties awarded contracts.*

Baraboo, Wis.—The City Council has adopted a resolution authorizing the Sewer Com. to reject all bids recently received for constructing the 2d Ward sewer and authorizing the Com. to do the work itself, using concrete for the piping and letting cement work only to contractors.

BRIDGES.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—Bids will be received until Oct. 14 by the Bd. Pub. Wks. (Horace B. Ferris, Secy.) for constructing a reinforced concrete bridge across Los Angeles River at 7th St., as advertised in The Engineering Record.

Danbury, Conn.—The Bd. of Finance is reported to have appropriated $11,000 for the construction of a bridge over the Still River on White St.

Anacostia, D. C.—Bids will be received until Sept. 14 by the Comrs., D. C., Washington (H. L. West, Comr.), for filling the approaches to the Anacostia Bridge, D. C., amounting to about 90,000 cu. yds., as advertised in The Engineering Record.

Aurora, Ill.—The construction of a bridge over Main St. is reported contemplated, at a cost of $100,000. The Aurora, Elgin & Chicago Ry. Co. (Chas. Jones, Ch. Engr., Wheaton) is said to be interested.

Marion, Ind.—It is reported that the Bd. Co. Comrs. will receive bids until Sept. 10 for the construction of a steel bridge.

Council Bluffs, Ia.—The following bids are reported opened Aug. 19 for constructing two reinforced-concrete bridges over Indian Creek, one at Frank St. and another at 8th St.: E. A. Wickham Council Bluffs, $10,980 for one and $21,500 for both; Marsh Bridge Co., of Des Moines, $9,380 for one, or $11,300 for both; N. W. Stark & Co., of Des Moines, $5,050 for one, or $10,577 for both.

Williamsport, Md.—We are informed that bids have not yet been asked for proposed bridge to be constructed by the Washington & Berkeley Bridge Co. (V. Cushwa, Pres.) over Potomac River at Williamsport. Specifications are in course of preparation and borings for bed rock are being made. The work will be of reinforced concrete construction; probable cost, $80,000. Engineer, Mason D. Pratt, of Harrisburg, Pa.

*Springfield, Mass.—The following are the bids opened Sept. 3 by the Bd. Superv. for constructing the steel superstructure of Abbe Ave. bridge: Boston Bridge Wks., Boston, Mass., $14,999 (awarded contract); H. P. Converse & Co., Boston, Mass., $19,376; R. F. Hawkins, Springfield, Mass., $19,450; United Constr. Co., Albany, N. Y., $17,832; New Jersey & West Virginia Bridge Co., Manasquidoit, N. J., $15,630; Henry L. Norton, Boston, Mass., $15,499; Berlin Constr. Co., Berlin, Conn., $16,582; Canton Bridge Co., Albany, N. Y., $17,740; Penn Bridge Co., Philadelphia, Pa., $16,945.
Bids received at same time and place for constructing superstructure of Mill River Bridge are stated to have been as follows: Fred T. Ley & Co., Springfield, $18,150; Berlin Bridge Co., Berlin, Conn., $15,750.

Barnstable, Mass.—The following are reported to be the bids opened Aug. 26 by the Co. Comrs. at Barnstable for constructing a highway bridge over Bass River, between Yarmouth and Dennis: Berlin Constr. Co., $31,500; Baltimore Bridge Co., $31,200; John F. Gill Co., superstructure, $22,840; New Jersey, West Virginia Bridge Co., superstructure, $15,400. Canton Bridge Co., superstructure, $13,500.

Bay City, Mich.—Bids will be received until Sept. 23 by the Bay County Bridge Comn. (John H. Blomshield, Engr.), for dredging or otherwise constructing an embankment, containing about 50,000 cu. yds., forming the south approach to Belinda St. Bridge at Bay City, as advertised in The Engineering Record.

Newark, N. J.—The Joint Bridge Com. of Bd. of Freeholders of Essex and Hudson Counties is stated to have recommended that the Bridge St., Plank Road and Jackson Sts. bridges be repaired. The improvements will probably cost $300,000.
The 11th Ward Bridge Com. of Bd. of Freeholders is stated to have opened bids as follows on Aug. 27 for constructing a bridge over Morris Canal on Central Ave.: Hedden Iron Constr. Co., $55,000; Hay Foundry & Iron Wks., $49,985; and A. E. Sandford Co., $51,250.

Rensselaer, N. Y.—There is some talk of constructing a viaduct over the N. Y. Central & Hudson River R. R. Co. and the B. & A. tracks at 3d Ave.; if constructed it would cost about $180,000. John J. Sullivan, Pres. Chamber of Commerce, is reported interested.

*Lebanon, O.—Saml. D. Henkle, County Surveyor, writes that the following are the bids opened on August 24, for constructing high truss steel bridge with concrete floor, 2 spans, 135 ft. ea., and 16-ft. roadway, over Little Miami River: Cleveland Bridge Co., Cleveland, $9,670; Central Bridge Co., Indianapolis, Ind., $8,450; Champion Bridge Co., Wilmington, $8,460; Central Concrete & Constr. Co., Canton, $9,990; Riverside Bridge Co., Martins Ferry, $10,365; Oregonia Bridge Co., Lebanon, $7,950. (awarded contract).

Cincinnati, O.—Bids will be received until Sept. 20 (readvertisement) by the Bd. Pub. Service (M. J. Keefe, Clk.) for furnishing material and reconstructing and repairing the structural steel work of the Liberty St. viaduct.

*Toledo, O.—Garrigan Bros., Valentine Bldg., are stated to have secured the contract for paving with brick Phillips Ave. The bid on concrete base was $42,549, and broken stone, $36,137.

Guthrie, Okla.—The citizens are stated to have voted $7,000 bonds for constructing a steel and concrete bridge at 5th St.

Pendleton, Ore.—The construction of a steel bridge to replace the Lee St. structure is reported contemplated, at a cost of about $20,000.

Towanda, Pa.—The following bids are reported opened Aug. 15 by the County Comrs. for constructing the James St. Bridge over Susquehanna River between North Towanda and Wysox: Nelson Constr. Co., $96,578; A. Buchanan, $111,500; Penn Bridge Co., $94,095; New Jersey Bridge Co., $93,400; Owego Bridge Co., of Owego, N. Y., $96,400; E. Whalen, $92,000; Canton Bridge Co., $91,150; York Bridge Co., $95,300.

Woonsocket, R. I.—See "Paving and Roadmaking."

Gaffney, S. C.—Bids will be received by the Bd. Co. Comrs., until Sept. 10, for constructing a steel bridge over Broad River at Stacey's Ferry, to consist of 2 spans 165 ft. each, width 16 ft., steel piers 26 ft. high. E. F. Lipscom, Co. Superv.

Houston, Tex.—See "Paving and Roadmaking."

Galveston, Tex.—See "Miscellaneous."

Humble, Tex.—Bids will be received until Sept. 11 by John B. Ashe, Co. Aud., Houston, for constructing a steel bridge over the San Jacinto River at Humble.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Selma, Ala.—V. B. Atkins, Mayor, writes that bids will be called for in Oct. for paving streets with asphalt, brick or bitulithic. Julian Smith, City Engr.

*New Haven, Conn.—Contracts for paving (bids opened Aug. 19) are stated to have been awarded as follows: State St., with bitulithic, Warren Bros. Co., of Boston, Mass., $2.75 per yd.; Oak St., with Hassam pavement, to Connecticut Hassam Co., at $1.90 per yd. B. D. Pierce, of Bridgeport, secured the contract for paving Carlisle St. The proposed improvements will cost about $50,000.

Washington, D. C.—Bids will be received until Sept. 21 by the Comrs. D. C., for laying cement sidewalks in the District of Columbia, as advertised in The Engineering Record.

*Jacksonville, Fla.—Philip Prioleau, City Engr., writes that the contract to pave 6,060 sq. yds. on Adams St. (bids opened Aug. 26) has been awarded to Georgia Eng. Co., of Augusta, Ga., at $1.69 per sq. yd.

Danville, Ill.—Bids will be received until Sept. 26 by the Bd. Local Improv., for paving portions of Oakwood Ave., Green and Main Sts., and curbing and paving a portion of Van Buren St.

Logansport, Ind.—The Bd. of Pub. Wks., it is reported will receive bids until Sept. 17 for grading, graveling, curbing, etc., on portions of 7 streets.

South Bend, Ind.—It is reported that bids will be received by the Bd. Pub. Wks. until Sept. 10 for the paving, curbing and constructing cement sidewalks on St. Peters St.

*Valparaiso, Ind.—R. B. Ewing, City Clk., writes that the contract for paving 2 blocks with Metropolitan block (bids for which were received Aug. 23) has been awarded to H. C. Finley, of Hoopeston, Ill., at $1.64 per sq. yd.
Bids received at the same time for other paving, have been rejected and news bids are to be received Dec. 13. R. B. Ewing, City Clk.

Sioux City, Ia.—Bids will be received until Sept. 10 by the City Council at the office of the City Clk., for furnishing material and constructing sidewalks of cement, brick or stone on portions of numerous streets.

Des Moines, Ia.—Bids will be received by the Bd. of Pub. Wks., it is stated, until Sept. 16, for grading, etc., E. 18th and Brooks Sts. George D. Dobson, City Engr.

Lewiston, Me.—About 3,000 sq. yds. of granite block pavement is to be laid.

Baltimore, Md.—Bids will be received until Sept. 11 by the Bd. Award (J. Barry Mahool, Pres.), for grading, curbing and paving with macadam, a portion of Kate Ave.

Boston, Mass.—The following are the bids received Aug. 27 by the Massachusetts Highway Comn. at Boston for (*a*) road in Haverhill, (*b*) road in Barnstable: W. H. Gross & Co., *a* $15,458; F. E. Ellis, *a* $13,727; J. E. Watkins, *a* $12,010; R. F. Hudson, *a* $11,266, *b* $6,640; Ed. Adams, a $10,964; William Sears, b $6,329; C. H. Thomas, b $6,053.

South Haven, Mich.—The City Council is stated to have decided to pave Indiana Ave.

St. Joseph, Mich.—Bids will be received by Harry L. Murphy, City Clk., it is stated, until Sept. 18, for grading and paving portions of Main St. and Niles Ave.

*Mankato, Minn.—The contract for macadamizing and curbing a portion of 5th St. is reported to have been awarded to T. R. Coughlin Co., at $5,283.

Minneapolis, Minn.—J. A. Ridgeway, Secy. of Park Comrs., writes that the Boulevard to and around Lake Minnetonka is as yet only a possibility; no legislation has yet been passed authorizing its location or construction.

Winona, Minn.—Bids will be received by City Council until Sept. 16, for paving alley 23 with vitr. brick; also small piece storm water sewer and small piece sanitary sewer; also filling in a bridge on Wisconsin Road, about 50 ft. long.
*Contract was let on Aug. 26 to Abell & Braley Co., for macadamizing Lafayette Sq.

Marshfield, Mo.—W. P. McKnight, City Clk., writes that no contract was awarded Aug. 30 for 98,000 ft. of macadamized streets and that new bids will probably be asked.

Billings, Mont.—Bids will be received until Sept. 17 by J. D. Matheson, City Clk., for macadamizing about 8,500 sq. yds. and 3,000 lin. ft. concrete curb and gutter in Special Improv. Dist. No. 10; also until Oct. 1, for macadamizing and drainage of certain streets in Improv. Dist. No. 20, consisting of approximately 58,653 sq. yds. gravel macadam, 3,000 lin. ft. of sewer complete, 12 manholes complete, 15 catch basins and 17,400 lin. ft. of gutter complete; also, same date and place, for paving with shale brick certain portions of streets in Special Improv. Dist. No. 21, requiring about 6,305 sq. yds. of shale brick pavement, all 3 proposals advertised in The Engineering Record.

Butte, Mont.—The City Council is stated t have passed a resolution providing for the paving of Dakota St.

Hampstead, N. H.—Bids will be received until Sept. 17 by A. W. Dean, State Engr., at Concord, for grading and surfacing with trap rock, a portion of Main St.

*Westfield, N. J.—A. W. Vars, Town Surveyor, writes that the contract for macadamizing a portion of Euclid Ave. (bids opened Aug. 19) has been awarded to Wm. H. Weldon, of Rahway, for $2,739.

*Riverton, N. J.—E. A. Pancoast, Chmn. Highway Com., writes that the contract for 30,000 sq. yds. cement paving (bids opened Aug. 28) has been awarded to A. Bruce Wallace Co., 318-20 Drexel Bldg., Philadelphia, Pa., at 17½ cts. per sq. ft.

Jersey City, N. J.—Bids will be received until Sept. 9 by the Bd. Street and Water Comrs. (Geo. T. Bouton, Clk.) for repaving Bowers St., requiring about 5,430 sq. yds. asphalt, etc.; also Griffith St., requiring about 5,606 sq. yds. Belgian paving, etc.

*Camden, N. J.—The City Council is stated to have awarded the contract for paving with asphalt a portion of Haddon Ave. to the Filbert Constr. Co., at $1.91 per sq. yd.

Woodcliff Lake, N. J.—Bids will be received until Sept. 24 by the Mayor and Council of Woodcliff Boro., for macadamizing Mill Road and Pascack Road, Woodcliff Heights Road and Glen Road, a distance of 13,768 ft., as advertised in The Engineering Record.

Palisades Park, N. J.—It is stated that bids will be received by Boro. Council until Sept. 12, for grading and macadamizing portions of Edsall Boul. and Brinkerhoff Ave. E. R. Davis, Boro. Clk.; Lemuel Lozier, Boro. Engr., Bank Bldg., Hackensack, N. J.

Brooklyn, N. Y.—The following are the bids received Aug. 21 by Bird S. Coler, Boro. Pres., for regulating and repaving with asphalt on a concrete foundation the roadway of Bocrum St. from Bway. to Leonard St., Manhattan Ave. to Bushwick Ave., etc.: Crawford Co., 52 9th St., Brooklyn, $30,908; Uvalde Asphalt Paving Co., $31,142, and Barber Asphalt Paving Co., $31,380. The detailed bid of the lowest bidder (Crawford Co.), is as follows: 10,050 sq. yds. paving, $1.30; 20 sq. yds. old stone pavement to be relaid, 40 cts.; 1,900 cu. yds. concrete, $6.90; 5,420 lin. ft. new curb, 98 cts.; 600 lin. ft. old curb to be reset, 40 cts., and 30 noiseless covers and heads complete for sewer manholes, $18.
Bids will be received Sept. 18 by Bird S. Coler, Boro. President, for regulating, grading, paving and repaving with asphalt on a concrete foundation the roadway of Roebling St., from S. 4th St. to Union Ave. Engineers' estimate of the quantities is as follows: 18,620 sq. yds. asphalt pavement, 2,040 cu. yds. concrete, 5,600 lin. ft. of new curbstone, 600 lin. ft. of old curbstone to be reset, 1,470 cu. yds. of earth excav., 71,530 sq. ft. of cement sidewalk, 45 sewer catch basins (to be rebuilt), 35 noiseless covers and heads, complete, for sewer manholes. A former call for bids for this work to have been opened Sept. 4 was made but was withdrawn.
Bids will be received until Sept. 18 by Bird S. Coler, Boro. Pres., for repaving portions of Irving and Morgan Aves., Ten Eyck and Water Sts., and with granite pavement, Water St., and laying crosswalks at the intersections of several streets. Engineer's estimate: 23,190 sq. yds. asphalt pavement, 4,240 sq. yds. granite blk. pavement, 4,770 cu. yds. concrete, 11,070 lin. ft. new curb, etc.

New York, N. Y.—The following are the bids opened Aug. 29 by the Comrs. of Parks, New York City, for repaving where directed the cement walks of small parks, in all about 150,000 sq. ft.: Atlanta Contr. Co., $31,500; and Wm. H. Masterson, $23,400.
The following are the bids opened same time and place for paving and repaving with rock asphalt mastic where directed the walks of Central and other parks: (*a*) 1,200 cu. yds. concrete to be furnished and deposited; (*b*) 250,000 sq. ft. rock asphalt mastic to be furnished and laid; (*c*) total: Genasco Roofing Co., *a* $65, *b* 13½ cts., *c* $41,730; The Sicilian Asphalt Paving Co., *a* $6.50, *b* 13 cts.; *c* $40,300.
Bids were opened same time and place for furnishing and delivering 10,000 cu. yds. coarse North River Road gravel for drive in Central Park (*a*) price per cu. yd., (*b*) total: P. M. Dorgan, *a* $2.31, *b* $23,100; John B. Rosa Co., *a* $2.25, *b* $22,500.

Jamestown, N. Y.—All bids received Sept. 2 for 23,000 ft. of cement curb and gutter have been rejected. C. G. Jones, City Engr.

Oakley, O.—Bids will be received until Sept. 14 by David K. Mason, Village Clk., for furnishing material and constructing sewers in Dist. No. 2, including Linden Ave, Brotherton Rd. and other streets. Walter E. Sullivan, Village Engr.

Toledo, O.—It is stated that new bids will soon be received for paving Orange St

*Cincinnati, O.—Jas. Agness is reported to have secured the contract for paving a portion of Highland Ave., for $21,722.
The following bids are reported opened Aug. 29 by Bd. Pub. Service for grading, paving, etc., a portion of Beekman St., at an estimated cost of $24,354: Kirchner Constr. Co., $2.84 per sq. yd., and United States Wood Preserving Co., $2.85 per sq. yd.
Bids will be received by the Bd. Pub. Service (M. J. Keefe, Clk.) until Sept. 18, for furnishing material and paving with wood block a portion of Grant St.; also a portion of Burnett Ave. with brick.
It is stated that bids will be received by the Bd. of Pub. Service until Sept. 19, for grading, paving, etc., portions of several streets.

Hamilton, O.—See "Sewerage and Sewage Disposal."

Youngstown, O.—It is stated that bids are wanted until Sept. 17 for $13,200 bonds for paving Willis and Williamson Aves. Wm. J. Davies, City Aud.

Cincinnati, O.—It is stated that Chas. Underhill bid $5,620 for grading and constructing driveways at the new pumping station.

Columbus, O.—Bids will be received until Sept. 10 by the Bd. Pub. Service (Edwd. F. McGuire, Secy.) for furnishing material and paving portions of several streets.

*Dillonvale, O.—The City Clk. writes that Rosser & Maloney, of Bellaire, have secured the contract for paving with Metropolitan block, for $13,321 (bids opened Aug. 23).

*Dayton, O.—The I. E. Conley Co. is reported to have secured the contract for paving Williams St., at $25,310.

Guthrie, Okla.—See "water."

*Guthrie, Okla.—W. W. Miller, City Clk., writes that the contract to pave Cleveland Ave. (bids opened Aug.

* ***Items marked thus give the names of parties awarded contracts.***

20) has been awarded to Billings & Snyder, of Guthrie, at $1.70 per sq. yd., and 70 cts. for curb and gutter; total, $28,584. Two-course brick on sand filler is the material to be used.

Lancaster, Pa.—Bids will be received until Sept. 18 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 9,381 ft. road; also 10,847 ft. road, both in East Lampeter Township, Lancaster Co.

York, Pa.—Bids are wanted by the Engineer of the York St. Ry., at York, for furnishing within 1 month f. o. b. Hanover, Pa., of 25,000 paving brick.

**Oakmont, Pa.*—Douglass & McKnight, Engrs. Boro. of Oakmont, 1710 Union Bank Bldg., Pittsburg, writes that the contract to pave Oakmont Ave. (bids opened Sept. 2) has been awarded to the Sanders Paving & Constr. Co., Frick Bldg., Pittsburg, at the following bid: 5,000 cu. yds. grading, 48 cts.; 4,300 lin. ft. concrete curb and 2 ft. gutter, 83 cts.; 9,600 sq. yds. brick paving, 9-in. slag foundation, $1.38. H. S. Mitchell of Oakmont has secured the contract for 11,000 cu. yds. grading at 37 cts.

New York, N. Y.—The following are the bids opened Aug. 29 by the Park Comrs. for paving with sheet asphalt on a concrete foundation the carriageway, furnishing and setting curb, etc., on 5th Ave. between 59th and 60th Sts. and between 90th St. and the Plaza at 110th St.;: (*a*) The Asphalt Constr. Co., (*b*) the Barber Asphalt Paving Co., (*c*) Continental Asphalt Paving Co., (*d*) the Sicilian Asphalt Paving Co.:

**Norristown, Pa.*—Foley & King, of Norristown, have secured the contract for 10,700 cu. yds grading (bids opened Aug. 24), at 29½ cts. per cu. yd. The Boulevard grading of 24,000 cu. yds. has been held over for the present. Frank L. Smith, Chmn. Park Comn.

**Pittsburg, Pa.*—The County Comrs. are stated to have awarded contracts for constructing roads as follows: Foley Bros., the road from Homestead to Duquesne through Mifflin Township, for $99,000; Booth & Flinn, 2 miles of road along Perrysville Plank Road, extending from Allegheny to West View, for $31,000.

York, Pa.—See "Sewerage and Sewage Disposal."

Woonsocket, R. I.—F. H. Mills, City Engr., is reported to have recommended that Court St. Bridge be paved with wood block, at a cost of about $6,000.

Houston, Tex.—The citizens are reported to have voted to issue $500,000 for the paving of roads and the erection of such small bridges as might be necessary. Address Geo. Horton, Co. Engr.

Texarkana, Tex.—It is stated that $250,000 will be expended in paving certain streets with brick on concrete foundation.

Manassas, Va.—See 'Power Plants, Gas and Electricity."

Centralia, Wash.—The Warren Constr. Co., of Portland, Ore., is reported to have submitted the only bid for paving with bitulithic Tower Ave., for $56,452.

**Chehalis, Wash.*—P. E. McHugh, of Tacoma, is stated to have secured the contract for paving with brick Market St., at $45,860.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Columbiana, Ala.—T. Gordon, of Columbiana, is said to be interested in the establishment of an electric light and water works plant in Columbiana, also an electric car system between Montevallo and Columbiana.

New Decatur, Ala.—The Decatur Light, Power & Fuel Co. (H. B. Johnson, Secy.) is it reported will expend $70,000 in improvements.

Hartselle, Ala.—It is reported that local electricians are figuring on the establishment of an electric light plant here.

Hot Springs, Ark.—The Consumers Electric Co. will purchase four 150-kw. a. c. 2,300-volt generators direct connected to producer gas engine. The cost of work contemplated will be about $135,000. Atwood Benton, of Hot Springs, is the Engr.

Vallejo, Cal.—The Snow Mountain Power Co., of Glenn and Mendocino Counties will, according to reports, furnish light and power to Vallejo and Oakland. Dr. G. F. Connors, of Calistoga, may be able to give further information.

**Hartford, Conn.*—The Westinghouse, Church & Kerr Co., of New York, N. Y., is reported to have secured the contract to erect a steel frame and brick addition to the boiler house extension of the power house on the west side of the Connecticut River at Dutch Point.

New London, Conn.—Bids will be received until Sept. 10 by Maj. Harry Taylor, Corps. Engrs., U. S. A., New London, for furnishing 40 or more 25 kw. electric generating sets, each consisting of a gasoline-driven multiple cylinder vertical engine directly connected to a direct current generator as advertised in The Engineering Record.

Dover, Del.—The Corporation Trust Co. of America is reported to have filed incorporation papers for the Van Buren Fuel & Light Co. with a capital of $25,000. Directors: Jas. S. Cummings, R. T. Graf and R. A. Wortman, all of Chicago, Ill.

Wilmington, Del.—The Oklahoma Fuel, Light & Power Co. is reported incorporated with a capital of $500,000 by Jas. S. Cummings, F. H. Lane, of Chicago, Ill., and others.

Washington, D. C.—Bids will be received until Sept. 10 at the Bureau Supplies and Accounts, Navy Dept., Washington, D. C., to furnish at the navy yards and naval stations the following supplies: Boston, Mass.: Sch. 201—Motor. New York, N. Y.: Sch. 246—Generating sets. Sch. 259—Electric cable, etc. Sch. 264—Voltmeters and ammeters. Charleston, S. C.: Sch. 258—Electric cable and supplies, etc. Sch. 261—Voltmeters, etc. Norfolk, Va.: Sch. 259—Motor generator. St. Augustine, Fla.: Sch. 248—To construct an electric transmission power circuit and furnish electric power at the wireless telegraph station. Applications for proposals should designate the Schedule desired by number. E. B. Rogers, Paymaster Genl., U. S. N.

Americus, Ga.—The Americus Ry. & Light Co., recently organized with a capital of $250,000, is reported to have taken over the entire plant of the present light company and intends rebuilding same and equipping with new machinery.

Dotham, Ga.—A. J. Smith is reported to be organizing a company to develope electric power, and plans and estimates are being prepared.

Canton, Ga.—An election is to be held Sept. 21 to vote on the question of issuing $29,500 sewer water works and electric light bonds.

Blue Ridge, Ga.—The Council has decided to order an election for a $30,000 bond issue for water works and electric lights.

Chandlerville, Ill.—The County is stated to have granted a 20-year franchise to F. P. Sheaf and others for the installation of an electric light, heat and power plant system in the village.

Chicago, Ill.—Bids will received until Sept. 10 by Wm. Carroll, City Electrician, for furnishing about 5,000 gas mantle burners, and 450 dozen gas mantel frames; also furnishing about 150 combination c. i. and steel electric light arc lamp posts.

**Dallas City, Ill.*—J. H. Cole, of South Bend, Ind., is reported to have secured the contract to install a system of water works and construct an electric light plant.

Indianapolis, Ind.—The Sanborn-Marsh Electric Co., 115 N. Illinois St., is reported to have secured the contract to install the electric power and lighting plant in the Woman's Prison, at $6,279.

Auburn, Me.—The Barker Mill (E. W. Gross, Treas.), will construct a cement dam across the Little and Noscoggin Rivers at the Barker Mill this season.

Berlin, Md.—The citizens are reported to have voted in favor of the Mayor and City Council contracting for water and electric lights.

Baltimore, Md.—The installing of permanent arc lights on Baltimore St. instead of the incandescent lights is being considered. Bids for the incandescent lights were asked recently and the contract is being held pending the decision on arc lights.

Separate bids will be received until Sept. 11 by the Bd. of Awards, care of J. Sewell Thomas, City Register, for the special illumination of certain public buildings and streets within the city of Baltimore, and for permanent lighting City Hall dome. Robt. J. McCuen, Supt. Lamps and Lighting.

Oxford, Md.—The R. H. Pollard Co., of Baltimore, Md., is stated to have contracted with the Oxford Ice & Electric Light Co. to construct a plant for lighting purposes in Oxford, also a plant for the anufacture of ice.

Wyandotte, Mich.—Bids will be received until Sept. 17 by the Bd. Pub. Wks. (Jas. G. Pinson, Secy.), for the following electrical machinery. A 300 h.-p. water tube boiler; a 240 kw. generating unit complete; generator panel; feeder panel; series enclosed a. c. arc lamps system; as advertised in The Engineering Record.

Detroit, Mich.—Bids will be received by the Bd. of Water Comrs. (Benj. F. Guinney, Secy.) until Sept. 11, for the furnishing f. o. b. Detroit, 1 5-h.-p. 110-volt, 60-cycle, single-phase, alternating-current motor to run at 1,800 revolutions per minute, with pulley 5 in. in diam. 5½ in. face, with all details complete. Also furnishing one belted type of air-compressor with one 6-in. double acting cylinder, or two 6-in. x 6-in. single acting cylinders with all details complete, but without unloading device, for service at 60 lbs. air pressure, to run at a speed of 160 revolutions per minute, with pulley 30 in. diam. and 4-in. face.

**Dawson, Minn.*—Contracts are stated to have been awarded as follows for the electric light plant and water works (bids for which were received Aug. 20): The amount of the contracts will aggregate $25,000: Tank, pumps and pipe line to W. D. Lovell & Co., Minneapolis; building, to J. W. Carson, Dawson, gas producer engine (Muenzel, 80 h.-p.) to the Minneapolis Steel and Machinery Co., Minneapolis; dynamos, switchboard and electrical appliances to the Westinghouse Co.

Boston, Mass.—The following are stated to be the bids received Aug. 30 by the Schoolhouse Comn. at Boston for electric light system in extension to Mechanic Arts High School, Scotia St.: (*a*) old building; (*b*) new building: Lord Electric Co., *a* $3,250, *b* $20,000; Jas. Wilkinson & Co., *a* $9,626, *b* $27,952; Ed. C. Lewis, *a* $10,167, *b* $25,215.

St. Louis, Mo.—Pres. O'Reilly of the Bd. of Pub. Improvements has completed blueprints of the territory to be lighted under new contract. The location of every city light, arc or mantle, as well as the location of 4,000 new lights to be installed, is shown. There are now 18,000 mantle lamps and 1,100 arc lamps, costing the city approximately $504,000 and $107,800 per year, respectively. In addition there are 800 incandescent lamps used to light alleys. The new arc lamps will add about $50,000 and the new mantle lamps about $100,000 a year to the city's light bill, based on the present charge of $98 for arc and $28 for mantle lamps, making the total contract price approximately $860,000. The Bd. expects to have an ordinance ready to send to the Municipal Assembly soon.

Lovelocks, Nev.—J. W. Gemkroger, Secy. & Treas. of the Lovelock Light & Power Co., writes that the company has been incorporated with a capital of $25,000 and is doing its own construction work.

Trenton, N. J.—The Chamber of Commerce, it is stated, has taken up the old project to dam the Delaware River above the city for the purpose of supplying cheap light and power by electricity for the homes and business houses of the city.

Camden, N. J.—The Council has adopted a resolution looking toward the establishment of a municipal lighting plant.

Rutherford, N. J.—The Reading Ry. Co. is stated to have awarded to Augustus Wildman, of Harrisburg, the contract to construct a building for an electric light, heat and power plant for its freight-distributing yard at Rutherford. The power house will be 56x58 ft., built of brick on concrete foundation. The contract includes the building of a sewer to carry off the drainage, and the entire cost is to be about $12,000.

**Newark, N. J.*—E. M. Waldron & Co., of Newark, are stated to have secured the contract for the installing of the municipal lighting plant in the city hall (bids for which were received Aug. 23), at $28,904.

The Merchants Electric Light & Power Co. is reported incorporated with a capital of $250,000 for the purpose of engaging in the construction of electrical work for the purpose of supplying light, heat and power. Incorporators: Frank Lowrie, of New York, N. Y.; Richard S. Carrick, of Jersey City, and others.

Paulsboro, N. J.—Frank I. Moses, of Trenton, is stated to have submitted the lowest bid Aug. 30 for constructing the gas plant at $29,600.

New York, N. Y.—McKesson & Robbins, of New York, N. Y., have commissioned Dodge & Day, Engrs. & Contractors, of Philadelphia, Pa., to make additions to their present power plant. The additions will include a new engine, generator and necessary changes to piping, wiring, etc.

Conklingville, N. Y.—The Hudson River Electric Power Co., of Glens Falls, is reported to have applied to the Public Utilities Comn. at Albany for permission to issue $7,223,000 bonds, and propose building a dam on Sacandaga River at Conklingville and to erect a storage reservoir for electrical power purposes.

Auburn, N. Y.—See "Water."

**Columbus, O.*—The Allis-Chalmers Co., of Milwaukee, Wis., it is stated, has secured the contract for the exciter to be installed in the municipal electric light plant, at $2,035.

Toledo, O.—The Council Com. on Gas and Light, it is stated, has approved the ordinance granting to the Peoples Htg. & Lighting Co. the right to use the streets of the city.

Duquesne, Pa.—It is stated that the Duquesne Light Co. is arranging to issue $10,000,000 bonds for general improvements and equipment.

Allegheny, Pa.—A bill has been introduced in the Select Council for the issuing of $75,000 bonds to buy a turbo-generator outfit, condensing equipment and all necessary electrical apparatus for the extension of the arc lighting system at the municipal lighting plant on Bradock St.

Philadelphia, Pa.—It is stated that bids have been asked by Geo. R. Stearns, Dir. Dept. Pub. Wks., for additional pumps and dynamos for the Torresdale plant as follows: one 1,000,000 and one 2,500,000-gal. centrifugal pumps, estimated cost, $60,000; and 3 generators for electric lighting and driving the air blowers for the preliminary filters, estimated cost, $25,000.

Pawtucket, R. I.—The Bd. of Aldermen has granted a 5-year franchise to the Pawtucket Electric Co. (Orin Smith, Jr., Mgr.), to lay and maintain pipes for heating purposes.

Aiken, S. C.—A. Ludlow, Mgr. Carolina Light & Power Co., writes that no contracts will be let in connection with the developing of the power of Anderson Shoals for electrical purposes. All work will be done by day labor. Probable cost of work $40,000.

Yankton, S. D.—S. G. Donaldson, Pres. of the Yankton Light, Heat & Power Co., it is reported, wants catalogues on modern appliances.

Aberdeen, S. D.—It is reported that the Council has granted a 25-year franchise to C. F. Frechauf, of Creston, Ia.

Gleason, Tenn.—W. H. Williams, Gen. Mgr., of the Gleason Water & Light Co., writes that nothing will probably be done this year on the construction of the electric light plant.

Newport, Tenn.—Bids are wanted until Sept. 14 for $37,500 water works and $7,500 electric light bonds.

**Beaumont, Tex.*—The Beaumont Gas Co., it is stated, has awarded contract to J. C. Herrenkind to construct its new plant on Beaumont and Port Arthur public road, to replace the structure which was recently destroyed by fire. The building will be made of concrete building blocks and cost about $8,000.

**Brownsville, Tex.*—The City Council is stated to have accepted the bid of Henry G. Ulen, representing the American Light & Water Co., for the construction of a water works and electric light system (bids for which were received Aug. 24), at $65,940.

Terrell, Tex.—A. H. Wooley, City Secy., writes that no engineer has been employed as yet to prepare plans for the electric light plant which is to be constructed at a cost of $15,000.

Manassas, Va.—Bids will be received by O. E. Newman, Chmn. Improv. Com. of Council, until Sept. 28, for furnishing material and installing a water works and electric light plant, and macadamizing the streets in said town. Bids may be submitted as a whole or separately on the above work. Pressey & Weller, Engrs., 1416 F St., N. W., Washington, D. C.

**** Items marked thus give the names of parties awarded contracts.***

Salem, Va.—Bids will be received until Sept. 16 by W. R. Hester, of the Finance Com., for the purchase of $25,000 water, electric light, sewer and improvement bonds.

Oroville, Wash.—The Sillilkameen Power Co., of Oroville, it is reported, has been incorporated, with a capital of $1,200,000, by Monroe Hartman, Chas. A. Andrus and others.

Toppenish, Wash.—The Council is considering the granting of a franchise for both water and light to T. H. Noble, of North Yakima. R. D. Campbell, Town Clk.

Seattle, Wash.—The City Council has passed the ordinance granting to the Seattle-Tacoma Power Co. a steam-heating franchise in the territory bounded by Pike and Madison Sts. and Railroad and 5th Aves.

The Bd. of Pub. Wks. Aug. 24 approved the plans and specifications for the cluster lights that have been ordered installed by the City Council in the down town district. It is reported that bids for the installation, which is estimated to cost about $175,000, will be received by the Bd. of Pub. Wks. in about 3 weeks.

Dousman, Wis.—It is reported that A. J. Smith, Sentinel Bldg., Milwaukee, may be able to give information regarding the power plant to be constructed here.

Priarie Du Sac, Wis.—It is stated that the Legislature at Madison has granted articles of incorporation to a company which proposes constructing a dam across the Wisconsin River at Pounds Landing, about 1 mile north of this village. Magnus Swanson, of Madison; J. S. Tripp, of Prairie Du Sac, and M. A. De Vitt, of Chicago, Ill, are reported interested. The dam is to be constructed in connection with the power plant at Kilbourn, and is to furnish electric power for nearby cities and towns extending as far as Madison, Janesville and Beloit. It will furnish about 12,000 h.p., and will be of steel cement construction.

Revelstoke, B. C.—It is stated that bids will be received by A. Brown, Mayor, until Sept. 30, for furnishing materials and enlarge the civic hydro-electric plant, comprising 500 h.p. producer gas plant and engines, generators and exciters, transmission machinery, switchboards, wiring and the rearrangement of the present plant. H. Floyd, City Clk. Cecil Goddard, Consulting Engr., Winnipeg, Man.

Vancouver, B. C.—See "Miscellaneous."

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

La Junta, Colo.—The City Council is stated to have granted a right of way to C. S. Alnutt for an electric or gasoline motor railway parallel to the Santa Fe right of way through the main part of town. A right of way has been secured to Rocky Ford, 11 miles distant.

A company to be known as the Davenport & Dubuque Ry. will be organized shortly to carry on the construction of an electric railway from Davenport to Maquoketa and Dubuque, according to reports. T. M. Jennings, manager of the National Construc. Co., of St. Louis, is interested. Among other persons taking an active part in the enterprise are O. Sampson, Theo. Daudel, J. L. Kinley, of Andrew, Ia., and others.

Jacksonville, Fla.—George W. Clark is reported to have given bond to the Bd. of County Comrs. for $10,000 to guarantee the building of a railroad from the city limits to Panama Park within a year.

Brunswick, Ga.—The City & Suburban Ry. Co. is stated to have applied for a charter. The line is to be 4 miles long. Incorporators: F. D. M. Strachan, Frank D. Aken, and A. Fendig, of this city, and Geo. P. Walker, Harry D. Strachan, of Savannah, with Ernest L. Simpson and Lewis H. Spence, of New York.

Buckhead, Ga.—The Bd. of County Comrs. are reported to have granted the application of the Georgia Ry. & Electric Co. (Thos. K. Glenn, Mgr., Atlanta) to run a line to Buckhead. The new line will be about 5 miles in length, extending from Brookwood to Buckhead.

South Bend, Ind.—A franchise is stated to have been granted by the St. Joseph County Comrs. to the Chicago, South Bend & Northern Indiana Ry. Co. for the extension of its line in Notre Dame Ave. to the college grounds.

Booneville, Ind.—The Grand Central Traction Co. is reported to have announced that nearly all the deals for the right of way through this and other counties for an interurban line from Indianapolis to Evansville have been closed.

Mishawana, Ind.—The Chicago, South Bend & Indiana Ry. Co. is stated to have secured a site at Front and Main Sts. upon which to build a modern interurban station.

Bemidji, Minn.—It is reported that C. Gowran, of Grand Forks, G. Teitsworth, of Minneapolis, and A. A. Carter, of Bemidji, have made an application to the City Council for a franchise to construct, maintain and operate a complete electric street railway system within the limits of the city.

Salisbury, N. C.—The Bd. of Aldermen is stated to have granted a franchise to the Piedmont-Carolina Ry. Co. to build a belt-line railway from Newton Heights to Salisbury, and to a point near the new Fair Grounds.

The New South Investment Co. is stated to have been chartered to build and operate street railways, etc. Capital, $5,000,000. Cornelius O'Connor, of New York; Frederick H. Payne, of Williamsport, Pa.; Dix W. Noel, of New York, and L. L. Gaskill, of Salisbury, are reported interested.

Chattanooga, Tenn. The Chattanooga Rys. Co. is reported to have announced that the company contemplates spending about $450,000 for improvements, including extensions.

Palestine, Tex. The Corsicana Palestine Interurban Ry. Co. is reported to have announced they are ready to begin active work on the proposed line.

**Snohomish, Wash.* A contract is stated to have been let by the Snohomish Valley Ry. Co. (E. Colburn, Ch. Engr.), for the building of 55 miles of road from Snohomish to Renton to the Continental Engineering & Constr. Co., of New York, N. Y.

New Westminster, B. C.—It is stated that the British Columbia Electric Ry. Co. will place orders in the near future for material needed in the overhead work of the proposed line between Eburne and New Westminster.

RAILROADS.

Notes Arranged Alphabetically by States.

Denver, Colo.—A company is reported as being formed here to build a railroad from Denver to the Pacific Coast, with Seattle as the terminus; capital, $12,000,000. It will also link Denver with New Orleans and Galveston. Judge John D. Milliken, of McPherson, Kan., and Sidney J. Kent, of Lincoln, Neb., are reported interested, as is the Denver, Larimer & Northwestern R. R. Co.

**Kentwood, La.*—Geo. F. Conant, of Kentwood, Ch. Engr., writes that the Kentwood & Eastern Ry. Co. is extending its standard gauge tracks about 10 miles southeast from Bolivar, La. A. Philhrick is the contractor.

Francis, Mo.—The Chicago, Burlington & Quincy R. R. Co. (T. E. Calvert, Ch. Engr., Chicago, Ill.) is reported to be having a survey made for a line from Francis to Macon, by way of Clark.

Lincoln, Neb.—The building of a railway from the northern part of Nebraska to the Gulf of Mexico is reported contemplated. Ed. T. Roemer, C. E., of New York, N. Y., may be able to give further information.

Cleveland, O.—W. J. Springborn, Dir. of Pub. Service, and W. J. Carter, City Engr., are reported to have discussed the division of cost and plans for the proposed elimination of the Wheeling & Lake Erie R. R. grade crossing at Clark Ave. S. W., with A. B. Worthington, Vice-Pres., H. T. Douglas, Ch. Engr., and A. B. Coe, Div. Engr. It is hoped to have the details arranged for the beginning of work on this crossing this year. The work will cost over a million dollars.

Yanktown, S. D.—The City Council has granted a single track franchise along First and Bway. to the Yankton & Southern R. R.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—See "Miscellaneous."

San Francisco, Cal.—The Bldg. Com. of the Bd. of Superv., it is stated, has recommended a bond issue of $2,000,000 to build a 4-story class A building to replace the Larkin St. wing at the City Hall, and a bond issue of $750,000 to replace the Hall of Justice with a class A structure.

**Red Wing, Minn.* The Bd. of Control of the Training School at Red Wing is stated to have been awarded the contract for erecting the kitchen at the school to Johnson & Nelson, of Red Wing, for $13,665.

Hooksett, N. H.—Bids will be received until Sept. 15 for erecting an academy building at Hooksett. T. Edw. Sheehan, Archt., Boston, Mass. Probable cost, $150,000.

**Haddon Heights, N. J.*—Lynch Bros., of Philadelphia, Pa., are reported to have secured the contract to erect a 2-story brick school, at about $16,300.

* *Items marked thus give the names of parties awarded contracts.*

*Newark, N. J.—Contracts for erecting new wing to the Belmont Ave. School (bids opened Aug. 23) have been recommended by the Schoolhouse Com. Bd. Educ. awarded to the following: Walter E. Isetts, 16 N. 13th St., masonry, $51,605; W. G. Sharwell & Co., 320 N. 6th St., carpenter work, $15,688; Hay Foundry & Iron Co., New York, N. Y., iron work, $15,300; Ding & Luescher, roofing, $4,988; Storms & Co., 112 S. 14th St., heating, $7,009; Ralph B. Schmidt Co., 62 Ann St., plumbing, $3,567; Beaver Constr. Co., electrical work, $3,178; Browe Co., 16 Clinton St., air-moving machinery, $1,484; G. L. Kimmerle, painting, $880. Total, $103,699.

The lowest bids submitted, same time and place, for erecting an addition to the Bergen St. school are stated to have been as follows. Fredk. Fatzler & Co., mason work, $64,500; Storms & Co., steam fitting, $8,637; Beaver Constr. Co., electrical work, $820; Jachnig & Peoples, plumbing, $5,597; G. L. Kimmerle, painting, $1,043; C. C. Lieriau's Sons, iron work, $25,120; Lucas Peters carpenter work, $19,625; Browe Co., air-moving machinery, $1,183; Jos. Bleeker, roofing, $3,000. Total, $129,615. E. M. Waldron Co. is stated to have submitted a bid on the entire work, not including heating, at $116,929.

Bids for erecting an addition to Hawthorne Ave. School (Jeremiah O'Rourke & Sons, 756 Broad St., Archts.), it is reported, will be asked soon.

Montclair Heights, N. J.—Bids will be received until Sept. 17 (readvertisement), by the Bldg. Com. of the New Jersey State Normal School at Montclair Heights (Edw. Russ, Chmn.) at the office of the Comr. of Charities and Correction, State House, Trenton, for furnishing material and erecting a boiler house and the installation of a heating plant at the Norma [School Montclair Heights, as advertised in The Engineering Record.

Bayonne, N. J.—Bids will be received until Oct. 3 (readvertisement), by the Bd. of Educ. (R. T. Hewitt, Secy.) for furnishing material and constructing School No. 9 (except plumbing, gas fitting, heating and ventilating). A. C. Longyear, Archt., 126 Liberty St., New York, N. Y.

*Olean, N. Y.—M. M. Holmes, Clk. Bd. Educ., writes that the contract to erect a school in East Olean (bids received Aug. 30) has been awarded to L. E. Corsett, of Olean, at $25,362.

*Lockport, N. Y.—The contract for rebuilding the High St. School is reported to have been awarded to John C. Fogle at $16,553.

New York, N. Y.—The following are the bids opened Sept. 3 by C. B. J. Snyder, Supt. School Bldgs., for installing heating and ventilating apparatus in new Public School 66, Boro. of Manhattan: Frank Dobson Co., Inc., 319 E. 53d St., $26,915 (awarded contract); James Curran Mfg. Co., $37,722. E. Rutzler Co., $37,328; Blake & Williams, $37,994.

Brooklyn, N. Y.—Only one bid was received Sept. 3 by C. B. J. Snyder, Supt. School Bldgs., N. Y. City, for completing abandoned contract for ventilating and heating school No. 109, Boro of Brooklyn, and it was rejected.

Roanoke Rapids, N. C.—Bids will be received until Sept. 16 by the Bd. Trus. Roanoke Rapids Graded School (W. C Edwards, Chmn.) for $10,000 bonds, issued for the purpose of erecting a school.

*Toledo, O.—Contracts for the construction of a school at the Miami County Children's Home (bids received Aug. 26) are stated to have been awarded by the Comrs. as follows: John Arnsman, 423 W. Central Ave., $25,439; Robt. Raitz & Co., plumbing, $1,675. Thos. Kewley, heating and ventilating, $5,800, and A. Bentley & Sons, electric wiring, $365.

Pittsburg, Pa.—Marshman Edw. Wadsworth, M. A., Ph. D., it is stated, has been appointed Dean of the School of Mines of the Western Univ. of Pa., and, it is reported, will have charge of the plans for the new building which is to be erected, the Legislature having appropriated $200,000 for the building and equipment.

Philadelphia, Pa.—Melody & Keating, 211 Diamond St., have been granted a permit to build a 3-story stone and brick parochial school building, 65x197 ft., at 56th St. and Chester Ave., to cost $62,000. Henry D. Dagit, 435 Chestnut St., is the archt.

Seymour and Paul A. Davis, 3d, 16 Chestnut St., are said to be completing plans and will shortly invite estimates for the erection of a 4-story laboratory building, to be erected for the Philadelphia College of Pharmacy, on 10th and Cherry Sts.

Monessen, Pa.—Press reports state that the Secy. of the School Bd., will receive bids until Sept. 10 for $40,000 school bond.

Latta, S. C.—Bids will be received until Sept. 23 by the School Bd. (A. S. Manning, Chmn.) for erecting a brick high school. Ernest V. Richards, Archt., Bennettsville.

Memphis, Tenn.—Local press reports state that the Bd. Educ. will receive bids until Sept. 16 for erecting a 12-room school on Carr and Raleigh Aves. Prob. cost, $40,000. Alsup & Woods, Archts., Memphis.

Denton, Tex.—One of the buildings of the North Texas State Normal School is reported destroyed by fire.

*Cheney, Wash.—The contract to erect the Normal Training School (bids for which were received Aug. 10) is stated to have been awarded to A. E. White, of Seattle, at about $80,000.

Galesville, Wis.—Parkinson & Dockindorf are reported to be preparing plans for a high school to be erected here, at a cost of $25,000.

Tomahawk, Wis. Bids will be received until Sept. 17 by Jas. Kelly, City Clk., for furnishing material and erecting a school. Probable cost, $40,000. Henry Wildhagen, Archt., Ashland.

Galt, Ont. Bids will be received until Sept. 17 by Frank Hogg, Chmn. Knox Church Bldg. Com., for erecting a Sunday school in connection with said church. Bids may be submitted as a whole or separately for the masonry, carpentry, slate and gravel roofing, plumbing, electric wiring, etc. Smith & Gemmell, Archts., 37 Bank of Commerce Bldg., Toronto.

STREET CLEANING AND GARBAGE DISPOSAL.

Rankin, Pa.—See "Sewerage and Sewage Disposal."

Evansville, Ind.—The Bd. of Pub. Wks. has decided to grant to the St. Louis Garbage Box Co. the right to erect a $40,000 night soil reducing plant on the city ground.

New York, N. Y. Bids will be received by W. Bensel, Comr. Street Cleaning, until Sept. 11, for furnishing and delivering 50 street-sweeping machines.

Ardmore, Pa. Robley A. Warner, C. E., of Ardmore, Box 708, Supt. of Health and Drainage of the Township of Lower Merion, has been directed by the Bd. of Comrs. of that Township to design a system or plant for the collection and disposal of garbage and ashes through the thickly settled districts and to make his detailed report at the Oct. meeting of the Comn.

Grafton, W. Va.—The city is reported to have entered into an agreement with Chas. Stolzenfels whereby a garbage crematory is to be constructed and the garbage burned for a period of 5 years.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Childersburg, Ala.—Bids will be received until Sept. 14 by D. L. Lewis, at Sycamore, for the Coosa River Spinning Co., for erecting a cotton mill and a warehouse near Childersburg. Knox, Dixon & Burr, Archts., Talladega.

Athens, Ga. The Son Mfg. Co. is erecting an extensive addition to its cotton mill and will be in the market for cotton machinery, shafting, etc.

Cordele, Ga.—The Reid Fertilizer Co., it is reported, has secured a site on which it is proposed erecting a plant to cost about $100,000.

*Rock Island, Ill.—The Rock Island Brewing Co., it is reported, has let the contract for erecting an addition to their building to Henry W. Hurst, of Rock Island. Estimated cost of improvements, $50,000.

*It is stated that the Truss Constr. Co. has secured the contract to erect a 3-story concrete and brick addition to the plant of Barber & Colman in South Rockford, to cost about $100,000.

Newport, Ky.—The Andrews Steel Co., it is reported, will make improvements and enlarge the plant.

Cave City, Ky.—The American Onyx & Marble Co., has been organized, with capital of $1,000,000, to acquire and work onyx deposits situated near Cave City, Ky. The deposits extend over an area of 1,800 acres, and the investigations to this time indicate the presence of most extensive deposits. It is proposed at this time to install boiler, engine, derrick, small tools, etc. Later a mill will be installed for sawing and polishing. Richard H. Phillips, Security Bldg., St. Louis, Mo., is Consulting Engr.

Baltimore, Md.—The Joseph Schlitz Brewing Co., according to reports, has had plans prepared by Kirchhoff & Rose, 201 Grand Ave., Milwaukee, Wis., for 3 storage plants which it will erect as follows: At Baltimore, Md., of brick and steel, 125x155 ft., 3 stories high, and cost approximately $40,000; at Youngstown, O., a $30,000, solid brick 90x155-ft. building; and at Richmond, Va., a $30,000 brick building, 2 stories high, 75x176 ft.

Flint, Mich.—The Michigan Motor Castings Co. is reported organized as a branch of the Detroit Stoker and Foundry Co. of Detroit, and will locate its plant in this city on Industrial Ave. and Dayton St. Plans are now being prepared for the plant. The main building will be of white sandstone brick, 75x300 ft.

*Camden, N. J.—Ballinger & Perrot, Archts., of Philadelphia, Pa., are reported to have awarded to the J. S. Rogers Co., of Stanwick, N. J., the contract for erecting a 1-story 92x174-ft. and a 6-story 80x172-ft. building for the Victor Talking Machine Co., at Front and Cooper Sts., Camden. Both buildings will have brick walls with stone trimmings. The column, floor and roof construction will be of reinforced concrete with slag roof covering. There will be a tower fire-escape in each building, and a passenger and freight elevator.

Albemarle, N. C.—A second cotton mill is to be erected according to reports, at Albemarle by the Eliot Mfg. Co., to cost $100,000, and electricity will be used, to be furnished by the Whitney Co. It is stated that the company will use $200,000 of its surplus for the new plant, and possibly a separate corporation will be formed to own and operate the mill.

Seattle, Wash.—The Northwestern Electric Co. of Seattle recently incorporated by E. C. Kilbourne, Pres., and F. A. Ernst, Secy., for the manufacture of heating and cooking appliances by electricity, will, it is stated, erect its factory in Seattle.

Corliss, Wis. The Wisconsin Engine Co., it is reported, will erect a pattern shop and a pattern storage shop at its plant at Corliss, after plans prepared by Kirchhoff & Rose, 201 Grand Ave., Milwaukee. Both buildings will be of concrete and brick and call for an expenditure of about $70,000. The pattern shop will be 40x160 ft. and the storage shop 220x140 ft.

Abbotsford, Wis.—Fredk. Weyerhaeuser, of St. Paul, Minn., is reported interested in the Atwood Lumber & Mfg. Co., which is being incorporated in Wisconsin for the purpose of erecting a saw mill near Abbotsford and also a paper mill in connection with same.

Vancouver, B. C.—J. T. Shadforth, one of the organizers of the North Pacific Iron & Steel Corporation, is reported to be in Vancouver preparing for the erection of a modern steel works.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—Bids will be received until Oct. 1 by Maj. H. Jervey, Corps. Engrs., U. S. A., Mobile, for construction of a wooden hull, stern-wheel, snag-boat, as advertised in The Engineering Record.

Oakland, Cal.—The Bd. of Pub. Wks. is reported to have recommended to City Council the immediate building of a concrete culvert across the channel between Lake Merritt and the estuary at 8th St., and a wall and levee along the western side of this channel, from 8th to 12th Sts. This is preparatory to the dredging of Lake Merritt, and the establishment of a city park south of the lake.

San Francisco, Cal.—Bids will be received until Sept. 26 by Lieut. Col. John Biddle, Corps Engrs., U. S. A., 1840 Polk St., San Francisco, for dredging in Petaluma Creek.

Berkeley, Cal.—Town Engr. McClure is reported to have completed specifications for the construction of a municipal wharf.

Washington, D. C. Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Sept. 10, for furnishing at the navy yards and naval stations the following supplies: Portsmouth, N. H.: Sch. 245 Steam windlass. Sch. 264—Ash, white pine, spruce, etc. League Island, Pa.: Sch. 262 Sand, gravel, oak. Sch. 263 Steel bolts and nuts, brass nuts, iron nuts, forges, screw and hydraulic jacks, drills, pipe dies, reamers, etc. Sch. 264 Sheet and strip brass, sheet copper, pig iron, etc. Washington, D. C.: Sch. 260 Shafting, etc., nickel steel forgings and tubes, iron and conveyor pipe, etc. Key West, Fla.: Sch. 243—Screw-cutting lathes, drill press, radial and sensitive drills, bolt cutter, pressure blower, blast forge, blacksmith's drill, plate bending rolls, patternmaker's lathe, etc. New Orleans La.: Sch. 247—Yellow pine and white oak boards. Washington, D. C.: Sch. 294 33,333 lbs. manganese bronze, 533,333 lbs. ingot copper, 50,000 lbs. slab zinc, and 50,000 lbs. pig tin. Applications for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster Gen'l, U. S. N.

*Savannah, Ga.—The following are the bids opened on Aug. 23 by Lieut. Col. D. C. Kingman, Corps. Engrs., U. S. A., for dredging in Skidaway Narrows, Ga., 238,000 cu. yds. (price given per cu. yd.): Southern Dredging Co., Mobile, Ala., 25 cts.; Savannah Dredging Co., Savannah, 13¾ cts. (recommended for acceptance); H. B. Giffkin, Savannah, 14⅞ cts.

Great Lakes, North Chicago, Ill. Bids will be received at the Bureau of Navigation, Navy Dept. (W. H. Brownson, Chmn.), Washington, D. C., until Sept. 17 for furnishing material and grading at the naval training station, Great Lakes, North Chicago, Ill.

Indianapolis, Ind. The Park Bd. is reported to be asking bids for extensive repairs on the Riverside concrete dam. Estimated cost, $10,000. J. Clyde Power, Supt.

New Orleans, La.—Bids will be received at the office of the Mississippi River Comn., 4th Dist., 1539 Louisiana Ave., New Orleans, by Capt. J. F. McIndoe, Corps Engrs., U. S. A., until Sept. 20, for constructing the Burton to Louderhough levees, about 25,000 cu. yds., in the Lake Borgne Levee Dist.

Boston, Mass. Bids will be received until Sept. 30 by Maj. Edw. Burr, Corps. Engrs., U. S. A., Boston, for dredging in Mystic River, Mass., as advertised in The Engineering Record.

Boston, Mass.—The only bid received and opened on Aug. 20 by Maj. E. Burr, Corps. Engrs., U. S. A., for dredging Weymouth Back River, about 28,800 cu. yds., was submitted by Simon J. Donovan, of East Boston, at 33 cts. per cu. yd.

*Duluth, Minn.—The Great Lakes Dock & Dredge Co. is reported to have secured the contract to construct the rubble mound breakwater at the Superior entry.

Mankato, Minn.—It is stated that a tile drainage system consisting of 15-in. tiles and about 3 miles long, is to be constructed in Blue Earth County, and is to be known as Ditch Project No. 21. The County Engr. estimates the cost at $6,500.

*Minneapolis, Minn.—The Otis Elevator Co., of New York, N. Y., is reported to have secured the general contract for installing 5 freight elevators in the new Wisconsin Central freight depot. They will all be equipped with electric power and cost in all about $21,500.

Grand Rapids, Minn.—Geo. A. Ralph, State Drainage Engr., St. Paul, is reported to have announced that a drainage ditch will be constructed connecting Bowstring and Round lakes, Itasca County. Plans for the work have been prepared. Water from Bowstring flows into Hudson Bay, and Round Lake drains into the Mississippi River. The ditch will be 6 ft. deep and will permit navigation of canoes from Hudson Bay to the Gulf of Mexico.

Ashland, Neb.—E. Bignell, Geo. E. Ricker and Martin L. Shupe are reported appointed a committee of three to make a survey and outline a drainage district. The farmers propose organizing a company to construct the district, the cost of draining the bottom and dyking and rip-rapping along the Platte is estimated at $20,000.

*Asbury Park, N. J.—The Beach Comn. is reported to have on Aug. 28 awarded contract for new pavilion at 7th Ave. to Herbert Gardner, for $20,603.

Cold Spring, N. J.—Bids will be received until Oct. 2 by Maj. C. A. F. Flagler, Corps Engrs., U. S. A., Wilmington, Del., for construction of stone jetties, Cold Spring Inlet, N. J., as advertised in The Engineering Record.

Oyster Bay, L. I.—Bids will be received until Sept. 11 by W. Emlen Roosevelt, 32 Wall St., N. Y. City, for the construction of a stone breakwater into the waters of the Oyster Bay Harbor in the easterly side thereof in front of the premises of W. Emlen Roosevelt.

Skaneateles, N. Y.—State Supt. of Pub. Wks. Stevens received Aug. 28 at Albany two bids for constructing the wall for the Skaneateles feeder to the Erie Canal. As the bids were not complete, it is reported, they were not considered.

New York, N. Y.—Bids will be received by W. Bensel, Comr. Street Cleaning, until Sept. 11, for furnishing and delivering lumber.

Bids opened Sept. 2 by Col. John G. D. Knight, Corps Engrs., U. S. A., New York, for constructing and repairing dikes in Hudson River, were as follows: Bonker Contr. Co., 21 State St., New York, N. Y., 2,000 cu. yds. rubble stone, $1.54 per cu. yd.; 10,000 cu. yds. quarry spalls, $1.50 per cu. yd.; Wm. D. Fuller, New Baltimore, N. Y., $1.69 per cu. yd. on both items.

Reading, Pa. Bids will be received until Sept. 25 by the Bd of Pub. Wks. at the office of the City Clk. for constructing a subway and appurtenances under the P. & R. Ry. tracks at Spring St., as advertised in The Engineering Record.

York, Pa.—See "Sewerage and Sewage Disposal."

Philadelphia, Pa.—Bids will be received until Sept. 30 by Maj. J. C. Sanford, Corps Engrs., U. S. A., 815 Witherspoon Bldg., Philadelphia, Pa., for constructing steel hull 16-in. pump dredges for Savannah River, as advertised in The Engineering Record.

The following are the bids recently received by the Superv. Archt., at Washington, D. C., for installing 2 electric passenger elevators in the Custom House and Post Office at Philadelphia: Otis Elevator Co., $12,985, and Marine Engine & Machine Co., $11,660.

Panama.—Bids will be received until Sept. 28 by H. F. Hodges, Genl. Purchasing Officer, Isthmian Canal Comn.,

** Items marked thus give the names of parties awarded contracts.*

Washington, D. C., for furnishing steel barges as per circular No. 389.

The Davenport Locomotive Works, Davenport, Ia., submitted the lowest bid on Aug. 30 for 12 four-wheeled saddle tanked locomotives for construction work at Panama at $30,990 or $37,950 set up at Colon ready for operation.

Block Island, R. I.—The following are the bids for dredging entrance channel to Great Salt Pond, Block Island, R. I., opened on Aug. 28 by Lieut. Col. J. H. Willard, Corps of Engrs., U. S. A., at Newport, R. I. (price given per cu. yd.): Maritime Dredging Co., New York, N. Y., 37½ cts.; John A. Seeley, New York, N. Y., 39½ cts.; J. S. Packard Dredging Co., Providence, R. I., 28½ cts., and Chas. M. Cole, Fall River, Mass., 32 cts. (About 100,000 cu. yds. will be dredged.)

Sioux Falls, S. D.—Saml. H. Lea, State Engr., Pierre, S. D., writes that surveys are now being made under direction of State Engineer, for the Comrs. of Minnehaha County, to determine the feasibility of constructing drainage system.

Galveston, Tex.—John M. Murch, Co. Aud., writes that preliminary plans and estimates are now being completed by Gen. H. M. Roberts, late of the U. S. Engrs., and Mr. Thacher, of the Concrete Eng. Co., Park Row Bldg., New York, N. Y., for the proposed Galveston bridge and causeway; probable cost, $1,500,000.

Ellensburg, Wash.—The Co. Comrs. it is reported propose constructing a dam on the Yakima River, where the river turns west of this city. The cost to be about $2,000.

Superior, Wis.—The only bid received and opened on Aug. 17 by Maj. Graham D. Fitch, Corps. Engrs., U. S. A., Duluth, Minn., for building rubble mound breakwater at Superior entry, is stated to have been submitted by the Great Lakes Dredge & Dock Co. at $1.60 per ton for rock delivered in place, or $1.25 per ton for rock delivered in the dock.

Vancouver, B. C.—It is stated that bids will be received until Sept. 12, by F. Gourdeau, Deputy Minister of Marine and Fisheries, Ottawa, Ont., for furnishing and delivering at Vancouver, B. C., a double cylinder tandem hoisting engine, with 4 hoisting drums and 2 winch heads, an upright steel tubular steam boiler of 30 h.-p. capacity and a structural steel derrick, for the British Columbia buoy scow. Bidders must furnish plans of the boilers and engines offered. Bids for the engine, boiler, and derrick separately will be received, or for all together.

Breton Cove, N. S.—Bids will be received until Sept. 18 by Fred Gelinas, Secy. Dept. Public Works, Ottawa, Ont., it is stated, for the construction of an extension to the landing pier at Breton Cove, Victoria Co., N. S. E. G. Millidge, Resident Engr., Antigonish, N. S.

CURRENT NEWS SUPPLEMENT

SEPTEMBER 14, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

American Society of Civil Engineers. Secretary, Charles Warren Hunt, 220 West 57th St., New York.

American Society of Mechanical Engineers. Secretary, Calvin W. Rice, 29 West 39th St., New York.

American Institute of Electrical Engineers. Secretary, Ralph W. Pope, 29 West 39th St., New York.

American Institute of Mining Engineers. Secretary, R. W. Raymond, 29 West 39th St., New York.

National Fire Protection Association. Secretary, W. H. Merrill, Jr., Chicago.

American Institute of Architects. Secretary, Glenn Brown, Washington, D. C.

Association of Engineering Societies. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

American Society of Heating and Ventilating Engineers. Secretary, W. M. Mackay, 113 Beekman St., New York.

Canadian Society of Civil Engineers. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

Society for the Promotion of Engineering Education. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

American Society for Testing Materials. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

American Society of Municipal Improvements. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y. Annual meeting, Detroit, Mich., Oct. 1-4, 1907.

Association of Railway Superintendents of Bridges and Buildings. Secretary, S. F. Patterson, Concord, N. H. Annual convention, Milwaukee, Wis., Oct. 15-17, 1907.

American Railway Engineering and Maintenance of Way Association. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

American Water Works Association. Secretary, J. M. Diven, Charleston, S. C.

American Street and Interurban Railway Association. Secretary, Bernard V. Swenson, 29 West 39th St., New York.

American Foundrymen's Association. Secretary, Richard Moldenke, P. O. Box 432, New York.

Engine Builders' Association of the United States. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

American Public Works Association. Secretary, W. H. Flint, Chattanooga.

Association of American Portland Cement Manufacturers. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

National Association of Cement Users. President, Richard L. Humphrey, Harrison Building, Philadelphia.

American Society of Refrigerating Engineers. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

American Public Health Association. Secretary, Dr. C. O. Probst, Columbus, O. Annual meeting, Atlantic City, Sept. 30-Oct. 4, 1907.

PERSONAL NOTES.

Mr. E. H. Rondall has been elected city surveyor of Fredericksburg, Va.

Mr. J. A. Smith has been appointed general manager of the Panama R. R., succeeding Mr. W. G. Bierd.

Mr. Harry T. Poe, Jr., has resigned as assistant engineer with the American Pipe Mfg. Co., to become city engineer of Americus, Ga.

Charles R. Long, for many years president of the Louisville Water Co., Louisville, Ky., died at his home in that city, Sept. 4, aged 67 years.

Prof. D. W. Mead read a paper on hydraulic engineering at the University of Wisconsin, at the first regular fall meeting of Western Society of Engineers, in Chicago, Sept. 4.

Richard J. McGrann, a well-known railroad contractor, died recently at his home in Lancaster, Pa., aged 70 years. He was a cousin of Bernard J. McGrann, of Newark, N. J., also a railroad contractor, who died recently.

Lieut.-Col. Frederic V. Abbott, Corps of Engineers, U. S. A., assistant to the chief of engineers, has been ordered to the Philippine Islands for duty in connection with the construction of fortifications in Manila and Subig bays.

The tenth annual convention of the Central States Water-Works Association will be held in Wheeling, W. Va., Sept. 17, 18 and 19. The Windsor Hotel will be headquarters. Mr. Wm. Allen Veach, Newark, Ohio, is secretary of the association.

Messrs. Lockwood, Greene & Co., architects and engineers, Boston, Mass., were the engineers for the manufacturing buildings recently built for Messrs. Jas. Pyle & Sons, at Shadyside, N. J., and for the power plant for the same firm, described in The Engineering Record, Aug. 31. Mr. Chapman is engineer in charge of the power plant.

Messrs. J. G. Ellendt and O. L. Griffith have severed their connection with the Concrete Engineering & Supply Co., New York City, and together with Mr. C. E. Tirrell, have organized the J. G. Ellendt Co., with offices at 1 Madison Ave., New York. They will engage in consulting engineering and contracting on reinforced concrete work.

Mr. Horace Ropes, formerly connected with the Metropolitan Water Board of Boston and the New York City Board of Water Supply, has been engaged by the New York State Water Supply Commission to assist Mr. John R. Freeman, whose appointment as director of the engineering forces of Water Supply Commission was noted recently in these columns.

M. Jules Vacherot, whose work as chief landscape architect at the Paris Exposition of 1900 won for him the decoration of the Legion of Honor from France and decorations from several other European countries, arrived in New York recently. M. Vacherot, who is now in charge of all the gardens of Paris, recently became associated with a New York firm of landscape architects and engineers. He will spend two months of each year in New York.

Messrs. Willis G. Tucker, professor of chemistry and toxicology in the Albany Medical College; Olin H. Landreth, professor of engineering in Union College, and James H. Stoller, professor of biology in Union College, have established the Albany Sanitary Bureau, Albany, N. Y., for the purpose of conducting a practice in sanitary investigation, examinations, inspections and reports. Special consideration will be given such problems as public and private water supplies, stream pollution, sewerage conditions in municipalities and institutions, sanitary conditions in schools, churches, hotels and other public buildings, and the examinations of dairies and creameries. Prof. Landreth is secretary of the company.

Mr. Julian C. Smith, recently general superintendent of construction for Dodge & Day, engineers and constructors, of Philadelphia, has resigned his position with that firm and has acquired a controlling interest in the Atlantic Engineering & Construction Corporation, of Norfolk, Va. This company, the name of which will be changed to The Atlantic Co., Inc., will do a general engineering and contracting business throughout the southern seaboard States. The company now has on hand contracts for the grading for the large new terminal yards of the Tidewater Ry. Co., at Sewell's Point, Va., and for the construction and equipment of a hydro-electric power plant at Boonton, N. J.

A commission appointed by the Prussian Government is making a tour of this country studying heavy electric traction systems preparatory to taking up the electrification of Berlin steam suburban lines, including the Stadtbahn, a connecting line extending through the city, and the Ringbahn, a belt line around the city. The chairman of the commission is Herr Geheimer Baurat Wittfeld, of the Ministry of Railways, Highways and Bridges. Associated with Mr. Wittfeld and accompanying him on the trip are: Dr. Ing. Walter Reichel, of the Berlin Polytechnic University, and formerly chief engineer of the railway department of the Siemens & Halske Co.; Mr. Frederick Jordan, general manager of the Felten Guilleume-Lahmeyer works of Frankfurt; Mr. Emmerich Frischmuth, engineering director of the Siemens-Schuckert Works, of Berlin, and Mr. Phillip Pforr, manager and chief engineer of the railway department of the General Electric Co., of Berlin. The commission has visited the installations of the New York Central, New York, New Haven & Hartford, and Long Island railways; the Erie electrification at Rochester, the Boston subway and elevated systems; the works of the General Electric Co., at Schnectady, and plants at Niagara Falls, Pittsburg, Indianapolis and Fort Wayne, Chicago, Helena and Spokane are also included in the itinerary. The cost of the installation contemplated is estimated at about $20,000,000.

BUSINESS NOTES.

The Aberthaw Construction Co. have closed a contract for building a concrete-steel dam 40 ft. high and about 225 ft. long for The Barker Mills, Auburn, Me., under license from the Ambursen Hydraulic Construction Co., of Boston. Mr. I. W. Jones, of Milton, N. H., is the engineer for the company.

Judge Buffington, of the U. S. Circuit Court of Appeals, has rendered a decision in the suit of the Lidgerwood Mfg. Co., against the Lambert Hoisting Engine Co., holding that the latter has infringed the North patent for one-quarter and three-quarter speed cableways, owned by the Lidgerwood company.

The contracting office of the Virginia Bridge and Iron Co., heretofore located at Little Rock, Ark., has been transferred to New Orleans, La. The office will be in charge of Mr. F. E. Golian, who was connected with the engineering department of the company for some time, but has recently been with the Atlanta office.

The Bellevue Pipe & Foundry Co. during the past summer cooled their foundry by forcing air over pipes through which cold water was circulated. The molding room was kept at a good working temperature and not a single day was lost on account of the heat. The cooling equipment was installed by the American Blower Co., Detroit.

Dodge & Day, engineers and contractors, Philadelphia, have submitted a betterment report covering the entire factory of Fayette R. Plumb, Inc., of Frankford, Pa., and are now engaged in making extensive alterations to the forge shops. When this work is finished other departments will be taken up and ultimately the entire plant will be remodelled.

The Pacific Coast headquarters of the Standard Underground Cable Co., which have been at Oakland since the earthquake, are now permanently loacted at 511-514 Shreve Building, San Francisco, Cal., the office continuing in charge of Mr. A. B. Saurman as Pacific Coast manager. The new Oakland factory of the company is about four times the size of the one destroyed by fire after the earthquake, is fireproof and equipped with the latest machinery. A warehouse for the products of the company's eastern factories is maintained at Oakland.

On Aug. 22 the new Hunt St. factory of the D. T. Williams Valve Co., Cincinnati, was completely destroyed by fire, and all of the tools and machinery of the lubricating department, the only department which had been moved to the new building, were lost. The patterns, however, were still at the Broadway plant. A new lubricating department is now being installed on East 8th St., and castings and tools are being manufactured as quickly as possible, so that deliveries of lubricating devices can be made about Oct. 15. None of the other departments were injured.

A mechanical stoker of unusual design has recently been brought out by the Sarco Fuel Saving & Engineering Co. A reciprocating ram delivers a definite amount of coal in front of a pendulous shovel, the edge of which swings near the bottom of a pan. The shovel is drawn back mechanically against a strong helical spring until released, when it is pushed forward by the spring and shoves the coal forward on the grate. The force of this push is varied automatically at each swing of the shovel in order to distribute the fuel properly. One shovel will stoke a furnace width of about 3 ft. These stokers are now in use at several paper mills.

The July business of the Westinghouse Electric & Mfg. Co. was considerably above the average, the railway department alone showing orders of approximately $2,500,000. Among these was one from the Brooklyn Rapid Transit Co. for 400 electric railway motors, 200 of which, of 200 h.-p. each, are for the elevated railroad cars, while the balance of 60 h.-p. each, are for surface cars. The Westinghouse multiple unit control will be used with the elevated car equipment. Another large order, for the electrical apparatus for 24 substations, consisting of static and rotary transformers, and switch-boards, was received from the Schoepf interests, of Cincinnati, which operate extensive urban and interurban electric railways in Ohio and southern Indiana.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Ft. Morgan, Ala.—Bids will be received by Capt. Louis F. Gabbard, Jr., Box 605, Mobile, Ala., until Sept. 25, for the construction at Ft. Morgan, Ala., of a 150,000-gal. tank and trestle and for pumping plant, ice machine and cold storage.

Van Buren, Ark.—J. E. Power and others, according to reports, have purchased the plant of the Van Buren Water Co. and will improve the same.

Oakland, Cal.—The Bd. Pub. Wks. is stated to have adopted a resolution to petition the City Council to unite with San Francisco in trying to secure a water supply for Oakland from the Sierra Nevada Mountains.

Los Angeles, Cal.—Bids will be received by the Bd. Pub. Wks. Oct. 7 (W. R. Ormsby, Acting Pur. Agt.) for cement-making machinery for the Los Angeles Aqueduct, as per specification No. 6.

Hotchkiss, Colo.—The Alta Vista Reservoir Co. (C. A. Fowler, Pres.) contemplates work costing about $25,000. The work will be done by day labor, the bulk of the work by hydraulic power. Length of dam 1,000 ft. outlet pipe, 15-in. cement. Capacity 45,000,000 ft. Fred. G. Hotchkiss, Engr., Hotchkiss.

Paonia, Colo.—The Mt. Lamborn Canal & Reservoir Co. contemplates building 7 miles of canal this fall and a reservoir and 6 miles of canal in 1908. Probable cost, $75,000. E. P. Martin, Paonia, Engr.; C. C. Hawkins, Secy.

Wilmington, Del.—Bids will be received Sept. 30 by the Water Dept. for the construction of covered slow sand filters, consisting of 6 beds and a covered filtered water reservoir with a capacity of 10,000,000 gals., together with appurtenances, as advertised in The Engineering Record. Theo. A. Leisen, Ch. Engr.

Ft. Du Pont, Del.—Bids will be received until Oct. 10 by Capt. J. L. Knowlton, Constr. Q. M., Ft. Du Pont, Delaware City, Del., for remodeling the sewer and water systems and constructing a 150,000-gal. tank at Ft. Du Pont, as advertised in The Engineering Record.

Columbus, Ga.—It is reported that an agreement has been reached between the Hudson Eng. & Contr. Co., of New York, N. Y., whereby the company agrees to supply the city with 5,000,000 gals. artesian water daily for a period of 20 years.

Jackson, Ga.—The Council is said to be considering the issuing of $10,000 bonds to extend the water system.

Catoosa Springs, Ga.—Bids will be received until Sept. 21 by Capt. E. D. Anderson, Q. M., U. S. A., Ft. Oglethorpe, for a deep well and water system at the Government target range, Catoosa Springs.

Atlanta Ga.—Bids will be received until Oct. 23 (readvertisement), by the Bd of Water Comrs. (Park Woodward, Gen. Mgr.), for furnishing and erecting complete a sectional washing pressure filter plant, to consist of 8 units, ea. unit 8 ft. in diam. and 20 ft. long, as advertised in The Engineering Record.

Lewiston, Idaho.—It is proposed to lay water mains under the supervision of W. A. Smith, Supt., at a cost of $57,300. An election is to be held Sept. 21 to vote on this question. John E. Nickerson, Compt.

Lindsay, Ind. Ter.—It is reported that $25,000 bonds have been voted for a water supply.

Tulsa, Ind. Ter.—The Council is reported to be contemplating the purchase of the plant of the water works company.

Indianola, Ia.—The citizens, it is stated, have voted in favor of the city purchasing the plant of the company operating in this city.

Des Moines, Ia.—The Des Moines Water Co. have been making surveys and collecting data for proposed improvements.

Covington, Ky.—The Com. on Water Wks. of the Bd. of Water Wks. Comrs. is said to be contemplating the purchase of the Kenton Water Co.'s mains in Madison Ave.

Bangor, Me.—The following are the detailed bids received Sept. 4 for constructing coagulating basin and head house (Geo. W. Fuller, Engr., 170 Bway., N. Y. City): (a) C. N. Taylor, $46,195, (b) Greer Filter Co., $47,786, (c) P. B. Elkins Co., $49,511: Earth excav., 6,200 cu. yd., *a* 50 cts., *b* 50 cts., *c* 55 cts.; rock excav., 20 cu. yd., *a* $3, *b* $4, *c* $5; earth embk. and fill., 4,700 cu. yd., *a* 40 cts., *b* 30 cts., *c* 30 cts.; top soil and seeding 15,000 sq. ft., *a* 4 cts., *b* 1 ct., *c* 6 cts.; road and walkways, 60 cu. yd., *a* $5, *b* 2.50, *c* $2.50; concrete, Class A, 170 cu. yd., *a* $9, *b* $15, *c* $13; concrete, Class B, 2,180 cu. yd., *a* $8, *b* $9.25, *c* $10. steel rods, 58,000 lbs., *a* 3.25 cts., *b* 4.9 cts., *c* 3.5 cts.; head house superstructure, lump sum, *a* $5,800, *b* $5,037, *c* $5,255; electric lighting and heating, lump sum, *a* $950, *b* $1,000, *c* $810; self-cleaning screens and appurtenances, lump sum, *a* $2,200, *b* $1,400, *c* $1,970; c. i. pipe, specials and valves, lump sum, *a* $4,750, *b* $5,540, *c* $5,440; sewers, lump sum, *a* $1,100, *b* $737, *c* $730; brick manholes, lump sum, *a* $400, *b* $275, *c* $65; manhole covers and drains for coag. basin, lump sum, *a* $300, *b* $200, *c* $400; coagulant devices, lump sum, *a* $2,500, *b* $1,800, *c* $1,587; plumbing and small piping, lump sum, *a* $1,100, *b* $1,350, *c* $1,235.

Berlin, Md.—See "Power Plants, Gas and Electricity."

**Grosse Pointe Farms, Mich.*—J. G. Armstrong, Clk., writes that the contract to lay 2¼ miles of water pipe (bids opened Aug. 31) has been awarded to Cornelius Cronin, of Grosse Pointe.

**Hibbing, Minn.*—The Village Council is stated to have accepted the bid of the Prescott Steam Pump Co., of Milwaukee, Wis., to furnish a steam pump at $7,500; two other bids were received, one from the Worthington Steam Pump Co., at $9,300, and the other from the Fairbanks Morse Co., at $6,791.

Kansas City, Mo.—D. E. Cornell, Mayor of the West Side, is said to be considering the calling of an election to vote on the issuing of bonds to construct a new water plant.

Ft. Keogh, Mont.—E. C. Bebb, a government irrigation expert, is reported to have examined the portion of the Ft. Keogh reservation which corners on the Tongue and Yellowstone Rivers, ascertaining the area that could be irrigated and the required elevation of the head gate of a ditch which would irrigate the flat. Between 7,000 and 10,000 acres were found to be within the domain of such a ditch and an elevation of 8 feet above the bank of the Yellowstone, at a point 5 miles west of the post, where the bluffs border the river, would be sufficient to give the necessary fall.

**Sanders, Mont.*—J. R. Thompson, Secy. Sanders Cooperative Ditch Co., writes that the contract to construct an irrigation ditch (bids for which were received Aug. 31) has been awarded to J. C. Lyndes, of Sanders, at from 15 to 35 cts. per cu. yd., as per classification; in all about $32,000.

Billings, Mont.—The purchasing of the plant of the Billings Water Co. by the city is being agitated.

**Bradshaw, Neb.*—C. B. Palmer, Jr., Village Clk., writes that the contract to construct water works (bids opened Aug. 30) has been awarded to the Drake-Williams Mount Co. and Crane Co., of Omaha, Neb.

Fremont, Neb.—See "Power Plants, Gas and Electricity."

Harrison, N. J.—Bids will be received until Oct. 1 by the Water Com. of Common Council for furnishing material and laying a water main in a portion of Franklin Ave. B. P. Walsh, Town Clk.

Belvidere, N. J.—Jos. M. Roseberry, Pres. of the Buckhorn Springs Water Co., writes that as soon as specifications are prepared bids for construction of water works will be asked. About $40,000 will be spent. S. W. Salmon, of Mount Olive, N. J., is the engineer.

Summit, N. J.—Bids will be received until Sept. 25 by the Pres. Bd. Trus., for drilling a deep well to the depth of about 1,600 ft. Jas. Johnstone, Village Clk.

**Gloucester, N. J.*—The contract to furnish a 3,000,000-gal. pump for the water works, it is reported, has been awarded to the D'Olier Eng. Co., of Philadelphia, Pa., at $3,495.

Camden, N. J.—In the report to the City Council by experts Wm. H. Boardman, J. M. Whitham and J. W. Ledoux on the increasing of the water supply, it is recommended that efficient strainers be used at the artesian wells at Delair that will increase the present output of 14,562,000 gals. to 17,000,000 daily, the metering of the entire city, and that the average daily use for each person be reduced to 125 gals. The erection of storage tanks on the hill at Bethel, near Delair, so that in the middle of the day there will be ample pressure throughout the city. These reservoirs, it is estimated, will cost $150,000. As to the future supply it is stated that the purchase of property adjoining the present plant will provide sufficient water to supply all demands of the city until 1920. This new plant, it is stated, will cost about $200,000 and will increase the output to 22,000,000 gals. daily.

A resolution has been passed by the City Council authorizing the city to borrow $3,500 to pay additional expenses of lowering the city water main in Cooper Creek at State St.

Santa Rosa, N. M.—W. S. Shields, of Chicago, Ill., is reported to have estimated the supply of water that can be taken from the canon 3 miles east of Santa Rosa at between 600,000 and 1,000,000 gals. daily. A well 600 ft. long reaching from one side of Los Tanos canon to the other is contemplated. The water is to be brought into the city gravitation. Local business men are said to be interested in the project, and it is stated that about $25,000 capital is to be subscribed.

New York, N. Y.—The following are the bids received Aug. 29 by the Park Comrs. of New York City, for furnishing, delivering and laying c. i. water pipe and appurtenances in the Harlem River Driveway between 155th and 177th Sts.: Atlanta Contr. Co., $23,810; Thos. Crimmins Contr. Co., $32,195; Wm. H. Masterson, $19,777; The Wilton Constr. Co., $23,125. The detailed bid of Wm. H. Masterson, the lowest bidder, on some of the items is as follows: 105 tons straight 6-in. c. i. pipe furnished, $38; 6½ tons 6-in. c. i. branches and special castings furnished, $100; 6,100 lin. ft. 6-in. c. i. pipe laid, $2; 750 lin. ft. 2-in. wrought iron pipe furnished and laid, $2; etc.

Albany, N. Y.—John R. Freeman, of Providence, R. I., is reported in charge of a force of engineers who are working in Sacandaga Valley to secure data concerning the State's water power resources in accordance with the Fuller Act. Mr. Freeman is to make a report to the Legislature by Feb. 1, 1908.

Niagara Falls, N. Y.—The construction of a new water system is being agitated. Three-fourths of the taxpayers are said to be in favor of Mayor A. C. Douglass' plan which involves an expenditure of about $525,000, and is to take water from the Canadian channel about half way between Navy and Buckhorn islands in the Niagara River.

**Cazenovia, N. Y.*—Gen. W. Salisbury, Pres. Water Bd., writes that no award was made Sept. 4 for furnishing and laying 5,433 ft. 4-in. c. i. pipe. The city will probably buy the material and let contract for labor.

Brooklyn, N. Y.—Bids were opened on Aug. 28 at the office of the Comr. of Water Supply, Gas and Electricity, N. Y. City, for furnishing, delivering and laying water mains and removing existing water mains in Bedford, Clinton, Greenpoint, Harrison, Johnson, Manhattan, Meserole and Nassau Aves.; in Humboldt, Keap, Lorimer, Meserole, Oakland, Provost, Scholes, Waterbury and White Sts., and in Delmonico Pl., Boro. of Brooklyn, and the lowest bid received was submitted by J. H. Holmes, 87 Nassau St., N. Y. City, at a total of $317,817. The following is his detail bid of some of the principal items required: 3,560 tons straight pipe, $37.50; 360 tons specials, $75; 350 tons gate valve boxes, $54; 75 lin. ft. 30-in. pipe to lay, including excav., $3; 25 lin. ft. 24-in. pipe to lay, including excav., $2.50; 6,700 lin. ft. 20-in., $1; 40,200 lin. ft. 16-in., 90 cts.; 7,400 lin. ft. 12-in., 73 cts.; 5,600 lin. ft. 8-in., 72 cts.; 2,800 lin. ft. 6-in., 35 cts.; 350 sq. yds. Belgian block pavt., 30 cts.; 6,200 sq. yds. granite block pavt., 30 cts.; 6,500 sq. yds. granite block, concrete found., $1.60; 1,000 sq. yds. cobble pavt., 20 cts.; 7,500 sq. yds. asphalt, $1.90; 300 sq. yds. asphalt block, $1.90; 450 sq. yds. brick pavt., $1.60; 150 sq. yds. Medina sand stone, $1.20; 1,500 sq. ft. flag, 10 cts.; 500 sq. ft. cement sidewalk, 20 cts.; 50 cu. yds. brick masry., $15; 50 cu. yds. concrete, $10; 10 M ft. lumber, 1 ct.; 5,000 lbs. steel I-beams, 3 cts.; 1,000 cu. yd. extra excav., $1.50; 100 cu. yds. rock excav., $2.50; 2 16-in. connections 30-in. pipe, $450; 1 12-in. connection 30-in. pipe, $300; 1,000 ⅜-in. house connections, $1.50; 100 ½-in. house connections, $1.75; 100 ⅝-in. house connections, $2; 50 1-in. house connections, $3; 25 2-in. house connections, $7; 100 hydrants removed, $10; 50,000 lin. ft. 6-in. pipe removed, 1 ct. Totals of other bids: Shawmut Constr. Co., 301 S. 3d St., Brooklyn, $322,567, and Hanover Constr. Co., 21 Park Row, $336,365.

The Kings Dept. of Parks is reported to have awarded to Barton & McHarg, of New York City, N. Y., the contract to construct a water system to supply the club house and nursery for Forest Park. Probable cost, $15,000.

Ft. Caswell, N. C.—Bids will be received until Oct. 9 by L. Cravens, Quarter Master, Ft. Caswell, for building pump house, ice plant and cold storage here, as advertised in The Engineering Record.

Kings Mountain, N. C.—See "Power Plants, Gas and Electricity.

Charlotte, N. C.—Bids will be received until Sept. 19 by the Bd. of Water Comrs. (Patk. H. Williams, Supt.), for furnishing approximately 440 tons c. i. pipe and specials, 37 Matthews pattern fire hydrants, and valves of 6-in., 8-in., 12, 16 and 20-in. sizes; also same date and place separate bids for laying approximately 1,800 ft. of 20-in., 4,150 ft. 12-in. and 250 ft. 6-in. water mains together with necessary valves, hydrants and specials.

**Cincinnati, O.*—Frank Burns is stated to have secured the contract for laying 12-in. pipe in Grand, Warsaw and Price Aves., at $2,532, and for laying 8-in. filtered water pipe at California, at $1,983. The American Steel & Wire Co. is reported to have secured the contract to furnish 1,100 tons of sulphate of iron at $13,200.

The Selvage Constr. Co. is reported to have submitted the lowest bid for furnishing 28 fire hydrants.

**Sandusky, O.*—The contract to construct a mechanical filter plant (bids received June 29) was awarded recently to Thos. Sightbody, of Youngstown, at $75,000 complete, 6,000,000 gal. capacity. It is to be of concrete construction.

Mosquite, Ore.—Bids will be received until Oct. 26 by Saml. Hill, Chmn. Snake River Irrigation Dist., Mosquite, for $325,000 irrigation bonds.

**Halbur, Ia.*—Fred Franzwa, of Carroll, is stated to have secured the contract to construct water works at $3,865.

Seneca, S. C.—It is reported that bonds have been voted to establish a water plant.

Dickson, Tenn.—We are informed that the citizens have voted in favor of issuing $25,000 bonds for water works. Bids for construction not yet advertised.

Victoria, Tex.—The City Council has instructed the Com. to advertise for artesian water, the quantity to be not less than 700 gals. per minute, or 1,008,000 gals. per day.

Bronte, Tex.—The question of installing a water works system is reported contemplated. The forming of a company by local capitalists to bring water from Colorado River, a distance of 3 miles, is being considered.

Beaumont, Tex.—The Beaumont Water Wks. Co. is stated to have authorized an issue of $250,000 in bonds for improving the plant.

Fair Haven, Vt.—It is proposed to extend the water system by constructing 2 additional reservoirs and laying pipe, at a total cost of $15,000. Bids will be opened within a month. Washburn Fancher, of Fair Haven, is the Engr. in charge.; D. J. Durick, Village Pres.

Lind, Wash.—R. S. Hamilton, Town Clk., writes that no improvements are contemplated at the present time by the city to the water works recently purchased.

Tacoma, Wash.—An ordinance has been approved by the Mayor to lay 6-in. c. i. water pipe and 6-in. wooden water pipe in Local Improv. Dist. No. 517, including hydrants, gates, tees, etc.

*The report of the Special Water Com. recommending to the Council that the bid of the Los Angeles Well Drilling Co. for sinking an experimental well at South Tacoma at $7,500 be accepted, was adopted by Council.

**Seattle, Wash.*—The contract to lay water mains in 3d Ave. W., is stated to have been awarded to H. F. Johns at $11,875.

Union, W. Va.—Bids will be received until Oct. 5 by A. S. Johnston, Mayor, for $5,500 bonds, to be issued for the purpose of constructing a system of water works.

Kingwood, W. Va.—A local water company has been formed and, it is stated, has applied to the City Council for a franchise to establish a water works system.

Elkins, W. Va.—Water works bonds have been sold and bids for the construction will be received Sept. 20. Geo. Henry, City Clk.; Penniman & Fairley, Engrs., Baltimore, Md.

Parkersburg, W. Va.—G. L. McGibbons is reported to have been engaged by the Bd. of City Affairs to prepare plans for the construction of a water works system. J. V. Dunbar, City Engr.

Madison, Wis.—Bids will be received until Sept. 27 by the Bd. of Water Comrs. (John B. Heim, Supt.) for constructing a 1,000,000-gal concrete storage basin; also, same date and place, separate bids for drilling 1 and possibly 2 artesian wells, both proposals advertised in The Engineering Record.

**Fond du Lac, Wis.*—The City Council Aug. 26, it is stated, accepted the bid of S. H. Cole for laying a gravity intake water system in the northern extremity of

**Items marked thus give the names of parties awarded contracts.*

the city at Rees and Bannister Sts. The total cost of the work will be about $20,000, and includes 4,994 ft. of pipe.

Winnipeg, Man.—It is stated that the Winnipeg River is recommended as a source of water supply for Winnipeg in the report of the water supply experts placed before the Water Supply Comn. Sept. 6. The cost of constructing the system for a 12,000,000-gal. daily supply is estimated at $3,862,000 with wood stave pipe lines, and $6,050,000 with steel pipe lines. To bring in 48,000,000 gal. daily the cost is placed at $10,519,000 with stave pipe line and $17,084,000 with steel pipe lines.

Montreal, Que.—We are informed that the following are the detailed bids opened Sept. 6 by the Water Com. (Geo. Janin, Supt.) for constructing a reinforced concrete conduit, about 9 ft. in diam. and 27,300 ft. long: (*a*) Chief Engr.'s estimate, (*b*) Patk. McGovern, Boston, Mass.; (*c*) Louis P. Nott, Manchester, Eng.; (*d*) La Societe Canadienne d'Entreprise Generale, Montreal; (*e*) Treffle Bastien, Montreal. (Quantities given are approximate.) 27,100 lin. ft. of conduit complete, *a* $19, *b* $21.25, *c* $24, *d* $25, *e* $32.97; 44,000 cu. yds. rock excav., *a* $2.25, *b* $2, *c* $1.10, *d* $1.85, *e* $1.99; 10,000 cu. yds. loose rock and boulders, *a* $1.25, *b* 75 cts., *d* 24 cts., *e* $1; 2,400 lin. ft. piling and flooring, *a* $6, *b* $5.60, *c* $24.50, *d* $11, *e* $14.21; totals, *a* $640,800, *b* $684,815, *c* $757,600, *d* $787,700, *e* $1,025,151.

Welland, Ont.—The Railway & Municipal Bd. at Toronto has approved the application of the town of Welland for permission to issue $15,000 water works extension bonds.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

**Oakland, Cal.*—It is stated that the contract to construct a sewer in Channing St. has been awarded to the Standard Constr. Co., at $9,659.

Hartford, Conn.—The Bd. of Contract & Supply, it is stated, has authorized bids to be received for constructing sewers in New Britain Ave., Zion and Lincoln St. extension and Allen Pl. and across private property; bids to be opened Sept. 16.

Washington, D. C.—Bids will be received by the Comrs. D. C. until Sept. 30 for constructing sewer in the District of Columbia, known as Valley of Soapstone Branch, as advertised in The Engineering Record.

Ft. Du Pont, Del.—See "Water."

Ft. Dade, Fla.—Bids will be received until Oct. 3 by the Constr. Q. M., U. S. A., for repair and extension to sewer outlet at this post.

Nampa, Idaho.—Bids will be received by the Sewer Comn. (Claude Duval, Clk.), it is stated, until Sept. 18, for constructing 9,535 ft. gravity sewer.

St. Charles, Ill.—Bids will be received until Sept. 18 by the Bd. Trus (C. W. Hart, Secy.) St. Charles School for Boys, at the office of T. D. Hurley, 1244 Unity Bldg., Chicago, for constructing a system of drains. W. Carbys Zimmerman, State Archt., 1101 Steinway Hall, Chicago.

Great Lakes, North Chicago, Ill.—Bids will be received at the Bureau of Navigation, Navy Dept. (Cameron McR. Winslow, Acting Ch.), Washington, D. C., until Sept. 27, for the laying of sewers and drains at the naval training station, Great Lakes, North Chicago, Ill.

Peoria, Ill.—Bids will be received until Sept. 18 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and constructing a sewer in a portion of S. Peoria St.

Chicago, Ill.—Rudolph Hering, of New York, N. Y., who has been engaged by the Drainage Bd. to investigate the sewage disposal problem, it is reported, has started the investigation.

Richmond, Ind.—It is stated that no bids were received Aug. 26 for constructing a sewer system in West Richmond south of Main St. and a sewer system on Northwest 2d St. The cost of these improvements is estimated at $105,000. Bids on the West Richmond sewer will probably not be asked again until late in the fall.

We are informed that bids will be received Sept. 25 (readvertisement), for constructing a sewer in W. 2d St. Fred. R. Charles, City Engr.

Ft. Wayne, Ind.—It is stated that the Bd. Pub. Wks. (H. W. Becker, Clk.) will receive bids until Sept. 19 for constructing 2 vitrified clay pipe sewers.

Brazil, Ind.—Plans and specifications have been ordered prepared, according to reports, for a sewerage system through the city, beginning at Hadleytown suburb.

Columbus, Ind.—Lawrence F. Orr, City Clk., writes that no contract was awarded Sept. 3 for constructing 9,838 ft. of main and lateral sewers. The matter may not be taken up for several months and may day over until spring.

Oelwein, Ia.—R. C. De La Hunt, of Cedar Rapids, it is stated, will install a sewage disposal plant.

Des Moines Ia.—It is stated that as soon as plans have been approved by the Council the Bd. of Pub. Wks. (W. W. Wise, Chmn.) will ask bids for the septic tank for the Center Drive sewer system.

**Muscatine, Ia.*—Hutchinson & Atwater, of Muscatine, are stated to have secured t.e contract to construct a sewer in Wayne St., at about $2,000.

**Hutchinson, Kan.*—Edw. Metz., City Clk., writes that the contract to construct sewers (bids opened Aug. 26), has been awarded to Davis & Henser, of Hutchinson, at 46.5 cts. for 10-in., and 35.5 cts. for 8-in. pipe.

**Alexandria, La.*—The contract to construct approximately 5 miles of sewers (bids opened Sept. 3) has been awarded to P. H. Porter, of Clinton, Ky.

Westfield, Mass.—Bids will be received until Sept. 18 by the Bd. of Selectmen at the office of the Town Clk., for constructing sewers, in all about 5,130 ft. pipe 8 to 24-in., with manholes and catch-basins, as advertised in The Engineering Record. Oren E. Parks, Town Engr.

Mankato, Mich.—The State Investment Bd. is stated to have given to Mankato $25,000 to be used in improvements to the park system and sewer system.

Gladstone, Mich.—See "Paving and Roadmaking."

Cadillac, Mich.—A. J. Teed, City Engr., writes that bids will be received Oct. 1 for constructing a sewage disposal plant to cost about $12,000.

**Marquette, Mich.*—Wm. Trebilcock is reported to have secured the contract to construct a sewer in Empire St., at $1,200.

Stillwater, Minn.—It is reported that the Council has directed plans and estimated to be prepared for the building of a sewer system.

pollution of the Atlantic Ocean. The cost of removing present system and construct plant will be about $5,000.

Merchantville, N. J.—The contractor to whom the contract for constructing the sewerage system was awarded has notified the Mayor that he has abandoned the contract. The work is said to be half completed. It is stated that the city will complete the work.

Summit, N. J.—Bids will be received until Sept. 17 by the Common Council, for constructing East Summit Lateral Sewers No. 3, consisting of about 4,200 ft. 8 and 10-in. pipe sewers; the Mountain Ave. Sewer, consisting of 460 ft. 8-in. pipe sewer. Edwd. J. Rowe, City Clk.

Asbury Park, N. J.—John L. Coffin, Supt. of Water and Sewers, it is reported, has asked the City Council to take immediate action to install some other system of sewerage than the present one in order to comply with the edict of the State Sewerage Comn. that towns along the coast must cease poluting the Atlantic Ocean by May 1, 1908. The new system will, it is estimated, cost between $25,000 and $30,000.

Brooklyn, N. Y.—The following are the bids opened on Aug. 28 by Bird S. Coler, Pres. Brooklyn Boro. For furnishing material and constructing sewer in Scott Ave., from Newtown Creek, north of Metropolitan Ave., to St. Nicholas Ave., etc.: (a) Jas. H. Holmes, Brooklyn; (b) Flick, Litchfield Const. Co., Brooklyn; (c) Rodgers and Haggerty, 1929 Amsterdam Ave., N. Y. City; (d) M. C. Madsen, Brooklyn; (e) Henry Newman, Brooklyn; (f) Jno. J. Creem, Brooklyn; (g) Borough Const. Co., Brooklyn; (h) Chas. Crawford, Brooklyn; (i) Jacks Asserson Const. Co., Brooklyn.

Hamden, Conn.—Bids will be received until Sept. 17 by the Bd. Selectmen (Arthur E. Woodruff, Chmn.) for improving about 1,200 ft. road.

* *Stonington, Conn.*—Highway Comr. James H. Macdonald is stated to have awarded to the T. H. Gill Co., of Boston, Mass., the contract for the construction of the 2 sections of gravel road in Stonington, one of 9,500 ft. at 76 cts. and the other of 9,750 ft. at 79 cts. per ft. or a total of $14,922.50.

* *Ellington, Conn.*—The contract for constructing 5,612 ft. of gravel road in Ellington is stated to have been awarded to Frank Arrigoni & Bro., of Durham, for $4,714.

**Washington, D. C.*—The contract for grading Albemarle St. (bids opened Sept. 3) has been awarded to E. G. Gummel, of Washington, at 44 cts. per cu. yd.

Pensacola, Fla.—The following bids are reported opened Aug. 27 by L. Hilton Green, Chmn. Bd. Bond Trus., for 170,700 sq. yds. pavement: Southern Paving Co., of Nashville, bitulithic, $2.65; asphalt, $2.55; Graves-Matthews Paving & Constr. Co., of Birmingham, asphalt, $2.40; brick with sand foundation, $2.01; Southern Paving & Constr. Co., of West Virginia, brick with sand foundation, $2.21; with concrete, $2.61; price given per sq. yd.

**Freeport, Ill.*—The following are the detailed bids received Sept. 5 by G. W. Graham, City Engr., for macadamizing 5th Ave., Hosmer, American, Chestnut and other streets: (*a*) Wm. Ascher, Freeport, Ill., $70,967 (awarded contract); (*b*) M. Ford, Cedar Rapids, Ia., $72,222: 10,486 sq. yds. brick gutter, *a* $17,301.90, *b* $17,301.90; 44,790 sq. yds. macadam, *a* $19,259.70, *b* $20,603.40; 31,783 cu. yds. excavation, *a* $9,534.90, *b* $9,534.90; 31,460 lin. ft. Northern Ohio sandstone curbing, *a* $20,440, *b* $20,449; 25 intakes, *a* $750, *b* $700; 69 trees (removing), *a* $270, *b* $241; 7,840 sq. ft. cement sidewalk approaches, *a* $862, *b* $862. 1,000 ft. 24-in. sewer, *a* $2,250, *b* $2,250; 166 ft. 18-in. sewer, *a* $249, *b* $249; manhole, *a* $35, *b* $30.

Champaign, Ill.—The paving of N. Elm St. with brick is reported contemplated.

**Peoria, Ill.*—The Bd. Local Improv. is stated to have awarded contracts for paving portions of Jackson St. to John MacAllister and Crescent Contr. Co. at $9,227 anad $4,075, respectively.

Quincy, Ill.—Bids will be received until Sept. 18 by Bd. of Local Improv. for constructing brick pavement on 10th St., as advertised in The Engineering Record.

Hartford City, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Oct. 7, for the construction of 10,465 ft. and 15,185 ft. of macadam road in Harrison Township, known as roads No. 1 & 2; also 15,775 ft. macadamized road on the line between Harrison and Washington Townships. L. W. Dougherty, Co. Aud.

Shelbyville, Ind.—It is reported that the City Council will receive bids until Sept. 17 for the construction of a macadamized roadway on Center St. and cement sidewalks on 4 streets. H. J. Clark, City Clk.

Vincennes, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Sept. 28 for the construction of 10,283 ft. of gravel road; also the Fyffe gravel road, length, 5,736 ft.; also until Oct. 8, for the construction of 8,000 ft. gravel road; all in Vincennes Township. Jno. T. Scott, Co. Aud.

Ft. Wayne, Ind.—It is stated that bids will be received until Sept. 19 by the Bd. Pub. Wks. (H. W. Becker, Clk.), for paving sundry streets and constructing cement sidewalks.

Ft. Wayne, Ind.—See "Bridges."

Frankfort, Ind.—It is stated that bids will be received by the Bd. Co. Comrs. until Sept. 20 of Canton and Carrol Counties for constructing gravel road No. 19 about 18,408 ft. in length. Chas. F. Cromwell, Co. Aud., Clinton Co.

Decatur, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Oct 7 for the construction of a macadamized road in Root Township. C. D. Lewton, Co. Aud.

Sunman, Ind.—It is stated that bids will be received until Oct. 14 by the Town Council, for constructing cement sidewalks. E. R. Behlmer, Town Clk.

Des Moines, Ia.—Bids will be received until Sept. 16 by Bd. Pub. Wks. (W. W. Wise, Chmn.), for paving with vitrified brick 12th St. on 6-in. concrete foundation and asphalt filler, in all about 5,200 sq. yds.; also until Sept. 19 for paving with vitrified block on 6-in. concrete foundation and Portland cement filler, Park Land, in all about 4,317 sq. yds., and curbing Ingersol Ave., 10,192 lin. ft.; also until Sept. 21 for paving 6th St. and Arlington Ave. with repressed paving block on 6-in. Portland cement found. and asphalt filter, in all about 4,748 sq. yds.

Ottumwa, Ia.—No bids were received Sept. 2 for paving with brick. J. T. Brady, City Engr.

Ft. Williams, Me.—Bids will be received until Sept. 21 by Capt. F. J. Morrow, Q. M., U. S. A., Portland, for constructing concrete walks at Ft. Williams, as advertised in The Engineering Record.

**Baltimore, Md.*—Patrick Flanagan is reported to have been awarded the contract for macadamizing Chelsea Terrace. Bids opened by the Bd. of Awards, Aug. 28.

Boston, Mass.—Bids will be received until Sept. 17 by the Highway Comn. (W. E. McClintock, Chmn.), 15 Ashburton Pl., Boston, for constructing roads in the following towns and city: length given being approximately only: West Boylston, 6,800 ft.; Charlton, 2,500 ft.; Princeton, 3,000 ft.; Taunton, 3,500 ft.

North Adams, Mass.—The City Council is reported to have decided to issue $8,000 bonds for street improvements.

**Gladstone, Mich.*—Contracts for macadam pavements and installation of sewers are stated to have been awarded to the Northern Constr. & Engineering Co., of Escanaba, for $30,000.

Waseca, Minn.—John Madigan, City Clk., will receive bids until Sept. 17 for paving with brick block, about 17,207 sq. ft. on Elm and First Sts.

Eveleth, Minn.—It is reported that bids will be received until Sept. 17 for 20,000 ft. cement walks.

Sedalia, Mo.—The City Council is reported to have passed resolutions providing for the paving of 4th, 5th, 6th and 7th Sts.

Gloucester City, N. J.—The City Council is reported to have passed an ordinance providing for the issue of $75,000 bonds for street improvements.

Allenstown, N. H.—Bids will be received until Sept. 20 by A. W. Dean, State Engr., Concord, for constructing a trap rock road in Allenstown; probable cost, $4,000.

Trenton, N. J.—Bids will be received until Sept. 17 by the Common Council for paving a portion of Factory St. with sheet asphalt, and Stockton St., with sheet asphaltum; also repaving a portion of S. Clinton Ave. with sheet asphaltum. Harry B. Salter, City Clk.

Camden, N. J.—The City Council has passed an ordinance authorizing the issue of $150,000 street bonds and $15,000 park bonds.

An ordinance has passed third reading in the Council authorizing the paving with asphalt a portion of Berkley St., and with macadam a portion of 21st St.

Bids will be received until Sept. 17 by Edwd. Francis, Chmn. Com. on Streets and Highways, for paving Princess Ave. with Macadam, Jefferson and Delaware Aves. with Belgian block.

**Monroe, N. Y.*—T. F. B. Carpenter, Village Clk., writes that the contract to construct 11,000 sq. ft. of cement sidewalks has been awarded to the Jos. Sharpe Constr. Co., of Paterson, N. J.

New York, N. Y.—Bids will be received by Moses Herrman, Pres. Bd. Park Comrs., until Sept. 26, for furnish-

Items marked thus give the names of parties awarded contracts.

ing and delivering 3,000 cu. yds. fine bank gravel on Bridle Path, Ocean Parkway, bet. Prospect Park and Coney Island; also 4,000 cu. yds. (double screened) Hudson River road gravel to parks and parkways, Boro. Brooklyn.

Oyster Bay, L. I., N. Y.—The Nassau County Bd. Superv. is reported to have awarded the contract for grading West Shore Rd., Oyster Bay harbor, to Zebulon Wilson, of Oyster Bay, at $6,775.

Buffalo, N. Y.—Separate bids will be received until Sept. 20 by the Dept. Pub. Wks. (F. G. Ward, Comr.) for paving and repaving portions of 5 streets.

Kings Mountain, N. C.—See "Power Plants, Gas and Electricity."

Durham, N. C.—Bids will be received until Oct. 1 by the Bd. of Co. Comrs., at Durham, for building about 11½ miles of macadam road. Approximate quantitites: 60,000 sq. yds. 6-in. macadam; 75,000 cu. yds. excav., together with the necessary pipe and reinforced concrete drains.

Ottawa, O.—It is stated that bids will be received until Sept. 21 by the Bd. Co. Comrs., for constructing 7 stone roads. J. T. Maidlow, Co. Surv. and Engr.

Silverton, O.—It is stated that bids will be received until Sept. 21 by A. A. Sprague, Clk. Bd. Pub. Service, for constructing cement sidewalks, grading, etc., on several streets; also same time and place for $7,600 street improvement bonds.

Lorain, O.—An ordinance is stated to have been passed authorizing the issue of $24,000 bonds for paving Vine St.

New Philadelphia, O.—The following are the bids received Sept. 3 for paving S. Bway.: E. A. Frishwater & Sons, Chester, W. Va., $16,113; J. Meinhart & Sons, Massillon, O., $16,454; Baldwin Bros & Graham Columbus, $17,420; Sheets & Lyons, Newcomerstown, O., $15,509; Vogt & Sons, Massillon, O., $15,512; Hensel & Springer, city, $14,988; Adam Schwab, city, $13,834.

Reading, O.—It is stated that Jos. R. Vedder, Village Clk., will receive bids until Sept. 19 for $8,200 Vine St. improvement bonds.

Akron, O.—See "Sewerage and Sewage Disposal."

Celina, O.—It is stated that bids will be received until Sept. 21 by T. A. Weis, Co. Aud., for $22,000 pike bonds.

Ashland, Ore.—All bids received Aug. 26 for macadamizing 16,800 sq. yds. have been rejected. The city will probably do the work or by private contract. M. F. Eggleston, City Recorder.

Scranton, Pa.—The Common Council is stated to have passed an ordinance providing for the grading, curbing and paving of a portion of Green Ridge St.

Uniontown, Pa.—Bids will be received until Sept. 18 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 7,070 ft. road, 16 ft. wide, in Dunbar Township; also 4,095 ft. road, 16 ft. wide, in Vanderbilt Borough, both in Fayette Co.

* *Erie, Pa.*—The contract for paving with asphalt a portion of French St. is reported to have been awarded to John McCormick & Son, 645 W. 10th St., at $1.64 per sq. yd.

Bids for paving a portion of German St. is reported to have opened as follows: Mayer Bros., 1213 State St., asphalt, $1.75, brick $1.90; J. McCormick & Son, asphalt, $1.80, brick $1.95 (price given per sq. yd).

* *Allentown, Pa.*—The City Council is reported to have awarded the contract for paving portions of 3d and Court Sts. to the Barber Asphalt Paving Co. at $2.09 and $2.07 per sq. yd., respectively.

Parnassus, Pa.—Bids will be received until Sept. 17 by F. R. Alter, Boro. Secy., for grading and paving a portion of 3d Ave. and McCutcheon St. F. R. Carson, Boro. Engr., 4th Ave., New Kensington.

Smethport, Pa.—The Reemard & Higgins Co. are stated to have bid $51,536 for 22,056 sq. yds. brick pavement on concrete base or $47,786 on stone base.

Philadelphia, Pa.—Bids will be received until Sept. 18 at the office of W. Hunter, Ch. Engr. Phila. & Reading Ry. Co., 520 Reading Terminal, for grading, draining and paving for temporary freight yard, at 19th and Indiana Sts., as per contract No. 27.

Reading, Pa.—The City Council is reported to have decided to expend $30,000 for improving 5th St.

*The contract for paving a portion of Chestnut St. with brick is reported to have been awarded to Fehr & O'Rourke at $3,757.

Lancaster, Pa.—J. E. Kendig, 301 E. Frederick St., is reported to have secured contracts for macadamizing portions of Franklin St. and Park Ave., at $4,046 and $2,380, respectively.

* *Providence, R. I.*—Contracts for constructing sections of state highways, covering a distance of nearly 30 miles, are stated to have been awarded by the State Bd. of Pub. Roads on Sept. 4, as follows: Coventry, 31,680 ft., John Bristow, $23,409; Gloucester, 10,560 ft., A. W. Steere, $7,814; Gloucester and Burrillville, 5,280 ft., A. W. W. Steere, $3,970; Jamestown, 5,280 ft., Alton Head, $4,784; Lincoln, 3,000 ft., T. J. Quinn, $2,528; Little Compton, 5,280 ft., Lane Constr. Co., $5,407: Narragansett, 7,920 ft., John Bristow, $10,397; Tiverton, 2,640 ft., L. H. Callan, $2,192; Warwick, 15,840 ft., Daniel A. Watson, $2 per cu. yd.

Woonsocket, R. I.—The Common Council is stated to have passed a resolution providing for an appropriation of $6,000 for paving with wood block Court St. Bridge.

**Johnson City, Tenn.*—The contract for paving on portions of Main, Market, Roan and other streets, in all about 48,000 sq. yds., bids for which were received Sept. 5, has been awarded to the Barber Asphalt Paving Co., at $2.14½ per sq. yd., for bituminous macadam on 6-in. slag foundation; total, $102,060. Bids were also received from the Southern Bitulithic Co., the Southern Paving & Constr. Co., and the Hassom Paving Co.

*S. H. Pouder has secured the contract for 22,000 sq. ft. concrete sidewalk and 4,600 lin. ft. concrete curbing, at a total of $5,397. L. N. Wilson, City Engr.

**Greeneville, Tenn.*—Killion, Turner & Co., of Jasper, are stated to have secured the contract for improving highways of Greene County, for $50,000.

Houston, Tex.—Bridge and paving work is contemplated here to the extent of $500,000. About 75 miles of rock, gravel and shell paving will be laid. John B. Ashe, Co. Aud.; Geo. A. Horton, Co. Engr.

Marshall, Tex.—John W. Maxcy, of Houston, has been engaged as consulting engineer for street paving and sidewalk construction. The cost of the work to be done will be about $200,000, which has been voted in bonds by the city.

Dallas, Tex.—Bids will be received until Sept. 20 by J. B. Winslett, City Secy., for paving Ross Ave. and Main St. with either bitulithic, sheet, natural rock or Indian Territory rock asphalt, vitrified brick, or other material, limestone curb, limestone gutter, combined concrete curb and gutter, brick gutters, etc.

**Seattle, Wash.*—We are informed that contracts for paving have been awarded as follows: To the Sparger Concrete Co., Lowman Bldg., for constructing concrete sidewalks on Olympia Way, for $3,864; A. L. Walters, concrete sidewalks on Kilbourne St., for $5,094; Kalberg & Co., grading, etc., on 13th Ave. S., at the following bid: Fixed estimate, $2,400; 97,000 cu. yds. earthwork, $43,650; 15 acres clearing and grubbing, $2,250; 182 M ft. B. M. curbs and gutters, $4,732; 7 catch-basins, 2 inlets, $560; 14 catch-basins, 1 inlet, $980; 1 single inlet, $12; 40 lin. ft. sewer pipe, 8-in., $56; 1,700 lin. ft. box drains, $850; total, $55,490; to H. F. Jahn & Co., regrading E. Denny Way, at $11,581; to H. F. Kahn & Co., concrete sidewalks on 3d Ave. W., at $11,857.

The following are the bids opened by the Bd. Pub. Wks. on Aug. 31 for planking Railroad Ave.: Sparger Concrete Co., 562 Lowman Bldg., $36,001; O. Lindland & Co., 3802 Densmore Ave., $34,872; Rydstrom & Goerig, 1802 16th Ave., $35,465. Hans Pederson, 501 Fairview Ave., $38,72●.

*We are informed that the contract to pave in the alley in Block 17, has been awarded to the Sparger Concrete Co., 562 Colman Blk., at $2,513, and the contract to pave alley in Block 22, to the Barber Asphalt Paving Co., 619 Bailey Bldg., at $2,636.

**Neenah, Wis.*—Geo. H. Stanchfield is stated to have secured the contract for macadamizing Wisconsin Ave., at $8,465.

Fond du Lac, Wis.—The Barber Asphalt Paving Co. is reported to have submitted the lowest bid for paving E. 1st, 2d, W. 2d, 3d and Sheboygan Sts., at $88,642.

Janesville, Wis.—No award was made Sept. 6 for paving Lincoln School, City Hall Alley and E. Milwaukee St. C. V. Kerch, City Engr.

Racine, Wis.—It is stated that the City Clk. will receive bids until Sept. 21 for improving sundry streets.

Milwaukee, Wis.—Local press reports state that bids will be received until Sept. 17 by the Bd. Pub. Wks. for paving with bitulithic 12th St. and Teutonia Ave., in all about 23,000 sq. yds.; probable cost, $50,000.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Citronelle, Ala.—The Citronelle Light & Power Co. is reported incorporated by J. A. Shannon, S. E. Shannon and H. H. Ore with a capital of $25,000. The incorporators have been granted the right to make and sell electric power and current and also to manufacture ice.

Radnor, Ala.—The Alberta Portland Cement Co. of Calgary has applied to the City Council for concessions for the development of electric power at Radnor.

Dothan, Ala.—A. J. Smith, who is interested in the building of an electric power plant at Dothan, writes that about $150,000 will be expended. No engineer has been selected as yet, and organization of a company is not yet complete. The plant is to be constructed about 17 miles from Dothan and run by water.

**San Francisco, Cal.*—The Bd. of Superv. on Aug. 26, it is stated, awarded the contract for furnishing light to the municipality to the San Francisco Gas & Electric Co. The appropriation is $275,000.

Stockton, Cal.—The Stockton Gas & Electric Co. is reported incorporated by A. H. Winn, Paul McDonald, and others.

Turlock, Cal.—The Turlock Electric & Water Co. recently incorporated by C. H. Weed, is about to commence work of constructing the electric light plant. Capital $50,000.

Montzuma, Colo.—It is reported that the Montezuma Power & Light Co. has been incorporated, with a capital of $50,000, by Geo. L. Nye, B. B. Morrison and R. W. Wagner.

Glenwood Springs, Colo.—The Central Colorado Power Co. is reported to be planning the construction of a tunnel 12 miles long, to be dug at the Shoshone plant at Glenwood Springs, to generate 10,000 h.p. It is reported that sites for additional power plants are being considered by the company, and it is said to be the intention to develop its plants sufficient during the next 2 years to be in a position to sell power to railroads for operating purposes.

**Norwich, Conn.*—The New England Eng. Co., 123 Court St., New Haven, is reported to have secured from the General Electric Co., of Schenectady, N. Y., the contract for the installing of a high-tension transmission line, 22,000 volts, from Scotland station on the Shetucket River to the present municipal plant at Norwich. The object of the line is said to be to supply power from the dynamos located at the dam now being constructed at Scotland Station to the municipal station at Norwich.

Washington, D. C.—See "Miscellaneous."

Jacksonville, Fla.—The following are the bids opened Sept. 4 by the Bond Trus. for furnishing 200 new street arc lights and other electrical appliances: The Westinghouse Electric & Manufacturing Co., of Pittsburg, Pa., lights, etc., as per specifications, for $9,900; General Electric Co., of Schenectady, N. Y., $8,755.

Jacksonville, Ill.—Bids will be reveived until Sept. 17 for furnishing to the city the following: a 200-kw. generator and engine, 200 arc lamps, 4 transformers and arc regulators. Specifications are on file at the office of Chas. W. Brown, Engr. in Charge, Rm. 12, Scott Blk.

Seymour, Ind.—Bids will be received until about Nov. 1 for furnishing the city and inhabitants artificial gas for light and fuel; also electric light for street lighting, electric light for private parties and electric power for parties who desire it. For further information address Fred. Everback, City Clk.

Clay City, Ind.—A franchise and contract for lighting the city has been given to B. M. Guirl, of Clay City. J. H. Bence, City Clk.

Chickasha, Ind. Ter.—The City Council is reported to have granted a franchise to the Chickasha Water Power Co. for a period of 25 years. The franchise carries with it a contract with the city to furnish 50 street lights at the rate of $5.25 per lamp per month. A dam is to be constructed by the company across Washita River about 3 miles from the city and turbine wheels installed. About $50,000 is to be subscribed at first to start the work.

Leavenworth, Kan.—The Council Aug. 28 passed on its revised form the franchise for the Leavenworth Light & Heating Co.

Covington, Ky.—The agreement made with the Union Light, Heat & Power Co. by the Com. on Light of the City Council for a 5-year contract to furnish arc lights at $55 per lamp per year, it is reported has not been approved.

Ellsworth, Me.—It is reported that the Elssworth Power Supply Co. has been incorporated, with a capital of $450,000, for the purpose of generating electricity for manufacturing purposes. Henry M. Hall, of Ellsworth, is Pres. of the company.

The Monterey Hydro Electric Power Co. is reported organized at Ellsworth, for the purpose of owning, operating and dealing in water, lights and power for various purposes. Capital $5,000,000. Proosy Langely, Pres. N. T. Whiting, of Ellsworth, Treas.

Baltimore, Md.—Bids were opened by the Municipal Bd. of Awards Sept. 4 for the city's new street gas and naptha lamp contracts. The Consolidated Gas, Electric Light & Power Co. offered to supply the gas at $7.25 per lamp per annum, based on a consumption of 10,000 cu. ft. of gas per lamp ea. year, with a charge of 72½ cts. per 1,000 ft. for all excess consumption. The company also offered to supply gas for the lighting of the municipal buildings at 85 cts. per 1,000 cu. ft. The bidders for the contract for equipping, maintaining and lighting and extinguishing the gas lamps were as follows: Moses Newton, $8.97½ per lamp per annum if given the contract for 5 years, or 1 year contract, $10.31 per lamp per annum; 2 years, $10; 3 years, $9.24. The American Street Lighting Co. (bids being on 1 year, 2 years, 3 years or 5 years, respectively), $10.85 per lamp per annum, $10.85, $10.65 and $10.65. The Welsbach Co., $12, $11.75, $11.50, and $11. The American Street Lighting Co. and Moses Newton offered to take full charge of the lamps and furnish the gas at the following rates, 1, 2, 3 and 5 years, respectively: The American Co., $22.85 per lamp per annum, $22.85, $22.50, and $22.50. Moses Newton, $23.30, $23, $22.24, and $21.97½.

Berlin, Md.—The Mayor and City Council are in a position to grant a franchise and receive propositions to furnish water and electric lights for the town of Berlin. Bids will be received until Sept. 20, as advertised in The Engineering Record.

In connection with the franchise to be offered for sale by this city on Sept. 20, as advertised in The Engineering Record, the town is to have the option of purchasing the plant at the end of 5, 10, 15 or 20 years at a price that a committee may fix. An ice plant could be operated in connection with the power plant to good advantage. The population of the town is 1,500.

New Bedford, Mass.—Bids will be received until Sept. 16 by the Street Light Com. (Jos. Chaussn, Chmn.), for lighting the streets, for a period of 1 year, and not

Fall River, Mass.—The Aldermen are stated to have adopted the report of the Com. on Street Lights, recommending that the Mayor be authorized to enter into a contract with the Fall River Electric Light Co. for lighting the streets for a period of 5 years. The contract proposed provides for the new Magnetite lamp at 25 cts. per light per night.

Muskegon, Mich.—The Grand Rapids-Muskegon Power Co. (Geo. E. Erwin, Secy.), it is stated, intends building within the next few years 4 more power dams between the Rogers dam and Newaygo, making 6 dams in all, which will develop a total of 60,000 h.-p.

Escanaba, Mich.—F. E. Hatch, of Pellston, is reported interested in a company which proposes to harness Boney Falls on Escanaba River in Delta County. Mr. Hatch, it is stated, has applied to the Bd. of Pub. Wks. of Escanaba to furnish power for the operation of the municipal lighting plant.

Aurora, Minn.—The Council is reported to be considering the installing of an electric lighting system.

Oxford, Miss.—The power plant of the Univ. of Mississippi, which also supplied electricity to light the town, is reported to have been destroyed by fire Aug. 30. It is stated that it will be rebuilt at once. The city is stated to be contemplating the building of a municipal plant in connection with the water works.

Meadville, Mo.—There is reported to be a project on foot here for an electric light plant. Address J. H. Dunn, Meadville.

Jefferson City, Mo.—See "Public Buildings."

Springfield Mo.—The promoters to whom the city recently granted a franchise have decided to incorporate with a capital of $50,000. No name has yet been decided upon for the company, but A. J. Eisemayer is Acting Chmn.

St. Louis, Mo.—Bids will be received until Sept. 20 by the Bd. Pub. Improv. (Aud. J. O'Reilly, Pres.) for

**Items marked thus give the names of parties awarded contracts.*

furnishing and installing the following in Quarantine Hospital: 2 engines, 2 generators, switchboard, etc.; steam heating system, together with certain steam fixtures and appliances; boilers, boiler furnaces, smoke connections, chimney, etc.

Fremont, Neb.—It is stated that the plans for the municipal light and water station have been submitted to the City Council. The cost will be, according to reports, about $20,000.

Beatrice, Neb.—The City Light & Gas Co. is reported incorporated by R. C. Barney, Allen Brownhall and Mark A. Noble, and, it is stated, will make extensive improvements in the gas plant in this city which they have purchased.

Jersey City, N. J.—The Bath Electric Service Co. is reported incorporated with a capital of $100,000, to operate electric and gas plants. Office, 76 Montgomery St., Jersey City. Incorporators: Luther H. Leber, Arthur A. Lazier and others.

Morristown, N. J.—R. V. Stryker, Treas. and Gen. Mgr. Marris A. Somerset Electric Co., 131 South St., writes that all contracts have been let in connection with the improvements contemplated, at a cost of $200,000.

**Linwood, N. J.*—The Boro. Council is reported to have voted to install electric lights.

New York, N.Y.—Bids will be received until Sept. 23 by C. B. J. Snyder, Supt. School Bldgs., New York City, for installing electric equipment in the following schools: Addition to and alterations in School 96, Boro. Manhattan; addition to School 140, Boro. Brooklyn; new School 89, Elmhurst, Boro. Queens; School 28, Richmond, Boro. Richmond.

Albany, N. Y.—See "Water."

Schaghticoke, N. Y.—The Schaghticoke Electric Co., which is now constructing an electric power plant on the Hoosick River in Schaghticoke has filed, according to reports, in the County Clerk's office, an amended certificate of incorporation extending the field of its operations to Schenectady and Montgomery Counties as well as Rensselaer, Saratoga and Albany Counties. Geo. E. Greene, Pres., and H. R. Leyden, Secy.

Seneca, N. C.—The Council is reported to be considering the establishing of an electric light plant.

Kings Mountain, N. C.—Bids will be received until Oct. 3 by F. L. Carpenter, Town Clk., for $50,000 water, light and street improvement bonds.

**Grand Forks, N. D.*—The contract for a 700-ft. tunnel for gas and other mains, it is stated, has been awarded by the Bd. of Regents of the North Dakota Univ. to Lykken, Robinson & Wardrope, of Leeds, at about $4,500.

Cleveland, O.—The Cleveland Electric Illuminating Co., it is reported, intends building a generating plant on the Lake Shore, and is considering the building of a tunnel into the lake to supply the plant with water. It is stated that plans for the plant are to be prepared by C. W. Schultz, Ch. Engr. of the Water Dept.

It is stated that 125 additional arc lights for street purposes will be attached to the street lighting service immediately. Chas. Kibble, Supt. of Lighting.

It is reported that the School Bd. will equip the Milford School with an electric plant.

Texhoma, Okla.—The Texhoma Electric Light, Water & Ice Co. is reported incorporated by W. A. Turner and others.

Hallett, Okla.—The Hallett Pipe Line Htg. & Lighting Co., of Fayetteville, Ark. (A. F. Wolf, Pres., Fayettebille, and Alva Duncan, of Parsons, Kan., Ch. Engr.), desires to purchase about 42,000 ft. of 4-in. casing for gas plant, 28,000 ft. of 2-in. pipe, and 3,000 ft. 6-in. pipe, with other supplies necessary to install a low-pressure gas plant.

Granite, Okla.—It is stated that Granite Electric Co. has been incorporated, with a capital of $10,00, by K. C. Knox, H. J. Hayes and others.

Dayton, Ore.—The City Council is reported to be investigating the securing of a water motor and dynamo with a view to establishing an electric light plant for Dayton.

Prineville, Ore.—It is reported that the Prineville Light & Power Co. will next year install a power plant on the Matoles to supply the whole county with electricity.

Waterford, Pa.—The Waterford Electric Light Co. is about to be incorporated by Bertram E. Waltz, Allyne C. Hovey and Chas. Himrod to supply light, heat and power in the boro. of Waterford.

Markes, Pa.—The Conooheagre Electric Light, Heat & Power Co. is reported incorporated, with a capital of $30,000, by E. B. Duel, Seth Lehmaster, of Markes, and others.

Reading, Pa.—The Bd. of Park Comrs. is reported to be contemplating the installing of electric cables in conduits in the City Park and to have lamps suspended from ornamental iron poles.

Charleston, S. C.—Bids will be received at the office of Ion Simons, City Electrician, until Nov. 15 for lighting the streets and public buildings of the city for a term of 1, 2 or 4 years from June 30, 1908, with electricity, gas or some other illuminating power equivalent thereto, or partly by one and partly by another.

Memphis, Tenn.—The constructing of a municipal lighting plant is reported under consideration.

Waco, Tex.—It is stated that Texas anad Eastern capitalists have subscribed toward the establishment of an electric power plant in Milam County, about 60 miles south of Waco. The City Council has granted a franchise to the company for poles, wires and all privileges needed in equipping an electric light service for this city. It is also proposed to supply light to Houston, aand power for an interurban electric railway which is to be operated all over central Texas. Jos. J. Henry is reported to be managing the enterprise.

Ferris, Tex.—It is reported that the Ferris Light & Power Co. has been incorporated, with a capital of $4,000, by W. W. Batchelor, C. A. Weatherford and others.

Calvert, Tex.—Jas. J. Henry, of Denver, it is stated, is promoting a project to build a power plant at this place to furnish electricity for light and power to surrounding towns.

Houston, Tex.—E. C. Lamb is reported to be organizing a company with a capital of $50,000 to build a plant for the manufacture of electric dry kilns.

Pittsford, Vt.—Surveyors are reported to be in the vicinity of Furnace Brook, Pittsford, for the Vermont Marble Co., which proposes to harness the power of this stream and build a power station on the site east of Pittsford Mills. The plan is to use steel tubing between the reservoir and the power house.

Montpelier, Vt.—The City Council, it is stated, has granted a franchise to F. M. V. Corry, E. H. Deavitt and E. M. Frost to erect poles and string wires in the streets of Montpelier for their power plant, which it is proposed erecting near Kinney's mills.

Spokane, Wash.—Reports state that the Big Bend Water Power Co. (E. P. Spaulding, Vice-Pres. and Gen. Mgr.) expects to start work soon at its power site, 28 miles down the Spokane River. The cost of the plant, including duplicate transmission lines to Spokane and to the Coeur d'Alenes, will be about $2,000,000. All lines will be put underground in the fire district. The dam to be constructed on the Spokane River will be 480 ft. in length and 100 ft. high, 130 ft. wide at the bottom and nearly 30 ft. wide at the top. The power house will be in the middle, and over the present channel of the river. It will be 184x66 ft., with walls 38 ft. high and 18 in. thick. The power house will be built entirely of steel and reinforced concrete, while the dam will contain 50,000 cu. yds. of masonry, which will cost, approximately, $400,000. On either side of the power house will be wasteways, one 152 ft. wire, the other 174 ft. wide. About 35,000 cu. yds. of rock will have to be moved in cutting a channel for the wasteways. Seven steel conduits, each 10 ft. in diameter will lead through the dam body-wall to 7 pairs of turbines, each of which will weigh 90 tons. Besides planning to dispose of light and power in Spokane and at the various mines of the Coeur d'Alene district, a 132-mile power line to Murray is being planned. R. C. Lowry, of Seattle, is Engr. for the company, and I. E. Ross, also of Seattle, is Electrical Engr. J. S. McKenna is local Consulting Engineer.

The officials of the Chicago, Milwaukee & St. Paul R. R. (D. J. Whittemore, Ch. Engr., Chicago, Ill.) are reported to be contemplating the developing of electric power by harnessing the St. Joe River. It is reported that the electric energy will probably be used to substitute electricity for steam power to carry freight across the Bitter Root divide.

Seattle, Wash.—The Seattle-Tacoma Power Co., it is stated, has been given until 1913 to put wires under ground.

Elkins, W. Va.—The County Court (Lee Crouch, Clk.) will receive bids until Sept. 23 for the electric and gas fixtures for the court house now being erected.

Prairie du Sac, Wis.—A dam is to be constructed across Wisconsin River at Pound's Landing to cost about $1,500,000. Address Magnus Swenson, Madison.

**Superior, Wis.*—It is stated that the building of a municipal lighting plant has been abandoned for the present and a contract entered into with the Superior Water, Light & Power Co. for another year.

Antigo, Wis.—Henry Sherry, of Neenah, Wis., it is reported, proposes developing water power on Wolf River.

Muscoda, Wis.—L. M. Dixon, Village Clk., writes that a light plant and power was purchased by the city, and an election held Aug. 24 resulted in favor of issuing bonds for improvements. The dam was damaged by the flood and will be repaired; contract soon to be let.

Minnedosa, Man.—It is stated that water for the proposed power plant to be constructed here will be obtained from Clear Creek 30 miles north and a dam constructed there. Address E. O. Denison, Minnedosa, Man.

Kingston, Ont.—The Northumberland & Durham Power Co., of Durham, is reported to be considering the question of transmitting power to Kingston. The point of development will be Healy Falls.

Millbrook, Ont.—J. Davidson, of Millbrook, is stated to have purchased the electric lighting plant and has a contract to light the town.

Hamilton, Ont.—The Hydro Electric Power Comn., of Toronto, is reported to have sent out a surveying party to locate the transmission line from Hamilton, to Guelph, Berlin, St. Mary's and Stratford.

Ottawa, Ont.—The Municipal Electric Comn. has made a recommendation to the City Council that it be authorized to make the following offer to Gilmour & Hughson, the owners of the Chelsea Power, that one half of the bed of Gatineau River at the fall of Chelsea, with the right to take water enough from the river to develop 25,000 h.-p. be purchased by the city for the sum of 200,000 and that in addition the city agrees to build within 10 years a dam across the entire river capable of establishing an 80 ft. head at the water power.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

San Francisco, Cal.—Surveys are reported completed and rights of way acquired for the Napa, Lakeport & Richardson Bay R. R. Richard Hotaling, Pres.

Oakland, Cal.—A. W. Maltby, of Martinez, is reported to have secured a contract to construct an electric dailway from Airtisch to Oakland.

Denver, Col.—Surveys for the Interurban Constr. Co.'s electric line from Denver to Greeley will be started immediately, according to reports. Rights of way and franchise in Denver, Adams and Weld Counties have been secured by the company.

Sacramento, Cal.—It is reported announced that the Northern Electric Ry. Co. will construct an electric railway to Woodland via Colusa Willows, Arbuckle and Winters. The company secured permission from the War Dept. to build a bridge over Sacramento River at M. St. in connection with the Vallejo & Northern Ry. Co.

Quincy, Ill.—The City Council is reported to have adopted an ordinance granting a franchise to St. Louis, Terre Haute & Quincy Traction Co.

Boston, Mass.—The following are reported to be the bids received Sept. 5 by the Boston Transit Comn. at Boston, for entrances and exits at Summer St. for Washington St. Tunnel: Coughlan & Shields Co., $17,711.50, time 3 months; Chas. R. Gow Co., $14,518.50, Dec. 10, 1907; Patrick McGovern, $14,106, Nov. 15, 1907; John E. Palmer, $13,958, Dec. 1, 1907.

Athol, Mass.—It is stated that the Athol & Orange St. Ry. Co. (W. D. Smith, Gen. Mgr.), is planning to build a 154-ft. addition to its car house.

New Bedford, Mass.—The Union St. Ry. Co. (E. E. Potter, Gen. Mgr.), is reported to have announced the erection of an addition of 300 ft. x 350 ft. to its car sheds.

Lowell, Mass.—The Boston & Northern St. Ry. (David Bruce, of Lawrence, Div. Supt.), it is reported, is about to contract for the constructing of a single track electric railway from Lowell to Lawrence, via West Andover, a distance of about 9 miles.

Excelsior Springs, Mo.—The St. Joseph, Excelsior Springs & Lexington Ry. Co. is reported incorporated with a capital of $200,000. The company proposes to build and operate a standard guage electric railroad from Excelsior Springs to Hibbard, Mo., about 10 miles distant. A bridge will be built across the Missouri River at Lexington. G. P. Lingenfetter, of Denver; C. D. Wade, of Excelsior Springs; Chas. Dyer, of Denver; W. J. Bates, of Hibbard; A. M. Bates, S. S. McIntire, of Excelsior Springs, and D. C. Finley, of Kansas City, are said to be interested.

Bath, N. Y.—The Bath Electric Service is reported incorporated to construct an electric railway in Bath. Capital, $100,000. Luther H. Leber, Frederick M. Dayton, of Buffalo, and Arthur A. Lozier, are the incorporators.

Elmira, N. Y.—Summers, McDonald & Winters are stated to have secured the contract for grading electric railway from Hornell to Dansville.

Asheville, N. C.—It is stated that the Asheville Rapid Transit Co. will soon place contracts for constructing 2½ miles of track in Asheville.

Zanesville, O.—It is reported that steps are being taken by the Ohio Electric Ry. Co. for the extension of the line from Zanesville to Pittsburg.

Salem, Ore.—A. Welch, of Portland, is reported to have petitioned the City Council for a franchise over several streets of the city from the northern to the southern limits with outlet to the Willamette River for an entirely new electric railway system. The purpose is to construct the initial line to Albany, and extension is contemplated to Portland on the north and Eugene on the south. Lateral branches are planned for Turner and Mehama.

Marietta, Pa.—It is reported that the Conestoga Traction Co. (H. W. Crawford, Ch. Engr.), has decided to extend the Columbia & Donegal line from Marietta to Elizabethtown, running from Marietta to Maytown, Rowenna and Bainbridge by the way of Billmyer and on to Elizabethtown.

Kittanning, Pa.—It is reported that the Kittanning & Leechburg Rys. Co. (T. A. Moesta, Gen. Mgr.), expects to build a 90-ft. iron span bridge; also 3 miles of track.

Du Bois, Pa.—The United Traction St. R. R. Co. is reported organized with Austin Blakeslee, Pres., and M. I. McCreight, Secy. The electric railway system will be extended to Big Run.

Mercer, Pa.—It is stated that within a short time work on the construction of a new electric line between Mercer and Greenville will begin, according to present plans of the promoters, and a charter has been granted the Mercer Constr. Co. with a capital of $25,000. Incorporators: T. P. Filer, L. W. Orr and J. M. Campbell, of Mercer; Sylvester D. Downs, of Greenville, and W. Hilderbrand, of Pittsburg. It is also proposed to extend the line from Greenville to Sharpsville.

Philadelphia, Pa.—Articles of incorporation are stated to have been filed for the American Suspension Railway Co., of Philadelphia, the objects of which are to acquire improved railway traction or rapid transit lines. Incorporators: D. M. Prantz, W. H. Tigerman, Geo. W. Schriner, Frank O. Butler, and others, of Philadelphia. Capital, $5,000,000.

Harrisburg, Pa.—It is stated that M. S. Hershey contemplates constructing an electric railway to Ephrata.

Yankton, S. D.—The City Council is reported to have granted a franchise to Yankton & Southern R. R. Co. to construct a single track along 1st St. and Broadway.

Everett, Wash.—J. T. McChesney, of the Everett Improvement Co., and associates, it is stated, will soon begin construction of an electric line between Snohomish and Fall City, a distance of 35 miles. Surveys have been practically completed for the new line. The road will pass through Cherry Valley.

Wheeling, W. Va.—The Interurban Railway Co., of Wheeling, W. Va., is reported chartered to build an electric railway from Wheeling to Bethany. Capital, $10,000.

Morgantown, W. Va.—The Sahraton St. Ry. Co. (Geo. C. Sturgess, Pres.) is reported to have in contemplation the construction of an electric railway from Fairmont to Connellsville, Pa.

RAILROADS.

Notes Arranged Alphabetically by States.

Enterprise, Ala.—The building of a railroad between St. Andrews Bay via Shipley, Fla., to Enterprise and thence to Birmingham, is reported under consideration. G. W. Carlisle, of Enterprise, may be able to give further information.

Sulphur Springs, Colo.—A corps of engineers in charge of W. C. Hildebrand, Ch. Engr. of the Denver & Trans-

*Items marked thus give the names of parties awarded contracts.

continental Ry Co., is reported to be making a survey for the railroad which it is proposed constructing between Sulphur Springs and Minturn. The distance between the 2 points is stated to be about 32 miles.

Evanston, Ill.—It is stated that the officials of the Chicago & Northwestern and the Chicago, Milwaukee & St. Paul railroads have decided to postpone indefinitely, probably until after the next presidential election, the work of elevating their tracks in Evanston.

Topeka, Kan.—A charter was granted the Independence North & South R. R., with a capital of $10,000. Incorporators: C. S. Leeds, Kansas City, Kan.; F. C. Daniels, Kansas City, Mo.; H. F. Guthrie and others, of Topeka. The road is intended to run from the east line of Wyandotte County southeast through Wyandotte, Douglas, Johnson, Allen, Bourbon, Wilsan, Neesho, Chautauqua, Montgomery and Labette Counties.

Cottonport, La.—There is reported to be a plan on foot by R. J. D'Arquin to run a railroad from here to Plaucheville.

Kansas City, Mo.—The Kansas City, Mexico & Orient Ry. Co., of Texas (C. H. Webster, Ch. Engr., Sweetwater, Tex.), it is reported, is about to issue $850,000 bonds with which it is proposed constructing the road across several gaps, aggregating about 200 miles.

Jamaica, L. I., N. Y.—The Pennsylvania R. R. (Alex. C. Shand, Ch. Engr., Philadelphia, Pa.), according to reports, will spend $3,000,00 for a brick, stone and concrete railroad station at Jamaica. The preliminary plans, with the network of tracks, subways and other facilities for traffic, are now in the hands of the railroad officials for consideration. There will be 18 tracks.

Columbus, O.—Representatives of the different steam and electric railroads involved in the expense of the abolishment of the grade crossings on the West and South sides have conferred with the director of public service and the city engineer and practically agreed on plans and specifications for the rock work as drawn by the City Engineer.

Cincinnati, O.—The Department of Track Elevation and Subways is stated to have plans for the elevating of tracks at Eastern Ave., to cost the city about $300,000; Hopple St. viaduct over the B. & O. tracks, $270,000; and crossing over the Norfolk & Western R. R. from the city limits to Duck Creek, $250,000.

Philadelphia, Pa.—The Philadelphia & Reading Ry. Co. is stated to have asked bids to be submitted to Wm. Hunter, Ch. Engr., Reading Terminal, Philadelphia, by Sept. 18, for grading, draining and paving a temporary freight yard at 17th and 19th Sts. and Indian Ave. The capacity is to be 2,000 cars, ten set of double tracks to be installed, the driveways between the tracks to be paved with Belgian block.

It is stated that bids for the first section of track elevation for the Philadelphia & Reading Ry. (Wm. Hunter, Ch. Engr., Philadelphia) will be asked within the next 5 weeks. The first section to be undertaken lies between Berks St. and the intersection of Broad and Cumberland Sts., a distance of about 9 squares. Contractors will be asked to bid for the construction of the retaining walls, bridges and trestles for the temporary tracks.

Panama.—It is reported that the charts received by the Isthmian Canal Comn. at Washington, D. C., for the relocation of the Panama Railroad indicate that it is proposed to practically construct a new railroad.

Wenatchee, Wash.—It is stated that the Priest Rapids Ry. Co. intends building a railroad from Wenatchee via Chelan and other towns in that section, to some point on the Northern Pacific R. R.

Cheney, Wash.—The North Coast Ry. Co. is said to be considering the building of its road through Cheney, provided a satisfactory offer is made to the company by the citizens.

Pasco, Wash.—The Northern & Southern Ry. Co., it is reported, contemplates the construction of a railroad between Waterville, Douglas County, to Pasco.

Belington, W. Va.—Ralph Overholt, of Pittsburg, Pa., and Benj. F. Overholt, of Scottdale, Pa., are reported interested in the Fairmont & Southern Ry. Co., which proposes constructing a railroad between Belington, W. Va., and Pittsburg, Pa., a distance of about 225 miles.

**Field, B. C.*—It is reported that the Grand Trunk Ry. Co. has entered into a contract with Macdonell & Gzowski, of Vancouver, to lower the grade of the main line near Field, which includes about 1½ miles of tunnels, on each side of the Kicking Horse Pass. The work will take about 2 years, and, it is stated, will cost about $1,000,000.

Hamilton, Ont.—It is stated that surveys are being made and it is hoped to begin construction in the spring on the Hamilton, Waterloo & Guelph Ry., which is to be constructed via Dundurn and Harvey Parks into the city.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Whipple Barracks, Ariz.—Bids will be received until Oct. 12 by Capt. Chas. C. Walcutt, Jr., Acting Quartermaster, Prescott, for construction plumbing, hot water heating and electric wiring hospital at Whipple Barracks, as advertised in The Engineering Record.

Takoma, Washington, D. C.—All bids received Aug. 23, by Maj. J. T. Crabbs, Quartermaster, Walter Reed Army General Hospital, for the general construction, including plumbing, gas piping, electric lighting of double set of hospital corps sergeants' quarters at above hospital, have been rejected, and new bids will be received Sept. 23.

Washington, D. C.—Plans are stated to have been approved for the erection of a building for the Bureau of American Republics to be erected at 17th and C Sts., N. W.

Coeur d'Alene, Idaho.—The citizens are stated to have voted to issue $40,000 bonds for the erection of a city hall.

Chicago, Ill.—The Lincoln Park Comrs. are stated to have decided to build a 2-story field house in the park in the block bounded by Orleans, Sedgwick, Hill and Elm Sts. The park is 218x349 ft. The field house will be 260x50 ft. It will contain an assembly hall, two gymnasiums, one for women and the other for men, and a branch of the Public Library. The building will cost, including equipment, $60,000.

Bids will be received until Sept. 18 at the office of Perkins & Hamilton, Archts., 1218 Hartford Bldg., for erecting and equipping an addition to the Public Comfort Station in Lincoln Park. Bids to be submitted separately on hot water, heating, plumbing and electric wiring. Perkins & Hamilton, Archts., 140 Dearborn St.

Chicago, Ill.—Bids will be received until Sept. 19 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and installing a heating system in the Bathhouse at W. 12th Pl. and Union St.

Washington, Ind.—It is stated that the Co. Comrs. will soon ask for bids for remodeling the court house, at an estimated cost of $17,000.

Evanston, Ind.—Harry Hake is reported to be preparing plans for a 2-story brick engine house to be erected at Clarion and Montgomery Aves., at a cost of $15,000.

Burlington, Ia.—H. I. Gaddard, Archt., is stated to have completed plans and will soon receive bids for erecting a 3-story brick building for the Burlington Hospital, to cost $50,000.

Des Moines, Ia.—The City Council is stated to have directed the Bd. Pub. Wks. to have plans prepared for the erection o. the city hall.

**Harper, Kan.*—Mathein & Walker, of St. Joseph, Mo., are reported to have secured the contract for erecting the court house at a cost of $57,932.

New Bedford, Mass.—It is reported that plans will be ready sometime in Oct. for remodelling the city hall into a library. Nat. C. Smith, archt, 97 William St.; Chas. S. Ashley, Mayor.

Lansing, Mich.—Bids will be received until Sept. 16 for alterations to be made to the city hall.

Natchez, Miss.—Bids will be received until Sept. 17 by the Bd. Trus. (M. M. Ullman, Secy.) Natchez Hospital, for installing heating plant in said hospital.

Mt. Vernon, Mo.—Bids will be received until Sept. 20 by the Bd. Mgrs. Mo. State Sanitorium (Dr. J. L. Eaton, Pres.), for erecting the Medical building at the above institution.

St. Louis, Mo.—See "Power Plants, Gas and Electricity."

**Jefferson City, Mo.*—The Warden and Bd. of Prison Inspectors of the Missouri State Penitentiary, we are informed, awarded the contracts as follows for the ventilating, heating, and lighting plant for the Penitentiary: Boiler house building, to John Short; steam boilers, to Heine Safety Boiler Co., St. Louis; steam engines, to St. Louis Iron & Machine Wks., St. Louis; dynamos, to Western Electric Co., Kansas City; motors, to Westinghouse Electric & Mfg. Co., St. Louis; conduit & cable work, F. E. Newberry & Co., St. Louis; pipe work, steam heating and ventilating, Peters-Eichler Heating Co.

Omaha, Neb.—Plans are stated to have been completed for the erection of the Clarkson Hospital, at an estimated cost of $75,000.

Paterson, N. J.—Bids will be received until Sept. 20 by Ralph Baer, Chmn. Com. on Indoor Relief for furnishing material and installing new steam heating apparatus in the City Almshouse, also a new boiler house for said almshouse. Wm. T. Fanning, Archt., 609 Colt Bldg.

West Haverstraw, N. Y.—Bids will be received until Sept. 30 by the Rt. Rev. H. C. Potter, Pres. of the Bd. of Mgrs., at West Haverstraw, for constructing, heating, plumbing and electric work of an open air pavilion at N. Y. State Hospital for Care of Crippled and Deformed Children at West Haverstraw. Only a bid for the entire work will be considered. G. L. Heins, State Archt., Albany, N. Y.

Ft. Slocum, N. Y.—Bids will be received until Oct. 7 by the Constructing Quarter Master at Ft. Slocum for construction, plumbing, steam heating and electric wiring of the following buildings: 2 double barracks, 1 recruit examination barrack, a quarter master's storehouse, a double set quarters for non-commissioned staff officers, a wagon shed, additions and alterations to mess hall kitchen and a band stand, as advertised in The Engineering Record.

Devils Lake, N. D.—The erection of an addition to Mercy Hospital is reported contemplated at a cost of about $30,000.

**Bakersville, N. C.*—Jos. Bowditch, Chmn. Bd. Co. Comrs., writes that the contract to erect the court house (bids opened Aug. 15) has been awarded to Fall City Constr. Co., Louisville, Ky., at $19,917.

Springfield, O.—Bids will be received until Oct. 16 by Jas. Knox Taylor, Superv. Archt., Washington, D. C., for the construction, complete, of the extension to the U. S. Post Office at Springfield.

Hamilton, O.—J. F. Bender & Bros. are figuring on the general contract for the 2-story, 75x180 ft. Post Office, probable cost, $100,000, and desire sub-bids on granite work, steam heating and ventilating, plumbing, electric wiring, etc.

**Guthrie, Okla.*—The contract for repairing and improving the buildings and grounds of the Ft. Supply Military Reservation for the Insane of the Territory of Oklahoma, is reported to have been awarded to W. O. Campbell, of Oklahoma City, for $23,800.

Washington, Pa.—The East Washington Borough Council is reported to have decided to erect a borough hall, at a cost of $15,000.

Norristown, Pa.—Bids will be received until Sept. 19 by the Bldg. Com. Bd. Trus., State Hospital for Insane, for furnishing material and erecting 4 connecting corridors. Bids to be submitted on the following: Lumber; mill work; stretcher brick; cement; slag roofing; metal work; laying brick, etc. For further information address John L. West, Steward, State Hospital for Insane, Norristown.

Cresson, Pa.—The erection of an insane hospital for Cambria County near Cresson is reported contemplated, at a cost of $350,000.

Pittsburg, Pa.—Bids will be received until Sept. 27 at the office of F. P. Booth, Co. Compt., for erecting the Co. Soldiers' Memorial Building. Total cost, $1,250,000. Palmer & Hornbostel, Archts., New York, N. Y.

Houston, Tex.—Plans and specifications will be received until Nov. 5 by Geo. F. Horton, Co. Engr., Houston, for a $500,000 fireproof court house, as advertised in The Engineering Record.

Seattle, Wash.—Plans are stated to have been completed for 3 exposition buildings to be erected for the Alaska-Yukon Exposition. These buildings are the auditorium, the fine arts building and the machinery hall. All are to be modern in architecture and substantial in construction and used for a university after close of exposition.

**Madison, Wis.*—The State Bd. Control on Sept. 5 awarded the contract for erecting 3 dormitories at the State Home for Feeble Minded, to Otto Neitge, of Mankato, Minn., for $96,600.

Montreal, Que.—The following are reported to be the bids opened for erecting the Montreal Jail: J. B. Pauze & Co., $790,000; Martineau & Prenoveau, $799,395; the Laurin Constr. Co., $873,955, and C. E. Deakin, $893,000.

BUSINESS BUILDINGS.

Notes Arranged Alphabetically by States.

Brewton, Ala.—The Masonic Lodge is reported to have decided to erect a building, at a cost of $20,000.

** Prescott, Ariz.*—O. M. Stevenson, of San Bernardino, Cal., is reported to have secured the contract for erecting the Masonic Temple in Prescott, at $38,042.

**Ft. Smith, Ark.*—The following are the bids received Aug. 28 for erecting a 6-story reinforced concrete hotel: W. F. May & Co., Ft. Smith, $155,000; H. M. Fielding & Co., Guthrie, Okla., $203,000; T. W. Hackett, St. Louis, Mo., $199,895; Urban Constr. Co., Kansas City, Mo., $188,606; Hugh McLennan, Chicago, Ill., $188,000; Manhattan Constr. Co., New York, N. Y., $187,500 (awarded contract); Jefferson Constr. Co., New Orleans, La., $179,949; J. N. Ewen Constr. Co., Chicago, Ill., $217,000.

San Francisco, Cal.—The Cliff House is reported destroyed by fire. John Tait, Prop.

Oakland, Cal.—A permit is stated to have been issued to the Lyon Storage & Moving Co. for the erection of a 6-story concrete storage warehouse on 29th and Grove Sts., at a cost of $30,000.

Chicago, Ill.—It is reported that Mandel Bros. will build a storage house and stable for its West Side delivery at 1148 to 1152 W. Van Buren St. It will be 2 stories, 89x106 ft., and will be constructed of pressed brick and stone, cost, $30,000.

Thos. M. Seeds, Jr., is stated to have been granted a permit to build a 6-story brick addition, 42x62 feet, to the building of the Art Club, at Broad and Chancellor Sts.; cost, $80,000. Newman & Harris, Archts.

The southwest corner of Grand Boule. and 39th St., 100x150 ft., is to be improved with an apartment building and stores, according to reports, to cost $75,000. The work will be under the direction of the owner, W. R. Martin, 289 35th St.

It is stated that plans are being prepared for an 8-story mercantile building to be erected at 120 and 122 Franklin St. by Wm. W. P. Adams. The new structure will be 54x61 ft. It will be of mill construction, the front being of pressed brick and terra cotta. The structure will cost $75,000.

Des Moines, Ia.—It is stated that G. H. and E. G. Ragsdale will erect a 6-story building at 312 Court Ave. The structure will be 44x133 ft., and cost about $40,000.

W. O. Coffee is reported to have decided to erect a 3-story building at 10th and Walnut Sts., at a cost of about $30,000.

Topeka, Kan.—It is stated that the Topeka & Southwestern Ry. Co. (V. R. Parkhurst, Ch. Engr.) will erect a depot here, at a cost of $20,000.

Paducah, Ky.—The Red Men are stated to have directed plans to be prepared for a $50,000 business and society building to be erected here.

Louisville, Ky.—The Courier Journal Bldg. at 4th and Green Sts. is reported destroyed by fire.

Media, Pa.—The Concordville Hotel is reported destroyed by fire. Scott Kauffman, proprietor.

*Danville, Va.—The contract for erecting the Y. M. C. A. Bldg. is stated to have been awarded to Dietrick & Pearson, of Danville. The structure to cost about $20,000.

Tacoma, Wash.—G. W. Bullard, Archt., Provident Bldg., writes that they will not be ready for bids for erecting the Y. M. C. A. Bldg. until about Oct. 1, or later.

*Belington, W. Va.—The Enterprise Constr. Co., of Elkens, is reported to have secured the contract for erecting a Union Depot in Belington, at a cost of $20,000.

CHURCHES AND DWELLINGS.

Notes Arranged Alphabetically by States.

Montgomery, Ala.—It is reported that the Highland Ave. Baptist Society will erect an edifice, at a cost of $15,000.

*Monticello, Ark.—Wilson & Hendrix, of Pine Bluff, are stated to have secured the contract for erecting an edifice for the Congregation of Associate Reformed Presbyterian Church at Monticello, for $75,000.

New Haven, Conn.—Allen & Williams are reported to be preparing plans for a $75,000 edifice to be erected here. D. A. Blackeslee, Chmn. Bldg. Com.

Rockford, Ill.—Plans are being prepared, according to reports for the erection of an edifice for the Swedish Baptist Society, at an estimated cost of $20,000.

Chicago, Ill.—It is stated that Henry Veeder will build a handsome residence at Greenwood Ave. and 49th St. It will be two stories and cost $20,000.

H. H. Richards, it is stated, will construct a 3-story flat building at 4727 Michigan Boule. It will front 30x110 ft. and cost $30,000.

A. L. Stone has decided to erect an apartment house at 3316 to 3318 Wabash Ave., to cost $25,000, according to reports. It will be 3 stories, 40x57 ft.

Vincennes, Ind.—It is stated that bids will be received until Sept. 30 by W. C. Johnson, Chmn. Bldg. Com., for erecting a rubble stone edifice for the First Baptist Congregation. Campbell & Osterhage, Archts., Vincennes.

Ft. Wayne, Ind.—It is stated that the Trus. of the Simpson M. E. Church (Rev. L. N. Edwards, Pastor) will soon ask for bids for the erection of an edifice, estimated cost, $35,000.

Des Moines, Ia.—J. M. McNamara is stated to have purchased a site at 15th and High Sts. for the erection of an apartment house, to cost about $40,000.

*Ames, Ia.—John R. Gier, of Conrad, is reported to have secured the contract for erecting an edifice for the congregation of the Methodist Episcopal Church, at $34,594.

Wichita, Kan.—H. Conrow is reported to be preparing plans for an edifice for the College Hill Congregation, to cost $40,000. A. C. Kelly, Chmn. Bldg. Com.

Cambridge, Mass.—The Cantahigo Apartment House is reported destroyed by fire.

Duluth, Minn.—Henry Folz is stated to have secured a permit to erect an apartment at 2d and 3d Sts., at a cost of $15,000.

Kansas City, Mo.—It is stated that the Grace Presbyterian Society is arranging to erect a $30,000 edifice here. C. A. Smith, Archt.

Sedalia, Mo.—The congregation of St. Patrick's Church is stated to have decided to erect an edifice at 4th St. and Washington Ave., at a cost of $20,000.

New York, N. Y.—Plans have been filed for the erection of the following buildings: 6-story brick and stone tenement at Delancey and Mott Sts., for Susswein & Hermann, cost $40,000, Jacob H. Amsler, Archt.; 6-story brick and stone tenement at 13th St. and Ave. C, for Jos. Wolkenberg, cost $75,000, Geo. F. Pelham, Archt.; 4-story brick and stone dwell. at 127 E. 64th St., for E. W. Turnbull, cost $30,000, Pickering & Walker, Archts.; 6-story brick and stone tenement at 116th St. and 1st Ave., for Lordi, Pernetti & De Respiris, cost $75,000, L. F. J. Weiher, Archt.; 6-story brick and stone tenement at 93d St. and West End Ave., for Allenal Constr. Co., cost $100,000, Rouse & Sloan, Archts.; 6-story brick and stone apartment house at St. Nicholas Neville & Bagge, Archts.

Plans have been filed for the erection of the following buildings: Three-story brick and stone tenements at 322 3d Ave., for Wm. Bradley, cost $120,000, Radcliffe & Kelley Archts.; 12-story brick and stone apartment house at 116th St. and Bway., for Paterno Bros., cost $225,000, Schwartz & Gross, Archts.; 5-story brick and stone tenement at 126th St. and 5th Ave., for I. Block, cost $35,000, Shampan & Shampan, Archts., alterations to 5-story brick and stone dwelling at 825 5th Ave., for Clifford V. Brokaw, cost $25,000, Little & O'Connor, Archts.

Plans have been filed for the erection of a 4-story extension to 4-story brick and stone dwelling at 41 E. 38th St., for Mrs. Chas. T. Cook, cost $25,000, Henry O. Chapman, Archt.

*Coxsackie, N. Y.—The Peter Keeler Constr. Co., of Albany, is reported to have secured the contract for erecting the Second Reformed Church on Washington Ave., at a cost of $20,000. Alex. Sellkirk, of Albany, Archt.

Guthrie, Okla.—It is stated that the First Methodist Society will erect an edifice, at a cost of $40,000.

Spokane, Wash.—O. M. Lilliquist is reported to be arranging to erect 2 flats at Lincoln St. and 10th Ave., at a cost of $30,000.

SCHOOLS.

Notes Arranged Alphabetically by States.

Montevallo, Ala.—Bids will be received until Oct. 18 by the Bldg. Co., for the plumbing, electric wiring and steam heating in the new addition to the dormitory at the Girls' Industrial School. Wm. Ernest Spink, Archt., 812 Title Guarantee Bldg., Birmingham.

San Diego, Cal.—It is stated that bids will be received until Oct. 14 by the Bd. Educ. (L. W. Belding, Secy.), for erecting a 16-room school of either reinforced concrete or of brick on University Ave. Bids to be submitted separately on ventilating and heating, plumbing and electrical work. Henry L. Gay, archt., 56 Keating Blk.

Los Angeles, Cal.—The School Board is stated to have decided to erect a building in the Garvanza Dist., at a cost of $30,000.

Washington, D. C.—Bids will be received by the Dept. of the Interior (G. M. Woodruff, Acting Secy.) until Sept. 17, 1907, for installing heating apparatus in the medical building of Howard University, cor. 5th and W Sts., N. W., Washington D. C. Plans and specifications may be seen, the building inspected, and all information obtained from Dr. Herbert S. Scurlock, 531 Florida Ave., N. W., or Dr. William C. McNeill at the building.

Iowa City, Ia.—Bids will be received until Sept. 16 by the Bldg. Com. Bd. Regents, State Univ., for erecting a fireproof addition to the Engineering Building. Proudfoot & Bird, Archts., 625 Flynn Block, Des Moines.

Newton, Ia.—Contracts for heating and plumbing the high school are reported to have been awarded to J. T. Carmody, of Cedar Rapids, at $19,710, and Johnson-Rowe-Daly Co., of Omaha, Neb., at $4,658, respectively.

*Negaunee, Mich.—L. E. Chausee, of Negaunee, is reported to have secured the contract for erecting the high school here, for $89,590.

*Republic, Mich.—The contract for erecting the high school (bids opened Aug. 26) is stated to have been awarded to A. P. Wilson, of Marquette, for about $50,000.

Saginaw, Mich.—C. L. Cowles, of Saginaw, is preparing plans for a $30,000 school to be erected for Saginaw.

*Duluth, Minn.—Dan Egan, of Ashland, is stated to have secured the contract for erecting the Sacred Heart School at $42,000.

Fairbrault, Minn.—It is stated that bids will be received until Sept. 17 by the State Bd. Control, St. Paul, for erecting a boys' dormitory building at the State School for the Blind, Fairbault. Clarence H. Johnston, archt., 712 Manhattan Bldg., St. Paul.

Moorhead, Minn.—Plans are stated to have been completed and bids will soon be received for erecting the Normal School here, at a cost of about $50,000.

*East Orange, N. J.—E. M. Waldron & Co., of Newark, is stated to have secured the contract for erecting the Lincoln Public School in the 4th Ward, for $82,262.

New York, N. Y.—Plans have been filed for the erection of a brick school at Hudson and Grove Sts. for City of New York, at a cost of $25,000, C. B. J. Snyder, Archt., 500 Park Ave.; also a 5-story brick and stone extension to 4-story brick school at 130th St. and Madison Ave., at a cost of $40,000, for congregation All Saints Roman Catholic Church, Neville & Bagge, Archts., 217 W. 125th St.

Bids will be received until Sept. 23 by C. B. J. Snyder, Supt. School Bldgs., New York City, for installing ventilating and heating apparatus for New School 91, Boro. Manhattan; general construction, etc., of a grand stand to be placed on the Athletic Field at Munson and Orchard Sts., Astoria, Boro. of Queens; also until Sept. 23 (readvertisement) for completing the abandoned contract for the ventilating and heating apparatus for additions to and alterations in School 109, and in new School 151, both in Boro. Brooklyn.

Jamestown, N. Y.—School bonds amounting to $105,000 are reported sold.

Elizabeth City, N. C.—Bids will be received until Oct. 1 by the Bd. Educ. (J. B. Leigh, Chmn.) for $20,000 graded school bonds.

Sheraden, Pa.—Press reports state that bids will be received until Sept. 18 by the Directors of the School Dist., for $30,000 school bonds.

Harrisburg, Pa.—The following bids are reported opened Sept. 3 by the Building Com. of the School Bd. for erecting the Vernon St. School: W. S. Roebuck, $30,850; Augustus Wildman, $42,300; Eeard & Co., Reading, $43,666; W. O. Weaver & Son, $46,597; Stapf & Benfer, $46,889; Kuhn & Fetrow, $47,500; John Myers, $48,560; D. S. Sollenberger, $50,000; and P. W. Flinn, Altoona, $51,413.

Marion, Va.—The Directors of Judson College are stated to have secured plans for erecting college building, estimated to cost $30,000.

Delavan, Wis.—Bids will be received until Sept. 18 by the State Bd. Control (Allan D. Conover, Pres.), Madison, for erecting an industrial building, a stable and cow barn at the Wisconsin School for the Deaf, Delavan. Howland Russel, Archt., Milwaukee.

*Beloit, Wis.—E. C. Helm, Clk. School Bd., writes that the contract to erect a high school (bids opened Sept. 3) has been awarded to J. P. Culle Co., of Janesville, at $92,525, not including heating, plumbing or wiring.

St. Anne de Bellevue, Que.—The barns of the Agricultural College here are reported destroyed by fire. Wm. MacDonald is reported interested.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Ft. Morgan, Ala.—See "Water."

Birmingham, Ala.—Reports state that a certificate of incorporation has been filed by the Emery Steel Co., capital, $15,000. The company proposes to manufacture engines, machinery, castings, and erect power plants and all classes of work in connection with machinery. Incorporators: J. A. Emery, R. C. Foster and J. H. Pritchard. The principal place of business will be in Birmingham.

Denver, Colo.—The Diamond Match Co., whose main office is in Chicago, Ill., is reported to be contemplating the erection of a sawmill in Grand County and the establishment of a factory at some point along Moffat Road, near Denver.

Boulder, Colo.—The Crucible Steel Co., of Pittsburg, Pa., is stated to have bought an extensive tract of land near Boulder, and will erect a plant for refining tungsten, a rare mineral which is used in the manufacture of certain kinds of steel. Alex. Thomas, Secretary of the company, is reported to have announced that work on the plant would be begun at once.

Bainbridge, Ga.—It is reported that the Georgia, Florida & Alabama R. R. shops, burned here a few weeks ago, will be rebuilt. Work will begin for the erection of machine and repair shops at once, which will cost in the neighborhood of $250,000.

Chicago, Ill.—The Raymond Lead Co., it is reported, will construct a plant for the manufacture of lead on Lexington St. between Washtenaw Ave. and the Chicago & Northwestern and Panhandle railroads. The buildings include a power house and sheet lead mill, 125 x 175 ft.; storage building, 139 x 18 ft., and a structure for the office and lead presses, 113 x 224 ft. The buildings will be of a combination of fireproof steel construction and mill construction. The cost is estimated at $200,000. It is stated that construction will be commenced just as soon as the plans are completed and contracts let.

*Chicago, Ill.—It is reported that a contract has been awarded to the Vilter Mfg. Co. by the Illinois Steel Co. for a refrigerating plant for its South Chicago plant. The refrigerating machine will have a capacity equal to the melting of 1,100 tons of ice per day. This refrigeration will be used to dry the air for the blast furnaces. The equipment will include 4 cross compound condensing Corliss engines, each engine driving two double-acting ammonia compressors. The steam cylinders will be 24 in. and 46x36-in. stroke, and the ammonia compressors 18x36 in. There also will be furnished 100 coils of double pipe ammonia condensor and 80 coils of double pipe brine cooler and the necessary oil traps and other machinery. The plant will cost $115,000.

Marshalltown, Ia.—The Interstate Brewing Co. is reported to have authorized Bernard Barthel, of Chicago, Ill., to draw plans for a brewery to cost about $200,000.

*Lehigh, Ia.—It is stated that Johnson & Nelson, of Red Wing, Minn., have received the contract for the sewer pipe and tile factory.

Forest City, Ia.—J. H. Northup, of Fort Dodge, according to report, will put in a cement tile factory here.

Adel, Ia.—Straight Bros., it is stated, plan to establish a $125,000 tile factory here.

Detroit, Mich.—The American Electrical Heater Co., 121 State St., is stated to be having plans prepared for a $50,000 factory which they propose erecting at Cass Ave. and Vienna St.

High Bridge, N. J.—It is stated that bids are being received for a plant to be erected here for the Taylor Iron & Steel Co. The buildings included in the plant will be a 1-story brick fetling shop, 100x114 ft.; a 1-story brick machine shop, 168x72 ft., and a 1-story brick dry sand molding shop, 365x24 ft. The plans were drawn by Frank C. Roberts & Co.

Ft. Caswell, N. C.—See "Water."

Portsmouth, O.—The Norfolk & Western R. R. is reported to have purchased 75 acres of land adjoining its present shops at East Portsmouth, O., upon which it will erect new shop buildings, tripling the capacity of its shops at that point.

Cincinnati, O.—The increasing demand for Powell steam engineering specialties makes an enlargement of the plant of the Wm. Powell Co. a necessity. Plans are being prepared to erect buildings on ground 37x200 ft. recently acquired by them and to increase their power plant by 200 horse-power.

A plant, with equipment to cost about $75,000, is to be erected in Idlewild, according to reports, by the Ault & Wiborg Co., of New St., manufacturers of printing ink, who will use the suburban plant for the manufacture of varnishes. Plans have been completed by Harry Hake, who will supervise the erection of the structure. The

Items marked thus give the names of parties awarded contracts.

buildings are to be of brick, the largest building L-shaped, and the wings will be 32x88 ft. and 42x108 ft. In this structure will be located the offices, laboratory, tankroom and shipping department. The filler and thinning department will be 54x45 ft., the melting room 64x29 ft., and the stockroom 42x32 ft.

It is reported that the Buckeye Brewing Co. will make improvements on its grounds adjoining its plant, in McMicken Ave., to cost about $200,000, and are having plans prepared by the Cincinnati Brewery & Engineering Co. Work on some of the buildings will be started this fall. A 6-story, concrete and fireproof building, 77x100 ft., will give added floor space to the brew department and will also contain the racking and washrooms and a storage cellar. A 4-story fireproof building, 30x70 ft., is to be erected for the storage of hops, and a cooperage shop, 2 stories, 40x70 ft., is also being designed.

Sandusky, O.—The Fremont Mitten & Glove Co. is reported to have decided to build a $100,000 plant here to employ 200 people.

**Phillipsdale, R. I.*—The American Electrical Wks. at Phillipsdale is to be enlarged, the E. K. Watson Co. having received the contract for the erection of 3 buildings and a 175-foot chimney. The new buildings will include a wire mill 164x71 ft. and 2 stories in height, an annealing mill 90x84 ft. and 1 story in height, and a large boiler house 150x50 ft. In conjunction with this a great brick smokestack will be erected which will be 173 ft. in height with a flue of 7½ ft. The wire mill is to be of standard mill construction with a steel truss roof so as to have a clear span, and the building will contain many wire doors in order to furnish an abundance of light. All the modern appliances will go into the construction, including up-to-date sanitary accommodations. The bid boiler house will have a steel truss roof supported on steel posts with a 12-in. curtain wall. The roofing on all the buildings will be of tar and gravel.

Houston, Tex.—See "Power Plants, Gas and Electricity."

Hamilton, Ont.—The E. C. Atkins Co., of Indianapolis, Ind., it is stated, had definitely decided to establish its Canadian branch in Hamilton. It has purchased the old Hoefner works, east of Sherman Ave., below Barton St., and nearly 20 acres of ground. The building will be thoroughly fitted up to meet the requirements of the new concern, and new buildings will also be erected, the total expenditure amounting to probably $150,000.

Adam Beck, of London, Chmn. of the Hydro-Electric Power Comn., is reported to be contemplating the construction of a lumber and box factory here.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Berkeley, Cal.—The City Clk. is reported to be receiving bids for constructing a garbage disposal plant.

**Newport, Ky.*—The Council is reported to have awarded to the Sewell & Pardington Co. the contract to dispose of the city garbage from Sept., 1907, to March, 1908, at $166.66 per month.

Baltimore, Md.—The following are reported to be the bids received recently by the Bd. of Awards for the purchase of the reduction plant of the Baltimore Sanitary Contr. Co. and for the removal of the plant outside the city limits, and also for reducing the city garbage. The garbage is to be gathered by the city and collected at central points and to be taken in scows to the reduction plant to be reduced by the successful bidder. (The price given is per year from 1 to 10 years, respectively): The Southern Product Co., $71,000, $74,000, $77,000, $80,000, $83,000, $86,000, $89,000, $92,000, $95,000 and $98,000; David Peoples, of Philadelphia, Pa., $80,000, $83,000, $86,000, $89,000, $92,000, $95,000, $98,000, 101,000, $104,000 and $107,000. The Southern Product Co. bid $100,000 for the reduction plant and the David Peoples Co. $50,000.

Butte, Mont.—The Judiciary Com. has reported to Council recommending that the City Clk. be directed to invite estimates and suggestions from companies manufacturing and building garbage incinerating plants to take care of at least 100 tons of garbage per day.

Newark, N. J.—Bids will be received until Sept. 26 by the Bd. of Street and Water Comrs. (Morris R. Sherrerd, Ch. Engr.), for the collection, removal and disposal of ashes, rubbish material, paper and garbage for a period of 5 years, beginning Jan. 1, 1908, as advertised in The Engineering Record.

Cincinnati, O.—The Bd. Pub. Service is said to be receiving bids for the erection of dumping and incinerating stations at Plum and 2d Sts., which are to cost $75,000. Saml. Hannaford & Sons, Hulbert Blk., are the archts.

Columbus, O.—The Pub. Service Bd. is stated to have voted in favor of the reduction system for garbage disposal and for the location of the plant on the farm occupied by the sewage disposal plant south of Columbus. Engr. John H. Gregory filed with the Bd. of Pub. Service on July 12 specifications for a garbage reduction plant of 100 tons capacity for 24 hours at an estimated cost of $150,000; also a furnace for incinerating rubbish in addition to the garbage reduction.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Riverton, Ala.—See "Paving and Roadmaking."

**Little Rock, Ark.*—We are informed that the contract to construct improvements in Pulaski County Drainage Dist. No. 1 (bids for which were received Sept. 7) has been awarded to the Crescent Contr. Co., of Peoria, Ill., at $86,021. The Nick, Peay Constr. Co. also bid on this work, at $92,000. The work consists of 7 miles open ditch requiring 143,000 cu. yds. of earth excav. One reinforced concrete conduit, 84 in. diameter, 2,635 ft. long. Lund & Hill, Engrs., Little Rock.

Ft. Winfield Scott, Cal.—Bids will be received until Sept. 28 by Capt. B. F. Cheatham, Constr. Q. M., U. S. A., Ft. Mason, for furnishing material and constructing a torpedo wharf at Ft. Winfield Scott.

Washington, D. C.—Bids will be received until Oct. 10 by Maj. Spencer Cosby, Corps. Engrs., U. S. A., Washington, D. C., for dredging earth and rock and constructing jetties in James River, Va., as advertised in The Engineering Record.

Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Sept. 17, to furnish at the navy yards and naval stations the following supplies: New York, N. Y., etc.: Sch. 270—Electrical supplies, cut-outs, fuse wire, incandescent lamps, switches, Portland and linoleum cement, lavatory fittings, electric drills, bench grinders, grommets, drills, brass and copper wire; wood, machine, and lag screws; hydraulic jacks, cedar, cherry, oak, yellow, Oregon, and sugar pine; spruce spars, rod and sheet brass, rolled bronze, sheet copper, yellow sheathing metal, pig and hoop iron, bar steel, steel shafting, sheet tin, slab zinc, sheet lead, etc.; copper tubing, brass and iron pipe fittings, gate and water-closet valves, water-closets, etc. Sch. 278—Rolled bronze, bar iron, plain and galvanized sheet steel, tool steel. Sch. 280—Steel conduit, Portland cement, etc. League Island, Pa.: Sch. 272—Sheet copper. Puget Sound, Wash.: Sch. 282—Lavatories. Sch. 284—Brass, copper, phosphor-bronze, and steel wire. Sch. 286—Sheet copper, brass pipe, etc. Mare Island, Cal.: Sch. 283—Steam pump, iron, steel, zinc plates. Sch. 286—Ash, bar steel, pig iron. Norfolk, Va.: Sch. 271—Channels, eye-bars, hoist engines. Sch. 277—Steel bolts and nuts, engine lathe, pipe fittings, turn-buckles, anvils, etc., forges, twist drills, etc. Sch. 278—Rolled bronze, rod and sheet copper, bar iron, plain and galvanized sheet steel, sheet lead, roofing tin. Washington, D. C.: Sch. 271—Ties. Sch. 274—Machine steel, steel forgings. Sch. 277—Milling cutters. Naval Academy, Annapolis, Md.: Sch. 273—Core-making machine, sterilizer, band-saw machine, jig saw, lathe, air compressor, sand-papering machine. Portsmouth, N. H.: Sch. 277—Metallic bushed sheaves. Applications for proposals should designate the schedule desired by number. E. E. Rogers, Paymaster Gen'l., U. S. N.

It is reported that the installing of pneumatic tubes between the government printing office and the Capitol is under construction by the government.

Jacksonville, Fla.—Bids will be received until Oct. 10 by Maj. Lansing H. Beach, Corps. Engrs., U. S. A., Jacksonville, for dredging and rock removal in Withlacoochee River Entrance, Fla., as advertised in The Engineering Record.

Bids will be receved until Oct. 9 by Maj. Lansing H. Beach, Corps. Engrs., U. S. A., Jacksonville, for dredging at Forrester's Point, St. John's River, Fla., as advertised in The Engineering Record.

**Joliet, Ill.*—Geo. H. Munroe, Chmn. Bd. Comrs. of Spring Creek Drainage Dist., writes that the contract to excavate 90,000 cu. yds. in channels for drainage (bids opened Sept. 3) has been awarded to Robt. Shannon, Joliet, and the contract for the concrete walls in connection with same to Blair & Gallagher, of Columbia City, Ind.

Cerro Gordo, Ill.—Bids will be received until Sept. 27 by the Drainage Comrs. of Union Drainage Dist. No. 3 of the towns of Cerro Gordo and Willow Branch, in Pratt County (J. C. Locher, Clk.), for constructing 11 miles of open ditch involving the removal of 210,410 cu. yds. of earth. W. J. Day, Engr., Bement. For further information address the Clerk.

Indianapolis, Ind.—Bids will be received until Sept. 20 by the Bd. Park Comrs. (Chas. E. Coffin, Chmn.) for furnishing material and repairing the apron to the Riverside Park dam.

Goshen, Ind.—The Co. Comrs., it is reported, have ordered plans and specifications prepared for the construction of a ditch in Union, Jackson and Clinton Townships.

Des Moines, Ia.—Surveys have been made for a ditch in the 6th Ward. Probable cost, $2,000.

**Mason City, Ia.*—It is stated that the contract to construct Sect. No. 1 and 2 of ditch No. 5 has been awarded to .. D. Arnett, at $1,878, and Crapser & Inman, at $4,422, respectively.

Boone, Ia.—It is reported that bids will be received until Sept. 19 by E. F. Jones, Co. Aud., for constructing County Drain No. 1, to consist of 4,034 ft., 28-in., 2,437 ft. 22-in., 1,800 ft. 20-in., 800 ft. 18-in., 1,500 ft. 16-in., and 1,100 ft. 12-in. tile.

Dakotah, Ia.—It is reported that bids will be received until Sept. 20 by John Cunningham, Co. Aud., for constructing a ditch in Dist. No. 5.

Ft. St. Phillips, La.—The followng are reported to be the bids received Aug. 30, at New Orleans, for constructing a sea wall at this port: Wellington Steel Piling Co., of New York, $94,010. Cullen, Friested & Co., of Chicago (3 bids), $99,955, $102,320 and $104,900. Richard M. Murphy, of New Orleans, $96,807 (awarded contract). W. T. Carey & Bro., New Orleans (2 bids), $99,300 and $99,850. The work contemplated is the enlargement of a portion of the back or gulf levee, the construction of a new levee and the reinforcement of the levee with a row of interlocking sheet piles, with a reinforced concrete capping.

New Orleans, La.—At a meeting of the Orleans Levee Bd. on Aug. 23 three sets of resolutions were adopted, to the effect that the board advertise for bids and prepare plans to cover $800,000; that all retaining walls be paid for by the property owners, and that owners on sites from Desire to Mazant Sts. be given 12 months from date in which to complete their rental contracts.

*Contracts for levee work (bids for which were received Aug. 27), it is reported, have been awarded by the Orleans Levee Bd. as follows: To Adam Ruppel, Third District work at the following bid: 41½ cts. per cu. yd. of earth where the earth is taken near the site, and where the earth is secured elsewhere, 94½ cts.; creosoted revetment, $70 per 1,000 ft.; lumber, $60 per 1,000; piling in the revetment wall, per lin. ft., 70 cts.; reinforced concrete wall, $9 per cu. yd. The total cost is estimated at $89,000; also the Fourth Dist. contract at following bid: earth, 97½ cts.; concrete gravel, $2.57 per cu. yd.; reinforced concrete, $9; per 1,000 ft. of lumber, $60; piling, 70 cts. lin. ft. The total cost estimated at $91,000. For 6th and 7th Dists (banquetting of the levee) to the General Contr. Co., at 43 cts. per cu. yd.; total estimated cost, $11,000.

The Orleans Levee Bd., it is stated, has ordered $100,000 worth of work in 5th Dist., but bids have not yet been asked.

*The State Bd. of Engrs. is reported to have on Aug. 27 awarded contracts as follows: Raccourci, in Pointe Coupee Parish, an enlargement of 50,000 cu. yds. to R. T. Clarke Co., at 23½ cts. per cu. yd.. rattling Slough Levee, in Caddo Parish, on Red River, a new levee, containing 100,000 cu. yds., to M. Hunt, at 22.4 cts. per cu. yd.; Dortch Bend Levee, on Red River, in Bossier Parish, containing 250,000 cu. yd. to W. G. Burt, at 24.4 cts. per cu. yd.

The New Orleans Dry Dock & Shipbuilding Co. is said to be planning the construction of a dry dock to cost about $60,000.

Portland, Me.—The following are the bids opened on Aug. 30 at the office of Maj. Geo. A. Zinn, Corps Engrs., U. S. A., for rock excav. in Cape Porpoise Harbor, Me., about 5,226 cu. yds: (*a*) price per cu. yd., (*b*) totals: Eastern Dredging Co., Boston, Mass., *a* $9.60, *b* $50,170 (time of completion, 360 days); Simon J. Donovan, Ea. Boston, Mass., *a* $11.25, *b* $58,792 (2 years); John J. Fitzpatrick, Plattsburg, N. Y., *a* $13.62, *b* $71,178 (Sept. 1, 1909); Johnston & Virden, Lewes, Del., *a* $11.65, *b* $60,883 (8 months).

**Medford, Mass.*—The following are the toltals of bids received Sept. 3 by the Metropolitan Park Comn. at Boston (Geo. R. Rablin, Engr.), for grading, surfacing and other work at Middlesex Fells Parkway extension, at Medford: Thos. F. Welch, West Roxbury, $62,022; Falvey & Kelley, Dorchester, $57,995; Bruno & Petitti, Boston, $55,571; Hugh Nawn Contr. Co., Roxbury, $52,661; John F. Gill Co., Somerville, $53,437; Coleman Bros., Boston, $49,127; Rowe & Perini Constr. Co., Melrose, $44,230 (awarded contract).

Boston, Mass.—We are informed that the following are the bids received Sept. 6 by the Bd. of Harbor and Land Comrs. (F. W. Hodgdon, Ch. Engr., Boston) for building dike at Herring River, Wellfleet: Bruno & Petitti, Boston, $31,500; Wm. L. Miller, Boston, $21,000; Thomas & Connor, Middleboro, $18,500; and Chas. G. Craib, Winthrop, $25,500. The work includes 11,900 cu. yds. sand fill, and 2,400 cu. yds. marsh mud and sod facing; 800 lin. ft. timber sheeting; 910 lin. ft. concrete ton in connection with core wall; 18,500 sq. ft. area of roadway to be surfaced; fence 1,850 lin. ft. long to be built, etc.

Saginaw, Mich.—Bids will be received until Sept. 23 by the Bd. of Park & Cemetery Comrs. for excavating Rust Lake channel, connecting same with Saginaw River, Wright Bayou and river front, and filling the Rust Park property complete. The approximate quantity to be excavated is about 600,000 cu. yds. David C. Bell, Clk. of Bd.

Lansing, Mich.—Bids will be received for constructing a 20x30-in. drain 1,300 ft. long. H. A. Collar, City Engr.

Mankato, Minn.—See "Sewerage and Sewage Disposal."

Ft. Snelling, Minn.—D. W. Moore and Thos. Keough, both of St. Paul, it is reported, submitted the same bid on Sept. 5 to Maj. Amos W. Kimball, of St. Paul, for constructing ditches at Ft. Snelling at $2,893.

Charleston, Miss.—Bids will be received by E. Bacon, Secy. Co. Drainage Comrs., at Charleston, until Sept. 30, for constructing a main ditch in Ascalmore Drainage Dist., to be about 4 miles long, 4 ft. deep and 20 ft. wide. estimated cost, $14,000.

Cold Spring, N. J.—Plans and specifications are on file at the office of The Engineering Record, 239 W. 39th St., for the construction of stone jetties at Cold Spring Inlet, N. J., bids for which are to ~~be received~~ until Oct. 3 by Maj. C. A. F. Flagler, Corps Engrs., U. S. A., Wilmington, Del., as advertised in The Engineering Record.

Camden, N. J.—See "Paving and Roadmaking."

Two Bridges, N. J.—It is stated that the deepening of the channel of the Passaic River, 25 ft. wide and 3 ft. deep on the left side of the river at Two Bridges, is contemplated. H. Brownlee, at Singac, may be able to give further information.

Governor's Island, N. Y. H., N. Y.—The following are the bids opened on Aug. 26 by Col. W. L. Marshall, Corps. Engrs., U. S. A., N. Y. City, for furnishing material and building an embankment at Governor's Island: (*a*) 485,000 cu. yds. (inner section) sand, stone, brick, earth, or any material which will make firm, solid land, which is not liable to wash away, decay, or give out offensive odors; (*b*) 830,000 cu. yds. same material, outer section; (*c*) 1,315,000 cu. yds., both sections: Henry Steers, Inc., 17 Battery Pl., N. Y. City, *a* 17 cts., *b* 22.6 cts., *c* 20.5 cts.. Morris & Cumings Dredging Co., 17 State St., N. Y. City, *c* 26 cts.; U. S. Dredging & Contr. Co., Jersey City, N. J., *a* 35 cts., *b* 33 cts., *c* 27.3 cts.; Chas. A. Brown, 129 Broad St., N. Y. City, *a*, *b* and *c* 25 cts.

Stapleton, S. I., N. Y.—Chas. H. Peckworth, submitted the only bid on Aug. 29 to Comr. of Docks, N. Y. City, for furnishing material and building structures and appurtenances, etc., on the pier at Canal St., Stapleton, Boro. of Richmond, and it was rejected Sept. 3.

Ellis Island, N. Y. H., N. Y.—Bids will be received by Robt. Watchorn, Comr. of Immigration, Ellis Island, N. Y. H., until Sept. 19, for the installation of wharf drop and apron bridge at landing of ferry steamer "Ellis Island," Barge Office, New York City.

Albany, N. Y.—It is stated that in about one month bids for 2 contracts on the barge canal for the division between Rochester and Lockport will be asked by the State Engineer, John P. Kelly, of Rochester, Div. Engr.

New York, N. Y.—Bids will be received until Sept. 23 by Col. John G. D. Knight, Corps Engrs., U. S. A., New York, for furnishing rubble stone and quarry spalls for constructing and repairing dikes in Hudson River, N. Y., as advertised in The Engineering Record.

**Cincinnati, O.*—The National Concrete Co. is stated to have secured the contract to construct a retaining wall at the Beargrass Creek cut-off, at $5,610.

Panama.—Bids will be received until Oct. 5 at the office of H. F. Hodges, General Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for furnishing the following: Steel racks for steam shovels, asbestos cement, wire, machine bolts, hydraulic jacks, vacuum gauges, etc., as advertised in The Engineering Record.

*The Isthmian Canal Comn. at Washington, D. C., it is reported, has announced that the contract to furnish 500 dump cars for use on the Isthmus, has been awarded

**Items marked thus give the names of parties awarded contracts.*

to the W. J. Oliver Mfg. Co., of Knoxville, Tenn., at $562,500.

Providence, R. I.—Bids opened Sept. 4 by Lieut. Col. J. H. Willard, Corps. Engrs., U. S. A., Newport, for dredging in Providence Harbor (680,000 cu. yds.), were as follows (price given per cu. yd.): Maritime Dredging Co., New York City, 12.5 cts.; Atlantic Dredging Co., New York City, 08.7 cts.; Columbia Dredging Co., New York City, 07.94 cts.; John A. Seeley, New York City, .14 cts.; P. Sanford Ross, Jersey City, 08.9 cts.; J. S. Packard Dredging Co., Providence, R. I., 07.3 cts.

Norfolk, Va.—The following are the bids opened Sept. 4 by Maj. Jos. E. Kuhn, Corps. Engrs., U. S. A., for dredging harbor at Norfolk, in all about 426,800 cu. yds.: (*a*), Sect. "A"; (*b*), Sect. "B"; (*c*), Sect. "C"; (*d*), Sect. "D" (price given being per cu. yd.): River & Harbor Improv. Co., Philadelphia, Pa., *a*, 14 cts.; *b*, $1.50; *c*, 13.8 cts.; *d*, 25 cts.; L. M. Lewis, Norfolk, Va., *a*, 10.8 cts.; *b*, $4; *c*, 11.5 cts.; *d*, 16.5 cts.; Coastwise Dredging Co., Norfolk, Va., *a*, 10.7 cts.; *b*, $4; *c*, 10.3 cts.; *d*, 18 cts.; Norfolk Dredging Co., Norfolk, Va., *a*, 9.4 cts.; *b*, $1.75; *c*, 10.4 cts.; *d*, 21.5 cts.

Irvington, Va.—The Government, it is stated, will this fall commence dredging the mouth of Carters' Creek, near the mouth of the Rappahannock River, so as to widen and deepen the channel through the bar just outside the mouth. The depth is to be made 15 ft. at low water and the width will not exceed 200 ft., except at the angles. The cut will be 2,000 ft. long. The estimated amount of dredging is about 28,000 cu. ft., at a cost of about $7,000. Urbanna Creek, 8 miles above, will also be dredged this winter, the channel through the shoal within the creek to be the depth of 10 ft. at low water and a width of 150 ft. except near the steamboat wharf, where it will be widened out to a maximum width not to exceed 400 ft. to form a turning basin; the length of the channel to be about 2,000 ft. Estimated amount of dredging to be 20,000 cu. ft. at a cost of $4,000.

Milwaukee, Wis.—City Engr. Poetsch is said to be agitating the question of widening the channel of the Milwaukee River between the Grand Ave. and Michigan Ave. Bridges.

Two Rivers Harbor, Wis.—The following are the bids opened Sept. 3 by Maj. W. V. Judson, Corps. Engrs., U. S. A., Milwaukee, for removing old pier, building pile pier, dredging, etc., at Two Rivers Harbor, Wis.: (*a*) Greiling Bros., Green Bay, Wis.; (*b*) August Rieboldt & Jos. Wolter, Sturgeon Bay, Wis.: Remov. 600 lin. ft. old pier, *a* $21, *b* $12; 12,600 lin. ft. round piles, *a* 35 cts., *b* 28 cts.; making 200 M ft. B. M. sheet piles of plank, furnished by U. S., and driving same, per M ft. B. M., *a* $20, *b* $12; framing 160 M ft. B. M. timber, furnished by U. S., per M ft. B. M., *a* $20, *b* $12; 12,000 lbs. wrought iron or steel drift bolts, *a* 6 cts., *b* 5 cts.; 41,250 lbs. wrought iron or steel screw bolts and tie-rods, *a* 6 cts., *b* 6 cts.; 4,000 lbs. wrought iron and wire spikes, *a* 6 cts., *b* 5 cts.; 7,000 tons of stone, per ton of 2,000 lbs., *a* $1.90, *b* $1.20; dredging 150,000 cu. yds., *a* 16 cts., *b* 11.5 cts.; total, *a* $64,945, *b* $43,680.

**Ottawa, Ont.*—It is reported that a contract for construction work on the Trent Valley Canal (Rice Lake Div., Sect. 5) has been awarded to Brown & Aylmer, at about $550,000; bids received Aug. 7.

CURRENT NEWS SUPPLEMENT

SEPTEMBER 21, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

American Society of Civil Engineers. Secretary, Charles Warren Hunt, 220 West 57th St., New York.

American Society of Mechanical Engineers. Secretary, Calvin W. Rice, 29 West 39th St., New York.

American Institute of Electrical Engineers. Secretary, Ralph W. Pope, 29 West 39th St., New York.

American Institute of Mining Engineers. Secretary, R. W. Raymond, 29 West 39th St., New York.

National Fire Protection Association. Secretary, W. H. Merrill, Jr., Chicago.

American Institute of Architects. Secretary, Glenn Brown, Washington, D. C.

Association of Engineering Societies. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

American Society of Heating and Ventilating Engineers. Secretary, W. M. Mackay, 113 Beekman St., New York.

Canadian Society of Civil Engineers. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

Society for the Promotion of Engineering Education. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

American Society for Testing Materials. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

American Society of Municipal Improvements. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y. Annual meeting, Detroit, Mich., Oct. 1-4, 1907.

Association of Railway Superintendents of Bridges and Buildings. Secretary, S. F. Patterson, Concord, N. H. Annual convention, Milwaukee, Wis., Oct. 15-17, 1907.

American Railway Engineering and Maintenance of Way Association. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

American Water Works Association. Secretary, J. M. Diven, Charleston, S. C.

American Street and Interurban Railway Association. Secretary, Bernard V. Swenson, 29 West 39th St., New York. Annual Convention, Atlantic City, N. J., Oct. 14-18.

American Foundrymen's Association. Secretary, Richard Moldenke, P. O. Box 432, New York.

Engine Builders' Association of the United States. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

American Public Works Association. Secretary, W. H. Flint, Chattanooga.

Association of American Portland Cement Manufacturers. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

National Association of Cement Users. President, Richard L. Humphrey, Harrison Building, Philadelphia.

American Society of Refrigerating Engineers. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

American Public Health Association. Secretary, Dr. C. O. Probst, Columbus, O. Annual meeting, Atlantic City, Sept. 30-Oct. 4, 1907.

SUGGESTED RULES FOR REINFORCED CONCRETE.

The Concrete Association of America recently submitted to the Building Code Revision Commission of New York City a proposed code of regulation. This was prepared by a special committee consisting of Messrs. H. C. Turner, E. O. Ellinger, F. G. Weber, A. Atkinson, W. N. Hazen, F. P. Kafka, R. L. Bertine and R. F. Tucker, and reads as follows:

1. Reinforced concrete construction shall be understood to mean an approved concrete mixture reinforced by steel of any shape, the two materials to be so combined that the concrete will take up the compression stresses and the steel the tension stresses and assist the concrete in shear and compression.

2. Reinforced concrete construction when designed in accordance with this code shall be approved for fireproof construction.

3. Before permission to erect any reinforced concrete structure shall be granted, complete drawings and specifications must be filed by the architect or engineer representing the owner with the Superintendent of Buildings, showing all construction details, including dimensions of concrete and the sizes and position of all reinforcing members.

4. The concrete shall be mixed in the proportions of not less than one part of cement by volume to seven parts of aggregates by volume, consisting of sand and broken stone or gravel. The proportions shall be such that the resistance of the concrete to crushing shall not be less than 2,000 lb. per square inch after hardening for 28 days. Tests to determine this value shall be made from time to time by a competent engineer under the direction of the Bureau of Buildings. The concrete used in reinforced concrete construction shall be what is usually known as a "wet" mixture.

5. All cement used in reinforced concrete construction shall be a Portland cement conforming to the standard specifications of the American Society for Testing Materials and shall be tested by an independent chemist not in the employ of the cement manufacturer. Records of these tests shall be kept on file in the contractor's office.

6. All sand used in reinforced concrete construction shall be clean and sharp, free from loam, dirt or other injurious material, and shall not be finer than the standard sample in the office of the Bureau of Buildings.

7. All stone used in reinforced concrete construction shall be clean, broken trap rock, or gravel, and shall not be of a size larger than can be easily worked or tamped around the reinforcing members. In case it should be desired to use any other material or kind of stone than specified above, samples of same shall first be submitted to and have the approval of the Superintendent of Buildings.

8. Steel for reinforced concrete construction shall have an elastic limit of at least 30,000 lb. per square inch, and an ultimate strength of at least 60,000 lb. per square inch, and shall be of uniform quality. Samples cut from any bar, shall be capable of bending cold 180 deg. around a bar of equal diameter without signs of fracture.

If twisted, corrugated, diamond or other mechanical bond bars are used, such bars may be stressed in tension to 16,000 lb. per square inch or to one-third of their elastic limit; in shear to 10,000 lb. per square inch, and in compression to twelve times the compression stress in concrete.

9. All steel reinforcement shall be completely incased in the concrete, and in beams, girders, columns and walls the steel shall not be nearer the surface than 1½ in. In floor and roof slabs the steel shall not be nearer the surface than ¾ in. for bars having a diameter of ½ in. or less. Where larger bars are used in floor or roof slabs, the steel shall not be nearer the surface than 1 in.

Where the number of bars used in a beam or girder cannot be placed in one plane they shall be placed in two or more planes.

In reinforced concrete footings the steel shall not be nearer the surface than 3 in.

10. Reinforced concrete shall be so designed that the stresses in the concrete and steel shall not exceed the following limits:

	Lb. per sq. in.
Extreme fibre stress on concrete in compression	600
Shearing stress in concrete	100
Concrete in direct compression	500
Tensile stress in steel	16,000
Shearing stress in steel	10,000

Compressive stress in steel 12 times the compressive stress in the concrete.

11. The adhesion of concrete to steel shall be assumed to be not greater than the shearing strength of the concrete.

12. The ratio of the moduli of elasticity of concrete and steel shall be taken as 1 to 12.

13. The following assumption shall guide in the determination of the bending moments due to the external forces. Beams and girders and floor slabs may be considered as continuous, where proper provision for continuity is made in the design. The bending moment for uniformly distributed loads being taken at not less than $WL/10$. In the case of square floor plates which are reinforced in both directions and supported on all sides the bending moment may be taken at $WL/20$.

In figuring T beams the width of the floor slab to be considered as part of the beam or girder shall be determined by the shearing resistance of the slab along the beam, but in no case shall the width of the floor slab so considered exceed the distance between beams and provided also that the beam or girder and slab shall be built at the same time as a unit.

14. The amount of resistance of reinforced concrete construction in transverse loads shall be determined by formula based on the following assumptions:

(a) The bond between the concrete and steel is sufficient to make the two materials act together as a homogeneous solid.

(b) The strain in any fibre is directly proportionate to the distance of that fibre from the neutral axis.

(c) The modulus of elasticity of the concrete remains constant within the limits of the working stresses fixed in these Regulations.

From these assumptions it follows that the stress in any fibre is directly proportionate to the distance of that fibre from the neutral axis.

The tensile strength of the concrete shall not be considered.

15. When the shearing stresses developed in any structural member of reinforced concrete construction shall exceed the safe working strength of the concrete, as fixed in these Regulations, a sufficient amount of steel shall be introduced in such positions that the deficiency in the resistance to shear shall be provided for.

16. When the safe limit of adhesion between the concrete and steel is exceeded, some provision must be made for transmitting stresses from the concrete to the steel.

17. Reinforced concrete may be used for columns and their strength determined as follows:

The concrete within the steel ties or hoops may be stressed in compression to 500 lb. per square inch. No allowance shall be made for the concrete outside of the hoops or ties and serving the purpose of fireproofing. Vertical steel bars may be placed in the concrete and if substantially tied together by steel bars at intervals of not more than the least side or diameter of the column may be stressed in compression to twelve times the compressive stress in the concrete. These rods shall be joined immediately above the floor line or at points of lateral support. They shall have full perfect bearings and be connected by tight fitting sleeves or the ends may be threaded and connected by standard sleeve nuts.

In concrete columns with vertical reinforcement the total cross section of vertical steel shall not be less than ½ of 1 per cent. of the cross section of the concrete within the hoops or ties, but in no case shall this amount be less than 1 square inch.

Concrete columns reinforced by spirally wound hoops of steel shall be designed in accordance with the following formula:

$P = [1.5\ fc + (3\ fs' \times As') \div r]\ Ac. + fs'\ As'.$

Where P = working load in pounds.

fc = 500 pounds.

fs' = 20,000 lb. for cold drawn wire.

fs = 6,000 lb. on vertical steel.

Ac = area concrete inside of hoops.

As = area of vertical steel.

As' = area of spirals per unit of column length.

r = radius of spirals in inches.

Minimum amount of spiral steel shall be such that $(fs' \times As') \div r$ shall not be less than 75 pounds.

For columns with length greater than 12 times the least diameter the value of fc to be used in the above formula shall be reduced.

The hoops shall not be spaced closer together than 1½ in., nor further apart than one-seventh of the diameter of the spiral. In no case shall the total cross section of vertical steel be less than 1 per cent. of the cross section of the concrete within the spiral.

Additional reinforcement or reduction in the compressive stress on the concrete shall be made for columns eccentrically loaded.

18. Spandrel walls supported entirely on reinforced concrete wall girders and extending from the floor line to the window sill shall have a minimum thickness of 8 in. and shall be reinforced with not less than ½ lb. of steel per square foot of wall.

Inclosure walls of skeleton buildings built in between columns and supported entirely on reinforced concrete girders shall have a minimum thickness of 8 in. for 40 ft. of the uppermost height thereof or the nearest tier of beams to that measurement. For each additional 30 ft. of height or to the nearest tier of beams to that measurement the thickness of the wall shall be increased 1 in. Basement walls shall be at least 2 in. thicker than the walls immediately above. All such inclosure walls shall be reinforced with not less than ¾ lb. of steel per square foot of wall. All window or door openings shall be reinforced with steel on the sides and at the top and bottom in addition to the steel specified above. Where walls are required to meet special conditions the thickness and the amount of reinforcement shall be determined by such conditions.

Parapet walls shall have a minimum thickness of 6 in. and shall be reinforced with not less than ½ lb. of steel per square foot of wall.

Inclosure walls for one-story storage or factory buildings shall have a minimum thickness of 4 in. and shall be reinforced with not less than ½ lb. of steel per square foot of wall.

19. Partitions required by the Code to be fireproof may be constructed of reinforced concrete and shall

have a minimum thickness of 3 in., and shall be reinforced with not less than ¼-in. rods on 12-in. centers, running both vertically and horizontally.

20. Reinforced concrete construction may be continued during freezing weather provided all frost is eliminated from the sand and broken stone by artificial heat and provided also that the work is protected from the weather by canvas or similar means and artificial heat supplied to prevent the concrete from freezing prior to taking its final set.

21. The contractor must be prepared to make load tests on any portion of reinforced concrete construction within reasonable time after erection. The tests must show that the construction will sustain a load of twice the live load for which the section was designed without any sign of failure.

THE CONCOURSE FLOOR OF THE HUDSON TERMINAL BUILDING, NEW YORK.

The concourse floor of the Hudson Company's Terminal Building in New York City is shown in the accompanying illustrations. It is of concrete steel construction, the reinforcing material being Ferroinclave sheets made by the Brown Hoisting Machinery Co., of Cleveland. In constructing this floor, the arch Ferroinclave sheets were laid on the bottom webs of the beams. The corrugations upon the upper side were then covered with a mixture of one part of Portland cement to 2½ parts of sand, and the concrete was placed on this. The minimum thickness of the floor at the crown was not less than 11 in., but, owing to the various depths of the beams, it was thicker than this in some places. The spacing of the beams varied considerably, and, in some cases, the beams were not parallel, but this was readily taken care of by beveling the ends of the Ferroinclave sheets. The under side of the Ferroinclave sheets was covered with concrete, so that they are entirely protected. The bottom flanges of the beams are covered with wire netting and then encased in concrete.

The great advantages claimed for this type of floor are that no centering is required, and thus no valuable space is taken up by it, and the work underneath or above the floor is not interfered with, and also that it is very quickly erected. The tie rods are above the tops of the Ferroinclave sheets, and thus encased in the concrete.

AN INVESTIGATION OF STEEL CONDUITS FOR WIRING.

The use of both rigid and flexible steel conduits for wiring installations has increased very rapidly in the last few years. The value of this form of raceway for electrical conductors has become well established and, while the manufacturing industries concerned with the production of conduit and its peculiar fittings have been developing the material, the experience of inspectors and users has elaborated a fairly satisfactory body of rules and a standard of workmanship. In the process of this development, although certain rules and practices have become well established, it is still true that there remain some points not yet definitely settled.

The Underwriters' Laboratories, 382 Ohio St., Chicago, is now inviting suggestions concerning these points from persons whose experience either as inspectors of electrical installations, as manufacturers of conduit and conduit fittings, or as contractors or users of these materials, qualifies them to give valuable information. It is hoped that from the results of experience thus obtained, some useful suggestions may be collected which will both record in what respects and in what measure present practice is satisfactory, and will also indicate in what particulars and by what means further improvements may be secured.

The Laboratories are sending out certain questions concerning conduit work and request detailed replies to the inquiries it contains. These replies will have value whether they furnish evidence that no considerable changes are needed or whether they point out defects either with or without suggestions for remedying them.

The questions are as follows

1. In what respects, if any, does the ordinary form of enamel on rigid conduit prove an unsatisfactory covering for the steel pipe?

2. Does galvanized rigid conduit possess advantages or disadvantages as compared with enameled conduit? If so, what and for what special uses?

The claim has been made that galvanized pipe in the presence of moisture, especially in concrete, suffers from "local action," a corrosion due to electrical action in the presence of the two metals and traces of acid. Well substantiated evidence of such effects is especially desired if the effect is known to have been observed.

Rule 25f of the National Board of Fire Underwriters reads: "Must have the metal of the conduit permanently and effectually grounded." It is essential that the metal of conduit systems be joined so as to afford electrical conductivity sufficient to allow the largest fuse or circuit breaker in the circuit to operate before a dangerous rise in temperature in the conduit system can occur. Conduits and gas pipes must be securely fastened in metal outlet boxes so as to secure good electrical connection. Where boxes used for centers of distribution do not afford good electrical connection, the conduits must be joined around them by suitable bond wires. Where sections of metal conduit are installed without being fastened to the metal structure of buildings or grounded metal piping, they must be bonded together and joined to a permanent and efficient ground connection.

3. Does the enamel ordinarily used on conduit and fittings (junction outlet and panel boxes) prevent or render difficult strict compliance with this rule of the National Electrical Code? If so, what commercially practicable means can be found for obtaining better conductivity?

At the meeting of the Underwriters' National Electrical Association in March, 1907, it was suggested that the following be added as a fine print note in Rules 24A, 25d, 25f, of the Code:

"It is recommended that galvanized cables, outlet boxes and fittings be used in order to secure a better electrical contact at all point throughout the cable system."

CONSTRUCTING FLOORS IN HUDSON COMPANY'S TERMINAL BUILDING.

It was also suggested that a note be added to Rule 49Ab to read:

"It is recommended that the protective coating (of switch and outlet boxes) be of metal such as tin or zinc."

These suggestions were referred to a special committee for consideration and report.

4. Definite information is desired as to the use of conduit in cement or concrete.

(a) Conditions liable to cause deterioration of conduit, either rigid or flexible in cement or concrete. See also Inquiry No. 2 above.

(b) Do flexible conduits or armored cables placed in wet concrete admit water to the interior while concrete is setting to a degree sufficient to cause trouble? If so, what precautions should be taken or what limitations should be placed to such use of flexible conduit or armored cables?

5. What injurious effects on exposed conduits are observed from the action of acid fumes and gases. In such cases what may be done to protect the conduits from rapid deterioration?

6. What added specifications for construction and installation of junction boxes should be made? See Code Rule 49A, which treats of Switch and Outlet Boxes, and Rules 25b and g.

What defects, if any, are found in present types of

(a) Ordinary conduit outlet boxes?

(b) Junction boxes?

(c) Grounding clamps?

(d) Fittings for use with flexible conduit and armored cables?

(e) Fittings for use with exposed rigid conduit such as "Condulets" and similar devices?

8. What other defects, not suggested above, have been noted in present forms of conduit or fittings? What means may be taken to correct such defects and what additions or revisions of the present Code rules on conduit are desirable?

The purpose of this inquiry is not to imply any doubt as to the large measure of fire protection afforded by steel conduits and their fittings, but rather to aid and encourage the development of these products which have already proved themselves of distinct benefit to the insurance interests.

COMMENTS OF WORKMEN REGARDING THE QUEBEC BRIDGE ACCIDENT.

On Sept. 13 two men at work on the traveler at the end of the Quebec Bridge at the time of its failure testified before the government investigating commission regarding their experience. One of them, Ingwall, stated that the traveler was hoisting a couple of timbers at the time of the accident. He was 10 ft. from the top of the traveler near the front, about 400 ft. above the water, and fell so fast that he hardly realized any details of what was happening. It seemed to him as if the bridge had just tipped. He never saw any defects in the structure, but had heard others talking about kinking in the bottom chord, and knew that some of the men had gone down to look at it the night before the accident.

Another survivor of the crew was D. B. Haley, president of the local bridge workers' union, who testified that he was on the extreme end of the traveler at the time of the accident. The cantilever arm seemed to fall first, and the other part afterward, a statement apparently inconsistent with the witnesses testimony that the first thing he knew after feeling himself falling was the sensation of being in the water. He testified that after working hours the day before the collapse he went down to see defects in the lower chord which had been reported among the men. Bends were to be seen at places in this chord in panels near the main pier, and the lattice bars were also buckled in places.

The brothers of Carl Swenson, one of the men killed in the accident, have given out for publication a letter in which the following statement was made by him: "I doubt very much whether the bridge will ever be finished, since the first and second panels of the bottom chord of the cantilever, Quebec side, are buckling." The authenticity of this letter is understood to be questioned by the bridge contractors.

The coroner's jury which heard the testimony concerning the death of one of the workmen, due to the accident, rendered a verdict on Sept. 12 that it was unable to ascertain the cause of the failure, but was of the opinion, according to the evidence adduced before it, that all desirable precautions had been taken.

Motor equipments for printing, electrotyping, stereotyping and binding machinery, are described in bulletin 229, recently issued by the Sprague Electric Co., of New York. The remarkable progress made in this direction is indicated by a list given of prominent printing, engraving and stereotyping plants equipped with Sprague motors.

PERSONAL NOTES.

Mr. J. F. Deimling has been appointed chief engineer of the Pere Marquette Railroad Co., succeeding Mr. E. K. Woodward, resigned.

Major E. Eveleth Winslow, Corps of Engineers, U. S. A., has been ordered to the office of the Chief of Engineers for temporary duty.

Prof. J. J. Flather, head of the mechanical engineering department of the University of Minnesota, has returned from a trip to Australia.

Mr. F. J. Seery, of Ithaca, N. Y., recently was appointed an assistant engineer in the office of the New York State Engineer and Surveyor.

Mr. Arthur Hay, civil engineer, Springfield, Ill., has been appointed engineer and general superintendent of the work of the Springfield Pleasure Driveway and Park Board.

Mr. William H. Newman, president of the New York Central & Hudson River R. R., returned to his office recently, after a vacation spent in France and Switzerland.

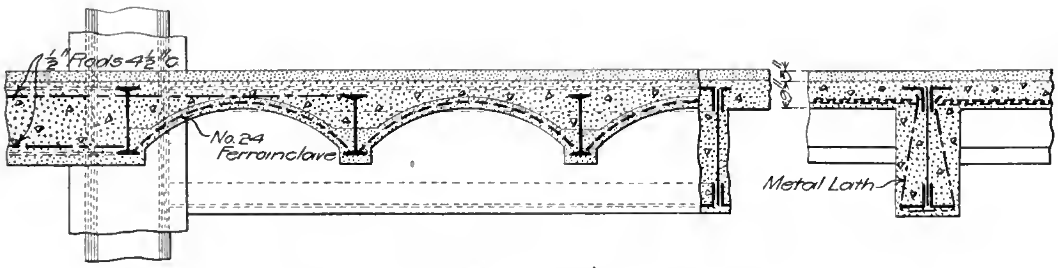
Dr. Rudolph Hering, consulting engineer, New York City, has been chosen by the Passaic Valley Sewage Commission to prepare plans for a trunk sewer to drain the Passaic Valley.

Winslow Allerdice, of New London, Conn., at one time an engineer in the United States Navy and later city engineer of Warren, Pa., died recently at his home in New London.

Prof. Robert Sibley, head of the engineering department of the University of Montana, has resigned to take charge of the installation and operation of a large hydraulic placer mining plant in Wyoming.

The United States Civil Service Commission will hold examinations in the large cities of the country, Oct. 23-24, of candidates for the position of architectural draftsman in the Immigration Service, Ellis Island, N. Y.

The New York State Civil Service Commission will hold examinations on October 12, of candidates for the position of assistant sanitary engineer, State Health Department. Full information with application forms may be obtained by addressing the Chief Examiner of the Commission at Albany.



FLOOR SYSTEM, HUDSON COMPANY'S TERMINAL BUILDING.

The Province of British Columbia, Canada, has appointed a commission consisting of the Minister of Public Works, and Prof. L. G. Carpenter, of the Colorado State College, to investigate irrigation conditions in the Province. The investigation is to be made with the preparation of a new Water Act especially in view.

Capt. James B. Cavanaugh, Corps of Engineers, U. S. A., in charge of defensive works and river and harbor improvements in Florida, has been ordered to transfer his duties to Capt. Horley B. Ferguson, on duty under direction of Capt. Cavanaugh, and proceed to the office of the Chief of Engineers. First Lieutenants William G. Caples, Warren Hannum and Theodore H. Dillon have been ordered to Mobile, Washington Barracks, and Havana, respectively.

Mr. S. A. Jordan has been appointed division engineer of the Philadelphia division of the Baltimore & Ohio R. R., succeeding Mr. A. A. Miller, resigned. Mr. E. V. Smith has been appointed division engineer of the Cleveland division to succeed Mr. Jordan. Mr. J. B. Myers has been appointed division engineer of maintenance of way of the Cumberland division to succeed Mr. J. R. Leighty, who has resigned to become engineer of the Southern division of the Missouri Pacific Ry. System. Mr. P. H. Petri has been appointed division engineer of the Shenandoah division to succeed Mr. Myers.

George W. Plympton, professor of physics at the Brooklyn Polytechnic Institute, and a well-known civil engineer, died September 11, at his summer home at Tyson, Vt., aged 80 years. He was born in Waltham, Mass., and received his education in the public schools of that city, and in the Rensselaer Polytechnic Institute, graduating from the latter in 1847. He taught mathematics at the Institute for a time. In 1851 he became professor of mathematics in the New York State Normal School, and nine years later accepted a similar position in the New Jersey State Normal School. In 1863 he became professor of physics at the Brooklyn Polytechnic Institute, a position which he held till his death. In 1905 he was made professor of civil engineering at the Brooklyn school, and in 1905 professor emeritus of civil engineering. From 1870 to 1886 he edited Van Nostrand's "Engineering Magazine." He was the director of the Cooper Union for many years.

Rear Admiral John Grimes Walker, U. S. N., retired, died, Sept. 16, at Cape Meddick, Me., aged 72 years. He began his naval career in 1850 when he was graduated from the Naval Academy at the head of his class. He served actively throughout the civil war and at its close he was made a commander and detailed to the Naval Academy. In 1881 he was appointed Chief of the Bureau of Navigation, an office which he held for eight years, being appointed rear-admiral at about the end of that period. In 1897 he was appointed chairman of the Isthmian Canal Commission by President McKinley. When a new commission was appointed in 1899, Admiral Walker was again made chairman. He was originally in favor of the Nicaragua route, but when the French company offered all its works, buildings and rights for $40,000,000, and the commission of 1899 was called on for a second report, Admiral Walker reported in favor of the Panama route. He was retired in 1897, having reached the age limit of 62 years.

BUSINESS NOTES.

The Forbes Co., Philadelphia, manufacturers of water sterilizers for public buildings, railroads, factories and the like, have opened a New York office at 120 Liberty St., in charge of Mr. Irving A. Chandler.

The Standard Roller Bearing Co., Philadelphia, has recently made large additions to its plant, the total floor space now being 500,000 sq. ft. Fifteen hundred men are employed. The business has grown to such proportions as to require the establishment of a publicity department. Mr. C. Dickens Sternfels, who has been with the Arthur Koppel Co., Pittsburg, in a similar capacity for three years, will conduct the new department.

The Columbian Rope Co., Auburn, N. H., has ordered a new electric generating and motor equipment from the Allis-Chalmers Co., Milwaukee. The generator is a 940-kw. 60-cycle three-phase machine, operating at 120 r. p. m. Two 30-kw. exciters are provided, one engine and the other motor-driven. The motors, all of the Allis-Chalmers standard type, with bearings having sealed end boxes designed to exclude dust and flying particles of metal, will be suspended from the ceiling. There are four 150 h.-p. motors for 600 r. p. m.; two 100 h.-p. for the same speed, and a 20 h.-p. motor for 900 r. p. m. Three 40-kw. transformers are used on the lighting system.

The American Steel & Wire Co., after having in operation a 12,500 h.-p. We-Fu-Go water softening and purifying system for six months at their Donora Works, have placed an order with Wm. B. Scaife & Sons Co., Pittsburg, Pa., for a 25,000 h.-p. We-Fu-Go system, consisting of eight large treating and settling tanks and eight mechanical gravity filters, for their Newburgh Steel Works at Cleveland. Other sales of We-Fu-Go systems are reported as follows: Rochester & Pittsburg Coal & Iron Co., Punxsutawney, Pa., 2,250 h.-p. (third order); Shenango Furnace Co., Sharpsville, Pa., 8,000 h.-p.; Armstrong Cork Co., Oakdale, Pa., 500 h.-p.; Fostoria Glass Co., Moundsville, W. Va., 350 h.-p.; The Allen & Wheeler Co., Troy, O., 200 h.-p.; Stone & Webster Engineering Corporation, Boston, Mass., 2,500 h.-p., for the Jacksonville Electric Co., Jacksonville, Fla.; the Paterson Parchment Paper Co., Passaic, N. J., 150,000 gal. per hour, continuous system.

The Parker Boiler Co., Philadelphia, has received an order from the J. B. Stetson Co., of the same city, for two 750-h.-p. boilers. This is the fourth order for Parker boilers for the Stetson plant, the total aggregating 7,000 h.-p.

J. H. Wagenhorst & Co., manufacturers of electric blue printing machines, Youngstown, O., report a prosperous season. Among the recent sales reported by them are the following: E. R. Thomas Detroit Co., Detroit, Mich.; J. Flood Walker, San Antonio, Tex.; Luzerne Engineering Co., Hazleton, Pa.; Surveyor General's Office, Cheyenne, Wyo.; J. E. Myers, Penn Station, Pa.; Harris Automatic Press Co., Niles, Ohio; American Thread Co., Holyoke, Mass.; Phoenix Mfg. Co., Eau Claire, Wis.

The Sandusky Portland Cement Co. reports the use of Medusa waterproof compound for the following work: Plant of the Grand Rapids Refrigerator Co., Grand Rapids, Mich.; reinforced concrete dam of the coal department of the D., L. & W. Ry., Scranton, Pa.; cold storage plant of A Booth & Co., Detroit, Mich.; A. T. & S. F. Ry., at Albuquerque, N. M., and Sommerville, Tex.; and the residence of Albert Kahn, of the Trussed Concrete Steel Co., Detroit.

Foundrymen have persisted of late in the policy of keeping out of the market, even the largest buying, from week to week for prompt delivery. This condition of affairs, together with the gratifying volume of this season's business to date and the fairly certain indications of its continuation for the remainder of the season, finally compelled the manufacturers of boilers and radiators to make an inquiry as to the conditions likely to prevail in the iron market. As a result of this examination, it is stated that there will be no lowering of prices of house-heating boilers or radiators during the balance of the season.

TRADE PUBLICATIONS.

The General Electric Co., Schenectady, has recently issued a series of bulletins descriptive of recent improvements in standard apparatus manufactured. One pamphlet describes improvements in knife-blade lever switches to enable them to withstand severe and continuous service and carry their rated current indefinitely without overheating, thus meeting the requirements of the fire underwriters. Another bulletin describes a new line of fuse boxes specially adapted for use in subway manholes, where severe conditions are met, but also useful on poles, in cellars and elsewhere; these are made in two general types, with outlets for cables at the side and bottom, respectively. Other bulletins refer to electrically operated ratchet-driven rheostat switches for remote control purposes in modern switch-board practice, and to the 1907 improvements in lightning arresters for medium and high voltage alternating current circuits, to electric flat-irons with their recent improvements and advantages, to the new Edison gem filament 50-watt lamp and to the new G. E. Tungsten lamp for street series lighting.

The Utility steam specialties are described in a number of publications recently issued by the Standard Steam Specialty Co., New York. These comprise folders describing the Utility pump governor, steam separator, exhaust head, feed water heater and exhaust muffler tank, which latter is a combined muffler tank, oil separator, return tank and pump gevornor. A comprehensive pamphlet gives detail drawings with the principal dimensions of all of this apparatus, and also sketches suggesting the proper methods of connection, and a complete price list.

The Buffalo Steam Pump Co., Buffalo, N. Y., has published a large catalogue of its extensive line of pumps of the power, steam, centrifugal and turbine types. In section one of the catalog, 75 pages are devoted to the steam and power pumps, which are built in all patterns for boiler feeding and general purposes, for high or low pressures, for handling chemicals and heavy liquids and for high duty service in water works plants. The second section is devoted to the centrifugal and turbine pumps, which are built in all forms, both simple and compound, and for power, steam or electrical drives, and considerable valuable information is appended concerning their operation.

An unusually attractive catalogue has recently been issued by the Burt Mfg. Co., Akron, Ohio, descriptive of the Burt oil filters, exhaust heads and ventilators, and the Cross, the American and the Warden oil filters. All are fully illustrated and described, as is also the Burt oil filtering and delivery system, which consists of oil filters and reservoirs for reclaiming oil wasted from bearings and redelivering it to the bearings through an overhead reservoir and gravity piping. A specialty is also made by this company of the manufacture of exhaust heads which are built in two types and in all sizes, and of a weather-proof ventilator hood for roofs or skylights. These are built with different forms of bases and are fitted with glass tops and easily operated shutters permitting them to be closed, if desired, in cold weather.

Storage batteries for stationary service are listed in a recent catalogue issued by the Westinghouse Machine Co., storage battery department. The Westinghouse battery is built in an extensive series of standard sizes, which range from the 2-plate element for closed circuit work, to the multi-plate cells for large installations. Battery regulators and boosters are illustrated and battery trucks for industrial railway service in shops and factories.

Their pneumatic tools are described in a comprehensive new catalogue from the Independent Pneumatic Tool Co., Chicago. The details of construction are shown, both of the piston air drills, reversible and non-reversible, and of the chipping, calking and riveting hammers, together with a variety of accessories, including pneumatic holders-on, boiler flue expanders, pneumatic rivet forges, and air hose and connections. Illustrated lists of parts are given, covering all of the standard drills, grinding machines, saws, hammers and holders-on. A feature of the catalogue is the number of illustrations of various tools in service at drilling, reaming, grinding, chipping, riveting and calking.

The Luitwieler system of pumps is explained in a catalogue recently issued by the Luitwieler Pumping Engine Co., Los Angeles, Cal., builders of a line of special machinery for deep well and high-duty pumping, for which remarkable claims for economy are made. The Luitwieler pump is illustrated and described and its special features described, and a number of successful installations are referred to. A specialty is made of small pumping units with gasoline engine drives for railroad water tank supply, and also of electrically driven pumping units.

The Goldschmidt Thermit Co., New York, has just issued two pamphlets relating to improved methods of calculating and making repair welds, and of making butt welds on wrought-iron and steel pipes and rods. The former relates particularly to welding locomotive frames, for which special molds are listed for all sizes of frame members, and also the amounts of Thermit, ignition powder and other materials for each size of mold. Valuable information is, however, appended for other classes of repair work, a method of universal molding by means of a yellow wax matrix having been perfected which obviates the services of a patternmaker and enables the amount of Thermit needed to be accurately determined. The welding of pipe and rods has been brought to a high degree of perfection, and full instructions are given for this class of work.

The twenty-fifth anniversary of the Ball Engine Co., Erie, Pa., is commemorated by an attractive little pamphlet giving a brief outline of the development of the Ball engine and the principal features of the present standards of construction of all its types.

Handling and storing coal and ore is interestingly treated in a recent catalogue of the Dodge Coal Storage Co., Philadelphia, Pa. Considerable space is devoted to descriptive matter on the well-known Dodge piling trimmer and reloader mechanisms, following which apparatus for coaling locomotives, circular storage cranes, revolving cranes, high-speed hoisting towers, bridge tramways, box car loading machines, car dumpers and automatic railways are discussed and representative installations illustrated. The book is particularly well illustrated and is a compendium of mechanical handling apparatus for coal and ore.

The Concrete-Steel Engineering Co., New York, has sent out a 96-page catalogue of half-tone views of reinforced-concrete bridges which it has put up in all parts of the country. All of them are built on the Melan, Thacher or von Emperger systems, the patents of which are controlled by the company. They vary in span from 10 to 132 ft., and some are finished with ornamented concrete, stone, or vitrified brick faces, and many of them have ornamental railings of plain or reinforced concrete.

"Prescott Pumping Machinery" is the title of an elaborate catalogue recently issued by the Fred M. Prescott Steam Pump Co., Milwaukee, Wis. It is a 145-page book, attractively designed typographically, listing the product of the Prescott works, and includes detail descriptions of the various classes of pumps built, and instructions in regard to setting them up and their operation. The book is divided into four sections as follows: Mine pumps, of which this company makes a specialty; condensing apparatus and power house equipment, boiler feed, fire and general service pumps, and the larger high duty pumping engines for water works and general pumping service. It is concluded with pump part lists and information of value concerning pumping and steam machinery.

The American Huhn Metallic Packing Co., New York, has issued a pamphlet concerning a gland packing for use with high-pressure steam. This consists of hollow rings of a special soft-metal alloy, designed to withstand extremely high temperatures, which are filled with a graphite preparation that works through small perforations in the inner periphery and lubricates the rod. It is said that no oil or grease lubrication is found necessary with this packing and that a set will, under ordinary conditions, wear a number of years without attention.

The Cutler-Hammer Mfg. Co., Milwaukee, Wis., makers of electric controlling devices, has issued a booklet descriptive of its line of electric crane controllers. In addition to descriptions of five types of crane and hoist controllers, connection and dimension diagrams and repair part charts are presented, together with prices, net weight and shipping weight of apparatus, etc. An improved form of contactor for handling heavy currents is also described.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—See "New Industrial Plants."

Montrose, Colo.—The Council, it is reported, has purchased a site on which it is proposed constructing a reservoir.

Canon City Colo.—Bids will be received until Oct. 7 (extension of date from Sept. 20) by the City Clk. for furnishing material and constructing an additional system of water works, consisting of a reservoir, located at and near Cottonwood Creek, and a pipe line connecting said reservoir with the present city water main, as advertised in The Engineering Record. A. H. Seely, Mayor.

Wallingford, Conn.—The Water Comrs. are stated to have had prepared a report on the increase of water by gravity supply at Pistapang Lake, and estimate the cost at about $38,000. J. H. Child is Engr. and Supt. of Water Wks.

Washington, D. C.—See "Power Plants, Gas and Electricity."

Pensacola, Fla.—The following are the bids received Sept. 7 by the Bureau of Yards & Docks, Navy Dept., Washington, D. C., for a water system and circulating mains at the Navy Yard, Pensacola: Newport Plumbing & Htg. Co., Inc., Newport News, Va., $35,678; Lewis & Kitchen, Chicago, Ill., $48,514; and McCay Eng. Co., Baltimore, Md., $39,440; also another bid on their own plans, at $37,940.

The following are the bids opened on Sept. 14 at the offices of the Bureau of Yards and Docks, Navy Dept., Washington, D. C., for a 100,0000 gal. elevated steel tank and tower at the Navy Yard, Pensacola: Camden Iron Works, Camden, N. J., $21,000; Tippett & Wood, 162 Howard St., Phillipsburg, N. J., $10,120; R. D. Cole Mfg. Co., 57 E. Broad St., Newnan, Ga., $10,700; The Midland Bridge Co., 818 Wyandotte St., Kansas City, Mo., $10,900; Chicago Bridge & Iron Wks., 105th and Throop Sts., Chicago, Ill., $10,500; Pittsburgh Industrial Iron Wks., Westinghouse Bldg., Pittsburgh, Pa., $9,487, and R. B. Tufts, Prudential Bldg., Atlanta, Ga., $9,500.

Punta Gorda, Fla.—It is reported that a resolution has been recommended to the Council to have an 8-in. artesian well sunk.

Daytona, Fla.—A committee of three, consisting of Aldermen Hankins, Bingham and Rowe, have been appointed by the Council to confer with Supt. Gunn of the electric light company with reference to constructing a water works for the city.

Athens, Ga.—J. W. Barnett, City Engr., writes with regard to the filter plant improvement, that the city has a plant of Warren filters and expect to extend the plant and will be pleased to have propositions from all firms in position to supply and erect this filter.

Kewanee, Ill.—Bids will be received until Oct. 5 by J. C. Bannister, Chmn. Water Com., for certain machinery and equipment for pumping water from 2 deep wells in said city, to be delivered f. o. b. cars Kewanee. The material required is a structural steel tower of approximately 48 ft. long and 16 ft. wide at the base and 40 ft. long by 6 ft. wide at the top and 32 ft. high; a structural steel and iron walking beam with connecting rod and crank drive center trunnions and boxes, rod connections and brasses; 2 cast bronze deep well cylinders, 7 ft. stroke, 7½ or 7¾ in. internal diameter, complete with foot valves and 6 to 8 cup plungers; about 700 ft. pump rods suitable for above cylinders and about 300 ft. lift; about 700 ft. 8-in. galvanized pipe; a triplex geared power pump to be driven by belt suitable for 150 lbs. pressure and to deliver from 700 to 1,000 gals. per minute at 40 to 60 r. p. m.; an engine for fuel oil capable of developing 125 brake h.p. at normal speed on a guaranteed consumption of not more than 1 pound of oil per b. h. p. per hour, when operated at full load; an engine for illuminating or producer gas, having the same capacity as engine for fuel oil on a guarantee consumption of not more than a pound of anthracite buckwheat or pea coal per b. h. p. per hour when operated at full load; a 150 h.p. producer to be used in connection with engine; a horizontal steel tank, 8x30x36 ft., suitable for oil storage under pressure of 100 lbs.

Chicago, Ill.—Bids will be received until Sept. 25 by the Bd. Local Improv. (H. S. Dietrich, Pres.) for furnishing material and constructing water supply pipes in portions of 10 streets; also water service pipes in Cornelia Ave.

**Sibley, Ia.*—Drake, Williams, Mount & Co., of Omaha, Neb., are reported to have secured the contract for the erection of a solid steel tank, 22 ft. diam., 24 ft. high, for $2,600.

**Decorah, Ia.*—I. Linnevold, Co. Aud., writes that the contract for constructing a water system at the poor farm (bids opened Sept. 10) has been awarded to A. A. Chandlar & Son, of Decorah, for $1,250.

Primghar, Ia.—Bids will be received until Oct. 10 by W. H. Downing, Town Clk., for the construction of water works. M. Tschirgi & Son, Engrs., Bank & Insurance Bldg., Dubuque.

Concordia, Kan.—About $45,000 will be expended for remodeling the waterworks. Bonds for same have not yet been voted. Engineers, Burns & McDonnell, Scarritt Bldg., Kansas City, Mo.

Wichita, Kan.—The Council is said to be considering the buying or building of a water plant and is receiving offers from engineers to prepare plans.

Garnett, Kan.—It is stated that bids will be received by L. D. Pilkington, City Clk., until Oct. 1, for valves, pipe and connections for the water plant. Burns & McDonnell, Engrs., Kansas City, Mo.

**Louisville, Ky.*—John S. Morris, Auditor, writes that the contract for furnishing and installing pumping engines (bids opened Sept. 8) have been awarded as follows: Holly Mfg. Co., Buffalo, in the Crescent Hill Pumping Station, at $153,622, and Allis Chalmers Co., Milwaukee, Wis., River Pumping Station, $187,952. Capacity is to be 24,000,000 gals. per hour.

Newport, Ky.—The Water Comrs. are reported to have directed the Supt. to secure estimates of cost of erecting a water tower of 500,000 gal. capacity near the reservoir in the Highlands.

Greenville, Ky.—See "Power Plants, Gas and Electricity."

Amite City, La.—The Council is reported to be considering the question of putting in mains and procuring a water supply from the Gullett Gin Co.

New Orleans, La.—Bids were opened on Sept. 4 at the office of the Sewerage and Water Bd., for hauling and laying of approximately 250 miles of c. i. water pipe, from 4 to 30 in. diam. and aggregating about 26,000 tons. The work is divided into four contracts, namely: (*a*) Contract 15-W, (*b*) 16-W, (*c*) 17-W, (*d*) 18-W: Irwin Bros. *a* $225,789, *c* $251,595; M. O. Herron & Co., *a* $233,862, *c* $231,791, *d* $116,331; A. L. Patterson & Co., *b* $256,167; General Contr. Co., *c* $242,396, *d* $113,637; The Southern Contr. Co., *a* $218,495.

Provincetown, Mass.—Bids will be received until Sept. 25 by Walter Welch, Secy. Water Bd., Provincetown, for laying about 23,000 ft. 10-in. and 3,000 ft. 8-in. pipe in Provincetown and Truro. For further information address Edmund M. Blake, 8 Beacon St., Boston.

Berrien Springs, Mich.—See "Power Plants, Gas and Electricity."

Milan, Mich.—W. P. Gregory, Village Clk., writes that the citizens voted Sept. 10 to issue $30,000 bonds for water works and sewers.

**Stambaugh, Mich.*—The contracts to improve the water works (bids for which were received Sept. 9) we are informed, have been awarded to the Chicago Bridge & Iron Wks., of Chicago, Ill., for the tower and tank; and to the Freeman & Sons Mfg. Co., of Racine, for the power plant. Edmund T. Sykes, of Minneapolis, Minn., engr.

Detroit, Minn.—Bids will be received until Sept. 30 by the Water and Light Com. (Chas. G. Sturtevant, Clk.) for the erection of a 50-ft. steel water tower and tank of 100,000 gal. capacity, and the laying of 600 to 1,000 ft. of 8-in. water main, and installing one hydrant.

Mahnomen, Minn.—Bids will be received until Sept. 30 by A. O. Vachan, Recorder, for constructing a water tank and tower and complete water system for fire protection.

Jackson, Miss.—Press reports state that bids will be received by the Mayor and Bd. Aldermen until Sept. 25 (readvertisement) for $216,000 bonds for the purchase of the existing plant from the Light, Heat & Water Co. Ramsey Wharton, Mayor.

Columbia, Miss.—The question of issuing bonds to the amount of $50,000 for the construction of water works and a sewerage system is under consideration here.

Beaver City, Neb.—It is stated that bids will be received by W. L. Leonard, City Clk., until Sept. 30, for furnishing and laying water mains.

McCook, Neb.—The pumping plant of the McCook Water Works is reported to have been destroyed by fire.

Tupper Lake, N. Y.—The Tupper Water Co. is reported to be contemplating the constructing of a stand pipe of 600,000 gals. capacity.

Lidgerwood, N. D.—The Des Moines Bridge & Iron Wks., of Des Moines, Ia., is stated to have submitted Sept. 2 the only bid for a tower and tank for the water works system, at $4,050 for the entire work, including foundations, etc. The tank is to have a capacity of 75,000 gals., and the tower to be 75 ft. to balcony.

Minot, N. D.—City Engr. Severence is reported to be completing plans for water works.

**Middleton, O.*—It is reported that the following bids were received recently for c. i. pipe, etc.: Massillon Iron & Steel Co., Massillon, O., $36.20 a ton for 4-in. pipe, and $35.20 for 6 and 8-in.; 3 cts. a lb. for special castings (awarded contract); John Arpp, $37.70 for all sizes, and 3 cts. for special castings.

Bellaire, O.—An additional issue of bonds to the amount of $10,000 is reported to have been sold, to be used for purchasing pump and completing the filter system.

Ashland, O.—Bids will be received until Oct. 14 by the Bd. Pub. Affairs for furnishing and delivering f. o. b. cars, Ashland, about 350 tons standard weight, c. i. water pipe; digging trench and laying about 8,500 ft. water pipe; furnishing material and erecting building at pumping station: building foundations for new machinery; furnishing f. o. b. cars, Ashland, about 14,000 lbs. pig lead.

Cincinnati, O.—The Bd. of Pub. Service is reported to have on Sept. 13 rejected bids for water mains and will ask for new bids.

Park City (Knoxville), Tenn.—The City Council is reported to have granted a franchise to the Knoxville Water Co., of Knoxville, to extend its mains, place hydrants, etc., in Park City.

Sweetwater, Tenn.—The citizens are reported to have voted to issue $30,000 bonds for the construction of water works and $10,000 for street improvements.

Lufkin, Tex.—Judge J. T. Maroney is stated to have made an offer to the city to lease the water works system for a period of 10 years, paying $10,000 per annum, agreeing to give the city free use of the mains for fire purposes and to furnish an adequate supply of water the year round.

Orange, Tex.—The City Council is reported to have granted a 20-yr. contract to the Orange Ice, Light & Water Co., and the company is said to have decided to erect at once a standpipe 90 ft. high.

Fairland, Tex.—The question of constructing water works is reported to be under consideration here.

Brownwood, Tex.—The State Attorney General is reported to have approved the issue of $20,000 water bonds for Brownwood.

Pulaski, Va.—Engineer G. H. Derrick, of Pulaski, writes with regard to reservoir, etc., that nothing definite has yet been decided upon. It is proposed to construct reservoir or a small dam and several miles of pipe.

Norfolk, Va.—The following are the bids opened on Sept. 14 at the office of the Bureau of Yards and Docks,

*Items marked thus give the names of parties awarded contracts.

Navy Dept., Washington, D. C., for a 100,000 gal. elevated steel tank with suspended 15,000 gal. steel tank and tower, at the Navy Yard, Norfolk: Tippett & Woods, 162 Howard St., Phillipsburg, N. J., $9,450; R. D. Cole Mfg. Co., 57 E. Broad St., Newnan, Ga., $13,154; Pittsburg Industrial Iron Wks., Westinghouse Bldg., Pittsburg, Pa., $10,994; R. B. Tufts, Prudential Bldg., Atlanta, Ga., $9,500, (tower only;) Camden Iron Wks., Camden, N. J., $20,000; The Midland Bridge Co., 818 Wyandotte St., Kansas City, Mo., $12,500; Belmont Iron Wks Inc., 22nd and Washington Aves., Philadelphia, Pa., $13,677.

Ft. Ethan Allen, Vt.—Bids will be received until Sept. 28 by Lieut. M. G. Holliday, Q. M., U. S. A., for furnishing material and piping wells for air lift at this post.

Seattle, Wash.—See "Sewerage and Sewage Disposal."

Wheeling, W. Va.—The improving of the water system is reported under consideration.

Pennsboro, W. Va.—It is reported that bids will be received until Sept. 30 for the purchase of $12,000 water works bonds. J. K. B. Wooddell, Mayor.

De Pere, Wis.—It is reported that $6,000 will be expended in extending the water mains.

**Linden, Wis.*—The City Clerk writes that the International Constr. Co., of South Bend, Ind., has escured the contract for constructing water works at Linden.

Winnipeg, Man.—At a meeting of the Fire, Water & Light Com. on Sept. 9 a recommendation was sent to Council calling for the purchase of 15 miles of water pipe.

London, Ont.—See "Power Plants, Gas and Electricity."

Weyburn, Sask.—Edgar A. Chappell, City. Secy.-Treas., writes that the proposed water works will cost between $75,000 and $100,000. No bids have yet been asked. Engineer, Wm. Rand, of Weyburn.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Bessemer, Ala.—The citizens are stated to have voted Sept. 9 to issue $35,000 bonds for storm sewers and $50,000 bonds for erecting a school.

Ensley, Ala.—W. A. Hendricks, advisory engr. of the Jefferson County Sanitary Comn., is stated to have decided upon the route for the extension of the sanitary sewers to the 5th Ward, for which the city recently voted $20,000 bonds. It is reported that bids for the construction will soon be asked.

Jasper, Ala.—P. Byrne, P. O. Box 111, Birmingham, is preparing plans for a sanitary sewerage system, and contract for same will be let about Oct. 3; probable cost, $15,000.

Willows, Cal.—There is reported to be a movement on foot here looking to the construction of sewers.

Santa Monica, Cal.—The City Council is said to be investigating the plan of the Bd. of Trade, for a sewage disposal system.

Denver, Colo.—The following are the bids opened on Sept. 11 by the Bd. of Pub. Works (J. B. Hunter, Ch. Engr.) for constructing sewers (bidders all of Denver):
*Sanitary sewer system in Sub-Dist. 8 of the East Side Sanitary Sewer Dist. 1: National Constr. Co., $111,363 (awarded contract). Denver & Pueblo Constr. Co., $124,440; Gaffy & Keefe Constr. Co., $144,816.
*Morgan's Capitol Hill special sanitary sewer system: Denver & Pueblo Constr. Co., $3,232 (awarded contract); Terrance Connoly, $3,421; National Constr. Co., $3,578.

East St. Louis, Ill.—Chas. S. Lambert, City Clk., writes that a sewerage system costing about $780,000 is to be constructed. W. I. Crocken, City Hall, is the engr. in charge. Silas Cook, Mayor.

Terre Haute, Ind.—The Council, it is stated, has passed an ordinance appropriating $33,050 to construct sewers in portions of numerous streets.

Indianapolis, Ind.—Plans are being prepared in the office of the City Engr. for a new sewer, to drain the section of the city between the Belt R. R. and Brookside Park, north and south, and west of the Laycock factory. It will be a continuation of the Brookside Ave. sewer, and will run in Brookside Ave. from Rural to 20th St., and in 20th from Rural E. to Olney St. It will be about 2,800 ft. in length and will vary in size from 15 to 20-in. Provision will be made for future branches, north and south, from the main trunk.

Cedar Rapids, Ia.—Bids will be received until Sept. 30 for constructing a 3-ring brick sewer on 21st and 12th Aves., W., 84 in. diam.; estimated at 2,550 lin. ft. of 7 in. 3-ring brick. T. R. Warriner, City Engr.

Clear Lake, Ia.—Burns & McDonnell, Scarritt Bldg., Kansas City, Mo., are preparing plans and specifications for sanitary sewers to include septic tanks.

Wellington, Kan.—The City Council has employed H. A. Rowland, of McPherson, Kan., to prepare plans for a system of sanitary sewers.

Louisville, Ky.—It is stated that instruction has been given to J. B. F. Breed, Ch. Engr., and Harrison P. Eddy, of Boston, Mass., Consulting Engr., of the Sewer Comn., to begin work on the plans and specifications for the southern outlet sewer, and at the same time to make preparations for the plans of the Bluegrass Creek interceptor. It is reported that it is expected that plans will be completed in a few weeks and bids for construction asked.

Salem, Mass.—Bids will be received until Oct. 2 by the Sewerage Comrs (Thos. G. Pinnock, Chmn.) for constructing Sec. 1, 2, 3 and 4 of South Salem trunk sewer with brick, or reinforced concrete masonry, requiring about 6,913 lin. ft. 34, 36, 38, 42 and 48-in. sewer.

Milan, Mich.—See "Water."

Ann Arbor, Mich.—It is reported that the Bd. Pub. Wks. has directed that estimates be prepared for sewers to be constructed in certain streets.

Houghton, Mich.—The City Council is reported to have granted the petition of the residents on Clark St. for a sewer to be constructed from the main sewer on Florence St.

Eveleth, Minn.—The City Council is reported to be considering the installation of a storm and sanitary sewer system, to cost about $21,000.

**Two Harbors, Minn.*—Thomas & McCoy, of Duluth, are reported to have secured the contract for constructing the North Two Harbors sewer, at $6,470, and the East Two Harbors sewer at $14,994.

Columbia, Miss.—See "Water."

Canton, Miss.—The Bd. of Aldermen has decided on the temporary postponement of the date for opening bids for constructing the sewer system, owing to delay in closing sale of bonds. Bids for this work were to have been opened on Sept. 19, and called for furnishing material and constructing system of house sewers complete, approximately 7 miles of 18 to 6-in. pipe sewer. O. S. Miller, Mayor. Engineer, Walter G. Kirkpatrick, of Jackson.

Carthage, Mo.—Bids will be received until Oct. 14 for furnishing material and constructing complete 3,258 ft. of 8-in. and 410 ft. 10-in. sewers, with manholes, flushtanks, etc., as advertised in The Engineering Record. Wm. Kohlman, City Engr.

Monett, Mo.—Bids will be received by D. S. Breese, City Clk., until Sept 24 for furnishing material and constructing a system of sewers. Burns & McDonnell, Engrs., 823 Scarritt Bldg., Kansas City.

Bozeman, Mont.—C. M. Thorpe, City Engr., writes that the lowest bid opened on Sept. 5 for constructing pipe sewers was submitted by E. T. Rich, of Bozeman, at the following bid: 250 ft. 6-in. vitr. sewer pipe, 78 cts.; 4,105 ft. 8-in., $1.02; 4,835 ft. 10-in. $1.05; 2,605 ft. 12-in., $1.14; 6,100 ft. 15-in., $1.22; 35 manholes, $78; 1 combined manhole and flush tank, $160; and concrete, $8 per cu. yd.; total, $19,861. C. Lundwall, of Bozeman bid for this work $20,465.

Humboldt, Neb.—M. N. Blair, of Falls City, Neb., is reported to have been engaged to make a preliminary survey and estimates of the cost of constructing a sanitary sewer system. An election is to be held on the question of its construction.

Omaha, Neb.—The City Council is reported to have on Sept. 9 approved the ordinance providing for a special election to vote on issuing $49,000 sewer bonds and $50,000 intersection paving bonds.
The lowest bid recently received for the North Omaha sewer outlet is stated to have been submitted by H. P. Jensen, of Omaha. Contract for same has not yet been let.

Stanwick, N. J.—The residents are reported to be planning the construction of sewers.

Ft. Lee, N. J.—The State Sewerage Comn. is reported to have approved the revised plans of Engineer Eckerson for the proposed sewerage system and bids will probably be called for at once.

Plainfield, N. J.—Bids will be received, it is stated, until Oct. 7, by Common Council for $68,000 of sewer improvement bonds.

**Kingston, N. Y.*—The contract for constructing a portion of an intercepting sewer in the City of Kingston, to consist of about 5,500 cu. yds. earth excav.; 350 cu. yds. rock excav.; 4,813 lin. ft. 24-in. vitr. pipe, 77 lin. ft. 24-in. c. i. pipe; 19 manholes, cutting through bulkhead at outfall, cleaning up, etc. (bids opened by the Bd. Water Supply at the office of Thos. Hassett, Secy., 299 Bway., New York, N. Y., on Sept. 3) has been awarded to the Haggerty Contr. Co., 215 W. 125th St., N. Y. City, for about $14,568.

New York, N. Y.—Bids will be received until Sept. 27 by Henry S. Thompson, Acting Boro. Pres. and Comr. Pub. Wks., Boro. Manhattan, for regulating paving and repaving portions of Edgecombe and Bradhurst Aves., Trinity, Manhattan and Clevland Pl., Ann, Gold, Greene, Pearl, Mercer, Water, Wooster, W. 36th, W. 37th, Church, Great Jones, Bond, Washington, W. 13th, E. 6th, E. 8th, W. 11th, W. 92d, E. 105th, Cannon, Attorney, Ridge, Pitt, Willett, Sheriff, Columbia, William, W. 137th, W. 156th, W. 157th, W. 158th, W. 159th, W. 160th, W. 201st, W. 202d and W. 134th Sts. Engineer's estimate: 30,490 sq. yds. wood blk. pavt.; 20,065 sq. yds. asphalt pavt., including binder course; 30,960 sq. yds. asphalt blk. pavt.; 38,140 sq. yds. granite blk. pavt., with paving cement joints; 77,931 sq. yds. old stone blocks, to be purchased by the contractor and removed by him; 21,325 cu. yds. concrete. 46,164 lin. ft. new bluestone curb, furnished and set; 9,789 lin. ft. old bluestone curb, redressed, rejointed and reset; 196 new sewer manhole heads and covers, furnished and set; 98 new water manhole heads and covers, furnished and set; 8,500 sq. ft. new granite bridgestone, furnished and laid.

Long Island City, L. I., N. Y.—Bids will be received until Sept. 30 by Jos. Bermel, Boro Pres., for regulating grading, curbing and laying sidewalks on Clark and William Sts., 12th and Jamaica Aves. Engineer's estimate: 24,384 cu. yds. earth excav.; 9,655 lin. ft. concrete curb; 44,910 sq. ft. new flagstones; 5,116 sq. ft. new Bluestone bridging, etc.

**Gastonia, N. C.*—The Atlantic Bitulithic Co., of Richmond, Va., has been awarded a 10,000-sq. yd. contract for bitulithic.

**Items marked thus give the names of parties awarded contracts.*

Charlotte, N. C.—A contract for 44,000 sq. yds. of bitulithic has been awarded the Atlantic Bitulithic Co., of Richmond, Va.

Durham, N. C.—Bids will be received until Oct. 1 by the Bd. of Co. Comrs., at Durham, for building about 11½ miles of macadam road. Approximate quantities: 60,000 sq. yds. 6-in. macadam; 75,000 cu. yds. excav., together with the necessary pipe and reinforced concrete drains, as advertised in The Engineering Record.

Cleveland, O.—Bids will be received until Oct. 5 by the Bd. Co. Comrs., (Julius C. Dorn, Clk.), for the completion of Miles Ave. improvement. A. B. Lee, Co. Engr.

**Portsmouth, O.*—The contract to pave Lincoln St. (bids opened Sept. 4) has been awarded to Kelley Bros., of Portmouth, at $11,765, and the contract to pave Prospect St. to Saml. Monroe & Son, of Portsmouth, at $2,160. R. A. Bryan, Engr., Street Paving Dept.

Toledo, O.—It is stated that the County Comrs. are asking for bids for the macadamizing of Sylvania Ave.; estimated cost, $6,627.

Napoleon, O.—It is reported that bids will be received by the Bd. Co. Comrs. (H. Rothes, Chmn.) until Sept. 27 for constructing roads.

University Heights, O.—Bids will be received until Sept. 25 by the Bd. Town Trus. (R. W. Hostetler, Chmn.) for grading and graveling portions of Bowman, Edward and Otterbein aves.

Malta, O.—Bids will be received by the City Clk. until Sept. 27 for paving and curbing a portion of Main St. Engineer, Paul R. Murray, of New Philadelphia, O.

Bergholz, O.—R. H. Lee, Engr., Carrollton, writes that the Trus. of Springfield Township (W. A. Taylor, Clk.) rejected all bids received Sept. 5 for constructing about 5 miles of macadam road in Springfield Township, and new bids will be received Sept. 25.

Greenville, O.—See "Miscellaneous."

Celina, O.—It is stated that bids will be received until Sept. 23 for $5,525 bonds for improving Market St. C. W. Rish, City Clk.

**Salem, Ore.*—The Warren Constr. Co., of Portland, Ore., will construct 9,277 sq. yds. of bitulithic.

**Portland, Ore.*—A contract for 16,997 sq. yds. of bitulithic has been awarded to the Warren Constr. Co., of Portland, Ore., and another of 25,814 sq. yds. to the Pacific Bridge Co.

Philadelphia, Pa.—Plans are stated to have been approved by the Comrs. of Fairmount Park for the driveway in Fairmount Park between Germantown Ave. and Cresheim Drive: estimated cost, $48,000.

Local press reports state that bids will be received until Sept. 24 by Geo. R. Stearns, Dir. Dept. Pub. Wks., for paving about 25 miles of new streets. Of the 25 miles to be paved about 16 miles will consist of asphalt, estimated to cost $500,000, while the rest of the work, estimated to cost $250,000, will be partly vitrified fireclay or shale bricks or blocks upon cement concrete foundations, or granite, Pennsylvania or Lambertville blocks upon like foundations.

**Claysville, Pa.*—The City Council is reported to have awarded the contract for paving Wayne St. to Hallam Constr. Co., of Washington, for $9,285.

Harrisburg, Pa.—Bids will be received until Oct. 3 by Jos. W. Hunter, State Highway Comr., for constructing 5,280 ft. in Londonderry Township, Dauphin Co.

Ft. Adams, R. I.—Bids will be received until Oct. 1 by Capt. Willis Metcalf, Constr. Q. M., U. S. A., 209 Thames St., Newport, R. I., for repairs of roads and construction of gutters, catch basins, curbs, cement walks and brick road crossings at Fort Adams, R. I.

Clinton, Tenn.—It is stated that bids will be received by J. K. P. Wallace, Chmn. Anderson County Pike Comn., until Oct. 5, for the purchase of $100,000 road bonds.

Sweetwater, Tenn.—See "Water."

Ft. Sam Houston, Tex.—Bids will be received until Oct. 1 by L. J. Fleming, Const. Q. M., U. S. A., for grading, construction of roads and walks, etc., around new hospital, Ft. Sam Houston.

Culpeper, Va.—The Comrs. of Culpeper County are reported to have voted to issue $100,000 bonds and are in the market for road machinery. Address J. C. Bell, of Culpeper.

Seattle, Wash.—See "Sewerage and Sewage Disposal."

Chehalis, Wash.—It is stated that about $35,000 will be expended for macadamizing several streets in Chehalis.

Kenosha, Wis.—It is reported that bids will be received until Oct. 7 at the office of Jas. Gorman, City Clk., for grading and paving with brick Grand Ave., about 25,000 sq. yds.

Milwaukee, Wis.—The Barber Asphalt Paving Co. is stated to have secured the contract for resurfacing with asphalt portions of 3d and W. Water Sts., at $2.23½ per sq. yd., or a total of $15,247.

Milwaukee, Wis.—C. J. Poetsch, City Engr., writes that all bids opened on Sept. 17 for paving 12th St. and Teutonia Ave. have been rejected. It is reported that about 23,000 sq. yds. of pavement will be required.

**Toronto, Ont.*—The Warren Bituminous Paving Co., of Toronto, has been awarded a contract for 12,147 sq. yds. of bitulithic.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Magnolia, Ark.—The plant of the Magnolia Ice & Electric Light Co. is reported to have been destroyed by fire on Sept. 9.

Ashdown, Ark.—T. C. Ambrey, of Verda, La., is reported interested in the construction of a lighting and ice plant.

Oakland, Cal.—It is reported that the Great Western Power Co. (Edwin Hawley, Pres.) will establish on Oakland estuary an auxiliary electric generating plant. The adopted plans contemplate a building 250x100 ft. It is proposed to install turbine generators of 5,000 h.p. ea., besides the necessary steam generating plant. It is reported that contracts have been let for turbine generators, boilers and all necessary machinery.

San Francisco, Cal.—F. A. Healy has petitioned the Bd. of Supervisors for a franchise to lay pipes and install a hot water heating system throughout the city.

Fresno, Cal.—The Fresno Home Light & Power Co. is reported to have petitioned the City Trus. for a franchise.

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Sept. 24, to furnish at the navy yards and naval stations the following supplies: Pensacola, Fla. Sch. 287—Portland and Rosendale lime cement, gravel, brick, metallic shingles, ridge coping, yellow pine, tin, etc., sewer and c. i. pipe and specials, centrifugal pumps, c. i. valves, manhole frames. Sch. 288—Twist drills, tool steel. Norfolk, Va., Sch. 268—Sensitive mill, vertical boring and turning mill. Sch. 304—Vises. Sch. 305—Yellow pine. Sch. 306—Sheet lead, galvanized steel plates, steel plates, billets, angles, channels and bars. Sch. 308—Terra-cotta pipe, iron pipe and fittings. Sch. 309—Gravel, steam dry rooms. Boston, Mass., Sch. 300—Induction motor. Charleston, S. C., Sch. 300—Motor drive. Sch. 302—Copper wire, electrical supplies. Sch. 306—Bar Iron, galvanized sheet steel. Sch. 308—Brass and iron pipe, pipe fittings, cocks, valves. Naval Academy, Annapolis, Md., Sch. 306—Bar iron, tool steel. Sch. 308—Brass flush pipes, soil pipe, iron pipe, pipe fittings, expansion joints. New York, N. Y., Sch. 268—Steam hammer, lift drop hammer, trimming press. Sch. 295—C. i. pipe, gate valves, etc. Sch. 296—Electrical conductor, leyden jars, dry cells, receiver sets, insulators. Sch. 297—Small tool machines, brass rod, rolled bronze, steel bar, pipe fittings. Sch. 299—Junction boxes, electrical conductor. Sch. 301—Brass tubes, valves, copper tubing. Sch. 302—Electrical conductor, brass and steel conduit, interior fittings. Sch. 306—Sheet brass and copper, tool steel. Newport, R. I., etc., Sch. 265—Constructing ferry slips. Sch. 269—Heating and ventilating. Sch. 299—Gyro testing, stands, wire rope, iron pipe and fittings. Sch. 306—Copper rod. New Orleans, La., Sch. 287—Yellow pine, cypress, etc. Portsmouth, N. H., Sch. 205—2 steel plate fans. League Island, Pa., Sch. 295—Bolts, etc., yellow pine, oak and yellow pine piles. Washington, D. C., etc., Sch. 267—Gun boring and turning lathe. Sch. 299—Brick, sand, Portland cement, broken stone, granite tailings, armature coils, electrical supplies, steel rivets, gear wheels and pinions, ash, steel shapes, plates and castings. Sch. 306—Sheet copper, machine and high-speed steel. Applications for proposals should designate the schedules desired by number. E. B. ROGERS, Paymaster General, U. S. N.

Walter C. Allen, Electrical Engr. of the District, submitted to the Comrs. on Sept. 13 the annual estimates for his department for the next fiscal year, asking $259,000 for lights, etc. an increase of $5,000; $124,350 for electric lighting, an increase of $17,850; $5,000 for 27 additional fire alarm boxes; $1,700 for repairing fire alarm boxes; $75,000 for replacing the present paper insulated underground fire alarm cables with rubber cables; $3,000 for cost of increasing the small tapper fire alarm circuits from 4 to 10; $13,000 for purchasing and erecting insulated wires and cables to replace present bare copper wires used in fire alarm circuits; $13,000 for the purchase of 65 additional fire alarm boxes, etc.

Pensacola, Fla.—See "Miscellaneous."

Punta Gorda, Fla.—The citizens have voted to issue bonds for an electric light plant.

Savannah, Ga.—Bids will be received until Oct. 15 by the Com. on Streets and Lanes (Harry Willink, Dir.) for the illumination by electric arc and incandescent lamps of the streets of this city, and for sale to the city of electric current, to be used for illumination, heat or power.

Americus, Ga.—See "Electric Railways."

Crawfordsville, Ind.—It is reported that the Co. Comrs. will receive bids until Oct. 5 for installing a lighting plant at the Co. Asylum. B. F. Cormm, Co. Aud.

Evansville, Ind.—The Co. Bd., it is reported has ordered estimates to be prepared for lighting the county infirmary with electricity.

Phillips, Ind. Ter.—The power plant of the Coalgate, Lehigh & Phillips Electric, Ice & Traction Co., located at Phillips, is reported to have been destroyed by fire on Sept. 7. H. C. Sprinkle, of Phillips, is president.

Dubuque, Ia.—The Peterson Heat, Light and Water Co., of Des Moines, is reported to be seeking a franchise here for a heat distributing system.

Davenport, Ia.—F. H. Griggs, of Davenport, is reported interested in the construction of a water power plant on Mississippi River above Davenport.

Prairie City, Ia.—The citizens are stated to have voted in favor of installing a system of lights.

Louisville, Ky.—Bids will be received until Sept. 27 by the Bd. Pub. Wks. (Roger G. McGrath, Secy.) for new power plant and steam heating apparatus in City Hall annex and old engine house, and remodeling apparatus in old City Hall.

Greenville, Ky.—The Greenville Light & Water Co. is reported organized, with a capital of $35,000, to furnish light and water. J. A. Gilman, Engr.

Berrien Springs, Mich.—The citizens are reported to have voted to issue $17,000 water and lighting bonds.

**Marshall, Minn.*—The contract for the construction of the municipal electric light plant has been awarded to J. G. Robertson & Co., of St. Paul. The equipment will consist of 2 200-kw. 3-phase 60-cycle 2,300-volt alternating-current generator, made by the Ft. Wayne Electric Works; a 325-h. p. Ideal and Lane & Bodley engines, and Brownell boilers of 400 h. p. E. Simmons is Supt.

Minneapolis, Minn.—Bids will be received until Sept. 24 by the Bd. Charities and Corrections (Rich'd Tattersfield, Secy.) for the installation of electric wiring for the city workhouse. L. A. Lamoreaux, Archt., 51 Lumber Exchange.

Oxford, Miss.—The Trus. of the University of Mississippi are reported to have decided to rebuild power house and electric light plant recently reported burned.

Meadville, Mo.—J. D. Dunn, of Meadville, writes that nothing definite has yet been done toward the construction of an electric light plant.

Campbell, Mo.—A. C. Morse, proprietor of the Campbell electric light plant, is contemplating installing a 150-kw. alternator, a 150-h. p. Corliss engine, a tubular boiler of 150 h. p. and a 10-ton ice plant, and is also contemplating extending the lines to Piggott, Ark., to furnish electricity for street and general lighting purposes.

Maryville, Mo.—The citizens are stated to have voted in favor of permitting the city to grant a 20-year franchise to the Maryville Electric Light & Power Co., also permitting the city to contract for street lighting for a period of 5 years.

Windsor, Mo.—It is reported that the plant and franchise of the Windsor Electric Light & Power Co. has been sold to Messrs. Garver and Roberts, of Neosho, Mo.

Linwood, N. J.—Jas. Farish, Boro. Clk., writes that an ordinance has been passed by the Council containing an agreement with the Pleasantville Electric Co. to light the Boro. for a period of 5 yrs. at $1,500 per yr. Contract has not yet been signed.

Atlantic City, N. J.—It is stated that the Council has granted the petition of the business men of Atlantic Ave. to light the streets with an incandescent lighting system from New Jersey to Florida Aves. The cost is estimated at $12,000.

New York, N. Y.—Bids will be received by Jas. W. Stevenson, Com. Bridges, until Sept. 26 for the construction and electrical equipment of subway station tracks and electrical equipment of elevated railway tracks of Williamsburg (new East River) Bridge, over East River, bet. Manhattan and Brooklyn Boroughs.

Bids will be received until Sept. 30 By C. B. J. Snyder, Supt. School Bldgs., for installing electric equipment in addition to and alterations in School 59, Boro. Manhattan.

Long Acre Electric Light & Power Co. has obtained from John H. O'Brien, Comr. of Water Supply, Gas & Electricity, permission to lay its wires throughout Manhattan and Bronx Boroughs.

Syracuse, N. Y.—The Syracuse Lighting Comn., appointed by Mayor A. C. Fobes, to investigate the lighting situation as affecting the city and consumers of gas and electricity, advised against municipal ownership of a lighting plant at the present time, but recommends that steps be taken to secure authority for the erection of a plant for lighting streets, parks and public buildings, subject to approval of voters; the Commission also favors the construction of a municipal subway system. Prof. Delmar E. Hawkin, Secy. of Comn.

Flushing, L. I., N. Y.—See "Schools."

Troy, O.—It is reported that bids are wanted until Sept. 30 for $28,000 electric lighting bonds. Chas. F. Rannalls, City Aud.

Rawson, O.—It is reported that the question of municipal lighting is to be agitated.

Marshfield, Ore.—The Coos Bay Gas and Electric Co. is planning to increase the capacity of its plant and will soon instal four 100-hp. boilers, one 650-hp. simplex Corliss heavy duty engine, a 450-kw. 3-phase 60-cycle alternating-current dynamo and a direct-current generator of 250-kw. capacity. The company will also be in the market for 2 street cars and equipment, and a number of alternating-current meters and transformers. Seymour H. Bell, Mgr.

**Philadelphia, Pa.*—John R. Wiggins & Co., 721 Heed Bldg., Contractors, have been granted a permit to build for the Philadelphia Electric Co. a 2-story transforming station on Filbert St., west of 30th St. It will be 30x60 ft., of brick and stone, and cost $15,000. John T. Windrim, Archt., Commonwealth Bldg.

**Hammonton, Pa.*—The Town Council has made a 5-year cotnract with the Hammonton Electric Light Co. and the Hammonton & Egg Harbor City Gas Co. to light the streets of the town.

Womelsdorf, Pa.—W. W. Lengel, Boro Secy., writes that the citizens on Sept. 13 voted to issue bonds for the construction of a municipal electric light plant. Engineer, F. W. Darlington, 1140 Real Estate Trust Bldg., Philadelphia.

Pittsburg, Pa.—The Bureau of Building Inspection has granted to the Convent of Mercy a permit to erect a 2-story brick power house on 5th Ave., 14th Ward, to cost $25,000.

Panama.—Bids will be received at the office of H. F. Hodges, General Purchasing Officer, Isthmian Canal Comn., Washington, D. C., until Oct. 14, for automatic fire alarm telegraph systems, marine electric fixtures, batteries, dynamite and blasting material, wire, hoisting engines, shop machines, wrought iron pipe, etc., as advertised in The Engineering Record.

**Spartanburg, S. C.*—C. R. Willard & Co., of Spartanburg, is reported to have secured the contract for two dams for hydro-electric power development, one to be constructed at Ware Shoals, at a cost of about $75,000, the other at Brown's Mills, to cost about $50,000.

Bristol, Va.-Tenn.—Both the municipalities of Bristol are reported to have granted a franchise to an electric distributing company as a means of putting into effect the proposition of New York capitalists to spend $600,000 in developing the Holston River water power in order to supply Bristol with electricity for lighting and manufacturing purposes.

Amarillo, Tex.—The citizens, it is reported, will vote on the issuing of bonds for a municipal light and water plant.

Murray, Utah.—The Progress Co., of Murray, is reported to have filed a petition with the State Engineer for 60 ft. of water to be diverted from the big Cottonwood. It will be used to operate a turbine for the generation of 350 h.p. for the Murray electrical system.

Roanoke, Va.—The Rural Power Co. (P. B. Huff, Pres.), it is stated, will develop power plants in the county. Capital, $5,000.

Tacoma, Wash.—The City Council is reported to have on Sept. 4 rejected the bid of Geo. Milton Savage for the building of the upper Nisqually River power plant, at a cost of $1,750,000.

Antigo, Wis.—Thos. Orbison, of Appleton, is reported to be preparing plans for the development of the water power at Gardiner, on Wolf River. From 3,000 to 5,000 h.p. is available. Henry Sherry, of Neenah, is reported interested.

**Items marked thus give the names of parties awarded contracts.*

London, Ont.—O. Ellwood, Secy., writes that John M. Moore, C. E., of London, is the engr. in charge of the water system and power plant which it is proposed to install here at a cost of about $575,000. Date of opening bids for construction has not yet been decided upon.

Toronto, Ont.—A building permit has been granted for the erection of a brick boiler house, condenser house and smokestack to the Consumers' Gas Co.; cost of work, $60,000.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Decatur, Ala.—It is stated that the North Alabama Traction Co., John F. Knowlen, Ch. Engr., New Decatur, will build an extension to its lines in Decatur of about a half mile and work will commence soon. It is said that the company will spend $10,000 in Decatur on its lines within the next few months.

Wilmington, Cal.—Henry E. Huntington is stated to have been granted the right to occupy and cross certain streets in Wilmington, thus enabling the Pacific Electric Co. to build a double track along the shore of the west basin from Wilmington to a connection with the Interurban San Pedro line.

Vallejo, Cal.—The Vallejo & Northern Ry. Co., incorporated to build a road from Vallejo to Sacramento, is reported to have obtained its franchise from Vallejo.

Hanford, Cal.—F. S. Granger is stated to have applied to the Bd. of City Trustees for a street railway franchise.

San Diego, Cal.—The South Park & East Side R. R. Co. is stated to have filed petitions for the extension of its line on 4th St. through the northern and northeastern portion of this city. The franchise asked is for a line 6 miles long.

Concord, Cal.—It is stated that A. W. Maltby, of Concord, is working on a project to construct an electric railway from the terminus of the Key Route at Claremont through the Berkeley Hills to Lafayette, Walnut Creek, Concord, and Antioch.

Norwich, Conn.—The Norwich, Colchester & Hartford Traction Co. is reported organized, with Costello Lippitt as president; Lucian Brown, secretary, and Henry W. Tibbits, treasurer, all of Norwich. The company has a charter to construct a steel railway between Norwich and Hartford. Capital, $1,000,000. The length of the proposed line is 38 miles.

*Bristol, Conn.—The Bristol & Plainville Tramway Co. is stated to have awarded to W. W. Crothers a contract for the erection of an addition to its power plant in Highland Court. The extension will be 42x30 ft. and 2 stories high.

Americus, Ga.—The Secy. of State is said to have issued a charter to the American Ry. & Power Co., which will build 4 miles of street car line, put in a thoroughly up-to-date lighting plant and, in addition, will pump water for the city for the next 20 years. W. A. Dodson, A. and J. F. Lewis, of Valdosta, incorporators. Capital, $250,000.

Boise, Idaho.—The Boise & Interurban R. Co., it is reported, has decided to double track its line as far as the Pierce Park, nearly 4 miles, and the erection of a depot in Boise.

Danville, Ill.—The Secretary of State is stated to have issued a license to incorporate the Danville & Southern Ry. Co. Capital, $10,000. It is proposed to construct the main line from Danville to a point in the southwest corner of Georgetown Township, Vermillion County. Incorporators W. H. Carnahan, B. E. Bramble.

Quincy, Ill.—The St Louis, Terre Haute & Quincy Traction Co. is reported to have announced that it is their intention to construct from Terre Haute to St. Louis by connections at Marshall and building southwest from there, paralleling the Vandalia system to Pocahontas, and running directly west to Edwardsville. Connections and traffic arrangements are to be made for entrance into St Louis by the McKinley system and the new bridge. Leaving Quincy, branch lines will be built from Pittsfield to Hannibal, and from Hannibal to Louisiana. The total mileage in the proposition reaches 452 miles. The company is capitalized for $2,000,000, and the cost of construction and equipment will not exceed $1,500,000, it is said.

Evansville, Ind.—It is reported that Nathan P. Carter, of the Grand Central Traction Co., is seeking a franchise to enter Evansville with a line from Indianapolis to Evansville by way of Terre Haute.

Anderson, Ind.—It is stated that the Indiana Union Traction Co., H. A. Nicholl, Gen. Mgr., will expend $40,000 in the construction of a bridge over White River at Clusterton, making fills and taking a bad curve out of the line at that point.

Lewiston, Me.—John A. Jones, of Lewiston, has been engaged to make the survey for an electric railway to be constructed from Lewiston to Portland, a distance of about 33 miles. Preliminary surveys are to be commenced at once.

Belvidere, N. J.—It is stated that the Easton-Washington St Ry. Co. will ask the Common Council for a franchise to build its line through Belvidere, from the Oxford Township line to the Delaware River.

Morristown, N. J.—The Morris & Somerset Electric Co. is stated to have received permission to lay rails and street poles and string wires along the county roads through Morristown.

Warsaw, N. Y.—Surveyors for the Rochester, Scottsville & Caledonia Ry. Co. are stated to have completed the preliminary work to Letchworth Park at Portage. They have also completed a survey from Pavilion to Warsaw. It is understood that the line will begin at Rochester, running through private right of way to Scottsville, Caledonia, Le Roy and Pavilion, from which latter place branches will be run to Warsaw, Rock Glen and Perry and Letchworth Park at Glen Iris. Elliott Strathy, Ch. Engr.

*Dunkirk, N. Y.—It is reported that P. R. Colgan, of Dunkirk, and M. V. Ryan have been awarded the contract by the Western New York & Pennsylvania Traction Co. for the excavation for a line between Little Valley and Salamanca, a distance of 4 miles.

Hempstead, N. Y.—The Highway Comrs. of Hempstead are stated to have granted to the South Shore Traction Co. a franchise to build an electric railway from Central Ave. to the town line at Seaford.

Oswego, N. Y.—The Oswego Traction Co. is reported to have been granted a franchise to lay double tracks in E. 4th St.

Hornell, N. Y.—The Canandaigua Southern Electric R. R. Co. is stated to have announced that plans are now under consideration for extending the road from Atlanta to Wayland and thence by way of the Pittsburg & Shawmut line to Hornell, so that the cars will run direct from Canandaigua through to Hornell. In order to carry out this plan the Pittsburg & Shawmut road will be electrified from a point just outside of Wayland, to Hornell, and the cars of the Canandaigua Southern road will be run from Canandaigua through Naples, Cohocton, Atlanta and Wayland to Hornell.

New York, N. Y.—See "Power Plant Gas and Electricity."

Lancaster, O.—The Logan & Athens Constr. Co. is reported to have made application to the State Bd. of Pub. Wks. for a lease of the tow-path of the canal between Lancaster and Nelsonville, a distance of 33 miles, for the construction of an electric railway. The proposed road will connect Lancaster and Athens.

Salem, Ore.—The City Council is stated to have granted to A. Welch a franchise to construct a system of electric railways over certain streets of the city, traversing the city from north to south.

Lancaster, Pa.—It is reported announced that the Lancaster, Oxford & Southern Ry. Co. has decided to convert its line from steam to electricity. It is said that the change will be made when the power dam at McCall's Ferry is completed. W. M. Franklin, Pres.

Hanover, Pa.—The Hanover & McSherrystown St. Ry. Co., R. E. Manley, Gen. Mgr., is stated to have filed notice of the following extensions of route from North and Church Sts., McSherrystown, to Littlestown, via a bridge over Conewago Creek, and on Queen St., Littletown, to the northern and southern boundaries of the town.

RAILROADS.

Notes Arranged Alphabetically by States.

Locust Bayou, Ark.—The Ouachita Valley Ry. Co. is reported to have increased its capital from $25,000 to $100,000 to extend the road from Locust Bayou to a connection with the Little Rock & Southern R. R.

Napa, Cal.—Richard Hotaling, Pres. of the Napa, Lakeport & Richardson Bay R. R. Co., is reported to have disposed of the bonds for the new road to Eastern people, and it is said that within 3 months contracts will be let. The right of way has been acquired and all surveys finished. The marshes and creek near Santa Venetia and a tunnel 2,200 ft. long will be run through Schuetzen Park hill. A drawbridge will be used over Green Brae Creek and a trestle, over a mile in length, will extend from the Lyford property out into the bay.

Hahns Peak, Colo.—The Larimer & Routt County Ry. Co. is reported incorporated, with a capital of $1,000,000 to construct a railroad in both Larimer and Routt Counties, to extend from the terminal point of the Larimer and Hahn's Peak & Pacific Ry., which is on the state line between Colorado and Wyoming, into North Park, terminating near the mouth of Grizzly Creek. Directors, Isaac Van Horn, Holderness, N. H.; M. T. Dickinson, Brookline, Mass.; L. W. Thompson, Woburn, Mass.; George M. Colby, Lawrence, Mass., and others.

Atlanta, Ga.—The Southern Ry. Co. (W. H. Wells, Engr. Constr., Washington, D. C.) is reported to have submitted plans and specifications to contractors for bids for constructing the proposed additional terminal facilities at Atlanta. The plans include a 7-story freight and office building, 800x100 ft., of fireproof construction. Bids are to be submitted about Oct. 10.

Chicago, Ill.—Jacob R. Muhlick & Co., 100 E. Van Buren St., Chicago, have 100,000 cu. yds. of fine wheeler and grader work near Chicago Heights, Ill., on Chicago Southern Ry., to sublet. Will pay from 18 to 20 cts. per yd.

Buffalo, N. Y.—Engineers are reported to be making a survey in Schoharie County for the Buffalo, Rochester & Eastern R. R. (A. D. Robinson, Secy), which was recently incorporated, with a capital of $3,500,000, to build a 4-track line across the state between Troy and Buffalo.

Newburg, N. Y.—Mayor Robinson is reported to be in favor of the abolishment of the grade crossing of the West Shore R. R. ((J. H. Hustis, Gen. Supt., Syracuse) in the South end.

Milwaukee, Wis.—A permit has been granted to the St. Boniface congregation to erect a 2-story brick and stone school on 12th and Clarke Sts., to cost about $21,000.

Manitowoc, Wis.—Bids will be received until Sept. 25 by Herbert L. Markham, Clk. Joint School Dist. No. 1, for furnishing material and erecting a 6-room addition to the Luling School in the 6th Ward. C. H. Tegen, Archt.

Selkirk, Man.—It is reported that the School Bd. has decided to erect a school at a cost of $11,000.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Ashdown, Ark.—See "Power Plants, Gas and Electricity."

Los Angeles, Cal.—Specifications are on file at the office of The Engineering Record, 114 Liberty St., New York, N. Y., for the necessary machinery for the equipment of a Portland cement plant of a daily capacity of 1,000 bbls. of manufactured cement, consisting of 3 rotary kilns, crushers, pulverizers, dryers, conveyors, elevators, car pulleys and shafting, silex mill linings and flint pebbles, etc., bids for which will be received at the office of the Bd. of Pub. Wks. until Oct. 7. Horace B. Ferris, Secy., W. R. Ormsby, Acting Purchasing Agent.

Pensacola, Fla.—See "Miscellaneous."

Streator, Ill.—A. Brandes, of Chicago, is reported to have decided to construct a cold storage and ice plant in Streator, to cost about $75,000.

Chicago, Ill.—The Johnson & Jennings Co. are reported to have secured a site on 37th and Morgan Sts., on which it is proposed erecting a factory and warehouse, to cost about $100,000.

Evansville, Ind.—It is stated that the Peerless Seat & Tank Co. has authorized Harris & Shopbell, 123 W. 4th St., to prepare plans for a 3-story, 50x100-ft. brick addition to the plant.

Elkhort, Ind.—The Sterling Hudson Whip Co., it is reported, has ordered plans prepared for a factory and a number of tenements to be erected in this city. The factory is to be 3 stories, 60x300 ft.

Des Moines, Ia.—J. C. Wisegates, of Streator, Ill., it is stated, is interested in a company which proposes erecting a glass factory here. Capital, $25,000.

Danbury, Ia.—Godfrey Durst is reported to be contemplating the installing of a concrete wheel house at his mill.

Sioux City, Ia.—It is reported that Frank Koucher, of St. Joseph, Mo., has the contract to erect an elevator and reinforced concrete warehouse for the Sioux City Seed & Nursery Co.

Wiley, Kan.—The Holly Sugar Co. is stated to have increased its capital stock from $1,500,000 to $5,500,000 for the purpose of erecting a sugar factory here.

**Baltimore, Md.*—The Engineering-Contracting Co., it is stated, has secured the contract to erect a storage and bottling plant for the Jos. Schlitz Brewing Co. on Eutaw St., to be 2 stories high, 124x140 ft., and cost $40,000.

**Pittsfield, Mass.*—The contract to erect the annealing building for the Stanley Electric Co., is reported to have been awarded to Beckwith & Pike, of Pittsfield. The building is to be of brick, steel construction, 2 stories high, 120x120 ft. and cost about $30,000.

Campbell, Mo.—See "Power Plants, Gas and Electricity."

Springfield, Mo.—The Pabst Brewing Co., of Milwaukee, Wis., it is stated, will erect a plant here, consisting of a cold storage plant, ice plant and offices and stables. W. C. Farmer is the company's local agent.

Hazen, Nev.—The Western Ore Purchasing Co., it is stated, intends rebuilding its plant in Hazen instead of Reno, where the plant was destroyed by fire.

**High Bridge, N. J.*—Doyle & Co., of Philadelphia, Pa., are reported to have been awarded the contract to erect a plant for the Taylor Iron & Steel Co. at High Bridge. The plant will consist of 3 brick and concrete buildings, a machine shop 126x112 ft., a fitting shop 115x100 ft., with a wing 28x100 ft. and a foundry 50x365 ft., with a wing 50x60 ft.

**Camden, N. J.*—We are informed that the General Fireproofing Co., of Youngstown, O., has been awarded the contract to furnish and erect pin-connected girder frames and cold twisted lug bars as reinforcement for the 2 new reinforced-concrete buildings for the Victor Talking Machine Co., at Camden, N. J. One structure is a 6-story factory building, 132x90 ft., and the other a power house, 1 story and basement, 173x70 ft. The contract includes the furnishing and the erecting in forms ready for concreting. The general contractor is J. S.

**Items marked thus give the names of parties awarded contracts.*

Rogers & Co., of Stanwick, N. J.; Ballinger & Perrott, of Philadelphia, Pa., are the archts.; and Jay H. Whitham, of Philadelphia, Pa., the engineer.

Buffalo, N. Y.—According to reports, the Marshall Milling Co., of Boston, Mass., has secured a site on Military Road on which it intends erecting a 3-story, 340x85-ft. flour and feed mill, to cost $50,000.

Martins Ferry, O.—The La Belle Box Co., in which H. P. McIlrath is reported interested, it is stated, intends erecting a box factory here.

Portland, Ore.—It is stated that plans have been prepared by MacNaughton, Raymond & Lawrence for a plant for the Columbia Steel Co. in West St. John. The plant is to consist of 5 buildings and is to cost about $75,000.

Philadelphia, Pa.—Harrison C. Rea, 1815 Francis St., is stated to have been granted a permit to erect a $100,000 factory for the Theobald & Oppenheimer Co., at 4th and Cambria Sts. The building is to be of brick and stone, 5 stories high, 168x112 ft. Chas. Balderston, 411 Walnut St., is the archt.

Superior, Wis.—The Soo Line (Thos. Green, Ch. Engr., Minneapolis, Minn.), it is stated, proposes erecting a grain elevator in this city to have several million bushels capacity.

Edmonton, Alta.—The Railway Paint Co., it is stated, is planning the erection of a paint factory here, to cost about $100,000.

**London, Ont.*—John Hayman is reported to have secured the contract to erect a $50,000 addition to the car shops.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Oakland, Cal.—The Garbage Com. of the Bd. of Health is stated to have recommended to City Council the purchase of an incinerator.

Hoboken, N. J.—The lowest bid opened on Sept. 11 by the Common Council for the removal of ashes and garbage is stated to have been submitted by Peter A. Poluso, for $9,500.

Washington Barracks, D. C.—Bids will be received until Sept. 30 by Maj. E. Eveleth Winslow, Corps. Engrs., U. S. A., Washington Barracks, for construction of an experimental field searchlight outfit.

Pensacola, Fla.—Lieut. Commander Carter, in charge of yards and docks at Pensacola, has sent recommendations to the Navy Dept. at Washington, D. C., for an expenditure of about $5,000,000 in improvements at the local yard, to include the construction of a stone graving dock, to cost $1,600,000; a breakwater, to cost about $1,000,000, a sea wall, $700,000; a coal plant, $250,000; dredging, $50,000; machinery for central power house, $35,000; machine shop for steam engineering, $115,000; plumbing shop for construction and repair, $70,000; sawmill for construction and repair, $50,000; rigging loft for construction and repair, $15,000; boat shop for construction and repair, $55,000; shop and office building for yards and docks, $100,000; timber storage shed, $10,000; shed for storage of combustible materials, $50,000; yard dispensary and operating room, $25,000; roads and walks, $35,000, and railroad track and equipment, $15,000.

Evanston, Ill.—The Drainage Bd., of Chicago, on Sept. 11, directed the engineering department to begin active work excavating the Evanston auxiliary channel, which is designed to drain the north shore suburbs.

Great Lakes, North Chicago, Ill.—The only bid received and opened at the Bureau of Navigation, Navy Dept., Washington, D. C., on Sept. 17, for furnishing material and grading at the naval training station, Great Lakes, North Chicago, was submitted by the Edwards Bros. Dredging Co., Sault Ste. Marie, Mich., at 81 cts. per cu. yd., same for all excavating or filing necessary. This bid is reported to have been rejected.

South Bend, Ind.—The Bd. Co. Comrs. will receive bids until Sept. 30 for the construction of reinforced concrete culverts. John W. Harbon, Co. Aud.

Crawfordsville, Ind.—The Comrs. of Montgomery Co. are said to have in contemplation the construction of the Pickering ditch, in Franklin Township.

Onawa, Ia.—Bids will be received until Oct. 1 by Bd. Superv. at Onawa for the excavation of the McCandlass Ditch, 280,681 cu. yds., as advertised in The Engineering Record. C. E. Blanchard, Co. Aud.

Sioux City, Ia.—The Otis Elevator Co., of New York, N. Y., submitted a bid recently to the Superv. Archt., Washington, D. C., for installing an elevator in the Post Office at Sioux City, at $5,200.

Rockwell City, Ia.—It is reported that bids will be received until Sept. 24 by B. E. Stonebarker, Co. Aud., for constructing an open ditch and tile drain in Dist. No. 2, requiring 800 ft. open drain and 5,560 ft. tile work.

Clinton, Ia.—The Meridocia Drainage and Levee Dist. is reported to have made arrangements to double the pumping capacity in the levee section of the district, at a cost of about $30,000.

Muscatine, Ia.—Bids will be received until Oct. 8 by A. S. Lawrence, Co. Aud., for the excavation of ditches in Drainage Dist. No. 3, in all about 62,870 cu. yds. of earth excav., and the furnishing in place outlet pipes masonry and gates at cross levee.

Louisville, Ky.—Bids will be received by Capt. H. Burgess, Corps. Engrs., U. S. A., until Oct. 21, for 2 steel barges; also same date for 2 dump scows, both proposals advertised in The Engineering Record.

New Orleans, La.—Bids for erecting a 75-ft. iron flagstaff at Ft. Jackson, La., will be received by Capt. Arthur Cranston, Q. M., U. S. A., New Orleans, until Oct. 7.

Local press reports stated that bids will be received at the office of the Bd. of State Engrs., Room 402, Cotton Exchange Bldg., New Orleans, until Sept. 24, for the construction of the following levee work: Contents approximate only: Arkansas Line to Ashtabula Plantation Levee, East Carroll Parish, 155,000 cu. yds.; Ashtabula Plantation to Pilcher's Landing Levee, East Carroll Parish, 145,000 cu. yds.; Lauderdale Levee, St. James Parish, 70,000 cu. yds.; St. Louis Levee, St. James Parish, 50,000 cu. yds.; Bohemia Levee, Plaquemines Parish, 42,000 cu. yds.; Point Pleasant Levee, Plaquemines Parish, 40,000 cu. yds. and 9,000 lin. ft. revetment; Nestor Canal Levee, Plaquemines Parish, Mississippi River, 15,000 cu. yds.; Dixie Levee, Caddo Parish, 42,000 cu. yds.; Wilson's to Smith's Levee, Rapides Parish, 60,000 cu. yds.

Osterville, Mass.—Frank W. Hodgdon, Ch. Engr., Harbor & Land Comrs., Boston, writes that the contract to widen west Bay cut at Osterville, town of Barnstable (bids received Sept. 6), has been awarded to J. H. Girrich, 247 Atlantic Ave., Boston, at $9,510.

**Medford, Mass.*—The detail bid of Rowe & Perini Constr. Co., of Melrose, the successful bidder for the grading, surfacing and other work at the Middlesex Fells Parkway extension at Medford (bids opened Sept. 3 by the Metropolitan Park Comn. at Boston) is as follows: 30,000 cu. yds. earth grading, 40 cts.; 3,500 cu. yds. rock excav., $1.30; 3,000 cu. yds. rock excav., $1.90; 1,250 lin. ft. 10-in. vit. pipe., 45 cts.; 1,000 lin. ft. 12-in. vit. pipe, 60 cts.. 400 lin. ft. 15-in. vit. pipe, $1.25; 175 lin. ft. 18-in. vit. pipe, $1.60; 400 lin. ft. 24-in. vit. pipe, $2; 2,000 lin. ft. 6-in. pipe underdrain, 30 cts.; 45 concrete catch basins and manholes, ea., $30; 250 sq. yds. cobble stone gutters, 75 cts.; 325 lin. ft. straight edgestone, $1; 450 lin. ft. curved edgestone, $1,50; 4,500 cu. yds. loam surfacing, 30 cts.; 4,000 cu. yds. loam, to be funrished, $1; 8,000 sq. yds. gravel roadway surfacing, 45 cts.; 10,500 sq. yds. broken stone, roadway surfacing, 30 cts.; 3,000 sq. yds. walk surfacing, 30 cts.; one reinforced con. culvert, 6x4x64 ft. 10 in., $900; one reinforced con. culvert, 4x4x137 ft. 9 in., $2,200; totals, $44,230.

**Marshall, Mich.*—John Broombaugh, of Elkhart, Ind., is reported to have secured the contract for building the Nottawa Drain, for $26,000.

Ortonville, Minn.—It is stated that bids will be received by A. L. Bolsta, Co. Aud., Sept. 24, for constructing ditch No. 7. Estimated cost $5,109.

Wheaton, Minn.—It is stated that bids will be received by N. F. Schroeder, Co. Aud., until Sept. 30, for constructing ditch No. 1. Estimated cost, $11,376.

**St. Paul, Minn.*—The State Drainage Bd. (Geo. Ralph, Engr.) is reported to have awarded contracts to Aspin Bros., at the following bid: At 14 cts. a cu. yd. for ditch 47, Marshall County, and 15½ cts. for ditches 48, 49

The Drainage Bd. has signed a petition to the district court of Aitkin County for authority to construct a ditch in that county to be known as ditch No. 58, and a petition to the court of Koochiching County for authority to construct ditches 59 and 60 in that county.

Geo. Ralph, Engr. for the Bd., it is stated, has been instructed to go to Le Sueur County to investigate a petition from residents of that part of the State for improvement of the water course of Straight River.

**Billings, Mont.*—Lyndes & Lockhard, of Forsyth, are stated to have secured the contract to construct the Sanders co-operative ditch, which is to be 16 miles in length.

Asbury Park, N. J.—Bids will be received until Oct. 9 by the Public Grounds Comn. (W. P. Sherman, Sec.), for the building of jetties to protect and build up the beach at Asbury Park.

Buffalo, N. Y.—The following are the bids received Sept. 5 for constructing a pile pier at Jersey St.: Geo. Parks & Sons, 217 15th St., $8,853 including stone filling, $7,353 if stone filling is omitted; A. F. Chapman & Co., 822 Prudential Bldg., $13,700 including stone filling.

New York, N. Y.—Bids will be received by the Park Bd. (Moses Herrman, Pres.) until Sept. 26 for furnishing and delivering 10,000 lin. ft. two-pipe iron fence (No. 1, 1907) for parks, Boro. of Bronx.

Brooklyn, N. Y.—Bids will be received by J. A. Bensal, Comr. of Docks, N. Y. City, until Sept. 27 for furnishing material and building extension to pier bet. 51st St. and 52d St., Boro. Brooklyn, as per contract No. 1,092.

Syracuse, N. Y.—The only bid received and opened recently by the Superv. Archt., Washington, D. C., for installing elevator in the U. S. Post Office at Syracuse, was submitted by the Otis Elevator Co., of New York, city, for $7,980.

Schenectady, N. Y.—The Bd. of Estimate and Apportionment, on Sept. 6, passed a resolution authorizing Corporation Counsel Yates to bring the matter of reconstructing the Villa Road culvert before the Pub. Service Comn. at Albany, the expense to be borne by the N. Y. Central R. R. Co.; probable cost $35,000 to $50,000.

Albany, N. Y.—Bids will be received by F. C. Stevens, Supt. State Bd. of Pub. Wks. until Oct. 17 for improving New York State Canal, Contract 20 Erie Canal. Sect. 2, by dredging channel in Mohawk River and other work between Rexford Flats and Cranes Village, as advertised in The Engineering Record. Length of contract, 18:5 miles.

Troy, N. Y.—See "Public Buildings."

Cleveland, O.—The following are the bids opened on Sept. 10 by Lieut. Col. C. McD. Townsend, Corps. Engrs. U. S. A., for extension of the east breakwater at Cleveland harbor—(a) 75,000 tons large placed stones, per ton; (b) 750,000 tons quarry run stone, per ton; (c) total: Graves & Stephens, Cleveland, O. (a) $1.75, (b) $1.29, (c) $1,098,750; Great Lakes Dredge & Dock Co., Chicago, Ill. (a) $1.53, (b) $1.80, (c) $1,464,750; Sea Coast Construction Co., New York, N. Y., (a) 94 cts., (b) 94 cts., (c) $775,500; The Hunkin Bros. Construction Co., Cleveland, O., (a) $2.50, (b) $1.99, (c) $1,680,000.

Ashtabula, O.—The Lake Shore Ry. Co. is reported to have decided to build a sea wall in connection with the new lake front improvements here. It will be 2,000 ft. long and 950 ft. from the east side of the new slip.

East Cleveland, O.—Bids will be received until Oct. 12 by the Bd. Co. Comrs. (Julius C. Dorn, Clk.), Cleveland, for constructing a culvert on Pitney Rd., East Cleveland. A. B. Lea, Co. Surveyor.

Cincinnati, O.—We are informed that the following are the bids received Sept. 11 by Lieut. Col. Wm. T. Rossell, Corps. Engrs., U. S. A., Cincinnati, O., for work in Ohio River:

Dam in Ohio River at Marietta Island: Knonloch & Shelton, Erie, Pa., $53,205; and John C. Thomas, Bellaire, O., $84,020. The detailed bid of the lowest bidder, Kronlich & Shelton, is as follows: 10,000 cu. yds. excav., 95 cts.; 198 piles, $22; 15,000 lbs. iron tie rods, etc., 8 cts.: 1,200 cu. yds. earth filling, 30 cts.; 3,700 cu. yds. stone, $2.45; 4,000 cu. yds. stone, $1.95; 2,680 cu. yds. concrete, $7.77; 40 barrels extra cement, $2.50.

Dam in Ohio River at Brown's Island: Pennsylvania Contr. Co., Pittsburg, Pa.; 165 cu. yds. excav. ledge rock, $3; 5,400 cu. yds. excav. loose material, 70 cts.. 90 lin. ft. anchor bolt holes, 99 cts.; 110 piles, $16; 8,600 lbs. iron tie rods, etc., 8 cts.; 2,000 cu. yds. stone, $4; 2,100 cu. yds. stone, $4; earth filling (if required), 85 cts.; 2,625 cu. yds. concrete, $11.76; 40 bbls. extra cement, $2.25; total, $54,172.

Dike in Ohio River at Grand Chain, Ill.: Oscar F. Barrett, Cincinnati, O.: 500 cu. yds. stone, $3.80; 9,500 cu. yds. stone, $3; total, $30,250.

Akron, O.—E. McShaffrey & Son, General Contractors, 173 S. Forge St., would like to correspond with parties who would take a contract for sand hauling. There is about 12,000 cu. yds. of sand to be hauled about 1½ miles, either by traction engines or otherwise, and they would like to have the same done this fall or winter.

**Greenville, O.*—It is reported that bids will be received by E. Culbertson, Co. Aud., until Sept 26, for the purchase of $85,000 ditch and road improvement bonds.

Panama.—Bids will be received at the office of F. C. Nordsick, Asst. Purchasing Agt. Panama R. R. Co., 24 State St., New York, N. Y., until Sept. 24, for furnishing steel tie plates

*D. L. Gillespie & Co., of Pittsburg, Pa., is reported to have secured the contract from the U. S. government

**Items marked thus give the names of parties awarded contracts.*

to supply 10,000 m. ft. of dimension lumber for the Panama canal, at a cost of $225.775. The lumber is to be yellow pine and fir.

Panama—See "Power Plants, Gas and Electricity."

Wilkesbarre, Pa.—It is stated that bids will be received by Jas. M. Norris, Co. Controller, until Oct. 2 for building retaining and courtyard walls at new county court house. McCormick & French, Archts., Second National Bank Bldg.

Charleston, S. C.—Bids will be received by Capt. E. R. Stuart, Corps. Engrs. U. S. A., until Oct. 25 for constructing hydraulic dredge, as advertised in The Engineering Record.

Memphis, Tenn.—It is reported that bids will be received until Sept. 30, by E. Bacon, Secy., Drainage Comn. of Tallahatchie County, for construction of a main ditch in Ascalmore Drainage Dist. It will be about 4 miles long, 4 ft. deep and 20 ft. wide.

Galveston, Tex.—It is stated that the government intends constructing a dredge for Galveston, to cost about $400,000, to have a capacity of 25,000 yds. Capt. John C. Oakes, Trust Company Bldg., is in charge of work at Galveston.

The U. S. Engr. Dept. at Washington, D. C., has directed that bids received July 31 for cleaning Guadalupe River from its mouth to Victoria be rejected and has authorized Capt. John C. Oakes to construct a snag boat and do the work by government labor.

*The Bowers Southern Dredging Co., of Galveston, is reported to have recently secured the contract for dredging inland waterway between Aransas Pass and Pass Cavallo (bids for which were received July 31).

Alexandria, Va.—The Otis Elevator Co., of New York, N. Y., bid, Sept. 10 (bids received by the Superv. Archt., Washington, D. C.) for installing an electric passenger elevator in the U. S. Post Office and Custom House at Alexandria, $7,690.

Marinette, Wis.—Bids will be received until Sept. 30 by the Comrs. of the First Drainage Dist. of Marinette Co. at the office of Wm. C. Campbell, Secy. for constructing certain ditches and drains in said Dist., in all approximately 130,000 cu. yds.

Superior, Wis.—The Soo R. R. Co., (Thos. Greene, Ch. Engr., Minneapolis, Minn), is reported to have decided to build a dock on Howard's Pocket, 2,000 ft. long, with a shed 2 stories high; also a passenger dock on the McCord Mill site.

St. John, N. B.—At a meeting of the Bd. of Aldermen and Wm. Pugsley, Minister of Pub. Wks., Eugene Lafleur, Ch. Engr. of the Pub. Wks. Dept., submitted a report, in which he recommended the dredging of existing berth sites; removal of knoll at entrance to Sand Point slip to make easy ingress and egress for steamers; the clearing up of Sand Point channel, etc.

CURRENT NEWS SUPPLEMENT

SEPTEMBER 28, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

AMERICAN SOCIETY OF CIVIL ENGINEERS. Secretary, Charles Warren Hunt, 220 West 57th St., New York.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS. Secretary, Calvin W. Rice, 29 West 39th St., New York.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS. Secretary, Ralph W. Pope, 29 West 39th St., New York.

AMERICAN INSTITUTE OF MINING ENGINEERS. Secretary, R. W. Raymond, 29 West 39th St., New York.

NATIONAL FIRE PROTECTION ASSOCIATION. Secretary, W. H. Merrill, Jr., Chicago.

AMERICAN INSTITUTE OF ARCHITECTS. Secretary, Glenn Brown, Washington, D. C.

ASSOCIATION OF ENGINEERING SOCIETIES. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS. Secretary, W. M. Mackay, 113 Beekman St., New York.

CANADIAN SOCIETY OF CIVIL ENGINEERS. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

SOCIETY FOR THE PROMOTION OF ENGINEERING EDUCATION. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

AMERICAN SOCIETY FOR TESTING MATERIALS. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y. Annual meeting, Detroit, Mich., Oct. 1-4, 1907.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS. Secretary, S. F. Patterson, Concord, N. H. Annual convention, Milwaukee, Wis., Oct. 15-17, 1907.

AMERICAN RAILWAY ENGINEERING AND MAINTENANCE OF WAY ASSOCIATION. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

AMERICAN WATER WORKS ASSOCIATION. Secretary, J. M. Diven, Charleston, S. C.

AMERICAN STREET AND INTERURBAN RAILWAY ASSOCIATION. Secretary, Bernard V. Swenson, 29 West 39th St., New York. Annual Convention, Atlantic City, N. J., Oct. 14-18.

AMERICAN FOUNDRYMEN'S ASSOCIATION. Secretary, Richard Moldenke, P. O. Box 432, New York.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

AMERICAN PUBLIC WORKS ASSOCIATION. Secretary, W. H. Flint, Chattanooga.

ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

NATIONAL ASSOCIATION OF CEMENT USERS. President, Richard L. Humphrey, Harrison Building, Philadelphia.

AMERICAN SOCIETY OF REFRIGERATING ENGINEERS. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

AMERICAN PUBLIC HEALTH ASSOCIATION. Secretary, Dr. C. O. Probst, Columbus, O. Annual meeting, Atlantic City, Sept. 30-Oct. 4, 1907.

CENTRAL STATES WATER WORKS ASSOCIATION.

The city of Wheeling, W. Va., was the scene of the eleventh annual convention of the Central States Water Works Association, the first session being called to order on the morning of September 17 by Mr. George W. Lutz, Chairman of the Entertainment Committee. Mayor C. C. Schmidt extended to the convention a hearty greeting, and stated that Wheeling is now upon the eve of a bond issue and is undecided how to apply it in the improvement of its water works system, whether for a new reservoir, a sedimentation basin or a filtration plant. Greater pumping capacity is wanted, and the problem is whether to secure one unit of 20 million capacity or two units of 10 millions capacity. Wheeling, his Honor said, surely needs something, and needs it badly. President Thomas R. Cook, of Toledo, who responded, pointed out that the convention was not a junketing trip, but was called to discuss matters of vital concern to every municipality and private plant represented. He referred to the broadening and educational effect of such meetings of water works men to talk over their common difficulties, and to broaden their mental horizon. The man who always stays at home is apt to become narrow-minded.

Well Supplies.—Mr. John Langan, of Tipton, Ind., at the afternoon session read a paper on "Deep Well Water Supply." As the supply at Tipton is taken entirely from deep wells varying in depth from 60 to 440 ft., the paper was appreciated as coming from practical experience. In the discussion L. W. Latta, of Akron, stated that his company recently drilled 73 10-in. wells, in every case going through clay before striking water-bearing strata. While passing through the clay it was frequently necessary to pour water in the drill-hole to keep the drill running, but after passing through the clay and cleaning out, the water shot up within about 18 in. of the surface. Analysis by the State Board of Health shows the water is perfect for domestic use. Mr. Langan stated that when drilling some new 8-in. wells recently they did not encounter gravel before a depth of 130 ft., although in previous wells had done so at 60 to 70 ft. The first of these last wells was some 440 ft. deep, and the result was not wholly satisfactory, and another was dug by direction of the council. In drilling the first well the contractor, who was a new hand at it, did not keep a record of the character of the borings, and when drilling a second well was instructed to do this, and to report as soon as he struck gravel, with a sample of same. Learning that in the first well gravel had been encountered at 68 ft., Mr. Langan purchased some casing and had drillings made in the side of the first well, with the result that a vein of water was found that proved good and gave 300 gal. per minute. Two more wells drilled at a cost of \$2,000 have not been required, owing to the bountiful supply from the first well after the changes were made.

Mr. Langan stated that he had by repeated experimenting found that better results and more economy of water and steam can be maintained where the air lift is employed by using low air pressures. The higher the point at which the water can be taken the less weight of water to lift. Mr. Latta asked if Mr. Langan thought he could, by laying a pipe, say, 12 or 14 ft. from the surface of the well in which the water came within 8 ft. of the surface, reduce the head and get a greater flow at less cost of air lift. Mr. Langan replied that he had tried to do this, but had failed. Mr. Latta suggested that in the way he had indicated the supply might be allowed to flow into the clear water basin and pumped from there, inasmuch as Mr. Langan's main reservoir basin from which he pumped was 24 ft., and the height of water in wells from surface 8 ft., thus giving a margin of 16 ft. between bottom of the clear basin and surface of water in wells. It would be then cheaper to tap below the normal head than to put in air lift. Mr. Latta's experience is that it costs a great deal to pump by air-lift.

Mr. Herron, of Chillicothe, explained their system, which has a well of 25 ft. diameter, 24 ft. in depth, in the bottom of which are 11 driven wells, from 40 to 60 ft. in depth. The flow in these wells having decreased, they were enlarged. The air lift is used, the air being taken down in 2-in. galvanized pipe in the 8-in. casings. The 2-in. pipe run down within about 6 ft. of the bottom. After cleaning out the wells good results were had by using a small amount of air; the lowest pressure that could be used gave the best results; if a high pressure of air is turned on the air and water puff up.

Wood Pipe.—Mr. Latta told of an unfortunate experience had with the use of 48-in. stave pipe. He attempted to lay 2,400 ft. of such pipe; the original estimate called for 48-in. cast-iron pipe, but as the cost of these was over \$10 per lineal foot for the pipe alone, the wooden pipe was used instead. A price was made on this of \$1.20 per foot. The staves were 4 in. broad and 1⅞ in. thick. The pipe was to be banded with ⅝-in. round iron 16 in. center to center. After laying about 600 ft. of this, he was standing on the ditch one day after it had been filled, when he saw the ground sinking, and found that a portion of the pipe had collapsed. It was repaired, and ⅝-in. round iron rods used 8 in. center to center. In a few weeks later this also collapsed. It was replaced, using ⅝-in. round iron rods 4 in. center to center. That also showed signs of collapsing, and a 6-in. concrete arch was laid over the wooden stave pipe. Between 800 and 900 ft. of the wooden stave pipe was laid at an expense that was very onerous. He is now using 48x⅜-in. steel lockbar pipe, with flanged joints laid on a grillage of 2x6-in. oak, and has had no trouble whatever with it.

Mr. Langan asked if the speaker had ever considered what the result would have been if the pipe had been filled with water, and not covered over until it was so filled. Mr. Langan stated that in the beginning it was a grave question whether the water pipe would stand the pressure of the earth. As long as it was filled with water it held up, but collapsed as soon as the water was withdrawn.

Repairing Foot Valves.—A paper was next read by Mr. C. W. Wiles, of Delaware, O., on the repair of foot valves. The two Dean pumps of the Delaware Water Co., of 2,000,000 gal. capacity each, have separate 14-in. suction lines to the pump well, on which are flanged vertical foot valves, with a nest of gates. These foot valves had been in service about 18 years without being examined.

For a long time one of the pumps had not worked well; when run beyond a slow speed it pounded and labored. The engineer claimed that there must be a leak in the suction line, and much time was spent in looking for it. Recently trouble has been given by loss of water in the suction when the pump was not running, and this led Mr. Wiles to believe that the gates in the foot valve were not working well. This foot valve could not be examined in place, so a competent man was engaged with tools, to take it out.

The suction line enters the pump well about 10 ft. below the top, and with an elbow passes down some 14 ft. more; this foot valve is always under 4 to 12 ft. of water.

Heavy timbers were placed across the well, and from them a swing platform was dropped to the top of the first length of pipe, just below the elbow, from which a 12-ft. length of 14-in. pipe and the foot valve drop into the well. From this swing platform ropes and tackle were attached to the pipe, and after the bolts were removed it was raised and the foot valve rested on the platform, unbolted, and taken out of the well.

An examination showed that of the fourteen gates seven or eight were stuck and covered with mud, so that only about one-half were taking water, thus throttling the supply to the pump, and not seating, allowing the suction to drain when the pump was not in service.

The foot valve was thoroughly cleaned, the valves sandpapered so as to seat, and as all the springs were in good order, in a short time it was placed back, and the pump ran as good as new, taking and discharging easily at all speeds, and with no loss of water in the suction line when the pump was not working.

In view of the results of this examination it was thought best, while the tackle was in place, to examine the other foot valve, though the pump seemed to work fairly well. After disconnecting and hoisting out this second valve, it was found to have several gates out of order and the bottom plate on which the nest of valves rested was found to be broken entirely across one way and half across the other.

Six of the fourteen valves were stuck, and the only way the pump could take sufficient water was by the broken bottom plate opening up, allowing the water to pass through when the pump was working, and closing down when the pump was stopped. It was found that many bolts were badly worn by the movement of the broken plate. A new bottom, including gates and screen, was placed on the old top, and all replaced in the well.

Since cleaning and repairing these foot valves, the pumps have worked finely, running with less power and at a saving of steam.

Municipal Ownership.—A paper on "Municipal Ownership of Public Utilities," by John W. Hill, M. Am. Soc. C. E., of Cincinnati, O., was read in the absence of the author on the morning of Sept. 18. It was an argument for the private ownership of public utilities.

In discussing the paper, Mr. Alva L. Holmes, of Grand Rapids, Mich., said that if private companies had always operated their plants nearer to the general public in the past there would be less objection to them now. An ideal plan, the speaker thought, for the operation of public utilities would be to give the municipality a minority of the stock, put the management of such plants in the hands of private companies holding, say, 51 or 55 per cent. of the stock, the municipality to own the balance of the stock. Let the municipalities be represented on the board through their Board of Public Service. Thus the city would get good service and the product not be sold at less than cost. Neither private companies nor the municipalities can properly run water works or gas or electric light plants unless they realize from the product at least the cost of production and interest or investment, as well as a reasonable margin above. If they do not get cost the deficiency must be made up in a municipality in some other way, and in a privately owned plant out of the pockets of the stockholders.

Mr. Latta gave the case of a city that was using an old and cumbersome system of bookkeeping where the figures were kept in a separate book for each ward. As this system resulted in the information being almost valueless for operating purposes on account of the difficulty of getting at it readily, a card index system was suggested; but the officials replied that they could not introduce such an innovation, as the law required the method they employed. They could not think of going contrary to the laws, and introducing a little common sense.

Mr Jerry O'Shaughnessy, superintendent of the Columbus water works, objected strongly to some of the statements of the paper that seemed to reflect on Columbus, and also to the statement in regard to alleged platform utterances of Wm. Jennings Bryan. Later he introduced a resolution which, with slight amendment, was adopted, as follows:

Resolved, That it is the sense of this Convention that the Central States Water Works Association, drawing its membership from all classes, both of privately and publicly owned water works plants, cannot as a body endorse any theories as to municipal ownership of public utilities or otherwise; and that in the publication of any papers read before the Association, this Association disclaims any responsibility for the individual opinions expressed by the writers touching upon questions of public policy with which this Association as a scientific and technical body has no concern.

Quality of Water.—Dr. S. L. Jepson, of Wheeling, read a paper on the quality of water supplies.

In the discussion Mr. F. B. Leopold mentioned some unsuccessful well supplies. The water level in the Indianapolis wells receded year by year until cost of pumping to the surface was about 60 per cent. of entire cost of pumping according to their engineer's report. They finally had to abandon it. Gallipolis has a system of wells in the gravel of the river which are pointed to as an illustration of what can be done in this direction; but that is an exceptional case. Columbus, O., had an experience that was unsatisfactory. They laid about 2½ miles of perforated pipe in the gravel bed of their river, but eventually had to abandon it. A filtration plant has now been put in. At Williamsport, Pa., the Pennsylvania Water Co. put three filter cribs in the river. A year ago suit was entered against that company by the city of Williamsport, claiming that they were not furnishing as pure a character of water as their franchise called for, or as was available; and a decision was rendered against them and they were ordered by the court to install a filtration plant. Charleston, W. Va., had a similar experience, and they abandoned it and put in filtration.

With respect to filtration, the operating expenses deserve attention. One of the basic factors of cost in the mechanical filter is the coagulant. In practically all the earlier reports alum is placed as costing $25 to $30 a ton, but to-day alum can be purchased for $18 to $20 a ton, a difference of 25 per cent. Many plants installed in the last two or three years are using or contemplating using sulphate of iron as a coagulant, which results in a saving. The slow sand filter has its limitations in the character of water that it can handle successfully. Within its limitations the slow sand filter can undoubtedly produce satisfactory results from a sanitary standpoint, but even in those cases the physical appearance of the water leaves something to be desired. At Albany, N. Y., and Washington, D. C., the water is at times more or less turbid. At Albany they are now building preliminary filters to filter the water previous to its going into the slow sand plant, and to try and improve its character.

At Washington the old theory that the bacteria contained in the effluent were principally harmless bacteria from the under drains of the filter, has been disproved; because it has been found there that the filtered water contained the coli bacteria which must have gone through the filters. On the other hand, the mechanical filter will give nearly as good results bacterially as the slow sand filter. At Harrisburg last year the average was 99.24 reduction; and the average number of bacteria found in the filter water was 94. About two years ago the copper sulphate treatment was applied at Marietta, and during that time there was no trace of the coli bacteria found in the filtered water. Using the iron alone or alum alone there are times when the coli will go through the filter.

The new stockyards at Chicago are now building a filter plant to purify the waters of Bubbly Creek, which carries all the drainage from the slaughter houses. That water is almost pure sewage. It is black and in the summer time is covered with bubbles from fermentation. An experimental plant was put in there and operated for several months, demonstrating that the water can be purified. A 5,000,000-gal. filter plant is being built there now under guarantee to render that water in every way equal to the Chicago city water, and that is being done with the use of sulphate of iron combined with a small percentage of copper.

Mr Asa Williams, of Owensboro, Ky., referred to the installation at that city, which has been described in this journal on August 31. A test of the plant is reported elsewhere in this issue.

Mr Latta protested against attributing all typhoid fever cases to contaminated water supply. In his city recently the Board of Health notified him of 23 cases of typhoid fever, asking that something be done about improving the quality of the water forthwith. He traced these cases to their source and found three cases in one house, two of whom had just returned from a lake trip on the steamer "Northwest." The typhoid fever developed immediately after their return, and within a week the "Northwest" was held up at Buffalo six hours by the Health Officer, who fumigated it and had the plumbing overhauled. Two other cases were traced to the milk supply, the parties not having used city water for any purpose except sprinkling. It was found that the typhoid came from a little spring in which the milkman washed his hands and his cans on his farm. Out of the total number of cases complained of, only five by any possibility could have come from the city water.

Dr. Jepson stated that as a physician he had always maintained that too much importance has been attached to the water supply as the causation of typhoid fever.

Garbage Disposal. At the afternoon session President Cook read a paper on garbage disposal in Toledo by the reduction process, at the request of Secretary Veach, who believed it would be interesting, for although not directly along the line of the work of the Association, it would appeal to men who were largely connected with municipal affairs.

In the discussion, City Engr. Cook, of Wheeling, inquired what was done in Toledo with the tin cans, and was told that the cans were thrown out, but $6 a ton was obtained for them. The Department provides that no tin cans or anything similar are to go into the garbage, but as a matter of fact they do. After the tankage comes from the driers it is run over a picking table and the cans are taken out before the tankage goes into the digester, as there are pieces of glass, broken crockery and such matters that would hurt the commercial value of the product if not removed. From the dry tankage about 15 per cent. of grease is obtained, which is about 3 per cent of the entire garbage carted. This system will handle dead horses or dogs. A load of dogs is brought in every morning about 10 o'clock. The horses are skinned and then cut up in order to get them into the digester. The more animal fat the higher the percentage of ammonia in the tankage, which is sold on a unit basis.

A load of garbage weighing a little over 2 tons when turned into commercial products sells for $9 or $10, but it costs almost as much as it comes to. The entire process is handled by live steam, the most expensive way of doing anything by heat. The speaker thought that the process could be improved upon by using direct drier.

City Engr. Cook stated that the Wagner tank is made in Cincinnati and is used to a great extent by slaughter houses and places of that kind to reduce offal. The cost of reducing the garbage is slightly less than the money realized from by-products. The garbage business has been gone into pretty thoroughly in Wheeling. It was incinerated, and as the city had free gas, the burning did not cost anything. When the natural gas company got the franchise they agreed to furnish free fuel to the city crematory. The old Smith furnace was used, and the process was very unsanitary. The location of the crematory is in a conspicuous place in the city and is a disgrace to the municipality. The Health Officer and the City Engineer were sent on a trip to various cities to inspect the character of the garbage plants in use, and found that in no city, except possibly Pittsburg, where they have very cheap fuel, are they operating reduction plants at any profit which would attract a business man to undertake. The conclusion reached was that the best thing that Wheeling could do would be to go into the incinerating business.

President Cook stated that there was no complaint in Toledo of the operation of the plant, but when the apportionment was made of taxes for different purposes, the Health Department, as usual, got the small end of it. If the garbage can be gathered once in two days or oftener, when it reaches the plant it would not be objectionable, but when collected only one night a week, by the time it gets to the plant it is in a rotting and very objectionable condition.

Mr. J. D. Carmody, of Evansville, read a paper on "Sand Filtration by Nature's Method," written by Mr. Ferdinand Grote, of the Smith-Grote slow sand filtration system. It referred particularly to the Owensboro plant, already mentioned.

In the discussion Mr. Holmes mentioned an experience at South Haven on Lake Michigan, where, to avoid the cost of an intake in the lake, they forced out under the bed of the lake two 16-in. pipes with 15-ft. Cook strainers. It was built in the summer, and there were not many users that year. Two 16-in. pipes furnished a sufficient supply of water until the following spring, when more taps were taken on and it was found impossible to get water enough, and two more pipes were pushed out into the lake, leaving about 4 ft. of sand on top of the pipes. Before that season was ended it was necessary to put out two more, making six in all. They blundered through the next year, and the second year after that placed a 16-in. intake a half mile out in the lake, and have had no trouble since. Here the conditions were that the sand was so fine that the water could not get through fast enough. Unless a bed of gravel can be had through which the water will pass reasonably fast to the strainers of the wells, the supply will not be sufficient.

For the purpose of flushing the wells they had erected a stand pipe very near the plant, connected up with a by-pass, but it only gave temporary relief, the sand being too fine.

Mr. Grote said that Mr. Holmes was correct, that it would take the force of a current to make this kind of filtering used at Owensboro, a success, and where such conditions prevail good results are obtained, but in standing water where there is nothing to scour away the silt, the strainers will soon become clogged. The system is practicable, however, under Ohio river conditions.

Pipe Line Repairs.—Mr. Latta said that they had recently taken up a large number of 6, 8 and 10-in. mains, relaying them with mains from 16 to 24-in. The method originally in vogue was to excavate over the old pipe, take a pair of cutters, cut off as close to the hub as possible, and knock it out, losing from 6 to 8-in. of pipe in that way. This loss the speaker reduced by cutting out every second joint and leaving the intervening joints intact. In order to save waste of pipe the speaker conceived the idea of having a steel clamp made with feet all pointing one way; clamping this around the pipe, placing two 10-ton jacks on each side of the pipe with the foot of the jack against the hub of the pipe and with the head of the jack against the side of the clamp where it came around. This method was unsuccessful, as the pipe was smashed by the jacks.

Mr. Asa Williams, of Owensboro, stated that about five years ago he had occasion to take up 1,200 ft. of 8-in. pipe and relay with 10-in. Three tripods were equipped with chain blocks. The pipe was cut at one corner at the valve, the pipe being in the ditch, and the next corner at a fire hydrant T. The tripods were set about two lengths of pipe apart. The end of the pipe was pulled up, taking a strain with the other chain block, and when the end of the pipe got up to the top of the ditch a skid was placed across the top of the ditch to rest the pipe on. The tripod and chain blocks were then moved further down, and skids were eventually placed in this way across the ditch until the entire length of pipe rested on the skids. It was then rolled off the skids and the other pipe placed in position. Every third joint of the removed pipe was then melted out. A couple of 30-ft. telephone poles were placed on a wagon and two sections of pipe slung under the poles and the pipe hauled to the place where it was to be laid. It was easier to melt the joints on top of the ground than in the ditch. He has since taken up both 4 and 6-in. pipe, using the same method.

Mr. Holmes preferred to melt the joints out in the ditch, making the lengths as long as can be handled with teams, cutting the pipe far enough from the bell so as to put a sleeve on and handle it in that way. By using cutters on small pipe, say 4 and 6-in., it is possible to get them out of the way in a little while. Mr. Holmes had seen plumbers' blowing machines or torches used on pipe joints, but the process is slow.

Secretary Veach stated that about a year and a half ago he asked Mr. L. E. Chapin, of Canton, O., whether there was not some better method of unjointing pipe than by burning it out in the ditch; and was told that the Standard Oil people in Cleveland, O., had an arrangement in the way of a jack that one of their men had designed. It could be dropped down over the pipe, and had pawls in it that would prevent it from slipping. They could push out 6 or 8-in. pipe out of the bell in a few moments; a very practical and very successful device. They relaid more or less cast iron pipe every year, and they were very much pleased with it and used it entirely.

Mr. W. J. Scroggins, of Wheling, showed samples of the incrustation taken from the interior of the water pipe in that city. They were chunks of black substance, the color of tar and almost as hard as iron. It required from four to eight men to pull the cleaner through the pipes. The delegates subsequently inspected the process of clearing the water mains, which was going on at Wheeling in charge of Mr. D. H. Buell, of the National Water-Main Cleaning Co. Mr. Scroggins stated that 4 and 6-in. mains in Wheeling were so incrusted internally in some places that their diameter did not exceed 1¼-in., and in some places not 1-in., and when they try to flush such mains through the fire hydrants they could not throw a stream more than 7 or 8-in. beyond the nozzle. After cleaning the mains the same hydrant would throw a stream of full size half way across the street.

City Engineer Cook, of Wheeling, explained that the hard and metallic character of the deposit found in the Wheeling water pipes, and the carbuncles and tuberculation were undoubtedly due to the refuse from tin-plate mills, coal mines, etc., a condition that did not exist at many other points on the Ohio river, but has been increasing at Pittsburg and Wheeling for the last five years to an alarming degree since the tin-plate mills and other manufacturing plants have been discharging their residue into the Ohio river. In Pittsburg the process of cleaning the mains had developed the fact that it was impossible to get a broom-stick through many 4 and 6-in. mains. The method of cleaning is very simple. A swab is attached to the end of a wire, a piece of jute being used. A hole is cut in the pipe and the flow of water carries the swab along with the small wire attached. To this wire is attached a cable which pulls the cutter through, there being a windlass at the far end. It is astonishing to see the substances that are removed from the pipe. It is so offensive that many people standing watching the process remarked that they had never seen sewers cleaned that way before.

At the evening session illustrated addresses on meth-

ods of filtration were given in the handsome auditorium of the Carroll Club, by Messrs. F. B. Leopold and Morris Knowles, both of Pittsburg. Mr. Leopold's subject especially was the new Lorain plant, which he stated was probably more nearly adapted for a city the size of Wheeling than any other. The intake of the water from the lake to the sedimentation basin, its transfer to the mixing basin, the introduction of the coagulant, etc., were all shown by lantern slides. Various improvements made since 1897 at Lorain were explained, and figures were presented showing the falling off in typhoid fever after the installation of the filteration plant. Mr. Knowles described the Pittsburgh filters, which were the subject of a series of articles in this journal some time ago. The originally projected cost of the filteration system proper was $3,300,000. Adding the low lift pumping station and the filtered water reservoir, and the land, etc., will make another million. The original estimate will not be exceeded, and in fact some few hundred thousand dollars will be saved, which can be applied to future operating expenses.

Water Waste.—On Thursday morning a paper on "Meters" was read by Mr. A. L. Holmes, of Grand Rapids. The title is somewhat misleading, for it was partly an argument for the maintenance of a water plant in good order, by preventing slip in pumps, leakage in mains and waste in houses. When this is done it is possible to know the cost of water under efficient management, and then, by using meters, to charge each consumer a fair price for what he was using.

Mr. William Schofield, of Benwood, W. Va., agreed with a statement in the paper as to the fallacy of comparing water rates in vogue in different localities, explaining that in Benwood, adjoining Wheeling, they were compelled by ordinance to charge the Wheeling rates, although they were supplying filtered water to only 7,000 people for domestic service only; whereas the city of Wheeling supplies large manufacturing establishments and is pumping 17 or 18 million gallons per day. Mr. Fred. Bosch, of Whitewater, Wis., thought that the point made by Mr. Holmes in calling attention to the fact that water rates are seriously affected by pump slippage, was an important one. He gave an interesting account of his investigations along that line in detecting pump slippage, by means of which he reduced the amount very materially.

Mr. O'Shaughnessy, of Columbus, told of his success in reducing waste at that city, as a result of which, although some 1,500 taps had been added in seven years, something like five million gallons less water was now being pumped per 24 hours. He found that the meter was a powerful factor in reducing the waste of water. If a meter is installed on the premises, even if it does not work, so long as the customer is not aware of the fact, it is a guardian that tends to keep down the waste of water. Unless measures had been taken to reduce the wastage at Columbus, even 30 million gallons capacity would not be sufficient to take care of the demand. The speaker thought that the old style of brass ring packing inside of a horizontal pump was very poor, and permitted a large slip. He now uses square plaited hemp and square canvas packing in about the same proportions all the way through. If all hemp is employed or all canvas, the result is not so good. The city that persists in not using meters is certainly behind the times.

Mr. Schofield stated that he thought slip was a very important point as a result of recent experience. Finding that the pumps were running faster than usual, he set himself to learn the cause. He had attributed part of the increase to the increased use of water by water-motor washing machines. Not finding it there, he examined the sewers, still with no result, and then set the engineer to work on his pumps. The engineer reported no broken springs, valves all in good condition, and pump all right. He then tried to find leakage on the lines, but discovering nothing of moment, returned again to the pump, and after various tests found there was 40 per cent slippage. Repairs to the pump cut down 37 per cent. of the slip. Then the engineer examined his valves, and found them to be ⅛-in. too small, and the water was shooting out around the edge of the valves and going back. New valves were placed on the pump, but he still found considerable slip. The engineer went down to the sewer one day which empties into the river and from which the water is discharged from the condensers and from the filter plant. He thought there was too much water coming from the sewer, and an investigation showed some tubes shoved endwise in the surface condenser, from which the water was going.

In the business meeting it was voted to meet next year at Pittsburg, the date to be fixed later. The following officers were elected: President, John Langan, Tipton, Ind.; Vice-Presidents, William Schwertfeger, Wheeling, W. Va.; Elkanah Hulley, Marion, Ind.; Asa Williams, Owensboro, Ky.; L. M. Latta, Akron, O.; A. L. Holmes, Grand Rapids, Mich.; Fred Bosch, Whitewater, Wis.; J. Ahearne, Nashville, Tenn.; W. J. Scroggins, Wheeling, W. Va.; T. H. Venner, McKeesport, Pa.; Dabney H. Maury, Peoria, Ill.; Secretary, Wm. Allen Veach, Newark, O.; Treasurer, A. W. Inman, Massilon, O.; Executive Committee, A. H. McAlpine, Columbus, O.; Jerry O'Shaughnessy, Columbus, O.; C. W. Wiles, Delaware, O.; Finance Committee, Geo. F. Cooper, Xenia, O.; Wm. Schofield, Benwood, W. Va.; J. M. Wisler, Toledo, O.

CONCRETE COLUMN FORMULAS

The following letter from Mr. H. C. Turner, of the Turner Construction Co., New York, is self-explanatory: "Referring to your magazine of Sept. 21 and the article in the Current News Supplement entitled 'Suggested Rules for Reinforced Concrete,' there is an error in the formula given for the value of spiral-wound reinforced concrete columns. The last term in this equation, $fs' \times As'$, should be $fs \times As$; in other words, both of the prime marks should be omitted."

PERSONAL NOTES.

Mr. William H. McEniry has been elected city engineer of Bessemer, Ala.

William England Kern, first assistant surveyor in the Sixth District of Philadelphia, died Sept. 20. He was 40 years old.

Mr. J. C. Jeffery, assistant city engineer of Seattle, Wash., has resigned to enter a general contracting business with Mr. J. S. Holt, of Seattle.

Lieut.-Col. Walter L. Fisk, Corps of Engineers, U. S. A., has been ordered from San Francisco to the office of the Chief of Engineers for temporary duty.

Mr. W. G. Bierd, whose resignation as general manager of the Panama R. R. recently was noted in these columns, is to enter the service of the New York, New Haven & Hartford R. R., succeeding Mr. O. M. Shepard, general superintendent, who is to retire from railroad work Oct. 1.

Capt. Jas. P. Jervey, Corps of Engineers, U. S. A., commanding Company A, First Battalion of Engineers, has been ordered to the Engineer School at Washington Barracks as instructor.

Mr. Herbert W. Goddard, formerly connected with the Ransome & Smith Co., New York City, has become superinendent for the Concrete Steel & Tile Construction Co., Boston, Mass.

Prof. E. L. Clark, assistant professor of civil engineering at the Missouri School of Mines, Rolla, Mo., has resigned to accept a position in the United States engineering office at Seattle, Wash.

Frank L. Gilman, chief engineer of the Oregon water power division of the Portland Railway, Light & Power Co., Portland, Oregon, and city engineer of Portland in 1895-96, died at his home in that city, Sept. 11, aged 47 years.

Mr. Lucius T. Gibbs has been appointed electrical engineer of the Baltimore & Ohio R. R., succeeding Mr. W. D. Young, resigned. Mr. Gibbs is brother of Mr. George Gibbs, general superintendent of motive power of the Pennsylvania R. R.

Mr. Howard C. Ford has been appointed assistant professor of irrigation engineering and surveying at Iowa State College, Ames, Ia. Mr. Ford is a graduate of the University of Colorado and has been instructor in civil engineering in that institution for three years.

Mr. E. Darrow has resigned as chief engineer and general manager of the Toledo & Indiana Ry. Co. to become engineer for a syndicate with headquarters in New York City. He has been succeeded by Mr. H. C. Warren, formerly superintendent of the Toledo, Port Clinton & Lakeside Ry.

Prof. L. E. Young recently became director of the Missouri School of Mines and Metallurgy, at Rolla, Mo. He has had a wide experience in mining in Pennsylvania, Iowa, Michigan and Colorado. He was professor of mining engineering at the Colorado School of Mines at Golden, Colo., for several years, and before that he was assistant professor of mining engineering at the Iowa State College.

Mr. Charles N. Black, general manager and chief engineer of the Metropolitan Street Ry. Co. of Kansas City, Mo., has been appointed vice-president and general manager of the United Railroads of San Francisco, succeeding to the duties of the late Mr. Geo. F. Chapman. Mr. Black's connection with the Kansas City company dates from the time when as chief engineer for Ford, Bacon & Davis, of New York, the reconstruction of the system was entrusted to him. This work was finished in September, 1903, and Mr. Black was induced to continue with the company as its chief engineer. Two years later he was appointed manager.

Mr. W. L. Mattoon, formerly division engineer on the Zanesville and Western and Corning division of the Toledo & Ohio Central Ry., with headquarters in Columbus, Ohio, has become principal assistant engineer of the Hocking Valley and Zanesville & Western railways, with headquarters in the same city, succeeding Mr. Parker S. Cott, who resigned to accept a position with the Sunday Creek Coal Co. Mr. Mattoon is succeeded in his former position by Mr. D. C. Holtsbery, division engineer of the Eastern division of the Toledo & Ohio Central Ry., who in turn is succeeded by Mr. R. P. Black, in charge of construction work on the Indianapolis division.

Samuel Sloan, chairman of the board of directors of the Delaware, Lackawanna & Western R. R. and for 32 years president of the same road, died, Sept. 22, aged 90 years. He was one of the best-known railroad men in this country and since the beginning of his railroad career in 1855 as a director of the Hudson River R. R. he had been at various times president of seventeen railroads, among which are the Michigan Central, Pere Marquette, International & Great Northern, and the Fort Wayne & Jackson. He was, however, most closely connected with the Delaware, Lackawanna & Western, which under his management was developed from a short coal road into a great trunk line. He retired from the presidency of the Lackawanna in 1899.

Mr. Frederick L. Smith has opened an office at 5 Beekman St., New York, as an industrial engineer and specialist in structural steel and reinforced concrete. He will pay particular attention to the selection of industrial sites, the design of mills and power plants, the investigation and appraisal of factory properties and the design of structural work. For the past six years he has been in charge of the New York office of Mr. Joseph H. Wallace, the well-known industrial engineer of New York and London, during which time a number of important mills, shops and power plants were designed in the office, and plans were prepared for a large amount of structural work for architects and engineers who did not have a structural department.

BUSINESS NOTES.

Judge Hough of the U. S. District Court at Philadelphia appointed Messrs D. P. Allerton, Wm. H. Carpenter and S. P. Thomas on Sept. 25 receivers for the Scofield Co., of that city. This company has lately executed a number of large contracts in different parts of the country, including the dry-dock at the League Island Navy Yard and the large government pier at the Jamestown Exposition.

The Ohio Canal Traction Co., of Cleveland, O., was recently incorporated, with $75,000 capital, to place a number of 250-ton steel barges propelled by 40-h.-p. gasoline engines on the Ohio canals. The route at first will be from Cleveland to Akron, but it is expected that service will ultimately be extended to Massillon, New Philadelphia, Canal Dover, Uhrichsville, Dresden and Zanesville.

The Trussed Concrete Steel Co., of Detroit, has opened an office at 502 Atlas Bldg., San Francisco, in charge of Mr. Felix Kahn.

Among orders for foreign shipment recently received by the Buffalo Forge Co., of Buffalo, is one for a horizontal center crank compound automatic engine, 13x20x14, for direct connection to a General Electric Company's generator. The unit is for the electric illumination of the tower of Noshiro, on the northwest coast of Japan.

Wm. B. Scaife & Sons Co., Pittsburg, Pa., have been awarded the contract for furnishing the structural steel work and steel storage bins for the new plant of the Henry Cowell Lime & Cement Co., Concord, Cal. Eleven buildings will be required, involving about 2,500 tons of structural steel.

The Conley Frog & Switch Co., Memphis, Tenn., has completed its plant, consisting of a reinforced concrete building with electrically driven machinery. The company's shipping facilities are excellent, the plant being on the Illinois Central R. R. and the Union Belt Ry. A number of orders from railroads are now being executed. The capital of the company is $200,000, and the officers are: Mr. J. E. Conley, president; Mr. B. S. Randall, vice-president, and Mr. F. J. Callahan, secretary and treasurer.

Mr. Max F. Abbé, president of the Abbé Engineering Co., New York, has just returned from a five months' trip to Europe. He visited England, Belgium, France and Germany, and in several places made contracts for the manufacture of tube mills and linings under his various patents. In Germany he contracted with the Fried. Krupp Aktiengesellschaft Grusonwerk, at Magdeburg Buckau, for the building in the United States of their celebrated Excelsior mills, of which the Krupp people have sold 30,000 in various parts of the world. The Abbé Engineering Co. will be ready within a month to supply the trade with mills of this type.

The Cattaraugus Cutlery Co., Little Valley, N. Y., has recently purchased extensive new machinery equipment for an addition to its two present factories in Little Valley. The new machines comprise an engine, a generator and motors made by the Allis-Chalmers Co. The engine is an 18x42-in. horizontal heavy-duty Reliance Corliss engine, belted to a 150-kw. Allis-Chalmers alternator, wound for 60-cycle 3-phase current at 440 volts. The motor equipment includes three 40-h.-p. Allis-Chalmers standard induction motors designed for a speed of 850 r. p. m., a 30-h.-p. motor for the same speed, and three 5-h.-p. machines for 1,130 r. p. m. apiece.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Albany, Ala.—The question of establishing a water system on the grounds of the Alabama Poytechnic Institute is reported under consideration.

Slocomb, Ala.—J. A. Bateman, Mayor, writes that plans and specifications are on file at the office of the Morris Lumber Co., at Slocomb, for water works, and bids will be received at once for its construction; probable cost $15,000.

Tucson, Ariz.—Bids will be received at the office of Frank S. Treat, City Recorder, until Nov. 4 for furnishing material and constructing a system of water works, as advertised in The Engineering Record.

Camden, Ark.—E. H. Carson, Mayor, writes that this city proposes letting new franchise for water works for 25 years. Old franchise expires next year. Population of town is now 6,040.

Berkeley, Cal.—The Peoples' Water Co. is reported to have decided to install another large pumping plant at its station on University Ave. between Shattuck Ave. and Grove St.

Riverside, Cal.—The Santa Ana Riverside Water Development Co. is reported incorporated, with a capital of $300,000, by G. W. Sherwood, L. P. Drake, A. N. Saxton and others.

Craig, Colo.—Gen. Frank D. Baldwin, former Commander of the Dept. of Colorado, now on the retired list, is reported to be here investigating a proposition to build a canal to irrigate 100,000 acres of land. The proposed canal is to extend to the Craig placers.

Delta, Colo.—Engr. E. P. Martin, of Paonia, writes that bids are wanted for the building of a 32-in. siphon. It is proposed to build a large reservoir, but no bids have as yet been asked for this work.

Wallingford, Conn.—J. H. Child, Supt. and Engr., Wallingford waterworks, writes that several possible sources of increased water supply are to be considered. It is not probable that any construction work will be done before the spring of 1908.

Ashburn, Ga.—See "Power Plants, Gas and Electricity."

Millen, Ga.—See "Power Plants, Gas an dElectricity."

Atlanta Ga.—The Special Waterworks Com. (Councilman Longine, Chmn.) in its report to Council recommends that a new pump be bought for Hemphill station at once; that a pump be bought for the river station in the near future; that anew reservoir be completed as soon as possible; that the new filter plant, coagulating and clear water basin be pushed to completion as rapidly as possible; that a basin be constructed at the river station between the intake pipes and the pump, so as to assist in clearing the water before it reaches the reservoir, and that the new 36-in. main be laid as fast as possible and that more service pipes be put down throughout the city.

Shelley, Idaho.—Fred C. Mickelson, City Clk., writes that bids will be called for about Dec. 1 for the construction of water works to cost about $6,500. Engineer, N. N. Holm, of Shelley.

Harmon, Ill.—Benj. F. Swab, Village Clk., writes that an engineer will soon be selected to prepare plans for water works, to cost about $6,000. Have well completed, depth 532 ft.

Waterloo, Ia.—The citizens in mass meeting on Sept. 14 are reported to have decided to call an election to vote on the advisability of purchasing or constructing water works.

Frankfort, Kan.—J. M. Shumate, City Clk., writes that the citizens on Sept. 16 voted to issue $21,500 bonds for waterworks.

*New Orleans, La.—Local press reports state that the Sewerage and Water Bd. on Sept. 16 awarded contracts as follows for hauling and laying of approximately 250 miles of c. i. water pipe, from 4 to 30 in. diam. and aggregating about 26,000 tons: Contract 15-W to Irwin Bros., $225,789; contract 17-W to M. O. Herron & Co., $237,791; contract 16-W to A. L. Patterson & Co., $256,167, and contract 18-W to General Contr. Co., $113,637.

Patterson, La.—The Mayor writes that preliminary survey has been made for water works, but the proposition to construct same has not yet been submitted to the taxpayers.

Pollock, La.—The Town Council is reported to have decided to construct water works.

Berlin, Md.—See "Power Plants, Gas and Electricity."

Mattapoisett, Mass.—A committee is reported to have been formed to consider a public water supply. Selectman Lester W. Jenney may be able to give further information.

*Cokato, Minn.—W. D. Lovell, of Minneapolis, is reported to have secured the contract for constructing waterworks (bids opened Sept. 7), for $5,372.

Fairfax, Minn.—It is stated that bids will be received until Oct. 1 by the Village Council for constructing a steel watertower and tank. J. T. Johnson, Engr., Gibbon.

*Duluth, Minn.—L. M. Case, Mgr. Water & Light Comrs., writes that the contract for constructing and installing two electric booster pumps at 46th Ave., N., and Grand Ave. (bids opened Sept. 5) has been awarded to Fairbanks, Morse & Co., of Chicago, Ill., for $4,225.

Newton, Miss.—Bids will be received until Oct. 7 by the Mayor and Bd. Aldermen for furnishing material and constructing a complete water works system. Xavier A. Kramer, Engr., Magnolia.

Columbia, Miss.—W. L. Simmons, Town Clk., writes that F. Blanchard, of Columbia, has prepared preliminary plans for waterworks and sewerage system for Columbia, to cost about $50,000. Election will probably be held on Nov. 1.

Gulfport, Miss.—M. T. Sullivan, City Engr., writes that bonds have not yet sold for extensions to waterworks and sewerage system, and no contract for work yet let.

Fremont, Neb.—See "Power Plants, Gas and Electricity."

Hildreth, Neb.—The citizens are reported to have voted to issue $10,000 bonds for water works.

*Newport, N. H.—The contract for extending the water system to the village of Guild and for laying 2 miles of 8 and 6-in. c. i. pipe was on Sept. 14 let to Ablett & Bowes, of Cohoes, N. Y., at 20½ cts. per lin. ft.

*Orange, N. J.—Contracts for the final work of completing the water supply and distribution additions (bids opened by City Council on Sept. 9) are reported to have been awarded as follows: For concrete work on new reservoir and gatehouse, John W. Heller, of Brooklyn, N. Y., for $52,825; the Warren Foundry & Machine Co., of Phillipsburg, secured contract to furnish c. i. pipe for $57,385. R. H. Kernan, of South Orange secured contract to lay the pipe for $27,950.

Alamagordo, N. M.—See "Power Plants, Gas and Electricity."

Tupper Lake, N. Y.—D. C. Randall, Supt. Tupper Lake Water Co., writes that A. W. Cuddeback, of Paterson, N. J., is engineer for the proposed standpipe.

New York, N. Y.—The attention of intending bidders is now directed to the contracts to be advertised during the fall and winter by the Bd. of Water Supply, 299 Bway., New York, N. Y., to include main dam, Kensico reservoir; headworks of Catskill aqueduct, portions of the Esopus division of the Catskill aqueduct; portion of Wallkill division of Catskill aqueduct; Rondout siphon and Wallkill siphon, as advertised in The Engineering Record, in order that they may look over the ground before topographical features are obscured by snow. Further information can be obtained from A. D. Flinn, Dept. Engr. in charge of headquarters, Room 1515, 299 Bway., N. Y. City.

Lenoir, N. C.—The Mayor writes that bids will be received about Oct. 1 for improvements to water works, sewers and paving, to cost between $75,000 and $100,000.

Gastonia, N. C.—Bids are wanted, it is stated, until Oct. 1 for $30,000 street improvement bonds; $23,000 waterworks and sewer bonds; $15,000 school bonds. E. N. Lineberger, Treas.

Fargo, N. D.—It is stated that bids will be received until Oct. 9 by the Bd. Co. Comrs. for constructing a pneumatic water plant at the County Hospital. Arthur Lewis, Co. Aud.

Delta, O.—The Delta Electric Light Co. is reported to have petitioned City Council for a franchise for water works.

Swanton, O.—The City Council is reported to have passed an ordinance providing for the purchase of a site for water works. The citizens about a year ago voted to issue $20,000 bonds for the construction of same.

*Cincinnati, O.—The Bd. of Pub. Service on Sept. 18 awarded contracts for water meters, with ⅝-in. connections, to the America Valve & Meter Co. and Neptune Meter Co., New York, N. Y.; Pittsburg Meter Co., Thompson Meter Co., of Brooklyn, and Buffalo Meter Co.

Columbus, O.—The Bd. of Pub. Service is reported to have on Sept. 18 opened bids for laying 2 36-in. water mains to connect the new water softening and filtration plant with the city pumping station, as follows: W. C. Halliday, $162,590; Chas. C. Taylor & John M. Beckett, $162,683; Westwater & Casey, $163,907.

Ashtabula, O.—W. S. McKinnon, Pres. Ashtabula Water Co., writes that the company is not yet ready to let any contracts, nor has engineer been selected yet, but it is proposed to install a filtration plant.

Philadelphia, Pa.—A $2,000,000 filtration plant, with a daily capacity of 50,000,000 gal., to be erected on the site of the present Queen Lane pumping station and reservoirs, is reported to be under consideration by the Dept. of Pub. Wks. If the necessary funds are provided in the $10,000,000 loan the work of construction will be begun immediately.

*J. K. Dimmick & Co., 2040 Land Title Bldg., secured the contract for furnishing breeches, pipes and special castings for 1907 (bids opened Aug. 22 by the Dept. of Pub. Wks., Bureau of Filtration), at the following bid: Furnishing 20 to 48-in. c. i. H. & S. specials, per ton, $70; furnishing under 20-in. c. i. H. & S. specials, per ton, $60; furnishing 20 to 48-in. c. i. H. & S. breeches pipe, per ton, $100, and furnishing under 20-in. c. i. H. & S. breeches pipe, per ton, $90.

*Walter Wood, 400 Chestnut St., secured the contract for constructing the Roxborough pipe extension system, Item No. 1, bids opened Aug. 22 by the Dept. of Pub. Wks., Bureau of Filtration, at a total of $48,884, and M. & I. B. McHugh, 607 Witherspoon Bldg., secured contract for the Roxborough pipe extension system, Item No. 2, for $24,822.

*The Millard Constr. Co., 704-9 Penna. Bldg., secured the contract for the 3d St. pipe extension, Item No. 1 (bids opened Sept. 17 by the Dept. of Pub. Wks., Bureau of Filtration), at a total of $75,414, including pipe, valves, valve boxes, etc. It bid for 2,354 tons 48-in. c. i. pipe, per ton, $28.90; 18 tons less than 48-in. c. i. pipe, $30; 65 tons c. i. H. & S. specials, $63; 5,300 lbs. gray iron castings, 5 cts.; etc. (time of completion, 90 days). Totals of other bids: Walter Wood, 400 Chestnut St., $43,139; U. S. C. I. Pipe &Fdry. Co., Land Title Bldg., $78,586, and J. K. Dimmick & Co., 2024 Land Title Bldg., $73,335. The Millard Contr. Co. also secured contract for Item No. 2 of the 3d St. extension (bids opened same time), for $17,545.

*The detail bid of Millard Constr. Co., 704 Pennsylvania Bldg., the successful bidder for preliminary filters at the Torresdale Sta. (bids opened Aug. 22 by the Bd. of Pub. Wks. Bureau of Filtration) is as follows: 40,000 cu. yd. excav., all kinds, 69 cts.; 60,000 cu. yd. embkmt., 60 cts.; 720 roof drain inlets for filters, ea., 60 cts.; 8,500 cu. yd. fill filter roofs, 50 cts.; 5,000 sq. yd. sodding, 20 cts.; 5 acres seeding, $100; 500 lin. ft. T. C. pipe, 8 in. and under, $1; 6,500 cu. yd. puddle, $2.30; 26,000 cu. yd. concrete, $9.60; furnishing 1,100,000 lb. reinforcing steel, $1.75; placing, 1,800,000 lb. reinforcing steel, per lb., 1 ct.; 300 cu. yd. red brick masonry, $15; 1,800 sq. yd. granolithic pavent., $2.25; 500 cuts 16 to 30 c. i. pipe, per cut, $4; 150 tons c. i. H. & S. pipe, to furnish, $35.20; 150 tens, c. i. H. & S. pipe, to lay, $9.60; 340 tons c. i. flange pipe, to furnish, $88; 700 tons c. i. flange pipe, to lay, $25; 150 tons c. i. H. & S. specials and fittings, to furnish, $66; 150 tons c. i. H. & S. specals and fittings, to lay, $18; 450 tons c. i. flange specials and fittings, to furnish, $95; 475 tons c. i. flange specials and fittings, to lay, $30; 250,000 lb. screw lap-welded steel pipe, to furnish, 3.5 cts.; 350,000 lb. screw lap-welded steel pipe, to lay, .0075 cts.; constructing reinforced concrete tank, lump sum, $21,000; 820 sq. yd. treating exposed surfaces of tank with acid, 10 cts.; steam heating system, complete, lump sum, $11,500; steel riveted conduits, complete, lump sum, $83,000; 960 wash water manifolds, eac., $73.50; 60,000 lb. structural steel, to furnish, 4 cts.; 1,800,000 lb. structural steel, to place, 1.5 cts.; 3,500 lin. ft. pipe railings, 78 cts.; 275,000 lb. wash water troughs, 4.5 cts.; 3,100 sq. yd. vit. brick pavent., $1.90; 3,400 lin. ft. straight granite curb., $1.26; 300 lin. ft. curved granite curb., $1.65; 400 lin. ft. 3-ft. brick sewer, $5; 2 brick sewer manholes, complete, ea., $60; constructing hydraulic piping system, complete, lump sum, $27,500; 120 loss of head gauges, complete ,to furnish, ea., $49; 120 loss of head gauges, to place, ea., $12; constructing air blower equipment, lump sum, $14,000; constructing electrical equipment, lump sum, $14,500; 72,000 lb. w. i. and steel fixtures, to furnish, 6 cts.; 72,000 lb. w. i. and steel fixtures, to place, 5 cts.; 50,000 lb. c. i. fixtures, to furnish, 5 cts.; 50,000 lb. c. i. fixtures, to place, 3 cts.; 570 ventilator frames and covers, ea., $9.85; 840 ventilator frames and covers, ea., $5; 5,700 lin. ft. 20-in. galv. spiral riveted pipe, $2.94; constructing filter house, complete, and brick walls around filters, lump sum, $51,000; 5,100 cu. yd. filter sand, $2.10; 10,700 cu. yd. filter gravel, $2.25; 120 16-in. stop valves, to place, ea., $15; converting 20x24 sluice gate into hydraulic gate, 120 ea., $115. Total bid, including gates, valves, etc., $1,156,410. Totals of other bids: The Mack Paving Co., 2032 Land Title Bldg., $1,156,758; Reiter, Curtis & Hill, 315 Arcade Bldg., $1,419,015; David Peoples, 1000 Betz Bldg., $1,261,051; Bennis Constr. Co., 211 So. 9th St., $1,248,591.

Panama.—See "Miscellaneous."

Aberdeen, S. D.—The Water & Sewer Com. is reported to have recommended the building of a reservoir and standpipe, at a cost of $14,000.

Harlingen, Tex.—The Harlingen Land & Water Co. is reported incorporated: capital, $300,000; incorporators, Lon C. Hill, Paul Hill, J. D. Hill and others.

Seattle, Wash.—The City Council has passed an ordinance for laying salt water mains on 1st, 2d and 3d Aves. for fire protection; estimated cost, $100,000.

Bids will be received by C. B. Bagley, Secy. Bd. Pub. Wks., until Oct. 5 for constructing water mains on N. and W. 80th St.; estimated cost, $17,100.

Waukesha, Wis.—President Ernst Merton, of the Water Comn., is stated to have presented a report to the City Council for the improvement of the waterworks and recommends the replacing of 11,973 ft. of the New England watermains in the business district and territory adjacent thereto, with standard cast iron mains, at an estimated cost of $20,678.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Bisbee, Ariz.—It is stated that bids will be received until Oct. 5 by C. W. Heicks, City Clk., for constructing a sewerage system. Olmsted & Gillen, Engrs., 616 Grant Bldg., Los Angeles, Cal.

Santa Monica, Cal.—The Council is reported to have adopted plans for the disposal of the city's sewage through an outfall to be built into the ocean at Colorado Ave., on recommendation of its Sewer Com. To construct the proposed sewer system, which will include a pier at least 1,600 ft. in length to support the outfall, the people will be asked to vote bonds to the amount of $155,000.

Pasadena, Cal.—S. J. Van Orman, City Engr., writes that the proposed outfall sewer for the annexed portion of Pasadena will cost about $50,000. An election will be held on question before contract for the work is let.

Montrose, Colo.—We are informed that bids have not yet been asked for the new sewer system.

Bridgeport, Conn.—The Sewer Comn., which has charge of revising the city's sewer system, and will supervise the installation of a system of sewage at a cost of about $250,000, has selected Rudolph Hering, of New York, N. Y., as the supervising and consulting engineer.

Berwyn, Ill.—Bids will be received until Oct. 3 by the Bd. Local Improv. (R. F. Stevens, Secy) for constructing pipe sewers in East Ave., 12th and 16th Sts.; total esti-

Chicago, Ill.—See "Miscellaneous."

Linton, Ind.—All bids opened on Sept. 16 by Common Council for constructing a sanitary sewer system consisting of approximately 13 miles of sewer with a disposal plant, are stated to have been rejected and new bids will be received Oct. 7. Approximate cost, $64,800. Frank Spelbring, City Clk.

Aurora, Ind.—Bids will be received until Oct. 11 by the Common Council for constructing a sewer in Dist. No. 1, to be composed of 6 to 20-in. salt-glazed vitr. pipe, manholes, catch basins, etc.; est. cost, $12,500. Fred D. Johnston, City Clk.

Brazil, Ind.—Geo. A. Fletcher, City Engr., writes that survey will probably be made in October for the proposed sewerage system for the south side of city.

Indianapolis, Ind.—Chas. A. Brown, Asst. City Engr., 903 Majestic Bldg., writes that bids will be received on Oct. 7 by the Bd. of Pub. Wks. for the construction of the E. Michigan St. sewer, to cost about $146,000. It will be of concrete on brick and pipe, and the size will range from 12-in. to 7 ft. in diam.

Bartlesville, Ind. Ter.—Frank B. Hornett, City Recorder, writes that about $50,000 will be expended for sewers. Engineer, E. C. D'Varmeth, of Bartlesville. mated cost, $4,000.

Lemars, Ia.—Bids will be received until Oct. 1 by the City Council for constructing 1,572 ft. 8-in. vitr. pipe sewer, 1 flush tank and 6 manholes. D. N. Hoffmann, City Clk.

*Items marked thus give the names of parties awarded contracts.

Dayton, Ky.—City Engr. Lindsey is reported to have about completed his survey and estimates for a sewer system, to include 3 trunk sewers, at a cost of about $100,000.

New Orleans, La.—Local press reports state that Sewerage and Water Bd. on Sept. 16 rejected all bids opened on Sept. 11 for the construction of, approximately, 110 miles of sewers and appurtenances. The sewers will range in size from 8 to 27 in. and in depth from 5 to 17 ft. and will include, approximately, 1,230 manholes and 443 flush tanks. The work will be divided into four contracts. F. S. Shields, Secy. George G. Earl, Genl. Supt.

**Westfield, Mass.*—Oren E. Parks, Town Engr., writes that Danl. A. Dorey, of Natick, has secured the contract for building Sec. 14 of storm water sewers (bids opened Sept. 18) at the following bid: 2,000 lin. ft. earth excav., 24 in., $1.25; 600 lin. ft. 20 in., 70 cts.; 780 lin. ft. 18 in. $1; 360 lin. ft. 15 in., 50 cts.; 660 lin. ft. 12 in., 50 cts.; 70 lin ft. 10 in., 40 cts.; 660 lin. ft. 8 in., 30 cts., and 1,500 cu. yd. brick masonry, $1.60; and 30 cu. yd. concrete masonry, $8; total cost, $7,076. P. A. McIntyre, of Mattapan, bid for this work $7,930.

St. Paul, Minn.—Specifications are reported to have been completed for a sewer on Goff Ave. for a distance of 6 blocks, 310 ft. of which will be a tunnel in sand rock.

**St. Paul, Minn.*—Thornton Bros. are reported to have on Sept. 12 secured the contract for constructing sewers on Reaney and Beech Sts., for $6,786.

Cannon Falls, Minn.—It is reported that a sewer will be constructed on 4th and Colville Sts.

Gulfport, Miss.—See "Water."

Columbia, Miss.—See "Water."

Kansas City, Mo.—Geo. Hoffman, Pres. Bd. of Pub. Wks., is reported to have decided to recommend to Mayor Beardsley that an expert be hired to come here to lay out a new sewerage system.

The West Side Council, it is reported, let a contract to R. J. and W. M. Boyd, Heist Bldg., for the construction of a sewer 2 miles long in the western part of the city, for $68,102. The sewer starts at 16th St. and Tauromee Ave., 2 blocks southwest of Carnival Park, and runs north and east, entering Jersey Creek at 9th St.

Carterville, Mo.—The City Council is reported to be considering the question of constructing a sewerage system.

Sedalia, Mo.—The City Council has passed ordinances as follows: To create sewer districts in Dist. 22; establishing a sub-district in Dist. 37; establishing sewer Dist. 38 and establishing sewer Dist. 39.

Humboldt, Neb.—M. N. Bair, Archt., Falls City, who is preparing preliminary plans for sewerage system, estimates the cost at $7,000.

Lincoln, Neb.—This city will build a combined sewer about 4,200 ft. long, 30 and 24-in. vitr. pipe, to cost about $11,000.

**South Orange, N. J.*—Bids were opened on Sept. 17 by South Orange Township Com. for the construction of sewers as follows: (Engineer, Alex Potter, 143 Liberty St., New York, N. Y.):

*Maplewood Dist. Sewer: Jas. J. Fusco, Montclair, secured contract at following bid: 151 ft. 10-in. vit. pipe sewer, 6 ft. deep, 77 cts.; 1775 ft. 10-in., 6 to 8 ft. deep, 82 cts.; 911 ft. 10-in., 8 to 10 ft. deep, 87 cts.; 350 ft. 10-in., 10 to 12 ft. deep, $1; 225 ft. 10-in., 12 to 14 ft. deep, $1.27; 48 ft. 10-in. c. i. pipe sewer, $1.29; 1367 ft. 8-in. vit. pipe sewer, 6 ft. deep, 55 cts.; 8139 ft. 8-in., 6 to 8 ft. deep, 59 cts.; 2672 ft. 8-in., 8 to 10 ft. deep, 67 cts.; 1990 ft. 8-in., 10 to 12 ft. deep, 77 cts.; 675 ft. 8-in., 12 to 14 ft. deep, $1; 135 ft. 8-in., 14 to 18 ft. deep, $1.37; 100 ft. 8-in., 18 to 22 ft. deep, $2; 12 ft. 8-in. c. i. pipe sewer, $1.15; 63 manholes, 10 ft. deep or less, $52; 23 ft. of manholes over 10 ft. deep, per ft., $10; 40 ft. drop manholes, per ft., $12; 12 flush tanks, complete, ea., $125; 40 branches on 10-in. pipe, ea., $1; 300 branches on 8-in. pipe, ea., 77 cts.; 40 ft. of deep-cut connections, per ft., 57 cts.; 100 cu. yds. concrete, per cu. yd., $7; 500 lin. ft. of timber cradle, 50 cts.; 1000 ft. 4-in. vit. pipe sewer, 6 ft. deep, 42 cts.; 1200 ft. 4-in., 6 to 8 ft. deep, 47 cts.; 400 ft. 4-in., 8 to 10 ft. deep, 57 cts.; 500 ft. 6-in. vit. pipe under drain, $1. Total, $21,614.95. Totals of other bids: Chas. Ippolito, Orange, N. J., $21,881; Steele & Bave, Owego, N. Y., $22,334, and Eveline Bros., New Britain, Conn., $25,232.

*Total of bids for South Orange Heights Dist. sewer: Pasquale Cestone, Montclair, $17,496 (awarded contract); Jas. J. Fusco, Montclair, $18,002; John Driscoll, Orange, $18,576; Steele & Bave, Owego, N. Y., $18,764; Chas. Ippolito, Orange, $19,486; Eveline Bros., New Britain, Conn., $21,115; R. M. Rosser, Kingston, Pa., $22,215, and Jas. A. Christie, Newark, $25,796.

**Jersey City, N. J.*—Chas. O'Neill is reported to have secured the contract for a sewer in Stegman St. from Jackson Ave. to connect with the sewer in Van Cleef St.

Englewood, N. J.—Bids will be received until Oct. 5 by the Englewood Sewerage Co. (Oliver Drake Smith, Secy.) Park Pl. and Dean St., at Englewood, for constructing a pipe sewer approximately 6,590 ft. 12-in. pipe with manholes, as advertised in The Engineering Record.

Trenton, N. J.—Bids will be received until Oct. 1 by the Common Council for constructing a sewer in a portion of Barbara St.; also a drain in Paul Ave.

New Brighton, L. I., N. Y.—Bids will be received until Oct. 8 by Geo. Cromwell, Boro. Pres., for furnishing material and constructing temporary sewers in Innis St., Blackford and Sherman Aves., and Fingerboard Rd.; relaying and extending the Nicholas Ave. sewer. Engineer's estimate: 6,413 lin. ft. salt-glazd vitr. pipe sewer, 6 and 8-in. interior drain; 372 lin. ft. c. i. pipe, 12-in. interior diam.; 27 manholes, 9 flush tanks, with No. 5 Van Vranken siphon, etc.

Sea Cliff, L. I., N. Y.—G. Griffith Clapham, Village Clk., writes that the proposed sewage disposal system will cost about $50,000. Nothing definite has yet been done. Dr. H. G. Wahlig, Health Officer, is also reported interested.

Brooklyn, N. Y.—Bids were opened on Sept. 18 by Bird S. Coler, Pres. Brooklyn Boro., for sewer work in Brooklyn, as follows:

For constructing sewers in Flatbush Ave., westerly side, from Nassau St. to Fleet St., etc., Sec. 10. This work consists of 320 lin. ft. 48-in. and 1,570 lin. ft. 42-in. brick and concrete sewer, 500 lin. ft. 18-in., 750 lin. ft. 15-in. and 1,630 lin. ft. 12-in. pipe sewer, 900 lin. ft. 6-in. extra heavy c. i. standpipe, 60 6-in. extra heavy c. i. bends, 18 manholes, Class B; 30 manholes, Class C; 16 sewer basins and 60 m. ft. sheeting and bracing. (*a* percentage bid, *b* totals): Murphy Bros., *a* 137.9 per cent, *b* $64,672; John J. Creem, *a* 114⅞ per cent, *b* $53,873; Hammond & Sloane, Inc., *a* 136 per cent, *b* $63,781; Leo E. Kelly, *a* 118½ per cent, *b* $55,574; Jas. L. Carey & Co., *a* 108.18 per cent, *b* $50,734.

Sewers in Flatbush Ave. extension, westerly side, from Nassau St. to Fleet St., etc., Sec. No. 2. (*a* percentage bid, *b* totals): Hammond & Sloane, Inc., *a* 116 per cent, *b* $21,353; John J. Creem, *a* 112½ per cent, *b* $20,708; Jas. L. Carey & Co., *a* 108.18 per cent, *b* $19,915; Leo E. Kelly, *a* 122 per cent, *b* $22,451.

Gastonia, N. C.—See "Water."

Lenoir, N. C.—See "Water."

Grand Forks, N. D.—The City Council is reported to have adopted resolution accepting the plans of Engineer Gray, of Crookston, for a sewer system in Sewer Dist. No. 2.; estimated cost, $11,000.

University, N. D.—See "Schools."

Leipsic, O.—It is stated that bids will be received by H. G. Moenter, Village Clk., until Oct. 2 for constructing a sewer in Poplar St. Riggs & Sherman, Engrs., Toledo.

Hamilton, O.—See "Power Plants, Gas and Electricity."

Columbus, O.—It is stated that bids will be received until Oct. 4 by the Bd. Pub. Service (Edwd. F. McGuire, Secy.) for constructing the East Side sewage pumping station; probable cost, $50,000. Henry Maetzel, City Engr.

**Cincinnati, O.*—Thos. P. Strack, 518 Walnut St., is reported to have secured the contract for a sewer in the streets and right-of-way west of Enright Ave. and south of Warsaw and Glenway Aves., Price Hill, for $77,480.

City Engr. Danenhower is reported to have submitted a resolution to the Bd. of Pub. Service, asking for a sewer in Herschell and Red Bank Aves.; estimated cost, $26,776.

Steubenville, O.—Bids will be received at the office of the Bd. of Pub. Service (T. W.Vance, Clk.) until Oct. 14 for furnishing material and constructing brick and pipe sewers, as advertised in The Engineering Recodr.

Youngstown, O.—Bids will be received until Oct. 1 by the Bd. Pub. Service (W. H. McMillin, Clk.) for furnishing material and constructing a sewer in a portion of Garfield St.

Mingo Junction, O.—It is reported that bids will be received until Oct. 2 by Frank McAllister, City Clk., for constructing sewers in certain streets.

Batavia, O.—Bids are wanted, it is stated, until Oct. 7, for the purchase of $5,725 sewer bonds. G. H. Kain, Clk. Village.

Zanesville, O.—The Bd. of Pub. Service is reported to have approved the plans of H. I. Buell for the construction of the Southwestern sewer.

**Springfield, O.*—John Grady is reported to have secured the contract for constructing sewers in Walnut, Bane and Market Sts., for $6,520.

Norwalk, O.—The following are reported to be the bids opened by the Bd. of Pub. Service on Sept. 17 for laying storm and sanitary sewers from the intersection of St. Mary's St. to site of the proposed sewage disposal works, (*a*) concrete, (*b*) brick: Municipal Engineering Co., Akron, O., *a* $27,021; H. W. Matthews, Lorain, O., *a* $32,111; Cummerford & Quinn, Norwalk, *a* and *b* $24,890; Penney & Corron, Lorain, O., *a* $24,285, *b* $30,216.

**Philadelphia, Pa.*—Contracts for sewers (bids opened on Sept. 11 at the office of the Dept. of Pub. Wks., Bureau of Surveys) are reported to have been awarded as follows: To Lombards & Pascuzzi for extension of Thomas' run sewer, $23,127, and extension of sewer at Bingham St., $13,840; to David Peoples for extension of Wissahickon low-level intercepting sewer, $28,620, and extension of Jackson St. sewer, $36,121; to Edwin H. Vare, reconstruction of Market St. sewer, $3,925, and extension of Wissahickon high-level sewer, $47,840; to Patk. Durkin for sewer on 12th St. from Louden to Ruscomb Sts., $8,020; to Richard P. Bennis for sewer on 9th St. from Erie Ave. to Butler St., $24,405, and to the Millard Constr. Co. for reconstructing Pine St. sewer, for about $25,000. Awards were also made for branch sewer work aggregating upwards of $75,000.

*The following are the totals of bids opened on Sept. 17 by the Dept. of Pub. Wks., Bureau of Filtration, for constructing sewer connecting upper Roxborough filters: David Peoples, 1000 Betz Bldg., $23,472; Robt. P. Ryan, 2116 N. 30th St., $17,543; David McMahon, 600 E. Chelten Ave., $20,267; T. F. Reilly, Harrison Bldg., $12,074 (awarded contract); to be completed in 90 days; the Mack Paving Co., 2032 Land Title Bldg., $20,713.

Reading, Pa.—The City Council on Sept. 16 passed the ordinance providing for the issue of $40,000 bonds for building storm water sewers; also for the construction of house drain sewers, etc., in Dist. 12.

Braddock, Pa.—It is stated that bids will be received until Oct. 3 by C. A. Stewart, Boro. Engr., North Braddock, for constructing sewers in portions of several streets.

Carlisle, Pa.—The State Health Dept. is reported to have approved the double contract system of sewerage. According to the plans and estimates the system will cost $111,359, and this will include the district bounded by North, South, East and College Sts.

Allegheny, Pa.—The Council on Sept. 18 passed an ordinance providing for the issue of $10,000 bonds for the construction of a sewage disposal plant at the Allegheny City Home.

Chattanooga, Tenn.—Bids will be received by the Bd. of Pub. Wks. (H. F. Van Dusen Chmn.) until Oct. 15 for the construction of a brick main sewer and appurtenances on Chestnut St. as advertised in The Engineering Record.

Wichita Falls, Tex.—Edgar Rye, City Secy., writes that the citizens on Sept. 9 voted to issue $20,000 sewer bonds.

Whiterocks, Utah.—Bids will be received until Oct. 23 by F. E. Leupp, Comr. Indian Affairs, Washington, D. C., for furnishing material and constructing a sewerage system and plumbing, Uintah and Ouray Agency. For further information apply to Capt. C. G. Hall, Acting Agt., Whiterocks.

Seattle, Wash.—Bids will be called for within a few weeks for the construction of the Lake Union Dist. of the north trunk sewer.

Bids will be received by C. B. Bagley, Secy. Bd. Pub. Wks., on Oct. 5, for constructing sewers on Hiawatha Pl., at a cost of $7,100, and on N. 39th St.; est. cost, $33,500.

Bids will be received by C. B. Bagley, Secy. Bd. of Pub. Wks., on Oct. 5, for the following improvements: Grading and curbing Furman Ave. and constructing necessary bulkheads or retaining walls; estimated cost, $31,200; grading portion of Main St. and curbing same, building wood sidewalks and constructing a plank roadway, est. cost, $6,000; 6th Ave. N. E., grading and constructing concrete sidewalks, est. cost, $10,800; constructing concrete walks on Irving St. and curb and gutters, est. cost, $6,300, and paving Union St. with vitr. brick, together with granite curb, and addition to water-main and sewer systems, as may be necessary, est. cost, $23,300. New bids will also be received on Oct. 5 for paving 40th Ave.

A resolution will be introduced before City Council on Sept. 23, for the improvement of Railroad Ave., by constructing a concrete bulkhead or retaining wall, and grading; total estimated cost, about $1,000,000.

**Lake Mills, Wis.*—The contract for constructing 9,777 ft. pipe sewer (bids opened Sept. 13) has been awarded to F. E. Kaminski, of Berlin, for $10,542. Engineer, W. G. Kirchoffer, of Madison.

BRIDGES.

Notes Arranged Alphabetically by States.

Sacramento, Cal.—See "Public Buildings."

**Sedalia, Colo.*—G. N. Houston, Deputy State Engr., Denver, writes that C. G. Sheely, of Denver, has secured the contract for constructing reinforced concrete bridge across Plum Creek, Sedalia (bids opened Sept. 3) for $3,605, to be completed Nov. 1, 1907.

Malta, Colo.—The lowest bid opened on Sept. 13 at the State Engrs. Office, Denver, for constructing the Lane County bridge, near Malta, was submitted by the National Constr. Co. of Denver, at $4,587.

**Anacostia, D. C.*—The contract for filling the approaches to the Anacostia bridge (bids opened by the Comrs. D. C., at Washington, D. C., on Sept. 14) has been awarded to the Warren Brenizer Co., of Washington, D. C. The bids called for an estimated filling in of 131,000 cu. yds.; total cost, $39,955.

Spring Valley, Ill.—Bids will be received until Oct. 1 by Anton Faletti, City Clk., for building an ice breaker and protection pier and driving pile booms on the east side of the Illinois River Bridge, and for completion of protection pier on west side of Illinois River.

Chicago, Ill.—Bids for constructing the 95th St. Bridge are reported to have been opened Sept. 14 by Mr. Hanberg, Comr. of Pub. Wks., as follows: M. P. Byrne Constr. Co., 88 Washington St., $23,390, and Warner Constr. Co., $17,396.

Belvidere, Ill.—All bids opened Sept. 11 for constructing a bridge over Kishwaukee River at Main St. are stated to have been rejected, being in excess of the $8,500 appropriation.

South Bend, Ind.—A. J. Hammond, City Engr., is reported to have estimated the cost of constructing a bridge over the East Race on E. La Salle Ave. as follows: Single span Melan Arch bridge, 80 ft. wide, $19,000; reinforced concrete beam bridge, 3 spans, with 2 piers, $12,775.

Tipton, Ind.—It is stated that bids will be received by the Co. Comrs. until Oct. 7 for construction of bridge over Turkey Creek. J. F. Barlow, Co. Aud.

Evansville, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Oct. 3 for constructing 3 reinforced concrete bridges. Harry Stinson, Co. Aud.

Hammond, Ind.—It is stated that bids will be received until Oct. 14 by the Bd. Co. Comrs. at Crown Point for constructing a swing bridge over Calumet River at Columbia Ave., Hammond. Chas. A. Johnson, Co. Aud., Crown Point.

Erie, Kan.—It is stated that bids will be received until Oct. 15 by the Bd. Co. Comrs., at the office of O. M. Johnson, Co. Clk., for constructing 3 steel or iron bridges across the Neosho River, as follows: One 200-ft. span, one 70-ft. span, two 30-ft. I-beam approaches, 20-ft. roadway, 1 mile east of Chanute; one 200-ft. span, one 75-ft. span, one 30-ft. I-beam approach, 14-ft. roadway, 2½ miles west of Erie; one 200-ft. span, one 50-ft. span, one 30-ft. I-beam approach, 14 ft. roadway, 1 mile south of St. Paul, all to have concrete abutments; also a 30-ft. I-beam bridge 7 miles southeast of Thayer.

Atchison, Kan.—It is stated that bids will be received until Oct. 7 by the Bd. of Co. Comrs. (J. C. Hotham, Chmn.) for rebuilding bridge No. 230, Mt. Pleasant Township.

Eureka, Kan.—It is stated that the Bd. Co. Comrs. will receive bids until Oct. 10 for constructing a steel bridge, 60-ft. span and one 24-ft. approach. W. H. Bonnett, Co. Clk.

Baltimore, Md.—Mr. Fendall, City Engr., is reported to be preparing plans for a bridge over Gwynns Falls at Edmondson Ave., estimated cost of proposed structure, $180,000.

Medford, Mass.—Bids will be received until Oct. 1 by Clifford M. Brewer, Mayor, for constructing a foot bridge of reinforced concrete, over the Boston & Maine R. R. tracks from Pembroke to Washington Sts. Fred. R. Charnock, City Engr.

Fitchburg, Mass.—The construction of a bridge at Water, Summer and 4th Sts. is reported contemplated, at a cost of $100,000.

**Groton, Mass.*—Wm. H. Ward, of Lowell, has secured the contract for constructing a concrete-steel beam bridge between Groton and Peperell (bids opened Sept. 17) for $15,414.

**Items marked thus give the names of parties awarded contracts.*

Muskegon, Mich.—The construction of a bridge over Mona Lake is reported contemplated, at a cost of $25,000.

St. Louis, Mo.—The United Free Bridge Com. is stated to have voted in favor of constructing the free bridge at Chouteau Ave.

**Russellville, Mo.*—The contract for constructing the bridge over the Moreau at Rock House ford near Russellville is reported to have been awarded to Canton Bridge Co., of Canton, O., for $6,660.

Glendive, Mont.—Bids will be received at the office of the U. S. Reclamation Service, Glendive, until Nov. 15 for the construction of 34 steel highway bridges in connection with the Lower Yellowstone project, N. D.-Mont., as advertised in The Engineering Record.

Oceanic, N. J.—Jas. M. Rawley is stated to have submitted a report to the Bd. of Freeholders of Monmouth County on the condition of the bridge over the Shrewsbury River at Oceanic. The estimated cost of a new substructure is $52,048.

New York, N. Y.—Bids will be received by Jas. W. Stevenson, Comr. Bridges, until Oct. 3 for the construction of the Madison Ave. Bridge over the Harlem River.

Cohoes, N. Y.—It is stated that at the conference between the Street Com. and the New York Central & Hudson River R. R. Co. (Geo. W. Kittredge, Ch. Engr., New York), held Sept. 16, it was decided by the committee to recommend to the Common Council the entering into a contract between the city of Cohoes and the New York Central R. R. for the widening of Columbia St. approaching the arch now there and the building of another arch 60 ft. wide; estimated cost will be $31,000.

Little Falls, N. Y.—See "Railroads."

**Cincinnati, O.*—Granger & Co., of Louisville, Ky., are stated to have submitted the lowest bid, Sept. 20, to Bd. Pub. Service for structural steel work of Liberty St. Viaduct, at $131,000.

Hamilton, O.—Separate bids will be received until Oct. 8 by the Bd. Co. Comrs., at the office of C. Pabst, Co. Aud., for the construction of a substructure and superstructure of a bridge over 2 Mile Creek on the 7 Mile Pike, north of the corporation line of the City of Hamilton; bids will also be received on concrete-steel construction.

Toledo, O.—It is reported that bids will be received by the Co. Comrs., at Toledo, until Oct. 14, for constructing 2 concrete masonry abutments for bridge across Ten Mile Creek at Ottawa Terrace, Washington Township.

Fremont, O.—Bids will be received, it is stated, until Oct. 7 by the Bd. Co. Comrs. for constructing substructure and steel and concrete superstructure over Big Mud Creek; also taking down steel bridge which is now across said creek; also taking out abutments under old bridge; also straightening said creek for a distance of 250 ft. and filling in of old channel at old bridge. S. M. Froznier, Co. Aud.

Dayton, O.—The City Council is stated to have passed an ordinance providing for the erection of a bridge over Wolf Creek at Edgewater Ave., from discarded spans of Stratford Ave. Bridge; estimated cost, $9,000.

Panama.—Bids will be received at the office of H. P. Hodges, Gen. Purchasing Officer Isthmian Canal Comn., Washington, D. C., until Oct. 24, for a steel railroad bridge, as advertised in The Engineering Record.

Jersey Shore, Pa.—It is stated that bids will be received until Oct. 8 by Saml. B. Rambo, Supt. Pub. Grounds and Bldgs., Harrisburg, for rebuilding the bridge over the east channel of the west branch of the Susquehanna River, near Jersey Shore.

**Philadelphia, Pa.*—Contracts for constructing bridges (bids opened Sept. 11 at the office of the Bureau of Surveys) are reported awarded as follows: Northeast Boule. bridge, over Tacony Creek and Ashdale St., to D. J. McNichol & Co., $94,949, to be completed in 12 mths; Belmont and Girard Ave. bridge, over Pennsylvania R. R., J. E. McHugh, $69,323, time, 7 mths; bridge at Columbia Ave. and 31st St., over connecting railway, McGaw & Gray, $47,703, time, 7 mths; Northeast Boule. bridge over Reading Ry., Richard Walsh, $41,000, time, 6 mths.

Johnstown, Pa.—The Common Council is stated to have passed a resolution authorizing the City Engineer to prepare estimates on the construction of a 225-ft. steel bridge over Stoney Creek at Haynes and Bedford Sts.

Chester, Pa.—The construction of a bridge over Chester Creek at 5th St. is reported contemplated.

Sheraden, Pa.—Plans are stated to have been prepared for a concrete structural steel bridge to be constructed over Panhandle tracks at the station, at a cost of about $[illegible]. Thos. Rodd, Ch. Engr., Union Station, Pittsburg.

Wallis, Tex.—The Comrs. Court at Richmond is reported to be considering the construction of a bridge over Brazos River at Wallis, probable cost, $42,000.

**Morgantown, W. Va.*—The County Court is reported to have awarded the Canton Bridge Co., of Canton, O., the contract for constructing an iron and steel bridge over Monongahela River, at a cost of $100,000.

**Milwaukee, Wis.*—The County Bd. on Sept. 17 is stated to have awarded the contract for constructing the Grand Ave. Viaduct to the Newton Engineering Co., 310 Mason St., for $372,000.

Sheboygan, Wis.—Plans are stated to have been prepared for the construction of a bridge over the River at Pennsylvania Ave.; probable cost, $65,00.0

PAVING AND ROAD MAKING.

**Toronto, Ont.*—The Bd. of Control on Sept. 18 is reported to have awarded contracts for paving as follows: Godson Constr. Co., Brock St. with asphalt, $4,482, Clinton St. with asphalt, $3,788; Barber Asphalt Paving Co., Elliott St. with asphalt, $4,044; Constr. & Paving Co., Manning Ave. with asphalt, $13,974; C. H. Rust, Castle Frank with asphalt, $5,700 and Hogarth St. with macadam, $15,395.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Huntsville, Ala.—Francis N. Lawton, Gen. Mgr., Supt. and Purchasing Agt. of the Huntsville Ry. Light & Power Co., is reported to have announced that plans have been drawn for the doubling of the capacity of the power house and for the extension of the street railway system.

Redlands, Cal.—The Edison Electric Co., of Los Angeles, is reported to be considering the construction of a new power house in the Santa Ana Canyon next year, to use the water of Bear Creek.

Stockton, Cal.—Press reports state that it will require an expenditure of about $250,000 to repair the damage to the power plant of the Standard Electric Co. at Electra.

Los Angeles, Cal.—The Tejunga Power & Water Co. is reported organized with a capital of $250,000 to conserve and develop the waters of Little Tejunga Canyon and distribute it for irrigation purposes in the San Fernando Valley. Bennett's spring is the source of supply, and it is estimated by the promoters that 400 inches of water can be developed. Cal F. Hunter, Johnston Jones, Dr. J. W. Trueworthy are reported interested.

Montezuma, Colo.—The Montezoma Mines Development Co. is stated to have secured water rights on Snake River and proposes in the spring to construct a power plant to furnish light and power for the mines of the district.

Las Animas, Colo.—Bids will bereceived at the Bureau Yards and Docks, Navy Dept. (Wm. M. Smith, Acting Ch.), Washington, D. C., until Nov. 9, for furnishing material, constructing and installing a stone building for central power plant, boilers, electric generators, switchboards, steam engines, steam-driven pumps, icemaking refrigerating and distilling machinery, hot water heating system, complete, extending to several buildings; air-lift pumping system, garbage crematory and building, installation of steam disenfector and all piping, valves, accessories and wiring; also coal dump and retaining wall, at the U. S. Naval Hospital, New Ft. Lyon, Colo., as per specification No. 1,536.

Laurel, Del.—The electric light plant of the Laurel-Seaford Electric Co. is reported to have been destroyed by fire on Sept. 21. Chas. C. Stephenson, Mgr., Laurel.

Washington, D. C.—See "Miscellaneous."

Auburn, Ga.—The business men, it is stated, intend petitioning Mayor and City Council to call an election to vote on issuing $55,000 bonds, of which $45,000 is to be used to erect and equip an electric light plant and a system of water works.

Millen, Ga.—The citizens are reported to have voted on Sept. 16 to issue $30,000 bonds for waterworks and an electric light plant.

Coeur D'Alene, Idaho.—The Idaho Water & Electric Power Co. is reported organized, with J. McClear, Pres.; P. J. Scallon, Vice-Pres., and Maude Thornton, secy. This company has been formed for the purpose of developing the water power along St. Joe River by the construction of many dams. The power generated will be utilized in assisting the heavy traffic across the mountains on the Chicago, Milwaukee & St. Paul R. R. It is promoted by the railroad company.

Albion, Ill.—The Albion Gas Light & Heating Co. is reported to have been incorporated, with a capital of $7,500 by W. H. Brosan, Harry Smith and others.

Cherry Valley, Ill.—W. H. Poulton and W. W. Mockey are reported to have purchased the Cherry Valley mills and elecric plant. The new owners intend to fix up the mills and install new machinery.

Berlin, Md.—Orlando Harrison, Mayor, writes that the City Council has decided to extend the time for granting of franchise for waterworks and electric light plant from Sept. 20 to Oct. 31, with the prospect of placing an ice plant in connection with same.

Salem, Mass.—See "Schools."

Forest, Miss.—It is reported that E. Cahn, of Meridian, Miss., Mgr. of the Forest Ginning & Mfg. Co., will install electric light plant.

Columbia, Miss.—The Bd. of Mayor and Town Council is reported to have contracted with Grayson & Elder, of Biloxi, to erect and maintain an electric light plant in the town, granting them a franchise of 25 years. They also promise to put in a 20-ton ice plant at the same time.

Helena, Mont.—The Capital City Power Co., of New Jersey, is reported incorporated with a capital of $2,000,000, by B. R. Higgins, S. Hartman and H. S. Leonard, of New Jersey, to develop and sell water power and electricity. A. P. Thatcher, of Helena, Mont., is named as state agent. This is the corporation which has been formed for the purpose of building the third dam across Missouri River, near Helena.

**Jefferson City, Mo.*—The Warden and Bd. of Prison Inspectors of the Missouri State Penitentiary have awarded contracts as follows for the ventilating, heating and lighting plant for the Penitentiary: Boiler house building, to John Short, Jefferson City, $5,950; steam boilers, to Heine Safety Boiler Co., St. Louis, $20,400; steam engines, to St. Louis Iron & Machine Wks., St. Louis, $21,200; dynamos, to Western Electric Co., Kansas City, $24,064; motors, to Westinghouse Electric & Mfg. Co., St. Louis, $12,350; conduit and cable work, F. E. Newberry & Co., St. Louis, $10,252,

**Items marked thus give the names of parties awarded contracts.*

and pipe work, steam heating and ventilating, Peters-Eichler Heating Co., $52,924.

St. James M.—The Executive Bd. of the Soldiers' Home (Capt. H. E. Warren, Pres.) is reported to be considering the erection of a power house to replace the one recently burned.

Fremont, Neb.—J. W. Andrews, City Engr., writes that bids will be received on Sept. 30 for the construction of building and smokestack for the municipal water and light station. Contracts for engines, boilers and dynamos have been let. Engineer, C. A. Chapman, Marquette Bldg., Chicago, Ill. E. N. Mors, Chmn. Bd. Pub. Wks.

Perth Amboy, N. J.—An explosion is reported to have on Sept. 23 wrecked the generating plant of the Perth Amboy gas works. A. F. Reitemeyer, of Elizabeth, Supt.

Atlantic City, N. J.—Chmn. Donnelly, of the Council's Lighting Bd., is reported to have approved plans for the system of illumination for Atlantic Ave. as prepared by Carrere & Hastings, of New York, N. Y. It is stated that the City Council will authorize a bond issue of $30,000 to provide for the installing of the system.

Alamogordo, N. M.—The Sacramento Power Co., of Alamogordo, is reported incorporated, with a capital of $1,000,000. The proposed improvement includes the construction of a storage dam for irrigation purposes. A. T. Payne, of Oklahoma City, Okla., is reported interested.

**New York, N. Y.*—Contracts for installing electric equipment in schools (bids opened Sept. 23 by C. B. J. Snyder, Supt. School Bldgs.) have been awarded as follows: School 98, Manhattan Boro., T. Fred Jackson, Inc., 592 Columbus Ave., for $10,573; School 140, Brooklyn Boro., to Peet & Powers, 225 4th Ave., New York City, $4,560, and School 89, Queen's Boro., to L. F. Benn, for $11,240.

Brooklyn, N. Y.—The following are the bids opened on Sept. 14 at the office of the Bureau of Yards and Docks, Navy Dept., Washington, D. C., for 15 motor generator sets and accessories for the New York Navy Yard: Westinghouse Electric & Mfg. Co., 1507 Continental Trust Bldg., Baltimore, Md., $62,095; Western Electric Co., 463 West St., New York, N. Y., $84,480; and General Electric Co., Schenectady, N. Y. (2 bids), $61,-510 and $52,560.

**Columbus, O.*—Geo. Stockton, Supt. Columbus State Hospital, writes that contracts were let on Sept. 17 for addition to power plant: New engine to the Ironton Engine Co., of Ironton, $2,498, and dynamo and switch board to F. Bissell Co., of Toledo, for $3,550.

Hamilton, O.—It is stated that bids will be received until Oct. 12 by Thad. Straub, City Aud., for $20,000 electric light bonds; also $20,000 storm sewer bonds.

Lebanon, Pa.—It is reported that the Cornwall Ore Bank Co. is about to construct a power plant at Lebanon, and intends to transmit high-tension electric energy to Cornwall for the purpose of furnishing power for crushing iron ore, etc. Quincy Bent is Mgr. of Penna. Steel Co. at Lebanon, Pa.

Allegheny, Pa.—The Council on Sept. 18 passed the ordinance providing for the issue of $75,000 bonds for the purchase of a turbo-generator outfit for the municipal lighting plant.

Scranton, Pa.—The Scranton Electric Co. (A. J. Duffy, Electrician) is reported to have decided to extensively improve its plant.

Royer, Pa.—Engineer Frank W. Moore, Box 557, Indiana, Pa., writes that the proposed electric plant to furnish light and power to Williamsburg, Martinsburg and Royer will cost about $45,000. Bids will probably not be called for until 1908.

Seneca, S. C.—The City Clk. writes that bonds have been issued for the construction of an electric light plant.

Fredericksburg, Va.—The City Council is reported to have appropriated $4,000 for the work of adding to the city electric light plant an incandescent system for lighting stores and dwellings.

Boydton, Va.—R. W. Lassiter, of Oxford, N. C., is reported to be here negotiating with owners of lands on the Roanoke River, with a view of securing the water rights on the river for the purpose of establishing an electric plant at Eagle Point Falls.

Spokane, Wash.—It is reported that the Power Development Co., which is a subsidiary corporation of the Spokane & Inland R. R. Co. and one of the corporations belonging to the Inland Empire system, will have a surplus of 10,000 to 15,000 h. p. from the new power station at Nine Mile Bridge as soon as the plant at that place is completed, after supplying electric power to the railway lines of the system. It is proposed to utilize this surplus power by supplying light and power to the citizens of Spokane under the franchise purchased by Jay P. Graves and associates from Frank P. Hogan.

Elkins, W. Va.—The Elkins Power Co. is reported incorporated with a capital of $75,000, by Stephen B. Elkins, J. T. Davis and others.

Platteville, Wis.—The Platteville Gas Co. is reported incorporated, with a capital of $50,000. P. R. Crahden is reported interested.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Huntsville, Ala.—The Huntsville Ry., Light & Power Co. (R. N. McLure, Ch. Engr.) states that plans have been drawn for the doubling of the capacity of the power-house and for the extension of the street railway system. The Merrimack end of the line will be extended half a mile to Sanaqua Wells, while the Dalls end will be looped around to the Meridianville pike and back into the city by way of the Southern Depot.

Redding, Cal.—It is reported that the Northern Electric Co. plans to extend its line to Red Bluff, also to Redding and probably Kennett. C. S. Compton, Ch. Engr.

Sand Point, Idaho.—It is stated that an ordinance will soon be placed before the Council asking for a franchise granting right to Chas. R. Foss, John C. Cleary and Peter Johnson to build, maintain and operate a steam or electric railway on the streets of Sand Point.

Caldwell, Idaho.—The Boise & Interurban Ry. Co. (F. H. Knox, Ch. Engr.) is stated to have decided to build a street railway line in Caldwell and to extend its present line from the city to the Canyon County fair grounds, which are located about a mile distant.

Crawfordsville, Ind.—The Indianapolis & Eastern Ry. Co. (C. C. Reynolds Gen. Mgr.) is reported to have announced that the contract for the construction of a branch line from Crawfordsville to Danville, Ill., will be let this year, work to begin early in the spring.

Indianapolis, Ind.—The City Park Bd. is reported to have granted to the Grand Central Traction Co. a right of way across the western side of Garfield Park for an electric railway.

Paducah, Ky.—The Southern Constr. Co. is stated to have awarded a contract to the American Engineering Co., of Indianapolis, Ind., to survey a route for the interurban railway projected from Hickman to Paducah. Two routes have already been surveyed and right-of-way has been secured.

Boston, Mass.—Bids will be received until Oct. 3 by the Boston Transit Comn. (B. Leighton Beal, Secy.) for constructing part of new westerly wall roof and invert for enlargement of subway, Haymarket Sq.

Brockton, Mass.—It is stated that the Old Colony St. Ry. Co. is planning to lay stretch of new tracks nearly a third of a mile long on Belmont St. About $15,000 will be expended in this work.

Norwich, N. Y.—The Chenango Valley Co., which proposes to build an electric railway from Binghamton to Norwich and up the Canaswacta and Otselic valleys to South Otselic, Hamilton and the Utica Southern, which is planning to build from Utica to Norwich, have been granted franchises through the Norwich.

Grand Forks, N. D.—It is reported that Robt. Thompson, of Holmes, will take up the project of buidling an electric railway from Grand Forks to Carington.

Cleveland, O.—The Co. Comrs. are reported to have granted the Cleveland, Brooklyn & Elyria Ry. Co. a franchise to build and operate an electric railway through the county along Wooster Pike.

Neopolis, O.—The Co. Comrs. are stated to have granted a franchise to the Toledo & Delphos Electric Ry. Co. to use the streets of the village of Neopolis and to cross the county roads where necessary.

Ashtabula, O.—It is reported that plans have been formulated for a road from Painesville eastward through Lineville to Jefferson, where it will connect with the Pennsylvania & Ohio R. R.

Toledo, O.—A franchise is stated to have been granted the Toledo & Defiance R. R. Co. by the County Comrs., permitting the company to operate an interurban electric railway on private right-of-way through the county.

The County Comnrs. are stated to have granted to the Toledo & Delphos Electric Ry. Co. a franchise to use the streets in Peapolis. The corporation is constructing an electric line from Toledo to Delphos, paralleling the Wabash Ry.

Portland, Ore.—The Oregon Electric Co. (H. T. Corbett, Vice. Pres.) is stated to have decided to construct a branch line from Portland to Hillsboro, a distance of about 7 miles.

Scranton, Pa.—Franchises are reported to have been granted the Clark Summit & Winola St. Ry. Co. by the Townships of Abington, Newton, Falls and Overfield. The new street railway will connect with the Dalton St. Ry. and will, with the latter system, embrace a direct route to Lake Winola.

Freeland, Pa.—The Town Council is stated to have passed the Lehigh Traction franchise ordinance, giving that company the right to extend its lines to Front St. and further north, if desired. A. Markle, Gen. Mgr., Hazleton.

Northampton Heights, Pa.—The Easton & South Bethlehem Electric Ry. Co. is stated to have decided to build a 4,300-ft. extension in Northampton Heights.

Ft. Worth, Tex.—It is stated that the Northern Texas Traction Co. will double the capacity of its powerhouse, expending about $150,000. H. M. Flanders, Ch. Engr., Handley.

Brantford, Ont.—It is stated that the Grand Valley Radial Co. (T. Andrews, Ch. Engr., Brantford), will shortly award contracts for the construction of the line between Brantford and Port Dover, via Waterford and Simcoe, a distance of 34 miles.

Chatham, Ont.—The Chatham, Wallaceburg & Lake Erie Ry. Co., having completed its road to Lake Erie, is reported to be planning to extend to Wallaceburg. Robt. E. Kizer, Genl. Mgr.

Kingston, Ont.—The contract for the construction of the powerhouse of the Sydney & Glace Bay, Ry., at Dominion No. 4, is stated to have been let to Rhodes, Curry & Co., of Amherst. The plant and machinery will cost $25,000.

RAILROADS.

Notes Arranged Alphabetically by States.

Lafayette, La.—The Eunice, Lafayette & Abbeville R. R. Co. is reported incorporated at Lafayette to build a railroad from Eunice in a southeasterly direction to Lafayette and from Lafayette to Abbeville and from there to any deep-water point on the Gulf coast. Capital, $1,000,000. Directors, Gus. Fusilier, Julius J. Stagg, Jas. J. Lewis and others.

Buffalo, N. Y.—The contract between the city and the Grand Trunk R. R. Co. for eliminating the grade crossing at Niagara St. and International Bridge is reported to have been approved.

Little Falls, N. Y.—The New York Central & Hudson River R. R. Co. (W. G. Wilgus, of N. Y. City, Vice-Pres. Constr. Dept.) is reported to be considering the abolition of grade crossings through this city, the work to include raising the tracks and roadbed, construct 5 steel viaducts and erect new depot and freighthouse. Tentative plans and blue prints are reported to be on file at the office of City Engr. Dempster.

**Brockwayville, Pa.*—Frank Shumaker, of Bellefonte, is reported to have secured the contract for constructing double track line for the Buffalo, Rochester & Pittsburg R. R. Co. from Brockwayville to Carmen, a distance of about 9 miles. The work also includes the construction of a tunnel 1,200 ft. long and the straightening of many long curves. About $500,000 will be expended.

**Providence, R. I.*—The New York, New Haven & Hartford R. R. Co. is reported to have awarded contracts as follows for work in connection with a tunnel: For 15 piers bet. the passenger station and Canal St., to C. D. Blakely & Son, of New Haven, Conn. These piers will carry the viaduct connecting the tracks at the east end of the station and the Canal St. abutment. The contract for two abutments and iron rails for the enlarged highway bridge over Waterman Ave. in East Providence was awarded to O'Connor & Andrews, of East Hartford, Conn.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—See "Miscellaneous."

Bakersfield, Cal.—Train & Williams, of Los Angeles, are stated to have submitted to the Bd. of Superv. plans, which have been accepted for a Hall of Records to be erected of reinforced concrete at a cost of about $40,000. Bids for the construction will probably be asked about Oct. 1.

San Francisco, Cal.—The following are the bids opened on Sept. 17 at the office of the Superv. Archt., Washington, D. C., for repairs to stonework, miscellaneous repairs, alterations and painting at the U. S. Mint Building, San Francisco: Raymond Granite Co., $49,500; Buck & Campbell $55,095; Kern Bros., $53,200, and New Era Development Co., $37,987.

School Bldg., for completing and finishing the ventilating and heating apparatus for additions to and alterations in (*a*) School 109, Brooklyn Boro. (*b*) School 151, Brooklyn Boro, and (*c*) installing ventilating and heating in School 91, Manhattan Boro: The W. R. Bracken Co., *a* $18,500; Wm. J. Olvany, *a* $20,658, *b* $5,784, *c* $58,755; Blake & Williams, 210 W. 20th St., N. Y. City, *a* $20,517, *c* $50,983 (awarded contract); Frank Dobson Co., Inc., *a* $21,250, *b* $9,992, *c* $52,612; Hopkins-Jordan Co., *a* $19,500, *b* $6,400; Gillis & Geoghegan, 537 W. Bway., N. Y. City, *a* $20,490, *b* $5,675 (awarded contract); E. Rutzler Co., *c* $51,134; A. G. Suter & Co., *c* $51,825; Jas. Curran Mfg. Co., *c* $53,783.

Gastonia, N. C.—See "Water."

**Kenmare, N. D.*—Frost & Hosmer, Archts., Minot, write that the contract for plumbing and heating the high school (bids opened Sept. 10) has been awarded to the Kenmare Htg. & Plumbing Co., of Kenmare, for $6,439.

University, N. D.—Bids will be received until Oct. 1 by J. W. Wilkerson, Secy. Bd. Trus. Univ. of North Dakota, for installing the sewerage, plumbing and heating systems for the School of Mines.

**Valley City, N. D.*—W. T. Craswell, Clk. Bd. of Educ., writes that the contract for constructing superstructure of school to replace one recently destroyed (bids opened Sept. 17) has been awarded to Wm. Reid, of Valley City, for $14,937.

Cincinnati, O.—Bids will be received until Oct. 14 by the Bd. Educ. (S. B. Marvin, Pres.) for $250,000 bonds, issued for the purpose of obtaining and improving public school property.

**Harrisburg, Pa.*—W. S. Roebuck is reported to have secured the contract to erect the Vernon School (bids for which were received Sept. 3), at $39,850.

Hays, Pa.—The citizens are stated to have approved the issue of $10,000 bonds to erect a school.

Pittsburg, Pa.—It is stated that plans have been completed for a 12-room brick and stone school, to be erected for the Roman Catholic Church of St. Mary of the Mount, at Mt. Washington. It is to cost about $65,000. It is stated that an addition of 18 rooms is to be added to the Belmar sub-district school at a cost of about $100,000.

Indiana, Pa.—Plans and specifications will be received until Oct. 15 by the School Bd. (Oliver Fry, Secy.) for a 2-story school to contain 16 school rooms, an assembly hall, library and teachers' room. Cost of building completed, including heating, plumbing and electric wiring, not to exceed $65,000.

Allegheny, Pa.—C. M. Bartherger, Westinghouse Bldg., Pittsburg, is stated to be the archt. engaged to prepare plans for the school in the 10th Ward, which is to cost about $120,000.

Milton, Pa.—It is reported that the building of a high school is under consideration.

New Castle, Pa.—The plans of W. G. Eckles, Mill and Washington Sts., which have been accepted for the high school, provide for a 3-story structure.

Latta, S. C.—A. S. Manning, Chmn. Bd. School Trus., writes that all bids opened on Sept. 24 for the erection of a high school have been rejected, and new bids will be received after specifications are slightly altered.

Woodruff, S. C.—Bids will be received until Nov. 4 by the Bd. Trus. School Dist. No. 33 (E. F. Pearson, Chmn.) for $15,000 bonds, issued for the purpose of erecting and equipping a school. Simpson & Bomar, Attys., Spartanburg, S. C.

Woonsocket, S. D.—It is stated that a site has been secured and on which it is proposed erecting a Roman Catholic College, to cost about $100,000.

Nashville, Tenn.—A permit has been asked for the Marcus M. Ross School, to be erected on Grove St., of brick, and cost about $17,000.

Laredo, Tex.—The citizens are reported to have voted to issue $40,000 bonds for the erection of a school house.

Norfolk, Va.—The School Bd., according to reports, has decided to ask the City Council to appropriate $20,000 to erect an 8-room annex to the Berkeley School.

Seattle, Wash.—The Bd. of Regents, it is stated, has approved the plans of Howard & Galloway for the engineering, chemistry and auditorium buildings which are to be erected on the campus, and has authorized the archts. to receive bids for the construction of said buildings.

Edgerton, Wis.—It is stated that plans have been submitted for a high school which is to be erected in this city, at a cost of $40,000, to be presented to the city by Miss Florence Child.

Milwaukee, Wis.—The Bd. of Regents, it is stated, has decided upon a site on Eldred St., on which it is proposed erecting the $225,000 normal school. The archt. has been directed to complete the plans as soon as possible so as to let the contract for the construction immediately.

**Rapid River, Wis.*—The contract to erect the high school is reported to have been awarded to T. M. Solar, of Antigo, at $20,855, exclusive of heating and plumbing. Other bids received are stated to have been as follows: A. P. Wilson, Marquette, $22,968; John A. Lindsay, Escanaba, $24,050; O. G. Brubaker, Sault Ste. Marie, $24,100, and Lipsett & Sinclair, of Marquette, $29,833.

Dundas, Ont.—The issuing of $25,000 bonds to erect a school is reported under consideration.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

San Diego, Cal.—Plans are reported to have been completed for a laundry building to be erected by Nelson Snyder, of the Electric Laundry Co., on I and 15th Sts. It will be 100x140 ft., 1 story high and of pressed brick and will be equipped with improved models of machinery which, together with the structure, will cost about $50,000.

Pueblo, Colo.—Geo. Roe, of Pueblo, is reported to be preparing plans for improvements and additions to Walter Brewery, which will cost about $25,000.

Manchester, Ga.—Fuller E. Callaway, C. V. Truitt and Roy Dallas, all of La Grange, are reported interested in the construction of a cotton mill at Manchester, to cost about $500,000.

Chicago, Ill.—Oscar Heineman, mfr. of silks, located in the Occidental Bldg., is reported to have purchased a site on Armitage, Fairfield and Wastenaw Aves., and will erect a 3-story building to be used for spinning and weaving silks; the new plant will cost $135,000. Architect, Paul Gerhardt, Schiller Bldg.

Plans are being prepared for a plant to be built for Stein, Hirsch & Co. on south branch of river, north of Archer Ave. It will comprise 6 buildings ranging in height from 1 to 4 stories. The exterior will be constructed of brick on concrete foundations; cost estimated at $200,000. Nimmons & Fellows, 204 Dearborn Bldg., Archts.

Logansport, Ind.—The Directors of the Logansport Industrial Assoc. are reported to have secured a site upon which to erect a radiator factory.

Elkhart, Ind.—The Sheemaker Automobile Co., of Freeport, Ill., is reported to have decided to establish and equip with new machinery an automobile factory on N. Main and Simonton Sts. Dr. C. M. Eisenbeiss is reported interested.

Sioux City, Ia.—The Inter State Brewing Co. will construct a new brewery, to cost about $150,000. Ground is now being graded and construction work will begin about Oct. 1st. Frank Kruger, Pres.; H. A. Knepper, Secy.

Berlin, Md.—See "Power Plants, Gas and Electricity."

Columbia, Miss.—See "Power Plants, Gas and Electricity."

Weston, Mo.—County Surveyor Virgil H. Elliston is reported to have completed surveys for the plant of the Missouri Portland Cement Co. of Kansas City. This company purposes establishing a cement plant about 4 miles north of Weston on the lines of the Rock Island and Burlington Railroads, with a daily capacity of 1,000 bbls. T. J. Benkendorf, 919 Ridenbaugh St., Kansas City, Pres.; H. W. McNutt, of St. Joseph, Sec. and Treas. Freeborn Eng. & Constr. Co., of Kansas City, Mo., Consulting Engrs.

Niagara Falls, N. Y.—The Niagara Pulp Board Co. is reported to have applied to the Bd. of Pub. Wks. for a permit to erect a plant on 3d St., to cost about $57,000. Col. Chas. B. Gaskill is reported interested.

Cuyahoga Falls, O.—The plant of the Hollow Stay Bolt Co. is reported to have been burned on Sept. 13 and will be rebuilt at once.

Hillsboro, Tex.—It is reported that the sum of $75,000 is to be expended at once by the directors of the Hillsboro Cotton Mill Co. in enlarging the main building and making needed improvements.

Roanoke, Va.—The Roanoke Enameling & Stamping Co. will soon let contracts for erecting its plant.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Las Animas, Colo.—See "Power Plants, Gas and Electricity."

**Oak Park, Ill.*—The contract for building garbage crematory in Oak Park is reported to have been awarded by the Village Trus. to Lewis & Kitchen, of Chicago. The structure is to be chiefly of fire brick and will be built on North Boule., near Euclid Ave.

Cambridge, Mass.—Geo. E. Clukas, Supt. of Streets, writes that all bids opened on Sept. 4 for the construction of garbage incinerator have been rejected and new bids will be received on Oct. 7.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—Col. E. L. Russell, Vice-Pres. of the Mobile & Ohio R. R. Co., is reported to have announced that improvements are contemplated by his company on the river front north of St. Anthony St., and include the building of a bulkhead, 1,000 ft. long, with docks upon which will be laid tracks sufficient to hold 100 freight cars. The work will be stated as soon as preliminary plans are completed, and the total cost will be about $200,000.

Bids will be received at the office of Maj. H. Jervey, Corps. Engrs., U. S. A., until Nov. 25 for building locks and dams Nos. 14 and 15, Black Warrior River, Ala., and lock tenders' houses, as advertised in The Engineering Record.

Wilmington, Del.—Bids will be received by Maj. C. A. F. Flagler, Corps. Engrs., U. S. A., until Oct. 21 for dredging new entrance to Broadkill River, Del., as advertised in The Engineering Record.

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Oct. 1 to furnish at the navy yards and naval stations the following supplies: Portsmouth, N. H.: Sch. 291—Profiling machine. Sch. 320—Beach, oak. Boston, Mass.: Sch. 318—Damp proof wire, interior fittings, switches, steel enameled conduit fittings. Sch. 319—Copper rivets, etc., copper wire brass hinges. Sch. 320—Maple, mahogany lignumvitæ. Sch. 321—Sheet brass and copper rolled bronze. Sch. 323—Copper pipe, brass and iron pipe fittings. New York, N. Y., etc.: Sch. 291—Engine lathes, boring mill, horing and drilling and milling machines, Universal shaper. Sch. 314—Incandescent lamps arc, electric wire, dry batteries, electrical supplies. Sch. 316—Brass and iron pipe. Sch. 320—Spruce, cypress, white and yellow pine. Sch. 321—Bar and pig iron, galvanized sheet steel, sheet zinc. Sch. 323—Brass and copper pipe, hose pipes, valves, brass and iron pipe fittings. Puget Sound, Wash.: Sch. 329—Fir, lumber. Sch. 333—Galvanized iron plates, Scotch pig iron, galvanized sheet steel. Mare Island, Cal.: Sch. 329—Galvanized sheet steel. Sch. 330—Power press. Sch. 333—Galvanized corrugated iron, mild and tool steel. Washington, D. C.: Sch. 315—Recoil cylinders, nickel steel, steel forgings, steel drill rod, machine steel. Sch. 321—Steel drill rod, spring steel. Naval Academy, Annapolis, Md.: Sch. 317—Tram cars, track, etc. Norfolk, Va.: Sch. 290—Nut facing machine. Sch. 318—Bells and buzzers, plugs, signal and deck lanterns, etc., glass tube fuses, switch handles, link fuses. Applications for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster General, U. S. N.

Savannah, Ga.—The Cranger-Lewis Lumber Co. proposes constructing slip, wharf and terminals at this port, at cost of about $25,000.

Centerville Station, Ill.—It is stated that bids will be received by the Centerville Station Bd. until Oct. 5 for constructing ditch to drain Pittsburg Lake.

Chicago, Ill.—Bids will be received until Oct. 3 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and constructing a chimney for the boilers at the 95th St. sewage pumping station, 95th St. and Erie Ave.

**Great Lakes, North Chicago, Ill.*—The Bureau of Navigation, Navy Dept., Washington, D. C., is reported to have awarded contract for furnishing material and grading at the naval training station, Great Lakes, North Chicago, to the Edwards Bros. Dredging Co., Sault Ste. Marie, Mich., at 81 cts. per cu. yd., same for all excavating or filling necessary.

Indianapolis, Ind.—It is reported that bids will be received until Oct. 5 by the Bd. Co. Comrs. for constructing culverts as follows: West Newton Rd., Decatur Township; Auugsta Rd., Pike Township; on road in n. w. quarter Sec. 18, Wayne Township; on south line of Sec. 21, Decatur Township, and over Big Run, east line of Sec. 10, Lawrence Township. C. J. Clark, Co. Aud.

**Portland, Ind.*—Philip Bergman, Drainage Comr., is reported to have awarded to John Boyd a contract for the construction of the Goshen ditch for $3,895.

Crawfordsville, Ind.—The Comrs. of Montgomery Co. will soon ask for bids for the construction of a large ditch known as the Joseph H. Gray ditch.

New Orleans, La.—Local press reports state that the following bids were opened on Sept. 10 at the office of Capt. J. F. McIndoe, Corps Engrs., U. S. A., Custom House, New Orleans, for dredging in Southwest Pass, Mississippi River: The Bowers Southern Dredging Co. (R. F. Clark, Pres., Galveston, Tex.), $475,000, work to be completed in 200 days; the North American Dredging Co., New Orleans, $557,320, 16 mos.; John Anderson, Gulfport, Miss., $679,208, 14 mos.; and the Atlantic, Gulf and Pacific Co., of New York, N. Y., $543,360, 20 mos.

Bids will be received until Oct. 22 by Jas. S. Brady, Chmn. Executive Com., joint organization of the Atchafalaya Basin and Lafourche Levee Dists., for the construction of the Cancienne Canal in the Parish of Assumption, to be about 8,500 ft. long and requiring about 250,000 cu. yds. excav.

At a meeting of the New Orleans Levee Bd., on Sept. 19, it was decided to procure bids for building levees in the 3d dist., one from Louisa to Desire St., at a cost of about $40,000, and the other from Mazant to Poland St., to cost about $75,000. The Engineer also recommended that arrangements be made for filling all low places along the commercial front at a cost of about $25,000.

*A. B. Calbriac is reported to have, on Sept. 10, secured the contract for constructing the new Couret Pl. levee, for about $25,000.

*W. B. Borne is reported to have secured the contract for enlarging and revetting the levee in the 5th Dist. Algiers (bids opened by the Levee Board on Sept. 11), at $61.75 per M. ft., for creosoted lumber, and 43 cts. per cu. yd. for earthwork in place, and $45.50 per M. ft. for cypress lumber.

All bids opened on Sept. 6 by Capt. G. M. Hoffman, Corps Engrs., U. S. A., for furnishing 9,000 tons of rock for New Orleans harbor have been recommended for rejection.

Bids will be received by Col. E. H. Ruffner, Corps Engrs., U. S. A., New Orleans, until Nov. 20 for a wooden hull, combined hydraulic dredge and snagboat, as advertised in The Engineering Record.

Indiana Head, Md.—See "Public Buildings."

**Saginaw, Mich.*—David C. Bell, City Clk., writes that the contract for excavating Rust Lake channel, connecting same with Saginaw River, Wright Bayou and river front, and filling the Rust Park property complete; approximate quantity to be excavated is about 600,000 cu. yd. (Bids opened Sept. 23 by the Bd. of Park & Cemetery Comrs.) has been awarded to H. W. Hubbell & Co., of Saginaw, for $96,525.

Tacoma, Wash.—The following are the bids opened on Sept. 2 by Maj. H. M. Chittenden, Corps Engrs., U. S. A., 602 Burke Bldg., Seattle, for dredging and bulkheading at Tacoma Harbor: (*a*) North American Dredging Co., San Francisco, Cal.; (*b*) Puget Sound Bridge & Dredging Co., Seattle. (*c*) Richmond Dredging Co., San Francisco, Cal.; (*d*) International Contract Co., Seattle; (*e*) Pacific Coast Dredging & Reclamation Co., San Francisco, Cal.; (*f*) A. W. Tweeden & Co., Tacoma.

*Items marked thus give the names of parties awarded contracts.

**Thief River Falls Minn.*—Arpin Bros., of Thief River Falls, are reported to have secured a contract for building drainage ditches 47 in Marshall County and 48, 49 and 50 in Kittson County, for about $30,000.

**Vicksburg, Miss.*—The contract for furnishing about 15,000 tons rock along Mississippi River (bids opened Sept. 6 by Capt. G. M. Hoffman, Corps. Engrs., U. S. A., New Orleans, La.) has been recommended for award to Guy Dickinson, of Little Rock, Ark., at $1 per ton on cars at Little Rock.

Jefferson City, Mo.—The Bd. to Survey the St. Francois River basin, under provisions of an enactment of recent session of General Assembly, which appropriated $10,000 for the work, has been appointed, including D. B. Panky, of Kennett; A. H. Carter, of Dexter, and W. H. Meredith, of Poplar Bluff.

Roswell, N. M.—Arthur J. Stevens, Lock Box 45, Secy. Com. of City Council, writes that the contract for 8,000 ft. concrete ditch in Roswell (bids opened Sept. 18) was not awarded because of no reasonable bids, and the work will be done by the committee.

**Astoria, L. I., N. Y.*—The following are the bids opened on Sept. 23 by C. B. J. Snyder, Supt. School Bldgs., New York City, for the general construction, etc., of a grand stand, to be placed on Athletic field at Munson and Orchard Sts. and the East River, Astoria, Boro. of Queens. Wm. Werner, $32,090; J. & L. Moreland Co., $32,382, and Laurence J. Rice, 5 E. 42d St., New York City $31,475 (awarded contract.)

New York, N. Y.—Bids will be received by the Park Bd. (Moses Herrmann, Pres.) until Oct. 3 for furnishing material and constructing a stone wall, surmounted by an iron fence, in the Botanical Garden, in Bronx Park, City of New York.

Bids will be received by John W. Brannan, Pres. Bd. Trus. Bellevue and Allied Hospitals, until Oct. 7, for material and constructing a tunnel connecting Training School for Women Nurses with Pavilions A and B of New Bellevue Hospital, situated under 26th St. E. of 1st Ave., Boro. Manhattan.

Toledo, O.—It is stated that bids will be received by the Co. Aud. until Oct. 7 for constructing riprap stone wall.

Lima, O.—The Ohio Oil Co. (Standard) is reported to be considering the construction of a pumping station north of the village of Moranville, to cost about $100,000.

Panama.—Bids will be received at the office of H. F. Hodges, Gen. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., until Oct. 21 for pumps, monitor nozzle, truck wheels and rockers for engines, shower heads, stopcocks, lead pipe, soil pipe and fittings, etc., as advertised in The Engineering Record.

Providence, R. I. The Common Council on Sept. 16 adopted a resolution to construct a tunnel from N. Main to Thayer St. under College Hill and to south of the north line to Waterman St.

**Richmond, Va.* The contract for the erection of the Smyth Brothers-McCleary-McClellan Stock Yards is reported to have been awarded on Sept. 17 to J. T. Wilson, of Richmond. The main building will be 640x280 ft. and is to be completed by Feb. 1. Contract price, $75,000.

Seattle, Wash.—Maj. H. M. Chittenden, Corps. Engrs., U. S. A., writes that the Puget Sound Bridge & Dredging Co., of Seattle, bid on Sept. 5 for dredging Snohomish Slough, about 250,000 cu. yds., 18.7 cts. per cu. yd.

Lion's Head, Ont.—Bids will be received until Oct. 18 by Fred Gelinas, Secy., Dept. Pub. Wks., Ottawa, for constructing an extension to the wharf at Lion's Head. J. G. Sing, Resident Engr., Confederation Life Bldg., Toronto.

American Society of Refrigerating Engineers. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

American Public Health Association. Secretary, Dr. C. O. Probst, Columbus, O.

PERSONAL NOTES.

The statue shown in the accompanying illustration, printed here through the courtesy of the New York "Tribune," was erected to the memory of Major-General George Sears Greene by the State of New York. It stands on Culp's Hill at Gettysburg and marks the place where the thin line of troops of his brigade repulsed four attacks by three brigades of Lee's army on the evening of the second day of the great battle. It was this three hours of struggle in the evening of July 2 that saved the day for the Union army and prevented the capture of its ammunition train. The great soldier whose military genius is commemorated by the statue was over sixty years of age at the time. He had served in the regular army until 1836 and had there achieved high distinction as a civil engineer. When the civil war broke out he was chief engineer of the Croton water-works, but in spite of his age he enlisted in the volunteer army and served with great distinction. When hostilities ceased he again took up active professional work and for many years was engaged in consulting practice. He was president of the American Society of Civil Engineers for two years and was one of its most active members for a long period. Even after he had passed his ninetieth birthday he attended many of the regular meetings. An account of his career was published in this journal on Feb. 4, 1899. The statue was the work of R. H. Perry, and stands on a granite base 5 ft. square and 8 ft. high. On one side of the base is a large bronze plate bearing an inscription to General Greene and a statement of the part he played at Culp's Hill. The brigade under his command was made up of New York regiments exclusively, and it was largely on this account that Gov. Hughes took an important part in the ceremonies attending the dedication of the monument.

Mr. Gerard U. Matthes has resigned from the U. S. Reclamation Service to join the staff of Mr. Robert McF. Doble, consulting engineer of the Central Colorado Power Co., Colorado Springs, Colo.

Mr. F. J. Boland, city engineer of Hanford, Cal., has been appointed chief engineer of an electric railway line that is to be built in the vicinity of Hanford.

Mr. Oscar Edwards, city engineer of Roseburg, Wash., and county surveyor of Douglas County, in the same state, has been appointed city engineer of St. John, Wash.

Capt. George P. Howell and First Lieutenant John J. Kingman and Henry H. Roberts, Corps of Engineers, U. S. A., have been ordered to report for duty in the Philippines.

The State Railroad Commission of New Jersey recently appointed Mr. P. Boller, of East Orange, N. J., as civil engineer of the commission, and retained the firm of Boller & Hodge as consulting engineers.

The following city officials of Baltimore, Md., were recently reappointed: Benjamin T. Fendall, city engineer; Alfred M. Quick, water engineer and president of the Water Board; Oscar F. Lackey, harbor engineer and president of the Harbor Board.

Gen. James H. Lane, professor emeritus of civil engineering at the Alabama Polytechnic Institute, died at Auburn, Ala., recently. He was well known in the South as an educator, having been associated with various Southern colleges since the civil war, in which he served in the confederate army.

STATUE OF GENERAL GEORGE SEARS GREENE AT CULP'S HILL, GETTYSBURG.

Mr. Samuel Whinery, consulting engineer, New York City, has been engaged by the finance commission of Boston, Mass., to investigate the problem of street paving in that city.

Civil Engineer U. S. G. White, U. S. N., has been detached from the Naval Academy, Annapolis, Md., and transferred to the Bureau of Yards and Docks, Navy Department, Washington, D. C.

Mr. J. V. Nimmo has resigned as chief engineer of the New Canadian Co., Ltd., and the Atlantic, Quebec & Western Ry., and his duties have been taken up temporarily by Mr. W. Lyon Browne.

Mr. Robley A. Warner, superintendent of Health and Drainage of Lower Merion Township, Montgomery County, Pa., has been directed by the Board of Commissioners of that township to investigate the problem of garbage and ashes collecton in the township and report at the October meeting with such recommendations as he may deem advisable.

George Lewis Heins, State Architect of New York, died at his home at Lake Mohegan, Sept. 25, aged 47 years. Mr. Heine was one of the best-known architects in the United States. He was appointed State Architect by Theodore Roosevelt in 1899, and designed all the

State buildings erected since that time. Several years ago he made an extensive study of cathedrals in foreign countries, and was one of the leading authorities on church architecture in the world, the firm of Heins & La Farge having designed the Cathedral of St. John the Divine and other important church buildings. He also designed the buildings in the New York Zoological Gardens and was consulting architect for the Rapid Transit Commission.

Mr. A. A. Knudson, of New York, N. Y., has been appointed as expert in connection with the litigation between the Toronto Street Railway Co. and the Toronto Gas Co. Associated with Mr. Knudson are Mr. W. E. Foss, electrical engineer, of Boston, Mass., and Mr. C. I. Anderson, consulting engineer, of Franklin, Ohio.

Maj.-Gen. Sir John Charles Ardagh, ex-director of military intelligence of the British War Office, died Oct. [illegible] at Carnarvon, Wales. He entered the Royal Engineers as a lieutenant in 1850, much of his service was in the engineering department. He was at one time commandant of the School of Military Engineering. He was a delegate to the peace conference at The Hague in 1890, and was appointed a member of the Permanent Court of Arbitration, which was formed at The Hague as a result of the conference of 1899.

BUSINESS NOTES.

Owing to the rapid growth of its business The Pittsburg Automatic Vise & Tool Co., Pittsburg, has found it necessary to subdivide its sales department, and Mr. E. W. Buechling, who has had extensive selling experience in addition to a thorough practical training in the machine shop, has been appointed to the new position of assistant manager of sales.

The Standard Roller Bearing Co., Philadelphia, has increased its capital from $3,500,000 to $5,000,000. The plant and equipment for the manufacture of roller bearings for shafting hangers are being largely increased, and a new department is being established for producing roller bearings for trolley cars.

The Hilles & Jones Co., Wilmington, Del., has taken steps toward the electrification of its entire works, in anticipation of the equipment with electric motors of the new machine shops recently completed. The following Allis-Chalmers type N direct current shunt wound motors will be installed: One 140 h.-p. motor for 300 r. p. m., three 30 h.-p. motors for 575 r. p. m., two 15 h.-p. motors for 425 r. p. m., three 10 h.-p. motors for 475 r. p. m., and one 10 h.-p. motor for 475-900 r. p. m.

The B. F. Sturtevant Co., through Mr. F. R. Chinnock of the electrical department of the New York office, reports the folowing sales of electric generating sets: Benj. Hutchings, Flatbush, Brooklyn, N. Y., one 9x8 vertical engine, 22½-kw. generator; David Rodgers Co., Paterson, N. J., one 13x12 horizontal engine, 50-kw. generator; International Paper Co., New York City, one 5x5 vertical engine, 6-kw. generator; Chas. E. Ring & Co., Brooklyn, N. Y., one 9x9 vertical engine, 30-kw. generator; Peter Hauck Brewing Co., Harrison, N. J., one 13x13 horizontal engine, 50-kw. generator; Chas. Hakemeyer Co., Paterson, N. J., one 17½-kw. generator, Bedford Reformatory for Women, Bedford, N. Y., one 13x13 horizontal engine, 50-kw. generator; Department of Docks & Ferries, New York City, ferry boat "New York," two 9x8 vertical engines, 30-kw. generators, ferry boat "Richmond," two 9x8 vertical engines, 30-kw. generators; ferry boat "Castleton," two 9x8 vertical engines, 30-kw. generators; ferry boat "Queens," two 9x8 vertical engines, 30-kw. generators; ferry boat "Middletown," two 9x8 vertical engines, 30-kw. generators; ferry boat "Gowanus," two 9x8 vertical engines, 30-kw. generators; ferry boat "Bay Ridge," two 9x8 vertical engines, 30-kw. generators; J. G. White & Co., New York City, two 3½x3 vertical engines, 3-kw. generators; American Sapphire Co., Colorado, one 7x7 vertical engine, 15-kw. generator; Chrome Steel Co., Chrome, N. J.; one 3½x3 vertical engine, 3-kw. generator, American Can Co., Lubeck, Me., one 13x13 horizontal engine, 50-kw. generator, one 10 h.-p. motor, one 15 h.-p. motor; Wm. Sheehan & Co., New York City, one 11x10 horizontal engine; H. Wales Lines Co., Meriden, Conn., one 11x10 horizontal engine, 30-kw. generator, one 7x7 vertical engine, 15-kw. generator, Peter Hauck Brewing Co., Newark, N. J., one 11x10 horizontal engine, 40-kw. generator; Jas. Shewan & Sons, New York City, four 7x7 vertical engines, 25-kw. generators, Vulcan Detinning Co., Sewaren, N. J., one 7x7 vertical engine; Tintern Manor Water Co., Redbank, N. J., one [illegible]x4½ vertical engine, 5-kw. generator, one 6x6 vertical engine, 7-kw. generator; Hudson Companies, York Street Operations, Jersey City, N. J., three 10 and 18x[illegible] vertical cross compound engines with 100-kw. generators, one 8 and 14x8 vertical engine, 50-kw. generator, two 8 and 14x8 vertical engines, 50-kw. generators, two 12x10 vertical engines, 50-kw. generators.

The Ransome Concrete Co., of California, announces the removal of its main office from 8th and Harrison sts. to the Crocker Building, San Francisco.

CONTRACTING NEWS
OF SPECIAL INTEREST TO
CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS
ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Phoenix, Ariz.—Bids will be received by Robt. Craig, Supt. Water Wks., until Nov. 15, for water pipe, as advertised in The Engineering Record.

Santa Ana, Cal.—The Santa Ana Valley Irrig. Co. and the Anaheim Union Water Co. are reported to be considering the construction of a submerged dam in Santa Ana River.

Paonia, Colo.—E. P. Martin, of Paonia, Ch. Engr. Mt. Lamborn Canal & Reservoir Co., writes that the proposed work contemplated by this company will cost about $75,000. Bids will be received on Oct. 6 by C. C. Hawkins, Secy.

Grand Junction, Colo.—J. F. O'Malley, City Engr., writes that the City Council has passed on first reading an ordinace calling for an election on Nov. 2 to vote on issuing $400,000 bonds for the construction of a mountain water system to supply the city. John M. Conley, City Clk. J. R. Wentworth, Mayor.

**Idaho Springs, Colo.*—The city is reporte dto have contracted with Noxon & Wilkie for the construction of a reservoir on Chicago Creek, to cost about $20,000.

Wilmington, Del.—All bids which were received Sept. 30 by the Water Dept. for the construction of covered slow sand filters, consisting of 6 beds and a covered filtered water reservoir, with a capacity of 10,000,000 gals., together with appurtenances, have been returned to the bidders unopened, and it has been decided to indefinitely postpone the project. Theo. A. Leisen, Ch. Engr.

Canton, Ga.—See "Power Plants, Gas and Electricity."

Albany, Ga.—See "Sewerage and Sewage Disposal."

Dublin, Ga.—See "Power Plants, Gas and Electricity."

Washington, Ga.—The question of constructing a filter at the water works is reported under consideration.

Lewiston, Idaho.—The Citizens are reported to have voted on Sept. 21, to issue $57,300 bonds, to be used to extend and improve water system, preliminary to paving a large part of city.

Mt. Carroll, Ill.—It is reported that bids will be received until Oct. 15 by C. N. Freezer, Clk., for furnishing a water pump of about 1,500,000 gals. every 24 hours.

Wolcottville, Ind.—The citizens are reported to have voted to construct water works at a cost of $10,000.

Warsaw, Ind.—C. A. Riydon, Mayor, writes that Sol. C. Dickey, of Winona Lake, Ind., will construct a filtration plant here.

Lansing, Mich.—It is reported that C. D. Dodge, Supt. Water and Light Comn., has been authorized to purchase 100 water meters.

Coledonia, Minn.—See "Power Plants, Gas and Electricity."

Stillwater, Minn.—See "Sewerage and Sewage Disposal."

Bemidji, Minn.—Bids will be received by Thos. Malloy, City Clk., until 8 p. m., Oct. 7, for 100 water meters.

Jackson, Miss.—Bonds to the amount of $216,000 are reported sold, to be used for purchasing the present water system.

Beaver City, Neb.—Bids will be received by W. L. Leonard, City Clk., until Oct. 22 for the construction of a system of air pressure water works, as advertised in The Engineering Record.

Brooklyn, N. Y.—The Bd. of Aldermen on Oct. 1 authorized the issue of $3,000,000 corporate stock for the improvement of the water supply of Brooklyn.

Buffalo, N. Y.—Bids will be received until Oct. 10 by the Dept. Pub. Wks. (F. G. Ward, Comr.) for four 600-h.-p. boilers for the pumping station, Bureau Water.

Bids are wanted until Oct. 15 for the sale and removal of 2 pumping engines, known as Engines Nos. 3 and 5, at the pumping station, Bureau Water. Henry L. Lyon, Deputy Water Comr.

**Rochester, N. Y.*—Whitmore, Rauber & Vicinus, 279 South Ave., is reported to have submitted the lowest bid on Sept. 18, to lay one mile of 12-in. Holley water mains for $7,433.

New York, N. Y.—Bids will be received by Louis F. Haffen, Boro. Pres., until Oct. 10, for furnishing 40 h. p. boilers and pumps with necessary fittings, and operating same to remove water from Inwood Ave. cut of Webster Ave. storm relief tunnel sewer, and at shaft No. 2 continually 24 hours per day, and at the westerly end of the High Bridge cut for 8 hours per day.

Rome, N. Y.—Roy Armstrong, City Clk., writes that all bids opened on Sept. 25 by the Bd. of Water and Sewer Comrs., for the construction of a dam on Fish Creek, with all its accessories, also a tunnel about 5,500 ft. long, have been rejected and new bids will be received early in the winter months. The following are the bids received: (Engineers, Knight & Hopkins, of Rome): G. H. Eldridge, Ossinning, $160,723; N. Y. Continental Jewell Filtration Co., N. Y. City, $166,851; A. C. Martin & Co., Seneca Falls, $107,250; F. D. Grannis, Ossinning, $147,409, and D. W. Rosser, Kingston, Pa., $129,431.

Sandusky, O.—The City Council, on Sept. 17, adopted the report of the Mayor's Comn. on Water Works, and ordered that the first and most essential work be taken up at once.

**Cleveland, O.*—The Bd. of Pub. Service is reported to have, on Sept. 20, awarded contract for 400 1-in. water meters to Henry R. Worthington, of New York, N. Y.

Hudson, O.—See "Power Plants, Gas and Electricity."

Pawhuska, Okla.—R. G. Hall, Mayor, writes that bids will be received until 2 p. m., Oct. 7, for furnishing material and constructing water works and sewers.

Somerset, Pa.—It is reported that at a recent mass meeting held here, it was voted to employ an engineer to prepare estimates for securing water from Laurel Hill mountain by gravity.

Philadelphia, Pa.—Bids will be received by Geo. R. Stearns, Dis. Supt. Pub. Wks., until Oct. 22, for electric improvement for Torresdale filters; pumping engines for Lardner's Point pumping station; centrifugal pumping engine for Torresdale pumping station and magnesia covering and painting at Lardner's Point pumping station, as advertised in The Engineering Record.

Newport, Tenn.—See "Power Plants, Gas and Electricity."

Bay City, Tex.—J. Sutherland, Mayor, writes that bids will be received about Oct. 20 for the construction of waterworks, to cost about $18,000. Engineer, M. Chapman, of Bay City.

**Auburn, Wash.*—W. F. McMahon, of Auburn, is reported to have secured the contract for constructing waterworks, for $13,090.

Seattle, Wash.—Local press reports state that the Fire and Water Com. of Council has decided to report favorably to Council the resolution for the installation of the salt water main system.

Tenino, Wash.—The City Council is reported to have granted S. W. Fenton, Mgr. of the Hercules Sandstone Co., a franchise for a new system of waterworks.

De Forest, Wis.—The citizens are reported to have voted to establish waterworks.

**Fernie, B. C.*—Robt. Potter, City Eng., writes that Harry Oldland, of Fernie, has secured the contract for constructing a covered concrete septic tank, 100 ft. long x 30 ft. wide (bids opened Aug. 26). He bid for 460 cu. yds. concrete $11 per cu. yd., and 1,000 cu. yds. excav. at 45 cts.; total cost, $5,510. Other bids for this work were: Campbell & Gray, Fernie, $6,375; M. Kerr & Co., Fernie, $6,960, and Hugh McDonald, Victoria, $8,950.

Winnipeg, Man.—Bids will be received by the Chairman Board of Control, until Nov. 15, for supply of approximately 15 miles of assorted water pipe, delivery of same to commence about May 15, 1908 or as soon as navigation opens, as advertised in The Engineering Record. H. N. Ruttan, City Engr.

Toronto, Ont.—The City Engineer and the Medical Officer of Health are about to ascertain probable cost of a filtration plant for the city water supply.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arronged Alphabetically by States.

Ensley, Ala.—All bids opened on Sept. 27 by City Council for completion of the 66-in. storm sewer on Ave. D, are reported to have been rejected, and the city has decided to complete the work. The lowest bid received was that of J. R. Payne, for $21,000.

**Paragould, Ark.*—The W. K. Palmer Co., of Kansas City, Mo., is reported to have secured the contract for constructing sewer system for about $10,000.

Washington, D. C.—The lowest bid opened on Sept. 30 by the Comrs. D. C. for constructing sewers was submitted by the Warren F. Brenizer Co. at the following bid: 4,500 cu. yd. sewer excav., 73 cts.; 250 cu. yd. rock excav., $3; 2,000 lin. ft. 18-in. sewer, $1.14; 3,900 lin. ft. 15-in. sewer, 99 cts., and 40 cu. yd. brick masonry, $17; total cost, $10,856. Totals of other bids: E. G. Gummel, $10,861; I. H. Fisher, $12,260. R. T. Beall Constr. Co., $12,810, and Jas. H. Coyle, $15,290.

Canton, Ga.—See "Power Plants, Gas and Electricity."

Albany, Ga.—C. W. Rawson, Mayor, writes that the citizens on Sept. 23 voted to issue $75,000 bonds to complete surface drainage and extend sewers and water mains. Engineer, R. J. Edgerly, of Albany.

Wallace, Idaho.—Henry M. Lancaster, City Engr., writes that about $20,000 will be expended for new sewers.

Great Lakes, North Chicago, Ill.—The following are the bids opened at the office of the Bureau of Navigation Navy Dept., Washington, D. C., on Sept. 27, for laying sewers and drains at the naval training station, Great Lakes, North Chicago, Ill.: H. C. Patterson, Waukegan, $58,415; H. D. Hallett, Aurora, $55,390; Nash Bros., Chicago, $59,999; Carmine Roberts, Chicago, $55,131, and F. H. Idelhart, Morgan Park, $59,000.

Chicago, Ill.—Bids will be received until Oct. 8 by the Bd. Local Improv. (H. S. Dietrich, Pres.) for constructing brick and pipe sewers in portions of several streets; also drains in portions of 12 streets.

Normal City, Ind.—It is reported that bids will be received until Oct. 8 by Jas. G. Mendenshall, Clk., for constructing sewers in certain streets.

Riverside, Ind. The Town Bd. is reported to have adopted specifications for the contruction of the Jersey St. sewer.

**Cedar Rapids, Ia.*—T. R. Warriner, City Engr., writes that the contract for constructing 3-ring brick sewer on 21st and 12th Aves. (bids opened Sept. 30) has been awarded to M. Ford, of Cedar Rapids, for $29,207.

Wapello, Ia. E. T. Christie City Recorder, writes that bids will be received on Oct. 10 for the construction of a system of pipe sewers, to cost about $6,000. Engineer, W. S. Kremer, of Wapello. J. S. McChesney, Mayor.

Wichita, Kan.—The City Council is reported to have decided to construct sanitary sewer in Dist. No. 9.

**Togus, Me.* A. L. Smith, Treas. Eastern Branch, National Home, D. V. S., at Togus, writes that the contract for furnishing materials, labor, etc., for the improvement of the sewerage and drainage system at Togus (bids opened Sept. 19) has been awarded to J. B.

* *Items marked thus give the names of parties awarded contracts.*

Greer, of Pittsburg, Pa.; cost about $45,000. Engineer, Geo. W. Fuller, 170 Bway., New York, N. Y.

Detroit, Mich.—Comr. Haarer, of the Bd. of Pub. Wks., is reported to have, on Sept. 19, rejected all bids received for constructing Sect. 4 and 5 of the Schroeder Ave. sewer and Sect. 6 of the Lothrop Ave. sewer, all being considered too high. Jas. Hanley, 40 Fort St. W., submitted the lowest bids on all three contracts, at $17,761; $26,293 and $10,757 respectively.

St. Paul, Minn.—Bids will be received until Oct. 21 by H. J. Spencer, City Clk., for furnishing material and constructing about 1,500 lin. ft. sewer, together with manholes, catch-basins, etc.

Cloquet, Minn.—Bids will be received until Oct. 19 by Jos. Loisel, City Clk., for constructing a sanitary sewer in Arch St. and Ave. C.

Black River Falls, Minn.—It is stated that bids will be received until Oct. 8 at the office of the City Clk. for furnishing material and constructing a sewer in Main St.

Stillwater, Minn.—Pillsbury & Claussen, of St. Paul, are reported to have completed plans and specifications for waterworks and sewer system for the new prison at Stillwater.

Cannons Falls, Minn.—Geo. E. Wilson, City Clk., writes that the proposed sewer on 4th and Colville Sts. will cost about $1,700, but will not be constructed until 1908.

**Monett, Mo.*—J. J. Dunnigan, of Shenandoah, Ia., has secured the contract for constructing a sanitary sewer system (bids opened Sept. 24), at the following bid (Engineers, Burns & McDonnell, Kansas City, Mo.): Excav. under 8 ft., 90 cts. per cu yd.; excav. 8 to 12 ft. deep, $1. excav. 12 to 16 ft., $1.15; 8-in. pipe, 24 cts. per lin. ft.; 10-in. pipe, 30 cts.; 12-in pipe, 42 cts.; 15-in pipe, 62 cts.; 6 to 8 in. y's, 75 cts.; 6 to 10 in. y's, $1; 6 to 12 in. y's, $1.50; manholes, ea., $30; flushtanks, ea., $65; lamp holes, ea., $10; rock excav., $3 per cu yd.; lumber, per M ft., $30; public sewer and septic tank, $6,437; total cost, $51,998. Totals of other bids: E. J. Overly & Co., Joplin, $61,718; McIlroy & Reese, Fayetteville, Ark., $52,490, and Wm. F. Hall, Clinton, $52,575.

Overbrook, N. J.—Bids will be received until Oct. 10 at the office of G. F. Drum, Co. Engr., Court House, Newark, for furnishing and delivering f. o. b. cars at Overbrook, on the Caldwell branch of the Erie R. R., 8,000 ft. tile drainage pipe of various sizes.

Oneida, N. Y.—Bids will be received, it is stated, until Oct. 15 by the Bd. Pub. Wks. for constructing a sewer in Williams, Elm and Lake Sts.

**Dunkirk, N. Y.*—The Council is reported to have awarded contract for a sanitary sewer on Central Ave. from city line to the Nickel Plate tracks, to Lawrence Schultz, of Fredonia, for $11,641.

Rochester, N. Y.—The lowest bids recently received by the Bd. of Contract and Supply for the new sewer system for the 21st ward are reported to have been submitted as follows: Sewer work, H. N. Cowles, $85,430; for the plumbing station connected with the system, Houston Barnard, $6,332, and for steel riveted pipe, through which sewage will be pumped, Frank R. Stockley, at $3,543; aggregate of the three low bids for the entire work is $97,305.

**Long Island City, L. I., N. Y.*—Contracts for constructing pipe sewers in portions of Wilbur Ave. (bids for which were received Sept. 30 by Jos. Bermel, Boro. Pres.) have been awarded, according to reports, to H. J. Mullen, at $7,978 and for constructing reinforced concrete and pipe sewers in portions of Metropolitan Ave. to Jos. A. Boyce, at $29,434.

New York, N. Y.—The following are the bids opened on Oct. 1 by Louis F. Haffen, Pres. Bronx Boro., for completing construction of storm relief tunnel sewer from the Webster Ave. sewer near Wendover Ave., in the Mill Brook water shed (Sewerage Dist. No. 33), to the Harlem River, about 231 ft. north of High Bridge, 24th Ward, Boro. of Bronx: (*a*) Williams Eng. & Contr. Co., 21 Park Row; (*b*) John J. Hart Co., 173th St. and Bway.; (*c*) Phoenix Constr. & Supply Co., 41 Park Row; (*d*) Wakefield Constr. Co., Williamsbridge.

Flushing, L. I., N. Y.—The following are the bids opened on Sept. 23 by C. B. J. Snyder, Supt. School Bldgs., New York City, for general construction, etc., of a sewage disposal plant for the buildings of the Parental School, on road bet. Flushing and Jamaica, Boro of Queens: Jas. MacArthur, $36,000; McHarg-Barton Co., $36,900; New York Sewage Disposal Co., $30,111; Henry J. Mullen, $31,000, and Peace Bros., $34,175.

Brooklyn, N. Y.—Bids were opened on Sept. 25 by Bird S. Coler, Boro. Pres., for furnishing material and constructing relief sewers in Dekalb Ave. from Raymond St. to South Portland Ave., etc. (Relief sewers, div. 2, sect. 3, Gold St. system). The bids were submitted on the percentage basis as follows: Fleck-Litchfield Constr. Co., 345 5th Ave., 105.53 per cent; Rodgers & Haggerty, 1929 Amsterdam Ave., 109.68 per cent; Borough Constr. Co., Brooklyn, 140.78 per cent. This work consists of 2,490 lin. ft. 138-in. circular sewer, 400 lin. ft. 24-in. pipe sewer, 350 lin. ft. 18-in. pipe sewer, 570 lin. ft. 15-in. pipe sewer, 2,440 lin. 12-in. pipe sewer, 40 lin. ft. 24-in. temporary pipe drain, 2,490 lin. ft. 12-in. pipe subdrain, 2 manholes, Class "A," 1 manhole, special Class "A," 1 manhole, Class "C," 34 manholes on pipe sewer, 18 sewer basins, reconected, 500 M. ft. sheeting and bracing, 100 M. ft. foundation planking, 500 cu. yds. Class "B" concrete, and the total cost is estimated at $203,132.

Bids were opened on Sept. 25 at the office of Bird S. Coler, Boro. Pres., for furnishing material and constructing relief sewers in Johnson St. from Hudson Ave. to Raymond St., etc. (relief sewers, div. No. 2, sect. No. 2, Gold St. system). These bids were also submitted on a per centage basis as follows Hammond & Sloane, Inc., 60 Wall St., N. Y. City, 114.4 per cent; Fleck, Litchfield Constr. Co., 345 5th Ave., N. Y. City, 82.8 per cent; John J. Creem, Brooklyn, 119.99 per cent; Borough Constr. Co., Brooklyn, 100.7 per cent; Jas. Kelly, Brooklyn, 126 per cent; Rodgers & Haggerty, 1929 Amsterdam Ave., N. Y. City, 107.57 per cent. This sewer will comprise 2,285 lin. ft. 144-in. circular sewer, 17 lin. ft. 48-in. egg-shaped sewer, 17 lin. ft. 15-in. pipe sewer, 90 lin ft. 12-in. pipe sewer, 2,285 lin ft. 12-in pipe sub-drain, 5 manholes, 22 sewer basins, reconnected, 400 M. ft. sheeting and bracing, 75 M. ft. foundation plank, and 400 cu. yd. class "B" concrete; total estimated cost, $152,905.

New Brighton, S. I., N. Y.—Bids will be received by Geo. Cromwell, Boro. Pres., until Oct. 8, for furnishing material and constructing a temporary combined sewer and appurtenances in Richmond Terrace,, Sewer Dist. No. 19A, 3d Ward. Engineer's estimate: 2,782 lin. ft. reinforced concrete sewer; 5,157 lin. ft. 10, 12, 15, 18 and 20-in. interior diam. salt-glazed vitr. pipe sewer, etc.

Springfield, O.—City Engr. W. H. Sieverling is reported to have completed plans for the N. Limestone St. sewer, which he estimates at $6,914, and the W. Main St. sewer, estimated at $22,227.

Ironton, O.—Geo. H. Davis, Clk. Bd. of Pub. Service, writes that the citizens on Sept. 25 voted to issue $45,000 bonds for sewers.

Akron, O.—Bids will be received until Oct. 8 by the Bd. Pub. Service for constructing a surface water sewer in portions of High and Long Sts.

Chagrin Falls, O.—Bids will be received by H. D. Bishop, Village Clk., until Oct. 14, for the construction of sewage at filter beds, was submitted by the Pacific timaed cost $60,000. Engineers, the Walter P. Rice Eng. Co., of Cleveland.

Girard, O.—The only bid received and opened on Sept. 23 for an automatic apparatus for handling flow of sewage at filter beds, was submitted by the Pacific Flush Tank Co., of Chicago, Ill., for $1,200. The only bid opened same time for 5,570 lin. ft. 18-in. sewer was submitted by S. N. De Groodt, of Youngstown, for $21,906. Engineer, Wm. Wilson, of Youngstown.

Oberlin, O.—Bids are wanted, it is stated, until Oct. 12, for $10,000 bonds for constructing sewer beds. C. H. Snyder, City Clk.

Greenwich, O.—Bids are wanted, it is stated, until Oct. 14, for $8,000 sewer and $4,700 paving bonds. J. F. White, Village Clk.

Pawhuska, Okla—See "Water."

McKeesport, Pa.—Bids will be received, it is stated until Oct. 10 by C. E. Soles, City Compt., for constructing a 15-in. terra-cotta sewer in Sheridan St. and Cavin Alley.

Kingston (Wilkesbarre), Pa.—The Borough Council is reported to have decided to construct sewers on Elm, Ridge, Pringle and Walnut Sts.

Chambersburg, Pa.—The Boro. Council is reported to have voted to esatblish a complete sewer system, with storm sewers and underdrains for surface water. The system will extend over 20 miles of streets, draining 1,708 acres, and will cost $150,000.

**Mont Alto, Pa.*—State Health Comr. Dixon, at Harrisburg, is reported to have awarded contract for system of sewers to be constructed at the Pennsylvania South Mountain Sanitorium, near Mont Alto, to C. F. Hessenberger, of Harrisburg, for $11,006.

Harrisburg, Pa.—Plans will probably be prepared this winter for improvements to sewer system and sewage disposal plant. M. B. Cowden, City Engr.

Newport, Tenn.—See "Power Plants, Gas and Electricity."

J. Neely, Columbia, Tenn., and for tunnel to Howard Neely, Chattanooga, Tenn. The turbines and dynamo will be purchased by the Engineer, W. G. Kirkpatrick, of Jackson, Miss.

Newport, Tenn.—C. H. Holland, Mayor, writes that the citizens on Sept. 21 voted to issue $50,000 bonds to be used for the construction of water works, a sewerage system and electric light plant. John M. Jones is Recorder.

Bristol, Va.-Tenn.—John H. Gose, City Clk., writes that J. D. Mitchell, Harry Roberts and Theo. Swann, all of Bristol, Va.-Tenn., have secured franchise for electric power plant for Bristol.

Waynesboro, Va.—The electric light and pumping station, combined with Rife's machine shops, are reported to have been destroyed by fire on Sept 25. W. A. Rife, of Waynesboro, is owner and Mgr.

Toppenish, Wash.—R. D. Campbell, Town Clk., writes that E. F. Bohannon has secured a franchise for an electric light plant.

Tacoma, Wash.—L. H. Pearson, Clk. Comr. of Pub. Wks., writes with regard to the proposed municipal power plant, that the proposition is at present in the hands of a committee of City Council, with a view to purchasing the water rights and site on the Upper Nisqually.

Renton, Wash.—The City Council is stated to have appointed a committee to investigate and report on the question of constructing a municipal electric light plant.

Tomahawk, Wis.—The Tomahawk Power Co. is reported incorporated with a capital of $25,000 by R. A. Curtis. A. H. Reid and others.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Geneva, Ala.—Richard Tullis, of Montgomery, is stated to have announced that he would soon begin the construction of an electric railway from Geneva to Dothan, Ala., to cost $500,000. It is his intention when this work is completed to extend the line to Union Springs, Troy, Eufaula, Clayton and Montgomery.

Los Angeles, Cal.—It is stated that since the Los Angeles-Pacific Co. was granted a permit to construct its subway from Temple St. to Sunset Boule., the company has changed its plans and now proposes to build a large subway. The old ordinance provided for a subway 26 ft. high and 22 ft. wide. Recently the City Council passed an ordinance providing for a subway 24 ft. high and 28 ft. wide. The Hill St. tunnel is to be large, and it is desired to make both bores correspond. It is the intention of the company to begin work on the subway at once.

Santa Cruz, Cal.—The City Council is stated to have granted a franchise to the Ocean Shore R. R. Co. for entrance into Santa Cruz, together with terminus and depot site in this city.

Ventura, Cal.—F. M. Packard and J. P. Jones, of Los Angeles, are stated to have applied for a franchise for an electric railway from Ventura to Nordhoff.

Hanford, Cal.—F. S. Granger is stated to have secured a franchise for a street railway over certain streets in Hanford.

Trinidad, Colo.—I is reported that extensive improvements on the street car system are now being contemplated by the Trinidad Electric Ry. Co. and within a year the company proposes to connect Cokedale, Sagundo, Hastings and interlying coal camps with Trinidad. One of the branches will extend west and the other north.

Farmer City, Ill.—The City Council is reported to have granted a franchise to Corn Belt Interurban Ry. Co. for right-of-way along east side limits of the city.

Canton, Ill.—It is stated that the Illinois Central Ry. Co. contemplates constructing a power station for a 12-mile line.

Carthage, Ill.—A petition is reported to have been filed by the Mississippi Valley Electric Ry. Co. with the State Bd. of Railroad and Warehouse Comnrs. asking for permission to cross at grade the Wabash R. R. at Carthage and the Toledo, Peoria & Western R. R. at Elvaston. The railroad in question is to be constructed from Carthage west to Keokuk, Ia., and from Hamilton, opposite from Keokuk, Ia., through Nauvoo to Ft. Madison, crossing the Santa Fe bridge at Ft. Madison and the Keokuk & Hamilton bridge at Keokuk. R. R. Smith, Assist. Engr., 1034 Rookery Bldg., Chicago.

Alton, Ill.—W. Rudsill, of Bunker Hill, is stated to have applied to the Village Bd. of East Alton for a franchise for a street railway through that place. He states the projected line will run from Bunker Hill through Bethalto Oil City and East Alton to Alton, a distance of 20 miles.

Crawfordsville, Ind.—The Comrs. of Montgomery County are stated to have granted a franchise to the Chicago & Western Indiana Traction Co., known as the "Educational Route," to construct and operate an electric railway through the county.

**Princeton, Ind.*—The Evansville & Southern Indiana Traction Co., (R. H. Cole, Ch. Engr.), is stated to have let a contract to Jones Bros., of Columbus, O., for the construction of its extension between Princeton and Paloka, a distance of 4½ miles. The contract to construct the five bridges on the extension was awarded to the Lafayette Engineering Co., of Lafayette.

Atlantic, Ia.—The Atlantic Northern & Southern Ry. Co. is stated to have announced that they have completed arrangements for the right of way for the entire distance between Atlantic and Kimbalton. The work of grading has been started. The line will be in all about 20 miles in length.

Clinton, Ia.—The Wenatchee Valley & Northern Ry. Co. is stated to have filed articles of incorporation with the Secy. of State; capital, $100,000. L. Lamb, Pres.; Petrel Davis, Treas.; J. E. Lamb, Secy., all of Clinton.

Rosedale (Kansas City), Kan.—The Strang Olathe-Kansas City Electric Ry. Co. is reported to have applied to the City Council of Rosedale for a franchise for the use of the streets.

Northampton Mass.—Eugene D. Parks, of Russell, and others are reported to have announced that plans are being considered for the construction of a street railway from Northampton, Easthampton and Westhampton. The line, it is proposed, will extend from Easthampton to Loudville, West Farms and Florence, with a branch line to Westhampton.

Bemidji, Minn.—The City Council is reported to have passed the ordinance granting a franchise to Carl C. Gowran, A. A. Carter and Geo. W. Teitsworth for constructing and maintaining a street railway in Bemidji.

Brooklyn, N. Y.—The Public Service Comn. on Oct. 2 passed a resolution providing for the construction of the 4th Ave. subway in accordance with plans of the Bd. of Rapid Transit R. R. Comrs. of N. Y. City, and bids for same will be called for at once; probable cost of construction, $23,000,000. The route of the line is from the Manhattan terminal of the Manhattan Bridge, over the bridge and under the extension of Flatbush Ave. to Flatbush and Atlantic Aves., thence under 4th Ave. to 40th St. This is the part that will be contracted for almost immediately, the line to be 4 tracked. Eventually 2 tracks will be extended from 40th St. to Ft. Hamilton, and the other 2 tracks will be carried from 40th St. to Coney Island.

Buffalo, N. Y.—The Public Service Comn. is stated to have granted an order of approval to the Crosstown St. Ry. Co., of Buffalo, to construct an extension of its electric street railroad in Cheektowaga, in and through Delavan Ave., from the city line of Buffalo to the Pine Hill Road.

Tottenville, S. I., N. Y.—The construction of an electric traction system on Staten Island is reported projected by New York capitalists, who plan to build and operate a line in a section which is now served by stages. The line will be known as the Richmond & Tottenville Ry. Co., to connect Richmond, Rossville, Kreischersville and Tottenville. The road will be standard gauge and about 10 miles long. The estimated cost of construction and equipment is about $400,000. Thos B. McGovern, Broad Exchange Bldg., and Cornelius G. Kolff, 50 Bway., New York City, are reported interested.

Dayton, O.—The Dayton St. Ry. Co. is stated to have been granted a franchise from southwest Dayton to Dayton View and northwest Dayton, and the announcement has been made that the construction work will be begun at once.

Defiance, O.—The Ohio Electric Ry. Co. is stated to have made the Co. Comrs. a proposition to build a joint bridge across the Auglaize River at this point, the structure to be 80 ft. wide and 4 spans long and built of concrete.

Albany, Ore.—A. Welch is reported to have been granted a franchise for a street railway in Albany.

Eugene, Ore.—The Eugene & Eastern Electric Ry. Co. (J. O. Storey, Pres.) is stated to have begun surveys for the electric railway to be constructed between Eugene and Portland.

Wellsville, Pa.—A charter is stated to have been granted to the Dillsburg & Wellsville R. R. Co. to build a line from a connection with the Dillsburg & Mechanicsburg line at Dillsburg via the Stony Run, Beaver Creek & Doe Run R. R. to Wellsville. The line will be 7½ miles long and the capital is $75,000. Directors, Augustus C. Hetrich, of Wellsville; Robert J. Beet, Jos. Milligan, West De Brougher and others.

Chambersburg, Pa.—Governor Stuart is reported to have approved the application of the Chambersburg, Greencastle & Waynesboro St. Ry. Co. for an extension of its system from Greencastle to Chambersburg. Practically all the rights of way have been secured. Construction work will likely be commenced at the Greencastle terminus, and connection may be made with the Chambersburg & Gettysburg system at Chambersburg. The line will pass through Kauffman's, Rhodes' Grove, Marion and Guilford Springs.

Lancaster, Pa.—The Conestoga Traction Co. is stated to have purchased a site for a new carbarn and power plant. It is expected that work on the new plant will be started soon.

McSherrystown, Pa.—The Hanover & McSherrystown St. Ry. Co. is stated to have secured a franchise from City Council for extension through McSherrystown, and proposes extending the line to Littlestown, a distance of about 5 miles.

**Items marked thus give the names of parties awarded contracts.*

Windber, Pa.—It is stated that the Berwind-White Coal Mining Co. is considering the construction of an electric railway to connect central Windber with the various mines of the company in that section.

Pittsburg, Pa.—The City Council is reported to have passed an ordinance granting a franchise to the Dravosburg Heights St. Ry. Co.

Providence, R. I.—See "Miscellaneous."

Chattanooga, Tenn.—It is stated that the Tennessee Constr. Co. is to build the Georgia-Tennessee Interurban Electric Ry., which is being promoted by S. W. Divine. It is understood that this concern is to build a line from Chattanooga to Chickamaug Park and that another concern will build the line from that point to Spring Place, Ga. The Tennessee Constr. Co. has capital of $25,000. Samuel B. Smith, Pres., and W. M. Elliott, Secy. and Treas.

Houston, Tex.—The Galveston-Houston Electric Co. is reported organized by the Stone & Webster interests, of Boston, to embrace in its holdings three companies, the Houston Electric Co., which is the terminal company in Houston, owning the Houston St. Ry. system; the Galveston Electric Co., which is a terminal company, owning the Galveston St. Ry. system, and the third is the Galveston-Houston Electric Ry. Co., which is a concern organized for the purpose of constructing an interurban line between Houston and Galveston, a distance of 52 miles. Surveys have been made and considerable preliminary work has been done toward the construction of the interurban. The line will run on a private right of way, and actual construction will be begun as soon as various further preliminaries have been arranged.

Bellingham, Wash.—Albert A. Hang is reported to have announced that he will construct an electric railway connecting the Mt. Baker mining dist. with Bellingham.

Tacoma, Wash.—The Pacific Traction Co. is stated to have filed a mortgage of $2,000,00 to provide funds for the construction of the Tacoma system. The next line to be built will be to Point Defiance.

Elkins, W. Va.—S. B. Elkins, Richard O. Kerns and Henry Gasaway Davis, of New York, N. Y., are stated to have secured a charter for an electric railway through the counties of Taylor, Balbour and Randolph in West Virginia, to be connected with the Morgantown, Fairmont & Mannington Line, which is to be extended to Wheeling, and then run direct to Pittsburg. It is said that the road will cost close to $1,000,000. The name of the new company is the Elkins Light & Power Co.

Chihuahua, Mex.—It is reported announced that more than $1,000,000 will be spent in constructing the new electric street railway system in Chihuahua and in building suburban lines to Santa Eulalia and to the new smelter of the American Smelting & Refining Co., 16 miles distant. The rails and other material for the new system have arrived. Enrique Creel is said to be interested and A. C. Nash is Gen. Mgr.

Mexico City, Mex.—The Electric Tramways, Ltd., of this city, is stated to have obtained concessions from the Federal Government to build important extensions and to double track some of its existing lines.

Vera Cruz, Mex.—Announcement is stated to have been made by the Vera Cruz Electric Light, Power & Traction Co. that it has completed arrangements to provide that city with electric traction in addition to the power and lighting service which it is now supplying. The power plant at Vera Cruz is being greatly enlarged and work of rebuilding the track will soon be started.

Linares, Mex.—The street railway system of the city of Linares, State of Nuevo, Leon, is reported to have been purchased by Jose Bonilla. He states that he will greatly improve the lines and will build extensions to two smaller towns in that immediate section.

Saltillo, Mex.—It is stated that a number of capitalists have organized a syndicate, headed by Guillermo Velasco and Rodolfo Garza, of Saltillo, to construct an electric street railway system in Saltillo.

RAILROADS.

Notes Arranged Alphabetically by States.

Denver, Colo.—Local press reports state that the Denver, Laramie & Northwestern R. R. Co., is reported organized to build a railroad from Denver to Lander, Wyo. Col. W. E. Skinner, of the Denver Union Stockyards Co., is said to have purchased for the syndicate promoting the road, the Higby tract on W. 48th Ave. and Bwdy. as a site for its terminal road.

Lewiston, Idaho.—Articles of incorporation of the Bitter Root R. R. Co., an auxiliary of the Oregon & Navigation Ry. Co., were renewed on Sept. 14 by the filing of new articles in the office of the Clk. of Multnomah County. Capital, $200,000. It proposes building a railroad from Lewiston, Idaho, into Montana. The line will ultimately be built, it is said, and become a part of the Oregon Ry. & Navigation system, connecting with the Lewiston extension.

Muskogee, Ind. Ter.—The final survey for the Shawnee Central R. R. Co. is reported to have been completed. The road is to run from Muskogee to Childress, Tex., 300 miles, with an 80-mile branch line between Shawnee and Tulsa. Dr. W. S. Woods, of Kansas City, Mo., Pres. of the National Bank of Commerce, is the chief promoter.

A company is reported organized at Guthrie, Okla., to build a railroad 55 miles long, for the purpose of connecting Muskogee to a point on the Ft. Smith & Western R. R. and also connecting that section with deep water navigation on Arkansas River, estimated cost of line is $1,500,000. Incorporators: C. R. D. Dean, J. M. Aydelotte and C. H. Gilman, of Shawnee, Okla., and Ira L. Reeves and S. M. Rutherford, of Muskogee.

Danville, Ky.—J. F. Allen, Pres. of the railroad which is to be constructed from Danville to Scottsville, is reported to have floated bonds to the amount of $2,000,000. Right of way has been secured from Scottsville to McKinney, and the survey will be completed into Danville ... Contractor W. J. Oliver, of Chattanooga, Tenn., ... expected to be here to make an estimate on cost of construction.

... *Ky.*—A railroad to connect Corbin, Ky., on the ... Louisville & Nashville R. R., with Clarksville, ... reported projected. The road is to be known as the ... ville & Norththeastern R. R., and will be constructed by way of Monticello, Ky., Burnside, Albany, Ky., ... Boiling Springs, Lafayette and Springfield, Tenn. The first portion of the line to be constructed will be from Corbin to Monticello, about 55 miles. Saml. Woodward, of Cincinnati, is president of the company.

Buffalo, N. Y.—Press reports state that surveyors are at work in Wayne County on the route of a steam road to be constructed from Troy to Buffalo, known as the Buffalo, Rochester & Eastern R. R. The road will run through Butler, Rose, 5 miles north of Clyde; South Sodus, North Walworth and Pittsfield. A syndicate of capitalists interested in the Boston & Maine R. R., and the New York, New Haven & Hartford R. R. are reported interested in this new road.

Utica, N. Y.—The New York Central & Hudson R. R. Co. (Geo. W. Kittredge, Ch. Engr., N. Y. City) is reported to have completed and presented to Mayor Sherman, plans for an elevated crossing at Genesee St.; two plans were presented, one of which would cost $524,000 and which provides for a clearance above the freight tracks of 22 ft.; and the other plan, to cost about $780,000, provides for a clearance of 22 ft. above all the tracks. The former is said to be considered the most desirable.

Edinburg, N. D.—The Northern Dakota Ry. Co. is reported organized, with Thos. Campbell, Pres.; Elis Thorwaldson, Vice-Pres., and Dan Bull, Secy., to construct a railway from Edinburg north a distance of 21 miles to the plant of the Pembina Portland cement mines.

Sandusky, O.—At a recent meeting of City Council the report of City Engineer Schultz on the grade crossing subways was submitted. His estimates varied from $118,000 to $150,000 per subway for 4 subways.

Toledo, O.—City Engr. Frank I. Consaul is reported to have prepared an estimate of cost of the separation of grades at the junction of Bway. and the Wabash R. R. The elevation of the Wabash R. R. tracks and the lowering of the street to conform, will cost, approximately, $133,637. Of this the Wabash R. R. Co. (A. O. Cunningham, Ch. Engr., St. Louis, Mo.) must pay $66,818, and the Toledo Ry. & Light Co. and the City, each $33,409. The Wabash tracks will be raised 4½ ft. and Bway. will be lowered 12 ft.

Cleveland, Okla. Ter.—The Wichita, Cleveland & Gulf Ry. Co. is reported incorporated with a capital of $50,000,000 and headquarters at Cleveland, Okla., to build a railroad from Wichita, via Cleveland, to Port Arthur, Tex., passing through Sedgwick, Butler, Cowley and Chautauqua Counties, in Kans.; the Osage reservation and Pawnee County, in Okla.; the Creek, Cherokee and Choctaw nations in Ind. Ter., and the states of Arkansas, Texas and Louisiana; estimated length of proposed line is 634 miles. Incorporators are David Ratjer, J. F. Hethering, J. C. Byers, and others, all of Cleveland.

**Philadelphia, Pa.*—The contract for the first construction work in connection with the elevation of its tracks between Market St. terminal and Wayne Junction, is reported to have been awarded on Sept. 24 by the Reading Ry. to Riley & Riddle. It provides for laying out of a temporary freight yard of 200 cars capacity on 17th and 19th Sts. and Indiana Ave., along the line of the Philadelphia, Germantown and Norristown branch of the railway.

Specifications are reported as being printed by the Philadelphia & Reading Ry. (Wm. Hunter, Engr., Phila.) for the celvation of tracks between a point south of Berks and Broad Sts. The railway will invite bids within a few days. The tracks in this section will be raised by a solid embankment with masonry retaining walls. Engineers of the railway are also drafting plans for a temporary locomotive storage yard at Wayne Junction, for which bids will be asked in a short time. A storage yard for passenger equipment will be laid out at Huntingdon St., near Broad St., on the property formerly occupied as a freight delivery yard.

**Swissvale, Pa.*—A contract is reported to have been awarded by the Pennsylvania R. R. Co. to the Green & Read Constr. Co. for the undergrade crossing at Braddock Ave., Swissvale station, to be completed about July, 1908; the work is estimated to cost about $100,000.

Anderson, S. C.—The contract for the survey for the Georgia-Carolina R. R. to connect Athens, Ga., and Anderson, is reported to have been let at Royston, Ga., on Sept. 19, to Decamps & Cunningham, of Anderson, and the Richardson Weq Eng. Co., of Atlanta, Ga. These two firms will work jointly. The survey work will commence within 30 days.

Menasha, Wis.—The Ontonagon Northern R. R. Co. is reported incorporated, and is to be the Michigan end of the Wisconsin & Northern R. R. and is to extend from Oskosh to Ontonagon, Lake Superior. The projector of the line is said to be the Menasha Woodenware Co.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Selma, Ala.—The following are the bids received Sept. 30 by the Superv. Archt. at Washington, D. C., for the construction, including heating apparatus, plumbing, gas piping, electric conduits and wiring, of the U. S. Post Office at Selma: Algernon Blair, Montgomery, Ala., $139,800; King Lumber Co., Charlotteville, Va., $119,300, and H. A. Bishop, Chicago, Ill., $138,250.

Hot Springs, Ark.—Bids will be received about Oct. 19 by Capt. P. L. Boyer, Q. M., U. S. A., for furnishing material and constructing on the Government reservation here, a 1-story, 33x56 ft., stable and carriage house, including excavations, if any, necessary for same; foundation, stone and cement; superstructure, brick; roof, slate; bids will also be received for plumbing of same.

Oakland, Cal.—The Fabiola Hospital Assoc., it is reported, has asked bids for erecting a 3-story addition to the hospital, to cost $50,000.

The Fire Comr. has asked the Bd. Pub. Wks. to have plans prepared and ask bids for erecting the fire department building on Bush St., to cost $25,000.

Santa Rosa, Cal.—It is stated that a city hall and fire department building is to be erected at a cost of $50,000, exclusive of site.

Denver, Colo.—The lowest bids received recently for erecting a public bath at 20th and Curtis Sts., it is stated, were as follows: General work, W. E. Towers, Continental Bldg., $48,877; plumbing Irving Plumbing & Htg. Co., 1709 California St., $11,497; ventilating and heating, T. F. Dolan Htg. & Plumbing Co., 1422 Glenarm St., $7,400.

**Atlanta, Ga.*—J. R. Gray, Pres. Auditorium-Armory Bd., writes that the contract for erecting auditorium-armory has been awarded to Gude & Walker, of Atlanta, for about $200,000.

Arco, Idaho.—It is stated that the Bd. Co. Comrs., at Harley, will receive bids until Oct. 14 for erecting a jail at Arco.

Chicago, Ill.—Bids will be received until Oct. 12 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and erecting a fire engine house at 710 52d Ave., bids to be submitted on the following: Masonry, carpentry, iron work, plumbing, etc.

Watertown, Ill.—It is reported that bids are wanted until Oct. 8 for erecting a building for the Western Illinois Hospital for the Insane. W. Carbys Zimmerman, State Archt., 1001 Steinway Hall, Chicago.

East St. Louis, Ill.—Bids will be received by Jas. Knox Taylor, Superv. Archt., Washington, D. C. until Oct. 28, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring), of the U. S. Post Office and Court House at East St. Louis.

Auburn, Ind.—It is stated that the State Bd. of Charities have plans for a poor asylum, to be erected in DeKalb County.

Muscatine, Ia.—The following are the bids opened on Sept. 19 at the office of the Supervising Archt., Treas. Dept., Washington, D. C., for the construction complete of the U. S. Post Office at Muscatine: General Constr. Co., Milwaukee, Wis., $57,640; W. J. McAlpine, Dixon, Ill., $55,400; G. B. Strickler, Cedar Rapids, Ia., $58,890; Northern Constr. Co., Milwaukee, Wis., $59,500; C. W. Gindele Co. Chicago, Ill., $58,250, and J. W. Wiese, S. Omaha, Neb., $58,200.

A. S. Lawrence, Co. Aud., writes that the contract for erecting courthouse (bids opened Sept. 26) has been awarded to W. J. McAlpine, of Dixon, Ill., for $108,500.

Mason City, Ia.—The Mason City Hospital Co., it is stated, has accepted plans and specifications for its hospital, which is to cost about $25,000. Dr. I. I. Nichol, Secy.

Waterloo, Ia.—The Franciscan Sisters, of St. Louis, Mo., it is reported, propose erecting a hospital here at a cost of about $70,000.

Cedar Rapids, Ia.—The following are the bids opened on Sept. 23 at the office of the Superv. Archt., Treas Dept., Washington, D. C., for the construction (except elevator) of an extension, remodeling, etc., to U. S. Post Office and Court House at Cedar Rapids: G. B. Strickler, Cedar Rapids, $129,782; Northern Constr. Co., Milwaukee, Wis., $138,000; General Constr. Co., Milwaukee, Wis., $121,277; W. J. McAlpine, Dixon, Ill., $117,000, and Bartlett & Kling Cedar Rapids, $138,537.

National Military Home, Kan.—Bids will be received until Oct. 22 by Maj. W. M. Martin, Treas., N. H. D. V. S., for constructing the following buildings: Combination barrack building, with mess hall and kitchen; addition to quartermaster's storehouse; quarters for chaplain; addition to mess hall; dormitory for civilian employes. Separate bids to be submitted for heating, plumbing and electrical work.

Louisville, Ky.—Bids will be received until Oct. 10 by the Bd. Safety (W. W. Davies, Chmn.) for erecting a police station at 18th and Garland Aves. Fred Erhart, Archt., 409 Norton Bldg.

Portland, Me.—Bids will be received by Capt. F. I. Morrow, Q. M., U. S. A., 478½ Congress St., Portland, until Nov. 5 for the construction, etc., of a double barrack at Ft. Williams, and a single barrack at Ft. McKinley, as advertised in The Engineering Record.

Ft. Washington, Md.—Bids will be received by the Constructing Q. M., U. S. A., Ft. Washington, until Nov. 4 for the construction, plumbing, heating, electric wiring and installing electric light fixtures for one double barrack building for coast artillery at Ft. Washington, as advertised in The Engineering Record.

Baltimore, Md.—The erection of a central police station, at a cost of about $100,000, is reported under consideration.

**Quincy, Mass.*—Conners Bros., of Lowell, Mass., have secured the contract for erecting complete U. S. Post Office (bids opened Sept. 4 at the office of the Superv. Archt., Treas. Dept., Washington, D. C.), for $69,835.

**Charlestown, Mass.*—The Mass. State Armory Comn., at Boston, it is stated, awarded the contract to erect an armory in Charlestown on Bunker Hill St., (bids for which were opened Sept. 23), to Whiton-Haynes Co., 35 Federal St., Boston, at $121,000.

**Worcester, Mass.*—The contract to erect an addition to the heating plant at the City Home is reported awarded to John J. Power, at $3,600.

Flint, Mich.—Bids will be received at the office of the Superv. Archt., Washington, D. C., until Nov. 5, for the construction complete of U. S. Post Office at Flint, as advertised in The Engineering Record.

Lansing, Mich.—We are informed that all bids opened on Sept. 16 for alterations to City Hall have been rejected as being too high, and work will be done by day work, under direction of the Supt. of Pub. Wks.

St. Paul, Minn.—The Fire Bd., it is reported, has rejected all bids recently received for erecting No. 18 engine house, on University Ave. and St. Albans St., as they exceeded the appropriation, which is $25,000.

Minneapolis, Minn.—The State Bd. of Equalization, it is reported, is in favor of issuing $45,000 for the rebuilding of cells, installing new plumbing system and otherwise improving the sanitary condition of the county jail. $15,000 has been granted to rebuild the elevators in the courthouse.

Independence, Mo.—The Co. Court is reported to have adopted plans for the 2 buildings to be erected at the county farm, as prepared by Smith & Rea, Dwight Bldg., Kansas City. The main building is to be 3 stories, 309x232 ft., and the other 2 stories, 50x110 ft., constructed of

*Items marked thus give the names of parties awarded contracts.

native limestone, and it is stated that bids for the construction will be received about Oct. 22. Estimated cost, $250,000.

*St. Joseph, Mo.—George & Burnet are reported to have secured the contract to erect an addition to the Ensworth Medical College and Hospital, at about $30,000.

Fayette, Mo.—The citizens, it is reported, have authorized the erection of a building at the County Infirmary to cost $10,000.

St. Louis, Mo.—The City Officials are said to be contemplating the erection of a new public market at a cost of about $500,000.

Bids will be received until Oct. 18 by the Bd. Pub. Improv. (A. J. O'Reilly, Pres.) for furnishing material and rebuilding the east wing of the main building of the City Poorhouse, known as Bldg. No. 1; probable cost, $25,000.

*Helena, Mont.—It is stated that the contract to erect the House of the Good Shepherd near Kenwood has been awarded to Lease & Richards, of Great Falls, at $75,545, including laundry building. Contracts are yet to be let for the plumbing and lighting of said building, which will cost an additional $15,000.

*Omaha, Neb.—McGowan & Jacobberger are reported to have secured the contract to erect the Clarkson Hospital. The total cost of the building is to be about $100,000.

*Binghamton, N. Y.—T. E. McGarr, of Albany, N. Y., State Comr. in Lunacy, writes that the contract for constructing diningroom and kitchen addition to Chronic Bldg., to include construction, heating, plumbing, electric light wiring and fixtures and feeder cables, at Binghamton State Hospital, Binghamton, has been awarded to R. T. Ford & Co., of Rochester, for $49,900.

Ft. Totten, Willet's Point, N. Y.—Bids will be received at the office of the Constr. Q. M., U. S. A., until Oct. 18, for alterations and repairs to Barracks 107, 108 and 110 at this post, as advertised in The Engineering Record.

Plattsburgh Barracks, N. Y.—Bids will be received at the office of the Constr., Q. M., U. S. A., until Oct. 28, for constructing, plumbing, and electric wiring, a quartermaster's stable, and constructing a wagon shed at this post, as advertised in The Engineering Record.

Castleton, S. I., N. Y.—Bids will be received by Dept. Pub. Charities (Robt. W. Hebberd, Comr.), New York City, until Oct. 14, for labor and materials required for the excavation, masonry, steel and iron roofing and metal work, carpentry, glazing, painting, hardware, electric work and all other work (except plumbing, heating, elevator work, electric wiring and fitting up of the diet kitchens, drug rooms and utility rooms), for the construction and completion of 6 ward buildings of the Sea View Hospital, on Manor Rd., Township of Castleton, Boro. of Richmond. Raymond F. Almirall, Archt., 51 Chambers St., New York City.

**Wilkinsburg, Pa.*—Jack Allhouse, it is reported, has secured the contract to erect a $25,000 brick and stone edifice for the Warren M. E. Church on Center Ave., Wilkinsburg.

Sewickley, Pa.—Nirdlinger & Simpson, Diamond Bank Bldg., Pittsburg, are said to be preparing plans for a $30,000 cement and brick residence, to be erected at Beaver and Grove Sts., for Wm. McBride.

Philadelphia, Pa.—It is stated that plans are being prepared by W. L. Blithe, Rothschild Bldg., and will be ready in about a month for bids for erecting the new edifice for the Fletcher Memorial Presbyterian Church, on 58th and Master Sts.

**Norristown, Pa.*—Geo. W. Rogers is reported to have secured the contract to erect a 3-story residence for Frank B. Wonsetler at Norristown, to cost $15,000.

Providence, R. I.—It is reported that the members of St. Anne's R. C. Church are contemplating the erection of a $25,000 edifice.

Dallas, Tex.—It is stated that a committee has been appointed by the Oak Lawn Methodist Church to secure plans for a new edifice which it is proposed erecting at a cost of about $25,000.

Spokane, Wash.—The members of the First Presbyterian Church, according to reports, are considering the erection of a new edifice to cost about $75,000.

SCHOOLS.

Notes Arranged Alphabetically by States.

Jasper, Ala.—The erection of a high school at a cost of about $25,000 is reported under consideration.

Alameda, Cal.—See "Power Plants, Gas and Electricity."

San Diego, Cal.—The Bd. of Educ. is reported to have accepted the plans of Harrison Albright, of Los Angeles, for a reinforced concrete 20-room school, to be erected at 12th, 13th, E and F Sts., at a cost of about $100,000, including equipment.

**Redondo, Cal.*—L. J. Notman is reported to have secured the contract to erect the grammar school, at $11,000.

South Pasadena, Cal.—A. Hinckley, City Clk., writes that the citizens on Sept. 13 voted to issue $25,000 bonds for erecting schools. For further information address Clk. County Board of Supervisors.

Willimantic, Conn.—Jos. Jackson, of New York, N. Y., is reported to have submitted plans for a 2-story 10-room brick school to be erected for St. Joseph Parish. Rev. J. J. Fleming, pastor.

Buhl, Idaho.—It is reported that W. R. Parson & Son Co., of Duluth, Minn., has been engaged to prepare plans for a school to be erected here at a cost of $25,000.

Greencastle, Ind.—The Library Com. of De Pauw Univ., it is stated, has directed O. D. Bohlen, Majestic Bldg., Indianapolis, to complete plans for the library, which, it has been decided, is to be constructed of stone and reinforced concrete. Bids for the construction will be asked, according to reports, in about 5 weeks; probable cost, $50,000. C. W. Coffin, Secy., De Pauw Univ.

Wichita, Kan.—The Roman Catholics, it is reported, contemplate erecting a Cathedral School to cost about $130,000.

Washington, Kan.—The Secy. Bd. of Educ. writes that bids will be received on Oct. 20 for the erection of a high school, to cost bet. $12,000 and $15,000.

Covington, La.—Bids will be received until Oct. 12 by C. Z. Williams, for the entire construction of a public school. And. J. Bryan, Archt., 708 Hennen Bldg., New Orleans.

**Salem, Mass.*—T. G. Pinnoch writes that the contract for installing a hot water circulating system in the high school (bids for which were received Sept. 10), has been awarded to Evans Almirall Co., of New York, N. Y.

**Fall River, Mass.*—Patk. Corrigan, 4 Morgan St. is reported to have secured the contract to erect the Westall School, a red brick structure, including ventilating, heating, lighting, etc., at $66,500. Other bids were: Jas. A. Donnelly, $69,792; Fall River Granite & Constr. Co., $73,995.

Northampton, Mass.—It is reported that a new library is to be erected at Smith College at a cost of about $60,000.

**St. Clair Heights, Mich.*—J. Merrill, Principal of School, writes that John Cutler, of Detroit, has the general contract and Ernst. Bros., of Detroit, the contract for the heating and plumbing in the 4-room addition to the school.

Lansing, Mich.—The State Bd. of Agriculture is stated to have rejected all bids recently received for erecting the agricultural building at the Michigan Agricultural College, as they exceeded the appropriation, which is $125,000.

**Ishpeming, Mich.*—Chas. Burt, Chmn. Bldg. Com., Bd. Educ., School Dist. No. 1, writes that C. L. Anderson, of Ishpeming, has secured the contract for ventilating and heating the high school (bids opened Sept. 23) for $14,022.

Bids for plumbing, sewerage and gas fittings for the above high school have been rejected and new bids will be received in about 2 weeks.

Opechee, Mich.—It is stated that the plans and specifications for the $10,000 school are about completed and bids for the construction will soon be asked.

Moorhead, Minn.—It is stated that all bids recently received by the State Bd. of Control at St. Paul, for erecting the Normal School here, exceeded the appropriation, which is $50,000. The plans are to be modified so as to reduce the cost.

Eveleth, Minn.—It is stated that plans and specifications for a school to be erected on the north side have been completed, and bids for the construction will soon be asked.

**Minneapolis, Minn.*—It is stated that the contract for installing a ventilating and heating system in the West High School has been awarded to Archambeau Htg. & Plumbing Co., 219 S. 3d St., at $21,640.

**Kansas City, Mo.*—Flanagan Bros. are reported to have secured the contract for erecting annex to Central High School to cost about $50,000. Architect, C. A. Smith, Dwight Bldg.

**Items marked thus give the names of parties awarded contracts.*

Helena, Mont.—A. O. Von Herbulls, of Washington, D. C., it is stated, has submitted to Bishop John P. Carroll, of Helena, plans for the high school which is to be erected for the Roman Catholic Church. The building is to be 2-story, 140x156 ft., constructed of granite and yellow brick.

Trenton, Neb.—The contract to erect the high school, it is stated, has been awarded to E. Rokahr, of Lincoln, at $12,304.

Merno, Neb.—Bohrer Bros., of Fall City, according to reports, have secured the contract to erect a school at $11,400.

Woodridge (Rutherford), N. J.—Bids will be received until Oct. 14 by Chas. J. Funz, Dist. Clk., Woodridge St. and Union Ave., for erecting an addition to the present schoolhouse. Wm. M. Meeker, Archt., Passaic.

Plainfield, N. J.—The erection of 2 wings to the high school at a cost of $40,000, is reported under consideration. The erection of a primary school on Darrow Ave. at a cost of about $90,000, is also reported under consideration.

Princeton, N. J.—It is stated that plans have been completed for the physical laboratory, which is to be erected at the Univ. at a cost of about $600,000. Work is to commence at once. Plans have also be completed for the geological and biological laboratory, which is to be erected at a cost of $600,000, but work on this will not commence for several months.

Roselle Park, N. J.—The citizens, on Sept. 24, it is stated, authorized the issue of $68,000 bonds to erect a high school.

Syracuse, N. Y.—The Consolidated Eng. & Constr. Co., 1 Madison Ave., New York City, has secured the contract for erecting a gymnasium for the Syracuse University. It will be of steel frame construction, 3 stories high, and dome, trimmed with ornamental terra cotta, pressed brick and granite, and provided with all the latest apparatus, swimming pools, etc.; cost about $300,000.

West Raleigh, N. C.—The Trus. of the North Carolina A. & M. College are reported to have decided to erect a Y. M. C. A. building to be 2 stories high, 70x80 ft.; cost about $20,000. Geo. T. Winston, Pres.

Cincinnati, O.—Wm. Grantman, Clk. Bd. of Educ., writes that bids will be received about Nov. 11 for the construction of a school at Westwood, to cost about $150,000. Architects, Garber & Woodward, of Cincinnati.

Springfield, O.—The Bd. of Educ., it is stated, is contemplating the erection of a high school.

Red Lion, Pa.—It is stated that the School Bd. is considering a site, on which it is proposed erecting a 12-room school.

South Sharon, Pa.—A. R. Maxwell, Secy. School Bd., writes that the contract to erect the high school (bids for which were received Sept. 28) has been awarded to A. Wishart & Sons, of Sharon, at $59,434, and the contract for the ventilating and heating plant for same school (bids received same time) to the American Htg. & Ventilating Co., of Pittsburg, at $11,335.

Warren, R. I.—The taxpayers, it is stated, have authorized the erection of a school in the Parker Mill Dist., at a cost, including equipment, of about $12,000.

Exeter, R. I.—The State Bd. of Educ., it is reported, has decided upon a site in Exeter, on which it is proposed erecting the State Inst. for Feeble Minded.

Memphis, Tenn.—Alsup & Wood, Randolph Bldg., are stated to have revised the plans for Carr Ave. School, and A. B. Hill, Secy. Bd. Educ., is reported to have been authorized to receive bids for the construction; also bids for erecting a 12-room school on Mhoon Ave. and Poplar Boule. Each building is to cost about $50,000, exclusive of heating and furniture.

Uvalde, Tex.—It is reported that the contract to erect the brick public school, not including heating, has been awarded to Birkner Bros., of Lockhart, at about $30,000.

Woodstock, Va.—W. R. Parson & Son Co., of Duluth, Minn., it is stated, has been engaged to prepare plans for a combined high and grade school building.

Norfolk, Va.—J. W. Jones, of Norfolk, is reported to have been awarded the contract for erecting a $17,000 annex to the Ward school.

Ellensburg, Wash.—The State Bd. of Control at Olympia, it is reported, has awarded contracts as follows for work at Ellensburg Normal School: Buildings, Lance & Peters, Seattle, $53,700; plumbing, Wm. B. Coffee Plumbing Co., of Tacoma, $4,199; heating, Seattle Htg. & Plumbing Co., Seattle, $13,520.

Madison, Wis.—Bids will probably be received in Nov. by the Bd. of Trus. of the University of Wisconsin (H. E. McCaffrey, Secy.), for the erection of the women's gymnasium, to cost about $150,000. Architect, Arthur Peabody, of Madison.

Edgerton, Wis.—Leenhouts & Guthrie, of Milwaukee, it is stated, have completed plans for the Child Memorial High School, a 2-story brick structure, which is to cost about $40,000.

East Milwaukee, Wis.—Fred Graf, 307 Grand Ave., Milwaukee, according to reports, has completed plans for a 2-story school to be erected in East Milwaukee at a cost of $10,000.

Manitowoc, Wis.—The School Bd. of Dist. No. 7, according to reports, has awarded contracts as follows for erecting the school on Marshall and 18th Sts.: Frank Wolfe, of Two Rivers, mason work, $4,997; Albert Tomcheck, of Manitowoc, carpenter work, which included tin and iron work and the painting, $4,800; J. H. Phalen, of Manitowoc, $1,497 for the plumbing.

Galesville, Wis.—It is stated that bids will be received until Oct. 23 by the Bd. Educ. (E. F. Clark, Clk.) for erecting a solid brick and stone high school. Parkinson & Dockendorff, Archts., La Crosse.

Superior, Wis.—Van Ryn & DeGelleke, of Milwaukee, it is stated, have completed plans for the normal school to be erected in Superior, at a cost of about $45,000, and as soon as plans have been approved by the Bd. of Regents at Madison bids for the construction will be asked by the Bd.

Oakville, Ont.—Bids will be received until Oct. 15 by the Bd. Educ. for erecting a high school. Address C. A. Bradbury, Oakville. R. B. McGiffin, Archt., 59 Yonge St., Toronto, Ont.

NEW INDUSTRIAL PLANTS.

See also Business Buildings.

Tehachapi, Cal.—The Golden State Portland Cement Co. is reported incorporated for the purpose of erecting a cement plant here, having a capacity of 2,000 bbls. of cement per day; capital, $2,000,000. Geo. W. Parsons, of Los Angeles, is Treas. of the company and a member of the Bd. of Directors.

Sioux City, Ia.—The Great Northern Ry. Co. (A. H. Hogeland, Ch. Engr., St. Paul, Minn.), it is reported, will construct a roundhouse, machine shops, an iron house, storage quarters, etc., in Floyd Valley; probable cost of work, $2,000,000.

Spencer, Mass.—Jos. F. Wicks, of Worcester, is said to be planning the erection of a brick mill on the site of the Red Mill, Valley St., the cost to be about $50,000.

New Bedford, Mass.—Abbott P. Smith is reported to have had plans prepared by C. R. Makepeace & Co., of Providence, R. I., for a new cotton mill, 4 stories high, 480x130 ft. Equipment, 70,000 spindles. The mill will be located on Hastings wharf.

Port Huron, Mich.—The Grand Trunk Ry. (J. L. Hodgson, Master Car Builder, Port Huron) is stated to have authorized the erection of 2 shop buildings at the north end of the city.

St. Paul, Minn.—J. W. Stevens, New York Life Bldg., is reported to be preparing plans for a factory to be erected in the Midway dist. for the manufacture of woollen suitings, the cost to be $75,000.

Gastonia, N. C.—The Dunn Mfg. Co. is reported incorporated, with C. E. Armstrong, C. N. Dunn and others, for the purpose of constructing a spindle plant and installing about 4,000 spindles; capital, $200,000.

Clinton, N. C.—W. D. McNeill, of Fayetteville is reported interested in a company which is to be formed for the purpose of constructing a cotton yarn mill of 5,000 spindles; capital, $125,000.

Belmont, N. C.—The Monarch Mfg .Co., it is stated, is about to be formed with A. C. Lineberger, Pres., and S. P. Stowe, Secy. and Treas., and will build a cotton mill of 10,000 spindles; capital, $200,000.

Mansfield, O.—Bids will be received until Oct. 16 by the Bd. Mgrs. Ohio State Reformatory, for furnishing material and constructing an ice-making and refrigerating plant of from 10 to 12 tons capacity. For further information address Jacob Reinhardt, Steward, Mansfield.

Bangor, Pa.—The York-Bangor Slate Co. is reported formed for the purpose of constructing a plant near Bangor, to cost $200,000. It is stated that the quarries will be operated by eelctricity. M. G. Collings ,of York, is Pres., and Cotton Amy, Mgr.

Philadelphia, Pa.—It is stated that a permit has been granted to McLaughlin Bros. to erect on Indiana Ave. and 20th St. a 4-story brick and stone 33x80-ft. manufacturing building for the Decker Electric Mfg. Co., to cost $25,000.

Pittsburg, Pa.—The Jones & Laughlin Steel Co. is reported to have been granted a permit to construct 2 open hearth furnaces below S. 27th St., to cost $12,500.

Memphis, Tenn.—Walter Webb and H. H. Maury, 90 Front St., it is reported, have secured the Merchants' Grain Elevator and Warehouse, at Tennessee and Trezevant Sts., and is having plans prepared for the thorough renovating of the building purchased and for new warehouses which are to be erected.

Spokane, Wash.—The Kootenai Northwest Lumber Co., in which G. J. Simpson, of the grocery firm of Simpson & Carter, is reported interested, is said to be planning the erection of a mill, location not yet decided upon. It is stated that the headquarters of the company will be in Spokane.

Yardley, Wash.—E. H. Stanton Co. is reported to have had plans prepared for an abbatoir and packing establishment, to be erected in Yardley, at a cost of $150,000.

Marinette, Wis.—The Goodman Lumber Co. is reported organized by Robt. F. Goodman and Chas. Goodman, of Marinette, and others for the purpose of erecting and equipping a sawmill in Northern Wisconsin for the manufacture of hardwood.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Pasadena, Cal.—Chas. L. Hill, of Los Angeles, is reported to have petitioned counsel for permission to establish a plant here for the disposal of garbage, refuse, dead animals, etc.

Baltimore, Md.—Local press reports state that all bids received Sept. 4 by the Bd. Awards (J. Barry Mahool, Pres.) for the removal and final disposition of garbage, dead animals and market refuse of this city from Jan. 1, 1908, until Jan. 1, 1918, have been rejected, and new bids will be received. J. L. Wickes, Comr. St. Cleaning.

Detroit, Mich.—The Bd. of Health is reported to have recommended to the City Council the establishment of a municipal plant for the incineration of refuse and rubbish.

Hoboken, N. J.—Peter A. Poluso is reported to have secured the contract for removal of ashes and garbage in Hoboken for the ensuing year for $9,500.

Newark, N. J.—We are informed that all bids opened at the office of the Bd. of Street and Water Comrs. (Morris R. Sherrerd, Ch. Engr.) on Sept. 26 for the collection, removal and disposal of ashes, rubbish material, paper and garbage in the City of Newark for a period of 5 years, beginning Jan. 1, 1908, have been rejected, the lowest bidder omitting to state in his bid the kind of reduction, cremation or incineration plant to be used. New bids will be received on Oct. 10, as advertised in The Engineering Record. The following are the totals of the bids received (*a* year 1908, *b* year 1909, *c* year 1910, *d* year 1911, *e* year 1912): Jacob & Benj. Meyer Contr. Co., Frelinghuysen Ave., Newark, *a* $152,500, *b* $155,500, *c* $159,500, *d* $166,500, *e* $169,000; Van Keuren & Son, Harrison, *a* and *b* $158,000, *c* and *d* $162,900, *e* $169,000; Henry Scheider, 786 Clinton Ave., Newark, *a* $129,500, *b* $134,500, *c* $139,500, *d* $144,500, *e* $149,500.

Harrisburg, Pa.—The Sanitary Com. of Councils on Sept. 26 recommended that Council award the 10-year contract for collection and disposal of garbage, dead animals, etc., to the Pennsylvania Ammonia & Fertilizer Co., owned by Carlisle & Martin, of Harrisburg, for $26,000 per year.

Altoona, Pa.—The Board of Health is reported to be considering the question of procuring bids for collecting and disposing of garbage for a period of from 1 to 10 years.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Alameda, Cal.—See "Power Plants, Gas and Electricity."

Denver, Colo.—The Continental Tunnel Co. is reported formed, with a capital of $5,000,000, to construct a tunnel about 6 miles in length under James Peak, which will also make a short cut for the Moffat R. R. between Denver and Salt Lake City. Herbert George, Simon Guggenheimer and Chas. Kountze, all of Denver, are reported to be among the stockholders.

Stockton, Cal.—R. C. Tumelty, City Engr., writes that plans have been adopted for constructing bulkhead on north side of Stockton channel, but no bids have yet been called for. A. C. Russel, City Clk.

Washington, D. C.—Bids were opened on Sept. 18 by Maj. Spencer Cosby, Corps Engrs., U. S. A., for dredging, and the Miner Eng. Co., of Norfolk, Va., secured the contract at the following bid: 100,000 cu. yds. soft mud and sand in Occoquan Creek, 16 cts.; 20,000 cu. yds. mud and sand in Urbana Creek, 22 cts., 28,000 cu. yds. sand in Carters Creek, 27 cts., and 10,000 cu. yds sand in Mattaponi Creek, 35 cts.; total cost, $31,460. The River & Harbor Improv. Co., of Philadelphia, Pa., bid for this work $33,864.

Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Oct. 8, to furnish at the navy yards, and naval stations the following supplies: New York, N. Y., etc.: Sch. 311 and 344—Wireless telegraph apparatus. Sch. 345—Gravel or trap rock, sand, piles. Sch. 347—Switches. Sch. 351—Sheet copper. Sch. 352—Yellow and white pine, mahogany, walnut and ash. Boston, Mass.: Sch. 352—Yellow pine decking. Sch. 353—Tool steel. League Island, Pa.: Sch. 312—Planer and matcher, molding and scrool machines, sandpapering machine, smoothing planer, scroll saw. Sch. 345—Soil pipe, plumbing supplies. Sch. 349—Electric and air drills, steel squares, etc., air hammers, tools. Sch. 350—High-speed steel. Naval Academy, Annapolis, Md.: Sch. 347—Material for two steel towers. Sch. 348—Electrical supplies, sheet copper, bar iron, tool steel. Washington, D. C.: Sch. 349—Twist drills, iron pipe, brass and iron unions, iron pipe fittings, valves. Sch. 350—Cold drawn steel. Norfolk, Va.: Sch. 346—Double braided wire, cabinet and panel board, electric chandeliers, etc., globes and reflectors, electric fittings. Sch. 349—Tools, pneumatic drills, vises. Pensacola, Fla.: Sch. 334—Motors, waterproof cable, mild steel, steel and iron pipe, valves, iron and steel pipe fittings. Sch. 335—Copper pipe. Applications for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster Gen'l., U. S. N.

Honolulu, H. I.—Capt. C. W. Otwell, Corps Engrs., U. S. A., writes that the following are the bids opened on Sept. 9 for dredging in Hololulu harbor about 400,000 cu. yd., including all necessary bulkheading (price given per cu yd.): Hawaiian Dredging Co., Ltd., Honolulu, 97 cts. (recommended for award); North American Dredging Co., San Francisco, Cal., $1.27; San Francisco Bridge Co., San Francisco, Cal., $1.18, and Cotton Bros. & Co., Oakland, Cal., $1.44.

Evanston, Ill.—Geo. M. Wisner, of Chicago, Ch. Engr. Sanitary Dist., writes that the proposed work in connection with Evanston channel will cost about $4,000,000, but no contracts will be let until next year.

Chicago, Ill.—Bids will be received at the office of the U. S. Reclamation Service, 876 Federal Bldg., Chicago, until Oct. 21 for furnishing 12,000 bbls. of Portland cement, f. o. b. cars at works of bidder.

Indianapolis, Ind.—B. Hendricks, Secy. Bd. Park Comrs., writes that the contract for furnishing material and repairing apron to Riverside Park dam (bids opened Sept. 20) has been awarded to the Modern Constr. Co., of Indianapolis, for $7,800.

Estherville, Ia.—Bids will be received, it is stated, until Oct. 15 by Roy J. Ridley, Co. Aud., for constructing tile ditches Nos. 24 and 31.

Rockwell City, Ia.—Bids will be received, it is stated, by the Auditor of Calhoun County, at Rockwell City, until Oct. 12 for constructing 3,700 ft. tile drain for Sac and Calhoun counties.

Boone, Ia.—It is stated that bids will be received until Oct. 11 by E. F. Jones, Co. Aud., for constructing county drains Nos. 31, 32 and 34.

Sac City, Ia.—It is stated that bids will be received until Oct. 11 by J. J. Harter, Co. Aud., for constructing 9,000 ft. tile drain in Cedar Township.

Clarion, Ia.—Bids will be received until Oct. 7 by the Bd. Co. Superv. for $18,000 Dist. No. 19, and $4,671 Dist. No. 24 drainage bonds. E. M. Callender, Co. Aud.

Sibley, Ia.—V. A. Burley, Co. Aud., writes that the contract for the construction of an open ditch, requiring about 103,000 cu. yds. excav. (bids opened Sept. 10), has been awarded to the Standard Drainage Co., of Windom, Minn., at 10⅝ cts. per cu. yd.

Louisville, Ky.—Bids will be received by Capt. H. Burgess, Corps Engrs., U. S. A., until Nov. 4 for a steel hull for snagboat, as advertised in The Engineering Record.

New Orleans, La.—The Harvey Canal Land & Improvement Co. is reported to have purchased the Harang or Aymar Canal, and will begin work at once deepening and widening this waterway in order to furnish a short route from New Orleans to the Bayou Lafourche Country. The company will also construct short canal 2 miles long to connect with Lake Salvador. H. P. Dart, Pres.; Horace H. Harvey, Secy.

Portland, Me.—Bids were opened on Sept. 19 by Maj. Geo. A. Zinn, Corps Engrs., U. S. A., as follows for building training walls and dredging in Kennebec River, Me.:

Training walls—Philip H. Doyen, of Portland, Me., $1.09 per ton for stone; training walls, $12.50 per cu.

*Items marked thus give the names of parties awarded contracts.

yd. for masonry beacons, Rowe Bros. Co., Richmond, Me., 88 cts. and $6.50, respectively.

Dredging: Simon J. Donovan, Boston, Mass., 49½ cts. per cu. yd.; Eastern Dredging Co., Boston, Mass., 35½ cts. per cu. yd. for group 1, 41½ cts. for groups 2 and 3, 50 cts. for group 4 and 44½ cts. for group 5.

Roseau, Minn.—It is stated that bids will be received until Oct. 10 by S. G. Iverson, Secy. State Drainage Comn., St. Paul, for constructing State Ditch No. 51. Geo. A. Ralph, State Drainage Engr., Old Capitol Bldg.

Minneapolis, Minn.—See "Public Buildings."

Newark, N. J.—The Franklin Mineral Co., Prudential Bldg., Newark, will lease on royalty for long or short terms as desired, of limestone quarries, as advertised in The Engineering Record.

Atlantic City, N. J.—The City Council is reported to have on Sept. 23 decided to build about 2,000 ft. of new boardwalk 300 ft. seaward of the present promenade along the inlet front and will receive bids for its construction on Oct. 28.

Brooklyn, N. Y.—Bids will be received until Oct. 17 by the Park Bd. (Saml. Parsons, Jr., Pres.) New York City, for repairs and alterations to the various ornamental stone entrances to Prospect Park; also repairs and alterations to and painting of fences around parks, Boros. Brooklyn and Queens.

Bids will be received by the Park Bd. (Saml. Parsons, Pres.), New York City, until Oct. 17, for furnishing material and constructing a rustic masonry boundary wall around Sunset Park, Boro. Brooklyn.

Albany, N. Y.—State Engr. Skene is reported to have submitted to the State Canal Bd. a proposal for the improvement of the present line of the Erie Canal in Niagara County near Eagle Harbor; the proposed contract will involve the excav. of about 6 miles, at an estimated cost of $725,000.

Cincinnati, O.—The Council has passed the ordinance submitted by the Bd. of Pub. Service authorizing that Board to expend $10,000 in building a retaining wall in McMicken Ave., north of Bader St., and for restoring McMicken Ave., damaged by recent landslide.

Akron, O.—The City Council has passed an ordinance to issue $8,400 bonds for the construction of the retaining wall at Hickory St.

Panama.—Bids will be received at the office of H. F. Hodges, General Purchasing Officer, Isthmian Canal Comn., at Washington, D. C., until Oct. 28, for block and phosphorous tin, malleable castings for dump carts, grease cups, wire screenings, wire and manila rope, etc., as advertised in The Engineering Record.

The following are the bids opened on Sept. 25 at the office of the Isthmian Canal Comn., Washington, D. C., for steam shovels, Type E, having a capacity of dipper of 5 cu. yd. ea.: Bucyrus Co., So. Milwaukee, Wis., $163,560 (to be delivered at Colon in 167 days); Marion Steam Shovel Co., Marion, O., $158,160 (Colon, 150 days); Vulcan Iron Wks., Toledo, O., $196,454 (Colon, 240 days).

Reading, Pa.—We are informed that bids which were to have been received at the office of Caleb Weidner, City Clk., until Sept. 25, for the construction of subway and appurtenances under the P. & R. Railway tracks at Spring St., were not opened but returned to contractors. New bids will be called for later. Elmer H. Beard, City Engr.

Providence, R. I.—We are informed that a resolution has passed City Council, providing for getting the right, in connection with the Rhode Island Co., of the Legislature to build a tunnel for trolley cars from North Main St. to Thayer St. If the right is obtained the tunnel will probably be built by the R. R. Co. Otis F. Clapp is City Engr.

Bids will be received by Col. J. H. Willard, Corps Engrs., U. S. A., Newport, until Oct. 30, for dredging in Providence harbor, as advertised in The Engineering Record.

Latchford, Ont.—It is stated that bids will be received until Oct. 10 by Fred Gelinas, Secy., Dept. Pub. Wks., Ottawa, for constructing a dam across the Montreal River. J. G. Sing, Resident Engr., Confederation Life Bldg., Toronto.

Southampton, Ont.—Bids will be received until Oct. 25 by Fred Gelinas, Secy., Dept. Pub. Wks., Ottawa, Ont., for extension to wharf at Southampton Harbor of Refuge. J. G. Sing, Engr. in Charge, Confederation Life Bldg., Toronto.

A NEW HYDRAULIC DREDGE.

The dredge shown in the accompanying illustration is a powerful machine built to the order of the Commissioners of Lincoln Park, Chicago, for filling to the north of the present park. The plan is to reclaim from Lake Michigan an area approximately 1,500 ft. wide by about a mile long by enclosing it with a stone revetment and filling in behind it with material taken from the bed of the lake. For much of the distance the breakwater lies in 18 ft. of water, and the total volume of fill is about 4,000,000 cu. yds. The breakwater is now partly completed and is made of stone from the spoil-banks of the Chicago drainage canal.

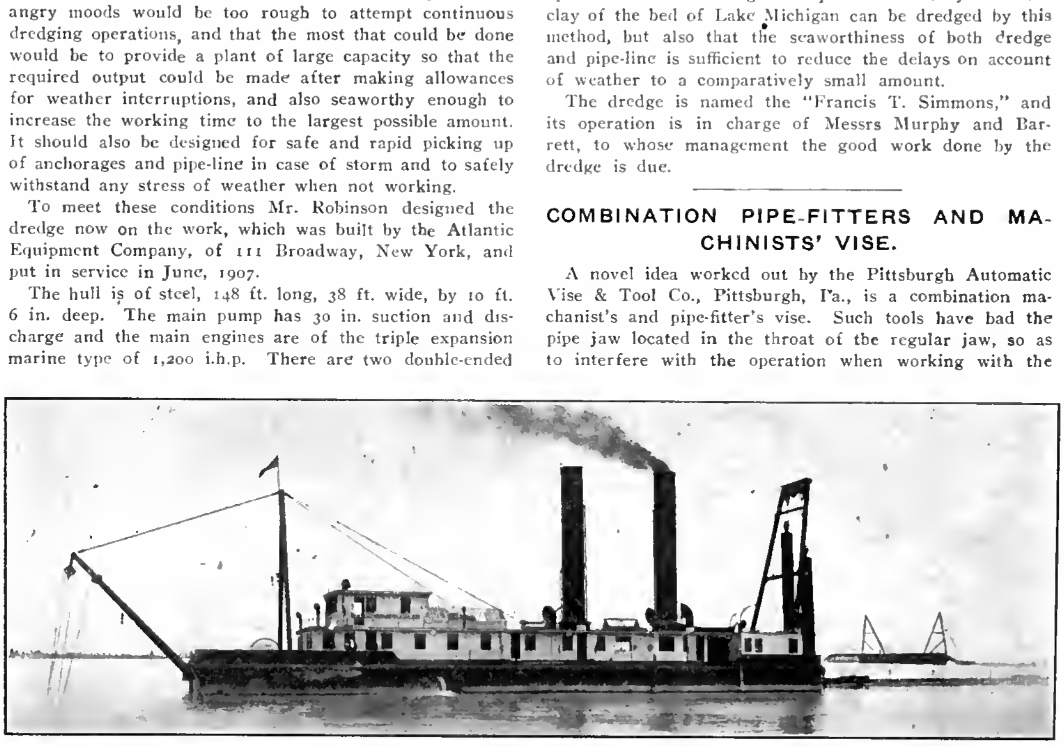
The conditions surrounding the dredging and filling of this work were difficult and peculiar. Not only was the locality in deep water and exposed to the storms of Lake Michigan, which often rise with suddenness and severity, but the soil to be dredged consisted of the tough blue clay which underlies the Chicago area, compacted by the storms of the lake and mixed with more or less gravel and stones. The ordinary hydraulic dredge as used on the lakes would be unsuitable, first because of unseaworthiness, and second because it could only deal effectively with soft material. The usual floating pipe-line connected by rubber sleeves and mounted on a number of small scows or floats would be put out of business with every wind storm or irretrievably wrecked.

The superior economy of the hydraulic process of dredging and filling if it could be successfully applied led Mr. Francis T. Simmons, president, and Mr. R. H. Warder, secretary, to pursue the subject further to see if these difficulties could be overcome, and they therefore commissioned Mr. A. W. Robinson, M. Am. Soc. C. E., to examine and report on the ground and if possible to design a dredge that could cope with the difficult conditions presented. Mr. Robinson had previously designed and built several large hydraulic dredges, notably the "Tarte," which is employed in dredging clay from the bed of Lake St. Peter in the River St. Lawrence, and is provided with a special pipe-line for withstanding heavy storms. This dredge is of great power and holds the world's record for output, having dredged 750,000 cu. yd. in a calendar month and delivered 2,000 ft. The original pipe-line of this dredge is still in use after having withstood the storms of 5 years.

It was, of course, realized that Lake Michigan in its angry moods would be too rough to attempt continuous dredging operations, and that the most that could be done would be to provide a plant of large capacity so that the required output could be made after making allowances for weather interruptions, and also seaworthy enough to increase the working time to the largest possible amount. It should also be designed for safe and rapid picking up of anchorages and pipe-line in case of storm and to safely withstand any stress of weather when not working.

To meet these conditions Mr. Robinson designed the dredge now on the work, which was built by the Atlantic Equipment Company, of 111 Broadway, New York, and put in service in June, 1907.

The hull is of steel, 148 ft. long, 38 ft. wide, by 10 ft. 6 in. deep. The main pump has 30 in. suction and discharge and the main engines are of the triple expansion marine type of 1,200 i.h.p. There are two double-ended marine boilers 11 ft. 6 in. x 18 ft. long, with eight corrugated furnaces. The installation of engine room auxiliaries such as condensing apparatus, pumps, electric light is most complete and well arranged.



THE HYDRAULIC DREDGE OF THE LINCOLN PARK COMMISSION.

On the upper deck is a pilot-house with large plate-glass windows, where are arranged all the levers which control the operation of the dredge. Here are also pressure and vacuum gauges for all purposes, indicating exactly the work that is being done.

The suction-pipe is carried by a very strong steel frame and is fitted with a powerful cutter for digging the clay. This cutter is an improved development of a number of earlier machines and has demonstrated its efficiency by being able to handle the heaviest clay up to the full capacity of the pump. It is 9 ft. in diameter, and weighs about 9 tons, being formed of eight steel blades of peculiar curvature cast in one piece, and having renewable hard steel cutting edges attached. The mechanism for driving and feeding this cutter is of the most powerful description. The secret of success of this dredge is that the excavation of the stiff clay is done by an efficient cutting tool that will not clog and provided with a powerful feed, the main pump being only employed for transportation of the spoil. A capacity rate of 3,000 cu. yd. per hour has frequently been reached in clay, the entire under side of the discharge appearing as continuous slices of blue clay, some of the pieces being 4 or 5 ft. long.

One of the most serious problems to be dealt with was that of the floating pipe-line. This is the most seaworthy pipe-line on the lakes, and is formed of semi-submerged steel pontoons about 100 ft. long, connected by ball-and-socket joints having spring connections of great strength. Long lengths of pontoon were necessary to give steadiness in waves and a yielding connection was essential to relieve the joints of the great stresses due to surging. The springs are of locomotive draw-bar size and are arranged similarly to railway car draft-rigging. There are also tension and compression springs to control the side deflection of the joint. In wave-action this pipe-line is very satisfactory. A special flange connection is provided at the dredge so that the pipe-line can be instantaneously disconnected from the dredge at any time, simply by pulling out a toggle-lever. On several occasions when it became too rough for the dredge to work, owing to the difficulty of discharging over the breakwater, the pipe-line was disconnected and towed to harbor by a tug through a rough sea which broke over both tug and pipes continuously, with no harm whatever to the pipe-line. These occasions, however, are relatively rare, and the operation of the dredge has proved not only that the clay of the bed of Lake Michigan can be dredged by this method, but also that the seaworthiness of both dredge and pipe-line is sufficient to reduce the delays on account of weather to a comparatively small amount.

The dredge is named the "Francis T. Simmons," and its operation is in charge of Messrs Murphy and Barrett, to whose management the good work done by the dredge is due.

COMBINATION PIPE-FITTERS AND MACHINISTS' VISE.

A novel idea worked out by the Pittsburgh Automatic Vise & Tool Co., Pittsburgh, Pa., is a combination machanist's and pipe-fitter's vise. Such tools have bad the pipe jaw located in the throat of the regular jaw, so as to interfere with the operation when working with the machinist jaw, as the pipe jaws protruded considerably into the throat of the vise, and limited the capacity of the pipe held. The inventors have endeavored to eliminate such objections by utilizing the rear of the draw bar instead of the throat of the vise. To the end of the bar is fitted a glove-like casting. To this casting are attached the pipe jaws, which are made of tool steel and placed close together.

A small lug is screwed in the rear of the vise directly under the slide bar. This is slotted so as to permit the reception of one link of a chain. The castings being placed in position on the rear of the vise, and one end of the chain made firm to the lug by a small pin, the pipe is placed in the jaws and the chain thrown around it, a link being dropped into the lug on the top of the casting. Then with both ends of the chain held firm, a half turn of the main screw of the vise throws the draw bar backwards, drawing the chain tightly around the pipe and securely locking it against rotation or movement. The swivel in the base of the vise is also locked automatically when the pipe is locked. If the work is desired to be held on the outside of the bench, the screw is loosened and the vise swiveled around, thus locking both the work and the vise.

Water purification for all purposes is treated at length in a catalogue of Wm. B. Scaife & Sons Co., Pittsburg. The impurities in water and their removal by chemical and mechanical means are discussed in the beginning of the book, and the chemistry of water softening and the results of treatment are presented. We-Fu-Go systems of the intermittent, syphon, and continuous types, and Scaife systems are then taken up and explained with the use of diagrams. The company's mechanical gravity filters, and the strainers used in them also receive attention. The second half of the book discusses boiler scale and corrosion, boiler compounds, feed water heaters, and the use of purifying and softening systems by railroads, breweries, ice factories, tanneries, laundries, cloth and paper mills, and for domestic use.

A REVERSIBLE HOIST FOR GASOLINE ENGINES OR ELECTRIC MOTORS.

A reversible hoist, specially adapted for use in connection with a gasoline engine or an electric motor, has recently been placed on the market by the Parker Hoist & Machine Works, of Chicago. One of these hoists belted to a gasoline engine is shown in an accompanying illustration. A 9x21-in. drum and a winch head, mounted on the same shaft, are provided for general hoisting purposes, while a 24-in. sheave wheel on this shaft provides for derrick and barrow-hoist operation. The drum is arranged with a friction clutch so it can be thrown out of service when the winch head or the sheave wheel is being used for hoisting, thus precluding any necessity for the removal of the cable or rope on the drum. In addition to this arrangement, a foot brake is provided which enables the operator to hold the load at any point.

The engine or motor used to operate the hoist is belted to a pulley on the driving shaft of the latter. Power is transmitted from this shaft to the shaft on which the sheave wheel, drum and winch head are mounted, by a grooved friction drive wheel on both shafts. The hoist is reversed by throwing the friction wheel on the drive shaft out of mesh with the one on the shaft carrying the drum, and by replacing this drive wheel by a second friction-drive wheel mounted on an auxiliary shaft, which is geared to the main shaft in such a manner that a reverse motion is obtained. The hoist is thus reversed by the movement of one lever at one end of the truck on which it is mounted. The foot brake and the other levers controlling the operation of the hoist are all placed adjacent to this reversing lever, so the operator has complete control of the machine from one position.

The hoist weighs 1,250 lb., complete, when mounted on a truck, and requires a 4x4-ft. floor space. It is particularly well adapted to operating hod and barrow hoists used in building construction. It has also been utilized, however, in a wide range of service where a light portable and reversible hoist, specially suited for operation by a gasoline engine or an electric motor is desired.

THE DEVELOPMENT OF THE PETROLITHIC PAVEMENT.

The first petrolithic pavements were constructed six years ago, at which time the use of oil for street improvement was in its infancy. A great amount of experimental work was done at that time and has continued up to the present, with the result that a marked improvement has been accomplished. The first petrolithic pavements were constructed with only one and one-half to two gallons of any kind of crude oil it was most convenient to secure, averaging from 30 to 40 per cent. asphaltum. This oil was cultivated to a depth of about 2 to 3 in., then slightly tamped with a rolling tamper. These streets, which are now four to six years old, are stated to be in fair condition to-day, although they have not received a dollar in repairs. Within a year or so, a minimum expenditure for a surface coat of oil will practically make them as good as when first constructed, their originator asserts, as their tamped base remains intact.

The Petrolithic Pavement Co., of Los Angeles, is now using 1½ gallons of oil containing 70 per cent. or more of asphalt. This heavy oil is thoroughly mixed with the soil to a depth of 4 in., until every particle of the soil is coated with the oil. The rolling tamper is then applied, which begins tamping from the bottom up until it is tamped solid to the surface. Two gallons of oil have been used thus far. Two inches of hard gravel is then spread for the wearing surface, on which 1½ gallons of heavy asphaltic oil is applied, and tamping is continued until the whole mass is like the hardest hardpan.

The result is claimed to be a 6-in. pavement unyielding under traffic, thoroughly durable and dustless, and noiseless, which does not require sprinkling or constant repairs. It is stated that it does not work up into chuck holes as does macadam, and can be constructed for less than half the cost of the latter.

The specifications adopted by the city of Los Angeles, Cal., for such pavements are as follows:

Grading.—Grading shall include all filling, the removal of all earth, stone, or all other material of whatever nature it may be, that may be encountered in preparing the street, and shall also include all trimming and shaping required to bring the surface of the street to grade and cross-section. Where mud or other soft material is encountered it shall be taken out and the space filled with good earth or gravel. The contractor, however, will not be required in such cases, to excavate the mud or other soft material to a greater depth than 2 ft. below grade. All filling shall be done with good sound earth. The embankments shall be carried up of full width, in horizontal layers not exceeding 1 ft. each in thickness, and the teams shall be made to travel as evenly as possible over the whole surface of each layer, both going and coming. The [illegible] is especially prohibited. No material of a spongy nature shall be used for filling. The space upon which fills are to be made shall first be cleared of all [illegible] timber.

The [illegible] grade and cross-section, after being thoroughly [illegible], [illegible] of the natural material of the street in that portion of the street which is to be oiled, shall be 2 in. below the finished surface of the street and at all points shall be parallel thereto.

The roadbed surface shall be rolled with a roller weighing not less than 250 pounds to the inch width of tire, until it is unyielding. Depressions made by the rolling shall be leveled up with good earth and again rolled. Such portions of the street as cannot be reached by the roller, and all places excavated below grade and refilled, and all pipe trenches and other places that cannot be properly compacted by the roller, shall be tamped solid, and in case of wet weather or soft or muddy ground, making by a screen of four meshes to the inch, up to the limit specified above, and shall contribute at least sixty (60) per cent. of the total volume of the gravel. Decomposed granite will not be accepted as gravel.

At all stages of the work sufficient water shall be applied to secure the best results in the tamping, the amount of water to be used to be governed by the character of the soil, the intention being to make the soil just damp enough to pack solid.

Any portion of the street that cannot be reached by the roller shall be tamped solid by hand, under the direction of the Board of Public Works.

The contractor will be held responsible for all damage to curbs, gutters or cross-walks that may be caused by him in the performance of the work.

Should an excess of oil remain upon the surface after rolling has been completed, sufficient clean, sharp, coarse sand shall be spread over the surface to absorb the same, and the surface shall then be again rolled until solid.

Oil.—(a) The oil used shall be a natural oil treated to remove water or sediment, or one from which the volatile material has been removed by distillation. It must not have been injured by over-heating.

(b) All oil must be delivered at the point required for sprinkling at a temperature of not less than 150 deg. Fahrenheit.

(c) In determining the quantity of oil delivered the correction for expansion by heat shall be as follows: From the measured volume of oil received at any temperature above 60 deg. Fahrenheit, an amount equivalent to four-tenths of one per cent. of every 10 deg. Fahrenheit shall be subtracted as the correction for expansion by heat. For the purpose of measuring oil a temperature of 60 deg. Fahrenheit shall be deemed normal temperature.

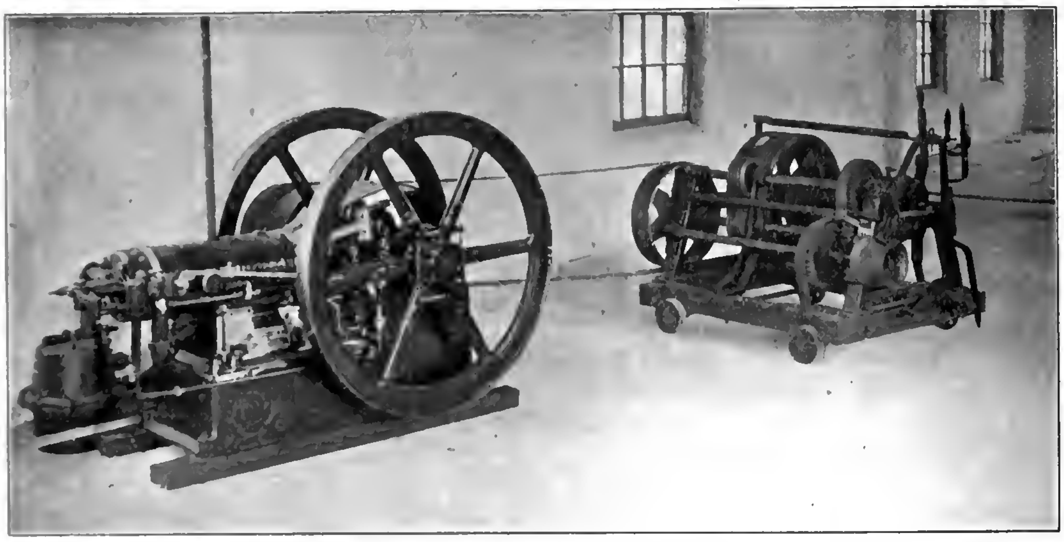
(d) The oil shall not contain more than 8 per cent. of matter volatile when said oil is heated slowly to 220 deg. Fahrenheit and maintained at that temperature during 15 minutes.

(e) After being freed from water and sediment, the oil shall contain not less than 70 per cent. of asphalt, having at a temperature of 77 deg. Fahrenheit, a penetration of 80 deg., District of Columbia standard. The percentage of asphalt shall be determined by heating a weighed amount of said oil in an evaporating oven to a temperature of 400 deg. Fahrenheit until it has reached the proper consistency, when the weight of the residue shall be determined and the per cent. calculated.

(f) Deduction will be made for water and sediment in exact proportion to the percentage of water and sediment found therein, and the oil shall not contain over 2 per cent. of such water and sediment.

(g) All tank wagons used for the delivery of this oil must be first submitted to the Department of Oil Inspection, which will gauge and stamp into the steel heads of said tanks the capacity in gallons of said tanks, and no figure of capacity will be accepted other than the official rating given by the Department of Oil Inspection.

Roller.—The tamping roller to be used in the execution of the work herein specified shall consist of a roller the outer surface of which shall be studded with teeth not less than 7 in. long, and having a surface area of not less than 4 sq. in. each, the roller itself to be of such a weight that the load upon each tooth shall not be less than 300 lb.



REVERSIBLE HOIST FOR USE WITH GASOLINE ENGINES OR ELECTRIC MOTORS.

BUSINESS NOTES.

Mr. Louis A. Pradt, formerly assistant attorney-general in charge of the defense of claims against the United States, has removed his offices in Washington, D. C., to 500 Hibbs Bldg.

The Edison Portland Cement Co. has opened a permanent office in the Post Office Square Bldg., Boston, in charge of Mr. J. L. Bernard, to take care of the New England trade.

The Ridgway (Pa.) Dynamo & Engine Co. has reopened its Chicago sales office at 824 Marquette Bldg. Mr. F. S. Hickok, who has had extensive experience in the electrical and power plant fields, is in charge as manager.

The Capital City Construction Co. has been incorporated at Indianapolis, Ind., to construct bridges, residences, business blocks and other structures and carry on a general contracting business. The directors are Messrs. Jas. O. Barrett, T. T. Burris and F. W. Eppert.

The Northern Engineering Works, Detroit, Mich., will add a new power station to their plant. The boiler and coal storage building, which will be erected at once, will be 30x60 ft. in plan, one story high, of fireproof construction throughout. Wickes boilers, Murphy stokers, and Webster heaters will be used. The plans were made by Smith, Hinchman & Grylls, engineers and architects, Detroit.

The Graphic Arts Co., of Buffalo, N. Y., recently purchased an Allis-Chalmers 45-kw. type "K" generator and seven 5-h.p. type "K" direct-current shunt motors built by the same company for operation at a speed of 1,050 r.p.m., and two 3-h.-p. type "K" motors for operation at 1,025 r.p.m. Five of the 5-h.-p. motors are for belting to presses and will be arranged to secure a speed range from 1,200 to 1,500 impressions per hour. One 5-h.-p. motor will be belted to a paper cutter, another to a roughing machine, while a 3-h.-p. machine will be mounted on the bronzing machine.

PERSONAL NOTES.

Mr. Homer Washburn Glidden, architect, formerly of Chicago, has established an office at 430 South Broadway, Los Angeles, Cal.

Walter D. Pease, water commissioner of Cheyenne, Wyoming, and formerly city engineer of that city, died recently, aged 73 years.

Mr. William Lamson, Brooklyn, N. Y., has been appointed an assistant engineer on the staff of the New York City Board of Water Supply.

The Engineers' Club of Philadelphia has voted to move into larger quarters next spring, and a committee has been appointed to investigate available locations.

Mr. T. Rumney, mechanical superintendent of the Erie R. R., has been promoted to be general mechanical superintendent, with headquarters in New York City.

Mr. Julian C. Smallwood has been appointed professor in charge of the department of mechanical engineering at George Washington University, Washington, D. C.

Mr. H. Montgomery has been appointed superintendent of motive power and equipment of the Bangor & Aroostook R. R., with headquarters at Milo Junction, Me.

Mr. W. J. Young has resigned as chief engineer of the Lehigh & New England R. R. to become chief engineer of a manufacturing concern at Martin's Creek, Va.

Capt. Alfred B. Putnam, Corps of Engineers, U. S. A., on duty with the First Battalion of Engineers in the Philippine Islands, has been ordered to Chattanooga, Tenn.

The British Local Government Board, under a grant [illegible]

drewes to undertake a bacteriological investigation of air in sewers and drains.

G. Norman Weaver, a civil engineer, of Newport, R. I., died at his home in that city, Oct. 4. He was a nephew of the late George H. Norman, who established the Norman Medal of the American Society of Civil Engineers.

The offices of Mr. R. D. Smith, assistant general superintendent of motive power and rolling stock of the New York Central & Hudson River R. R., have been moved from New York City to Albany, N. Y., where they will be located hereafter.

Mr. T. H. Brown has been appointed assistant division engineer of the Pittsburg division of the Baltimore & Ohio R. R. Co., succeeding Mr. L. E. Haislip, who has been transferred to the Wheeling division to succeed Mr. J. J. Smiley, resigned.

The United States Civil Service Commission will hold an examination Nov. 13, in the large cities of the country, of candidates for the positions of assistant technical editor in the Geological Survey, and constructing engineer in the Forest Service.

Messrs. Arthur B. White and William F. Bixby have organized the firm of Bixby & White, civil and hydraulic engineers, with offices in the San Fernando Building, Los Angeles, Cal. They will make a specialty of structural steel and reinforced concrete construction, irrigation, and sewerage systems.

Mr. John Severin Branne, formerly secretary and chief designing engineer of the James E. Brooks Co., consulting engineers, 45 Broadway, New York City, has resigned and has opened an office at 1 Madison Ave., New York, as a consulting engineer, making a specialty of bridges, buildings and general structural work.

The Mary Kingsley medal, instituted by the Liverpool School of Tropical Medicine to commemorate Miss Mary Kingsley, the African traveler, who died in 1900, has been presented to Col. W. C. Gorgas, U. S. A., member of the Isthmian Canal Commission and formerly chief sanitary officer of Havana, for distinction in special research into tropical medicine.

Mr. Elwood Mead, chief of irrigation and drainage investigations, Office of Experiment Stations, United States Department of Agriculture, whose resignation was noted in these columns Aug. 31, sailed from Vancouver, Oct. 11, for Melbourne, Australia, where he is to be chairman of the Commission on Rivers and Water Supply of the State of Victoria.

Maj. Francis R. Shunk and Capt. Edward H. Schulz, Corps of Engineers, U. S. A., have been designated as chief engineer officers of the departments of Dakota and Missouri, respectively, relieving Lieut.-Col. William H. Bixby, who has served temporarily as chief engineer officer of those departments in conjunction with his duties as chief engineer officer of the Department of the Lakes.

The following promotions and appointments have been made at Lehigh University for the coming year: Professor J. F. Klein, dean of the faculty and superintendent of heat and light; P. B. de Schweinitz, professor machine design in the department of mechanical engineering; Robert C. H. Heck, professor of experimental engineering in the department of mechanical engineering; Frank P. McKibben, professor of civil engineering, in charge of the department; Winter L. Wilson, professor of railroad engineering in the department of civil engineering.

The Nominating Committee of the American Society of Civil Engineers has issued the following list of nominees for the offices to be filled at the annual election in January: President, Charles Macdonald, New York City; vice-presidents, Geo. F. Swain, Boston, Mass., and Mordecai T. Endicott, Washington, D. C.; treasurer, Joseph M. Knap, New York City; directors, Chas. L. Harrison, New York City; Geo. W. Kittredge, New York City; Dexter Brackett, Boston, Mass.; Gardner S. Williams, Ann Arbor, Mich.; Horace Andrews, Albany, N. Y.; Chas. S. Churchill, Roanoke, Va.

Readers of The Engineering Record are cautioned that a man who some time ago defrauded mechanical and electrical engineers in this country has recommenced operations. He is a very plausible Englishman, about 30 years of age, 5 ft. 7 or 8 in. in height, of slight build; he has a light complexion and crooked teeth, and generally represents himself as the son of some large manufacturer or other important man in England, over here on business. He is very well posted as to the names of products and manufacturers on both sides of the Atlantic, is very plausible, and, as a rule, after gaining the confidence of the men upon whom he calls, tells a story about having been robbed and asks for a loan to tide him over until he can get money from his father, to whom he has cabled.

Mr. William H. Arnold, formerly chief engineer of the Bush Terminal Co., New York City, and Mr. Harold S. Andrew, formerly of the Engineer Department of the United States Army, have formed a partnership, with offices at 52 Broadway, New York, under the firm name of Arnold & Andrew, as consulting engineers. The design of dredging machinery and docks and the investigation of drainage problems will be taken up as specialties. Mr. Arnold has for several years made a specialty of dredging apparatus and is the patentee of a pneumatically operated clam-shell bucket for dredging hard material. Mr. Andrew has been closely identified with the improvement of New York and New Jersey rivers and harbors and recently made a hydrographic survey of the new Ambrose channel, New York harbor.

The following candidates for membership in the American Society of Civil Engineers were elected Oct. 2: As members—C. C. Anthony, inspector of signals, Pennsylvania R. R., Philadelphia, Pa.; R. E. Barkenhus. Civ. Engr., U. S. N., Newport, R. I.; B. J. Dalton, Prof. Civ. Eng., Univ. of Kans., Lawrence, Kans.; W. T. Dougan, Eng. M. of W., New York City Ry. Co., New York City; H. J. Gault, Constr. Engr., U. S. Reclamation Service, Selden Station, N. Mex.; George Higgins, Lecturer in Civ. Eng., Melbourne Univ., Melbourne, Victoria, Australia; H. F. Jonas, Prin. Asst. to Bridge Engr., Sunset Lines in Texas and Louisiana, Houston, Tex.; Willard Kent, Narragansett Pier, R. I.; W. E. Knobloch, Supt. in Fourth Mississippi River Dist., U. S. Engrs., New Orleans, La.; A. T. Kroeber, Asst. Engr. to Hering & Fuller, New York City; S. A. Mitchell, Cons. Engr., Ft. Smith, Ark. Chf. Engr., Kansas City Water-Works, Kansas City, Mo.; Eugene Mowlds, Engr. in Chg. of Drawing Room, Edge Moor Plant, Am. Bridge Co., Edge Moor, Del.; J. P. Newell, Cons. Civ. Engr., Portland, Ore.; W. C. Phelps, Prin. Asst. Engr., Interborough Metropolitan Co., New York City; H. L. Potter, U. S. Engr. Office, New York City; H. A. Schulze, Archt., San Francisco, Cal.; James Shand, with S. Pearson & Son, as Agt. in charge of Port Works of Coatzacoalcos, Mex.; E. P. Shuman, Dist. Engr., Second Eng. Dist., Philippine Islands, Vigan, P. I.; J. B. Snow, Asst. Eng., Pennsylvania, New York & Long Island R. R., East River Tunnels, New York City; E. B. Temple, Asst. Chf. Engr., Pennsylvania R. R. Co., Philadelphia, Pa.; J. H. Terry, Secy. and Treas. Latla & Terry Constr. Co., Philadelphia, Pa.; W. C. Weeks, Supt. of Constr., Washington Water Power Co. of Spokane, Wash.; B. E. Winslow, Cons. Architectural Engr., San Francisco, Cal. As associate members—A. B. Alderson, in private practice, also Town Engr., West Hartford, Conn.; Kay Alexander, Res. Engr., Northern Pacific Ry., St. Regis, Mont.; P. S. Baker, Computer, Philadelphia & Reading Ry., Philadelphia, Pa.; John Berger, Asst. Engr., New York Central & Hudson River R. R., New York City; C. E. Pengler, Chf. Asst., Eng. Dept., Realty Syndicate, Oakland, Cal.; E. E. Bratton, First Asst. Engr. and Chf. Draftsman, Bureau of Filtration, Philadelphia, Pa.; H. F. Cameron, Engr. and Asst. Supt., J. G. White & Co., Inc., on Improvements of Port of Cebu, Cebu, Philippine Islands; G. P. Carver, Cons. Engr., Boston, Mass.; I. M. Chace, Office Engr., Cananea, Yaqui River & Pacific R. R. Co. and Gila Valley, Globe & Northern Ry. Co., Tucson, Ariz.; E. M. Chadbourne, Vice-Pres. and Gen. Mgr., Clinton Fireproofing Co. of California, San Francisco, Cal.; R. L. Chamberlaine, Asst. Engr. and Chf. Draftsman, United Railways & Electric Co. of Baltimore, Baltimore, Md.; Paul Chipman, with Canadian White Co., Montreal, Canada; E. W. Cunningham, Structural Engr., Vorce Eng. Co., Cleveland, Ohio; G. J. Davis, Asst. Prof. of Hydr. Eng., Univ. of Wisconsin, Madison, Wis.; H. W. Dennis, Designer and Computer with Wm. A. Brackenridge, Cons. Engr., Niagara Falls, N. Y.; G. V. Dieden, Res. Engr., Tidewater Ry. Co. and Deepwater Ry. Co., Leesville, Va.; T. B. Downer, Asst. Engr., Los Angeles Aqueduct, Mojave, Cal.; C. C. Fisher, Asst. Engr., U. S. Reclamation Service, Meridian, Idaho; G. M. Forrest, Chf. Asst. to Chf. Engr., Building Bureau of Board of Education, New York City; E. J. Fucik, Engr. for Geo. W. Jackson, Inc., Chicago, Ill.; J. H. Gandolfo, Asst. Constr. Engr., with John Van Vleck, New York City; L. L. Gay, Asst. Engr., U. S. Reclamation Service, Boise, Idaho; August Gundersen, Asst. Engr., Butler Bros.-Hoff Co. of New York; H. M. Harps, Prin. Asst. Eng., with Herbert C. Keith, Cons. Eng., New York City; A. C. Harrington, with Buffalo, Lockport & Rochester Ry. Co., Albion, N. Y.; J. B. Harris, Reinforced Concrete Engr., Los Angeles, Cal.; N. F. Hopkins, Harrok, Hopkins & Taylor, Civ. and Min. Engrs., Pittsburg, Pa.; H. W. Horne, Asst. Engr., Board of Water Supply, New York City; H. F. Howe, Div. Engr., Cebu Div., Philippine Ry. Co., Cebu, P. I.; Hyotaro Inagaki, Res. Engr., Imperial Government Taiwan Rys., Taipeh, Formosa, Japan; W. E. Ingram, Prin. Asst. Structural Engr., The Arnold Co., Chicago, Ill.; E. S. Johnson, Office Engr., Key West Extension, Florida East Coast Ry., Miami, Fla.; L. A. Keith, Chf. Engr., Board of Public Service, Mansfield, Ohio; J. C. Lathrop, Chf. Draftsman, United Railroads of San Francisco, San Francisco, Cal.; C. M. Leonard, Pres. and Gen. Mgr., Leonard-Martin Constr. Co., Engrs. and Gen. Contrs., Chicago, Ill.; J. D. Lombardo, Asst. Engr., Mexican Light & Power Co., Necaxa, Pueblo, Mexico; C. M. Meyers, Asst. Engr., Rapid Transit Subway Constr. Co., New York City; H. S. Morse, Asst. Eng., U. S. Reclamation Service, Glendive, Mont.; C. A. Pohl, Asst. Engr., New York State Barge Canal, Lyons, N. Y.; S. G. Porter, Chf. Engr., Arkansas Valley Sugar Beet & Irrigated Land Co., Holly, Colo.; C. H. Preston, with New York, New Haven & Hartford R. R., Waterbury, Conn.; C. L. Richardson, Richardson-Wey Eng. Co., Atlanta, Ga.; Shigeki Sekiha, Draftsman, Penn Bridge Co., Beaver Falls, Pa.; J. C. Smith, Gen. Supt. of Constr., Dodge & Day, Philadelphia, Pa.; G. R. Soloman, Soloman-Norcross Co., Engrs., Atlanta, Ga.; H. H. Starr, Asst. Engr., Erecting Dept., Am. Bridge Co. of New York; W. L. Stevenson, Prin. Asst. in charge of parkway construction, 4th Survey Dist., Dept. of Public Works, Philadelphia, Pa.; J. W. Sussex, Wenatchee, Wash.; E. A. Yates, Asst. Engr., East River Tunnels, Pennsylvania R. R., New York City. As associate—G. N. Cole, Eastern Factor and Agt. for Cross Horizontal Folding and other warehouse doors, New York City.

TRADE PUBLICATIONS.

Record of Construction No. 62 of the Baldwin Locomotive Works, Philadelphia, is a good discussion of balanced compound locomotives. The first Baldwin locomotive of this type was built in 1902, and since then over 350 have been ordered. The balanced compound principle is discussed and the main dimensions of a number of typical locomotives of this construction presented.

Catalogue 70, just issued by the Watson-Stillman Co., New York, is devoted to forcing presses for shop purposes, of which a large variety are shown. Nearly half of this catalogue, which contains 130 pages describes new designs of hydraulic tools for forcing and pressing and is probably the most extensive and complete list of shop tools for making force fits, driving broaching tools and similar purposes that has been published.

The Kennedy Valve Mfg. Co. has issued a 132-page book filled with valuable information on valves and their use. It is arranged in six sections, the first discussing the different types and details of gate valves, the second devoted to bronze gate valves, the third to iron-body, bronze-mounted, and all-iron gate valves and indicator devices for automatic sprinkler systems; the fourth to renewable-disk globe, angle, radiator and corner valves, swinging check valves, back water and sewer gas valves, and Siamese connections; and the fifth to hydrants, floor stands, extension valve boxes and flanges. The sixth section embraces a series of tables regarding diameters, drilling and bolting of flanges, and data that will be useful to engineers.

The Power Specialty Co., New York, announce the appearance of the fourth edition of its pamphlet on Superheated Steam, which has been revised by Mr. E. H. Foster, the inventor of the Foster superheater. This edition contains profuse illustrations of superheaters manufactured by the company as applied to the various types of boilers in use in this country, and also of the direct fired type, ranging from large illustrations of 3,000 h.-p. units to small portable superheaters, which may be used for experimental purposes. The pamphlet also contains a few pages devoted to superheated steam specialties, such as piston rod packing, Harter flexible joints, corrugated bronze gaskets, and the Willits double acting non-return valve, all of which articles are sold by the company as especially adapted to plants using superheated steam. At the back of the book are steam tables running to high pressures and temperatures, also tables of velocities of steam in various sizes of pipe at different degrees of superheat, and curves for readily selecting the proper size of steam pipe for any set of conditions, which will be found useful to the designing engineer.

The Chicago Pneumatic Tool Co. is mailing two new catalogues, one of which, No. 23, is a book of more than 100 pages and is devoted exclusively to Franklin air compressors. It contains much descriptive matter and information relating to air compressors in general and to the Franklin designs in particular. The other, No. 24, is also a book of more than 100 pages and covers the company's line of pneumatic tools and appliances, including "Boyer" and "Keller" hammers, "Little Giant" drills, sand rammers and hoists.

Thomson polyphase induction wattmeters, for measuring energy in any two-phase, three-phase or monocyclic circuit, are described in bulletin No. 4,527 issued by the General Electric Company. These instruments are made in three types; one for house service with metal cover, and two for switchboard use, one having a metal cover and the other a glass cover. Each consists of two single-phase motor elements, each acting upon its own disk with both disks mounted upon a single shaft actuating the register. The meters may be applied to a circuit carrying a mixed load of lamps, motors, or other devices, and will record accurately irrespective of load conditions.

The latest catalogue of the Parker Hoist & Machine Co., 981 Francisco Ave., Chicago, is devoted to full descriptions of the materials and sizes of their hoisting engines, jib cranes, guy and stiff leg derricks, winches and derrick fittings, wire rope, wheelbarrows, platform and belt elevators, and other contractors' equipment.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Phoenix, Ariz.—The date of opening of bids for water works improvements has been extended from Nov. 15 to Dec. 1, as advertised in The Engineering Record. Robt. Craig, Supt. Water Wks.

Florence Ariz.—See "Power Plants, Gas and Electricity."

Phoenix, Ariz.—See "Miscellaneous."

Oakland, Cal.—Plans and specifications are reported to have been completed for the salt water fire fighting plant. The plans provide for a pumping plant, a building in which the pumps, motors and engines will be located and distributing mains over the area to be covered by auxiliary system. Estimated cost of the pumping plant and building, $50,000. Cost of the distribution system will depend upon the amount of territory covered by mains.

**Los Angeles, Cal.*—The contract for the construction of a controlling tower in Little Bear valley for the Arrowhead Reservoir & Power Co., is reported to have been let to Arthur S. Bent, of Los Angeles. It will be 184 ft. high from tunnel floor grade, will be erected at front of present portal of outlet tunnel No. 1; will be 13 ft. in diameter at top, and built of reinforced concrete; cost, about $8,000.

Naturita, Colo.—The Empire Irrigation Co. is reported organized to take over the rights, title, interest, franchises, lands and all other assets of the Naturita Canal and Reservoir Co., the Naturita Cattle & Land Co., the Shenandoah Irrigation Co. and the Naturita Valley Co., all in Colorado. It is stated that about $500,000 will be expended in improvements. A. D. Struthers, Pres., Carmon Layton, Secy., both of Des Moines, Ia.

Las Animas, Colo.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Nov. 5 for installing a water system at the naval hospital, New Ft. Lyon, Las Animas, Colo. Applications for proposals should refer to Sch. 385. E. B. Rogers, Paymaster Genl., U. S. N.

Atlanta, Ga.—At a meeting of the Water Board on Sept. 30 it was decided to lay water main from river to present reservoir at once; also procure bids for pump for Hemphill station; it was also decided to authorize the engineer at Hemphill station to prepare plans for new intake from river to pump well.

Albany, Ga.—R. J. Edgerly, City Engr., writes that bids will probably be received in December or January for sewers to cost about $37,500; water improvements to cost $8,000, and paving to cost $16,000. W. C. Rawson, Mayor.

*Irwin Bros., New Orleans, were the successful bidders on Contract "15 W," at a total of $225,789, including valves, hydrants, plugs, etc., and the unit prices on some of the items in this contract are as follows: Loading and unloading pipe and piling, 5,400 tons, per ton, 50 cts., hauling pipe, 420,000 tons, 2 cts. per 100 ft.; 24-in. water pipe, 500 lin. ft., 1.50 per lin. ft.; 20-in., 500 lin. ft., 1.20; 16-in., 500 lin. ft., 80 cts., 12-in., 17,100 lin. ft., 60 cts.; 10-in., 100 lin. ft., 45 cts.; 8-in., 500 lin. ft., 38 cts.; 6-in., 167,200 lin. ft., 35 cts.; 4-in., 152,800 lin. ft., 30 cts.; set 420 hydrants and furnish concrete base and porous fill to same, $6 ea.; c. i. manholes, covers and frames, 20,000 lbs., 6 cts.; lumber under pipe or under valve chambers, 30 M ft., $15; blocks and wedges, 55 M ft., $30; extra excav., 600 cu. yds., $1.50 brick masry., 50 cu. yds., $7; extra concrete masry., 50 cu. yds., $12; 4-in. vitr. clay drain tile, 100 lin. ft., 50 cts.; asphalt, 7,700 sq. yds., $4; Belgian block, 700 sq. yds., $3; vitrified brick, 100 sq. yd., $3; square block, 7,800 sq. yds., 70 cts.; cobble stone, 11,600 sq. yds., 60 cts.; gravel, 11,700 sq. yds., 60 cts.; shell, 6,300 sq. yds., 50 cts.; plank, 14,600 lin. ft., 40 cts.; bitulithic pavt., 100 sq. yds., $4; Schillinger, 4,000 sq. yds., $1.20; flagging, $1,400 sq. yds., 90 cts.; brick, 4,900 sq. yds., 80 cts.; old curb removed and reset, 300 lin. ft., 40 cts.

* A. L. Patterson & Co., of Macon, Ga., was successful bidder for Contract "16 W," at a total of $256,167, including valves, hydrants, etc. Some of the unit prices on this bid are as follows: For loading, unloading and piling pipe, per ton of 2,000 lbs., 8,900 tons, $1; hauling pipe, 520,000 ton per hun. ft., 3 cts.; 30-in. water pipe, 6,300 lin. ft., $2.68; 24-in., 4,700 lin. ft., $1.30; 20-in., 13,900 lin. ft., $1.20; 16-in., 700 lin. ft., 85 cts.; 12-in., 43,300 lin. ft., 70 cts.; 10-in, 100 lin. ft., 60 cts.; 8-in., 500 lin. ft., 50 cts.; 6-in., 152,500 lin. ft., 34 cts.; 4-in., 111,000 lin. ft. 30 cts.; laying 30-in. and 12-in. flexible pipe, 600 lin. ft., $16; set 500 hydrants and furnish concrete base and porous fill, $5; c. i. valve boxes, manhole covers and frames, 45,000 lbs., 5 cts.; all lumber in place, 40 M ft., $30; blocks and wedges, 55 M ft., $30; round piling in place, 200 lin. ft., $1.20; creosoted piling in place, 200 lin. ft., $1.80; extra excav., 1,000 cu. yds., $1.50; brick masry., 100 cu. yds., $20; extra concrete masry., 50 cu. yds., $15; 4-in. vitr. clay drain tile, 100 lin. ft., 80 cts.; asphalt, 5,000 sq. yds., $2.80; Belgian block, 300 sq. yds., $1.40; vitr. brick, 2,600 sq. yds., $1.10; square block, 2,500 sq. yds., 30 cts.; cobble stone, 15,500 sq. yds., 26 cts.; gravel, 10,300 sq. yds., 20 cts.; shell, 5,300 sq. yds., 10 cts.; plank, 1,000 lin. ft., 10 cts.; bitulithic pavt., 100 sq. yds., $4; Schillinger, 1,600 sq. yds., 75 cts.; flag, 700 sq. yds., 20 cts.; brick, 8,000 sq. yds., 30 cts.; old curb removed and reset, 300 lin. ft., 30 cts.

*M. O'Herron & Co., of New Orleans, was the successful bidder for Contract "17 W," at a total of $237,791, including valves, hydrants, etc. Some of the unit prices in this bid are as follows: For loading, unloading and piling pipe, per ton 2,000 lbs., 8,000 tons, 75 cts.; hauling 470,000 tons, 1½ cts. per per 100 ft.; 24-in. water pipe, 500 lin. ft., $2; 20-in., 3,200 lin. ft., $1.10; 16-in., 12,900 lin. ft., 80 cts.; 12-in., 37,200 lin. ft., 60 cts., 10-in., 100 lin. ft., 50 cts.; 8-in., 500 lin. ft., 45 cts.; 6-in., 207,000 lin. ft., 34 cts.; 4-in., 148,000 lin. ft., 29 cts.; setting 560 hydrants and furnishing concrete base and porous filling, $6; c. i. valve boxes, manhole covers and frames, 58,000 lbs., 5 cts.; lumber under pipe or valve chambers, 50 M ft., $13 per M ft.; blocks and wedges, 70 M ft., $30; round piling, 200 lin. ft., $1; creosoted piling, 200 lin. ft., $1; extra excav., 1,000 cu. yds., $2; brick masry., 50 cu. yds., $10; extra concrete masry., 50 cu yds., $10; 4-in. vitr. cay drain tile, 100 lin. ft., 60 cts.; asphalt, 2,500 sq. yds., $4.50; Belgian block, 100 sq. yds., $3; vitr. brick, 2,400 sq. yds., $3; square block, 100 sq. yds., $1; cobble stone, 8,400 sq. yds., 50 cts.; gravel, 4,300 sq. yds., 50 cts., shell, 3,400 sq. yds., 50 cts.; plank, 1,000 lin. ft., 20 cts.; bitulithic pavt., 100 sq. yds., $4; Schillinger, 1,100 sq. yds., $1.50; flag, 500 sq. yds., 50 cts.; brick, 3,000 sq. yds., 50 cts.; old curb removed and reset, 300 lin. ft., 50 cts.

*The General Contr. Co., of New Orleans, was successful bidder for Contract "18 W," at a total of $113,637, including valves, hydrants, etc. Some of the unit prices in this bid are as follows: Loading, unloading and piling pipe, 4,400 tons, 50 cts.; hauling pipe, 240,000 tons, 1 ct. per 100 ft.; 24-in. water pipe, 500 lin. ft., $1.50; 20-in., 500 lin. ft., $1.10; 16-in., 1,200 lin. ft., 80 cts.; 12-in., 30,800 lin. ft., 60 cts.; 10-in., 100 lin. ft., 50 cts.; 8-in., 800 lin. ft., 40 cts.; 6-in., 102,200 lin. ft., 35 cts.; 4-in., 80,700 lin. ft., 30 cts.; set 170 hydrants and furnish concrete base and porous fill, ea., $5; c. i. valve boxes, manhole covers and frames, 23,000 lbs., 5 cts.; lumber in place under pipe or valve chambers, 20 M ft., $30; blocks and wedges, 36 M ft., $30; round piling, 200 lin. ft., $2; creosoted piling, 200 lin. ft., $3. extra excav., 400 cu. yds., 85 cts.; brick masry., 20 cu. yds., $15; extra concrete masry, 20 cu. yds., $13; 4-in. vitr. clay drain tile, 100 lin. ft., 50 cts.; asphalt, 500 sq. yds., $4; Belgian block, 100 sq. yds., $4; vitr. brick, 100 sq. yds., $3; square block, 3,000 sq. yds., 75 cts.; cobble stone, 6,700 sq. yds., 75 cts.; gravel, 500 sq. yds., 60 cts.; shell, 600 sq. yds., 50 cts.; plank, 3,000 lin. ft., 30 cts.; bitulithic pavt., 100 sq. yds., $5; Schillinger, 300 sq. yds., $1.80; flag, 100 sq. yds, 75 cts.; brick, 1,000 sq. yds., 75 cts.; old curb removed and reset, 200 lin. ft., 25 cfs.

**Columbus, O.*—The following are the bids opened on Sept. 18 by the Bd. of Pub. Service for Contract 17, c. i. force mains, for water supply improvement: (*a*) Engineer's estimate; (*b*) W. C. Halliday; (*c*) Chas. V. Taylor and John M. Beckett; (*d*) Westwater & Casey (awarded contract); (bidders all of Columbus).

	(*a*)	(*b*)	(*c*)	*(*d*)
1,600 cu. yds. Excav., Class A	$ 3.25	$ 4.56	$ 6.50	$ 7.20

Totals	$160,034	$162,590	$162,683	$163,907

Coeur D'Alene, Idaho.—Dr. C. L. Crait, Geo. Mason and others are reported interested in the construction of a gravity system of waterworks, to cost about $150,000.

Spring Valley, Ill—It is reported that bids are wanted until Oct. 15 for the extension of water mains in certain streets Anton Faletti, City Clk.

Carlyle Ill.—See "Power Plants, Gas and Electricity."

Indiana Harbor, Ind.—The East Chicago & Indiana Harbor Water Works Co. is reported incorporated to construct water works to supply this city and the immediate towns and villages with water. H. S. Oakley, C. W. Sherman, C. B. Woods and Harry H. Phillips are directors

Adel, Ia—Bids will be received by the Town Council until Oct 21, at the office of V. T. Sweeley, Town Clk., for constructing a 4 in. c. i. water pipe in a portion of Rapids St

Marion, Kan—Bids will be received until Oct. 22 by Thos. W. Bown, City Clk., for constructing waterworks. Separate bids to be submitted on the following: Furnishing c. i. pipe and special castings, furnishing hydrants and valves, furnishing and installing machinery, laying pipe, constructing well, power house, tower foundations, etc. Burns & McDonnell, Engrs., 821 3 Scarritt Bldg., Kansas City, Mo

**New Orleans La.* The City Council on Oct 1 approved the following contracts for waterworks construction recently awarded by the Sewerage and Water Bd. (bids for which were opened on Sept 4):

Wyandotte, Mich.—R. Winthrop Pratt, of Columbus, O., is stated to have presented to the Bd. of Pub. Wks. his report on the construction of filtration plant for Wyandotte.

Owosso, Mich.—Bids will be received until Oct. 23 by the Bd. Pub. Wks. for furnishing and installing complete 2 Scotch marine boilers at the water works, as advertised in The Engineering Record.

Bay City, Mich.—The City Council is reported to have decided to expend about $19,000 for laying new mains to connect the east and west side water systems.

**Mahnomen, Minn.*—A. O. Vachon, Recorder, writes that W. D. Lovell, 1415 8th St., S. E., Minneapolis, has secured the contract for constructing water tank, tower and complete water system for fire protection (bids opened Sept. 30) for $4,300.

**Detroit, Minn.*—Chas. G. Sturtevant, Clk. Water and Light Com., writes that the contract for the erection of a 50-ft. steel water tower and tank of 100,000 gal. capacity, and laying 600 to 1,000 ft. of 8-in. water main, and installing one hydrant (bids opened Sept. 30), have been awarded to the Chicago Bridge & Iron Works, of Chicago, Ill.

Cloquet, Minn.—It is reported that Thos. F. McGilvrey, City Engr. of Duluth, estimates the cost of water works for Cloquet at $43,950.

Meridian, Miss.—The citizens have voted to issue $50,000 bonds for the extension of the water mains and other improvements to the waterworks. W. F. Wilcox, Supt.

Brookhaven, Miss.—Bids will be received, it is stated, by R. D. Lanier, Mayor, and Bd. Aldermen, until Oct. 15, for $15,000 water works extension bonds. C. H. Hamilton, City Clk.

Wahoo, Neb.—See "Power Plants, Gas and Electricity."

**Exeter, Neb.*—The National Constr. Co., of South Bend, Ind., is reported to have secured the contract for constructing an air pressure system of water works for $14,800.

Franklin, Neb.—Jay A. Dickey, City Clk., writes that bids will be received on Oct. 21 for water works, to cost between $15,000 and $17,000.

Wahoo, Neb.—The Mayor writes that it is proposed to construct water works; probable cost, $60,000.

Collingswood, N. J.—See "Power Plants, Gas and Electricity."

Camden, N. J.—Bids will be received by the Water Com. of City Council (Jos. Potter, Chmn.) until Dec. 17 for improving present artesian water supply system, and adding to the present supply of 17,000,000 gal. at least 5,000 gals. daily, as advertised in The Engineering Record.

**Highlands, N. J.*—The following are the bids opened on Sept. 25 by the Mayor and City Council for the construction of water works (Engineers, Runyon & Cary, 122 Market St., Newark): R. B. Carter Co., New York, N. Y., $33,113. and Wharton Co., Philadelphia, Pa., $34,500; Harrison Construction Co., Newark, $29,989; H. A. Miller, Wilmington, Del., $28,944; Atlantic Constr. & Sup. Co., Atlantic City, $31,343; McCay Eng'g Co., Baltimore, Md., $27,777 (awarded contract).

Rome, N. Y.—The following contracts are expected to be advertised during the early winter months by the Water and Sewers Comrs., and intending bidders are asked to look over ground before topographical features and physical conditions are obscured by snow: Intake dam on Fish Creek; tunnel; aqueduct, and reservoir, as advertised in The Engineering Record. Further information can be obtained from Knight & Hopkins, Engrs., of Rome.

Brooklyn, N. Y.—The Bd. of Estimate, N. Y. City, on Oct. 4 appropriated $100,000 to provide for the construction and extension of high pressure water service for fire protection at Coney Island.

Salisbury, N. C.—The City Clerk writes that the citizens on Oct. 1 voted to issue $300,000 bonds. It is stated that it is proposed to use the proceeds of the issue for street, water and sewer improvements during the next 3 years.

Ironton, O.—Bids will be received, it is stated, until Oct. 15 by the Bd. Pub. Service for furnishing material and excavating, concrete work and piling for the foundation of valve well at city water works, for clear water system.

Prague, Okla.—The question of issuing $30,000 bonds for water works is reported under consideration.

**Philadelphio, Pa.*—We are informed that Dravo, Doyle & Co., 719 Arcade Bldg., has secured the contract for 2 turbine-driven sand washer pumps for the Torresdale filter plant, Contract 119, for $6,480 (bids opened Aug. 29 by the Dept. of Pub. Wks).

Panama.—See "Power Plants, Gas and Electricity."

Greensburg, Pa.—The Jamison Coal & Coke Co. is reported to have decided to construct a reservoir northeast of George Station, to supply water to its five plants.

Wickford, R. I.—The Wickford Fire Engine Corporation (Chas. Stafford, Secy.) on Oct. 1 voted to issue $30,000 bonds for the purpose of installing waterworks for the town of North Kingston .

Hurley, S. D. The question of constructing water works is reported as being considered here.

Brownsville, Tex Bids will be received, it is stated, until Oct. 30, by Frank W. Kibbie, City Attorney, for $43,000 water and $10,000 electric light bonds.

Norfolk Va. The Common Council on Oct. 1 passed an ordinance appropriating $50,000 for the purchase of 2,000 water meters .

Wenatchee, Wash. The Com. on Fire, Light and Water is reported to have been instructed to have plans prepared for new water works.

**Items marked thus give the names of parties awarded contracts.*

Spokane, Wash.—Fred. Wendt is reported to have petitioned the County Comrs. for a franchise for a water system for Irvington Heights.

The Adrian Irrigation Co. (Walter Thos. Mills, Pres.), with offices in the Columbia Bldg., is reported to have engineers in the field making permanent location for its canal, following which work on construction will be started. It is proposed to irrigate about 3,000 acres. The water supply is derived from five lakes, which will be connected by ditches, making dams in three places to raise and hold the flood waters of Crab Creek.

Tacoma Wash.—Frank L. Davis, City Engr., is reported to have recommended to City Council the laying of an 18-in. water main from South Tacoma pumping station to supply water in the west end of the city. Estimated cost $40,000.

West Bend, Wis.—The City Clerk writes that bonds have been sold for the construction of water works.

West Bend, Wis.—The citzens are reported to have voted to issue $25,000 bonds for water works.

Two Rivers, Wis.—It is stated that bids will be received until Oct. 16 by the Water and Light Comrs. (J. G. Weilep, Secy.) for laying 1,070 ft. 4-in. water pipe.

Thermopolis, Wyo.—The citizens have voted to issue $50,000 bonds for waterworks.

Sudbury, Ont.—See "Power Plants, Gas and Electricity."

Clinton, Ont.—The citizens are reported to have voted Sept. 30 to issue $53,000 bonds to establish a system of waterworks for fire protection.

**Montreal, Que.*—Geo. Janin, Supt. Water Works, writes that the contract for constructing reinforced concrete conduit about 9 ft. diam. and 27,300 ft. long has been awarded to Patk. McGovern, 6 Beacon St., Boston, Mass., for about $684,815.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Jasper, Ala.—Bids will be received by the Mayor and Council until Oct. 21 for constructing sanitary sewers. P. Byrne, Engr., Birmingham.

**Ensley, Ala.*—C. M. Burkhalter & Co. are reported to have on Oct. 3 secured the contract for building storm sewers, for $5,500.

Ventura, Cal.—The citizens are reported to have voted to issue $150,000 bonds for the construction of two storm sewers, 3 steel and concrete bridges, improvement to parks, paving, a fire house, and other improvements.

Santa Monica, Cal.—The citizens on Sept. 28 voted to issue $150,000 bonds for the establishment of a septic tank, outfall sewer; also a pleasure wharf on Colorado Ave. T. H. James, City Engr.; J. C. Heminway, City Clk

**San Francisco, Cal.*—J. A. Dowling & Co. are reported to have secured the contract for constructing sewers on Drumm and Commercial Sts., for $15,879, and Williams & Belser, for sewers in Stuart, Beale and Tremont Sts., for $5,318.

Torrington, Conn.—Bids will be received by the Bd. of Warden and Burgesses of Torrington until Oct. 21 for the construction of sanitary sewers, including 7,771 lin. ft. 12, 10 and 8-in. tile pipe and 37 manholes, as advertised in The Engineering Record.

Albany, Ga.—See "Water."

Elgin, Ill.—The question of constructing a complete system of combination sewers in the 5th Ward, is reported under consideration here.

Marshall, Ill.—C. A. Purdunn, of the Bd. of Local Improv., writes that Robt. W. Paige, of Terre Haute, Ind., is preparing plans and specifications for the construction of a sewerage system.

Quincy, Ill.—See "Paving and Roadmaking."

**Linton, Ind.*—Frank Spelbring, City Clk., writes that Fred C. Morgan and T. E. Slinkard, of Linton, have secured the contract for constructing a sewerage system (bids opened Oct. 7); cost reported to be about $64,000.

Elkhart, Ind.—It is reported that plans have been ordered prepared for sewers in W. Franklin and Hudson Sts. L. E. Arnold, Chmn. Bd. Pub. Wks.

Bids will be received, it is stated, until Oct. 15 by the Bd. Pub. Wks. for constructing a sewer in E. Jackson St. A. M. Smith, City Engr.

Adel, Ia.—Bids will be received until Oct. 21 by the Town Council at the office of V. G. Sweeley, Town Clk., for constructing 8 and 10-in. vitrified clay pipe sewers in Walnut, Main and Rapids Sts., in all about 4,460 lin. ft.

**Clinton, Ky.*—P. H. Porter, of Clinton, has secured the contract for constructing a system of sewers in Clinton.

Covington, La.—The Town Council is reported to have appointed a committee, consisting of J. S. Jones, Maurice Plaunche and Preston Burns, to investigate and report on the question of constructing a sewerage system.

Agawam, Mass.—The Selectmen are reported to have voted to extend the sewer system along the Agawan side of Mittineague along Bridge and Maple Sts. and Highland Ave.

Salem, Mass.—The following are the bids opened on Oct. 2 by the Sewerage Comrs. for constructing (*a*) Sect. 1, (*b*) Sect. 2, (*c*) Sect. 3 and (*d*) Sect. 4 of the So. Salem trunk sewer, to be of brick or reinforced masonry, requiring in all about 6,913 lin. ft. 34, 36, 38, 42 and 48 in. sewer—(1) brick, (2) concrete: Bruno & Petitti, (*a*1) $29,277, (*a*2) $28,207, (*b*1) $25,850, (*b*2) $24,935, (*c*1) $22,930, (*c*2) $23,105, (*d*1) $20,100, (*d*2) $19,225; Falvey & Kelley, (*a*1) $29,104, (*a*2) $28,207, (*b*1) $22,938, (*b*2) $21,114, (*c*1) $18,277, (*c*2) $16,489, (*d*1) $18,678, (*d*2) $17,265. Thos. F. Welch, Boston, (*a*1) $25,896, (*a*2) $21,318, (*b*1) $19,351, (*b*2) $15,232, (*c*1) $22,154, (*c*2) $17,222, (*d*1) $14,842, (*d*2) $11,792; Coughlan & Shields Co., (*b*1) $24,756, (*b*2) $22,460, (*c*1) $22,183, (*c*2) $20,620; C. E. Trumbull Co., (*b*1) $24,633, (*b*2) $21,448, (*c*1) $22,281, (*c*2) $19,553.

Tecumseh, Mich.—Bids will be received until Oct. 29 by the Bd. of Village Trus. (W. L. Jones, Clk.) for furnishing material and constructing a sanitary sewer system, consisting of 1,020 ft. 15-in., 500 ft. 12-in., 11,348 ft. 10-in., 28,227 ft. 8-in. and 14,674 ft. 6-in. pipe sewer, with manholes, flush tanks, masonry and Y branches. Engineers, the Riggs & Sherman Co., of Toledo, O.

**Detroit, Mich.*—W. W. Magee, Secy. Bd. Pub. Wks., writes that Jas. Hanley, 40 Fort St., has secured the contract, for the Shroeder Ave. sewer, sects. 4 and 5 at $17,093 and $25,021 respectively, and Langley & Jeynes, for the Lothrop Ave. sewer for $10,074.

Virginia, Minn.—Bids will be received until Oct. 22 by Albert E. Bickford, City Clk., for constructing sewers in Sewer Dist. No. 3 G.

**St. Paul, Minn.*—O'Neil & Preston are reported to have secured the contract on Oct. 3 for building a sewer on Goff Ave., for $5,357.

Hattiesburg, Miss.—It is stated that bids will be received until Oct. 15 at office of City Clk., for constructing sanitary sewers and appurtenances, requiring about 2,640 lin. ft. 15-in., 6,150 lin. ft. 10-in. and 6,708 lin. ft 8-in. sewer, 43 manholes and 7 flush tanks. J. H. Putnam, City Engr.

**Bozeman, Mont.*—E. T. Rich is reported to have secured the contract for constructing sewers on Sept. 24, for $25,000.

Plainfield, N. J.—The City Council is reported to have decided to complete the installation of the sewage connection through the entire south side of city, recently abandoned by contractor; it will cost about $40,000.

Trenton, N. J.—Bids will be received until Oct. 15 by the Common Council for constructing sewers in portions of Logan and Stuyvesant Aves. Harry B. Salter, City Clk.

Riverside, N. J.—Bids will be received until Oct. 31 by Henry Taubel, Chmn. Township Com., at Kiessling's Hall, Riverside, for $80,000 bonds, to be issued for the purpose of constructing a sewerage system.

Summit, N. J.—Bids will be received until Oct. 15 by the Common Council for constructing the Edgewood sewers, consisting of about 5,300 ft. 12, 10 and 8-in. vitr. pipe.

Buffalo, N. Y.—Separate bids will be received until Oct. 22 by the Dept. Pub. Wks. (F. G. Ward, Comr.), for furnishing material and constructing sewers in portions of the following streets: 20 and 18-in. tile sewer in Eller Ave.; 15 and 10-in. tile sewer in Southside Parkway and a 12 and 10-in. tile sewer in Bloomfield Ave.; 45, 42, 39, 36 and 33-in. brick sewer in Fillmore Ave.

Saratoga Springs, N. Y.—Bids will be received, it is stated, until Oct. 16 by the Sewer, Water and Street Comn., for constructing 8-in. terra-cotta sewers in portions of Church, Granite, Alger and Clinton Sts.; also a 6-in. terra-cotta sewer in a portion of Henry St.

Salisbury, N. C.—See "Water."

Steubenville, O.—Bids will be received, it is stated, by T. W. Vance, Clk. Bd. Pub. Service, until Oct. 21, for constructing an 18-in. pipe sewer in a portion of Wells St.

Ironton, O.—The citizens are reported to have voted to issue $75,000 sewer and flood defense bonds.

Cincinnati, O.—Bids will be received until Oct. 15 by the Bd. Pub. Service (M. J. Keefe, Clk.), for the repair of the McLean Ave. brick sewer, 12 ft. diam. Engineer's estimate, $12,000.

Delaware, O.—The lowest bid opened on Sept. 27 by the Bd. of Trus. of the Girls Industrial Home for a sewage disposal plant, was submitted by the Pitt Constr. Co., of Pittsburg, Pa., for $12,786. Engineers, E. G. Bradbury and Geo. P. Shute, of Columbus.

Orrville, O.—The State Bd. of Health has approved plans for sewerage and a sewage disposal plant for Orrville. Engineer, L. E. Chapin, of Canton.

Scranton, Pa.—Bids will be received until Oct. 18 by C. R. Acker, Dir. Dept. Pub. Wks., for constructing a lateral sewer in Division St.

Archbald, Pa.—The Boro. Council is reported to have decided to construct sewers on Main and Monroe Sts., which is said to be preliminary to constructing sewers in the entire borough.

RockHill, S. C.—The question of constructing a sewage system is reported under consideration here; probable cost, $117,000.

Aberdeen, S. D.—F. W. Raymond, City Aud., will receive bids until Oct. 28 for the construction of sewers.

Salt Lake City, Utah.—Bids will be received, it is stated, by the Bd. Pub. Wks. (F. J. Leonard, Chmn.) until Oct. 18, for furnishing and installing pump and motor, constructing pump house and outlet pipe for intercepting sewer. Louis C. Kelsey, City Engr.

Spokane, Wash.—Bids will be received until Oct. 22 by the Bd. Pub. Wks. (J. T. O'Brien, Secy.) for the construction of sub-trunk sewers in the 1st Ward, Dists. Nos. 6 and 7; also a main trunk sewer, 1st Ward, Dist. No. 4.

Kent, Wash.—C. C. Cornelius, Town Clk., writes that contract was not let on Sept. 28 for constructing main trunk sewer; only two bids were received.

Seattle, Wash.—Local press reports state that about $275,000 will be expended by the city within the next year or so, to relieve the tide flat sewer situation, the work to include the construction of the Lander St. and the Connecticut St. trunk sewers.

Fond du Lac, Wis.—Bids will be received until Oct. 18 at the office of J. F. Hohensee, City Clk., for constructing sanitary sewers in portions of First, Tenth and Merrill Sts.

Ladysmith, Wis.—Bids will be received until Oct. 15 by the Bd. Pub. Wks. (Tom Baker, Chmn.) for constructing a sewer in Miner Ave.

BRIDGES.

Notes Arranged Alphabetically by States.

Ventura, Cal.—See "Sewerage and Sewage Disposal."

Chicago, Ill.—Bids will be received until Oct. 26 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and constructing the sub-structure for bascule bridge over the north branch of the Chicago River, near Kinzie St., with all necessary abutments and approaches; also superstructure of said bridge, including all machinery necessary thereto.

Granville, Ind.—John P. Foresman, Aud. of Lafayette, writes that it is proposed to erect a bridge over Wabash River near Grenville next spring, to cost about $50,000.

Des Moines, Ia.—It is stated that plans are being prepared for the erection of a viaduct at S. 7th St.

Des Moines, Ia.—The City Council is reported to have decided to remove present Locust St. steel bridge to North St.

Williamsport, Md.—Bids will be received by the Williamsport & Berkeley Bridge Co. (Edw. W. Byron, Secy.) until Oct. 30 for a reinforced concrete arch bridge, 15 spans, total length 1,570 ft., over Potomac River, as advertised in The Engineering Record. Mason D. Pratt, Consulting Engr., Harrisburg, Pa.

Thief River Falls, Minn.—It is stated that contract will soon be let for constructing a steel bridge over Red Lake River, at a cost of $14,000.

Meridian, Miss.—At a joint conference held Sept. 30 between the officials of the city, the steam railroads and the street railway a committee of engineers was requested to report in 15 days on the location and estimated cost of an overhead bridge. J. T. Rivers, Mayor.

Kansas City, Mo.—The construction of a viaduct to connect the West Side Dist. with the Union Station is reported contemplated.

**New York, N. Y.*—The following are the bids opened on Oct. 3 by Jas. W. Stevenson, Comr. of Bridges, for constructing the Madison Ave. Bridge over Harlem River: Bernard Rolf, 39 Cortlandt St., $1,333,333; John C. Rodgers, 1929 Amsterdam Ave., $1,155,987 (awarded contract); Phoenix Constr. & Supply Co., 41 Park Row, $1,189,626; Maryland Steel Co., 71 Bway., $1,324,567; Williams Engr. & Contr. Co., 21 Park Row, $1,197,000.

New York, N. Y.—See "Electric Railways."

New York, N. Y.—See "Power Plants, Gas and Electricity."

Hempstead, L. I., N. Y.—Bids will be received by John H. O'Brien, Comr. Water Supply, Gas and Electricity, New York City, until Oct. 18, for furnishing, delivering and constructing piers for 2 bridges over the Wantagh stream, and to do certain grading of Seaman's Road, in the town of Hempstead.

**Oberlin, O.*—Burge & Miller are reported to have secured the contract for constructing stone abutments for the Vine St. Bridge, at $2,153.

Ashland, O.—It is reported that bids will be received until Nov. 4 by the Bd. Co. Comrs., for furnishing material and constructing the McClintock Bridge in Clear Creek Township, to consist of one 45-ft. steel superstructure and stone abutments. E. B. Westover, Co. Aud.

Clinton, O.—It is stated that bids will be received until Oct. 23 by the Bd. Co. Comrs. at Akron, for furnishing material and constructing a bridge across the Tuscarawas River on the Haulk Rd. in Franklin Township, about a mile north of Clinton. Mark D. Buckmann, Co. Aud.

Troy, O.—See "Paving and Roadmaking."

Cincinnati, O.—The Com. on Streets is stated to have recommended the construction of a bridge over the canal, replacing the Mohawk Bridge at Central Ave.; estimated cost of proposed structure, $25,720.

Dayton, O.—It is stated that bids will be received by T. P. Kaufman, Co. Aud., until Oct. 17 for $20,000 bridge bonds.

Bids will be received until Nov. 2 by Edwd. Philips, City Aud., for $9,000 bonds to be issued for the purpose of providing money to construct a bridge across Wolf Creek and for purchasing and condemning the necessary land therefor.

Portland, Ore.—The City Council is reported to have authorized the Executive Bd. to receive bids for constructing a steel bridge over Sullivan's Gulch at Union Ave. and E. Everett St.; estimated cost, $66,000.

Williamsport, Pa.—Bids will be received until Oct. 15 by the Bd. Co. Comrs. (Nate Brion, Chmn.) for constructing a stone arch bridge across Hamilton's Run, Cummings Township.

Chester, Pa.—Local press reports state that bids will be received until Oct. 17 by the Bd. Co. Comrs., at Media, for constructing a reinforced concrete bridge on Ardmore Ave., over Cobbs Creek, Haverford Township.

Philadelphia, Pa.—Bids will be received by Geo. R. Stearns, Dir. Dept. Pub. Wks., until Oct. 21 for bridges on Sch. A, as advertised in The Engineering Record. This work consists of the following: At 12th St. under Connecting Ry 4 track half through solid floor plate girder railroad bridge, 69 ft. 6 in. long, 52 ft. wide, containing 14,000 cu. yd. of grading; appropriation, $70,000; also at Wyoming Ave. over Frankford Creek, highway bridges, two separate concrete arch bridges, 571 ft. apart, ea. with a span of 90 ft. and width of 74 ft.; appropriation, $140,000. Geo. S. Webster, Ch. Engr., Bureau of Surveys.

Lancaster, Pa.—The County Comrs. are reported to have opened bids Sept. 30 for the erection of a stone or concrete bridge to be built over Hammer Creek between Elizabeth and Warwick Townships: Ferro Concrete Co., $3,495; J. P. Brenneman, concrete, $6,050; P. B. Bucher, stone, $3,340; Chas. T. Eastburn, stone, $5,150.

Woonsocket, R. I.—See "Paving and Roadmaking."

Johns Island, S. C.—Bids will be received until Oct. 20 by T. F. H. Peck, Chmn. Township Bd., for con-

**Items marked thus give the names of parties awarded contracts.*

structing a bridge connecting Johns Island with Wadmalaw, also 2 concrete bulkheads.

Belton, Tex.—The Bell County Comrs. are reported to be considering erection of steel wagon bridge, costing $[illegible], over the Leon River between Belton and Temple, Tex.

Crosby, Tex.—Bids will be received until Oct. 16 by John R. Ash, Co. Aud., Houston, for constructing a bridge across San Jacinto River near Crosby.

Tarrant, Tex.—It is reported that bids will be received until Oct. 15 by C. J. Kenna, Co. Aud., Ft. Worth, for constructing a 40-ft. steel bridge, with 12-ft. steel piers, resting on concrete bases, 12 ft. roadway, across Bear Creek, about 4 miles north of Tarrant.

Spokane, Wash.—The City Council on Oct. 2 selected Prof. W. H. Burr, of New York, N. Y., to visit Spokane and report on respective methods of a steel or concrete bridge on Monroe St.; also to prepare plans for the bridge.

River Falls, Wis.—Bids will be received until Oct. 21 by Allen P. Weld, City Clk., for constructing a steel arch bridge, with sidewalk and cement floor, with covering of vitrified brick at the Cedar St. crossing, Kinnickinnic River.

Superior, Wis.—Plans for an extension of the Belknap St. Viaduct are reported to have been prepared. The plan is to extend the viaduct to the east over the Northern Pacific R. R. and Lake Superior & Transfer Ry. tracks. The entire extension will be about 742 ft. long, while the present viaduct is 776 ft. in length. The cost of the proposed improvement will be about $60,000.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Ventura, Cal.—See "Sewerage and Sewage Disposal."

Stockton, Cal.—The City Council is reported to have passed a resolution providing for the paving of Poplar St.

San Francisco, Cal.—We are informed that Flinn & Treacy, of San Francisco, submitted the following bid on Sept. 19 to the Bd. of State. Harbor Comrs.: For 22,000 sq. ft. new paving with basalt blocks, excav. 6 in. and filling 5 in. deep with clean sand, 28⅞ cts., and 3,000 sq. ft. repaved with old blocks, including preparing roadbed, as above, 10 cts.; total cost, $6,652.

Naturita, Colo.—It is stated that bids will be received until Oct. 21 by T. W. Jaycox, State Engr., Denver for constructing about 2 miles of wagon road between Naturita and Paradox, Montrose County.

**Bristol, Conn.*—The Pierson Engineering and Constr. Co. is reported to have secured the contract for improving Farmington Ave. for $6,850.

**Hartford, Conn.*—F. L. Ford, City Engr., writes that the contract for paving with asphalt Asylum St. (bids opened Oct. 7) has been awarded to the Southern New England Paving Co., 26 State St., Hartford, Conn. Total bid, $15,960.

**Wilmington, Del.*—The Street and Sewer Directors are reported to have decided to purchase a municipal paving plant from the Warren Bros. Co., of New York, N. Y., at a cost of $12,250, with $900 additional for 2 storage tanks.

Washington, D. C.—The Comrs. of Dist. of Columbia are stated to have decided to resurface the driveway on west side of 14th St. between Thomas Circle and Rhode Island Ave.

Atlanta, Ga.—The construction of a driveway from Piedmont Park to Grant Park is reported under consideration.

Albany, Ga.—See "Water."

**Boise, Idaho.*—The contract for 25,000 lin. ft. of cement curb and same length of 6-ft. cement sidewalk has been awarded to Ward & Ballinger, of Boise, at 45 cts. and 75 cts. per lin. ft., respectively.

Quincy, Ill.—Bids will be received until Oct. 17 for 10-in. pipe sewer on 10th St. and paving 10th St. for 2 blocks with a single course brick and sand stone curb. F. L. Hancock, City Engr.

**Hartford City, Ind.*—L. W. Dougherty, Co. Aud., writes that Marion Creek, of Priam, secured contract for constructing macadam road in Harrison Township, for $22,367, and Chas. Clamme, of Hartford City, for a road in another portion of Harrison Township, for $6,883.

Lafayette, Ind.—It is stated that bids will soon be received for paving Owen St.

Resolutions are reported to have been adopted providing for the paving of Hollaway and Hickory Sts.

**Vincennes, Ind.*—Patrick Lenahan, of Vincennes, is reported to have secured the contract for improving 5,736 ft. of Fyffe Gravel Road, for $8,122. Bids opened Sept. 29.

Des Moines, Ia.—The City Council is stated to have decided to pave with brick portions of Postal Ave., W. 19th, 20th, 28th, 29th, W. 9th and Walnut Sts.

Galena, Kan.—The City Council is reported to have passed an ordinance providing for the paving of a portion of Wall St.

**Emporia, Kan.*—The contract for paving 14,284 sq. ft. of Commercial St. is stated to have been awarded to Ft. Scott Stone & Constr. Co., of Ft. Scott, at $1.65 per ft.

**Boston, Mass.*—We are informed that Jones & Meehan, 1 Beacon St., have secured the contract for paving and regulating Northern Ave. and Sleeper St. (bids opened Sept. 30 by Wm. Jackson, City Engr.), at the following bid: 800 lin. ft. edgestone, $1.0[illegible]; 6,500 sq. yds. granite block, $2.[illegible]; [illegible] sq. yds. brick sidewalk, $1; 50 sq. yds. flag, $[illegible]; total, $[illegible],800. Totals of other bids received: Daniel F. Lynch, $11,939; Daniel J. Kiley, $[illegible]; D. F. [illegible] & Co., $[illegible]; McCourt & Doherty, $16,172; W. H. Grose & Co., $16,524; R. Eagar, Jr., $[illegible]; J. McShane, $17,[illegible]; Jas. Doherty, $17,298, and Peter W. H[illegible], $[illegible].

So. St. Paul, Minn.—The paving of Concord St. is reported contemplated, at a cost of $[illegible].

St. Cloud, Minn.—The City Council is stated to have decided to expend $18,[illegible] for street improvements.

Bemidji, Minn.—It is stated that bids will be received until Oct. 15 by the Bd. Co. Comrs. for constructing 2 county roads. John Willmann, Co. Aud.

Carterville, Mo.—Bids will be received until Oct. 17 by H. E. Moody, City Clk., for constructing 39,000 sq. ft. cement sidewalks on 5 streets. Est. cost, $5,300. F. A. Funk, City Engr.

Kansas City, Mo.—See "Miscellaneous."

Concord, N. H.—Bids will be received by the Comrs. of Cabarrus County until Oct. 24 for grading and macadamizing about 10 miles of public road from Concord to Kannapolis, also 1 mile on the Concord and Charlotte Road, as advertised in The Engineering Record. Engineer, Quint E. Smith, of Concord.

Gloucester, N. J.—The Mayor is stated to have approved the ordinance providing for an appropriation of $75,000 for street improvements.

Belleville, N. J.—Bids will be received until Oct. 15 by Thos. H. Breen, chmn. Township Com., for furnishing material and constructing sidewalks on portions of Heckel and Anderson Sts. J. H. Francisco, Surveyor, 175 Broad St., Newark.

New York, N. Y.—Bids will be received until Oct. 21 by Henry S. Thompson, Acting Boro. Pres. and Comr. Pub. Wks., for regulating and repaving with wood blk. portions of Trinity Pl., Church and Vesey Sts.; with asphalt, 6th, 8th and W. 11th Sts., and with asphalt blk., Cannon, Attorney, Ridge, Pitt, Willett, Sheriff and Columbia Sts. Engineer's estimate: 17,110 sq. yds. wood blk. pavt.; 13,700 sq. yds. asphalt pavt., including binder course; 7,170 sq. yds. asphalt blk. pavt.; 36,510 sq. yds. old stone blocks, to be purchased and removed by the contractor; 6,710 cu. yds. concrete, including mortar bed; 20,095 lin. ft. new bluestone curbstone, to be furnished and set, etc.

Bids will be received by the Park Bd. (Saml. Parsons, Jr., Pres.) until Oct. 24, for furnishing and delivering 1,000 cu. yds. broken stone of trap rock, and screenings of trap rock (No. 4, 1907), for parks, Boro. Bronx.

Ithaca, N. Y.—Bailey, Johnson & Saunders, 121 S. Tioga St., Ithaca, have the following work to sublet, for which they will furnish plant: 8,000 cu. yds. local stone (bottom course), half mile haul; 4,000 cu. yds. limestone (top course), 1½ miles haul; stone on cars, $1.15; 10,000 cu. yds. excav., guard rail paving, etc.

Mineola, L. I., N. Y.—It is stated that the Bd. Supervisors of Nassau County is about to issue $250,000 bonds for road improvements.

Hempstead, L. I., N. Y.—A resolution is stated to have been passed by the Bd. of Estimate and Apportionment of New York City approving the proposed agreement to be entered into by the Comr. of Water, Gas & Electricity and the Town Bd. and Comrs. of Highways of Hempstead, for an easement of right of way over the banks of the Brooklyn waterworks reservoir for the construction of Eagle Ave.

**Buffalo, N. Y.*—F. V. Bardol, D. S. Morgan Bldg., is reported to have secured the contract for paving with brick a portion of Pink St., $4,750.

Brooklyn, N. Y.—Bids will be received until Oct. 23 by Bird S. Coler, Boro. Pres., for regulating and repaving portions of Park Pl., Bradford, George, Saskman and Schaeffer sts. Engineer's estimate: 28,000 sq. yds. asphalt pavt.; 3,210 cu. yds. concrete; 6,340 lin. ft. new curb, etc.

**New York, N. Y.*—The Comr. of Docks has awarded to M. J. Fitzgerald the contract for furnishing materials and curbing, flagging and laying granite pavement, with crosswalks, within the area of the marginal street on the Chelsea section, bet. W. 15th and W. 19th Sts., North River, Boro. of Manhattan, for $50,500.

Rochester, N. Y.—The construction of a municipal asphalt plant is reported under consideration.

**Schenectady, N. Y.*—The contracts for paving with asphalt Earle Ave. and Union St. is reported to have been awarded to F. R. Crane, at $2 per sq. yd.

Durham, N. C.—We are informed that all bids opened by the Comrs. of Durham County, N. C., Oct. 1, for building about 11½ miles of macadam road, to consist of about 60,000 sq. yds. 6-in. macadam and 75,000 cu. yds. excav., with necessary pipe and reinforced concrete drains, have been rejected, being too high, and new bids will be received. A. D. Markham, Chmn.; Engineer, Gilbert C. White, of Durham.

Salisbury, N. C.—See "Water."

Dayton, O.—Bids will be received until Nov. 2 by Edwd. Philipps, City Aud., for $33,600 paving bonds.

Cleveland, O.—Bids will be received until Nov. 6 by the Bd. Co. Comrs. (Julius C. Dorn, Clk.) for the completion of the Miles Ave. improvement. A. B. Lea, Co. Engr.

Troy, O.—Bids will be received until Nov. 12 by E. E. Pearson, Co. Aud., for furnishing material and building about 2,800 lin. ft. macadam road known as the Horse Shoe Bend Improv., near W. Milton, also the substructure for bridge and reinforced concrete culvert. Approximate quantities: [illegible],000 cu. yds. earth excav.; 28,000 cu. yds. rock excav.; 2,070 cu. yds. masonry; 160 cu. yds. reinforced concrete; 3,373 sq. yds. macadam, and 360 lin. ft. piling. H. J. Walker, Co. Engr.

**Marion, O.*—The contract for constructing the White Oaks Road is reported to have been awarded by the County Surveyor to Brady & O'Connell for $3,800.

Lorain, O.—Bids are wanted, it is stated, until Oct. 19 for $44,000 Reid St., $8,500 Washington St., $68,000 Oakwood St., $13,500 Bank St. and $16,000 2d Ave. paving bonds. Custer Snyder, City Aud.

**Silverton, O.*—A. A. Sprague, Clk. Bd. Pub. Service, writes that the contract for constructing cement sidewalks, grading, etc. (bids opened Sept. 21), has been awarded to I. E. Witman, of Columbus, for $10,598.

Woodsfield, O.—It is stated that the Village Council will receive bids until Oct. 19 for grading and macadamizing W. Court St.

Richwood, O.—It is stated that bids will be received until Oct. 26 by Ray L. Jordan, Village Clk., for improving Franklin St., by paving with brick, constructing curb, gutters and retaining walls.

Harrisburg, Pa.—The Boro. Council is reported to have passed resolutions providing for the paving of portions of 15th, Hummel and State Sts.

Local press reports state that bids will be received until Oct. 17 by the Highway Dept., for paving Moltke Alley, Hummel and Parker Sts.

Somerset, Pa.—The County Comrs. are stated to have decided to macadamize portions of the Somerset and Bedford Pike and Frieden's Station Road, at a cost of $18,237.

Scranton, Pa.—Bids will be received until Oct. 15 by C. R. Acker, Dir. Dept. Pub. Wks., for laying flagstone sidewalks on portions of several streets.

**Woonsocket, R. I.*—The United States Wood Preserving Co., of New York, N. Y., is reported to have secured the contract for paving with wood block Court St. Bridge, at $5,800.

Beaumont, Tex.—Bids will be received until Oct. 21 by Jas. A. Harrison, Co. Judge, for $300,000 road bonds.

Seattle, Wash.—The following are the bids opened on Sept. 28 by the Bd. of Pub. Wks. for paving Yesler Way from Bway. to 32d Ave.: (*a*) Sparger Concrete Co., 568 Colman Bldg.; (*b*) H. F. Jahn & Co., 581 Colman Bldg.:

	a	*b*
Fixed estimate	$2,500.00	$2,500.00
Clearing and grubbing (lump sum)	4,000.00	6,000.00
150 lin. ft. 8-in. pipe sewer	2.00	1.60
7,400 cu. yds. sub-grade	.75	.75
7 catch-basins, 1 inlet, ea	70.00	85.00
8 catch-basins, no inlet, ea	55.00	70.00
1,358 lin. ft. curb, curved granite	2.25	2.25
12,643 lin. ft. curb, concrete	.45	.50
391 sq. yds. concrete walks	1.30	1.60
10,176.8 sq. yds. asphalt	2.35	2.25
11,081 sq. yds. sandstone	4.65	4.50
2,354 sq. yds. brick gutters	3.30	3.20
1,120 lin. ft. wood stop	.50	.45
21 catch-basins to move, ea	30.00	35.00
18 inlets to move, ea	5.00	4.00
66 adj. catch-basins, manholes	4.00	4.00
102 sq. yds. brick alley crossings	3.30	3.20
700 cu. yds. concrete bulkhead	8.50	9.50
256 lin. ft. railing	.15	.50
132 lin. ft. 8-in. c. i. pipe	2.75	2.20
36 lin. ft. 6-in. c. i. pipe	2.25	1.70
200 lin. ft. 1-ft. galv. pipe	.35	.40

**Seattle, Wash.*—Fritch & Co., Inc., are stated to have secured the contract for constructing about 12 miles of sidewalks 6 ft. in width in the Jas. A. Moore's University Park Addition for $40,000.

Huntington, W. Va.—It is stated that bids will be received until Nov. 1 by K. L. Hamilton, City Clk., for $50,000 street improvement bonds.

Menasha, Wis.—The paving of portions of Broad St. with macadam is reported contemplated.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Hartsells, Ala.—The Hartsells Electric Light & Power Co. is reported incorporated to construct an electric light plant. J. C. Rogers, of Hartsells, is reported interested.

Florence, Ariz.—The Florence Water, Light, Ice & Power Co. is reported formed by Dr. G. M. Brockway, P. A. Chambers and others, to construct water works, an electric light and gas plant and an ice plant in Florence.

Chico, Cal.—L. D. Macy, a hotel proprietor, of Chico, is reported to have decided to petition Council for a franchise for an electric light plant.

Redlands, Cal.—The Edison Electric Co. is reported to be planning the construction of a power plant to utilize the water of Bear Creek.

Badito, Colo.—It is reported that the Southern Colorado Power Co. has been incorporated to construct a reservoir and water power plant at Badito, on Huerfano River. It is expected that the power plant will generate 10,000 h.p. for use of all the towns and mines in the vicinity of Badito. It is probable that the company will furnish electric power to operate the mines of the Colorado Fuel & Iron Co. near Walsenburg and Trinidad.

Washington, D. C.—See "Miscellaneous."

Carlyle, Ill.—It is reported that the electric light plant and water works will be improved and extended.

Blackshear, Ga.—The question of constructing an electric light plant is reported under consideration.

Indiana Harbor, Ind.—The Indiana Harbor & East Chicago Electric Co. is reported incorporated, to construct, equip and operate an electric plant to supply the city of East Chicago and other cities, towns and villages in said territory, with light, heat and power. H. H. Philips, R. M. Cole, H. S. Oakley and C. B. Woods are the directors.

Bicknell, Ind.—It is reported that the Town Council will receive bids for the construction and equipment of a combined water and electric light plant.

Mishawaka, Ind.—The Mishawaka Textile Co. is reported to have purchased the north race of the local water-power, and will install new machinery for the generation of electricity for power purposes.

Clay City, Ind.—The Clay City City Lighting Co. is reported to be in the market for material, equipment and expert labor for the construction of an electric light plant. J. M. Long and H. R. Vandevier, Directors.

Newton, Ia.—It is reported that it is proposed to purchase engine, boiler and switchboard for the municipal electric light plant.

Marion, Kan.—See "Water."

Paducah, Ky.—See "Public Buildings."

Baltimore, Md.—Bids will be received until Oct. 16 by the Bd. Awards (J. Barry Mahool, Pres.) for installing a 60-h. p. shunt field control direct-current 440-volt motor at the New Eastern Female High School.

Orange, Mass.—The Rodney Hunt Machine Co. is reported to be considering the question of purchasing the water power at Eagleville and developing same for electrical purposes.

Bay City, Mich.—Albert Boston, Deputy Recorder, writes that specifications have been prepared, and bids will probably soon be called for by the City Comptroller, for dismantling the east side electric light plant and re-establishing same on west side of river. Wm. H. Fitzhugh, Supt.

*Items marked thus give the names of parties awarded contracts.

Escanaba, Mich.—The Escanaba Electric Power & Pulp Co. is reported incorporated with a capital of $500,000 and has been granted the right by the city of Escanaba to furnish city plant with power for lighting streets and commercial light and power for 10 years. O. L. Huie, Marinette, Wis., Pres.; J. M. Malloy, Watertown, Wis., Vice-Pres., and P. L. Utley, Watertown, Wis., Secy. and Treas.

**Red Wing, Minn.*—The State Bd. of Control is reported to have awarded contract for installing an addition to the power plant at the Red Wing Training School to the Northern Eng. Co., of Minneapolis, for $2,198. The contract for rewiring the buildings was awarded to Hartig & Hellier, of Minneapolis, for $4,000.

Laurel, Miss.—The Gulf State Investment Co. is reported to have secured a 25-year franchise to construct and operate an electric light and power plant.

Stevensville, Mont.—H. C. Hodge, of Tacoma, Wash., is reported interested in the construction of an electric light plant to light Stevensville and Victor. He expects to develop the water power in the Big Creek canyon west of Victor.

Wahoo, Neb.—A committee is reported appointed with Mayor E. Lenrud as chairman, to report on question of constructing an electric light plant and water works.

Central City, Neb.—Mr. Martin, of Fremont, is reported to have petitioned for a franchise for an electric light plant.

Collingswood, N. J.—The Collingswood Mutual Water Improv. Co., of Philadelphia, Pa., is reported to have petitioned Borough Council for a franchise to light borough and supply water.

New York, N. Y.—See "Schools."

New York, N. Y.—Bids will be received until Oct. 24 by Jas. W. Stevenson, Comr. Bridges, for the electrical equipment of the University Heights Bridge.

Bids will be received until Oct. 21 by C. B. J. Snyder, Supt. School Bldgs., New York City, for installing electric equipment in additions to and alterations in School 59; also in connection with alterations in School 171, both in Boro. Manhattan.

Webster, N. Y.—The Sodus Gas & Electric Light Co. of Sodus, is reported to have secured a franchise in Webster to distribute electricity and gas.

Long Island City, L. I., N. Y.—The Bd. of Estimate on Oct. 4 granted a franchise to the Queens Lighting Co. to construct and operate pipes under and along the streets in the Boro. of Queens for the purpose of supplying gas to the public and private consumers.

Clifton Forge, N. Y.—Ford S. Burgett is reported interested in the formation of a company to develop the power on the outlet, and furnish electricity for lighting, etc.

East Worcester, N. Y.—The Great Bear Light & Power Co., of East Worcester, is reported incorporated to operate in the counties of Otsego and Schoharie. Capital, $20,000. Directors, Jas. E. Dante, A. D. Hallenbeck and Lucy Dante, of East Worcester.

Warrensville, O.—Bids will be received until Oct. 18 by the Bd. Pub. Service (A. R. Callow, Secy.), Cleveland, for installing complete electric wiring and conduits in the new quadrangle building of the Cleveland Farm Colony at Warrensville.

Toledo, O.—The City Council is reported to have granted Homer T. Yaryan, representing the People's Heat & Power Co., a franchise. According to agreement of the company, made in the ordinance, $200,000 will be expended in Toledo west of the river and $100,000 east of the river, in 2 years.

An application for a 25-year franchise in Toledo is reported to have been made to City Council by the Citizens' Light, & Htg. Co. This company is a new one formed by C. S. Ashley and others and contemplates a general business in light, heat and power in Toledo.

Baker City, Ore.—The Baker Light & Power Co. (A. Welch, Mgr., Baker City), is reported to be planning extensive improvements to its Rock Creek plant.

Womelsdorf, Pa.—W. W. Lengel, Boro. Secy., writes that bids will be received on Oct. 15 for the construction of a municipal electric light plant, to cost about $15,000. Engineer, F. W. Darlington, 1140 Real Estate Trust Bldg., Philadelphia.

Riegelsville, Pa.—John S. Riegel, of Riegelsville, is reported to have under consideration the construction of a water power plant on the Delaware at Narrows lock, to furnish power for his paper mill at Milford.

Panama.—Bids will be received until Nov. 4 at the office of H. F. Hodges, Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for electric fixtures, water meters, punching and shearing machines, pipe cutters, etc., as per circular No. 396.

Mt. Carmel, Pa.—The business men are reported to have organized a company, to be known as the Citizens Co., to construct and operate an electric light plant.

Philadelphia, Pa.—The United Gas Improvement Co. is reported to have decided to expend $1,000,000 for improvements to its plant here within the next year. Property has been purchased in West Philadelphia upon which will be erected a 3,000,000-ft. gas holder, and a similar holder will be erected in Frankford.

*We are informed that Dravo, Doyle & Co., 719 Arcade Bldg., has secured the contract for installing 3 turbine-driven generators, including condenser, air pump, piping and switchboard complete at Torresdale pumping station, Contract 110, for $25,150 (bids opened Aug. 29 by the Dept. of Pub. Wks., Bureau of Filtration).

Aberdeen, S. D.—Press reports state that C. F. Freehauf, of Cresco, Ia., has declined to accept franchise recently granted him for an electric light and power plant, and the city is reported to be ready to receive other propositions.

Salt Lake City, Utah.—See "Sewers."

Provo, Utah.—Architect W. H. Lepper is reported to be preparing plans for electric plant for the Telluride Power Co., of Provo, to be constructed near Grace, which when fully developed will have a capacity of 40,000 h. p. At present the design is for a plant of half that capacity, with two 10,000 h. p. generators. The power will be supplied by water from the Bear River. The water will flow through an 8 ft. pipe of iron 1⅛ in. thick.

Boydton, Va.—R. W. Lassiter is reported to have in contemplation the development of water power on Eagle Point fall, on Roanoke River, and the establishment of an electric light plant.

Deer Park, Wash.—The Co. Comrs., at Spokane, are reported to have granted A. M. Wood and R. H. Long a franchise for an electric lighting system in Deer Park.

Princeton, W. Va.—The Princeton Power Co. is reported incorporated with a capital of $25,000, to establish an electric power plant. E. S. J. Evans, Gen. Mgr.

Strathcona, Alta.—It is reported that bids will soon be asked for a gas plant to be constructed here by the International Light & Htg. Co., of Cleveland, O.

Sudbury, Ont.—The Ontario Ry. and Municipal Bd. is reported to have authorized the issue of $10,000 bonds for the extension of the water works and electric lighting system.

Mexico City, Mex.—The Mexican Light & Power Co. is reported to have decided to construct a hydraulic plant on Nexaca River, near Huachinango, to cost about $5,000,000.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Troy, Ala.—It is reported that Fox Henderson, L. M. Bashinsky and W. Chancy are promoting a scheme to build an electric railway from Troy to Orion, a distance of about 13 miles.

Pasadena, Cal.—The City Council is stated to have awarded a franchise to the Pacific Electric Ry. Co., Geo. E. Pillsbury, Ch. Engr., Los Angeles, to lay a double-track system in the business section of the city.

Chico, Cal.—It is understood that a project is on foot to electrify the Butte County R. R. from Chico to Paradise. D. H. Brammer, of Paradise, is reported interested.

Napa, Cal.—The Napa & Lakeport Ry. Co. is stated to have filed articles of incorporation with the County Clerk. The road is to be constructed from Napa to Lakeport, a distance of 90 miles, with a branch line from Monticello, 14 miles. Capital, $2,000,000. Incorporators: E. C. Amedee, of San Francisco, and A. J. Brown and W. F. Ansell.

Ventura, Cal.—F. M. Packard and J. P. Jones, of Los Angeles, are stated to have applied to the Bd. of Superv. for a franchise for an electric railway from Ventura to Nordhoff.

Elmhurst, Cal.—Application is stated to have been made to the Bd. of Supervisors at Oakland for a franchise to operate an electric railway through Elmhurst by Ira A. Miller.

Trinidad, Colo.—The Stonewall Valley Electric R. R. Co. is reported incorporated with a capital of $100,000. Incorporators: P. M. Johnson, St. Elmo, Ill.; Frank P. Read, James McKeough and J. C. Huddelson, Trinidad. The company intends extending the Trinidad Street Railway next spring from Cokedale through the Stonewall Valley into the Stonewall Mountains.

Macon, Ga.—The Macon Ry. & Light Co. is stated to have presented a petition to the County Comrs. asking the right of way along the Columbus Road to Brown Pl.

South Bend, Ind.—Arrangements are stated to have been completed by the promoters of the Ft. Wayne & South Bend Ry. by which work on the electric line will be started in the near future. Perry A. Randall, of Ft. Wayne, is reported interested.

Evansville, Ind.—The Evansville, Petersburg & Vincennes Ry. Co. is stated to have filed articles of incorporation with the Secretary of State, for constructing, equipping and operating an electric railroad from Evansville through Vanderburg, Warrick, Gibson and Pike counties to Petersburg. Capital, $10,000. Directors, F. W. Cook, L. J. Herman, H. E. Meyer and T. M. Honeywell.

Decatur, Ind.—The Ft. Wayne & Springfield Traction Co. is stated to have decided to ask for bids for the construction of 12 miles of road, including 3 bridges, from Decatur to Berne. J. J. Fledderjohann, Pres.

**Boston, Mass.*—The contract for constructing westerly wall roof and invert enlargement of subway, Haymarket Sq. (bids opened Oct. 3, by the Boston Transit Comn.), has been awarded to Coughlan & Shiels Co., 104 Hanover St., for $33,840.

Malden, Mass.—The Boston Elevated St. Ry. Co., of Boston, is reported to be considering the construction of an elevated railway from Charlestown to Malden.

Pittsfield, Mass.—The Pittsfield Electric St. Ry. Co. is stated to have presented the Railroad Comrs. with a petition for a certificate that public convenience and necessity require the building of an extension of its line from West Pittsfield through Hancock to Lebanon, N. Y (P. C. Dolan, Mgr.)

Traverse City, Mich.—Articles of association of the Grand Traverse Ry. Co. are stated to have been filed. Capital stock $450,000. The company will build an electric railway from Traverse City to Elk Rapids and Charlevoix. Articles of association of the Traverse City St. Ry. Co., which will operate the railway in the city, were also filed. Capital $255,000.

Minneapolis, Minn.—The Minneapolis, St. Paul, Rochester & Dubuque Electric Traction Co. is reported organized for the purpose of constructing and operating an electric railway in Minnesota and Iowa. Capital $25,000,000. Eben Winthrop Freeman, of Portland, Me., is Pres., and M. H. Boutelle, of Minneapolis, Minn., Secy.

New York, N. Y.—Bids will be received by Jas. W. Stevenson, Comr. Bridges, New York City, until Oct. 24, for the construction of train spacing signals for the elevated railway tracks of the Brooklyn Bridge.

Albany, N. Y.—The United Traction Co., E. S. Fassett, Gen. Mgr., is reported to have awarded to M. F. Dollard the contract for excavating, filling and forming the 33-ft. strip owned by the company on the south side of the continuation of Western Ave., preparatory to laying tracks.

Wooster, O.—It is reported that all of the right of way has been secured for the Wooster & Mansfield Electric Ry. Co., which is to connect Wooster with Mansfield, and that the road will be built. The road as projected touches Jefferson, Reedsburg, New Pittsburg, Hayesville and West Mansfield, places that have neither railway nor traction outlets. David Collier, of Plimpton, O., is Vice-Pres.

Mangum, Okla. The Southwestern Interurban Ry. Co., has been chartered to build a line of interurban railway from Mangum to Hollis, by way of Francis, a distance of 37 miles; also to Granite and Cordell, 40 miles, with a branch line from Granite to Hobart, 15 miles; from Mangum to Altus, 27 miles; the total mileage of all lines being 119. Capital $1,000,000. Directors, W. T. Funderburk, D. J. Doyle, E. E. Pinkerton, and others, all of Mangum.

Oklahoma, Okla.—A charter is stated to have been issued to the Oklahoma Central Interurban Ry., Telephone, Telegraph, Light & Power Co., which proposes to build interurban electric lines, connecting practically all of the towns and cities of any importance in the two territories. Capital $5,000,000. Its main line is to run from South McAlester northwest to Cheyenne, passing through Holdenville, Wewoka, Shawnee, Oklahoma City, El Reno, Geary and Weatherford. The distance is 500 miles and the estimated cost of construction $17,000 per mile. Branches are also to run from McAlester north to Checotah and Muskogee; south from McAlester to Atoka and Durant; north from Holdenville to Okemah and Okmulgee; south from Wewoka to Ada; north from Shawnee to Chandler and Stillwater; south from Shawnee to Pauls Valley, Davis and Ardmore; north from Oklahoma City to Guthrie and Perry; south from Oklahoma City to Norman and Purcell; north from El Reno to Kingfisher and Enid; south from El Reno to Chickasha, and west to Anadarko and Lawton; south from Weatherford to Cordell, Hobart and Mangum, and north to Sayre and Elk City, 528 miles in all. Incorporators, R. N. Wade, H. H. Codington, of Weatherford; Leon Brown, of St. Louis, Mo.; G. M. Watson, of Nevada, Mo.; Louis Landmann, of Jefferson City, Mo.; C. S. Freeman, of Denver, Colo.; B. F. Sharp, of Memphis, Tenn., and others.

Amended articles of incorporation are stated to have been filed with Territorial Secretary for the Oklahoma City Street Ry. Co., providing for interurban extensions north to Guthrie, south to Norman, and west via Spencer or Choctaw City to Yukon, a total distance of 125 miles. Capital $3,000,000. Incorporators, John W. Shartel, Anton Classen, Geo. H. Brauer and others.

Butler, Pa.—An application will be made by John Daly, W. J. Hogan, W. Criswell, W. G. Stern and E. W. Dewey for the charter for the Butler & Chicora Str. Ry. Co. It is proposed to construct a line from Butler to Carns City, East Brady and Kaylor.

Philadelphia, Pa.—The Philadelphia Subway Terminal Ry. Co. is reported to have secured a charter to construct a subway for railroad purposes in Broad St. from the north side of Filbert St. to a point near North Philadelphia Station, where it will connect with the Pennsylvania's Germantown and Chestnut Hill branch. The estimated cost is from $10,000,000 to $15,000,000. The length of subway is 4 miles.

Chambersburg, Pa.—Ordinances are stated to have been passed by the Town Councils of Chambersburg and Greencastle, granting franchises to the Chambersburg, Greencastle & Waynesboro St. Ry. Co. (J. M. Wolff, Genl. Mgr., Waynesboro) for the proposed extension from Newcastle to Chambersburg and over certain streets in Chambersburg.

Bradford, Pa.—John Looker is reported to be the head of a petition being circulated and already freely signed, the object of which is to collect about $10,000 as a bonus to be offered the Western New York & Pennsylvania Traction Co. for the construction of a line between Bradford and Eldredge.

Bentleyville, Pa.—Application is stated to have been made to Gov. Stuart for a charter for the Finleyville Southern St. Ry., which desires to build a 14-mile line from Finleyville to Bentleyville via Hackett and other towns. Several bridges will be built along the line. Incorporators, M. J. Hayden, T. M. Hayden, J. E. Hayden, H. B. Hayden and S. C. Wilson.

Gettysburg, Pa.—It is stated that surveyors are again in the field in the interests of the Gettysburg-Mt. Holly Springs Ry. project. This line was originally surveyed a few years ago, but construction work was not started. It will connect at Mt. Holly with the Carlisle & Mt. Holly Ry. Co., thus providing electric railway service between Gettysburg and Harrisburg, a distance of about 50 miles.

Sunbury, Pa.—The Town Council is stated to have granted a franchise to the Sunbury & Selinsgrove Electric Ry. Co. which will enable that company to operate on Front St. and Market Sq.

Seattle, Wash.—The City Council is reported to have passed an ordinance granting franchises to the Loyal Ry. Co. to lay, maintain and operate tracks and equipment for street railway lines in Seattle.

Vancouver, Wash.—The Washington Ry. & Power Co. is reported to have been reorganized. E. M. Rands, Pres.; H. C. Phillips, Treas., and M. M. Conner, Secy. It is the purpose of the company to continue the work of the old company. The company estimates that it will cost about $75,000 to finish the city system and the first 4 miles extension.

Grafton, W. Va.—It is stated that the Grafton Traction Co., which is building a street railway over the principal streets of Grafton proper, will extend its lines to both West Grafton and South Grafton.

Oshkosh, Wis.—The Common Council is stated to have passed an ordinance permitting the Winnebago Traction Co. to place a double track on High St.

Sarnia, Ont.—The Town Council has passed a by-law authorizing the Sarnia St. Ry. Co. to construct a street railway from Wellington St. to the C. M. Railway depot, a distance of about a mile and a half. The company will also lay double tracks on Front St. and along Wellington to Vidal. The company will be on the market for rails, cedar ties, poles, wire, bonds and electric equipment for the overhead work.

**Items marked thus give the names of parties awarded contracts.*

Hamilton, Ont.—The City Council is stated to have passed the by-laws granting the Hamilton, Waterloo & Guelph Ry. a franchise for a railway to Guelph and Galt.

Calgary, Alta.—Bids will be received by S. J. Clarke, Chmn. Pub. Wks. Com., Calgary, until Nov. 1 for the following: (a) For the construction of about 12 miles of street car track and overhead trolley work in the city; (b) building a steel bridge with concrete abutments over the Elbow River; (c) for 6 semi-convertible cars with electrical equipment, etc. Separate bids to be submitted on each of the above. R. E. Speakman, City Engr.

RAILROADS.

Notes Arranged Alphabetically by States.

Little Rock, Ark.—The St. Louis, Iron Mountain & Southern R. R. Co. (A. De Bernardi, Gen. Supt., Little Rock), is reported to have decided to expend about $75,000 in trackage and yard improvements in and near Little Rock.

Engr.of the Western Pacific, who has been at work with Engineer Jasper on plans for a levee for the City of Oroville, or a modification of the plans adopted some time ago, is stated to have reported upon a system of works that will cost about $50,000 and take only about 6 weeks to construct.

Oakland, Cal.—It is reported that it has been decided to recommend to City Council that a bond issue be submitted to the voters for municipal wharves in East and West Oakland; the estimated cost of the proposed wharves and warehouses is about $1,207,600.

Berkeley, Cal.—Bids will be received until Oct. 26 by J. V. Mendenhall, Clk. Bd. Town Trus., for constructing a wharf and approach thereto in San Francisco Bay.

Denver, Colo.—At a meeting of the Continental Tunnel Co., at the offices of Bartels & Blood, in the Continental Bldg., on Oct. 3, it was decided to issue $5,000,000 bonds to be used to construct tunnel through James Peak. Engineers are reported to be making a survey and topographical map of James Peak. When completed and used by the Moffat R. R., the time will be cut between Denver and Salt Lake City by 12 hours. Col. D. C. Dodge, Chmn. Executive Com.

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Oct. 15 to furnish at the navy yards and naval stations the following supplies: Boston, Mass.: Sch. 338——Milling machines, bolt-threading and nut-tapping machine, engine lathes, upright drills, sensitive drills, buffing and strapping machine, hydrostatic press, sawing, slotting and metal-planing machines, boring and turning mill, etc. Sch. 361—Steel nuts, nickel steel. Sch. 365—Rolled bronze. Portsmouth, N. H.: Sch. 340—Steam gypsy, steering engine. Sch. 341—Scroll and re-saw, scroll sawing machine, planer and jointer. New York, N. Y., etc.: Sch. 339—Screw, punching and shearing machines. Sch. 342—Structural steel. Sch. 357—Transformers. Sch. 361—Expanded metal, steel forging. Sch. 364—Steel springs. Sch. 366—Brass pipe and fittings, valves. League Island, Pa.: Sch. 362—Ash, cedar, mahogany, white oak, etc. Sch. 368—Steel bolts and nuts, drills and drilling machines, pneumatic drills and hammers, oil filters and pumps. Sch. 369—Rolled bronze, bar iron and steel, cold-rolled steel, etc. Sch. 372—Brass and lead pipe, valves, etc.; brass and iron pipe fittings. Naval Academy, Annapolis, Md.: Sch. 343—Screw-cutting lathe. Sch. 367—Portland cement, paving blocks, granite curb, gravel, brick. Washington, D. C.: Sch. 338—Planing and milling machines. Sch. 360—Chain drive nickel steel chain, wire rope, machine steel, nickel steel, forgings and castings, brass tubes, black and galvanized iron pipe. Norfolk, Va., etc.: Sch. 338—Steam hammer. Sch. 339—Cutting-off and grinding machine. Sch. 340—Steam gypsy, steering engine, steam windlass. Sch. 362—Ash. Sch. 364—Brass bolts, etc.; pneumatic drill and hammer, valve reseating machine, etc. Sch. 365—Sheet brass and copper, rolled bronze, steel. Sch. 366—Brass tubing, pipe fittings. Pensacola, Fla.: Sch. 337—Wood planing and mortising machines, wood turning lathe, mortising and relishing machine, grooving head. Sch. 341—Drilling outfit, drill press, screw-cutting lathes, bolt-threading machine. Charleston, S. C.: Sch. 361—Motors, conduit and elbows, snaking wires, electrical supplies. Also until Oct. 29: Mare Island, Cal.: Sch. 375—Electrical fittings. Sch. 376—Cable chain. Sch. 377—Drill chucks and drills. Also until Oct. 22, Mare Island, Cal. Sch. 336—Rotary blower. Also until Oct. 29: Puget Sound, Wash.: Sch. 377—Fir, sheet brass, galvanized steel tubing, etc. Applications for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster Genl., U. S. N.

**Savannah, Ga.*—Bids were opened on Sept. 30 by Maj. I. C. Sanford, Corps Engr., U. S. A., at Philadelphia, Pa., for constructing a steel-hull, 16-in. pump dredge for Savannah River, to be delivered at Savannah, Ga., and the bid of the Ellicott Machine Co., of Baltimore, Md., at $117,700, to be delivered in 7½ months, has been recommended for acceptance.

**Cerro Gordo, Ill.*—Bids were opened on Sept. 27 by the Drainage Comrs. of Union Drainage Dist. No. 3, of the towns of Cerro Gordo and Willow Branch, in Pratt County (J. C. Locher, Clk.), for constructing 11 miles of open ditch involving the removal of 210,410 cu. yds. of earth, and the same was awarded to Morgan & Co., of Bellefontaine, O., at 7.92 cts. per cu. yd. W. J. Day, Engr., Bement.

**Onawa, Ia.*—C. E. Blanchard, Co. Aud., writes that the contract for excavating McCandlass ditch, about 280,681 cu. yd. (bids opened Oct. 1) has been awarded to Callanan Bros. & Katz, Bee Bldg., Omaha, Neb., at 8.69 cts. per cu. yd.

Des Moines, Ia.—The Bd. of Aldermen is reported to have authorized the Bd. of Pub. Wks. to enter into a contract immediately for a section of improvement of Des Moines River, to extend from S. 5th St. bridge to the Great Western R. R. tracks, across the Des Moines River. This section will eliminate the forks of the two rivers and prevent the flooding of the extreme lower sections of city. Probable cost of work, $100,000.

Topeka, Kan.—The City Engr. is reported to have submitted to City Council plans and specifications for a drainage ditch from Topeka Cemetery grounds to the Shunganunga, down 11th St., which he estimates at $16,054.

**New Orleans, La.*—The Orleans Levee Bd. is reported to have on Sept. 30 awarded to A. Ruppel the contract for two additional stretches of levee to be built in the 3d Dist., one from Louisa to Desire, and the other from Mazant to Poland St.; total cost is estimated at $115,000. He bid for earth taken near levee 41½ cts. per cu. yd., and with earth taken from away 94½ cts. on both contracts, and $70 per M ft. for creosoted piling for levee and revetment.

Chalmette, La.—Bids will be received by Col. E. H. Ruffner, Corps Engrs., U. S. A., New Orleans, until Nov. 14 for the compeltion of a monument to memory of American soldiers, as advertised in The Engineering Record.

Bar Harbor, Me.—The following are the bids opened on Sept. 10 at the office of Maj. Geo. E. Zinn, Corps Engrs., U. S. A., Portland, for the construction of breakwater at Bar Harbor (price given per ton): Philip H. Doyen, of South Portland, Me., $1.27; E. S. Belden & Sons, Hartford, Conn., $1.13, and Sylvester I. Hill, Chebeague, Me., $1.23½.

Manchester, Mass.—Bids will be received until Oct. 18 by the Massachusetts Harbor & Land Comrs. at Boston (Frank W. Hodgdon, Ch. Engr.) for dredging channel in Manchester Harbor, in the town of Manchester. The work includes the dredging of about 14,500 cu. yds., situ measurement, of material to make about 2,000 ft. of main channel in the harbor 6 ft. deep at mean low water and 75 ft. wide on the bottom.

Boston, Mass.—The only bid received and opened on Sept. 30 by Maj. Edw. Burr, Corps Engrs., U. S. A., 25 Pemberton Sq., Boston, for dredging in Mystic River, about 13,000 cu. yds., was submitted by the Bay State Dredging Co., of Boston, at 49½ cts. per cu. yd.

Detroit, Mich.—Bids will be received by Col. Chas. E. L. B. Davis, Corps Engrs., U. S. A., until Nov. 20, for rock and earth excav. at Sect. 3, Plan B, Detroit River, as advertised in The Engineering Record.

Pontiac, Mich.—Bids will be received until oct. 21 by the Bd. Pub. Wks. (H. G. Mormon, Supt.) for 1 continental boiler of 200 h.p. with Morrison suspension furnaces; steam pressure 160 lbs., as advertised in The Engineering Record.

**Minneapolis, Minn.*—The Otis Elevator Co., of New York, N. Y., is reported to have secured the contract to install new hydraulic passengers in the Metropolitan Life Insurance building; cost, $42,000.

Ivanhoe, Minn.—Bids are wanted, it is stated, until Oct. 25 (readvertisement), for constructing Ditch No. 15. R. H. Sisson, Co. Aud.

Minneapolis, Minn.—See "Schools."

Natchez, Miss.—The U. S. War Dept. at Washington, D. C., is reported to have approved plans for an expenditure of $100,000 for the protection of Natchez harbor. Preliminary surveys of the river bank, and sounding of the river along the front have been made.

Clayton, Mo.—Press reports state that bond has been filed and approved in the County Court for the construction of a drainage ditch through the Florissant Valley, beginning at Natural Bridge road and extending for 13 miles, to the channel of Cold Water Creek, half a mile from Missouri River, near Florissant. Henry Chomeau, Herman Tegetoff and John H. C. Ruegg have been appointed viewers to make a report early in November. County Surveyor Wm. Elbring will estimate the cost of the enterprise.

Kansas City, Mo.—The Park Board on Sept. 30 approved the plans of Geo. E. Kessler, Landscape Archt., for the improvement of Brush Creek and Mill Creek Valleys. The plans provide for straightening Brush Creek in places so that the kinks will be taken out and channel kept within city limits. This will enable city to control stream for drainage purposes. On each side of creek from Wornall Road to Prospect Ave. roadways are to be built. The land to be condemned will not be less than 300 ft. wide at any place along the parkway.

St. Louis, Mo.—A bond is reported to have been filed and approved in the St. Louis County Court on Sept. 23 for the construction of a drainage ditch through the Florissant Valley from Bridgeton to the Missouri River, and Henry Choumeau, John H. C. Ruegg and Herman Tegethoff were appointed as viewers of the district. County Surveyor Wm. Elbring was instructed to make a survey and an estimate of cost of ditch. The drainage canal is to be 15 miles in length, beginning at Natural Bridge Road, near Bridgeton, and extending in a northeasterly direction to the New Jamestown Road, half a mile from the Missouri River, near Florissant. The report of the surveyor and viewers is to be made to the court on Nov. 4.

Atlantic City, N. J.—Bids will be received by the Streets, Walks and Drives Com. (Wm. Riddle, Chmn.) until Oct. 28 for the construction of a boardwalk along Ocean front between Pacific and Connecticut Aves., about 2,920 ft. in length, and to be constructed with a wood floor, or reinforced concrete joists, supported by reinforced concrete girders and columns, as advertised in The Engineering Record. J. W. Hackney, City Engr.

**New York, N. Y.*—We are informed that the Maryland Steel Co., 71 Bway., has secured the contract for furnishing material and building freight sheds on piers Nos. 60, 61 and 62, and on the adjacent bulkhead platforms or lateral extensions bet. W. 19th and W. 22d St., North River, in the Chelsea section (bids opened Aug. 21 by the Dept. of Docks and Ferries) for $1,543,960.

The following are the bids opened on Oct. 3 by the Park Board (Moses Hermann, Pres.) for furnishing material and constructing a stone wall surmounted by an iron fence in the Botanical Garden, Bronx Park: Joseph di Benedetto, $24,463; Matteo Capobianco, $21,800; Cooper & Evans Co., $18,400; Thos. Crimmins Contr. Co., $26,500; W. H. Danby, $20,000; Guidone & Galardi Co., $17,000; Hahn & O'Reilly, $23,900; Wm. Horne Co., $18,600; Kelly & Kelley, Inc., $18,297; J. M. Knopp, $22,-

**Items marked thus give the names of parties awarded contracts.*

528. John B. Malatesta, $17,000; McHarg Barton Co., $1?,170; Louis Pepe & Co., $30,005; Thompson and Kelsey, $1?,773, and Florindo Tolosi, $25,600.

Saugerties, N. Y.—The following are the bids opened on Sept. 30 by Col. John G. D. Knight, Corps Engrs., U. S. A., N. Y. City, for 640 cu. yds. rock removal and 6,800 cu. yds. covering over rock (price given per cu. yd. prism meas.): P. Sanford Ross, Inc., 277 Washington St., Jersey City, N. J., $2.12, and R. G. Packard Co., 130 Pearl St., N. Y. City, $2.

New York, N. Y.—The following are the bids opened on Sept. 23 by Col. John G. D. Knight, Corps Engrs., U. S. A., New York, for furnishing (*a*) rubble stone, 2,000 cu. yds, and (*b*) quarry spalls, 10,000 cu. yds., for constructing and repairing dikes in Hudson River, N. Y.: Bouker Contr. Co., 21-24 State St., *a* $1.54, *b* $1.55; Thos. R. McCann, 840 Washington Ave., Brooklyn, *a* $1.50, *b* $1.55.

Ft. Schuyler, N. Y.—Bids will be received until Nov. 1 by Lieut. Chas. L. Fischer, Q. M., U. S. A., for repairing the quartermaster's wharf.

**Fairport, O.*—Lieut. Col. Mc. D. Townsend, Corps Engrs., U. S. A., Cleveland, writes that the contract for extending west breakwater at Fairport harbor (bids opened Sept. 10) has been awarded to Sea Coast Constr. Co. 225 5th Ave., New York, N. Y., for $147,037.

Toledo, O.—The Otis Elevator Co., of New York, N. Y., bid for installing passenger elevator in post office at Toledo $7,870.

Ironton, O.—See "Sewage and Sewage Disposal."

Bowling Green, O.—The County Engineers of the four Counties of Putnam, Wood, Henry and Hancock, are reported to have prepared specifications for the dredge work on Ditch 12 of the Jackson cut-off; the work will cost about $180,000.

Springfield, O.—It is stated that bids are wanted until Oct. 22 for $17,500 Buck Creek improvement bonds. Frank A. Crothers, City Clk.

Panama.—See "Power Plants, Gas and Electricity."

Ft. Greble, R. I.—Bids will be received until Oct. 19 by Capt. Willis C. Metcalf, Q. M., U. S. A., 209 Thames St., Newport, for repairs to quartermaster's wharf and ferry slip at Ft. Greble.

Port Royal, S. C.—Bids will be received until Oct. 16 by Capt. Chas. C. Clark, Acting Ch. Q. M., U. S. A., Atlanta, Ga., for one 30-h. p. boiler f. o. b. cars Port Royal, S. C.

Dallas, Tex.—Bids will be received by Capt. W. P. Wooten, Corps Engrs. U. S. A., until Nov. 18 for building locks and dams 2 and 4 on Trinity River, as advertised in The Engineering Record.

**Bremerton, Wash.*—J. Ryan, of Seattle, is reported to have secured the contract for the construction of an extension to the seawall at eastern end of Navy Yard, for about $30,000.

**Puyallup, Wash.*—A. W. Tweeden & Co., of Tacoma, are reported to have secured the contract for dredging and bulkheading Puyallup River, for about $450,000.

Marinette, Wis.—Bids will be received until Oct. 19 (readvertisement) by the Comrs. of the First Drainage Dist. of Marinette Co. at the office of Wm. C. Campbell, Secy., for constructing 12 ditches in said dist., from ¼ to 4 miles in length, with a total length of 11 miles, requiring 7,600 lin. ft. and 49,270 lin. ft. ditch, with a width of 6 ft. and 4 ft., respectively, at the bottom; about 145,000 cu. yd. excav. A. L. Hillis, City Engr.

St. Alphonse, Que.—Bids will be received until Oct. 26 by Fred Gelinas, Secy. Dept. Pub. Wks., Ottawa, Ont., for constructing an extension to the wharf at St. Alphonse. J. C. Tache, Resident Engr., Chicoutimi.

Wellington, N. Z.—See "Railroads."

CURRENT NEWS SUPPLEMENT

OCTOBER 19, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

American Society of Civil Engineers. Secretary, Charles Warren Hunt, 220 West 57th St., New York.

American Society of Mechanical Engineers. Secretary, Calvin W. Rice, 29 West 39th St., New York.

American Institute of Electrical Engineers. Secretary, Ralph W. Pope, 29 West 39th St., New York.

American Institute of Mining Engineers. Secretary, R. W. Raymond, 29 West 39th St., New York.

National Fire Protection Association. Secretary, W. H. Merrill, Jr., Chicago.

American Institute of Architects. Secretary, Glenn Brown, Washington, D. C.

Association of Engineering Societies. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

American Society of Heating and Ventilating Engineers. Secretary, W. M. Mackay, 113 Beekman St., New York.

Canadian Society of Civil Engineers. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

Society for the Promotion of Engineering Education. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

American Society for Testing Materials. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

American Society of Municipal Improvements. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y.

Association of Railway Superintendents of Bridges and Buildings. Secretary, S. F. Patterson, Concord, N. H.

American Railway Engineering and Maintenance of Way Association. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

American Water Works Association. Secretary, J. M. Diven, Charleston, S. C.

American Street and Interurban Railway Association. Secretary, Bernard V. Swenson, 29 West 39th St., New York.

American Foundrymen's Association. Secretary, Richard Moldenke, P. O. Box 432, New York.

Engine Builders' Association of the United States. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

American Public Works Association. Secretary, W. H. Flint, Chattanooga.

Association of American Portland Cement Manufacturers. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

National Association of Cement Users. President, Richard L. Humphrey, Harrison Building, Philadelphia.

American Society of Refrigerating Engineers. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

American Public Health Association. Secretary, Dr. C. O. Probst, Columbus, O.

THE KEY WEST EXTENSION OF THE FLORIDA EAST COAST RY.

The projected extension of the Florida East Coast Ry., from Miami to Key West, often referred to as a railway over the ocean, has advanced to such a stage that trains are to be run over it by next January as far as Knight's Key—two-thirds of the distance from Miami to Key West. The portion to be completed by that date includes several of the most interesting engineering features of the road, namely, the fill across the Everglades, the drawbridges at Jewfish Creek and at Indian Key Channel, the marl fills across the long openings between Upper Matecumbe and Lower Matecumbe and between Lower Matecumbe and Long Key, with several stretches of trestle across channels which will ultimately be filled with rock, the Long Key Viaduct—a reinforced concrete structure two miles long, carrying the train 30 ft. above the water—besides many miles of excellent embankment.

The road leaves Miami and runs through Biscayne Pine Land, crossing a few small glades, until it comes to Homestead, the most southern station on the ridge that defines the main land of Florida. To this point the road has been in operation for several years. Upon leaving Homestead, which is an agricultural center of growing importance, the road soon enters the glades, great prairies of meadow land, flooded with fresh water much of the year and interspersed with "hammocks," or higher spots, covered with woody growth. The hammocks break the monotony of the meadows, and render the landscape charming.

This part of the road was constructed on a fill thrown up by two dredges, one working on each side of the embankment, and digging its way from Homestead toward the bay. The dredges floated in the ditches they dug. In many places the hard rock underlying the marl was so close to the surface as to make the floating of the dredges over it difficult. Especially shallow draft dredges were built for this work.

The glades in this part of Florida dip gently toward the south and the water covering them becomes deeper as the road approaches the coast. The inlets and bayous also become more numerous, affording sufficient change to stimulate the fancy of the traveler, until the road makes a turn to the eastward and enters a key which crosses over from the main land to Key Largo, the largest and highest of the Florida Keys.

Immediately before entering Key Largo, the train crosses the drawbridge at Jewfish Creek, one of the long tidal streams in which yachting parties in Florida waters take such delight. To go through Jewfish Creek or Steamboat Creek on a boat carrying a searchlight at night is a treat nobody having experienced it will ever forget.

Key Largo commences immediately across the bridge, but it contains a lake of considerable size, not known to exist until actual construction on the railroad was commenced. The road crosses the lake on an embankment which gave much trouble in the construction. The material available for construction here proved to be the fiber of mangrove roots, deposited many feet deep. It made a levee upon which a crossing was finally effected, and a dressing of rock superimposed, both to form a roadbed and to prevent the bank itself from burning up.

Key Largo is an island of some importance, as it produces a quantity of fruit. It contains several settlements on its outer coast, both North and South of where the road enters, which is near to the middle of the Key. After reaching the high ground of the Key the road turns to the southwest, and from this place on follows the keys, with water of the Bay of Florida or the Atlantic ocean almost always in sight. The grade is carried high enough to be above hurricane tides, which requires a fill at most parts of the line, though there are a few slight cuts here and there, and one or two deeper cuts where rock is quarried for ballasting the road. The rock is coral, and beautiful specimens may be gathered in the quarries. On the ocean side of the keys there is usually found a sand beach, with a sand ridge thrown up by past storms, in which cocoanut trees have been planted and found a permanent lodging. These trees can be seen a long way out at sea, and are the only part of the Florida Keys that usually comes in sight of the traveler bound from New York to southern ports by water. An exception to this in future will be trains upon the embankments, which will appear to passengers on ships at sea to be running on the water at the horizon. The Long Key Viaduct, rising 30 ft. above water level, will also be seen a considerable distance at sea, with its chain of 180 arches.

The temporary terminus of the road for this winter's travel will be the Knight's Key Dock, to which ships drawing 19 ft. of water may approach. It was built for the purpose of receiving masonry supplies for the viaduct work, and has been discharging this function for some time. It will be this winter the most southern railway terminus in the United States. At the present writing, the Long Key Viaduct is the southern terminus of the road for construction trains, though comparatively little remains to be done between that structure and Knight's Key.

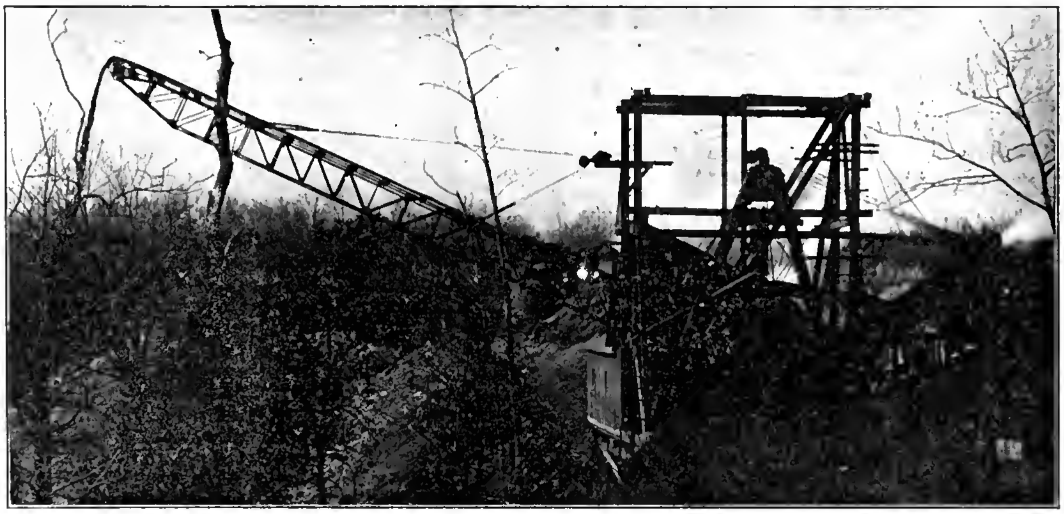
AN EXCAVATOR FOR HEAVY STRIPPING.

The accompanying illustration shows a specially designed stripping excavator built by The Bellefontaine Foundry & Machine Co., of Bellefontaine, Ohio, for G. W. Prutsman, Danville, Ill., who has a contract with the Consumers Coal Co., of that place, to strip 35 acres of coal lands. The proposition is to remove from 38 to 40 ft. of overburden, of which 16 to 24 ft. is shale and the balance gravel and clay at a single cut, placing all the material to one side, leaving a bottom width of 36 ft. of clean coal ready for removal.

The car deck is 30 ft. wide by 56 ft. long, mounted on four special trucks moving on two tracks, the tracks composed of the usual short heavy sections of rails laid loose on the ties and tramed with bridle bars. The forward trucks are at the immediate front end, while the rear ones are set under some 8 ft. from the rear. To allow for inequality of the coal surface on which the tracks are laid, each truck has one swivel axle so that the load, while equal on each wheel, is carried on three points. The truck bodies are built solid of heavy beams, and the wheels are 39 in. in diameter and weigh 900 lbs. each, having double flanges 2¼ in. thick, amply strong to crowd the rails of the two tracks into proper relation to each other. When making short curves one or two of the rails are laid directly on the ties and the other on steel plates on the ties. Unusually large bolster plates bear into bolster plate sockets in the trucks, there being no attachments of any kind otherwise, so that the trucks can be swiveled short enough to turn the entire machine at right angles in less than twice its length if desired. To give the entire car body a three-point suspension on the four trucks the rear portion of the car is carried on a 5-in. swivel pin in the center of a large bolster, which in turn rests on the two rear trucks.

The makers' standard double engines mounted in a single bed are used on all movements. The hoist engines are 10x12-in., driving the drums through heavy steel gears with a 5.75:1 ratio. The backing drum is used for hoisting or changing the elevation or angle of the elevating conveyor and not in any way in connection with the handling of the bucket. The usual steam clutches with outside bands wood lined, are used. The swinging rig is an 8x8-in. throttle reversing engine, while an engine of the same size and style built in a cast steel bed is used on the boom as a thrusting engine. The conveyor feeder and conveyor are driven by an 8x10-in. single cylinder engine. Steam at 125 lbs. pressure is provided for all engines from an open bottom locomotive type boiler 60 in. in diameter by 21 ft. long, containing 88 3-in. tubes and rated at 100 h.-p.

The boom is 35 ft. from center to center, of solid steel beam and wood combination. The dipper handle is of the same style of construction 24 ft. long. The 2-yd. dipper is built entirely of wrought and forged material



AN EXCAVATOR FOR HEAVY STRIPPING.

and is fitted with four heavy teeth. It is handled by 1½ in. chain.

The swinging circle is 12 ft. in diameter made of solid plate and beam construction and is handled by double 1-in. cables to the swinging rig. The deck casting on which circle rests is the makers' safety type.

After excavating the material with the dipper, it is cast into a large steel hopper at one side and near the front end of the machine. From the bottom of this hopper it is carried in a uniform rate and depth by an all-steel cross feeder about 12 ft. center to center to a small hopper at the lower end of the elevating belt proper. This is a 40-in. belt running on a steel arm 105 ft. center to center, which is supported on a tower 488 ft. high above the deck. This tower is located cross-wise on the car body and just back of the A frame. The dumping clearance at the outer end of the conveyor is nearly 60 ft. above the track.

In the ordinary operation of the machine with the 24-ft. handle, all very large or heavy pieces, stumps and logs are easily cast into the space from which the coal has been removed, direct from the hopper. Two jacks, one on either side directly under the elevator tower and directly attached to the car body without an overhanging arm and resting on the track just back of the front trucks, prevent oscillation of the elevator or car to any extent when the machine is in operation.

The machine is easily moved in either direction by steel rope tackles hooked directly into the back of the dipper. Special forged track grabs which seize the rails just back of the forward trucks serve as hitches or anchors. Changing the forward and rear blocks from truck to track or vice versa reverses the direction of the car when pulling at the dipper.

THE HART SECTIONAL COOLING TOWER AND SPRAY PREVENTER.

The principal difficulties experienced with open, natural-draft cooling towers have been the limited exposure of the water to the air currents, due to the spray in the outer portion of the tower blanketing the inner portions of the tower, and the loss of water in spray blown by the wind beyond the tower. These have both been eliminated, it is claimed, in the tower recently designed by B. Franklin Hart, Jr., & Co., New York. A new form of sectional cooling spray is used, having serrated edges, causing the water to fall from stage to stage in finely-divided streams, and yet permitting the general distribution of air currents throughout all portions of the tower between the trays. The trays are long, shallow troughs, a few inches in width, built in any length and located in the tower in stages with small spaces between edges. The entire construction is adapted to installation in old towers, which have proved of insufficient capacity or where tower construction is not permissible and it is necessary to install the system in ill-adapted spaces.

The spraying preventer construction involves the use of galvanized iron baffle plates or enclosures, hung outside the tower at each stage and on such sides as to catch the spray carried outside by strong prevailing winds. The baffles are hung some distance out from the tower so as not to interfere with the wind currents of ordinary intensity and are inclined inward toward the bottom, which is flanged into a gutter to collect the water and deliver it back to the tower again. These baffles are hung alongside the upper portions of the stages, there being a fine mesh screen enclosure around each group of trays lower down.

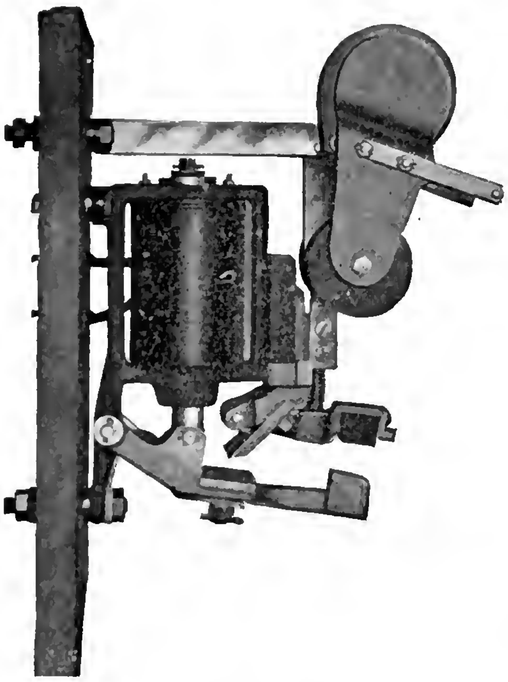
A NEW CONTACTOR.

The Cutler-Hammer Mfg. Co., of Milwaukee, makers of electric controlling devices, has recently placed on the market an improved type of contactor for handling main-line currents where the nature of the service is severe. In such cases controllers employing sliding contacts cannot always be relied upon to handle the main-line current, and it is customary to employ a controlling panel consisting of a number of contactors, this panel in return being controlled by a master controller designed to regulate the secondary current which energizes the solenoids of the contactors.

The contactor is a compact piece of apparatus provided with powerful blow-out magnet. The main line circuit is closed by the solenoid raising a pivoted arm carrying a thick copper plate, to a point where contact is made with a pair of stationary, laminated copper brushes. Arcing on this contact is prevented by providing an auxiliary copper and carbon contact in the field of a powerful blow-out magnet, which extinguishes the arc incident to the breaking of the circuit. This auxiliary contact closes before the main contact is made and opens after the main contact is broken, thus effectually preventing any sparking on the main contact.

Another improvement is the pivoting of the blow-out shields, permitting these to be raised, as shown in illustration, so as to expose the auxiliary carbon and copper contact. In earlier types of contactors these shields were rigidly fastened in their normal position, completely covering the copper and carbon contacts, and rendering access to these difficult.

The present construction makes renewal of either contact, or of the coiled spring (visible just above the carbon contact) a matter of a few moments only. At a recent test at one of the largest Pittsburg steel mills a 220-volt circuit was opened and closed by a contactor of this type 88,000 times, before renewal of the copper and carbon contacts became necessary, and on a test to determine time required for repairs, the old contacts were removed and new ones inserted in less than two minutes.



A NEW CONTACTOR.

PERSONAL NOTES.

Alexander M. Fox, the oldest director of the Pennsylvania R. R., died recently at his home in Philadelphia.

Mr. Franklin B. Ware, of New York City, has been appointed State Architect of New York, succeeding the late George L. Heins.

Mr. John J. Rooney, Jr., has been appointed an assistant engineer in the City Viaduct Department of Cincinnati, O., succeeding Mr. Thomas Chuck, resigned.

Jonathan Wainwright, president of the Drake & Stratton Co., contractors, Philadelphia, Pa., died at his summer home at Ogdensburg, N. Y.., Oct. 11, aged 56 years.

The office of Mr. E. P. Dawley engineer of construction of the New York New Haven & Hartford R. R., has been removed from New Haven to Providence, R. I.

Major William L. Sibert, corps of engineers, U. S. A., member of the Isthmian Canal Commission, was in Pittsburg recently on business connected with the canal project.

Messrs. Harold Wallem and C. F. Schrotte, of the engineering department of the Siemens-Schuckert Works, of Berlin, are on a tour of this country, studying high-tension electrical developments.

Mr. H. H. McGee has been appointed engineer in charge of new construction and maintenance of bridges, buildings and structures of the Ulster & Delaware R. R., with headquarters at Rondout, N. Y.

Robert H. Fleming, general manager of the Southern Contracting Co., a civil engineer closely associated with the construction of several railroads during the last decade, died at his home in Ludlow, Ky., Oct. 8, aged 65 years.

Mr. O. M. Shepard, formerly general superintendent of the New York, New Haven & Hartford R. R., who retired from that position Oct. 1, has been appointed general assistant to Mr. John F. Stevens, operating vice-president of the company.

Mr. D. C. Newman Collins, consulting engineer and industrial architect, 29 Broadway, New York City, has recently issued a paper discussing the details of various classes of structures and the materials and methods employed in their construction.

Mr. F. G. Hoffman, city engineer of Marion, Ill., and Mr. R. E. Townsend, formerly of the engineering corps of the Mexican Central Ry. Co., have entered into partnership, to do a general engineering and contracting business, with offices at Marion.

Mr. Edmund Van Hoesen, formerly deputy state engineer and surveyor of New York, and recently employed by the New York State Public Service Commission as an expert on railway accidents, has resigned the latter position to become chief engineer of the Tonopah & Goldfield R. R.

The consolidation of the bureaus of water and filtration of Philadelphia, that has long been pending, was authorized by the Council Oct. 10. Mr. F. C. Dunlap, formerly at the head of the Bureau of Filtration, is to be chief of the consolidated bureaus, which will be known as the Bureau of Water.

Mr. Clarence W. Hubbell, civil engineer to the Board of Water Commissioners of Detroit, Mich., has been engaged to manage the water-works of Manila, P. I. Mr. George H. Fenkell, civil engineer to the Commissioners of Water-Works, Erie, Pa., has been appointed to succeed Mr. Hubbell at Detroit.

Prof. C. B. Stewart, of the University of Wisconsin, calls attention to the fact that by an oversight on the part of this journal the excellent article on his experiments with submerged tubes, printed in The Engineering Record of Sept. 28, was not stated to be an abstract of a forthcoming bulletin to be issued by the university.

Mr. W. E. Leland, mechanical engineer, Merchants' Exchange, San Francisco, Cal., has completed plans for the power plants and heating, ventilating and water supply systems for the Alaska Building, San Francisco, and the Oakland Bank of Savings Building. He is preparing plans for the ventilating system of the Oakland Theatre Building.

Mr. Walter B Snow has opened an office at 170 Summer St., Boston, to undertake any kind of publicity work for manufacturers of machinery and allied products. His regular service will cover the conduct, on a salary basis, of the publicity departments of a limited number of non-competitive clients. Special service will be rendered to others in the form of general advertising, catalogue making, technical writing and investigation. Mr. Snow acquired an intimate acquaintance with engineering in general and publicity in particular during nearly twenty-five years connection with the B. F. Sturtevant Co.

The Association of Iron and Steel Electrical Engineers has been organized to further the application of electrical machinery to the iron and steel industry. At the first meeting, held last week in the rooms of the Engineers' Society of Western Pnnsylvania, Pittsburg, Pa., the following officers were elected: James Farrington, electrical superintendent of the La Belle Iron Works, president; J. C. Reed, electrical engineer Pennsylvania Steel Co., first vice-president; G. W. Sturgess, electrical superintendent Lackawanna Steel Co., second vice-president; G H Winslow, electrical engineer National Tube Co., secretary, and E. W. Yearsly, electrical engineer Midvale Steel Co., treasurer.

BUSINESS NOTES.

The Northern Engineering Works, Detroit, has furnished two 12-ton overhead traveling cranes to the Bingham Junction, Utah, plant of the United States Smelting Co. The same company has supplied the Oriental Metal Bed Co., Hoboken, N. J., with a Newton cupola.

The Fort Pitt Bridge Works, of Pittsburg, has opened an office in the Fisher Building, Chicago, in charge of Mr. A. R. Young, C. E.

The Ambursen Hydraulic Construction Co., of Boston, Mass., has commenced work on a dam 27 ft. in maximum height and 350 ft. long across the Sebasticook River at Winslow, Me. The owners are the Fort Halifax Power Co., Waterville, Me.

A large order for vises has just been placed with the Pittsburg Automatic Vise & Tool Co. by the Washington Terminal R. R. for its new shops in Washington. The vises are of the double and single swivel types.

Keuffel & Esser Co. have moved from their temporary quarters in San Francisco to their new building at 48-50 Second St. The blue printing plant in the new establishment has been given special attention so that work can be turned out rapidly.

The Pilling Air Engine Co., of Detroit, Mich., manufacturers of pneumatic hoists, locomotive turntable motors and compressed air hoisting machinery will change its name to the Detroit Hoist & Machine Co., a new corporation with capital stock fully paid of $50,000. The Pilling corporation will be retained with a nominal capital to protect the name and good will. Both companies will be controlled by the same management. A new plant has just been installed and is now in operation. Other improvements will be added in the near future, provision having been made by the purchase of three acres of ground on the Grand Trunk R. R. at Milwaukee Junction, in Detroit.

The Seaboard Portland Cement Co., which will build a plant at Alsen, N. Y. (clay and limestone proposition), has placed an order with the Lehigh Car. Wheel & Axle Works, Catasauqua, Pa., covering its entire pulverizing requirements, comprising forty-five 42-in. Fuller-Lehigh Pulverizer Mills, capable of pulverizing the coal, raw material and clinker for the 6,000 barrel plant.

The Jones & Laughlin Steel Co. is a recent purchaser of two Allis-Chalmers 1,000-kw. 6,600-volt generators wound for 25-cycle 3-phase, and designed to operate at 94 r. p. m. These units, together with a 600-kw. direct-

current generator 2,400-volt and operating at 110 r. p. m., will be installed in the new Aliquippa Works on the Ohio River several miles outside of Pittsburg. A new 500-kw. motor generator set, comprising a synchronous motor rated at 6,600 volts, wound for 3-phase, 25 cycles, and a 250-volt direct-current generator is also being added to the structural shop.

The General Fireproofing Co. has secured control of the sale of universal corner bead in the United States through a contract just effected with the manufacturers, the Rogers-Shear Co., Warren, Pa. Universal corner bead is used as reinforcement for plastered corners, and as it may be made to bend uniformly, it is also used as a finish around windows, on arches and ovals, doing away with the necessity of combustible wood trim. It also results in a saving of the plasterers' time as it gives straight and true lines. The material was used in the new Plaza Hotel, New York.

The Sandusky Portland Cement Co., of Sandusky, O., manufacturers of Medusa water-proof compound, report that this material was used in the following work: Concrete foundations and cement plaster coat on the light well in the new concrete office structure known as the Pacific Building, San Francisco; in the new plant for the District of Columbia Paper Mfg.. Co., Washington, D. C.; by the Aberthaw Construction Co., in concrete tanks and water filter for the Woronoco Paper Co., near Boston, Mass.; for stopping leaks in the Illinois Tunnel Company's concrete subway work, Chicago, Ill., and by James Stewart & Co., contractors, in the linoleum plant being constructed by them at Lancaster, Pa.

Some months ago the Cutler-Hammer Mfg. Co. announced the purchase of The Wirt Electric Co., of Philadelphia. The former company has now consolidated the Wirt business with that of its New York plant at Park Ave. and 130th St., where the manufacture of Wirt apparatus will be continued. Information concerning Wirt apparatus may be obtained from any of the Cutler-Hammer offices.

TRADE PUBLICATIONS.

A recent pamphlet of the Atlas Construction Co., St. Louis, Mo., describes the Atlas reinforced concrete chimney on the Wiederholt system. It makes use of a hollow tile construction, a double shell of hollow tile being erected in sectional form which serves as a mold and obviates the necessity of wooden forms. Illustrations are presented of a number of chimneys that have been erected in different parts of the country.

The results of tests of the spreading power of carbonizing coating, made by the Goheen Manufacturing Co., Canton, O., and of red lead and graphite are printed in a folder by the Goheen Company. The tests were made under the direction of Prof. Wm. T. Magruder, of Ohio State University, at the Columbus shops of the Pennsylvania lines, on rusty sheets, some freshly sandblasted, and some cleaned with wire brushes, and on new sheets coated with mill-oxide. The results show a decided advantage for carbonizing coating.

The American Steel & Wire Co. has published a handbook and catalogue of concrete reinforcement, consisting of 118 pages, 5½x9 in., bound in cloth. It contains chapters on the economic use and properties of reinforced concrete, cost and strength of concrete, reinforcing steel, protection of steel and iron from corrosion, fire protection, modulus of elasticity, the bonding of courses, freezing, cements, and finishing and facing concrete surfaces. Almost all of the reading matter is taken from the works of Buel and Hill, Taylor and Thompson, and Webb. Special attention is called to the merits of triangular mesh wire reinforcement, made by the company. Twenty-three pages are given to diagrams and tables of the weights, areas and sizes of triangular and square mesh wire reinforcement, safe bending moments, weights and thicknesses of slabs, and areas and weights of steel and iron wire. The bending moment diagrams and tables are based on Professor Talbot's tests and formulas. Suggested methods of using reinforcement, and views of buildings for which the American Steel & Wire Co. furnished the reinforcing steel take up 25 pages at the end of the book.

The latest edition of the book on Municipal Filtration published by the Pittsburg Filter Mfg. Co., Pittsburg, has 109 pages devoted to explanatory matter on the mechanical filtration of water and descriptions of the apparatus and plants built by the company. The successive steps of coagulation, sedimentation and filtration are taken up, and the conditions which cause variations in these steps of the purification process are discussed. The design of the apparatus for successfully carrying on the three stages of treatment are next taken up, and besides showing the company's designs by photographs and drawings, illustrations and descriptions of actual plants using the equipment are added. Of these plants the one at Harrisburg, Pa., with a capacity of 10,000,000 gal. per day, is treated most fully. Extracts from reports showing results of mechanical filtration occupy the last few pages of the book. The book will prove interesting and helpful to those who are selecting a filtration system.

The seventh edition of the Review of Technical Paints for Metal has lately been issued by the National Paint Works, Williamsport, Pa. The book is by Mr. Frank P. Cheesman, and contains a great quantity of valuable matter for paint users, much of the material being taken from papers and reports to the American Society for Testing Materials, the Master Car and Locomotive Painters' Association, the Association of Railway Superintendents of Bridges and Buildings, and similar organizations. The requirements of paints for metals, covering capacity and the factors affecting it, and the relation of covering capacity to durability, are taken up in the opening pages. Then follow discussions of the causes of paint decay, pigments and vehicles, Linseed Oil Versus Paint as Priming Coats for Metal, the latter a paper by Mr. Cheesman before the 1907 meeting of the American Society for Testing Materials, and experiences with coatings for concrete and cement. The next division of the book contains a great fund of experience with paints for bridges, cars, and steel cage buildings, together with short descriptions of the principal paints made by the company. Under the description of each paint, the experiences with it on all classes of work, are noted, thus aiding materially in the selection of a paint for any particular condition. Nearly 50 per cent. of the company's output is composed of paints made up from the purchasers' specifications, the company making a specialty of such work.

The Patton Clay Mfg. Co., Patton, Pa., has issued an attractive catalogue of its products in vitrified sewer pipe, specials and fittings, wall coping, flue linings, building blocks, hollow tile floor arches and beam covering, and paving and building brick. Comprehensive tables are given of the weights and dimensions of all sizes of standard, double strength and special socket sewer pipe, feet of pipe to a car load, cubic yards of excavation per lineal foot of trench, carrying capacity of sewers, number of brick for different shapes and sizes of sewers, and there are miscellaneous tables and practical notes on laying sewer pipe. An interesting table gives the net prices of sewer pipe and fittings, based on given list prices, the discounts varying by 1 per cent. from 45 to 90 per cent.

A handsome catalogue has been published by the Marion Steam Shovel Co., Marion, Ohio, describing the uses of its six standard shovels, a railroad ditcher and some specially constructed machines. The shovels are described in detail, and there is a table in which the dimensions and weights of all the models are arranged in parallel columns, for easy comparison in selecting the shovel best adapted to given conditions. The standard models have working weights of 23, 38, 58, 70, 85, and 105 tons, the dippers being ¾, 1¼, 2, 2½, 4 and 5 yd. respectively. The railroad ditcher has a ½-yd. dipper, weighs 20 tons, and works on a train of flat cars, moving the entire length of the train and loading the car next to the one on which it rests. One advantage of this machine is that a train can be run into a narrow cut and loaded without the use of additional track. The greater part of the book is devoted to half-tone pictures of Marion shovels and unloaders, operating under a great variety of conditions. Among the interesting illustrations are those of shovels working in tunnels, a 105-ton shovel with a 40-ft. boom, a shovel burning oil and another using compressed air. The Marion unloader is made in three styles, with center, right hand, and left hand plows, each style being made in four sizes.

A useful list of specifications for vitrified conduits, with information regarding their shipment, has been prepared by the Rochester Sewer Pipe Co., Rochester, N. Y. Some months ago the manufacture of these ducts was briefly explained in this journal, and the care taken in inspecting and loading them was mentioned.

The Chain Belt Co., Milwaukee, Wis., has recently issued a new 288-page cloth-bound edition of its general catalogue, of elevating, conveying and power transmitting machinery. The first part is devoted to illustrations of various styles of conveyors and typical installations made by this company in various parts of the country. Following this, is a large amount of information concerning the installation of conveying machinery, in which is included the approximate horse-powers required to operate chain belts of different types. The next section is devoted to supplies for conveying machinery, the greater part listing the various styles and sizes of sprocket chains, special attachment links and sprocket wheels for use with them, with an extensive list of bucket elevator supplies of all kinds. In addition an extensive list of hangers, couplings, pulleys, gearing and other mill supplies is given. Among the special machinery manufactured by this company there are listed the Clark automatic power grain shovels, chain-driven foundry tumbling mills and revolving screens.

Electric heating and cooking devices for marine uses are described in a new bulletin from the General Electric Co., Schenectady, N. Y. As practically all steam vessels have electrical generating plants, there are a number of heating devices which may become very convenient on shipboard, including electric air heaters and radiators, water heaters, flat-irons, surgeons' instruments, heating pads, and a variety of electric cooking utensils, examples of all of which are illustrated.

A valuable catalogue of hydraulic machines has recently been issued by the Watson-Stillman Co., New York. It is a 140-page book devoted particularly to pumps and accessories intended for the very high pressures, for hydraulic presses, etc., including all types from the single-plunger, hand-operated machines to steam-driven pumps of the multi-cylinder type, for pressures up to 10,000 lb. per square inch. The extensive list of accessories includes hand and accumulator stop actions, accumulator pump release actions, balanced-spindle by-pass valves and air pressure boosters. A feature of the book is the illustrations and lists of parts, including leather packing, for all of the standard pumps built. Some of the highly developed hydraulic machinery built by this company, for use in the North River tunnels, is also illustrated.

A new edition of its blow-off valve booklet has recently been issued by the Lunkenheimer Co., Cincinnati, Ohio, in which the straight-away, "Duro," angle and locomotive type valves are described. Complete lists of dimensions and prices of these valves and parts are given and approved methods of connecting them to the boilers suggested. An improvement recently made in the Duro valve, by which a rod may be easily entered into the horizontal boiler connection for breaking up scale and sediment, is described.

A new type of vertical oil engines built by the De La Vergne Machine Co., New York, is described in a folder recently issued. This engine differs from the well-known Hornsby-Akroyd horizontal oil engine in that it is of the two-cycle type and is especially designed for use with cheap fuels, such as kerosene or fuel oil, and not for gas or gasoline. The engine is especially adapted for high speed operation for direct connection to electrical generating or other high speed machinery, and is also made in a marine type for use in launches. It is at present built in only the 7½ and 15 h.-p. sizes. Many advantages of reliability, economy and small space occupied are claimed for the new engine.

The Murphy automatic smokeless furnace is described at length in a handsome catalogue recently issued by the Murphy Iron Works, Detroit, Mich. Improvements in its details are well illustrated and good methods of setting the furnace for automatic stoking suggested. The booklet has a large number of good engravings illustrating the parts of the stoker mechanism and showing representative installations of the furnace. Among the recent notable installations are those in four of the power stations of the New Orleans Railway & Light Co., in the new Brunot Island power house of the Pittsburg Ry. Co., and in the power plants of the Kalamazoo Paper Co., and the West Virginia Pulp & Paper Co.

The York Mfg. Co., York, Pa., has issued a series of new bulletins covering its line of vertical single-acting and horizontal double-acting refrigerating and ice-making machinery. In bulletins No. 10 and 15 are presented complete descriptions of the vertical and horizontal machines respectively, illustrating them in various sections and elevation and explaining in detail their various features. In each of the other bulletins, Nos. 11 to 20 inclusive, one of the various standard sizes of ammonia compressors is illustrated in detail, those illustrated ranging from 10 to 175 tons of refrigeration for the vertical single-acting machines and a 30-ton unit of the horizontal type. In addition to the above, bulletin No. 22 discusses the principal features of the new ammonia absorption type of refrigerating machinery, the manufacture of which has recently been undertaken by this company in addition to its ammonia compression type.

Economical machinery for the coal mine is the subject of an attractive 24-page pamphlet from the Ingersoll-Rand Co., explaining various classes of labor-saving machinery manufactured by this company. Ten different lines of apparatus are described, the new Ingersoll pick machine, the radial axe, the diamondless core drills, the electric-air rock drills, pneumatic drills and hammers, the return air pumping system, the pneumatic displacement pumps and air compressors of all types and capacities.

Recent bulletins issued by the Sprague Electric Co., New York, describe motor equipments that have been devised for single and double magazine Mergenthaler linotype machines, and electric dynamometers for testing gasoline engines. The latter is an electrical dynamometer equipment, especially mounted for convenience of connecting to internal combustion engines of the automobile type for testing purposes, and is being extensively used in the automobile manufacturing industry. A bulletin has also been published describing the motor-driven machine tool equipment of the new shops of the F. Wesel Mfg. Co., in Brooklyn, N. Y. This installation is a model one for the economies in space that have been effected by carefully designed motor applications to machines and for its well arranged wiring system.

Sullivan mining hoists are described in bulletin 56 issued by the Sullivan Machinery Co., Chicago. The details of their construction and the methods of their operation are explained, and there are illustrations of a large number of hoisting engines at mines in the Lake Superior iron district and elsewhere.

Westinghouse incandescent lamps are listed in a pamphlet recently issued by the Westinghouse Lamp Co., which includes a pamphlet statement of the vari-

ous types and sizes of incandescent lamps made for all currents and purposes, the principal types being illustrated.

The Bristol electric pyrometer is described in considerable detail in catalog 70, recently issued by Wm. H. Bristol, New York. These pyrometers are manufactured in both the indicating and recording types and in switchboard or portable models, and have been adapted to a large number of temperature scales for a great variety of manufacturing processes. Many applications of the instrument are suggested, and full-size charts are illustrated to show records taken in blast furnaces and in metal melting.

The Curtis steam turbine generator is described in a valuable pamphlet recently issued by the General Electric Co., Schenectady, N. Y. It will be found of special interest on account of the valuable information presented relative to superheating, vacuum and economy, and to the details of construction and operation of the Curtis apparatus. Of particular interest are the portions referring to the details of the new Curtis hydraulic governor, the low-pressure turbine sets recently installed and their economy curves, and the illustrations of the methods of cutting and riveting buckets. Detail tests are given of 9,000, 5,000, 2,250 and 1,000 kw. turbine generator units, which show some remarkably high efficiencies.

Suction gas producers are discussed at length in a pamphlet recently issued by the Wile Power Gas Co., Rochester, N. Y., with special reference to the company's system of pressure gas without using a holder. The various characteristics of the Wile system are well illustrated, including the automatic water regulators, the operating valves, etc., by means of which a uniform quality of gas is secured with quick responses to changes in the load. The producers are built in two types, one comprising units from 35 to 150 h. p. in capacity, and the other units up to 500 h. p., and specifications for producer apparatus and equipments are suggested.

Equipment for the power plant is the subject of a comprehensive pamphlet recently issued by the Schutte & Koerting Co., Philadelphia, Pa., which describes an extensive variety of injectors, condensors, valves and other steam specialties. The eductor condenser is described at length and representative installations illustrated, and also Koerting spray nozzles used in power plants for the recooling of condenser circulation water; several illustrations are presented of these cooling spray jets in operation at power plants. The remainder of the catalog is devoted to automatic stop and check valves of a noiseless pattern, stop, check and emergency valves, free exhaust valves, balance trip valves and combined trip and throttle valves.

Recent publications of the Fort Wayne Electric Works include bulletins describing the type L small direct-current motors and type MPL belted generators for lighting and power purposes. The details of construction of this apparatus are shown and applications of the small motors for belted and individual drives are illustrated. The generators are made in an extensive range of sizes up to 400 kw., and embody many improvements in constructional detail over former types. In addition to the above, a revised instruction book has been issued for the type K single-phase integrating induction watt meters, built by this company.

Two pamphlets recently issued by the B. F. Sturtevant Co., Hyde Park, Mass., outline the improvements that have recently been made in the Sturtevant direct-current electric motors. One bulletin is devoted to the bipolar and four-pole types of motors which are built in sizes from ¼ to 2 h. p. for the bipolar motors, and from 2 to 80 h. p. in the four-pole type, while the other bulletin is devoted to the eight pole type of motor for slow speed service, which is built in a variety of forms and in powers from 6 to 75 h. p. A feature of the new designs are special forms of motor construction for direct mounting upon the sides of blower casings for direct connected fan drives.

Bulletin [illegible] recently issued by the Ridgway Dynamo & Engine Co., Ridgway, Pa., is an attractive portfolio of illustrations of engines and generators the company has installed in power plants in all parts of the country. [illegible] engines and generators are shown in numerous [illegible] under many conditions of operation.

[illegible] economizers at the Manhattan power station of the Interborough Rapid Transit Co. form the subject of a pamphlet recently issued by the Green Fuel Economizer Co., Matteawan, N. Y., and containing a reprint of a paper read by Mr. R. D. Tomlinson, before the New York Railway Club.

[illegible] locomotive cranes with Brown patent grab buckets [illegible] coal, limestone, clay, etc., are [illegible] circular L recently issued by the Brown Hoisting Machinery Co., Cleveland, Ohio. The construction of the locomotive cranes is shown in detail and their [illegible] and adaptability for a great variety of [illegible] explained, as are also [illegible] of the Brown [illegible] grab buckets. Locomotive [illegible] fitted with [illegible] grab buckets, are [illegible] service, and a [illegible] presented

Extra heavy valves are listed in a pamphlet recently issued by Jenkins Bros., New York, in which special reference is made to high-grade valves suitable for the extra heavy pressures which are now generally carried in power plants. The valves shown have both brass and iron bodies and are made in the globe, angle and check patterns suitable for working pressures up to 300 lb.

The 1907 edition of the Buffalo Forge Company's general catalog describes forges, blacksmiths' tools, power blowers and exhausters, heating and ventilating apparatus, pumps and ventilators. The list of forges includes all types from small hand blowers to the improved down draught forges and heating furnaces for shop installations, with the complete equipment of accessories necessary for such plants. Other smithshop tools described are blacksmiths' drills, the Buffalo armor-plate, punches and shears, upsetters and tire benders. A complete list of blowers and exhausters for ventilating purposes, exhaust heads, roof ventilators, pumps, steam engines and heating apparatus is given, and there is data relative to the operation of this apparatus, which will be of interest to the designing engineer.

Portable industrial railways are discussed in an attractive catalog recently issued by the Arthur Koppel Co., Pittsburg, Pa., which illustrates the Koppel system of light, portable track sections with rolled-steel ties and easily connected angle joints, which greatly facilitate the laying of tracks. The various details of the track construction are illustrated, together with the different forms of dump and platform cars which are built for industrial service. A number of interesting illustrations of Koppel trackage and cars in industrial service are shown, including that in use in the Pennsylvania R. R. Terminal construction work.

The Dixon Engineering & Construction Co., Toledo, O., has sent out a binding cover containing a number of folders relating to the Dixon system of garbage disposal. Some of the plants built by the company are briefly described, and letters and newspaper clippings commenting on their operation are added.

Goff, Horner & Co., Ltd., Pittsburg, are distributing a small folder on the Cummings System of steel reinforcement for concrete structures. Sketches aid the text in describing Cummings' loop truss girder, the patent chair lock. Cummings' hooped columns and anchor rods. The claims of the system are discussed and its applications pointed out

Wyckoff wood pipe forms the text of an 80-page catalogue of the Wyckoff Supply Co., Elmira, N. Y. The introduction gives interestingly some of the history of wood pipe. After describing machine-made pipe, the durability, ability to stand high pressure, resistance to electrolysis, effect of frost, and the carrying capacity are discussed. Under the latter heading is a table showing the velocities and discharge under low heads of wooden, cast iron and riveted steel pipe. Then follow chapters on the coating, manufacture and the method of winding Wyckoff machine-made pipe. Interesting tables are given of the spacing and weight of metal for bands, weight of steel per linear foot, weight of pipe per lineal foot, dimensions, data on hauling and cost of laying wooden pipe. Some space is given to a description of Wyckoff's water-proof patent steam pipe covering. The appendix contains miscellaneous engineering data and tables relating to hydraulic work, the last table giving discharge and friction loss at different heads for pipes from 4 to 48 in.

The Hathorn helve hammer is illustrated in a brochure recently published by the Parker Hoist & Machine Co., Chicago. This hammer, which is built in four sizes, namely, 25 lb., 40 lb., 60 lb. and 80 lb., is fully described and illustrated, and lists of all extra parts which are kept in stock are included.

Triumph Originality is discussed in a recent well-prepared catalogue devoted to the detailed construction of the ammonia compressors built by the Triumph Ice Machine Co., Cincinnati, Ohio. The requirements of the modern ammonia compressor and the recent improvements that have been made in the Triumph apparatus to meet with these requirements are referred to. The steel fittings, ammonia condensers, oil interceptors, liquid receivers and other details of an ice-making or refrigerating plant, manufactured by this company, are illustrated, together with the equipment and auxiliary apparatus necessary in can ice plants, ice water systems, etc. A well-planned machinery arrangement for an ice water plant is also suggested, which embraces a very compact layout of apparatus.

The General Electric Co. has recently issued bulletins devoted to the subjects of the horizontal shaft type of Curtis steam turbines, the Wright demand indicators and mercury arc rectifiers, the latter apparatus being well illustrated and described. The horizontal shaft turbines are built in capacities up to 300 kw., both direct current or alternating, as desired, and can be arranged to operate either non-condensing or condensing. The generators have commutating poles and special commutator construction, particularly adapting them to continuous operation, with little attention, and the attendant advantages of small floor space, low height, light weight and absence of reciprocating parts are dwelt upon, as well as also their suitability for many peculiar conditions of operation.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Jackson, Ala.—See "Power Plants, Gas and Electricity."

Sulphur Springs, Ark.—See "Power Plants, Gas and Electricity."

Redlands, Cal.—The stockholders of the Domestic Water Co. are reported to have decided to issue $50,000 additional bonds for improving the system.

Oakland, Cal.—The Bd. of Pub. Wks. is reported to have on Oct. 9 adopted the plans for a salt water system, furnishing auxiliary fire protection to the city, to cost about $130,000.

Yuba City, Cal.—Chas. Andross, proprietor of the water works, is reported to be considering the erection of a steel tower and tank.

Oceanside, Cal.—It is stated that bids will be received until Nov. 5, by the Bd. of Trustees for one horizontal return tubular boiler 48 in. in diam. and 16 ft. long, and one cross-compound, high-duty pumping engine of 1,000 gals. capacity. H. D. Brodie, City Clk.

Los Angeles, Cal.—We are informed that all bids opened by the Bd. of Water Comrs. on Sept. 30 for a 7,000,000-gal. cross compound pumping engine for the Buenea Vista pumping station have been rejected.

*Bids were opened on Sept. 30 by the Bd. of Water Comrs. (Wm. Mulholland, Supt.) for 2 water tube boilers of 300-h. p. ca. for the Buena Vista pumping station, and Chas. C. Moore & Co. secured the contract for a total of $9,540 for Sterling boiler, manufactured by Babcock & Wilcox Co., to have 3,034 sq. ft. of heat surface.

Fruit, Colo.—Bids are wanted until Nov. 1 for $25,000 bonds, to be issued for the purpose of completing waterworks for fire and domestic purposes. I. H. Whittemore, Town Clk.

Ft. Du Pont, Delaware City, Del.—The following are the bids opened on Oct. 10 by Capt. J. L. Knowlton, Constr. Q. M., for (*a*) 150,000-gal. steel tank, according to government specifications, (*b*) 150,000-gal. steel tank, contractor's specifications; (*c*) 150,000-gal. steel tank, government specifications, but without heater, valve chamber, mains or piping, etc.; (*d*) additions to pump house, pipe work and overflow reservoir; (*e*) air compressor and changes in apparatus in pump house; (*f*) 2 sewage ejectors and ejector chamber; (*g*) remodeling sewer system, and (*h*) cast and wrought iron pipe, for changes in water and sewer systems: Pittsburg Industrial Iron Works, Pittsburg, Pa., *a* $12,990, *c* $9,985; Harry A. Miller, Wilmington, Del., *d* $2,610, *e* $4,580, *h* $1,900; M. B. Bunyea, Chester, Pa., *f* $4,600, *g* $7,300; H. C. Clark, Delaware City, Del., *d* $2,560, *e* $4,617, *h* $1,980, and Chicago Bridge & Iron Works, Chicago, Ill., *a* $18,000, *b* $14,500.

Madison, Ga.—See "Power Plants, Gas and Electricity."

Atlanta, Ga.—The City Council on Oct. 9 decided to have bids called for on a 20,000,000 and 25,000,000 gal. centrifugal pump for Hemphill Ave. pumping station, clear water basin and the completion of the 36-in. pipe from the river to he reservoir.

Covington, Ga.—The citizens are reported to have voted on Oct. 9 to issue $60,000 bonds for the construction of water works and a sewerage system.

**Boise, Idaho.*—Paul S. A. Bickel, of Milner, Idaho, Ch. Engr. Twin Falls Northside Land & Water Co., writes that Donald Grant, of Faribault, Minn., has secured contract for work contemplated by this city; cost, about $500,000.

Coeur D'Alene, Idaho.—C. W. Craik, G. W. Mason and P. J. Scallon are reported to have petitioned for a franchise for water works.

Virden, Ill.—Richd. H. Phillips, 503 Security Bldg., St. Louis, Mo., is preparing plans for water works for Virden, to cost about $60,000. Bids for construction will probably be called for in Nov.

Springfield, Ill.—City Engr. Hamilton and his assistants are reported to be sounding the Sangamon River preparatory to the construction of a new dam for the improvement of the water supply.

East Moline, Ill.—It is reported that the city will this fall build standpipe reservoir and pumping staion as the first step to the construction of municipal water works. Theo. E. Cavely, City Clk.

**Duquoin, Ill.*—The City Council is reported to have awarded contract for the construction of the combined water and sewerage system here to Wm. Tunny, of Joliet, for $18,000.

Anna, Ill.—The Anna Water Works Co. is reported incorporated, with a capital of $14,000, to construct and operate water works. Incorporators, H. P. Tuthill, J. N. Dickinson and others.

Churdan, Ia.—The citizens are reported to have voted to issue $10,000 bonds for water works.

**Pittsfield, Mass.*—L. Cummings, Clk. Bd. of Pub. Wks., writes that the contract for an intake on Sackett Brook and excavating basin (bids opened Oct. 9) has been awarded to Daniel O'Connell's Sons, of Holyoke; estimated cost, about $13,500.

**Fairfax, Minn.*—The Minneapolis Steel & Machinery Co., of Minneapolis, has secured the contract for furnishing steel tower 90 ft. and a 100,000-gal. steel tank for $3,000, and Engineer J. F. Johnson, of Gibbon, secured contract for constructing same at $2,375 (bids opened Oct. 1).

Sauk Rapids, Minn.—Oscar Claussen, of St. Paul, is reported to have been selected to prepare plans for water works, to cost $25,000.

Items marked thus give the names of parties awarded contracts.

Newton, Miss.—P. H. Porter, of Clinton, Ky., has secured the contract for constructing water works for Newton (bids opened Oct. 7) for about $45,000. Engineer, Xavier A. Kramer, of Magnolia.

Nutley, N. J.—The Town Council on Oct. 9 passed on final reading an ordinance providing for the issue of $25,000 water and road improvement bonds.

Ft. Terry, N. Y.—Bids will be received until Nov. 11 by Capt. Wm. E. Horton, Q. M., U. S. A., New London, Conn, for furnishing material and sinking a 6-in. tubular well at Ft. Terry.

Clinton, N. Y.—The citizens are reported to have voted to issue $53,000 bonds for constructing water works.

**Rochester, N. Y.*—The Bd. of Contract and Supply on Oct. 7 awarded contract for sewers, walks and grading and waterpipe in Driving Park Ave. to H. N. Cowles, 47 Tacoma St., for $19,933.

Brooklyn, N. Y.—The Mayor on Oct. 8 approved the ordinance providing for an issue of $3,000,000 bonds to improve the water supply system of Brooklyn Boro.

Wilmington, N. C.—A representative of the city is now negotiating with the Clarendon Water Co. for the purchase of its plant. If not satisfactory, the city will install municipal water works. J. J. Fowler is City Treas.

**Ironton, O.*—A. Q. Thatcher, of Toledo, has secured contract for water works improvements, for $41,800.

**Ashland, O.*—Chas. L. Fortney, Asst. Supt. Water Wks, writes that the Massillon Iron & Steel Co., of Massillon, has secured the contract for 350 tons of water pipe, at $32.25 per ton for 4 in. and $31.25 for 6, 8, 10 and 12 in., all f. o. b. cars Ashland.

Chilocco, Okla.—Bids will be received until Nov. 7 by C. F. Larrabee, Acting Comr. Indian Affairs, Washington, D. C., for furnishing material and improving the water system at he Chilocco School. For further information apply to S. M. McCowan, Supt. School, Chilocco.

Enid, Okla.—See "Sewerage and Sewage Disposal."

Charleston, S. C.—The City Council on Oct. 8 adopted the majority report of the Water Supply & Advisory Com. (John F. Rafferty, Chmn.); also accepted the statement of cost as submitted by Engineer J. L. Ludlow, of Winston-Salem, N. C., and approved the amended franchise of the Charleston Light & Water Co.

Gregory, S. D.—The citizens are reported to have voted to issue $12,000 bonds for water works

Nashville, Tenn.—The citizens are reported to have voted on Oct. 10 to issue $200,000 bonds for extension of water works.

Palestine, Tex.—Thos. Cronin is reported to have purchased the water works and will make improvements to same.

Blackstone, Va.—Bids are wanted by the Water Com. H. H. Seay, Chmn.) for laying and constructing concrete reservoir, to hold 250,000 gals. water; also laying 1½ miles water pipes.

Manassas, Va.—See "Power Plants, Gas and Electricity."

Seattle, Wash.—The following are the bids opened on Oct. 5 by the Bd. of Pub. Wks. for water mains on N. and W. 80th Sts.: Geo. A. Webster Co., $21,828; Smith & Hall, Downs Blk., $21,401, and International Concrete Co., New York Blk., $15,753.

Raymond, Wash.—City Engr. John D. Henry is reported to be preparing plans for water works.

De Pere, Wis.—Bids will be received until Oct. 25 by the Bd. Water Comrs. for furnishing material and constructing a water works extension, requiring about 4,540 ft. 10, 8 and 6 in. c. i. pipe, 7,500 lb. special castings, 8 hydrants. M. J. Maes, City Clk.

De Forest, Wis.—Fred. Moeller, Village Clk., writes that the National Constr. Co., of South Bend, Ind., is preparing plans for water works, to cost about $10,000.

Kelowna, B. C.—See "Power Plants, Gas and Electricity."

**Haileybury, Ont.*—The Common Council is reported to have on Oct. 2 awarded to J. H. McKnight Co., Ltd., the contract for water works, for $44,000.

Vanda, Sask.—The question of issuing $15,000 bonds for water works is reported under consideration.

Weyburn, Sask.—Edgar A. Chappell, City Secy.-Treas., writes that the Municipal Council is pushing preliminary work looking to the letting of contract for a reservoir, pumping station and stand pipe at a point about 3½ miles from town, in connection with contemplated water works. It is proposed to bring the water from there by gravity.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Santa Monica, Cal.—It is reported that bids will be received by J. C. Heminway, City Clk., until Oct. 21 for the purchase of $160,000 bonds for sewers, a wharf and garbage crematory.

San Francisco, Cal.—The sum of $100,000 to continue the repair of the city's sewers and $97,200 for street repaving, asked for by President Casey of the Works Board was appropriated by the Bd. of Superv. on Oct. 7.

Corona, Cal.—See "Public Buildings."

Ft. Du Pont, Delaware City, Del.—See "Water."

**Washington, D. C.*—The contract for constructing sewers in the valley of Soap Stone Branch, bet. 30th and 36th Sts., and in Albemarle St. (bids opened Sept. 30), is reported to have been awarded to the Warren F. Brenizer Co., of Washington, for $10,856.

Pensacola, Fla.—See "Public Buildings."

Madison, Ga.—See "Power Plants, Gas and Electricity."

Covington, Ga.—See "Water."

Quincy, Ill.—The City Council is reported to be considering the construction of the north end sanitary sewer, to cost $30,000.

Belleville, Ill.—It is proposed to extend the High, Jackson, Church and Race Sts. sewers to the city limit; estimated cost, $20,000. Fred Durtschmann, Jr., City Engr.

Duquoin, Ill.—See "Water."

Terre Haute, Ind.—Bids will be received until Oct. 25 by the Bd. Pub. Wks. (Herbert Briggs, Sec.), for constructing sewers at 13th, 9th and Poplar Sts. and Maple Ave., as advertised in The Engineering Record.

North Manchester, Ind.—A. G. Ebbinghaus, Town Clk., writes that bids will be received on Oct. 24 for the construction of a combination sanitary and drainage system, to cost about $10,000. Engineer, W. Fowler, of Wabash.

**Ft. Wayne, Ind.*—The Bd. of Pub. Wks. is reported to have awarded contract for construcion of 2 sewers, one in Spring St. and one in Barthold St., to Anton Reig, 100 Putnam St., at 85 cts. and 89 cts. per lin. ft.

Indianapolis, Ind.—The City Engineer is reported to be preparing plans for branches of the sewer in North Indianapolis. The main trunk line is in 26th St., and a branch will be constructed which will drain district lying bet. Northwestern and Senate Aves. and 26th and 30th Sts. It will be about 2 miles in length and will vary in size from a 10-in. pipe to a 3-ft. circular brick passageway; this branch is estimated at from $25,000 to $30,000.

Des Moines, Ia.—Bids will be received until Nov. 4 by the Bd. Pub. Wks. (W. W. Wise, Chmn.) for constructing a brick culvert on 27th St., in the vicinity of Clark St.

Cedar Rapids, Io.—Bids will be received until Oct. 24 by the Pub. Improv. Com. (W. C. Byers, Chmn.), for constructing 6 and 8 in. vitrified pipe sanitary sewers in portions of several alleys.

**Salem, Mass.*—The Sewerage Com. has awarded to Thos. Walsh, of Roxbury, contracts to build Sections 1, 2 and 4 of the South Salem Sewer, and to Falvey & Kelley, of Cambridge, Sec. 3 (bids opened Oct. 2).

**Milford, Mass.*—Bruno, Salamone & Pettitti, of Boston, are reported to have secured the contract to build the low level section of sewer on Central St., for $16,155.

Adrian, Mich.—John Mawdsley, City Clk., writes that the citizens on Oct. 8 voted to issue $15,000 bonds to complete the sewerage system. Engineers, Riggs & Sherman, of Toledo, O.

Tecumseh, Mich.—Bids will be received until Oct. 29 by the Bd. of Village Trus. (W. L. Jones, Clk.) for furnishing material and constructing a sanitary sewer system, as advertised in The Engineering Record. Engineers, the Riggs & Sherman Co., of Toledo, O.

Cadillac, Mich.—Bids will be received by the Bd. of Pub. Wks. (Geo. Johnston, Clk.) until Dec. 2 for building sewage purification works and pumping station, as advertised in The Engineering Record.

Sturgis, Mich.—A. L. Hubbard, City Clk., writes that Geo. Pierson, of Kalamazoo, is engineer for the proposed sewers and sewage disposal plant. An election will probably be held to vote on question this fall.

St. Paul, Minn.—The Bd. of Pub. Wks. is reported to have on Oct. 7 rejected bids for the construction of a sewer on Case St., all being considered too high. Engineer's estimate, $10,140. Several blocks of the sewer call for reinforced concrete.

*The contract for constructing a sewer on a portion of Sturgis St. is reported to have been awarded on Oct. 10 to Ryan & Johnson, at $4,790.

Canton, Miss.—Bonds to the amount of $50,000 are reported sold, to be used for the construction of 7 miles of 18 to 6 in. pipe sewers. O. S. Miller, Mayor. Engr., Walter G. Kirkpatrick, of Jackson.

Kansas City, Mo.—Bids will be received until Oct. 24 by E. A. Harper, City Engr., for constructing sewers in Dists. No. 262 and 240, Div. No. 3, and Dist. No. 238, Div. No. 1.

Lincoln, Neb.—We are informed that the Sanitary Comn. is at work on a concrete storm sewer 850 ft. long and 10x20 ft. in cross section, across the Antelope, at 20th and Vine Sts. Wm. Grant is City Engr.

Madison N. J.—The citizens voted Oct. 14 in favor of constructing a sewerage system; probable cost $125,000.

**Rochester, N. Y.*—The Bd. of Contract and Supply on Oct. 9 awarded contract for construction of a system of sanitary and storm water sewers in the 12th and 21st Wards to H. N. Cowles, 47 Tacoma St., for $85,430.

Rochester, N. Y.—See "Water."

White Plains, N. Y.—Bids will be received by the Bronx Valley Sewer Comn. (Frank N. Glover, Secy., 2 Grand St.) until Nov. 7 for the construction of about 12 miles of circular sewer from 3 1-3 to 6 ft. in diam., and about 3 miles of circular lined tunnel, mostly 6½ ft. and 8½ ft. diam., as advertised in The Engineering Record. The material for construction to be either monolithic reinforced concrete, reinforced concrete blocks or brick masonry.

Auburn, N. Y.—Bids will be received by E. C. Aiken, Mayor, until Dec. 3 for the construction of sewers, to consist of approximately 36,150 ft. 8, 10, 12, 15, 18 and 20 in. pipe sewers, and the construction of disposal works, as advertised in The Engineering Record. J. Walter Ackerman, City Engr.

Troy, N. Y.—Bids will be received until Oct. 29 by the Bd. of Contract & Supply (Jas. Riley, Clk.), for furnishing material and constructing a salt glazed vitrified drain pipe sewer in a portion of Tibbits Ave.

University, N. D.—See "Schools."

Portsmouth, O.—It is stated that bids will be received until Oct. 23, by the Bd. of Pub. Service (Chas. F. Schirrmann, Clk.), for the construction of a storm sewer on 10th St., requiring 575 ft. 18 D. S. vitr. pipe sewer; 20 lin. ft. 15 D. S. vitr. pipe street corner connections; 345 cu. yds. excav.; 4 manholes and casting, complete.

Toledo, O.—It is stated that bids will be received until Oct. 24 by the Bd. of Pub. Service for constructing sewers in various streets. Frank S. Consaul, Ch. Engr., Bd. Pub. Service.

Lakewood, O.—Bids will he received, it is stated, until Oct. 25 by B. M. Cook, Town Clk., for $31,255 street and sewer improvement bonds.

Springfield, O.—Local press reports state that bids will probably soon be asked for the construction of the high level intercepter from Main and Water Sts. to Main and Factory Sts. The city's share of the cost will be $68,600, and the property owners $24,042.

Massillon, O.—It is stated that bids are wanted until Oct. 31 for $11,500 storm water sewer bonds. J. H. Dougals, Secy. Sinking Fund Trus.

**Canton, O.*—W. E. Sarver, City Engr., writes that the contract for constructing the Navarre St. storm sewer (bids opened Sept. 3), has been awarded to Wise, Will, Smith & Shekels, of Canton, for $9,459.

**Cincinnati, O.*—Thos. P. Strack, 518 Walnut St., on Oct. 12 secured contract for improving and repairing McLean Ave. brick sewer, 12 ft. diam., for $12,300.

New Philadelphia, O.—Plans have been submitted to the State Bd. of Health at Columbus for a sewage purification plant for New Philadelphia.

Cleveland, O.—Bids will be received by the Bd. Pub. Wks. (A. R. Callow, Secy.), until Oct. 24 for constructing sewers in Barkwell Ave. and W. 65th St.

**Columbus, O.*—We are informed that D. W. McGrath, of Columbus, has secured the contract for the east side sewage pumping station (bids opened Oct. 4 by the Bd. of Pub. Service) at a total of $18,372. Some of the unit prices in this bid are as follows: 120 cu. yds. excav., class A, $2.00; 1,100 cu. yds. excav., class B, 75 cts.; 620 cu. yds. borrow, 50 cts.; 530 cu. yds. rolled embkt., 50 cts.; 300 cu. yds. loam, 50 cts.; 170 lin. ft. straight stone curb, 75 cts.; 85 lin. ft. curved stone curb, $1.30; 50 lin. ft. resetting stone curb, 20 cts.; 300 sq. yds. granolithic pavnt., $2; 30 sq. yds. repaving with vitr. brick, $2; 415 cu. yds. concrete, $11; 53 lin. ft. 3-duct vitri. conduit, 85 cts.; 160 lin. ft. 6-in. vitr. sewer pipe, 40 cts.; 70 lin. ft. 8-in. vitr. sewer pipe, 50 cts.; 13 tons c. i. pipe, $45; 2 tons Bell & Spigot special castings, $80; 6 tons flange special castings, $100; 58 lin. ft. 2-in. water supply main, 40 cts.; 58 lin. ft. 2-in. high pressure natural gas main, 30 cts.; 6,500 lbs. twisted steel rods, 5½ cts.; 3,700 lbs. wrought steel floor plates, 4 cts.; 7,600 lbs. miscellaneous steel work, 6½ cts.; 2,000 lb. water level indicators, 6 cts., etc. Totals of other bids: Bert Walter, Columbus, $19,149, and E. K. Hibbs, Columbus, $21,058. John H. Gregory is Engr. in charge of water and sewerage works.

**Billings, Mont.*—The following are the bids opened on Oct. 1 by the City Council for constructing Main St. sewer: (*a*) Piper Const. Co., Billings; (*b*) P. Wesch & Co., Billings; (*c*) E. H. Gagnon & Co., Billings; (*d*) J. K. Kennedy & Co., Fargo, N. D.; (*e*) Nick Hughes, Butte (awarded contract), and (*f*) R. M. Bardsen, Butte.

	a	*b*	*c*	*d*	**e*	*f*
1,558.0 12-in. sewer; vit. pipe	$3.00	$2.80	$2.10	$2.00	$2.00	$2.73

Totals	$131,925	$86,863	$125,130	$87,200	$83,837	$87,248

Enid, Okla.—The citizens are reported to have voted to issue $78,500 bonds for storm sewer, $10,000 for septic tank, and $15,000 for water extensions.

Ardmore, Pa.—Bids will be received until Oct. 31 by R. A. Warner, Supt. of Health and Drainage, Ardmore, Box 708, for constructing 1,575 ft. 8-in. terra cotta sewer on Lehigh Ave. as advertised in The Engineering Record.

St. Clair, Pa.—H. W. Brown, Town Clk., writes that it is proposed to construct 18, 24 and 30 in. pipe sewers on 1st and 3d Sts., to cost $8,000. Eng., W. H. Wright, St. Clair.

Beeville, Tex.—It is stated that a 24-in. sewer is to be constructed on Washington St., the citizens to pay half the cost, and the County Comrs. the other half.

Seattle, Wash.—The following are the bids opened on Oct. 5 by the Bd. Pub. Wks. for sewers in Hiawatha Pl.: Smith & Hall, Downs' Blk., $7,756, and Dicken & Rightmire, $7,334.

BRIDGES.

Notes Arranged Alphabetically by States.

Willows, Cal.—The Simpson Bridge, crossing Stony Creek between Orland and Newvills, is reported destroyed by fire. The structure is about 900 ft. in length.

Redding, Cal.—It is stated that bids will be received until Nov. 8, by the Bd. of Superv. (S. N. Witherow,

**Items marked thus give the names of parties awarded contracts.*

Clk.), for the construction of a bridge across the Sacramento River, about one mile above Castle Crag.

Greeley, Colo.—The County Comrs. are stated to have recommended awarding the contract for constructing a reinforced concrete bridge at Oak St. in Greeley to C. G. Sheehy, of Denver, at $5,950.

Willimantic, Conn.—The City Council is stated to have decided to expend $12,000 for the enlarging of the S. Main St. stone arch. bridge.

Palatka, Fla.—The Co. Comrs. on Oct. 10 are stated to have awarded the contract for constructing the bridge over St. John's River from Hogeye Point to East Palatka to the Converse Bridge Co., of Chattanooga, Tenn., for $54,000.

Vincennes Ind.—J. S. Spiker, Co. Engr., writes that bids will be received on Nov. 5 by the Comrs. of Knox Co. for 20 new bridges and repairing 4 bridges. John T. Scott. Co. Aud.

Sulphur Springs, Ind. Ter.—Bids will be received at the office of the Supt. Platt Natl. Park, Sulphur Springs, until Oct. 28 for constructing complete a suspension foot bridge at Bromide Springs in the park.

St. Joseph, Mich.—An ordinance is stated to have been passed providing for an issue of $20,000 bonds for constructing the Wayne St. Viaduct.

Menominee, Mich.—C. C. Hansen, County Clk., writes that the proposed steel bridge to be constructed at the paper mills to replace old structure will cost $18,000, of which the city of Menominee will pay $9,000, and the balance will be paid for by the city of Marinete, Wis. Address F. S. Norcross, City Clk., of Menominee, Mich.

Minneapolis, Minn.—Plans are stated to have been prepared for the steel arch bridge to be erected at the Soldiers' Home and Minnehaha Park at a cost of about $45,000.

Greenwood, Miss.—The Bd. of Supervisors of Leflore County are stated to have authorized the issue of $60,000 bonds for erecting bridges and $40,000 for constructing public roads.

Kansas City, Mo.—See "Railroads."

Glendive, Mont.—Specifications are on file at the office of The Engineering Record, 239 W. 39th St., New York, N. Y., and bids will be received at the office of the U. S. Reclamation Service, Glendive, until Nov. 15 for the construction of 34 steel highway bridges in connection with the Lower Yellowstone project, N. D.-Mont.

Lincoln, Neb.—We are informed that Wm. Grant, City Engr., is preparing plans for a reinforced concrete viaduct to be constructed across the Burlington, Missouri Pacific & Northwestern tracks on N. 10th St., to cost about $120,000.

Mt. Holly, N. J.—Bids will be received by the Boards of Chosen Freeholders of the Counties of Mercer and Burlington at the Court House, Mt. Holly, until Oct. 28 for the following: Furnishing materials and constructing concrete abutments, wingwalls, pier and steel superstructure for a bridge over Crosswicks Creek on line of new road, leading from North Crosswicks, in the county of Mercer, to Crosswicks, in the county of Burlington; also a separate bid will be received to include grading; a separate bid will also be received for grading only for above bridge. Joel Horner, Dir. Bd. Chosen Freeholders, of Burlington Co., at Mt. Holly.

Newark, N. J.—A bridge is to be constructed over the Hackensack River for the New York & Greenwood Lake R. R. and the Newark branch of the Erie R. R., and contracts are stated to have been awarded to McMullen & McDermott for the sub-structure, and the American Bridge Co., 42 Bway., New York, N. Y., for the superstructure, to be completed June 1, 1908. The bridge will carry two tracks, have a total length of 688 ft., consisting of 6 approach spans and one draw span 265 ft. long, having two openings of 100 ftt. each in the clear. It will involve the construction of 4 miles of new double track railroad, partly on the old Greenwood Lake right of way and partly on the new right of way over Hackensack Meadows to Harrison.

Carlsbad, N. M.—It is stated that bids will be received until about Oct. 26 by the Bd. Co. Comrs. for $22,000 bridge bonds.

New York, N. Y.—See "Miscellaneous.

Brighton, N. Y.—The citizens are reported considering construction a bridge over the New York Central tracks at Clover St., at a cost of about $20,000.

Syracuse, N. Y.—John M. Shultz is reported to have secured the contract for constructing the bridge over Oswego Canal at N. Salina St., for about $66,000.

Toledo, O.—The Toledo-Massillon Bridge Co. is reported to have secured the contract for constructing a bridge over the Maumee River at Damascus Landing near Napoleon for $65,000.

Portland, Ore.—It is stated that bids will be received by A. L. Barlus, City Audr., until Nov. 15, for the construction of a steel bridge on Union Ave. Douglas W. Taylor, City Engr.

Stroudsburg, Pa.—The Stroudsburg & Water Gap Electric Street Ry. Co. (A. A. Holbrook, Gen. Mgr.) is stated to have awarded the contract for constructing a railway bridge over McMichaels Creek at S. 7th St. to Fine & Harris, of Philadelphia, for $16,000.

Pittsburg, Pa.—It is stated that the Pittsburg & Lake Erie R. R. Co. contemplate constructing a 9-track bridge, 125 ft. wide, over Main St. in the West End. J. A. Atwood, Ch. Engr.

Jersey Shore, Pa.—The contract for constructing a bridge over east channel of west branch of Susquehanna River near Jersey Shore is reported to have been awarded to the York Bridge Co., of York, for $51,945. Bids opened Oct. 8 by Saml .B. Rambo, Supt. Pub. Bldgs. and Grounds, Harrisburg.

Mauch Chunk, Pa.—Bids will be received until Nov. 7 by the Bd. Co. Comrs. (D. O. Straup, Chmn. for constructing a new span in place of the eastern span on the ... Mauch Chunk Bridge over the Lehigh River at Mauch Chunk.

Coatesville, Pa.—The Bridge Jury is stated to have recommended the construction of a bridge over the Philadelphia & Reading Ry. and Brandywine Creek, on Main St., Coatesville, at a cost of $500,000.

Chamberlain, S. D.—It is staten that the Chicago, Milwaukee & St. Paul R. R. Co. has decided to construct a steel railroad bridge over Missouri River at Chamberlain. D. J. Whittemore, Ch. Engr., Chicago, Ill.

Richmond, Tex.—It is stated that a steel bridge will be constructed over Bernard River, between Ft. Bend and Wharton Counties, at a cost of about $10,000.

Walla Walla, Wash.—Specifications are on file at the office of The Engineering Record, 239 W. 39th St., New York, N. Y., for a steel bridge, with concrete floor, to be constructed across Mill Creek, on 4th St., bet. Rose and Sumach Sts., bids for which will be received by J. B. Wilson, City Engr., until Oct. 28. The bids must include all labor and material required for removal of present stone walls and for material and construction of the bridge, excav., drainage, etc.

Menomonie, Wis.—The Common Council is stated to have passed a resolution directing the Special Bridge Com., City Attorney and City Engineer to make a survey, with a view of procuring right-of-way, over Red Cedar River below the dam for the construction of a bridge.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

San Francisco, Cal.—See "Sewerage and Sewage Disposal.

Alameda, Cal.—F. E. Browning, City Clk., writes that the citizens at a recent election voted to improve two approaches to the city, one to cost $37,000 and the other $13,000. Address A. V. Frodder, St. Supt.

Corona, Cal.—See "Public Buildings."

Redding, Cal.—It is stated that bids will be received until Nov. 7, by the Bd. of Superv. (S. M. Witherow, Clk.), for clearing and constructing a wagon road, a distance of about 2.04 miles.

San Francisco, Cal.—Flynn & Treacy, 302 Montgomery St., are stated to have secured the contract for paving a portion of East St., for $14,906.

Connecticut.—The citizens of Seymour, Avon, Ansonia, Canton, East Lyme, Old Lyme, Madison and Wallingford, West Hartford, Groton, East Granby and Berlin are stated to have voted to expend $20,000 each for highway improvements.

Jacksonville, Fla.—Mr. Barnard, County Engr., is reported to have been instructed to prepare plans and survey the road connecting Jacksonville and Atlantic-Pablo Beach.

Pensacola, Fla.—Bids will be received by the Bd. of Bond Trus. (L. Hilton Green, Chmn.) until Nov. 15 for paving about 170,700 sq. yds. clay or shale blocks, sheet asphalt, bitulithic, wood block or macadam pavement and 115,950 lin. ft. concrete curb, as advertised in The Engineering Record. Engineer, T. Chalkley Hatton, of Wilmington, Del.

Atlanta, Ga.—The County Comrs. are stated to have decided to pave Peachtree St. with bitulithic, at a cost of $30,000.

Chicago, Ill.—Bids will be received, it is stated, until Oct.. 22 by the West Park Comrs., Union Park, for macadamizing a portion of Washington Boule.

Rockville, Ind—It is stated that bids will be received until Nov. 7 by H. A. Henderson. Aud. Parke Co., at Rockville, for grading, draining, dredging and macadamizing the county line between Parke and Fountain counties.

Greencastle, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Nov. 2 for the construction of 16,340 ft. gravel road in Russell Township; also 10,566 ft. macadamized road in Monroe Township. C. C. Hurst, Co. Aud.

Ft. Wayne, Ind.—Geo. W. Lindemuth, Co. Aud., writes that the contract for constructing 6,020 ft. macadam road in Monroe Township (bids opened Oct. 12), has been awarded to Wm. Busching, of Ft. Wayne, for $4,349.

The Bd. Co. Comrs., it is reported, will receive bids until Nov. 2 for the construction of 9,563 ft. macadamized road in Madison Township. Geo. D. Lindemuth, Co. Aud.

Logansport, Ind.—It is reported that the Bd. Pub. Wks. (Chas. Ringleben, Chmn.) will receive bids until Oct. 22 for paving Huber St.

The Bd. Co. Comrs., it is reported, will receive bids until Nov. 4 for the construction of two gravel roads in Bethlehem Township, 1¾ and 2¼ miles in length, respectively, also 2 gravel roads, one in Jackson Township and the other in Clinton Township. George W. Cann, Co. Aud.

Vincennes, Ind.—It is reported that the Bd. Co. Comrs. will receive bids until Nov. 5 for the construction of 10,268 ft. gravel roads in Vincennes Township and 104,602 ft. in Decker Township. John T. Scott, Co. Aud.

Decatur, Ind—It is reported that the Bd. Co. Comrs. will receive bids until Nov. 4 for the construction of 2 macadamized roads, one in Kirklin Township and the other in Root Township. C. D. Lewton, Co. Aud.

New Albany, Ind.—The Bd. of Pub. Wks. is stated to have adopted a resolution providing for the improvement of W. Main St.

Indianapolis, Ind.—The Bd. of Pub. Wks., it is stated, will soon receive bids for improving Central and Brightwood Aves., Stilwell, Maryland, Houston and Dye Sts.

Crawfordsville, Ind.—It is stated that bids are being received for paving and constructing cement walks in Binford and Pine Sts.

Des Moines, Ia.—Bids will be received until Oct. 30 by the Bd. Pub. Wks. (W. W. Wise, Chmn.) for paving portions of W. 28th, W. 3d and W. 4th Sts. with vitrified paving blocks; also until Oct 31 for paving with asphalt W. Walnut St., about 3,288 sq. yd.

W. A. Bryant Asphalt Co. is reported to have submitted the lowest bid for paving a portion of W. 41st St. with asphalt, at $2.15 per sq. yd., or a total of about $10,000.

New Orleans, La.—Wm. Hardee, City Engr., is reported to have estimated the cost of paving portions of Howard Ave. and Lopez St., at $11,800.

Baltimore, Md.—The paving of a portion of Lakewood Ave. is reported contemplated.

Minneapolis, Minn.—The Park Bd. is stated to have decided to co-operate with the St. Paul Park Comn. in establishing a parkway or boulevard along the east bank of the river from Franklin to Marshall Aves.

St. Cloud, Minn.—B. Vorsberg, City Clk., writes that the proposed paving for which $20,000 will be expended will be done by days' work.

St. Louis, Mo.—The Bd. of Pub. Improvements on Oct. 11 is stated to have awarded contracts for paving, as follows: G. Eyermann & Bro., 1216 S. Grand Ave.—Virginia Ave., $5,441, and a portion of Broadway, $18,890. J. E. Perkinson—Carter Ave., $37,986; Bremen Ave., $21,696. Jas. T. McMahon— Angelica St., $6,215. Fruin & Colnon, Laclede Bldg.—Euclid Ave., $3,628; Michigan Ave., $87,330; Ivory Ave., $23,462. Skrainka Constr. Co., 319 N. 4th St.—Hamilton Ave., $5,774. Schneider Granite Co.—Portions of Broadway, $82,563.

St. Louis, Mo.—Bids will be received until Oct. 29 by the Bd. Pub. Improv. (A. J. O'Reilly, Pres.) for paving portions of Pine and 3d Sts. with wood blocks, and Loughborough, Idaho and Columbia Ave. with vitrified brick; constructing granitoid sidewalks on portions of 24 streets.

Kansas City, Mo.—Bids will be received until Oct. 24 by E. A. Harper, City Engr., for furnishing material and paving with asphalt portions of Grand, Anderson and Walrond Aves., constructing brick or block pavement on several alleys, constructing artificial stone sidewalks on numerous streets.

Springfield, Mo.—J. C. Likes is stated to have secured the contract for paving Boonville St. with brick, at $1.77 per sq. yd.

Red Bank, N. J.—Bids will be received until Nov. by A. C. Harrison, Clk. Bd. Comrs., for paving a portion of Front and Broad Sts. All information regarding work and materials will be furnished by Geo. D. Cooper, C. E., Red Bank.

Nutley, N. J.—See "Water."

Paulsboro, N. J.—Chas. M. Titus, of Paulsboro, is stated to have secured the contract for paving streets throughout the city for $15,000.

Jersey City, N. J.—Bids will be received until Oct. 21 by the Bd. Street and Water Comrs. (Geo. T. Bouton, Clk.) for improving Ege Ave., requiring about 2,815 sq. yds. Belgian pavt., 6,900 sq. ft. cement walks etc.

Rochester, N. Y.—See "Water"

Buffalo, N. Y.—Separate bids will be received until Oct. 22 by the Dept. Pub. Wks. (F. G. Ward, Comr.) for paving portions of 5 streets.

New York, N. Y.—Bids will be received by Louis F. Haffen, Pres. Boro. Bronx, until Oct. 29 for regulating, grading, building approaches and placing fences in Johnson Ave. and in Spuyten Duyvil Rd. Engineer's estimate: 9,000 cu. yds. earth excav., 7,500 cu. yds. rock excav., 25,000 cu. yds. filling, 4,650 cu. yds. dry rubble masonry in retaining walls, culverts and gutter, etc.

Brooklyn, N. Y.—Bids will be received until Oct. 30 by Bird S. Coler, Boro. Pres., for regulating, grading and paving with asphalt on a concrete foundation of Mansfield Pl., Christopher Ave., E. 29th, E. 32d, 93d, 73d and Roebling Sts. Engineer's estimate: 32,165 sq. yds. asphalt pavt., 4,480 cu. yds. concrete, 4,970 cu. yds. earth excav., 8,457 lin. ft. curb, 82,840 sq. ft. cement sidewalk, etc.

New York, N. Y.—The New York Central Co. have filed plans for a private driveway for its general offices and post office section of the new Grand Central terminal now building on Lexington Ave., 44th to 45th Sts. It is to face on Depew Pl., and it will be 220 ft. wide and 58 ft. deep. It will be built of steel and stone and cost $30,000.

New Brighton, S. I., N. Y.—The following are the bids opened on Oct. 8 at the office of Geo. Cromwell, Boro. Pres., for furnishing material and regulating, grading and paving with macadam Wooley Ave. from Indiana Ave. to Watchogue Road: (*a*) Jacob E. Conklin, 299 Bway., N. Y. City, $49,561 (awarded contract); (*b*) Quinroy Constr. Co., Port Richmond, $51,270; (*c*) Jos. Johnson's Sons, West New Brighton, $54,103.

	*a	b	c
2,000 cu. yds. excav.	$0.60	$0.70	$0.70
10 cu. yds. reinforced concrete	10.00	18.00	20.00
500 lin. ft. 4-in. under drain	.25	.50	.40
60 lin. ft. 12-in. culvert pipe	1.00	1.00	1.00
20,300 sq. yds. macadam	1.00	1.39	1.35
5,750 sq. yds. vitr. brick with sand cushion, including 4½-in. concrete foundation, 1-3-6	3.00	2.45	2.75
60 cu. yds. concrete, Class B	7.00	6.00	6.00
50 cu. yds. concrete, Class A	7.00	7.50	8.00
10,100 lin. ft. cement curb	.80	.45	.65
460 lin. ft. 16-in. bluestone curb	1.25	1.10	1.00
100 lin. ft. old curb reset	.25	.40	.25
4,800 sq. ft. cement sidewalk	.22	.26	.25
2 vault covers and frames	10.00	1.00	8.00

Ithaca, N. Y.—Bailey, Johnson & Saunders, 121 S. Tioga St., Ithaca, will sublet and furnish plant for macadam road work, as advertised in The Engineering Record.

Concord, N. C.—Bids will be received by the Comrs. of Cabarrus County until Oct. 24 for grading and macadamizing about 10 miles of public road from Concord to Kannapolis, also 1 mile on the Concord and Charlotte Road, as advertised in The Engineering Record. Engineer, Quint E. Smith, of Concord.

Lakewood, O.—See "Sewerage and Sewage Disposal."

Kent O.—It is stated that bids are wanted until Oct. 21 for $15,000 street improvement bonds. T. A. McMahon, Village Clk.

Shiloh, O.—It is stated that bids are wanted until Oct. 25 for $5,400 bonds for paving Main St. P. T. Barnes, Village Clk.

*Items morked thus give the names of porties awarded contracts.

*Zanesville, O.—P. J. Kirwin, Secy. Bd. Pub .Service, writes that Petit & Abele, of Zanesville, on Oct. 14 secured the contract for paving State St., about 9,000 sq. yds.

Cincinnati, O.—It is stated that bids will be received until Nov. 1 by Bd. Co. Comrs. (Fred Dreihs, Clk.) for improving Hamilton Pike, from the north corporation line of Mt. Healthy to the Butler County line, Springfield Twp.

Cleveland, O.—Bids will be received until Oct. 24 by the Bd. Pub. Service (A. R. Callow, Secy.) for grading and otherwise improving a portion of West Boulevard.

Oklahoma City, Okla.—The City Council is stated to have passed a resolution providing for the paving of 6th St.

Scranton, Pa.—Bids will be received until Oct. 22 by C. R. Acker, Dir. Pub. Wks., for paving Dix Court, Irving Ave. and Alder St.

Philadelphia, Pa.—Local press reports states that the Dept. of Pub. Wks. on Oct. 10 awarded contracts as follows: Filbert Paving & Constr. Co., asphalt paving, at from $1.72 to $2.07 per sq. yd., or a total of $500,000; Barber Asphalt Paving Co., Land Title Bldg., paving with asphalt, Orkney St. and Park Ave., at $2.05 per sq. yd.; Cunningham-Murray, 15th and Chestnut Sts., and the Mack Paving Co., contract for paving with brick 10 miles of streets, the former bid $1.95 per sq. yd. and the latter $1.92 to $2.06 per sq. yd., and D. J. McNichol, 704 Betz Bldg., the contract for repairs to streets occupied by railways, for $50,000. There are about 15 miles of asphalt paving to be laid.

Salt Lake City, Utah.—Bids will be received at the office of the Bd. of Pub. Wks. (F. J. Leonard, Chmn.) until Dec. 6 for grading, curbing and paving First South St., to include 60,000 cu. yds. grading, 17,000 lin. ft. curb and 41,000 sq. yds. asphalt, as advertised in The Engineering Record. Louis C. Kelsey, City Engr.

Manassas, Va.—See "Power Plants, Gas and Electricity."

Toppenish, Wash.—See "Public Buildings."

*Bellingham, Wash.—Chas. Lind, of Bellingham, is reported to have secured the contract for graveling a portion of Ellis St., for $3,840.

Seattle, Wash.—Bids were opened on Oct. 5 by be Bd. of Pub. Wks. for the following street improvements:

Improving Westlake Ave., Denny Way to Mercer St.: H. W. Hawley, 2602 Western Ave., $11,407. Holt & Jeffery, 313 3d Ave., N., $10,352; Rydstrome & Goerig, 1802 16th Ave., $11,280, and L. H. Goerig, 312 25th Ave., $10,984.

Concrete walks, (*a*) Irving Pl., (*b*) 6th Ave., N. W.: E. H. Rawle & Co., 400 Arcade Annex, *a* $5,976; Smith & Hall, Downs' Block, *a* $6,163, *b* $10,806; Andrew Peterson, 410 Washington Bldg., *b* $11,212.

Grading Fuhrman Ave.: S. Normile, 608 Kinnear Pl., $54,161, and International Contract Co., 738 New York Blk., $41,465.

Paving Union St.: H. F. John & Co., 571 Colman Blk., $25,405; Sparger Concrete Co., 562 Colman Blk., $25,451; Barber Asphalt Paving Co., 619 Bailey Bldg., $24,964, and Stirrat & Goetz, Pioneer Blk., $24,643.

The City Engineer is stated to have prepared plans for a municipal asphalt plant, to cost about $60,000.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Jackson, Ala.—The Jackson Light & Power Co. is reported formed, with a capital of $20,000, to construct an electric railway to Grove Hill, a distance of 16 miles, construct electric lighting system, and water works. It is proposed to construct a dam across a creek near Jackson. Incorporators: C. H. Warren, C. E. Mathis, W. F. Monk and others.

Citronelle, Ala.—The Citronelle Light & Power Co. (S. E. Shannon, Secy., Hattiesburg, Miss.) is reported to be having plans prepared by E. N. Cunningham, of New Orleans, La., for a light and power plant.

Sulphur Springs, Ark.—Smith & Powers, of Sulphur Springs, are preparing plans for electric light plant and water works combined, to cost about $25,000.

Earl, Ark.—The Earl Light & Power Co. is reported organized, with a capital of $10,000. Directors, L. J. Machen, W. E. Duffus, C. C. Bird and others.

Eaton, Colo.—W. A. and Roscoe Farr and others are reported to have incorporated the Eaton Electrical Co., with a capital of $25,000, for the purpose of furnishing heat, light and power to Eaton.

New London, Conn.—The following are the bids opened on Sept. 30 by Maj. Harry Taylor, Corps Engrs., U. S. A., for furnishing 65 or more 25 k. w. electric generating sets (price given per set): The Otto Gas Engine Wks., Philadelphia, Pa., $3,400; Aug. Mietz, New York, N. Y., $3,600; N. Y. Safety Steam Power Co., New York, N. Y., $3,618.50; General Electric Co., Schenectady, N. Y., $3,085, and same company, $2,700 (alternative proposal).

*Essex, Conn.—The Essex Light & Power Co. is reported to have secured the contract to light the streets from the Essex steamboat dock to Ivoryton, for 3 years, with 47 lights, at $1,259 per year.

Washington, D. C.—The following are the totals of bids opened on Sept. 25 at the office of the Supt. U. S. Capitol Bldg. and Grounds for temporary electric lighting fixtures for the Office Building, House of Representatives, Washington: Cassidy & Son Mfg. Co., 133-135 W. 23d St., New York, N. Y., $12,877 (time of completion, Nov. 20, 1907). Horn & Brannen Mfg. Co., 427 No. Broad St., Philadelphia, Pa., $16,443 (Jan. 1, 1908); L. Plaut & Co., 432 East 23d St., New York, N. Y., $17,981 (Nov. 25, 1907); Mitchell Vance Co., 503-511 W. 24th St., New York, N. Y., $18,602 (Nov. 25, 1907); C. A. Muddiman & Co., 616 12th St., N. W., Washington, D. C., $19,432 (Nov. 23, 1907); Lawrence Gas Fixture Mfg. Co., Philadelphia, $20,500 (Nov. 25, 1907), and J. B. McCoy & Son, 114-120 W. 30th St., New York, N. Y., $25,149 (Nov. 25, 1907).

The plans of Secy. Wilson, of the Dept. of Agriculture, for an underground conduit between the Bureau of Engraving and Printing Bldg. and the new buildings of the Dept. of Agriculture, in order to furnish power for the electric illumination and heating of the latter buildings, is reported to have been approved by the District Comrs.

Madison, Ga.—The citizens are reported to have voted Oct. 7 to issue $50,000 bonds for water works, sewers and for improving the electric light plant.

Chicago, Ill.—The Chicago Heat, Power & Refrigeration Co. is reported incorporated, with a capital of $10,000, to distribute steam heat, electricity, and refrigerating fluid to office buildings, factories, and residences through a vast system of underground conduits radiating from a central plant to be built probably on the south branch of the river. Incorporators: Fred W. Blocki, Wm. F. Brennan, Jere. P. Bartholow and others.

Evansville, Ind.—It is reported that bids will be received until Oct. 28 by the Bd. Co. Comrs. for wiring the new County Infirmary building. Harry Stinson, Co. Aud.

Centerville, Ind.—The City Council, according to reports, contemplates establishing a lighting plant.

Farmersburg, Ind.—The Farr Electric Co. is reported incorporated, with a capital of $20,000, to construct and equip a new plant to generate electricity for light, heat and power purposes. Directors, W. F. Baldridge, E. W. Jennings and others.

Ft. Des Moines, Ia.—Bids will be received until Nov. 1 by Capt. John J. Boniface, Const. Y. M., U. S. A., for furnishing and installing electric light fixures, watt meters board and making service connections in the veterinary stable at Ft. Des Moines.

Conowingo, Md.—Jas. H. Harlow, Pres. Conowingo Bridge Co., is reported interested in the construction of a dam at Conowingo, near Havre de Grace, to develop about 100,000 h.p.

Baltimore, Md.—Bids will be received until Oct. 23 by the Bd. Awards, care J. Sewell Thomas, City Register, for furnishing, installing, equipping, maintaining and operating gasoline or naphtha street or outdoor lamps, with the use of incandescent mantle fixtures.

Bay City, Mich.—Bids will be received until Oct. 30 by the City Comptroller, for furnishing a steam turbine, generator, exciter, switchboard, boilers, Scotch type, and lamps, to re-establish the city's electric plant, as advertised in The Engineering Record.

Berrien Springs, Mich.—Contracts will probably soon be let for an electric light plant, consisting of 25 street lights, 5 miles of wire, etc. A. B. Ayers, Pres. Bd. Trus.; A. J. Hammond, Consulting Engr., South Bend, Ind.

Painesdale, Mich.—Engineer W. A. Rankin, of Painesdale, writes that no contracts will be let until spring for the proposed power plant to be constructed about 5 miles from Painesdale.

*Minneapolis, Minn.—Richd. Tattersfield, Secy. Bd. of Charities & Correction, writes that the contract for installing electric wiring for city workhouse (bids opened Sept. 21) has been awarded to the Northern Eng. Co., of Minneapolis.

The Com. on Gas on Oct. 9 recommended that bids be invited for gas, electric and incandescent street lighting and also for supplying the city with 7,000 or more lamp heads with the incandescent attachments.

Plattsmouth, Neb.—Earl G. Westcott is reported to have been granted a franchise for an electric light plant.

*The Omaha Electric Light & Power Co.. of Omaha, is reported to have secured the contract for lighting the city of Plattsmouth.

St. Paul, Neb.—The question of issuing $10,000 bonds for a nelectric light plant is reported under consideration.

*Paulsboro, N. J.—Frank D. Moses, of Trenton, is reported to have secured the contract for building municipal gas plant, for $28,000.

Clifton Springs, N. Y.—F. S. Burgett, of Clifton Springs, writes, with regard to the development of water power and for the lighting of the streets of this and nearby villages, that bids for teh work will be received nearby villages, that bids for the work will be received be presented to the Village Bd. for consideration.

Brooklyn, N. Y.—Bids will be received by C. B. J. Snyder, the Supt. School Bldgs, New York City, until Oct. 28 for installing electric equipment in new School 5, Boro. Brooklyn.

Wolcott, N. Y.—O. M. Curtis, proprietor of the Wolcott electric light plant, is reported to be considering the construction of a dam across Wolcott Creek.

Long Island City, L. I., N. Y.—The Bd. of Estimate of New York City on Oct. 11 revoked the franchise recently granted to the Queens Lighting Co. for supplying gas to the Boro. of Queens.

Ellis Island, N. Y. H., N. Y.—Bids will be received by Robt. Watchorn, Comr. Immigration, Ellis Island, N. Y. H., until Oct. 28, for furnishing material and installing electric conduits and wiring in new dormitories, 1st and 2d cabin rooms and balcony, 3d floor main building at the U. S. Immigration Station, Ellis Island, N. Y. H.

Cincinnati, O.—Bids will be received until Nov. 14 by the Bd. Trus. Memorial Assn. of Hamilton Co. (Elias R. Montfort, Pres.), at the office of Saml. Hannaford & Sons, archts., for furnishing material and installing light fixtures for the Soldiers' and Sailors' Memorial Bldg., at Grant and Elm Sts.

Eugene, Ore.—The Pacific Light & Power Co., of Junction City, is reported to be considering the construction of a power plant at Triangle Lake, about 30 miles west of Eugene, and will extend the wires to Eugene, Corvallis and Junction City.

Pierre, S. D.—See "Schools."

Aberdeen, S. D.—The Wagner, Lake Andes & Armour Traction Co. is reported to have petitioned the City Council for a franchise for an electric light and power plant; cost of proposed plant will be about $150,000 and will be capable of furnishing an all-night service to business houses and residences.

Beaumont, Tex.—It is reported that the directors of the Beaumont Ice, Light & Refrigerator Co. have decided to increase the capital stock for the purpose of enlarging its plant.

Manassos, Va.—We are informeed that all bids opened by O. E. Newman, Chmn. Improv. Com. of Council, on Sept. 28 for furnishing material and installing a water work and electric light plant and macadamizing the streets in said town have been rejected, on account of town being unable to sell bonds. A new election will be held, and after bonds are sold new bids will be received. Pressey & Weller, Engrs., 1416 F St., N. W., Washington, D. C.

Carnduff, Sask.—The Minneapolis Street & Town Lighting Co., of Minneapolis, Minn., is reported to have petitioned for a franchise to light town by electricity.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Jackson, Ala.—See "Power Plants, Gas and Electricity."

Decatur, Ala.—It is stated that the North Alabama Traction Co. will spend $10,000 or more on the extension and improvement of its street car system in Decatur. On some of the streets they are putting down a heavier rail. The company is also building an extension of a ½ mile to its line.

San Francisco, Cal.—Plans are stated to have been completed by the Southern Pacific Co for an extension to its local system, consisting of an electric train line to Hayward. The local line will be extended from Melrose north along a private right-of-way paralleling the foothill boulevard as far as Hayward. The line will be double-tracked.

Sacramento, Cal.—The Northern Electric Ry. Co., with a capital of $25,000,000, is stated to have filed articles of incorporation. The new organization has been formed to acquire the Northern Electric Co., the line of which runs from Chico to Sacramento, and the Shasta Southern, which runs between Chico and Hamilton, besides constructing new roads to the northern part of the State. It is proposed to build a road from Chico to Redding, a distance of 76 miles; from Sacramento to Folsom, 20 miles; from Sacramento Hamilton via Woodland, with a branch to Colusa, 103 miles. from Sacramento to Yuba City, 28 miles. Directors, Alan W. Maginnis, Curtis Hillyer, Francis C. Van Deinse, and others.

San Diego, Cal.—The City Council is reported to have adopted an ordinance granting a franchise to the Point Lorna Electric Ry. Co. to construct and operate lines on certain streets in San Diego.

Fitzgerald, Ga.—C. A. Holtzendorf and associates are stated to have been granted a franchise to equip and operate an electric street railway on certain streets of Fitzgerald

Lyons, Ill.—The Western Illinois Electric Traction Co.. is reported incorporated to build an electric railway from Lyons through the counties of Cook, Dupage and Kane to Aurora Capital, $100,000. Incorporators: M. M. Miller, E. J. Schmidt, L. Grollman, L. Michael, Wm. M. Klein.

Bunker Hill, Ill.—J. T. W. Rudisill is reported to have announced that the Wood River, East Alton & Bunker Hill Traction Co., East St. Louis, Ill., proposes to build an electric railway from Wood River through East Alton, Bethalto, Moro and Bunker Hill, 20 miles. Surveys are partly secured. Contracts will be let when right-of-way is secured. The Rude Engineering Co., First Natl. Bank Bldg., East St. Louis, is in charge of the engineering work.

*Items marked thus give the names of parties awarded contracts.

Indianapolis, Ind.—The Grand Central Traction Co., which is preparing to construct an electric line from Indianapolis to Evansville, is reported to have applied to the Bd of Pub. Wks. for two franchises. The first for a private right of way to enter the city from the southeast along the J. M. & I. tracks to Iowa St. The other to enter the city over the local tracks to the traction terminal station in the same manner other traction lines are now operating in the city.

Lafayette, Ind.—The Commissioners are stated to have granted a franchise to the Chicago & Western Indiana Traction Co. to construct and operate an inerurban railroad through Fairfield, Wea and Randolph Townships, in Tippecanoe County

Owingsville, Ky.—The Kaufman-Shaw Constr. Co., of Dayton, O., is stated to have in contemplation the construction of an electric railway from Salt Lick by way of Owingsville and Sharpsburg to Carlisle, Ky., 34 miles.

Alexandria, La.—The Kent Co., Ltd., is stated to have filed its charter with a capital of $100,000. The company proposes to operate electric and other street railways. A. Albert, Pres.; Benj. Weil, Secy.

Negaunee, Mich.—The Lake Superior & Ishpeming Ry. Co. will extend its tracks across the city on the north side, a distince of 2 miles, and to include 1 mile of trestle. The depot will be moved from present site on South side to the North side of city, a distance of 1½ miles. Bids for this work will be received by R. Young, ch. engr., Marquette, Mich.

Joplin, Mo.—It is reported that the Joplin & Pittsburg St. Ry. Co. will soon award contracts for machinery in connection with its proposed electric railway between Joplin and Pittsburg, Mo., a distance of about 24 miles. It is planned to erect a car barn at Joplin and two substations.

Mt. Vernon, N. Y.—The Mt. Vernon & Eastern R. R. Co. is reported formed to construct a standard gage steam or electric railroad from Mt. Vernon to Lewisboro, 35 miles long. Capital, $1,000,000. The Directors: Oakleigh Thorne, Chas. E. Mitchell, of New York; Marsden J. Perry, of Providence, R. I.; Geo. H. Hamsel, of Cranford, N. J., and others.

Cincinnati, O.—The survey of the proposed route of the Cincinnati. Reading & Middletown St. Ry. Co., which will operate 35 miles of traction line from Middletown and Franklin to Bond Hill and Norwood, is stated to have been completed. It is estimated that the road can be built at an expenditure of $25,000 per mile, or a total of $875,000.. Directors: Guy W. Mallon and Jos. Meyer, Cincinnati; Frank Koehler, Reading; R. M. Billingslea, Bethany, and others

Oklahoma City, Okla.—The Oklahoma City Electric Terminal Co. is reported to have been granted a charter. Capital, $2,500,000. Guy V. McClure, Chas. Combs, Warren E. Moore, J. J. Johnson and Fred. S. Combs are reported interested. According to the present plans two divisions of the system will give twelve miles' service. The proposed route begins at a point two miles east of the city and entering the city near the junction of the railroad tracks of the Frisco and Choctaw division of the Missouri, Kansas & Texas, and passing through to the west side will stop near where Main St. crosses the North Canadian River. The other line will start at a point near the south line of Capitol Hill and will pass through to the northwest portion of the city.

Memphis, Tenn.—The County Court is stated to have granted to the Clarksdale, Covington & Collierville Interurban Co. a franchise over roads, pikes and private property of Shelby County.

Ft. Worth, Tex.—Suderman & Dolson, of Houston, is stated to have secured the contract for the grading of the Fort. Worth, Weatherford & Mineral Waters Interurban Line. The cost will be about $1,750,000.

Salt Lake City, Utah.—The City Council is stated to have granted a franchise to the Utah Light & R. R. Co. for additional trackage from the intersection of Twelfth West St. to Fourth North St., giving a double track or single track from that point to Jordan River.

Wellsburg, W. Va.—The Bethany Trolley Syndicate, of Wellsburg, is reported chartered, with a capital of $10,000. Incorporators: J. L. D. Queen, R. M. Addleman, H. O. Moon and others, all of Wheeling. The purpose of the concern is to construct an electric railway from Wellsburg to Bethany and to maintain a power and water works plant.

Racine, Wis.—The Milwaukee Electric Railway & Light Co. is stated to have applied for a franchise to build a car line on 2d St., east of Main St., so that the plant of the Racine Gas Light Co. can be reached with freight.

RAILROADS.

Notes Arranged Alphabetically by States.

Kansas City, Kan.—The Gulf Short Line Ry. Co. is reported incorporated, with a capital of $36,000,000, to build a railroad from Kansas City, Kan., to Port Lavaca, Tex., estimated length, 1,500 miles, including branches. The road is to run through Wyandotte, Johnson, Miami, Douglass, Franklin, Osage, Coffey, Lyon, Chase, Marion, McPherson, Reno, Sedgwick, Cowley, Harvey, Butler, Greenwood Elk and Chautauqua Counties in Kansas; Osage, Kay, Noble, Logan, Payne, Lincoln, Oklahoma, Tulsa, Okfusee, Okmulgee, Huges, Pittsburg, Coal, Atoka, Bryan, Choctaw and Pushmataha Counties in Okla., and through the State of Texas Incorporators: J. P. Byrne and Louis E. Potts, of Oklahoma City, Okla.; Fred A. Jeran, La Junta, Col.; Charles F. Bridge and Jos. Ragsdale, Topeka, Kan. Offices to be at Kansas City, Kan., and Oklahoma City, Okla.

Kansas City, Mo.—The Special Com. appointed by City Council on the union depot ordinance is reported to have recommended the adoption of the ordinance which embraces the following conditions: A franchise for 6 tracks on the Belt line, 4 tracks on the North Side from the eastern city limits to Bway., and a right-of-way along the West Bluffs to 25th and Belt line to be granted the Kansas City Terminal Ry. for a period of 200 years; the said company to build and maintain a union station to cost not less than $2,000,000 within 3 years from date of granting franchise; and is required in addition to build and maintain 10 subways and 33 viaducts across the Belt line, and build and maintain freight depots at Sheffield, 15th and Askew Sts., and north of Grand Ave. near Heim's brewery; to dedicate to city, ground for a park fronting proposed new union station bet. Main St. and Bway. and 23d and 24th Sts., and 50-ft. strips of ground for roadways at certain points to connect streets vacated across the tracks. The city guarantees not to extend or open any new streets or roadways across grades and tracks specified. It also grants the Terminal Co. right to change grade of any present tracks not to exceed 3 feet.

Wilkesborre, Pa.—The Special Committe of Engineers representing the four railroads interested, at a meeting at New York, N. Y., on Oct. 4, is reported to have approved plans for the elimination of grade crossings in Wilkesbarre. E. B. Morgan, Chmn. Grade Crossing Comn.

**Coatesville, Pa.*—Willauer & Co., of Pottstown, are reported to have secured a contract from the Philadelphia & Reading Ry. Co. for the grading and masonry work for the change in alignment of about ½ mile on its Wilmington & Northern Division at Coatesville and G. F. Shoemaker & Co. for the bridge to be 4 spans and 250 ft. long.
Bldg., is the archt.

Abilene, Tex.—Edw. S. Hughes and Henry Sayles, of Abilene, are reported interested in the construction of a railroad from Temple via Gatesville, Hamilton and Comanche to Abilene, a distance of about 150 miles.

Surveys are being made for a railroad from Abilene, Tex., south to Ballinger, a distance of about 40 miles. Connection will be made with the Texas & Pacific R. R. and the Colorado Southern R. R. at Abilene, and with the Santa Fe at Ballinger. J. W. McDaniels, of Abilene, is Ch. Engr.

Roscoe, Tex.—The Roscoe, Snyder & Pacific Ry., chartered to construct a railroad from Roscoe (a station on Texas & Pacific Ry.) to Snyder, 50 miles, has its entire line graded and 5 miles of track laid. Work, which has been suspended, is to be resumed and the road completed. Martin Duval, Ch. Engr., Roscoe, Tex. Edw. S. Hughes, Abilene, Tex., is interested in the new organization.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

**Selma, Ala.*—The contract to erect the Carnegie Library, it is reported, has been awarded to Ernest Laramar, of Selma, at about $18,000.

Barber, Cal.—A. J. Bryan is stated to have prepared plans for the hospital which is to be erected near Barber by the Sisters of the Roman Catholic Church at a cost of about $30,000.

San Francisco, Cal.—The erection of a pest house on the Bay View site, it is stated, has been recommended by the Bd. of Superv. to the Bd. Pub. Wks. Probable cost, $20,000.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

San Diego, Cal.—It is reported that bids are to be asked at once for erecting a flouring mill at California and Ash Sts. for the Globe Grain and Milling Co., to have a capacity of 250 bbl. per day.
B. Rabimovita, iron manufacturer of Marietta, O., is said to be negotiating for a site in San Diego, to which he intends removing his steel plant at Marietta, O.

Long Beach, Cal.—Plans of the buildings which will comprise the plant of the Craig Shipbuilding Co., it is reported, to be erected at Long Beach have been received by Jos. E. Pugh, the local repressentative, and bids for their erection and also for the bulkheading, it is stated, will be called for at once. The various buildings to be erected are punch shop, 46x147 ft.; foundry, first section, 90x100 ft.; machinee shop, 90x128 ft.; powerhouse, 50x150 ft.; boiler house, 25x50 ft.; mold loft, 40x150 ft.; forge shop, 45x35 ft.; joiner shop, 40x50 ft.; bending floor, 35x35 ft., and office, 30x50 ft. All of these, save the last, will be of heavy mill construction, limited to one story, by reason of the weight of the machinery. The cribbing and bulkheading in front of the plant will be 600 ft. long, the cribbing to extend back 20 ft. The plans were prepared by Ch. Engr. Baker, of Craig Co.

Chicago, Ill.—The Scully Steel Co. is reported to have acquired a lease on a tract of 365,000 sq. ft., between 22d St. and the river, Morgan St. and the canal, and it is said, will build thereon an extensive modern plant.

Summit, Ill.—The Corn Products Co. (E. T. Bedford, Pres.), according to reports, intends constructing a plant, at a cost of $5,000,000, at 63d St., Summit. It is stated the buildings include 33 structures, the smallest of which will be 1½ stories, 60x140 ft. There will be 2 refining buildings, each 14 stories, 150x200 ft.; the wet starch building, 8 stories, 135x250, and another, 150x150; 3 buildings devoted partly to manufacturing and warehousing, each 150x400, and three other warehouses, 2 and 3 stories high, 100x300. Ten or 12 structures, each 4 stories, 100x150, with the exception of one which will be 300 ft. long, will be used for the various manufacturing processes. Grain storage tanks, with a capacity of 1,000,000 bushels, and a storage building, with a capacity of 10,000 tons of gluten feed, will be built. In addition to this there will be a power plant, with a total capacity of 12,000 h. p., and generators with a capacity of about 8,000 kw. The grinding capacity will be 50,000 bushels a day, the finished product output being 100,000 bushels a day. There will be 20 miles of railroad tracks on the property.

Kenner, La.—The Kenner Ice & Cold Storage Co. (Rube Van Dervort, Secy.), it is reported, intends erecting an ice plant of 20 tons capacity.

Pittsfield, Mass.—The Eaton Hurlbut Paper Co. write that it will let contract at once for the erection of a factory building, 50x50 ft., to cost $7,000.

Haverhill, Mass.—The Haverhill Building Assoc. is reported to have accepted plans and specifications for factory No. 2, to be erected on Walnut St. Estimated cost, $115,000. C. Willis Damon, Haverhill, Mass., Archt.

Newark, N. J.—It is reported that the J. .H. Ladew Co., of Glen Cove, L. I., N. Y., and Chattanooga, Tenn., have secured 20 acres of the Newark meadow land on the Passaic River, and propose constructing a plant having a capacity of 3,000 finished hides per day. It is stated that plans are being prepared for the buildings which are to be of brick and concrete fireproof construction and the largest, a tannery, will be 900 ft. long and contain 500 vats.

Carthage, N. Y.—The St. Regis Paper Co. of Deferiet, is reported to have purchased the plant of the Carthage Lumber Co. and will remodel the mill and install 15 barking machines for peeling pulp wood. It is also reported that they will increase the power of the mill, build a new conveyor to elevate their logs from the river and construct additional storage tracks for cars.

York, Pa.—The York Felt & Paper Co. (C. F. Black, Gen. Mgr.), is reported to be preparing to rebuild the mills recently destroyed by fire
It is stated that the York Mfg Co intends erecting a 2-story 150x230 ft brick addition to its plant in the West End, to be used as a foundry.

Philadelphia, Pa.—Sauer & Hahn are reported to have been commissioned to prepare plans for a cotton spinning and hosiery mill to be erected at a cost of $100,000 by the Standard Hosiery Co., at 1320 N. Lawrence St. The plant will include a 5-story spinning mill, measuring 50x150 ft.; an engine and boiler house, 36x96 ft.; a picker house, 36x44 ft.; a dye and bleach house, 18x98 ft., and a reinforced concrete reservoir. The buildings will be of reinforced concrete and slow-burning construction, with walls of brick. The work will also include the erection of a 5-story addition to the present hosiery mill, measuring 18x98 ft. Estimates for the work will shortly be invited.

South Pittsburg, Tenn.—W. H. Wilson is reported interested in a company which has been organized to erect a plant for the manufacture of concrete blocks, brick moldings, ornamental and monolithic work and to do all kinds of concrete construction.

Toronto, Ont.—McKenzie & Mann are reported to have made an offer to the city for a portion of Ashbridge Marsh on which it is proposed erecting a steel plant giving employment to 15,000 men.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Santa Monica, Cal.—See "Sewerage and Sewage Disposal."

**Ft. Benj. Harrison, Ind.*—Lewis & Kitchen, 901 Bway., Kansas City, Mo., are reported to have secured the contract for constructing garbage crematory at this post, for $4,200.

**Newark, N. J.*—L. J. Buckley & Co., of Glen Ridge, are reported to have secured the contract for the collection, removal and disposal of ashes, rubbish material, paper and garbage in the City of Newark for a period of 5 years, beginning Jan. 1, 1908 (bids opened Oct. 10 by the Bd. of Street and Water Comrs.), at the following bid for each year's work. Year 1908, $128,900; 1909, $133,700; 1910, $138,900; 1911, $143,875; 1912, $148,275. Other bidders and their totals were: J. & B. Meyer Contr. Co., $740,250; Van Keuren & Sons, $795,000; Geo. B. Aschenbach, $737,500, and Henry Scheider, $765,500.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Riverton, Ala.—The only bid received and opened on Oct. 12 by Maj. Wm. W. Harts, Corps Engrs., U. S. A., at Chattanooga, Tenn., for work on Colbert Shoals Canal, near Riverton, was submited by W A. Shippey, of Memphis, Tenn., and the North Alabama Constr. Co., of Florence, Ala., at the following bid: 350,000 cu. yd. excav., 26.24 cts.; 230,000 cu. yd. riprap (medium), $1.10; 2,800 cu. yd. riprap (large), $6.50, and 3,000 sq. yd. paving, $4.50.

Pine Bluff, Ark.—Bids will be received by Capt. Wm. D. Connor, Corps Engs., U. S. A., Reigler Bldg., Little Rock, until Nov. 16, for 248,000 cu. yds. levee work opposite site Pine Bluff on Arkansas River, as advertised in The Engineering Record.

Santa Monica, Cal.—See "Sewerage and Sewage Disposal."

San Francisco, Cal.—The following are the bids opened on Sept. 26 by Lieut. Col. John Biddle, Corps. Engrs., U. S. A., for dredging in Petaluma Creek: (*a*) Sect. 1, about 117,000 cu. yd.; (*b*) Sect. 2, about 29,000 cu. yd.: Edw. F. Haas, Merchants' Exchange Bldg., (*a*) 14 1-3 cts.; North American Dredging Co., Merchants Exchange Bldg., (*a*) 16.9 cts., (*b*) 20 cts.; Bay & River Dredging Co., 601 Mission St., (*a*) 8.4 cts., (*b*) 14.8 cts.

Long Beach, Cal.—See "New Industrial Plants."

Wilmington, Del.—Geo. H. McGovern, Asst. Secy. Bd. of Trade, writes that the question of improving the river front is in contemplation. Work not yet decided upon. T. H. Melvin, Pres. Street and Sewer Dept.

Toccoa, Ga.—Bids are wanted, it is stated, until Oct. 24 for constructing reinforced concrete walls and walks and grading and terracing plats. B. P. Brown, Jr., Ordinary.

New Boston, Ill.—Bids will be received until Nov. 7 by the Comrs. Bay Island Drainage and Levee Dist (R. H. Roberts, Chmn.) for constructing 50,000 cu. yd. ditch and 724,700 cu. yd. levee embankment in Sections 1 to 5, inclusive, and 138,300 cu. yd. main ditch, Sec. 6, and 165,000 cu. yd. Eliza Creek ditch, Sec. 7. Harman Engr. Co., Engrs. Peoria, Ill.

Goshen, Ind.—The Comrs. of Elkhart County are reported to be preparing to let contracts for constructing 12 ditches, including the Bechtel ditch, in Locke Township, 2 miles long, and the Null ditch, in same township, 2½ miles long.

Jersey City, N. J.—The following are reported to be the bids opened by the Bd. of Educ. on Oct. 10 for (*a*) building stone wall and approaches on street sides of grounds of high school; (*b*) erecting retaining wall on east side of grounds: Jos. Cutley, (*a*) $43,045, (*b*) $21,150; Jas. Whelan, Hoboken, (*a*) $48,600; M. T. Connolly Constr. Co., (*a*) $46,600, (*b*) $2,400.

Cold Spring, N. J.—The following are the bids opened on Oct. 3 by Maj. C. A. F. Flagler, Corps Engrs., U. S. A., Wilmington, Del., for construction of stone jetties in Cold Spring Inlet, N. J.: (*a*) 285,000 tons, (*b*) 2,000 lin. ft. piling, brush and stone jetty, (*c*) constructing pile, brush and stone wings, 1,050 ft.: Bennis Constr. Co., Philadelphia, Pa., *a* $2.37, *b* and *c* $35; Seacoast Constr. Co., New York, N. Y., *a* $2, *b* $16, *c* $12; Christie & Lowe, Chicago, Ill., *a* $2.60, *b* and *c* $50.

Ft. Totten, N. Y.—Bids will be received until Nov. 11 by the Disbursing Officer, Torpedo Depot, Ft. Totten, for steel submarine torpedo cases, as advertised in The Engineering Record.

New York, N. Y.—Governor Hughes has signed the bill designating a site on Riverside Drive for a water gate to be erected as a memorial to Robert Fulton. It will probably be located at W. 115th St. and cost about $1,500,000. W. H. Fletcher, 3 Park Row, is Secy. Robt. Fulton Memorial Assoc.
Bids will be received until Oct. 29 by Louis

Detroit, Mich.—Bids were opened on Oct. 7 by Col. E. L. B. Davis, Corps Engrs., U. S. A., for rock and earth excav., Sect. 2, Plan B, Detroit River, and the followings bids were received for the combined Sub-aqueous and Coffer-dam Method; also for Sub-aqueous Method only: (*a*) Grant Smith & Co., & Locker, Thorice, Mich.; (*b*) E. E. Oliver & Bro., Knoxville, Tenn.; (*c*)) Great Lakes Dredge & Dock Co., Chicago, Ill.; (*d*) S. O Dixon, Milwaukee, Wis.

COMBINED SUB-AQUEOUS AND COFFERDAM METHOD.

Sub-aqueous Method—	*a*	*b*	*c*
76,000 cu. yds. rock excav., full rate	$3.40	$3.50	$3.90
56,000 cu. yds. rock excav., half rate	1.70	1.75	1.95
280,000 cu. yds. earth excav., full rate	.60	1.00	.60
12,000 cu. yds. earth excav., half rate	.30	.50	.30
Coffer Dam Method—			
704,000 cu. yds. rock excav., full rate	1.24	1.24¾	1.50
44,000 cu. yds. rock excav., half rate	.62	.62⅜	.75
180,000 cu. yds. earth excav	.60	.50	.60
Coffer dam construction, lump sum	25,000.00	25,000.00	25,000.00
Coffer dam removal, lump sum	15,000.00	15,000.00	15,000.00
Pier removal	5,000.00	5,000.00	5,000.00
Totals	$1,578,440	$1,690,685	$1,819,200
Sub-aqueous Method Only—	*a*	*d*	*c*
736,000 cu. yds. rock excav., full rate	$2.60	$3.20	$3.30
144,000 cu. yds. rock excav., half rate	1.30	1.60	1.65
460,000 cu. yds. earth excav., full rate	.60	.47	.60
12,000 cu. yds. earth excav., half rate	.30	.23½	.30
Pier removal, lump sum	5,000.00	5,000.00	5,000.00
Totals	$2,385,400	$2,809,620	$2,951,000

**Items marked thus give the names of parties awarded contracts.*

F. Haffen, Pres. Boro. Bronx, for constructing anchorages for the concrete retaining walls and building drain at the Morris Heights approach to the N. Y. C. & H. R. R. bridge. Engineer's estimate: 500 cu. yds. excav., 500 cu. yds. filling and back filing, 4,000 lin. ft. bearing piles, 7 cu. yds. Classs "A" and 70 cu. yds. Class "B" concrete, 6,200 lin. ft. steel wire cable, 3/8-in. dia., 110 lin. ft. 16-in. and 18 lin ft. 8-in. c. i. pipe, 2,000 ft. lumber.

**Brooklyn, N. Y.*—The contract for furnishing material and building extension to pier bet. 51st and 52d Sts., Boro. of Brooklyn (bids opened Sept. 27 by J. A. Bensel, Comr. of Docks, N. C. City) has been awarded to the N. Y. State Constr. Co., 80 Broad St., for $17,303.

The Bd. of Estimate and Apportionment on Oct. 4 passed a resolution authorizing the issue of corporate stock in the sum of $10,000,000 for the acquirement and development of property along South Brooklyn waterfront, from 28th to 36th St., and from 58th to 61st St.; it is estimated that $6,000,000 will be required to pay for the purchase of property and the remainder to be used in building the docks which Comr. Bensel of the Dept. of Docks and Ferries has planned along the entire waterfront.

Panama.—Bids will be received until **Nov. 8 by the** Isthmian Canal Comn. at the office of H. D. Hodges, Genl. Purchasing Officer, Washington, D. C., for Portland cement, boiler, feed pumps, wire rope, rivets, etc., as per circular No. 307.

**Panama.*—The Isthmian Canal Comn. at Washington, D. C., is reported to have awarded to the Newport News Shipbuilding & Dry Dock Co., of Newport News, Va., the contract for furnishing 6 steel dredges for canal work for $120,000.

Philadelphia, Pa.—Bids will be received by Maj. J. C. Sanford, Corps Engrs., U. S. A., until Nov. 15, for dredging in Delaware River, in Sects. 4 and 5, as advertised in The Engineering Record.

Providence, R. I.—The New York, New Haven & Hartford, R. R. Co. (Edw. Gagel, Ch. Engr., New Haven, Conn.) is reported to be considering the construction of wharves and buildings on India St. and the extension of the harbor line to the south, and the relocation of the channel bet. Fox Point and the India Point Ry bridge, to cost in all about $1,000,000.

Charleston, S. C.—Plans are reported to have been completed by the Bureau of Yards & Docks at Washington, D. C., for constructing a pile and timber wharf at the entrance of the dry dock at the Charleston navy yard; probable cost, $75,000.

Bids will be received until Oct. 25 by Capt. E. R. Stuart, Corps Engrs., U. S. A., Charleston, for constructing hydraulic dredge, as advertised in The Engineering Record.

San Angelo, Tex.—The Atchison, Topeka & Santa Fe R. R. Co. (C. A. Morse, Ch. Engr., Topeka, Kan.) is reported to have decided to construct a 20-ft. dam across the North Concho River near San Angelo.

Two Harbors, Wis.—It is stated that an election will soon be held to vote on issuing $20,000 bonds for improving the inner harbor.

Ft. D. A. Russell, Wyo.—Bids will be received until Nov. 4 by Capt. V. K. Hart, 15th Inf., U. S. A., Cheyenne, for furnishing material and constructing a steel fence for enclosing quartermaster's carrols at Ft. D. A. Russell.

Portuguese Cove, N. S.—It is stated that bids will be received until Oct. 25 by Fred Gelinas, Secy. Dept. Pub. Wks., Ottawa, Ont., for the construction of a breakwater at Portuguese Cove.

Laprairie, Que.—Bids will be received until Nov. 4 by the Dept. Pub. Wks. (Fred Gelinas, Secy.), Ottawa, Ont., for constructing 2 ice piers in the river St. Jacques, at Laprairie. J. L. Milliard, Resident Engr., Merchants' Bank Bldg., Montreal, Que.

St. Simeon, Que.—Bids will be received until Nov. 4 by the Dept. Pub. Wks. (Fred Gelinas, Secy.), Ottawa, Ont., for constructing a head block to the wharf at St. Simeon. A. R. Decary, Resident Engr., Post Office, Quebec, Que.

**Ottawa, Ont.*—The Dept. of Pub. Wks. at Ottawa is reported to have awarded contracts as follows: Ferry wharf at Dalhousie, N. B., at $10,000, to J. & A. Culligan, of Kacquet River; breakwater at Trancook Island, Lunenburg, N. S., to A. W. Girroir & Sweet, of Antigonish, at $20,000: wharf at Agnes, Beauce County, Que., to A. L. Lapointe, of Agnes, at $4,000, and wharf at Sand Point, Renfrew County, to J. J. Fallon, of Cornwall, at $6,000.

Colborne, Ont.—Bids will be received until Oct. 24 by Fred Gelinas, Secy., Dept. Pub. Wks., Ottawa, for constructing a wharf and stone approach at Colborne. T. G. Senz, Res. Engr., Confederation Life Bldg., Toronto.

THE BUSINESS SITUATION.

The financial colic that afflicted New York this week is something that need cause little apprehension regarding the general business condition of the country. It was a symptom of mild distress attending the casting out from New York banking circles of a few individuals whose use of the funds of depositors has long been regarded with distrust by conservative financiers. The institutions they managed naturally failed to retain the confidence of many of their depositors, and in the sudden unexpected local demand for cash originating with these depositors, it was necessary to sell at any price large amounts of high-grade stocks and other securities. This forced sale coupled with attacks by bear traders produced a condition approaching a panic on Wall Street, but it was a strictly local upheaval that has had little effect on the country at large, except to produce a more careful consideration of credits. The situation was not without its humorous side, moreover, as when an officer of a trust company which was forced to suspend on account of its poor management attributed the suspension to "one man, who, in the last six months, in public and private speeches, has been gradually undermining the credit system of the country." The fact that the New York Trust Companies' Association did not help this institution, although perfectly able to do so had it seen fit, is all the commentary the above-quoted statement deserves.

This New York incident and a purely local disturbance in Pittsburg are merely examples of the results that sometimes follow the giving of too liberal credits by financial institutions. It would probably be a good thing for most of us to experience a little more difficulty in getting accommodation from banks for new ventures. It is a good many years since we had any experience with hard times, and while an early recurrence of them, of which there is slight probability, would be deplorable, a little stiffening of conditions now would be helpful in checking new ventures which will tie up large amounts of capital without much chance of appreciable returns for some years. While there seems to be absolutely no indication of trouble ahead for any legitimate business asking and giving only regular credits, it is a good time to be careful to avoid embarking on anything speculative or involving a heavy line of credits. The great commercial body of the country is a sensitive organism when in its healthiest condition, and if its life's blood, credits, suffers from anaemia, the results may become quite distressing without being serious. It must be most unsatisfactory for holders of shares of the best railroads to consider their depreciation of twenty to forty per cent. within ten months, yet the inherent value of the securities is just the same that it was in 1906. Their extraordinary low rate this week was due to the fact that they were the things on which money could be raised most quickly by people needing it in a hurry, and so they were thrown on a market not ready to absorb them in such quantities except at prices below their actual value.

THE ALLIS-CHALMERS REPORT.

The annual report of the Allis-Chalmers Co. for the year ending June 30, and a supplementary report by President Whiteside for the quarter ending Sept. 30, were made public on Oct. 24, and show some highly significant facts, which are doubtless gratifying to the stockholders. There has been a considerable change in the composition of the Board of Directors and four leading officials of the United States Steel Corporation have been elected to it, Judge Elbert H. Gary, Edmund C. Converse, Charles MacVeagh, the Steel Corporation's general solicitor, and Alexander F. Banks, president of its Joliet Eastern R. R. The finance and executive committees have been abolished, and the management of the company is practically in the hands of Judge Gary and President Whiteside. The changes in the directorate mean a great addition to the financial resources behind the company.

During the fiscal year, the results were not so satisfactory as expected on account of strikes, the failure of contractors to complete buildings and furnish machinery on time, and the large expense attendent upon the organization of the new plant and the development of new lines of manufacture. Beginning with the last quarter of the year, most of the adverse conditions had been overcome and the company entered upon the present period of steadily increasing net earnings, which is reflected in the following statement drawn from President Whiteside's supplementary report, dated Oct. 21:

	Gross Profit	Expenses	Net profit
April	$228,660	$191,261	$ 37,399
May	268,893	199,475	69,418
June	282,724	189,183	93,541
July	270,451	189,449	81,002
August	289,745	188,045	101,700
September	292,640	186,432	106,280

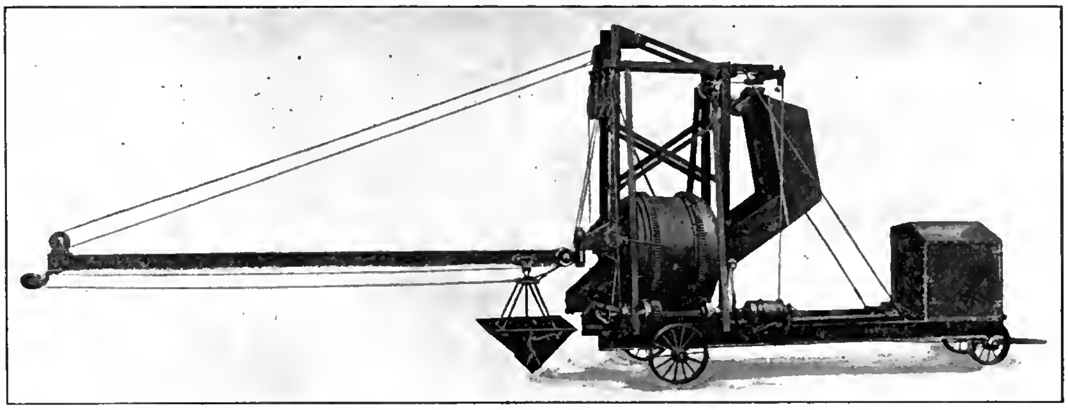
In this table the figures for expenses embrace general and selling expenses, interest on bonds, and the like. These figures are a better indication of the company's condition than those given in the annual report for the year ending June 30, since it was not until April that the company began to receive benefits from the newly-developed lines of machinery built at its enlarged West Allis plant.

A SPECIAL CONCRETE MIXER FOR STREET USE.

The accompanying illustration shows the general features of a concrete mixer designed to meet the special requirements of street work, although it is equally suited for the conditions that exist during the construction of many large retaining walls, bridge abutments and dams. The machinery is carried on a frame of 10-in. channels, supported on trucks provided with a traction drive for moving the mixer along the street when it is used in laying concrete foundations for pavements or in building subways or conduits.

The automatic loading bucket has a partition and the materials can be shoveled into it from both sides of the machine. In the illustration the bucket is shown pulled up to discharge its contents into the mixer. The latter has a capacity of 22 to 25 cu. ft. to the hatch and is of the standard Koehring type.

The mixing drum discharges the concrete into a special bucket which travels on an I-beam track, at any point of which it can be stopped and discharged. The standard length of this track is 24 ft., although a longer or shorter length can be furnished if desired. The track is connected to the frame by a universal joint, which allows it to be swung from one side of the street to the other side and to be raised at an angle of 45 deg. with the horizontal. When the machine is used in street work, the bucket will partially spread the concrete.



A SPECIAL CONCRETE MIXER FOR STREET USE.

The machine does away with all wheeling, which is expensive on account of the labor employed. It is furnished with gasoline, steam or electric motor power equipment by the builders, the Koehring Machine Co., Milwaukee, Wis.

THE HENNEPIN CANAL.

The formal opening this week of the Hennepin or Illinois and Mississippi Canal is an interesting event in transportation affairs in the upper Mississippi Valley. As long ago as 1864 the Iowa Legislature sent a memorial to Congress requesting the construction of a canal from Hennepin to Rock Island. The first survey was made in 1866 and several more were subsequently made before Congress made its first appropriation, in 1890, for the work.

The canal begins at the great bend of the Illinois River, 1¾ miles above the town of Hennepin, Ill., proceeds thence 62 miles via Bureau Creek valley and over the summit to Rock River at the mouth of the Green River, near Colona, Ill., thence by slack water down Rock River 8½ miles, thence by canal around the lower rapids of Rock River 4½ miles to the Mississippi River, making a total distance from the Illinois to the Mississippi River of 75 miles, and 193¼ miles from Chicago to the Mississippi River.

The canal is 80 ft. wide at the water surface, 7 ft. deep, with lock chambers 2,170 ft. in length and 35 ft. in width, capable of passing barges of 600 tons burden.

The summit level is about 11 miles in length, and the distance from its eastern end to the Illinois River

is 18.4 miles, with a difference of level of 196.4 ft., which is overcome by 21 locks. The distance from the western end of the summit level to the Mississippi River is 45.0 miles and the difference in level is 100 ft., overcome by 11 locks. The summit level is fed by a navigable feeder which is of the same size as the main canal and 29 miles long, beginning at Sterling, Ill., where water for the feeder is obtained by damming Rock River.

A lock is located at the head of the feeder as a guard lock and also to enable boats to pass from the feeder into the river and back at different stages of the water in the river. The dam located here also creates slack water in Rock River, enabling boats to navigate it as far as Dixon, Ill., giving to that place as well as to Sterling water connections with the canal.

Work was begun on the canal in July 1892, on the Mississippi River near the mouth of Rock River and the 4½ miles of canal around the lower rapids of Rock River, with slack water in the river above, were completed and formally opened to navigation on April 17, 1895, and since that time have been largely used by coal boats from the mines on Rock River.

RECENT INSTALLATIONS OF LARGE GAS ENGINES.

Power users in practically all lines of business have shown very active interest in recent gas engine installations, the natural result of the unprecedented scale upon which the U. S. Steel Corporation has entered upon the use of gas power. The saving in fuel effected by use of the gas engine as a prime mover has long been fully realized by power users of this country, yet little progress has been made except in the natural gas district, chiefly because of a widespread doubt as to the reliability of engines of this type. The performance of the engines already installed by leading gas engine manufacturers has, therefore, been watched very closely and the record of some recent installations will undoubtedly prove of interest to all power users.

The first Allis-Chalmers gas engine to be put in constant service was a tandem engine of 1,000 h.p. maximum capacity direct connected to an Allis-Chalmers direct-current generator of 500 kw. rated capacity. This unit is installed at the Milwaukee works of the Illinois Steel Co. Although it was the first gas engine built by this company, it started successfully on its first trial, and after a few days devoted to the tests and adjustments natural in a first installation, the engine was put in continuous day and night operation where it has remained ever since, only shutting down with the mill on Sunday.

As would be expected of an engine installed at a rolling mill, the load varies greatly in character and is subject to wide fluctuations. Mill motors in all classes of service and incandescent lights are carried from the same generator, but the regulation is so close that there is practically no change in voltage with changes in load, even such as would be shown by flicker of the lights.

Another unit of 600 h.p., direct connected to a 350-kw. Allis-Chalmers direct-current generator, has been for some time in service at the works of the Trenton Iron Co., Trenton, N. J. This engine is supplied with gas from producers furnished by the R. D. Wood Co. The unit differs slightly in type from the one just described, and was the first of its size and type to be started by Allis-Chalmers Co. This unit has been in continuous service ever since first started, on load ranging from full rated capacity to 50 per cent. overload.

A 2,000-h.p. Allis-Chalmers engine direct-connected to a 1,000-kw. generator has been for some time in operation on blast furnace gas at the plant of the National Tube Co. at McKeesport, Pa. This engine is a twin-tandem or a four-cylinder engine with cylinders of the same size as those installed by the Milwaukee works of the Illinois Steel Co. It was but natural, therefore, that this engine should be put into regular service immediately on starting up and give the same satisfactory results as were obtained by the Milwaukee plant. This engine is the first of several units which Allis-Chalmers Co. are installing at the same plant. Power is used for mill motors and lights and, as is customary in the steel business, all these engines are operated on 24-hr. service.

Two units, duplicates of the unit at McKeesport, are just going into service at the power house of the Milwaukee Northern Railway Co. at Port Washington, Wis. This is an interurban line, with Milwaukee as its southern terminal, operated exclusively by gas power. The generators are 1,000-kw. Allis-Chalmers three-phase 25-cycle alternators, direct connected to Allis-Chalmers gas engines, the gas being supplied by producers.

A duplicate of the Trenton engine, using natural gas, has also been recently put in service at the Kokomo plant of the Pittsburg Plate Glass Co. This is the first of a number of units which Allis-Chalmers Co. is building for that service.

Two units of 4,000 h.p. each, consisting of Allis-Chalmers gas engines direct connected to 2,000-kw. Allis-Chalmers alternators, will very shortly be put in operation at the South Works of the Illinois Steel Co., South Chicago, Ill. These engines operate with blast furnace gas, and as the design in all respects duplicates that of the engines already in service, there is every reason to believe that they will start up with the same characteristic absence of difficulty.

Another 4,00,-h.p. unit is now in the course of erection at one of the Carnegie plants in the Pittsburg district, this unit being the first of seven 4,000-h.p. units which are being installed at the rate of one every thirty days in the same power house.

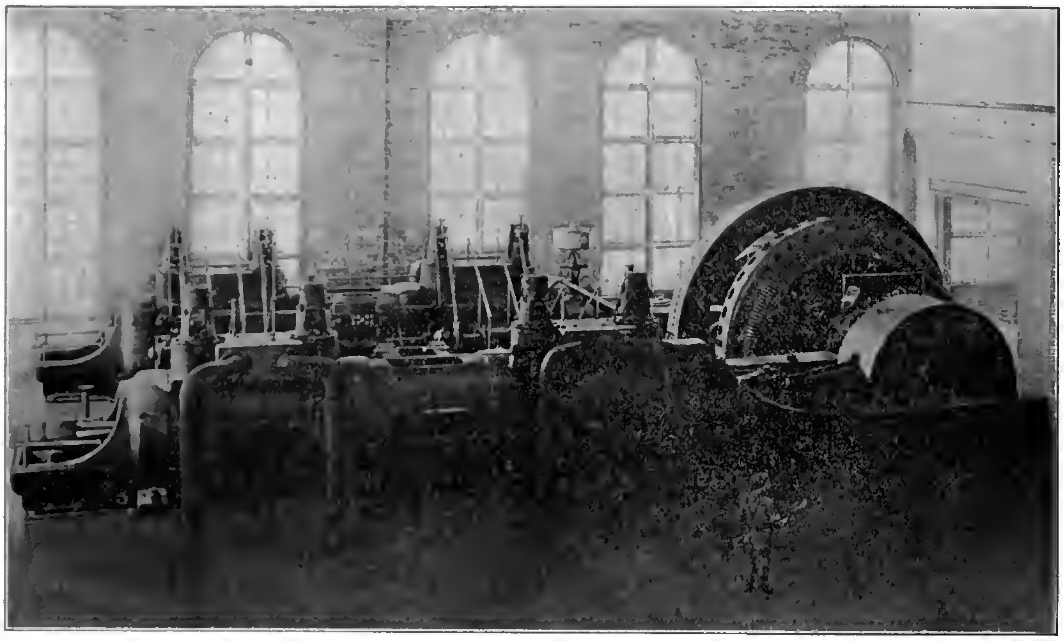
The performance of those first engines is being given especially close attention by the officials of the Indiana Steel Co., at whose new mills at Gary gas power is to be used exclusively. The entire electric power equipment of this plant is being supplied by the Allis-Chalmers Co. The portion now under contract consists of 17 Allis-Chalmers gas engines rated at 4,000 h.p. each. Fifteen of these are direct connected to Allis-Chalmers 25-cycle three-phase alternators, which will operate in parallel and supply current to more distant portions of the mill; two are direct-current generators supplying current for portions of the plant immediately adjacent to the power house.

The Allis-Chalmers Co. is also building eight blowing engines with the same size gas cylinders as electrical units for the same plant, making 25 engines, or a total of 100,000 h.p. which the company is supplying for this power house alone. It will require approximately 1,000 carloads to complete the shipment of these engines.

The electrical power house, in which will be installed the seventeen electrical units, is 1,000 ft. long and 105 ft. wide. Switchboards are arranged in the gallery at such height that all of the units and the signals of the engine attendants may be readily observed by the operators at the switchboard. It will be one of the largest power houses in the world, and the electrical generating station at this plant alone will be double the size of any previous gas engine installation either at home or abroad. The power house containing the Allis-Chalmers blowing engine units is of the same width as the electrical house and 600 ft. long. These figures give some idea of the magnitude of this gas engine installation and of the confidence which the designers of this great plant repose in the Allis-Chalmers gas engine as a prime mover. The realization of this is, in large measure, responsible for the great interest in gas engines now shown by power users in other lines of industry.

With gases being wasted which were suitable for use in gas engines, it was but natural that the iron and steel industries should be the first to adopt the use of gas engines on a large scale. The saving in the first cost of fuel, however, is to a certain extent offset by the interest charges on the cleaning apparatus which is necessary in order to remove from blast furnace gas the abrasive dust with which it is charged; this extensive cleaning apparatus, however, is not necessary where producer gas is used.

A great many power installations have been delayed in order to allow time for the first large gas engines to be put into service and to demonstrate whether they would justify the expectations of their builders and designers. Since these Allis-Chalmers engines have started up there has been a considerable increase in inquiries and a number of contracts of this nature have been entered into within the past few months. It is manifest that the gas engine using producer gas is now to take its place permanently as a prime mover in situations where the cost of fuel makes economy in this direction especially desirable.



FOUR-CYCLE DOUBLE-ACTING GAS ENGINE OF MILWAUKEE NORTHERN RAILWAY.

The Northern Engineering Works, Detroit, Mich., has furnished three electric cranes to the North Shore Electric Co., two at Waukegan, and one at Blue Island, Ill.

CONCRETE-METAL BRIDGE PIER.

Mr. Samuel H. Lea, State Engineer of South Dakota, has recently received a patent for a concrete-steel bridge pier consisting of an annular framework of steel bars, forming a structure of any desired shape in plan, and having an inner and an outer surface with an annular space between them as shown. One or both surfaces of the metal framework is covered with wire lath or other suitable material, so as to form a diaphragm over the surface covered. The annular space within the framework is filled with concrete, the outer and inner coating over the metal diaphragm and framework being of rich cement mortar. The sides of the structure are held the proper distance apart by braces, spaced at suitable distances. The lower part of the framework is securely fastened to a shoe, having a cutting edge on the bottom.

This form of construction is intended for a bridge pier, abutment, bulkhead or other similar purpose. It may also be used as an open caisson or as a pneumatic caisson; in the latter case an air-tight cover is placed at the top or at any height between the top and bottom, and provided with the necessary valves and air locks. When used as an open caisson the structure is sunk at the required place and the material within the open interior space may be removed by whatever means may be most convenient.

This form of construction is claimed by the inventor to possess strength, durability and portability as compared with forms in general use. The steel framework affords the necessary tensile strength and rigidity; it is thoroughly protected from rust by the enveloping cement and concrete, which is practically indestructible and affords weight and solidity. The structure can either be previously made as a whole and then put in place at once, or it can be made in sections and put together as it settles in place. The structure may be settled in place by its own weight or, if this is not sufficient, additional weight to the required amount may be applied. When the structure rests securely on the bottom the lower interior portion is filled with concrete out to the cutting edge of the shoe to afford a firm bearing. If no bed rock or other firm foundation is found, piles can be driven inside the structure to afford a good foundation, there being sufficient clear space for this. After the foundation has been properly arranged the entire space inside the hollow pier may be filled with lean concrete or with stone or gravel, or with ordinary earth, as may be preferred.

The advantage of cheapness should not be overlooked in this form of construction. The bulk of the work on the ground may be done with common labor; concrete work not requiring technical skill in mixing and placing when this is done under intelligent supervision. The cost of a structure of this kind should usually be far less than that of an ordinary form of construction.

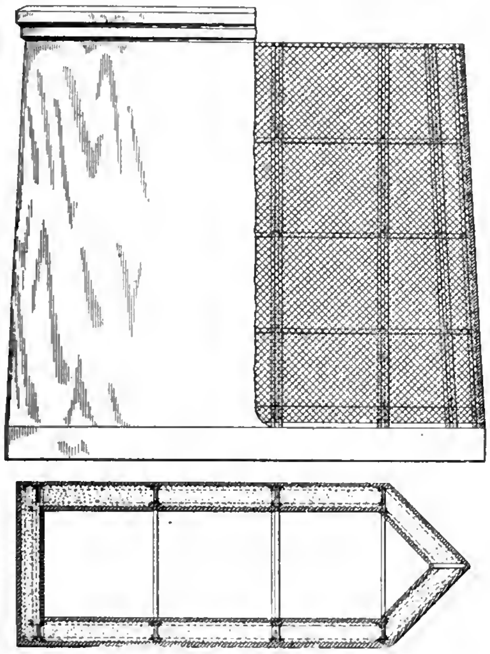
A NEW BALANCED VALVE.

The balanced valve, shown in the accompanying illustrations, was designed and patented by Mr. J. Peterson, Assoc. M. Am. Soc. C. E., 299 Broadway, New York, and six of them, 12 and 48-in. in size, are now in use in Gate House 2 of the new Croton dam. The valve consists of a casing adapted to be submerged in a reservoir or well and provided with ports at all times open to the inflow of water. This casing has valve seats above and below the ports and is surmounted by a bonnet. Within the casing is a plug designed to bear

against the valve seats and operated by a stem, extending through the stuffing box at the top of the bonnet.

In its closed position, the conical peripheral edges of the plug bear snugly against the valve seats. When the valve is opened by operating the stem, the plug is lifted upward from its position and the water flows into the pipe through the ports; as the pressure is all around the plug, it is thus balanced and the gate may be operated with little exertion and with facility.

This gate can be attached in a vertical as well as horizontal position, at the end of intake pipes, in place of a sluice gate. It can also be used in place of ordinary disk



REINFORCED CONCRETE BRIDGE PIER.

gates on a pipe line, in fire hydrants and similar situations.

The advantages claimed for this gate by the designer are simplicity of construction, ease of operation under any head, the only thing to overcome in operating the valve being the weight of the plug and the friction of the stem in the stuffing box, and the speed of operation for it requires only one-third the time to open or close it, that is, with an ordinary sluice gate or disk valve.

THE WESTINGHOUSE RECEIVERSHIP.

On account of the sudden unexpected hardening of the money market in New York this week, at a time when some large financial changes had to be made by several of the Westinghouse companies, it was concluded better for all concerned to place them in the hands of receivers. The following statement by Mr. George Westinghouse explains the situation:

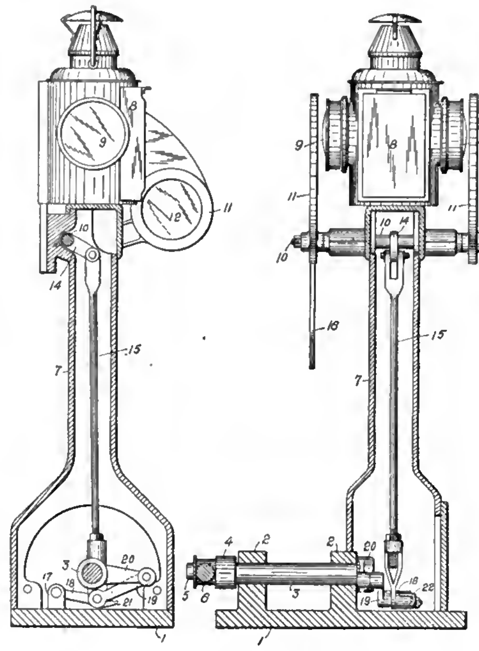
"When the Pittsburg Clearing House Committee, after a full investigation and conference with me, concluded that, although the Westinghouse Electric and Manufacturing Company, and the Westinghouse Machine Company were solvent, receiverships were advisable as the best means of protecting the interests of all concerned, it was clearly our duty to follow their friendly advice. The necessity for the receiverships is due solely to the acute financial stringency, and consequent inability to renew our maturing paper.

"Both the electric and machine companies are solvent, and are doing the largest and most satisfactory business in their history, and each company is earning liberal dividends on its stock, and has quick assets subsequently equal to its liabilities. I most confidently believe that every creditor of each company will be paid in full, and that, with wise management, under the direction of the receivers appointed by the court, the properties will soon be restored to the stockholders."

A NEW TYPE OF DWARF SEMAPHORE SWITCH STANDS

The switch stand here shown is of the dwarf semaphore type designed to be used in yards, as distant or caution signal and at all facing point switches where dwarf stands are now used. The same principle, however, incorporated in higher stands at main line sidings may be employed with equal facility and a corresponding increase in the reliability of the signal.

The object of this device is to insure the movement of the signal to danger on or before the departure of the split rail from the stock rail. Heretofore, in dwarf semaphore stands, the motions of the split rail and the spectacle casting have been relatively synchronous, that is the spectacle partook of the motion of the split rail throughout its entire throw. For example, suppose the switch to be open and the signal at danger. The brakeman throws the switch and instantly upon lifting the ground lever the semaphore blade starts toward the clear, and when the split rail is within, say, ½ in. from the stock rail the semaphore blade has traveled down through 50° towards its clear position of 60° from the horizontal, Should there be any obstruction such as a nut, gravel or sand between the split rail and stock rail to prevent any further travel of the former, the split rail and the semaphore will remain in this relative position, i.e., the switch sufficiently open to derail a train, with the semaphore blade at an angle of 50° downward from the horizontal.



A NEW SWITCH STAND.

The design of this stand prevents such a contingency by a mechanism which throws the signal to danger before any motion of the split rail takes place, and brings the signal to the clear after the split rail is in contact with the stock rail. This result is accomplished by a mechanical motion which destroys the synchronosity of the movements of the two parts in the following manner:

The motion consists of a toggle comprising a pair of links the one, 18, being pivoted to a fixed bearing, 17, cast in the bedplate of the stand, and the other, 19, being pivoted to a crank, 20, of the shaft, 3, which is integral with the ground lever, 4. The up-and-down rod, 15, connects the toggle with the spectacle casting through a rock shaft, 10, upon which the spectacle is mounted. Starting to follow the motion from the clear position, the working is as follows: The arrangement of pivotal centers is such that, as the crank, 20, rises it lifts the toggle-joint until the latter reaches the level of the crank-axis. In this position an extension, 21, of the link, 18, comes in contact with a pin, 22, on the link, 19, preventing any further upward motion of the toggle-joint. At this stage of the motion the toggle-joint has traveled a sufficient distance to throw the semaphore to danger. Up to this point, due to the angularity of the connecting rod, the split rail has not moved, and the desired result is accomplished, i.e., the signal is at complete danger before any motion of the switch. The remainder of the motion the links, 19 and 20, which are now superimposed, complete the half circle as a unit with no further motion of the signal and while the switch is being fully thrown.

The closing of the switch is merely a reversal of this motion. The links 19 and 20 travel as a unit until the position is reached at which place the switch is closed, when the pin, 22, engages the extension, 21, of the link, 19, and starts the downward motion of the toggle-joint.

This type of stand has been approved by the general managers of the Harriman lines and will be extensively used in the future. Several successful experiments and tests have been made in the Oakland yards of the Southern Pacific and plans are now being made for the manufacture of a large number of stands. The stand was invented by Mr. J. D. Isaacs, consulting engineer for the Harriman lines; Mr. W. W. Slater, signal engineer for the same interests, and Mr. M. R. Daniels, of the firm of Daniels & Dillman, consulting engineers, Monadnock Bldg., San Francisco. The preceding notes concerning the apparatus have been furnished by Mr. Daniels.

PERSONAL NOTES.

Mr. Howard Egleston has been appointed resident engineer on construction on the Canea, Yaqui Valley & Pacific Ry.

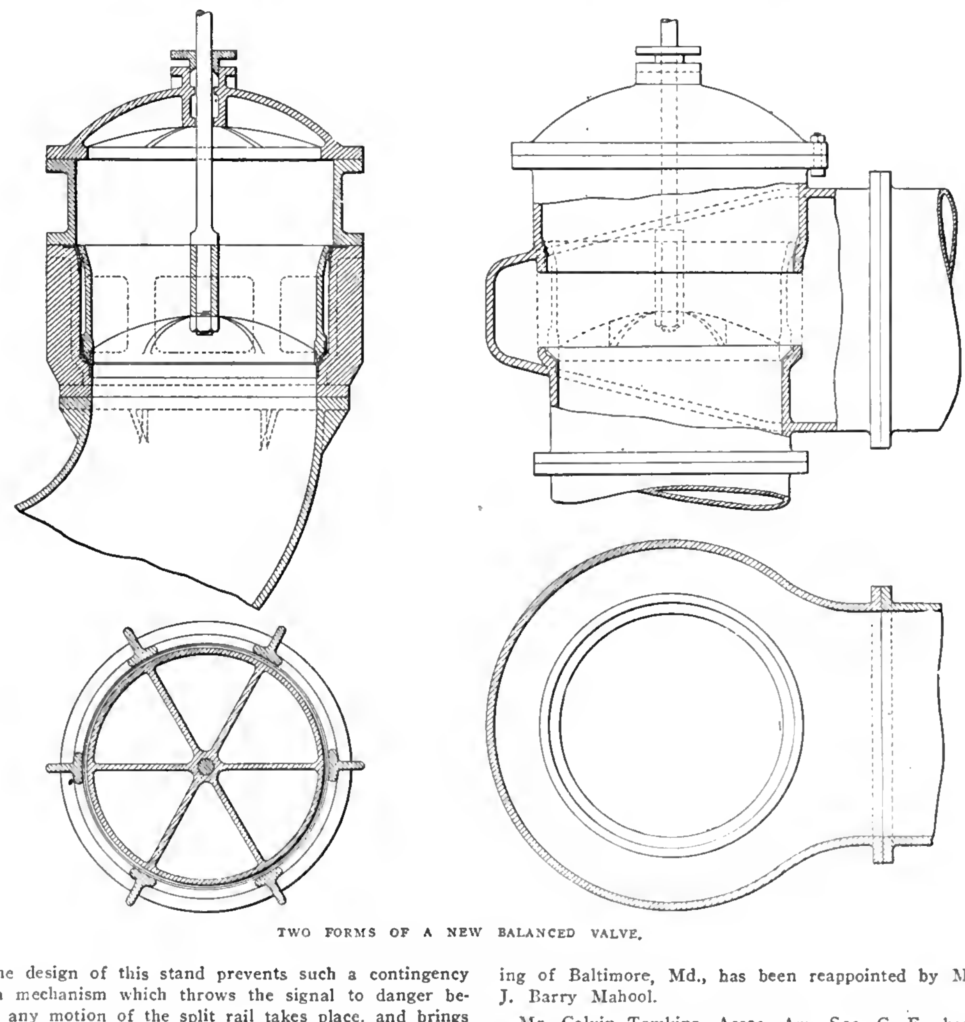
Col. Joseph L. Wickes, commissioner of street cleaning of Baltimore, Md., has been reappointed by Mayor J. Barry Mahool.

Mr. Calvin Tomkins, Assoc. Am. Soc. C. E., has declined a nomination as sheriff on the ticket of the Citizens' Union of New York City.

Mr. E. E. Stone, assistant chief engineer of the Boston & Albany R. R., has been appointed engineer of maintenance of way of the same line.

Mr. Edmund W. Kent, superintendent of the water department of Woonsocket, R. I., is to become general manager of the Newport Water Co., Newport, R. I.

Messrs. C. J. Aschauer and W. H. Lienesch have



TWO FORMS OF A NEW BALANCED VALVE.

formed a partnership as architectural engineers, under the firm name of Aschauer & Lienesch, with offices at Decatur, Ill.

Mr. Bion J. Arnold, of The Arnold Co., Chicago, has been appointed consulting engineer for the subway systems of New York City by the Public Service Commission of New York.

Mr. J. M. Floesch, chief engineer of the Buffalo, Rochester & Pittsburg Ry., has resigned to become associated with a contracting firm engaged in building the Grand Trunk Pacific Ry.

Senor Narcisco Puig, government engineer of roads, canals and ports of Spain, and Senor Jose Nicholan, also an engineer in the service of Spain, are studying irrigation works in Colorado.

Mr. W. M. Foust has been appointed water commissioner of Cheyenne, Wyo., to fill the vacancy caused by the death of W. D. Pease, and Mr. Z. E. Sevison has been appointed assistant city engineer.

Mr. R. K. Rochester, principal assistant engineer of the Vandalia R. R. Co., has transferred his headquarters from Indianapolis to St. Louis. Mr. H. L. Simpson has been appointed assistant engineer at Indianapolis.

Mr. Philip L. Farley, formerly assistant superintendent of the Bergen Point Chemical Works, Bayonne, N. J., has opened an office in Long Island City, N. Y., as a civil engineer and specialist in municipal improvements.

Mr. F. D. Smith has resigned as superintendent of construction for the Stevens-Hewitt Engineering Co., New York City, and has opened an office at 123 Liberty St., New York, where he will engage in the business of electrical contracting.

Thomas Hilton Williams, Sr., president of the A. A. Griffin Iron Co., and the E. A. Williams & Son Brass Foundry, Jersey City, N. J., died recently, aged 59 years. He was a member of the American Society of Mechanical Engineers.

Messrs. Percy H. Thomas and N. J. Neall have entered into partnership, under the firm name of Thomas & Neall, for the practice of electrical engineering. Offices will be maintained at 52 William St., New York, and 12 Pearl St., Boston.

Mr. C. K. Koppes has resigned as assistant engineer of the Chicago, Milwaukee & St. Paul Ry., with headquarters at Milwaukee, Wis., to become resident engineer of the Cleveland Short Line Ry., with headquarters at Cleveland, Ohio.

Mr. Archibald Buchanan, Jr., superintendent of motive power of the Central Vermont Ry., has resigned to become chief of the bureau of inspection of the Public Service Commission of New York State. Mr. Buchanan's headquarters will be at Albany.

Capt. Horton W. Stickle, Corps of Engineers, U.S.A., on duty at the Military Academy, West Point, as assistant to the officer in charge of construction, has been ordered to Culebra, Canal Zone, for duty in connection with the construction of the Gatun locks.

The Supreme Court of New York recently granted an order permitting the American Society of Mechanical Engineers and the Mechanical Engineers' Library Association, a subsidiary corporation, to consolidate into one corporation under the name of the former organization.

George Frederick Bodley, one of the most eminent architects of Great Britain, died recently. He is best known for his ecclesiastical buildings. He was associated with Mr. Henry Vaughn, of Boston, in the preparation of plans for the new Cathedral of St. Peter and St. Paul in Washington, D. C.

The New York State Civil Service Commission will hold an examination Nov. 16, of candidates for the position of assistant civil engineer in the service of the Public Service Commission. The last day for filing applications is Nov. 9. For further information address Mr. Charles S. Fowler, chief examiner, Albany, N. Y.

Mr. H. J. Slifer, formerly general superintendent of the Chicago, Rock Island & Pacific Ry., has been appointed assistant to the president of the Panama R. R. He will assume the duties of Mr. W. G. Bierd, who recently resigned as general manager to become general superintendent of the New York, New Haven & Hartford R. R.

Messrs. John R. Freeman, consulting engineer to the New York City Board of Water Supply, and Charles L. Harrison, principal assistant engineer of the Pennsylvania, New York & Long Island R. R. Co., have been selected to represent the Denver Union Water Co. on the board of appraisal that is to determine the value of the company's plant.

Director Fred. H. Sykes of the Extension Teaching Department of Columbia University states that during the coming winter there will be twenty evening courses of twenty-five weeks, specially adapted to the needs of technical and professional men interested in applied mechanics, architecture, electricity, fine arts, industrial chemistry, mathematics, surveying and structures.

Mr. J. P. Snow, bridge engineer of the Boston & Maine R. R., in an address before a recent meeting of the American Association of Railway Bridge Builders, at Milwaukee, Wis., urged the enactment of a Federal law compelling the use of brine receptacles on refrigerator cars as a protection to bridges. The following officers were elected at the same meeting: President, R. H. Reid, Cleveland; vice president, John P. Canty, Fitchburg, Mass.; secretary, S. F. Patterson, Concord, Mass.; treasurer, C. P. Austin, Medford, Mass.

Charles Ezra Hequembourg, consulting civil engineer, died Oct. 17, at his home in Dunkirk, N. Y. He began his professional career in 1865 as engineer in charge of field work for the Tennessee & Cumberland Oil & Mining Co. From 1866 to 1872 he engaged in the contracting business and built, among other works, the water-works of Dunkirk, N. Y. Shortly after this he was contracting engineer for an important part of the water-works of Chicago. Subsequently he became engineer for several gas companies and for several years after 1888 he was consulting engineer for the Chicago gas trust and its successors. In 1893 he established a consulting practice. He was a member of the American Society of Civil Engineers.

Mr. Dai H. Lewis, 760 Main St., Buffalo, N. Y., has been elected to manage the 1908 convention of the National Association of Cement Users, which will be held Jan. 20-25, 1908, in the old 65th Regiment Armory, Broadway and Potter Sts., Buffalo, N. Y. The convention headquarters will be at the Iroquois Hotel. Application blanks for exhibit space can be secured by addressing Mr. Lewis. The assignments of space to those making application before 12 o'clock noon Nov. 16, 1907, will be made in the order in which the applications are drawn one by one, after having been thoroughly mixed. Applications for space received after 12 o'clock noon, Nov. 16, 1907, will be filled as received. The exhibit sections are in general 10 x 12½ ft., and the charge per single section is in most cases twenty dollars.

The Siegfried Advertising Agency, devoted especially to real estate, financial and marine advertising, has been established by Henry K. Hannah and Frederick H. Siegfried, who also control the Realty News Bureau, the offices of both being located at 277 Broadway, New York. The new agency already represents fifteen or more well-known realty and financial companies, capitalized at upward of $75,000,000, and will be managed by Mr. Siegfried, a former Boston Herald man, who was several years in charge of the business end of The Engineering Record and has more recently devoted himself to the interests of several large New York realty concerns. Mr. Siegfried is the elder son of the late A. H. Siegfried, general manager of the Curtis Publishing Co., and one of the most widely known general advertising men in America ten years ago.

BUSINESS NOTES.

The Ambursen Hydraulic Construction Co., of Boston, Mass., has been employed to design and supervise the construction of a concrete-steel dam 22 ft. high and 750 ft. long, across the Rappahannock River, near Fredericksburg, Va., for the Fredericksburg Power Co. Work will be commenced immediately.

The new addition to the machine shop of the Duquesne plant of the Carnegie Steel Co. has been equipped with Pittsburgh high speed vises made by the Pittsburgh Automatic Vise & Tool Co.

The Canadian Rand Co., Limited, of Montreal, have opened up a show room at 11 St. Nicholas St., where they display a complete line of air compressors, rock drills and Imperial pneumatic tools. A small stock of repair parts will also be carried in stock for the convenience of local customers. This is the only place in Montreal where such a stock is displayed.

Since April 1 of this year the Traylor Engineering Co. has occupied commodious offices on the top floor of the new United States Express Bldg., 54-56 Trinity Pl., New York. About 150 people, one-third of whom are engineers, are now constantly employed in the office. The plant at Allentown, Pa., where the company's mining, crushing and cement machinery is made, now covers over 6½ acres. The entire plot of ground at the plant contains 19 acres.

The J. R. Alsing Co., founded in 1869, has changed its name to the J. R. Alsing Engineering Co., under the laws of the State of New York and increased its capital stock from $20,000 to $100,000. The officers will be the same as in the old company. The increase in business compelled the change.

It has been officially confirmed that Mr. Wm. Frank Hall, who represented the Bradley Pulverizer Co., manufacturers of the Griffin mill during the last seven years, has resigned and accepted a position with the Lehigh Car, Wheel & Axle Works to further the sale of their Fuller-Lehigh pulverizer mill. An office has been opened in New York in the Trinity Bldg., where Mr. Hall will make his headquarters. The Lehigh Car, Wheel & Axle Works has also opened an office in Kansas City, Mo., in the Scarritt Bldg.

The Southwestern Bridge Co., of Joplin, Mo., has opened contracting offices as follows: Dallas, Tex., 806 Wilson Bldg., Mr. J. I. Boggs, contracting engineer; Oklahoma City, Okla., 317 Culbertson Bldg., Mr. R. X. Basford, contracting engineer; Denver, Colo., 726 Symes Bldg., Mr. George A. Sears, contracting engineer.

The Cuba Railway Co., with headquarters in New York City, recently purchased a No. 4 K Gates crushing plant from the Allis-Chalmers Co. for use at Camequey, Cuba. It is expected that this plant will be used successively on the several divisions of the road, situated, in each instance, between the quarry and the right of way, parallel to which boilers, bins and crushers are arranged so that the product may be readily dumped into cars for distribution along the line.

TRADE PUBLICATIONS.

Catalogue 69A of the Jeffrey Mfg. Co., Columbus, Ohio, is devoted to Jeffrey screens, which are built for the purpose of treating all classes of materials, including coal, trap rock, chemicals, clay, coke, plaster, marble, slate, ores, quartz, sand and other materials. Illustrations are presented of the various types of screens, from those of the cylindrical revolving type to the shaking and vibrating screens of the various types. Interesting detailed plans are presented of vibrating screen plants, and considerable information of interest is added concerning the screening of materials.

The Manufacture of Modern Welded Pipe is the subject of a most attractive pamphlet devoted to the important subject of pipemaking, which has recently been issued by the National Tube Company, Pittsburg, Pa. The pamphlet presents a series of illustrations, which show the progressive operations from the iron ore to the finished product in the process of making modern welded pipe, beginning with interesting illustrations of ore mining in the Mesaba range, steamer landings at the Lake Superior ore docks, ore piles and blast furnaces in the Pittsburg district and the subsequent handling of the pig-iron. The old process of refining by puddling is graphically compared with the modern process, ultilizing the Bessemer converter, following which are illustrated serially the successive operations in the manufacture of pipe, both the butt welded and lap welded. The important after details of sizing, straightening and testing are also illustrated and data presented in regard to the relative corrosion of wrought iron and steel pipes under the severe conditions of mine water acidity.

The 1907 catalog of the Hayden-Derby Mfg. Co., manufacturers of the Metropolitan injectors, H. D. ejectors and jet apparatus, has recently been issued, presenting a complete list of this apparatus with the most recent improvements. Suggestions are made as to the types of injectors to be selected for various conditions of operation, and also as to piping and operating them. Considerable additional data is presented in regard to jet apparatus, and also reference is made to the new Hancock swing check valve, which has recently been brought out by this company, in response to a demand for a high-grade check valve for inector delivery pipes. This valve has been especially designed to obviate the difficulties which have long been experienced with check valves used for this purpose, and it is claimed that owing to its design, it will remain tight, without regrinding or repairs of any kind.

The Twinvolute turbine pumps recently placed on the market by the Watson-Stillman Co., New York, are fully described in catalog No. 72, just issued by this company. The details of this pump for both the single and 2-stage types are illustrated, and units of both types are shown connected to electric motors of various types for direct driving, in which form the company is prepared to furnish them. Tables of capacities are presented for these pumps, and also much additional information in regard to the operation of hydraulic machinery is included.

Among the many artistic catalogues received from engineering and contracting supply houses few have approached the latest catalogue of The Hayward Co., 99 Cedar St., New York. The book resembles more an album of fine photographic views than the accustomed trade publication. The size of the pages is 9½ x 11¾ in., and each one is lined with a border and ornamented with a sketch of dredging and spoil or coal-handling plants in operation. The illustrations of the company's buckets, dredges and plants are all half tone engravings printed in black, while the text and ornamentation are printed in brown. The first 31 of the 151 pages are devoted to illustrations, dimensions and specifications of Hayward orange-peel, clam-shell, scraper clam-shell, bottom dump, turnover and scoop buckets. The remainder of the book is devoted to pictures of Hayward equipment in actual operation, each view with its descriptive text occupying a separate page. The buckets are shown operating in conjunction with the derricks, hoists, cableways and engines of about twenty different manufacturers, and in dredging channels, ditches and sand for commercial purposes and handling coal and all kinds of spoil, from sand to rock. The illustrations and data on the performances of many of the plants will probably give valuable suggestions to contractors.

CONTRACTING NEWS

OF SPECIAL INTEREST TO
CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS
ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Ft. Morgan, Ala.—Bids will be received until Nov. 14 by Capt. L. F. Garrard, Constr. Q. M., Ft. Morgan, for constructing building for pump house, installing 2 horizontal tubular boilers of 50 h.p., 2 compound duplex pumps, ice plant and cold storage at this post as advertised in The Engineering Record.

Fordyce, Ark.—It is reported that the property owners are about to petition Council to construct water works.

Selma, Cal.—There is reported to be a movement on foot here looking to the calling of an election to vote on issuing bonds for a municipal water supply.

**Greeley, Colo.*—Jos. A. Osner, 357 Bway., Denver, is reported to have secured the contract for constructing the dam at the Black Hollow reservoir, west of Pierce. The concrete work is to be finished by Dec. 1, and the entire dam must be completed a month later. The reservoir is to hold 230,000,000 cu. ft. of water.

Madison, Ga.—See "Power Plants, Gas and Electricity."

Atlanta, Ga.—Bids will be received by the Bd. of Water Comrs. and Special Com. until Nov. 12 for 13,000 ft. of 36-in. water pipe, to be of c. i., steel-riveted, reinforced concrete, wood pipe or any other pipe capable of standing a pressure of 200 lbs. to the square inch; also on Nov. 25 for furnishing and erecting complete within building and on foundation furnished by city, and making necessary connections to 36-in. suction and 30-in. discharge mains of water works and 10-in. steam main at pumping station No. 2, a 20,000,000 and a 25,000,000 gal. centrifugal pump, to be operated by electric motor ,compound triple expansion condensing engine or steam turbine, and for direct pumpage against a head of 120 lbs. domestic and 160 lbs. fire pressure; also for furnishing and erecting one vertical triple expansion high duty pumping engine of self-contained type ,to have a capacity of 20,000,000 U. S. gals. water in 24 hours. All three proposals advertised in The Engineering Record.

Ashburn, Ga.—See "Power Plants, Gas and Electricity."

Harmon, Ill.—Benj. F. Swab, Village Clk., writes that bids will probably be received in the early spring for the construction of water works to cost about $6,000.

Winnetka, Ill.—The question of installing a gravity filter system at the water works is reported under consideration.

Pauls Valley, Ind. Ter.—C. P. Bruce, Mayor, writes that it is proposed to construct water works at a cost of$40,000. Engineer not yet selected. L. T. Jones, City Clk.

Bellevue, Ky.—The City Council is reported to have passed a resolution looking to the calling of an election to vote on issuing $57,000 bonds for water works.

Kenner, La.—The Kenner Ice & Cold Storage Co. is reported organized with a capital of $25,000 for the purpose of constructing water works and establishing a cold storage plant.

Sauk Rapids, Minn.—Bonds to the amount of $25,000 are reported sold to be used for the construction of water works. Engineer, Oscar Claussen, of St. Paul.

Duluth, Minn.—See "Power Plants, Gas and Electricity."

Brookhaven, Miss.—Water extension bonds to the amount of $15,000 were sold on Oct. 15.

Hildreth, Neb.—It is stated that bids will be received Nov. 25 for $10,000 water works bonds. A. L. Beck, Village Clk.

Velva, N. D.—It is stated that bids will be received until Nov. 12 by S. M. Jones, City Aud., for constructing water works, including a concrete reservoir, gravity pipe line, and gasoline engine power.

Ellendale, N. D.—Bids are wanted until Nov. 4 for sinking an artesian well. Edw. N. Leiby, Mayor.

Hobart, Okla.—Bids will be received until Nov. 9 by A. W. Kerr, City Clk., for furnishing material and constructing an extension to the water mains consisting of approximately 18,000 ft. 4-in., and 5,500 ft. 6-in. c. i. pipe, 38 fire hydrants, four 6-in. valves and 11 4-in. valves, as advertised in The Engineering Record. O. E. Noble, City Engr.

Guthrie, Okla.—W. W. Miller, City Engr., writes that this city proposes installing a filter plant to cost about $20,000.

Alva, Okla.—The Mayor writes that the citizens on Oct. 17 voted to issue $40,000 bonds for constructing water works and sewers. Engineer, Wm. Haviland, of Alva.

Aylmer, Ont.—Bids will be received until Oct. 29 by Junius Bradley, Town Clk., for furnishing and completing a conduit line, 20,400 ft. long. Bids will also be received for sectional part of 5,100 ft. A separate bid will also be received on labor only.

Philadelphia, Pa.—Bids will be received until Nov. 4 by Geo. R. Stearns, Dir. Dept. Pub. Wks., Bureau of Water, for the following as advertised in The Engineering Record: Specification 89: Corrugated iron roof covering for ventilators of boiler house, Spring Garden Pumping Station Specification 90, a 6,000,000-gal. pumping engine for Belmont High Service Pumping Station; Specification 93, furnishing pipe fittings and materials for high pressure fire mains system; Specification 94, excavating water pipe trenches for high pressure fire main system; Specification 95, excavating water pipe trenches and laying c. i. water pipe and all appurtenances for high pressure fire main system.

The following are reported to be the bids opened on Oct. 22 by the Dept. of Pub. Wks., Bureau of Filtration:

Two pumping engines for Lardner's Point pumping station: Bethlehem Steel Co., $244,800; Holly Mfg. Co., $268,769; Southwark Co., $272,900; Allis-Chalmers Co., Milwaukee, $284,000, and R. D. Woods Co., $294,000.

Centrifugal pump of 40,000,000 gal. capacity at Torresdale pumping station: R. D. Wood & Co., $24,500; Allis-Chalmers Co., $18,7000. Pump driven by a horizontal steam turbine, Dravo, Doyle & Co., Pittsburg, $15,476.

The lowest bid for 3 boilers at Torresdale pumping station is reported to have been submitted by the D'Olier Co. at $32,250.

Seneca, S. C.—We are informed that the citizens have voted to construct water works, but matter is at standstill at present time. Dr. W. F. Austin, Chmn. Com.

Dallas, Tex.—D. F. Sullivan, Water & Sewer Comr., writes that the city will probably soon be in the market for one high service pump of 10,000,000-gal. capacity. Plans are not yet ready for the geenral improvements. J. W. Bassett, Ch. Engr., Water Wks.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

**Bisbee, Ariz.*—Chick & White, of Berkeley, Cal., are reported to have secured the contract for a system of sewers (bids opened Oct. 5) for $77,722.

San Jose, Cal.—It is stated that bids will be received until Nov. 4 for the construction of 9,932 ft. concrete sewer, 24x36 in., and average cut 13½ ft. Roy E. Walter, City Clk. Chas. H. Pieper, City Engr.

Forsyth, Ga.—The citizens are reported to have voted Oct. 15 to issue $13,000 bonds for a sewerage system.

Madison, Ga.—See "Power Plants, Gas and Electricity."

Springfield, Ill.—It is proposed to construct 2,200 lin. ft. of 18-in. pipe sewer in Osburn Ave. from Dorlan Ave. to N. Grand Ave.; estimated cost $2,928.

Rockford, Ill.—It is stated that Mark Jardine, Pres. Bd. Local Improv., will receive bids until Oct. 30 for constructing sewers in portions of several streets.

Harvard, Ill.—J. H. Vichers, Mayor, writes that W. S. Shields, of Chicago, is preparing plans for a sewerage system and disposal plant to cost about $52,000.

Indianapolis, Ind.—Asst. City Eng. Chas. Brown is reported to be preparing plans for a sewer in Fulton St. bt. Ohio and St. Clair Sts., to cost about $10,000.

Des Moines, Ia.—Bids will be received until Oct. 29 by the Bd. Pub. Wks. (W. W. Wise, Chmn.) for constructing a septic tank in the vicinity of Center Boule. and John Lynd Rd.

Ottumwa, Ia.—J. T. Brady, City Engr., writes that bids for laying 6,000 lin. ft. clay pipe sewers in sundry streets will be received until Nov. 4. The sizes are 10 in. to 20 in., mostly 15, 18 and 20 in. The city has not yet purchased pipe. Bids will also be received at same date for 160 ft. of 5-ft. double-ring brick sewer.

New Orleans, La.—At a recent meeting of the Sewerage and Water Board, Geo. G. Earl, Supt., is reported to have suggested the construction of sewers by forces now employed by the Board.

Boston, Mass.—Bids will be received until Nov. 15 by the Metropolitan Water & Sewerage Bd., 1 Ashburton Pl., Boston (Wm. M. Brown, Ch. Engr.) for constructing in rock and earth trench and tunnel Section 81 and parts of Section 83 and 85 of the extension of the high level sewer South Metropolitan System in Brookline and Brighton, as advertised in The Engineering Record.

**Salem, Mass.*—Wm. H. Rollins, Clk. Bd. of Sewer Comrs., writes that Thos. Walsh, of Roxbury, secured contracts for Sections 1, 2 and 4 of the South Salem sewer, at $21,318, $15,232 and $11,722 respectively, and Falvey & Kelley, of Cambridge, Section 3, at $16,439 (bids opened Oct. 2). All sections to be constructed of concrete.

**Two Harbor, Minn.*—Haugsten & Johnson, of Two Harbors, are reported to have secured the contract for constructing sewers in 8th and 10th Aves., for $4,710.

**Stillwater, Minn.*—W. C. Fraser, of Rochester, is reported to have secured the contract for constructing a sewerage system for the prison at Stillwater, for $14,000.

Hattiesburg, Miss.—J. H. Putnam, City Engr., writes that all bids opened on Oct. 15 at office of City Clk., for constructing sanitary sewers and appurtenances, requiring about 2,640 lin. ft. 15-in., 6,150 lin. ft. 10-in. and 6,708 lin. ft. 8-in. sewer, 3 manholes and 7 flush tanks, have been rejected and new bids will be received on Nov. 7 for a larger contract. Two bids were received for this work from C. M. Burkhalter, of Birmingham, Ala., fo about $29,000, and P. H. Porter, Clinton, Ky., $46,000.

**Omaha, Neb.*—Jens Jensen is reported to have secured the contract for constructing Izard St. sewer, for $123,000.

Trenton, N. J.—Bids will be received by the Common Council until Nov. 5 for constructing sewers in Liberty St., Hamilton and Fairmount Aves. Hary B. Salter, City Clk.

Riverside, N. J.—Bids will be received bp Irven Kollo, Township Clk., until Nov. 1, for the construction of a sewerage system to consist of about 10 miles of 8 to 24-in. pipe sewers, pump house, engines, pump, pump well and disposal works, as advertised in The Engineering Record. Engineer, Wm. H. Boardman, 426 Walnut St., Philadelphia, Pa.

**Englewood, N. J.*—Chas. Brocker, of Englewood, is reported to have secured the contract for constructing about 6,500 ft. 12-in. pipe sewers, with manholes, etc., for the Englewood Sewerage Co. (bids opened Oct. 5).

**Summit, N. J.*—J. Edw. Rowe, City Clk., writes that bids were opened on Oct. 15 by the Common Council for constructing the Edgewood sewers, consisting of about 5,300 ft. 12, 10 and 8 in. vitr. pipe, and the contract was awarded to Chas. Ippolitto, of Orange, for about $15,000.

Perth Amboy, N. J.—Forrest L. Smith, City Engr., 102 Smith St., writes that the proposed sewerage system will cost about $48,000. Wm. Fullerton, Street Comr.

Batavia, N. Y.—J. H. Wood, Clk. Sewer Comn., writes that an ordinance is now being prepared and will be submitted to the votors, providing for the issue of $342,000 bonds for a sewerage system. Engineer, Alex. Potter, 136 Liberty St. New York City.

Chagrin Falls, O.—Bids will be received by H. D. Bishop, Village Clk., until Nov. 9 (readvertisement) for the construction of a sewerage system and a sewage purification plant, estimated cost $56,000. Engineers, the Walter P. Rice Eng. Co., 629 Soc. for Sav. Bldg., Cleveland.

Columbus, O.—Bids will be received until Oct. 30 by the Bd. Pub. Service (Edwd. F. McGuire, Secy.) for constructing 2 sewers, one in the alley west of Oakley Ave., and the other in the alley west of Dakota Ave.

Kent, O.—Plans for a sewerage system, a sewage purification plant for Kent, have been submitted to the State Bd. of Health, at Columbus.

Youngstown, O.—Bids will be received until Nov. 7 by the Bd. Pub. Service (W. H. McMillin, Clk.) for furnishing material and constructing sewers in portions of Truesdale, Perry and E. Federal Sts.

Hobart, Okla.—Bids will be received by A. W. Kerr, City Clk., until Nov. 9, for furnishing material and constructing a complete storm water sewer system, to consist of 48 to 30-in. concrete and brick sewers. 21 and 18-in. concrete brick or pipe sewers, and 15, 12 and 10-in. pipe sewers, with 16 manholes and 34 catch basins, as advertised in The Engineering Record. O. E. Noble, City Engr.

Johnson City, Tenn.—Bids will be received until Oct. 31 by the Bd. of Mayor and Aldermen for $16,000 sewer bonds.

Seattle, Wash.—The only bid received and opened on Oct. 12 by the Bd. of Pub. Wks. for constructing trunk sewer in the Green Lake District, was submitted by the Jas. Black Masonry & Constr. Co., of Seattle, as follows: Fixed estimate, $1,500; 795 lin. ft. 36-in. concrete sewer, $6; 3,721 lin. ft. 42-in., $7.50; 548 lin. ft. 48-in., $12; 5,023 lin. ft. 54-in., $16; 336 lin. ft. 72-in., $20; 1,104 lin. ft. 84-in., $33; 2,050 lin. ft. 90-in., $30; 2,132 lin. ft., 96-in., $34; 3,482 lin. ft. 90-in. concrete sewer with brick invert, $33; 183 lin. ft. 126-in., $64, and 6,948 lin. ft. 138-in., $85; 3,581 lin. ft. 72-in brick tunnel, $27; 75 manholes, ea. $100; 400 lin. ft. manholes, extra depth, $10; 1 junction chamber No. 1, $3,500; 1 No. 2, $8,930; 1 No. 3, $8,989; 1 stormwater overflow, $18,426; 1 sand catcher, $8,600; 1 siphon, $5,835; 500 side connections, ea. 50 cts.; 100 cu. yds. concrete in tunnel, $10; 200 cu. yds. extra concrete, $14; 10,000 lin. ft. sub-drain, 50 cts.; 20,000 lbs. extra steel, 5 cents; total bid, $993,036.

We are informed that bids on Lake Union Dist. sewer will be called for in about 2 months, to be followed with 3 other districts; estimated cost of entire improvement $3,000,000.

Bids will be received by the Bd. of Pub. Wks. on Nov. 2 for constructing sewers and water mains on 11th Ave., W., and other streets, at an estimated cost of $4,200.

*Dicken & Rightmire, of Ballard, have secured the contract for constructing sewers in Dearborn St. and in Hiawatha Pl. for $8,512.

**Spokane, Wash.*—John Fife is reported to have secured the contract for constructing a sewer in the alley between the Northern Pacific and Second Ave., from Cedar to Wall Sts., for $8,944.

Marinette, Wis.—Bids will be received until Nov. 2 by the Bd. Pub. Wks. (Jacob Wittiz, Chmn.) at the office of the City Clk., for constructing a sewer in Josephine St.; also in the Alley between Sherman and Thomas Sts.

BRIDGES.

Notes Arranged Alphabetically by States.

Newark Ark.—It is stated that $15,000 has been appropriated for the construction of a steel bridge over the Salado Creek.

Orofino, Idaho.—The Farmer's Bridge & Warehouse Co. is reported to have secured a franchise to construct a bridge over Clearwater River at Orofino. Incorporators: W. A. Cury, P. H. Blake and Jas. Holt.

Jasper, Ind.—It is reported that bids will be received until Nov. 4 by the Bd. Co. Comrs. for constructing a 120-ft. steel bridge, to have 14-ft. roadway, acrsos Patoka River, on the Jasper and Huntingburg Rd., what is now called the Brierfield Bridge; also a steel bridge on Ireland and Sulphur Springs Rd. M. A. Sweenley, Co. Aud.

Richmond, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Nov. 9 for the construction of 8 bridges, 2 in Center Township, 2 in Wayne Township and 1 each in Franklin, Hanson, Dalton and Jefferson Towships.

Lafayette, Ind.—It is reported that bids will soon be asked for the construction of a bridge over the Wabash River in Tippecanoe County.

Winnipeg, Man.—Bids will be received until Nov. 1 by the Chairman Bd. of Control, at the office of M. Peterson, Secy., Winnipeg, for a second-hand single-track through truss steel railway bridge, 155 ft. to 165 ft. single span, crossing Pinawa Channel, in connection with Point de Bois hydro-electric development, as advertised in The Engineering Record.

Carman, Man.—It is stated that bids will be received until noon, Nov. 8, by the Bd. of Pub. Wks. (A. Malcomson, Secy.-Treas.) for the construction of a 90-ft. Pratt truss steel bridge with 18-ft roadway, concrete abutments, across Boyne River, near Carman.

Greenville, Miss.—It is stated that bids will be received until Nov. 4 by T. H. Hood, Clk. Bd. of Superv., for construction of a Ben bridge across Six Mile Bayou, in Washington County.

**Vicksburg, Miss.*—W. T. Young Bridge Co., of Nashville, Tenn., is reported to have secured the contract for constructing concrete-steel bridges on Cemetery Road and Cherry St. fo $4,850; also for 2 steel bridges over Staats Bayou and Simrall Canal, at $1,472 each.

**Items marked thus give the names of parties awarded contracts.*

Belvidere, N. J.—Scott Clark, Chmn. Street and Alley Com., writes that the date of opening of bids for constructing new bridge across Kishwaukee River has been extended from Oct. 25 to Nov. 2.

Trenton, N. J.—It is stated that the Delaware & Raritan Canal Co. contemplates expending $10,000 for the erection of 3 bridges over the canal in Trenton; wooden structures at Labor St. and Greenwood Ave. and and iron one at Perry St. crossing.

Brighton, N. Y.—The citizens are reported to have voted to construct an overhead bridge at Clover St., at a cost of $20,000.

**Hamilton, O.*—The County Comrs. on Oct. 8 are stated to have awarded the contract for constructing a steel bridge over Two Mile Creek to Central Slate Bridge Co. of Illinois, at $5,292.

West Bethlehem, Pa.—Bids will be received by the Comrs. of Lehigh and Northampton Counties at Easton, on Nov. 29, for the construction of a reinforced concrete bridge over Broad St., West Bethlehem. It will be 60 ft. wide with 5 spans, 2 of 75 ft., 2 of 90 ft., and 1 of 100 ft. L. A. Francesco, Co. Engr., Easton.

**McKees Rocks, Pa.*—The Pittsburg & Lake Erie R. R. Co. is reported to have awarded the contract for constructing a 2-track bridge over Chartiers Creek at McKees Rocks to the American Bridge Co., Pittsburg, at a cost of about $30,000.

Indiana, Pa.—It is stated that bids will be received until Nov. 1 by the Co. Comrs. at Indiana, for the construction of 2 steel highway bridges, having a clear span of 30 ft., with 34 ft. between backwalls.

Webster, Pa.—Bids will be received until Nov. 8 by the Comp. of Westmoreland Co. and the Co. Comrs. of Washington Co., at Greensburg, Westmoreland Co., for constructing a joint bridge over the Monongahela River, between Webster, Westmoreland Co., and Donora, Washington Co.; superstructure to have 5 truss spans, 2 viaduct approaches; total length of steel work, about 1,550 ft.; roadway, 25 ft.; one sidewalk, 6 ft., and 2 electric car tracks; substructure to have 2 river piers of stone, with concrete foundation; 4 concrete piers, 14 concrete pedestals and 2 concrete abutments. A. H. Nelson, Engr., Hartje Bldg., Pittsburg.

Wharton, Tex.—Bids will be received until Nov. 11 by C. S. Gordon, Co. Judge, Wharton, for the erection of a steel highway bridge over San Bernard River, 325 ft. wide, jointly with Fort Ben County, as advertised in The Engineering Record. H. Pennington, Rms. 52 and 53, Theatre Bldg., Houston, is the engr.

**Houston, Tex.*—Bids for constructing a wooden bridge with steel swing over the San Jacinto River on the Houston Crosby County Road are reported opened Oct. 16 as follows: A. N. Fitzgerald, $10,176 (awarded contract); Southwestern Bridge Co., $10,625; Ottumwa Bridge Co., $10,900; Austin Bros., $11,600, and Missouri Valley Bridge & Iron Co., $10,684.

Sundance, Wyo.—It is stated that bids will be received until Nov. 5 by the Co. Comrs. for the construction of 2 steel bridges across Belle Fourche River, 1 at Hulett and 1 at Moorcroft. L. Nauch, Co. Clk.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

**Gadsden, Ala.*—The City Council is reported to have awarded the contract for 20,000 sq. yds. of cement sidewalk and 30,000 lin. ft. combined curbing and guttering to Leslie M. Lockwood, of Bessemer.

Mesa, Ariz.—It is proposed to procure bids for concrete curb and gutter to cost about $2,000. O. A. Turney, of Phoenix, is City Engr.

**Sacramento, Cal.*—M. Hughes is stated to have secured the contract for macadamizing a portion of 35th Ave. for $3,873.

Wilmington, Del.—Bids for constructing a macadam road about 2⅔ miles long, extending from Eden Park to city limits of New Castle, are reported as follows: Theo. Horsch, $25,500; T. W. Boremann, of Lansdowne, Pa., $27,122, and B. F. Wickersham, of Kennett Sq., Pa., $24,968.

Pensacola, Fla.—We are informed that the Board of Bond Trus. has postponed the receiving of bids for approximately 170,700 sq. yds. of clay or shale blocks, sheet asphalt bitulithic, wood block or macadam pavement, and 115,950 lin. ft. of concrete curb, which were to have been opened on Nov. 15 until a later date, not yet decided upon. L. Hilton Green, Chmn. Bd.; T. Chalkley Hatton, Consulting Engr., Wilmington, Del.

Elgin, Ill.—Plans are reported completed for the paving with brick 3,600 sq. yds. on N. Liberty St., at a cost of $6,000.

The Bd. of Local Improv. has decided to resurface Knoxville Ave. from Hamilton St. to Illinois Ave. with brick at a cost of $11,000.

Kokomo, Ind.—Bids will be received, it is reported, untiy Nov. 6 by the Bd. Co. Comrs. for constructing 12 gravel roads in this county, in all about 40 miles. Wm. L. Benson, Co. Aud.

Greenfield, Ind.—It is stated that bids are being received by O. O. Berer, City Clerk, for paving S. State St.

Danville, Ind.—The Comrs. of Hendricks County are stated to have granted a petition for the construction of a gravel road in Franklin Township.

City, for the construction of a bridge floor at the Washington Ave. Bridge, in Brooklyn Boro.: Cooper & Evans Co., 220 B'way, N. Y. City, $5,222 (awarded contract); Wm. H. Luth Co., $6,421; Eagle Iron Wks, $6,754, and F. W. Carlin Const. Co., $7,480.

Brooklyn, N. Y.—Bids will be received by Bird S. Coler, Boro. Pres., until Nov. 6, for repaving with asphalt, Brooklyn, Throop and Knickerbocker Aves., Himrod, Monitor and S. 5th Sts., repaving with wood block, Kossuth Pl., Morgan and Irving Aves., Skillman and Ten Eyck Sts., repaving with asphalt block 44th St.; laying sidewalks on Hart and Starr Sts. Engineer's estimate: 22,750 sq. yds. asphalt pavt.; 2,310 sq. yds. asphalt blk. pavt.; 32,420 sq. yds. wood blk. pavt.; 8,570 cu. yds. concrete; 27,045 lin. ft. new curb., to be set in concrete; 11,365 lin. ft. old curb., to be reset in concrete; 28,760 sq. ft. cement sidewalk; 178 noiseless covers and heads, complete, for sewer manholes.

Brooklyn, N. Y.—Bids will be received until Nov. 6 by Bird S. Coler, Boro. Pres., for furnishing material and constructing sewers in 49th, 83d, 53d, Provost and Dean Sts. Engineer's estimate: 2,504 lin. ft. 12-in., 175 lin. ft. 15-in., 135 lin. ft. 18-in. and 260 lin. ft. 24-in. pipe sewer, 28 manholes, 3.3 M ft sheeting and bracing and foundation planking, etc.; also a sewer basin at corner of Jewell St. and Meserole Ave.

Lakewood, O.—It is stated that bids will be received until Nov. 4 by B. M. Cook, Village Clk., for paving Newman Ave.

Monclova, O.—It is stated that bids will be received until Nov. 2 by Don C. Whitehead, Clk., Monclova Township, for draining, grading and macadamizing half a mile of country road.

Cincinnati, O.—Bids will be received until Nov. 15 by the Bd. Co. Comrs. (Fred Dreihs, Clk.), for improving Hog Back Rd. (Observatory Ave. extension), Columbia Tonwship, as per specifications, No. 600.

Cincinnati, O.—Bids will be received until Oct. 31 by the Bd. Pub. Service (M. J. Keefe, Clk.) for furnishing material and repairing asphalt streets, avenues, alleys, etc.

Youngstown, O.—Bids will be received until Nov. 7 by the Bd. Pub. Service (W. H. McMillin, Clk.,) for furnishing material and paving Wick and Summit Aves.

**Sharonsville, O.*—J. M. Hasset is reported to have secured the contract for repairing Sharonville Pike from Sharonville to Carthage Road, a distance of 7 miles, for $85,000.

Akron, O.—John Payne, City Engr., is reported to have estimated the cost of paving 1,800 ft. of North Hill at $28,000.

Richwood, O.—It is stated that bids will be opened Nov. 9 for $8,000 bonds for improving Franklin Ave. R. L. Jordan, Village Clk.

Hobart, Okla.—Bids will be received at the office of A. W. Kerr, City Clk., until Nov. 9 for 41,700 sq. yds. brick, bitulithic, or asphalt, 8,600 lin. ft. curb, and 4,000 lin. ft. headers, as advertised in The Engineering Record.

**Scranton, Pa.*—M. O'Herton is reported to have secured the contract for paving 6th and Webster Aves., at $18,430 and $17,606, respectively.

Pittsburg, Pa.—The Select Council is stated to have approved the ordinance authorizing the widening of Cecil Pl. to a 50-ft. street.

Johnson City, Tenn.—Bids will be received by the Bd. of Mayor and Aldermen until Oct. 31 for $34,000 street improvement bonds.

Dallas, Tex.—It is stated that bids are being received for paving with brick or block Main St.

Ottawa, Ont.—The bid of the Iroquois Iron Wks, of Buffalo, N. Y., for the construction of an asphalt and bituminous paving plant is reported recommended for acceptance at $15,350.

Tacoma, Wash.—Bids will probably be called for in Nov. for sandstone paving L. I. Dist. 332, at a cost of $65,000, and for sandstone and asphalt on L. I. Dist. 339, to cost about $146,000.

Ft. Wright, Wash.—Bids will be received until Nov. 6 for installing concrete curbing for roads at this post by Lieut. B. T. Scher, 3d Inf., Constr. Q. M., U. S. A.

**Montesano, Wash.*—A. H. Moulton is reported to have received the contract for constructing the South Side County Road, at $12,000.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Chico, Cal.—It is stated that bids will be received until Nov. 12 by L. D. McMacy, of Chico, for constructing an electric light and heating plant.

Needles, Cal.—Carl F. Schrader is reported to have petitioned the Bd. of Superv. at San Bernardino for a franchise for a gas and electric light system at Needles. He will procure electricity from the Victor & Virgin mining Co. and will install a gas plant.

Placerville, Cal.—The City Clerk writes that the city is seeking information with regard to the construction of an electric light plant. The question must first be submitted to a vote of the people.

Azusa, Cal.—A. Ganslein, representing the Interstate Gas Co. of Los Angeles, is reported to be circulating a petition for the location of a gas plant between Azusa and Glendora, to light both places.

Glendale, Cal.—The Southern California Gas Circuit Co., 501 Chamber of Commerce Bldg., Los Angeles, is reported to have purhcased a site at Glendale for a gas plant.

**Los Angeles, Cal.*—The City Council is reported to have awarded contract for electric generator and transformers for Cottonwood Creek Hydro Electric plant to Westinghouse Electric & Mfg. Co. for $18,039.

Key West Barracks, Fla.—Bids will be received until Nov. 9 by the quartermaster at this post for furnishing a steam boiler, 125 h.-p., with all accessories complete. Bids will state price f. o. b., both Key West, Fla., and Mallory Steamship Line, New York City.

Madison, Ga.—Moses Cohen, City Clk., writes with regard to the construction of water works, sewerage system and electric light plant for which the citizens were recently reported to have voted to issue $85,000 bonds, that contracts have been awarded, and the work has been under way for about 3 months.

Macon, Ga.—The State R. R. Comn. is reported to have, on Oct. 17, approved the proposed issue of $100,000 common and $50,000 preferred stock which the Bibb Power Co., of Macon, proposes to issue. This company has just been organized, and proposes to develop certain water powers in Bibb County and to supply light and power to the citizens of Macon. It is also expected that the company will supply power to the new interurban electric railways soon to be built.

Albany, Ga.—It is reported that the Albany Power Co. will receive bids for the construction of a dam to develop power and a power house to be equipped with electrical machinery for generating and transmitting electricity at Porter Shoals, on Flint River, near Albany. Alex. W. Smith and E. M. Y. Underwood are reported to be among the incorporators.

Ashburn, Ga.—The citizens are reported to have voted to issue $45,000 bonds for constructing water works and an electric light plant.

Chicago, Ill.—Local press reports state that all bids opened on Oct. 15 by City Electrician Carroll for 2,500 lamps and their equipment have been rejected and new bids will be received. Four bids were received, all bidders submitting the same price, a total of $84,395.

Oregon, Ill.—Paul F. Schuster is reported to have received a franchise for a gas plant.

Paducah, Ky.—See "Public Buildings."

Minneapolis, Minn.—Bids will be received at the office of L. A. Lydiard, City Clk., until Nov. 8, for lighting the streets and avenues of this city with gas and with electricity for the year 1908; also supplying gas for the street lamps of said city for the year 1908; bids will also be received for furnishing about 7,000 incandescent gas street lamps.

Columbus, O.—Bids will be received until Oct. 30 by the Bd. Pub. Service (E. F. McGuire, Secy.,) for furnishing material and doing the following work at the municipal electric light plant, Dublin Ave.; boiler blow-off tunnel, foundation for additional boilers, continuation of ash pit tunnel, retaining wall and driveway.

Cleveland, O.—The Lighting Com. of the Bd. of Pub. Service on Oct. 16 voted to recommend the granting of a franchise to the Cuyahoga Light Co. It will furnish electric lighting in the downtown district.

Cuyahoga Falls, O.—C. M. Walsh, of Cuyahoga Falls, has petitioned Village Council for a franchise to furnish the village with light, heat and power, and for a 10-year privilege of using the streets and alleys of the town with poles and wires.

**Elyria, O.*—The Elyria Milling & Power Co. (G. N. Arnold, Pres.,) is reported to have secured the contract for lighting the city for 10 years at $64 per yr. for each arc light. The new company is to use water power in generating electricity.

Panama.—See "Miscellaneous."

Providence, R. I.—The Special Com. of City Hospital has recommended that the Narragansett Electric Lighting Co. be permitted to install a system of underground wires, conduits and appurtenances on Eaton St.

Union, S. C.—J. A. Brown, of Union, is reported to have petitioned Town Council for a franchise for an electric light and power plant.

**Items marked thus give the names of parties awarded contracts.*

*Armour, S. D.—The City Council is reported to have entered into a contract with the Wagner, Lake Shore & Armour Traction Co., which is installing an electric light plant and power house in this city, to install four 1,200-c.p. arc light at $6 per month.

McKenzie, Tenn.—Edw. Moseley, Cashier First State Bank, is reported interested in the construction of an electric light plant and and ice plant.

Beaumont, Tex.—See "Power Plants, Gas and Electricity."

Waynesboro, Va.—We are informed that the electric power plant here, recently damaged by fire, has been sold to Gardner & Quarly, of Basic City, Va., who are arranging to put in a new plant.

*Green Bay, Wis.—The City Council on Oct. 19 adopted resolutions awarding contract to Green Bay Gas and Electric Co. to furnish light at $70 per lamp per year.

Seattle, Wash.—Bids will be received by the Bd. of Pub. Wks. on Nov. 2 for grading, curbing and constructing concrete sidewalks on 9th Ave. W. and other streets, at an estimated cost of $11,700; on Lane St., cost $9,500, and Meridian Ave., $72,000.

Onoloska, Wis.—The La Crosse Water Power Co., of La Crosse, is reported to have petitioned for a franchise through Onalaska.

Eau Claire, Wis.—The Vice-Pres. of the Northwestern Lumber Co., of Eau Claire, writes that the company has no definite plans as yet for building their high dam on Eau Claire River. It has been buying flowage rights and will probably build a dam within a year or two.

*Revelstoke, B. C.—The Canadian General Electric Co., of Montreal, Que., is reported to have secured the contract for constructing an addition to the municipal electric lignt plant for $25,762.

Hamilton, Ont.—According to local press reports Chief Engineer Sothman, of the Hydro-Electric Power Com., on Oct. 15, submitted to the Bd. of Works estimates and plans for the installation of a municipal lighting plant. The total capital cost of a complete arc lighting system of 500 magnetite lamps, including underground system of 4-duct conduit and wooden poles, in the underground district, is estimated at $175,580, which, less $57,148, estimated as cost of installing conduit system, would make expenditure for installing lighting system alone, $118,432. The underground system is for King, York and James Sts., and east of James St. and west of King St.; he estimates that a 2-duct system could be installed for $165,780, but would not answer if required for anything but arc lighting. He estimates it would cost $49.70 per lamp per year under 2-duct system and $51.03 under 4-duct conduit system.

Kenora, Ont.—The ratepayers are reported to have passed a by-law providing for a bond issue of $75,000 for completing power development and water works.

Humbolt, Sask.—Telfer Bros., of Humbolt, are reported interested in the construction of an electric light plant.

Montreal, Que.—Local press reports state that the Fire and Light Com. of City Council will on Dec. 1 receive bids for illuminating and heating gas; also separate bids for electric lighting and heating.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Hollywood, Cal.—The Los Angeles Pacific Co. (C. H. Ellison, Ch. Engr., Los Angeles) is stated to have made application to the City Trustees for a franchise commencing at end of Franklin Ave., Hollywood, running west on Franklin to Cahuenga north on Cahuenga to Highland Aves. and city limts.

Oakland, Cal.—A petition for a franchise for an electric railway from the city limits to North Piedmont Heights is reported filed with the Bd. of Supervisors by the Oakland Traction Co.

San Francisco, Cal.—The Bd. of Supervisors is stated to have passed the franchise of the Parkside Traction Co. for the construction of a railway on 20th Ave.

Long Beach, Cal.—It is stated that the Pacific Electric Ry. Co. has asked the City Trustees for permission to build an electric railway on 7th St. This is a much needed line and will extend from the foot of 7th St., in the inner harbor section, to the city limits on the east, and will probably follow the same street in the county to California St., with a branch line to tap Signal Hill.

Augusta, Ga.—Bids are wanted until Nov. 1 for rails, switches, ties, trolley wire and poles for 1,600 ft. spur track. For further information address the Commanding Officer, Augusta Arsenal, Augusta.

J. C. Sheppard, of Edgefield, A. E. Padgett and Wm. P. Calhoun are reported interested in the construction of an electric railway from Edgefield to Augusta.

Muskogee, Ind. Ter.—The Falls Constr. Co. is reported to have filed articles of incorporation with a capital of $2,500,000 for the construction of an electric railway to connect Muskogee and Ft. Smith, for the Muskogee Navigation Co. Incorporators: S. M. Rutherford, E. A. Hill, J. M. Brogan and Ira L. Reeves, all of Muskogee.

Waterloo, Ia.—The Waterloo, Cedar Falls & Northern Ry. Co. (C. D. Cass, Gen. Mgr.) is reported to have announced that about 2 miles of track will be laid in Waterloo during the present year.

New Orleans, La.—Bids will be received until Dec. 11, by Chas. R. Kennedy, Compt., for a 39-year franchise, beginning June 30, 1912, to construct, maintain and operate an electric street railway through several streets, including St. Bernard Ave. and Broad St.

Boston, Mass.—Bids will be received until Oct. 31 by the Boston Transit Comn. (B. Leighton Beal, Secy.), 15 Beacon St., for constructing open incline north of the Boston City Hospital Relief Station, near Canal St., for the Washington St. Tunnel.

*Springfield, Mass.—The Selectmen are reported to have granted the petition of the Berkshire Street Ry. Co. to locate poles for the high-tension line on the west side of the town. The contract for the work has been awarded to Fred T. Ley & Co., of Springfield. The total cost is estimated at $65,000.

Grand Rapids, Mich.—The Grand Rapids Electric Ry. Co. (Geo. W. Doane, Ch. Engr., Gadwin) is reported to have announced that contracts will be let within the next 30 days for two electric railway lines, one from Bay City, Mich., to Grand Haven, and the other from Grand Rapids, Mich., to Montpelier, Ohio.

Crookston, Minn.—The City Council is stated to have granted a street railway franchise to W. A. Marin.

Tottenville, S. I., N. Y.—Maps and plans are reported filed for the construction of an electric railway from Tottenville and Richmond, S. I., which is to be constructed by the Tottenville & Richmond Electric R. R. Co. The line will be 10 miles long with a single track and numerous switches; estimated cost, $400,000.

Lindenhurst, L. I., N. Y.—The Town Board and Bd. of Highway Comrs. are stated to have granted the South Shore Traction Co. a street railway franchise.

RAILROADS.

Notes Arranged Alphabetically by States.

Denver, Colo.—H. A. Sumner, of Denver, Ch. Engr. Continental Tunnel Ry. Co., writes that the proposed tunnel through James Peak will be 6.04 miles in length, with an elevation of 9,190 ft. east portal and 9,106 ft. west portal above sea level. A bond issue of $5,000,000 has been authorized. Thos. F. Walsh, Pres. W. O. Temple, Secy., and D. C. Dodge, Chmn. Executive Com., all of Denver.

Coffeyville, Kan.—The citizens are reported to have voted Oct. 17 to issue $30,000 bonds, to aid the Coffeyville & Memphis R. R. Co. in the construction of its line from Coffeyville southeast to Centralia and Vinita, Ind. Ter.

Garden City, Kan.—The Kansas & Texas Ry. Co. is reported formed to build 700 miles of railroad south from Garden City, Kan, via Guymon, Okla., to Amarillo, Tex., thence southeast to Houston, Tex.; estimated cost is $5,000,000. John H. Barnard, of Boston, Mass., is the principal incorporator.

Garden, Mich.—The Van's Harbor Lumber Co. is reported to have decided to construct a railroad from Garden to a connection with the Soo Line at Russell's Spur, a distance of 35 miles.

Bloomfield, N. J.—The Delaware, Lackawanna & Western R. R. Co. (L. Bush, Ch. Engr., Hoboken), is reported to be considering the abolition of the crossings at Glenwood Ave. and Washington St., and the erection of a new station, and the opening of a new street as an approach to the station.

Benson Mines, N. Y.—The Little River R. R. Co. is reported formed to build and operate a standard gauge steam road, 8 miles in length, from Benson Mines south to the settlement known as McConnell, in the town of Fine. Capital, $80,000.

Schenectady, N. Y.—Press reports state that the New York Central & Hudson River R. R. Co. (W. J. Wilgus, vice-pres. Construction Dept., New York City) has asked for bids for replacing the Delaware & Hudson tracks at Schenectady in order to obtain a better grade to be run under the West Shore tracks.

Pond Creek, Okla.—The St. Louis, Bartlesville & Pacific Ry. Co. is reported to be preparing to extend its line from Pond Creek westward through Garfield County into Woods County to connect with the Kansas City, Mexico & Orient Ry. The extension will be 40 miles in length.

Beaver, Okla.—The Beaver Valley & Northwestern Ry. Co., with a capital of $4,000,000, is reported incorporated, and with headquarters at Beaver. The line will run from Oklahoma City northwest through Okla. and across Southwest Kan. to La Junta, Colo., 400 miles. Incorporators: J. H. Webb, Ray Barnes, A. F. Rock and others, all of Beaver.

Wilkesbarre, Pa.—We are informed that plans for the partial elevation of tracks have been submitted by the Board of Engineers, but they are not satisfactory with respect to Market and Northampton Sts., and the board will be asked to change the plans in respect to the aforesaid streets. If successful, negotiations in respect to cost can be carried on in the near future. The actual construction work ought to begin next spring. Edwin B. Morgan is chmn. of the Grade Crossing Com. of City Councils.

Waskom, Tex.—Bids are wanted until Oct. 31 for grading the first 7 miles of the Shreveport & Gulf R. R. (E. H. Ludlow, Ch. Engr., Waskom.)

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Luverne, Ala.—Bids will be received until Nov. 6 by the Comrs. Court, for erecting a fireproof jail. E. J. Ostling, archt., Montgomery. F. M. T. Tankersley, Co. Judge Probate.

San Francisco, Cal.—It is reported that plans are being prepared for the 4-story reinforced concrete hospital which is to be erected here by the Southern Pacific R. R. (E. E. Calvin, Gen. Mgr., San Francisco), at a cost of about $300,000.

Springfield, Ga.—The Grand Jury is reported to have recommended the erection of a new court house at a cost of $30,000.

*Hamilton, Ga.—The contract to erect the court house is reported awarded to the Mutual Constr. Co., of Louisville, Ky., at $34,061.

Cairo, Ga.—The Chairman County Comrs. writes that bids will be received about Feb. 1 for the erection of a court house, to cost $40,000 also for the erection of a jail, to cost $13,000. Architect, Alex. Blair, of Macon.

Notes Arranged Alphabetically by States.

Waterbury, Conn.—The Bd. of Health has recommended the immediate construction of a garbage disposal plant.

Terre Haute, Ind.—We are informed that the Bd. of Pub. Wks. (Patk. B. Walsh, Pres.) has decided to erect a garbage crematory and is in the market for propositions from builders of crematories.

Baltimoe, Md.—Local press reports state that the following are the bids opened on Oct. 18 by the Bd. of Awards for the disposal of city garbage: The American Reduction Co., of Pittsburg, Pa., offered to dispose of garbage by Pittsburg system during next 10 years, beginning Jan. 1, 1908—the time when contract with Baltimore Sanitary Co. expires—for $49,500 a year. For reduction plant of Baltimore Sanitary Co., which city bought for $135,703, it offers $10,000, making net cost for 10 years $495,000. The Southern Product Co., of Baltimore, bid to dispose of garbage during year from Jan. 1, 1908, to Jan. 1, 1909, for $57,000 per year, the price to be increased $2,000 yearly for 9 ensuing years, or a total of $660,000. The company offered $100,000 for reduction plant, which makes net cost for 10 years $560,000. An additional proposal by the same copmany is that if, at the expiration of 10 years, it is again awarded contract it will pay city $150,000 for reduction plant. If contract is not renewed at that time, according to additional proposal, the firm will turn plant over to city free of charge. This company proposes using the Arnold-Egerton system, which is at present used here. The Baltimore Product Co., of Baltimore, bid to dospose of the garbage during the year from Jan. 1, 1908, to Jan. 1, 1909, $58,000 per yr., the price to increase $2,900 yearly for remaining 9 years, the cost for the year bet. Jan. 1, 1917, and Jan. 1, 1918, being $84,100; total amount of this company's bid for $710,500, which, minus the $50,000 it offers for reduction plant, makes a net cost of $660,000. The company proposes to use the Arnold-Egerton system. J. L. Wicks, Comr. of Street Cleaning.

Montclair, N. J.—A committee has been appointed consisting of M. N. Baker, of Montclair; Dr. A. C. Benedict, of South Orange; Dr. Minor Maghee, of West Orange, and Dr. Poor, of Orange, to consider plans for the disposal of garbage of Montclair, Orange, South Orange, Glen Ridge and Bloomfield.

New York, N. Y.—The Bd. of Aldermen has passed an ordinance providing for an appropriation of $222,000 for dumping scows for the Street Cleaning Dept.

Cincinnati, O.—Bids will be received until Oct. 31 by the Bd. Pub. Service (M. J. Keefe, Clk.) for the equipment of a dumping station on 2d near Vine St., to consist of the following: Destruction furnace and boiler, heating system and power piping, air lifts, compressor and receiver; refuse and ash conveyor and engine and shafting; hydraulic elevators. Sam'l Hannaford & Sons, Archts., Hulbert Blk.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—Bids will be received until Nov. 21 by Maj. H. Jervey, Corps Engrs., U. S. A., Mobile, for dredging at the mouth of Wolf and Jordan Rivers, Miss., as advertised in The Engineering Record.

Denver, Colo.—See "Miscellaneous."

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Oct. 29 to furnish at the navy yards and naval stations the following supplies: Brooklyn, N. Y.: Sch. 413—26,840 lbs. mild steel bar; 25,000 lbs. galvanized sheet steel; brass and c. i. valves. Sch. 416—Garbage crematory complete; ice-making plant. Washington, D. C.: Sch. 409—40,000 asphalt paving blocks. Sch. 412—3,125 lbs. oil hardening steel. Boston, Mass.: Sch. 410—21,000 lbs. crucible steel wire. Sch. 414—valve reseating machine. Norfolk, Va.: Sch. 413—10 M. ft. cherry; 15,400 lbs. brazier's copper. Sch. 414—Pneumatic drill and hammer, 2 valve reseating machines. Bids will also be received until Nov. 5, same time and place, as follows; League Island, Pa.: Sch. 406—Instantaneous change engine lathes; motor driver, engine lathe; boring and turning mill; automatic screw-cutting machine. Charleston, S. C.: Sch. 407—Automatic plug machine. Portsmouth, Va.: Sch. 408—Two high speed engine lathes. Mare Island, Cal.: Sch. 388—30 M. ft. white ash, 25 M. ft. cedar, 60 M. ft sugar pine, about 190 M ft. red wood, 100 tons pig lead, 1,800 lbs. shet lead. Sch. 389—150 tons pig iron. Sch. 391—97,500 lbs. bar iron, 5,000 lbs. machinery steel; 71,500 lbs. galvanized sheet steel. Sch. 395—4,000 lbs. Portland cement; galvanized iron or steel pipe. Application for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster General, U. S. N.

Ft. Des Moines, Ia.—Bids will be received until Nov. 7 by Capt. John J. Boniface, Constr. Q. M., U. S. A., for constructing corral fences and erecting picket lines at this post.

Prophetstown, Ill.—Bids will be received until Nov. 11 by the Comrs. of the Big Slough Special Drainage Dist., counties of Henry and Whiteside at the office of F. W. Sears, Engr., Prophetstown, for the enlargement of the main ditch of said drainage district, requiring the removal of about 353,000 cu. yds. material.

Wilmington, Del.—The following are the bids opened on Oct. 21 by Maj. C. A. F. Flagler, Corps. Engrs., U. S. A., for dredging entrance to Broadkill River (price given per cu. yd.): River & Harbor Improv. Co., Philadelphia, Pa., 19.2 cts.; Pennsylvania Dredging Co., Camden, N. J., 23⅜ cts.

Springfield, Ill.—The State Senate has passed a bill which, if the House concurs in same, will be presented to the voters of the entire State of Illinois on Nov. 5, authorizing the issue of $20,000,000 State bonds at 4 per cent. for the building of a deep waterway from the terminus of the Chicago drainage channel near Joliet to Utica.

**East St. Louis, Ill.*—R. A. Brown, of Vincennes, Ind., has secured the contract for dredging about 16 miles of drainage canal east and south of East St. Louis, in the American Bottoms, lying between the bluffs on the east and the Mississippi River on the west, at 16½ cts. per cu. yd. The engineer's estimate calls for the removal of about 1,000,000 cu. yds. of dirt, about half of which will be used for levee purposes. W. J. Crocker, City Engr.

Tipton, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until November 2 for the construction of 9,800 ft. of tile ditch ranging from 8 to 16 in. P. O. Duncan, Co. Engr.

**Items marked thus give the names of parties awarded contracts.*

St. Paul, Minn.—The following are reported to be the bids opened on Oct. 10 by the State Drainage Board for improving channel of Roseau River in Roseau and Kittson counties, which will require the removal of about 510,089 cu. yds. (price given per cu. yd): Miller Dredging Co., 11.40 cts.; France Dredging & Constr. Co., 12.4 cts.; Standard Drainage Co., 10.5 cts. Ambrose G. Wahl, St. Cloud, 11.95 cts.; G. A. McWilliam, Walnut, Ill., 10.95 cts.; Phelan & Shirley ,Omaha, Neb., 11.0 cts.; R. A. Eley, Marshalltown, Ia., 10.85 cts., and Jerry Sherwood and Chas. Sutcliff, of Litchfield, total cost, about $54.000 (awarded contract).

Atlantic City, N. J.—The Atlantic City Monorail & Amusement Co., recently incorporated with a capital of $250.000, is reported to have decided to construct a new ocean pier in front of Hotel Windsor, to cost about $250,000. Geo. Cochran, Pres.; Robt. J. W. Koons, Secy., both of Philadelphia, Pa.

Albany, N. Y.—We are informed that no bids were received on Oct. 17 by F. C. Stevens, Supt. State Bd. of Pub. Wks., for Contract No. 20, Erie Canal, Sect. 2, which calls for dredging a channel in Mohawk River and performing work incidental thereto bet. Rexford Flats and Cranes Village. Length of contract, 18.5 miles. Sheets 1 to 41, inclusive. New bids will be called for.

Brooklyn, N. Y.—Bids will be received until Nov. 6 by Bird S. Coler, Boro. Pres., for furnishing material and dredging Newtown Creek Canal, at and in the canal and basin included within the boundaries of Johnson, Montrose, Morgan and Varick Aves. and also in the Stagg St. basin. Engineer's estimate of materials to be dredged is 14,500 cu. yds., scow meas.

Rye, N. Y.—Bids will be received, it is stated, until Nov. 6 by Geo. L. Henderson, Village Clk., for constructing a dock or bulkhead at Milton, Rye, N. Y. Chas. S. Towle, Village Engr., 5 E. 42d St. New York.

Syracuse, N. Y.—Local press reports state that F. C. Stevens, of Albany, State Supt. of Pub. Wks., has asked the State Engineer to make an examination and devise plans for the entire rebuilding of a portion of the canal in Syracuse. The N. Y. Central & Hudson River R. R. Co. (W. J. Wilgus, Vice-Pres. Constr. Dept., N. Y. City) is reported to be planning construction of a steel aqueduct at the tunnel east of the city.

Hallville, Ont.—Bids will be received until Nov. 2 by Hugh Martin, Clk. Mountain Township, Hallville, for $9,381 bonds to provide for the construction of the Silver Creek and Castore River drainage work.

Reading, Pa.—The following are reported to be totals of bids opened on Oct. 17 by the Bd. of Pub. Wks. for constructing Spring St. subway: Hawman Bros., Reading, $110,480; David Peoples, Philadelphia, $110,945; Jacob Mayer, Reading, $122,284; Jos. P. O'Reilly, Reading, $122,434; L. H. Focht & Son, Reading, $122,982; Abrens & Co., Reading, $131,174; Eastburn & Chiles, Philadelphia, $142,310, and Mack Paving Co., Philadelphia, $178,830.

National Soldiers' Home, Va.—Bids will be received by John T. Hume, Treas. Southern Branch, N. H. D. V. S., National Soldiers' Home, Va., until Nov. 1 for dredging channel extension, Jones' Creek, about 4,800 cu. yds.

CURRENT NEWS SUPPLEMENT

NOVEMBER 2, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

AMERICAN SOCIETY OF CIVIL ENGINEERS. Secretary, Charles Warren Hunt, 220 West 57th St., New York. Next meeting November 6, 1907. Paper on Water Purification at St. Louis, Mo.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS. Secretary, Calvin W. Rice, 29 West 39th St., New York. Annual meeting, New York, Dec. 3-6, 1907. Next meeting November 12, 1907. Paper on Gearless Traction Electric Elevators.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS. Secretary, Ralph W. Pope, 29 West 39th St., New York.

AMERICAN INSTITUTE OF MINING ENGINEERS. Secretary, R. W. Raymond, 29 West 39th St., New York.

NATIONAL FIRE PROTECTION ASSOCIATION. Secretary, W. H. Merrill, Jr., Chicago.

AMERICAN INSTITUTE OF ARCHITECTS. Secretary, Glenn Brown, Washington, D. C.

ASSOCIATION OF ENGINEERING SOCIETIES. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS. Secretary, W. M. Mackay, 113 Beekman St., New York.

CANADIAN SOCIETY OF CIVIL ENGINEERS. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

SOCIETY FOR THE PROMOTION OF ENGINEERING EDUCATION. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

AMERICAN SOCIETY FOR TESTING MATERIALS. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS. Secretary, S. F. Patterson, Concord, N. H.

AMERICAN RAILWAY ENGINEERING AND MAINTENANCE OF WAY ASSOCIATION. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago

AMERICAN WATER WORKS ASSOCIATION. Secretary, J. M. Diven, Charleston, S. C.

AMERICAN STREET AND INTERURBAN RAILWAY ASSOCIATION. Secretary, Bernard V. Swenson, 29 West 39th St., New York.

AMERICAN FOUNDRYMEN'S ASSOCIATION. Secretary, Richard Moldenke, P. O. Box 432, New York.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

AMERICAN PUBLIC WORKS ASSOCIATION. Secretary, W. H. Flint, Chattanooga.

ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

NATIONAL ASSOCIATION OF CEMENT USERS. President, Richard L. Humphrey, Harrison Building, Philadelphia.

AMERICAN SOCIETY OF REFRIGERATING ENGINEERS. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

AMERICAN PUBLIC HEALTH ASSOCIATION. Secretary, Dr. C. O. Probst, Columbus, O

THE STURTEVANT STEAM TURBINE.

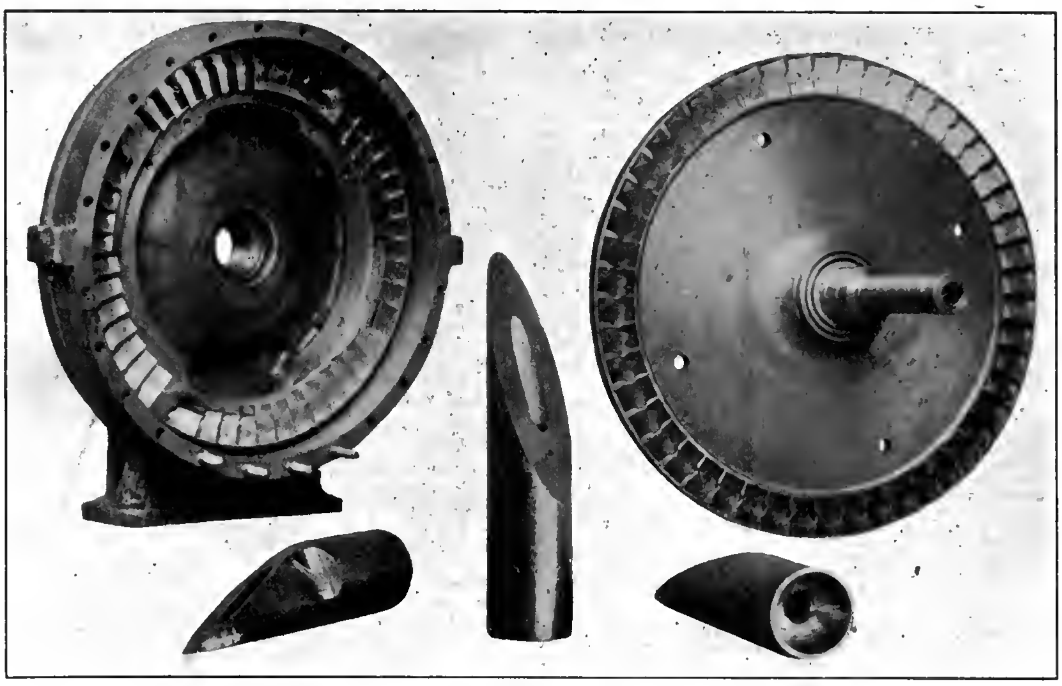
Several years ago it became apparent to the B. F. Sturtevant Co. that the steam turbine would be particularly adapted to driving direct-connected blowers and small generators. The experimental work was conducted by Mr. William E. Snow, of the engineering staff, and the turbine, which is a modification of the Riedler-Stumpf type, is now built under his patents. The steam enters at the sides of the bucket wheel through nozzles of Tobin bronze and acts upon buckets cut in the wheel. Similar buckets in the steel stationary guide plates form closed spaces in which the steam reacts, and as the steam is returned again and again to the moving buckets, each time at reduced velocity, more and more of its energy is absorbed. After the whirling motion has taken place in four of these stationary buckets the steam escapes from the open ended guide plates into the interior of the turbine case.

The bucket wheel or rotor is made of a single forging with the buckets worked out of the solid metal on a special automatic bucket-cutting machine. This process is stated to insure a wheel of great strength, and as it runs between the two guide plates there is no tendency to end thrust. A clearance of 1/16 in. all round the revolving wheel greatly reduces the liability of contact from lack of alignment, due to heating or wear of the bearings. Should contact occur, however, the makers believe it would be much less harmful with this design than it would be if the wheel carried on its periphery a large number of inserted blades. The bucket wheel is also made in another type; these buckets are milled into the edge of the disc and the steam acts tangentially. Either side or tangential bucket may be used with either single or multi-stage type turbines.

The Sturtevant turbine is made of the single-stage type in capacities ranging from 10 to 200 h.-p., and adjustment of the nozzles and buckets permits a wide range of power and speed for a turbine of given outside dimensions. Sizes above 200 h.p. are usually made from two to four bucket wheels. The areas of the nozzles and buckets increase successively on these wheels to take care of the larger volume of the expanded steam.

The speed of the Sturtevant turbine is controlled by a throttling governor which is direct-connected to avoid the use of belts or gears. The governor consists of but four parts and one spring. Located upon the end of the outboard bearing, it is enclosed in a dust-proof case and is direct-connected to the regulating valve which is placed upon the inlet beneath the governor.

GOVERNOR OF TURBINE.



THE STATOR, ROTOR AND NOZZLES OF THE STURTEVANT TURBINE.

The pressure upon the main bearings, which are the only surfaces in contact, is but 14 lb. per square inch, and the makers therefore claim that the wear is not appreciable. The bearings are of the self-aligning ring-oiling type with solid linings of phosphor bronze. When in continuous operation the only attention required is a weekly filling of the oil wells of these bearings.

The casing is made in halves so that the upper part can be removed easily for inspection of the bucket wheels; an annular passage supplies steam to the nozzles and each nozzle can be shut off separately by means of a small valve. The deep base is utilized for carrying the steam and the exhaust, which are connected directly to the base, thereby doing away with all overhead piping. The steam passages in the base are also arranged to form a separator, thereby insuring dry steam, so essential to efficiency and long life of the nozzles.

Among the advantages claimed for this turbine may be mentioned low speed. The repeated use of steam in the buckets of the same wheel gives the turbine a speed ranging from 1600 to 3000 r.p.m. This speed permits direct-connection and avoids the use of belts, gears, or other speed-reducing devices.

For installations in which the turbine is to be run non-condensing, no stuffing boxes are used on the shaft, steam tightness being secured by a short labyrinth or water packing. Since there is no contact between the rotary and the stationary rings of this packing, no adjustments are necessary and the packing will have a long life.

BUSINESS NOTES.

The Wiederholdt Construction Co., American Trust Bldg., Chicago, has acquired from the Atlas Construction Co., of St. Louis, all of the patent rights of the Wiederholdt system of reinforced concrete.

The Second Annual National Exhibition of Cement Products will be held in the Coliseum, Chicago, Dec. 17-21, 1907, under the auspices of the Cement Products Exhibition Co. Application for the first allotment of space will close on Nov. 9. Diagrams of exhibition spaces, application blanks and all details can be had by addressing the manager, Mr. L. L. Fest, New Southern Hotel, Chicago.

A riveting machine of unusual size and reach has been ordered from John F. Allen, 370 Gerard Ave., New York, by the Hawley Down Draft Co., Chicago. It will reach 84 in. into a stack 8 in. in diameter and drive 1-in. hot rivets or ½-in. cold rivets.

Building blocks of an unusual character are used in central New York with marked success. The Rochester Sewer Pipe Co., 545 Oak St., Rochester, manufactures a large amount of high-grade vitrified conduit, and as the company refuses to sell for electric purposes any conduit which does not conform fully with specifications, the slightly imperfect product of the kilns is now marketed as building blocks. Being cheap, non-absorbtive, fireproof and strong, they have come into considerable favor, and it seems likely that in a short time the demand for them will have increased materially.

The Northern Engineering Works, Detroit, Mich., has furnished three 10-ton electric traveling cranes, each of about 56-ft. span, and a No. 72 Newton cupola for the new foundry of R. Hoe & Co., printing press manufacturers, of New York. Three Northern cranes of 40-ft. span, one of 15-ton and two of 10-ton capacity, have also been furnished to the Clyde Iron Works, Duluth. The latter equipment will be operated by alternating current.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Ft. Morgan, Ala.—Bids will be received by Capt. L. F. Garrard, Constr. Q. M., until Nov. 28 for the construction of a 150,000-gal. steel tank on a 75-ft. trestle, as advertised in The Engineering Record.

**Los Angeles, Cal.*—We are informed that the Risdon Iron Wks. have secured the contract for a pumping engine for Buena Vista pumping station (bids opened Oct. 14) for $25,980.

Orland, Cal.—The Secretary of the Interior at Washington, D. C., is reported to have given his formal approval to the Orland Irrigation Project, as outlined by government engineers; appropriation available for this work is $650,000.

Pueblo, Colo.—F. L. Tebow, of Denver, is reported to have filed with the County Clerk at Pueblo preliminary maps and statement of a reservoir to be constructed on Turkey Creek, in the northwestern part of the country; it will have an estimated capacity of 306,800,000 cu. ft. of water.

Atlanta, Ga.—The following are reported to be totals of bids opened on Oct. 23 by the Bd. of Water Comrs. for furnishing and erecting complete a sectional washing pressure filter plant to consist of 8 units, each unit 8 ft. diam. and 20 ft. long. Said filter plant to have a minimum guaranteed daily delivering capacity of 4,000,000 gal. when one unit is out of service during washing period: New York Continental Jewell Filtration Co., New York, N. Y. (2 bids), $30,000 and $22,000; Roberts Filter Mfg. Co., Philadelphia, Pa., $21,600, and Philadelphia Water Purification Co., Phila., Pa. (2 bids), $26,125 and $25,125.

Lewiston, Idaho.—Bids will be received until Nov. 11 by the Common Council for furnishing f. o. b. Lewiston the following: 9,400 ft. 12-in., 5,400 ft. 8-in., 4,000 ft. 6-in. and 14,000 ft. 4-in. c. i. or steel pipe; all pipe to be kalamain, or kalamain and asphalted, or asphalted only, warranted to withstand a pressure of 300 lbs. to the square inch; 14,000 lbs. 4 to 12 in. c. i. fittings; 12,000 lbs. pig lead; 6 12-in., 17 8-in., 27 6-in. and 48 4-in. valves; 20 6-in. and 20 4-in. frostproof fire hydrants. John E. Nickerson, City Clk.

**West Chicago, Ill.*—The City Clerk writes that the citizens on Oct. 19 voted for water works, and contract for constructing same has been awarded to Duboldt Bros., of West Chicago.

Wichita, Kan.—The City Council on Oct. 21 selected I. Phillips to prepare plans for a new system of water works or make an estimate of the present work of the plant of the Wichita Water Co.

Wahoo, Neb.—See "Power Plants, Gas and Electricity."

Kimball, Neb.—It is reported that steps are being taken to construct water works at a cost of $17,000.

Trenton, Neb.—It is stated that the Village Trus. will receive bids until Nov. 11 for furnishing material and erecting a steel stand pipe 16 ft. diam. and 40 ft. high. Address W. H. Thornhill, Village Clk.

**Beaver City, Neb.*—W. L. Leonard, City Clk., writes that the National Constr. Co., of South Bend, Ind., has secured the contract for constructing water works (bids opened Oct. 22) for $21,600. The Des Moines Bridge & Iron Co., of Des Moines, Ia., bid for this work $22,890.

Campton Village, N. H.—The Campton Village Water Co. (Moody Dole, Pres.) is building a concrete dam and excavating a reservoir on Cove Mountain brook in the town of Thornton for a village water system. The pipe line will be laid early next season. Arthur W. Dudley, of Manchester N. H., is the engineer.

Jersey City, N. J.—C. H. Van Keuren, Ch. Engr. Street and Water Bd., in a communication to the Street and Water Bd., suggests that a supplemental contract be entered into with the Jersey City Water Supply Co. for laying additional mains under Hackensack and Passaic rivers, and if this cannot be done that the city perform the work itself. The cost of two additional 36-in. pipe lines, laid upon pile foundation under Hackensack River, he estimates, would cost $65,000. Two additional c. i. mains laid under Passaic River, where it will be unnecessary to drive pile foundation, would cost $27,500, make a total for the entire work of $92,500.

Roswell, N. M.—There is reported to be a petition in circulation here looking to the calling of an election to vote on issuing $165,000 bonds for water works and a sewerage system.

Mattituck, N. Y.—Bids will be received until Nov. 25 by Col. John G. D. Knight, Corps Engrs., U. S. A., New York City, for dredging in Mattituck Harbor as advertised in The Engineering Record.

Buffalo, N. Y.—The following are the bids opened on Oct. [illegible] by the Bd. of Pub. Wks. for 4 600-h. p. boilers, to be placed in boiler house at north end of pumping station: Heine Safety Boiler Co., $40,350, and Parker Boiler Co., $27,628.

Bainbridge, N. Y.—E. F. Musson, of Norwich, is preparing [illegible] for a reservoir and filtration plant for Bainbridge. [illegible] not be called for until the Spring.

Seneca Falls, N. Y.—This village is reported to have been granted [illegible] by the State Bd. of Water Supply [illegible] municipal water works on condition [illegible] by appropriation from the taxpayers [illegible] pay for the construction and also [illegible] and indirect, which may result from [illegible] of plans.

Batavia, N. Y.—[illegible] Water Comn. (J. H. Burkhart, Chmn.) [illegible] considering the selection of Dorman Springs, [illegible] miles south of Batavia, as a source of water supply for Batavia

New York, N. Y.—Bids will be received by John H. O'Brien, Comnr. Water Supply, Gas and Electricity, until Nov. 13 for furnishing, delivering and erecting a system of water curtains, with all piping, valves, manifolds, sprinkler heads, brackets, supports and all other appurtenances in the high-pressure pumping stations located at Oliver and South Sts. and Gansevoort and West Sts., Boro. Manhattan.

New Brighton, S. I., N. Y.—The Bd. of Aldermen, of N. Y. City on Oct. 29 voted to purchase the plant of the Staten Island Water Supply Co. for $1,100,000.

Wilmington, N. C.—This city has purchased the plant of the Claredon Water Co. for $155,000. It is stated that it will be enlarged and extended.

**Lumberton, N. C.*—The contract for the water and sewer extension is reported to have been awarded to F. M. Farrell, of Merry Oaks, N. C., for $18,570.

Smithfield, N. C.—See "Power Plants, Gas and Electricity."

Velva, N. D.—We are informed that the bids to be received by the City Clerk until Nov. 12 for the construction of complete water works will consist of an 85,000-gal. concrete reservoir sewer tile gravity pipe line, c. i. pressure distribution pipe line, frame pumping station combined gasoline engine and pump and 2 intake wells. Engineer, Oscar Claussen, German-American Bank Bldg., St. Paul, Minn.

Bowbells, N. D.—The citizens are reported to have voted to issue $12,000 bonds for the construction of water works and a system of fire protection.

Delta, O.—C. S. Longnecker, Mgr. Delta Electric Light Co., writes that this company will, if it secures franchise, construct water works at a cost of $25,000. The citizens will soon vote on the question of granting a franchise or constructing municipal plant.

**Lawton, Okla.*—The American Light & Water Co., of Kansas City, Mo., and the McQuatters Plumbing & Machine Co., of Hillsboro, Tex., are reported to have secured contracts from City Council for the construction of a dam and reservoir in the Wichita Mountains on Medicine Creek, and laying water mains from Lawton to the dam site; it is stated that the city will expend about $275,000 and will procure a permanent and adequate water supply.

Mangum, Okla.—The citizens are reported to have voted to issue bonds for water works extensions.

Portland, Ore.—Bids will be received by Lieut. Col. S. W. Roessler, Corps. Engrs., U. S. A., until Nov. 18 for furnishing and delivering 4 hoisting engines, 3 locomotives and 2 boilers, as advertised in The Engineering Record.

Huntington, Ore.—It is reported that bids will be received about Nov. 10 by the City Clk. for boring a well 1,000 ft. deep and cased with 6-in. iron casing.

**Philadelphia, Pa.*—The Dept. of Pub. Wks. on Oct. 28 awarded contracts as follows (bids opened Oct. 22): To the D'Olier Eng. Co., for boilers at the filter plant, amounting to $32,350; the Allis-Chalmers Co., of Milwaukee, Wis., for a centrifugal pump at $18,700, and for magnesia covering to the H. W. Johns-Mezille Co. at $8,000.

Harrisburg, Pa.—See "Power Plants, Gas and Electricity."

**Belle Fourche, S. D.*—The Secy. of the Interior at Washington, D. C., has executed a contract with Devore Bros. & Farlow, of Vale, S. D., for the construction and completion of a portion of the South Canal, Belle Fourche irrigation project, for $103,500.

Childdress, Tex.—The City Council is reported to be considering the question of calling an election to vote on issuing $15,000 bonds for fire protection in the business portion of the city.

Beaumont, Tex.—Hollis P. Porter, of Beaumont, Engr. of the Neches Canal Co., writes that the proposed work contemplated by this company will cost about $125,000. Will purchase all piping. W. M. Carroll, Pres.

Crockett, Tex.—The citizens are reported to have voted Oct. 15 to issue $25,000 bonds for the construction of water works.

Denison, Tex.—W. W. Berry, Supt. Water Co., writes that about $30,000 will be expended in improvements, to include filter plant, pumps, boiler, etc., but no bids will be asked for same.

Norfolk, Va.—The Common Council on Oct. 18 concurred with the Bd. of Aldermen in appropriating $50,000 for the purchase of 2,100 meters, to be placed in the residences where the largest waste of the city water is found, and it is stated that the Mayor will approve the same.

Seattle, Wash.—The lowest bid opened on Oct. 12 by the Bd. of Pub. Wks. for constructing pipe line on Harvard Ave., North, was submitted by the Independent Asphalt Paving Co., Pioneer Bldg., at the following bid: 20 cu. yds. solid rock excav., trenching, hauling and back fill. (including clearing and grubbing) $1; 4,320 cu. yds. other materials excav., trenching, hauling and back fill., per cu. yd. (including clearing and grubbing), $1; 32.5 M. ft. lumber in staves, in 42-in. pipe, $50; 114,000 steel in bands, 7 cts.; 20 lin. ft. 6-in. c. i. waste pipe, $1.50; 1,000 lbs. c. i. fittings, 10 cts.; 510 lin. ft. 42-in. riveted steel pipe, 5-16-in. thickness, $11; 780 lin. ft. 42-in. steel pipe, 3/8-in. thickness, $13.50; totals, $31,000. Totals of other bids: International Contract Co., New York Blk., $31,817, and Sanfield & Gifford, 764 Belmont Pl., $33,298.

Tacoma, Wash.—This city has in contemplation the erection of a 500,000-gal. stand pipe of steel or reinforced concrete, to be about 60 ft. high. C. C. Raleigh, Asst. City Engr.

Prosser, Wash.—The citizens are reported to have voted, Oct. 12, to issue $10,000 bonds to sink a well for domestic water supply.

Spokane, Wash.—Prof. Wm. H. Burr, of New York, N. Y., on Oct. 20 filed with Mayor Moore a report on the question of a water supply for city, recommending that the underground flow of water in the Spokane Valley be utilized.

Deer Park, Wash.—T. A. Beard is reported to have petitioned the County Comrs. at Spokane for a franchise for water works.

Union, W. Va.—A. S. Johnston, Mayor, writes that bonds to the amount of $5,500 have been sold for water works.

St. Croix Falls, Wis.—Otto W. Comer, Village Clk., writes that all bids opened on Oct. 26 for water works extension have been rejected; probable cost of work, $5,000. Ben. Clayton, of St. Croix Falls, is reported interested.

**De Pere, Wis.*—M. J. Maes, City Clk., writes that contracts for furnishing material for water works extension has been awarded to W. O. Bahr, of Manitowoc, to the Ludlow Valve Co., of Chicago, Ill., and to the Sheffield Cast Iron Pipe & Fdy. Co., of Chicago., Ill., total cost of work, $5,843.

**Madison, Wis.*—Geo. Nelson, of Madison, is reported to have secured the contract on Oct. 9 for constructing a reservoir for about $11,550.

Sheboygan, Wis.—Bids will be received until Nov. 15 by Theo. Dieckmann, Mayor, and John M. Steimle, City Clk., for $360,000 bonds, issued for the purpose of purchasing the plant of the City Water Co. and for making extensions to said plant.

Neenah, Wis.—It is stated that bids will be received Nov. 5 for $20,000 water works bonds. J. L. Keating, City Clk.

Ft. Mackenzie, Wyo.—Bids will be received until Nov. 14 by Capt. Wm. D. Davis, Q. M., U. S. A., for constructing an 8-in. c. i. water main from U. S. reservoir to Ft. Mackenzie, together with connection to post distributing system

Thermopolis, Wyo.—J. B. Chessington, City Engr., writes that the citizens have voted to raise $50,000 bonds for the construction of water works and the city will receive bids until Nov. 18 for the purchase of the bonds. F. C. Hank, Town Clerk.

Kelowna, B. C.—See "Power Plants, Gas and Electricity."

London, Ont.—An election will probably be held in January to vote on issuing bonds for extension of the water works. John M. Moore is engr. and supt.

Vonda, Sask.—The Town Clerk writes that the proposed water works will cost $12,000 to $15,000, and bonds will be voted for on Nov. 2.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Ventura, Cal.—The City Clerk writes that bids will probably be called for in Dec. for the proposed sewer work, steel bridges, parks, paving, fire house, etc., for which the citizens on Sept. 24 voted to issue $150,000 bonds. Engineer, J. B. Wand, of Ventura.

San Francisco, Cal.—At a meeting of the City Superv. on Oct. 14, upon recommendation of the Finance Com., the following amounts were set aside: $233,700 to repair and clean out sewers and repair street pavements; $21,350 for repairing municipal buildings other than City Hall; $32,052 to pay for sewer construction in 7th St. from Howard to Market and in Market from 7th to Jones, and $12,177 for resurfacing with bitumen portions of Market St. from 2d to 12th Sts.

**Torrington, Conn.*—W. A. Williston, Boro. Engr., writes that the following are the bids opened on Oct. 21 for the construction of sanitary sewers: (*a*) 45 ft. 12-in. tile pipe; (*b*) 1,145 ft. 10-in. tile pipe; (*c*) 6,581 ft. 8-in. tile pipe; (*d*) 37 manholes, ea. (*e*) rock excav. per cu. yd.; (*f*) totals: Robbiatti Ambrose, Torrington, *a* 78 cts., *b* $1.35, *c* $1,25, *d* 60 cts.; *e* $6, *f* $8,955 (awarded contract); Eveline Bros., *a* 86 cts., *b* $1, *c* $1,25 *d* $52, *e* $7, *f* $8,784; Pierson Eng. & Const. Co., *a* $1.10, *b* $1. *c* $2, *d* $60, *e* $6. *f* $10,694; Gill & Co., *a* $1.18, *b* $1.18, *c* $1.18, *d* $55, *e* $5, *f* $11,204; Little & Long, *a* $1.42½, *b* $1.55, *c* $2.55, *d* $75; *e* $6, *f* $14,042.

Chicago, Ill.—The Drainage Bd. on Oct. 21 purchased property for right-of-way of proposed Evanston auxiliary channel, which is to divert sewage of North Shore suburbs from Lake Michigan into north branch of Chicago River.

South Bend, Ind.—A. J. Hammond, City Engr., is preparing plans for about 5 or 6 miles of pipe sewers.

**Adel, Ia.*—V. T. Sweeley, Town Clk., writes that the contract for constructing sewers in Walnut, Main and Rapids Sts. (bids opened Oct. 21) has been awarded to G. M. King Constr. Co., of Des Moines, for $3,211.

Des Moines, Ia.—Bids will be received until Nov. 9 by the Bd. Pub. Wks. (W. W. Wise, Chmn.) for constructing a reinforced concrete culvert at 13th and North Sts.

**Virginia, Minn.*—Chas. C. Butler, of Virginia, is reported to have secured the contract for constructing sewers in Dist. 3 G (bids opened Oct. 22) for $3,079.

**St. Joseph, Mo.*—The Bd. of Pub. Wks. is reported to have awarded to G. O. Stulbred the contract for extending the Sycamore St. sewer for $7,306.

East Rutherford, N. J.—Geo. A. Duncan, Boro. Clk., writes that the citizens on Oct. 28 voted to construct a system of sewers. Engineers, Wise & Watson, of Rutherford.

Roswell, N. M.—See "Water."

Long Island City, L. I., N. Y.—Bids will be received until Nov. 11 by Jos. Bermel, Boro. Pres., for furnishing material and constructing a sewer in a portion of 3d Ave.; also a catch basin on the cor. Sanford St. and Hamilton Ave.

Sea Cliff, L. I., N. Y.—G. Griffith Clapham, Village Clk., writes that it has been decided not to push the sewer question until the spring, but in the meantime the matter will be under consideration.

Lumberton, N. C.—See "Water."

Smithfield, N. C.—See "Power Plants, Gas and Electricity."

Velva, N. D.—See "Water."

Alliance, O.—John L. McConnell, Mayor, has approved the ordinance providing for the construction of

**Items marked thus give the names of parties awarded contracts.*

a sewer outlet for the sewage disposal plant, at a cost of $5,700. Chas. O. Silver, Clk. Bd. Pub. Service.

Dayton, O.—The following are reported to be the bids opened on Oct. 11 by the Bd. of Pub. Service: On sanitary sewers in Sewer Dist. No. 4, bounded by Wayne Ave. and Wyoming St. and the old corporation line, Shafor & Dill, $13,260; John T. Reese, $13,372.

**Cincinnati, O.*—M. J. Connelly Const. Co. has secured the contract for constructing sewers on Edwards Road and in the ravine north of Bodman Ave. for $10,623, and W. S. Hollander for sewers in Cutter St. and in property of W. Goodman, for $3,186 (bids opened by Bd. Public Service Oct. 17).

Springfield, O.—Bids will be received by the Bd. of Pub. Wks. (F. A. Crothers, clk.) until Nov. 20 for furnishing material and constructing a portion of the high level intercepting sewer to include 9,816 lin. ft. vitr. pipe, plain or reinforced concrete sewer, 9,376 lin. ft. 6 in. pipe house connections, Y branches. manholes, 17,875 cu. yds. rock excav., 115 cu. yds. Class A concrete, etc. W. H. Sieverling, City Eng.

Akron, O.—Bids will be received until Nov. 6 by the Bd. Pub. Service (Chas. H. Watters, secy.) for constructing sewers in portions of 6 streets.

Salem, O.—L. E. Chapin, of Canton, is preparing plans for sewage disposal plant, to cost about $40,000. Contracts will not be let until about April.

Canton, O.—Bids will be received by the Bd. of Pub. Service until Nov. 25 for 5,000 ft. pipe sewer, 15 to 24 in.; 37 catch basins and 20 manholes. B. F. Faust, Clk. of Bd.

Put In Bay, O.—Carl Oelschlager, Village Clk., writes that it is proposed to construct a sewerage system. Engineer, C. E. De Witt, of Port Clinton.

**Steubenville, O.*—T. W. Vance, Clk. Bd. Pub. Service, writes that the contract for 3,079 ft. of 24, 30 and 36-in. brick sewer (bids opened Oct. 14) has been awarded to Jas. Ferry & Sons, of Crafton, Pa.

Girard, O.—E. L. Hauser, City Clk., writes that bids will be received on Nov. 5 for constructing a portion of the main sewer, to consist of 5,600 lin. ft. 18-in. pipe sewer, average cut about 15 ft. Engineer Wm. Wilson, of Niles.

Lancaster, Pa.—Bids will be received by the Special Sewerage Comn. (Chas. G. Baker, Clk.) until Nov. 11 for building about 2,200 ft. of 108-in. reinforced concrete sewer and appurtenances, as advertised in The Engineering Record. This is to complete work recently abandoned by contractor.

Weatherly, Pa.—It is reported that a petition is now being circulated, looking to the construction of a sewerage system.

**Chattanooga, Tenn.*—Bids were opened on Oct. 15 by the Bd. of Pub. Wks. for the construction of a brick main sewer and appurtenances on Chestnut St. from Tennessee River to the center of 9th St., to consist of about 3,899 ft. of egg-shaped sewer, 36x54 in. to 50x75 in., and 175 ft. 6-in. circular sewer, and Guild & Co., of Chattanooga, secured the contcart for storm sewer, without diverter, for about $61,214.

St. Albans, Vt.—Surveys are in progress for the reconstruction of sewer system, the plans to be completed in time to submit matter of construction to the citizens at the election in Mar. They will include a trunk sewer, taking sewage from present outlet in brook and carrying it through a system of septic tanks and filter beds before discharging the effluent. N. N. Atwood, Mayor. A. W. Dudley, Manchester, N. H., Engr.

**Spokane, Wash.*—Contracts for sewers (bids opened by the Bd. of Pub. Wks. on Oct. 22) have been awarded as follows: To Jas. C. Broad, 106 Post St., for the 1st Ward sub-trunk sewer, Dist. No. 7, at $96,234; to Allen F. Gill, for main trunk sewer, 1st Ward, Dist. 4, for $18,475, and to John Fife, for building sub-trunk sewer, 1st Ward, Dist. 6, for $20,944.

Seattle, Wash.—See "Paving and Roadmaking."

North Milwaukee, Wis.—Bids will be received until Nov. 11 by E. H. Klamp, Village Clk., for constructing a concrete septic tank, 42 ft. diam. by 16 ft. deep. W. G. Kirchoffer, Engr., Madison.

Toronto, Ont.—A report on the question of the trunk sewer was presented to the Bd. of Control on Oct. 22 by City Engr. Rust. He is said to have recommended the construction of high and low level intercepting sewers, and the clarification of the sewage by means of septic tanks and contact beds. To carry out scheme would involve purchase of about 125 acres of land in neighborhood of Ashbridge's Bay. An expenditure of $3,400,000 is involved in the proposal. As designed, the amount of land provided is sufficient for a population of 600,000, but at the present time it will only be necessary to provide works for a population of 350,000. At a meeting of the Bd. of Control on Oct. 23 the following resolution passed two readings, to submit to ratepayers at next municipal election the question of constructing a trunk sewer and sewage disposal works, in acordance with report of City Engr.

Manila, P. I.—Plans and specifications are on file at the office of The Engineering Record, 239 W. 39th St., New York, N. Y., for furnishing and installing electrically driven pumps and motors for the new sewer system for the city of Manila, bids for which will be received at the office of the Municipal Board (John M. Tutler, Secy.) until Jan. 15, as advertised in The Engineering Record. There will be one main station and 5 substations, each equipped with 2 pumps and corresponding motors, or a total of 12 pumps and motors. J. F. Case, Chief Engr.

BRIDGES.

Notes Arranged Alphabetically by States.

Tucson, Ariz.—The Bd. of Supervisors is stated to be considering plans for a bridge to be constructed over the Rillito, at a cost of about $5,000.

**Napa, Cal.*—The Bd. of Supervisors is stated to have opened bids Oct. 16 for constructing a stone masonry arch bridge over Milliken Creek at crossing of Little Trancas in Road Dist. No. 4: Jas. B. Newman, $9,693; C. H. Gildersleeve, $7,796, and H. W. Wing, $6,680 (awarded contract).

**San Diego, Cal.*—The Bd. of Superv. is stated to have awarded the contract for constructing the Lakeside Bridge to Mercereau Bridge & Const. Co., of Los Angeles, at $11,840.

Ventura, Cal.—See "Sewerage and Sewage Disposal."

Muncie, Ind.—Bids will be received, it is stated, by the Bd. Co. Comrs. until Nov. 6 for constructing 2 bridges, one across Mississineva River and the other across White River. Jos. E. Davis, Co. Aud.

Marion, Ind.—Bids will be received, it is stated, until Nov. 5 by the Bd. Co. Comrs. for constructing 4 concrete bridges. Harry Goldthwaite, Co. Aud.

Baltimore, Md.—Plans are stated to have been submitted to Municipal Art Comn. by Mr. Fendall, City Engr., and Danl. B. Banks for the Edmondson Ave. Bridge; estimated cost of structure, $180,000.

Thief River Falls, Minn.—Bids will be received until Nov. 6 by Lars Backie, City Clk. for building an iron bridge across Red Lake River.

Joplin, Mo.—The construction of a viaduct at 3d St. is reported contemplated at a cost of $91,000. The structure to be of steel with cement approaches.

Cleveland, O.—The Erie R. R. bridge No. 5, over Cuyahoga River, near Broadway, S. E., is reported destroyed.

Cincinnati, O.—The construction of a bridge over the canal at 14th St. is reported contemplated at a cost of $22,000.

Portland, Ore.—It is stated that the Executive Bd. has authorized the Auditor to receive bids for constructing a bridge over Sullivan's Gulch at E. 28th St.

Bids will be received, it is stated, until Nov. 29 by A. L. Barbour, City Aud., for constructing a reinforced concrete bridge across Sullivan's Gulch, at E. 28th St. Douglas W. Taylor, City Engr.

Panama.—The following are the bids opened on Oct. 24 at the office of the Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for the construction of a single-track railroad bridge, compelte, consisting of one 108-ft. through plate girder span and two 103-ft. 6-in. through plate girder spans: The Strobel Steel Co., Monodnock Blk., Chicago, Ill., $21,400 (delivery in New York, Feb. 15, 1907); U. S. Steel Export Co., New York, N. Y., $15,609 (Feb. 15); R. C. Hofman Co., Baltimore, Md., $19,240 (Feb. 15), and Penn Bridge Co., Beaver Falls, Pa., $19,420 (May 1).

Pittsburg, Pa.—The construction of a bridge connecting Meadow and Bond Sts. is reported contemplated, also a bridge over Beechwood Boule. at Murray Ave., probable cost, $80,000 and $60,000, respectively.

Mill Run, Pa.—Bids will be received until Nov. 15 by the Co. Comrs. (M. E. Townsend, Chmn.), at Uniontown, for constructing the stone abutments and wing walls for a bridge over Mill Run in Springfield Township, Mill Run; also same time and place for constructing the superstructure of said bridge, to be of steel, 35 ft. long.

Georgetown, S. C.—Bids will be received until Nov. 20 by J. B. Johnson, Co. Superv., Georgetown, for constructing a steel drawbridge across Mingo Creek.

Memphis, Tenn.—Bids will be received at the office of F. M. Guthrie, 70 Madison St., until Nov. 6 for putting in a new foundation under the N. 2d St. steel bridge across Wolf River, to consist of two sets of piers, about 65 ft. long and 15 ft. in diam.

Ogden, Utah.—Press reports state that Salt Lake & Ogden Ry. Co. (E. A. Vail, Ch. Engr., Salt Lake City) will soon comence the construction of a viaduct on 24th St.

Olympia, Wash.—The State Bd. of Highway Comrs. are stated to have awarded the contract for constructing the Washongal River Bridge, on State Road No. 8, to the Northwestern Bridge Co., of Tacoma, for $6,975. The structure will be of steel, with 180-ft. span.

Centralia, Wash.—Bids will be received until Nov. 9 by the State Highway Comn. (Jos. M. Snow, Secy.), Olympia, for grading and bridging State Aid Road No. 5, otherwise known as Harrison Ave., near the city of Centralia.

Spokane, Wash.—Plans have been prepared by Allen R. Scott, County Engr., for the Le Pray Bridge, which is to be built at the site of the old structure, 26 miles below Spokane, crossing the river between Spokane and Stevens Counties. The structure will consist of 3 Howe Truss Spans, each 120 ft. long. The 2 piers in the river will be of tubular steel, filled with concrete, and the supports at either end of the bridge will be short towers of timber. The floor will be on the lower chord and will be about 23 feet above high water. According to reports bids will be received by Chas. Howard, Clk. Bd. County Comrs.

Prof. W. H. Burr, of New York, N. Y., in his report to Mayor C. Herbert Moore on bridge at Monroe St., recommends that a new structure be built to take the place of present bridge, using such parts of it as may be available in other locations where traffic is lighter, or disposing of it in some other manner. If steel bridge is constructed he estimates cost at $250,000; a concrete bridge he estimates would cost about $325,000. He also considers feasible the scheme of constructing a bridge from the intersection of Front and Lincoln Sts., and gave as his opinion that it could be constructed at a cost of approximately 60 per cent. less than the amount necessary to apply in the construction of a bridge at Monroe St.

Bids will be received until Dec. 16 by Robt. Fairley, City Compt., for $400,000 bonds, issued for the construction and repair of bridges across the Spokane River.

The City Council on Oct. 22 authorized the City Engr. to prepare plans for a steel girder bridge across the river at E. Olive Ave., to cost about $40,000.

Eau Claire, Wis.—See "Miscellaneous."

Canton, China.—Bids will be received by the Canton River Bridge Co., Ltd. (Lau Chin Ting, Chmn.) until Dec. 31 (change of date from Oct. 19) for the construction of a steel cantilever and girder bridge, 1,102 ft. in length, in the Front Reach, Canton, on site about 740 ft. to west of Dutchfolly-fort, as advertised in The Engineering Record.

Markham, Ont.—See "Power Plants, Gas and Electricity."

Monteal, Que.—Press reports states that Thomas Malcolm is interested in the construction of a bridge over Restigouche River from Campbellton, N. B., to the Quebec side in Bonaventure County. The bridge will be 3,330 ft. long, containing 16 piers and will connect Atlantic, Quebec & Western Ry. and Intercolonial Ry.; probable cost, $600,000.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Hot Springs, Ark.—Bids will be received until Nov. 20 by F. V. P. Ellsworth, City Engr., for street paving in Improvement Dist. No. 21 and 26, approximately 10,000 sq. yds., with either asphalt, bitulithic or vitrified paving block on 6-in. concrete base; also approximately 5,000 sq. yds. with vitrified brick between the tracks of the Street R. R.

San Francisco, Cal.—See "Sewerage and Sewage Disposal."

Ventura, Cal.—See "Sewerage and Sewage Disposal."

Wethersfield, Conn.—Bids will be received until Nov. 6 by the Bd. of Selectmen (Alfred W. Hanmer, 1st Selectman) for constructing a section of road in this town.

Wilmington, Del.—It is stated that bids will be received until Nov. 5 by Francis A. Price, Co. State Highway Comn., 1009½ arket St., for constructing a macadam road.

Palatka, Fla.—Bids will be received, it is stated, until Dec. 3, for 22,805 sq. yds. vitrified brick and 9,857 lin. ft. of granite or concrete paving. J. E. Craig, City Engr.

**East St. Louis, Ill.*—Walter Coonan has secured the contract for paving Illinois Ave. from State St. to 13th St. (bids opened Oct. 21), at the following bid: 390 ft. 20-in. pipe, laid, $1.60; 915 ft. 15-in. pipe, laid, $1.25; and 1,180 ft. 12-in. pipe, laid, $1; 5 c. i. manhole caps, ea., $14; 6 stone inlets with iron covers, ea., $14; 45 cu. yds. brick masonry in manholes and catch-basins, $9; 68c cu. yds. excav. placed in fill, 30 cts.; 1,100 cu. yds. excav. removed, 50 cts.; 2,500 ft. sandstone curb, 60 cts., and 8,100 sq. yds. banner brick, $1.65; total, $19.126. Totals of other bids on this class of brick: W. H. Hill Constr. Co., $19,611, and J. & P. Keeley, $19,955. Walter Coonan also secured contract for paving 11th St. from St. Louis Ave. to Illinois Ave. (bids opened Oct. 21) with Banner brick for $5,103.

Chicago, Ill.—Bids will be received until Nov. 7 by the Bd. Local Improv. (H. S. Dietrichs, Pres.) for paving with granite blocks 38th Pl.

Peoria, Ill.—Odrinances have been prepared providing for the paving of Water St. from Main to Chestnut St. with brick on Portland cement concrete base at a cost of $12,950, and for paving S. Adams St. from Oregon St. to city limits with brick, on gravel base, at a cost of $10,000.

Monticello, Ind.—It is stated that bids will be received until Dec. 3 by J. L. Ackerman, Co. Aud., for constructing a gravel road in Prairie Township and a macadam road in Jefferson Township; also until Nov. 26 for $59,700 macadam road bonds.

Noblesville, Ind.—It is stated that the Comnrs. of Hamilton County will soon ask for bids for the construction of 1½ miles of crushed stone road; estimated cost, $17,000.

Cedar Rapids, Ia.—Bids will be received until Nov. 14 by the Pub. Improv. Com. (W. C. Byers, Chmn.) for paving portions of 15th and 19th Sts. with repressed vitrified brick block.

Davenport, Ia.—Bids, it is stated, will be received until Nov. 5, by the Bd. Pub. Wks. for paving various streets and alleys. Thomas Murray, City Engr.

**Chillicothe, Mo.*—Jas E. Meck is reported to have secured the contract for paving a portion of Elm St., at $15,700.

Camden, N. J.—Bids will be received until Nov. 11 by the Stone Road Com. the Court House, Camden, for furnishing about 10,000 tons of stone for and resurfacing Camden, Ellisburg and Marlton Turnpike in Camden County. J. J. Albertson, Co. Engr.

Belleville (Newark), N. J.—Bids will be received until Nov. 5 by the Township Com. of the Township of Belleville, Academy and Cortlandt Sts., Belleville, for furnishing material and constructing sidewalks and crosswalks on the east and west sides of a portion of Belmont Ave.

Atlantic City, N. J.—Bids will be received by the City Clerk until Nov. 11 for repaving Pacific Ave. and constructing drainage conduits, to include 23,500 sq. yds. asphalt paving, 1,040 lin. ft. bluestone heading, stone and a drainage system complete, consisting of 25 lines of conduits, including new vitr. fire clay block gutters upon concrete around 50 curved corners at end of conduits, as advertised in The Engineering Record.

Long Island City, L. I., N. Y.—Bids will be received until Nov. 11 by Jos. Bermel, Boro. Pres.. for paving portions of Onderdonk Ave. and Academy St. Engineer's estimate 6,865 sq. yds. asphalt black pavt., 1,700 lin. ft. concrete curb., etc.

Albany, N. Y.—Bids will be received until Nov. 18 and Nov. 21 by Fredk. Skene, State Engr. and Surveyor, Albany, for constructing about 5 public highways as advertised in The Engineering Record; cost reported to be about $1,500,000.

M. F. Dollard is reported to have secured the contract for paving Sheridan Ave., at $10,793.

New York, N. Y.—Bids will be received until Nov. 7 by Henry S. Thompson, Acting Pres. Boro. Manhattan and Comr. Pub. Wks., for repaving portions of Cortlandt Alley, Waverly Pl., Central Park, S.; Bway., Jefferson, Broad, Chambers, Spring, Platt, Stanton, Perry, W. 10th, E. 91st., E. 118th, W. 151st, W. 152d, W. 153d and W. 154th Sts., Amsterdam, Edgecombe, Madison, 10th and 12th Aves.; grading, curbing and flagging portions of W. 139th, W. 140th and W. 160th Sts. Engineer's estimate: 11,144 sq. yds. asphalt blk. pavt., 52,516 sq. yds. asphalt pavt., including binder course; 22,0[illegible] sq. yds. granite blk. pavt, with paving cement joints; 3,800 sq. yds. blk. pavt., 67,269 sq. yds old stone blocks, to be pur

**Items marked thus give the names of parties awarded contracts.*

chased by contractor and removed, 14,409 cu. yds. concrete, 33,381 lin. ft. new bluestone curb., furnished and set, 2,405 lin. ft. old bluestone curb., redressed, re-jointed and reset; 3,020 lin. ft. new curb., furnished and set; 12,140 sq. ft. new flagging, furnished and laid; 180 noiseless covers, complete, for sewer manholes, furnished and set; 87 noiseless covers, complete, for water manholes, furnished and set, etc.

Bids will be received by the Park Bd. (Saml. Parsons, Jr., Pres.) until Nov. 7 for furnishing and delivering 2 12-ton 3-wheel steam road rollers for the Dept. Parks, Boro. Bronx. Also until Nov. 14 for furnishing material and constructing granolithic and brick sidewalks and the granite curbing of the concourse and approach to Baird Court in the New York Zoological Park, Bronx Park.

Brooklyn, N. Y.—The City Comptroller has been authorized to issue $100,000 bonds for maintenance and repair of streets in Boro. of Brooklyn.

*The following are the bids opened on Oct. 9 by Bird S. Coler, Pres. Brooklyn Boro., for regulating, grading, curbing and laying sidewalks on New York Ave., from Clarkson Ave. to Malbone St.: (Bidders all of Brooklyn) Builders' Trucking & Material Co., Bedford Ave. and Degraw St., $10,661 (awarded contract); F. J. Gallagher, 574 Park Pl., $12,440 Bracken McAveney Co., foot of 6th St., $12,005 J. J. Gannan, Gravesend Ave. and Neck Road, $13,590; Daniel Douglass, 122 Logan St., $14,377; Bonacci Vincelli C. Co., 220 4th Ave., $14,107; J. T. Rutan, 4 and 5 Court Sq., $10,120; Chas. Cranford, 44 Court St., $13,257; H. P. George, 49 Washington Ave., Richmond Hill, $17,222; Geo. F. Melvin, 1241 Sterling Pa., $11,935.

Jacksonville, Ill.—The following are the bids opened on Oct. 14 by the Bd. of Local Improv. for paving in Dists. 3 and 4 (Engineer, C. W. Brown, of Jacksonville): (*a*) Schirtz & Bates, Lincoln; (*b*) F. J. Traut and F. J. Schneer, Jacksonville (*c*) T. F. Layden, Davenport, Ia.; (*d*) P. H. Tiernan, Macomb; (*e*) A. F. Frank, Jacksonville; (*f*) John Bretz, Springfield (2 bids), $1.62 per sq. yd. for Culver block—total, $83,763—and $1.56 for Purington block; (*g*) J. E. Saltisbury & Co., Aurora; (*h*) Ora F. Dunlop, Edwards. (Engineer's estimate, $77,641.)

*Bids were opened on Oct. 9 by Bird S. Coler, Pres. Brooklyn Boro., for regulating and repaving with asphalt on a concrete foundation Bedford Ave., from Division Ave. to Heyward St., and the Brooklyn Alcatraz Co., 12th St. and Gowanas Canal, Brooklyn, secured the contract at the following bid: 15,490 sq. yds. asphalt pavt., $1.30; 15,490 sq. yds. present pavt., to be removed, $1.25; 30 sq. yds. old stone pavt., relaid, 40 cts.; 2,150 cu. yds. concrete, $6; 4,660 lin. ft. new curb, set in concrete, $1.25; 650 lin. ft. old cub, reset in concrete, 70 cts.; 44 noiseless covers and heads complete, for sewer manholes, $18; total, $59,483. Totals of other bids: Cranford Co., 190 Montague St., Brooklyn, $69,240; Uvalde Asphalt Paving Co., 1 Bway., N. Y. City, $69,684, and Barber Asphalt Paving Co., 114 Liberty St., New York City, $61,083.

Bids will be received until Nov. 13 by Bird S. Coler, Boro. Pres., for paving portions of Kenilworth Pl., E. 5th, E. 19th, 11th, Lynch and Martense Sts., Newkirk, Prospect and Ovington Aves. Engineer's estimate: 20,630 sq. yds. asphalt pavt., 12,370 sq. ft. cement sidewalk, 2,395 cu. yds. concrete, 3,990 lin. ft. new curb., etc.

Rochester, N. Y.—The City Council is reported to have authorized the paving of Atkinson St, with trap rock and constructing cement walks.

Newburgh, N. Y. Local press reports state that bids will be received until Nov. 5 by the City Clk. for paving a portion of South St.

Salisbury, N. C.—Bids will be received until Nov. 7 by A. H. Boyden, Mayor, for $100,000 street and general improvement bonds. For further information address H J. Overman, City Clk.

Cincinnati, O. It is stated that all bids opened Oct. 24 for paving with asphalt a portion of Burgoyne St. have been rejected According to reports new bids will be received.

Sandusky, O.—Preliminary legislation for the paving of Washington St., about 14,000 sq. yds. on concrete foundation, has been passed by City Council. Jos. Sotn, Jr., City Auditor; A. C. Schultz, City Engr.

Dayton, O.—The City Council is reported to have passed an ordinance providing for the paving of a portion of Point St.

The Bd. of Pub. Service is reported to have opened bids, as followa, for paving Roberts Boule.: J. O. Shoup & Co., creosoted wood block $26,686, macadam $14,181; J. E. Conley Co., 15 N. St. Clair St., bituminous macadam $17,517, macadam $14,675, with wood block a portion of the boulevard, $20,089; Wm. J. Kernan, brick $18,442, macadam $14,788; Al. Wroe & Son, brick $18,442; Barber Asphalt Paving Co., asphalt $20,927; Kirchner Const. Co., of Cincinnati, O., asphalt $21,122, and Andrews Asphalt Paving Co., asphalt $21,208.

Lawton, Okla. The City Engineer is reported to have been directed to prepare plans and specifications for street improvements, at an estimated cost of $90,000.

Portland, Ore. The Executive Bd. is stated to have opened bids as follows for paving: Warren Constr. Co., Stark St, $15,708, Elizabeth St., $12,953; Northrup St., $5,731; Knott St., $11,200; Williams Ave., $17,527; First St., $18,435; Grand Ave., $1,502; Vaughn St., $17,739; Broadway, $13,784 Pacific Bridge Co., Elizabeth St., $12,158; E. 27th St, $6,987; Williams Ave., $16,708; Broadway, $14,067; E. 16th St., $5,793; E 14th St., $9,497; E. Washington St, $16,415; E. 22d St., $5,382. Stevens Bros., E. 21st St, $1,407; Frankfort St., $11,510. Bechill Bros., Page St., $1,773; Gladstone Ave., $14,694; Borthwick St., $1,402; Benton St, $2,175, Flint St., $3,310. Chas. E. Pottage, E. Morrison St., $3,981. Miller & Bauer, Denver Ave., $3,469; E. 9th St., $3,708; Tacoma Ave., $3,178; Nehalem Ave, $2,224 Concrete Constr. Co., Grand Ave, $3,014. Star Sand Co., Raleigh St., $2,084; Lewis St., $4,286; Dixon St., $1,835; Borthwick St., $1,370; Benton St., $2,138, Flint St, $3,255. O'Neill & Co., E. Madison St., $10,523; E. Flanders St., $1,803. Keenan Bros., Gladstone Ave., $14,255. R. J. Debuhr, Mallory Ave., $4,882; E. 6th St., $3,989; H. J. Ewing, Union Ave., $8,340; E. 13th St., $3,085. O. W. Olson & Co., E. 9th St., $3,835; Tacoma Ave., $3,361. Barber Asphalt Paving Co., 21st St., $11,428.

Philadelphia Pa.—Bids were opened by the Dept. of Pub. Wks. on Oct. 21 for repaving about 40 miles of streets, embracing about 27 miles of asphalt streets, 12 miles of vitrified or shale bricks and one mile of granite block at an estimated cost of $1,500,000, and the following are reported to be the bids received:

For asphalt paving: Filbert Paving Co., $1.63 to $1.99 per sq. yd.; Barber Asphalt Co., $1.62 to $2.11 per sq. yd.; W. S. P. Shields, $2.16 per sq. yd.

Fo asphalt paving the Filbert Paving Co. was the lowest bidder on 194,000 sq. yds., the Mack Paving Co. on 174,000 sq. yds.

For repaving brick streets, costing about $400,000, Cunningham & Murray were the lowest bidders in the majority of instances, at $2.14 to $2.37 per sq. yd. for vitr. brick and $2.04 to $2.25 per sq. yd. for shale brick. The Mack Paving Co. bid, respectively, $2.32 to $2.65 and $2.15 to $2.75 per sq. yd., while the Filbert Paving Co. bid $2.25 to $3.15 for vitr. brick. David McMahon was lowest bidder for two streets at $2.07 to $2.12 per sq. yd.

D. J. McNichol & Co. was lowest bidder for repaving about a mile with granite block at $2.73 per sq. yd., estimated altogether at about $100,000, while the Mack Paving Co. bid from $3 to $5.75 per sq. yd.; Cunningham & Murray, $2.84 to $3.83; Arthur McGinn ,$2.75 to $2.90; Michael O'Rourke, $3.30 to $3.97; Samuel S. Bader, $2.92 to $3.97, and W. A. Ryan, $2.88 to $3.73 per sq. yd.

**Harrisburg, Pa.*—The contract tor constructing 5,280 ft. of State Road in Londonderry Township is stated to have been awarded to W. H. Smith, at $7,029.

**Harrisburg, Pa.*—The contract for paving 2,800 yds. on Maclay St. is stated to have been awarded to Warner-Quinlan Co., 42 Broadway, New York, N. Y., at $1.93 per sq. yd.

*Barber Asphalt Paving Co., Philadelphia, is stated to have secured the contract for paving Chestnut St. for about $3,000.

The following bids are reported opened Oct. 14 for resurfacing 4,100 sq. yds. of Walnut St.: Warner-Quinlan Co., $2.46 and Barber Asphalt Paving Co. at $2.25 per sq. yd.

The Warner-Quinlan Paving Co., 42 Broadway, New York, N. Y., is reported to have submitted the lowest bid for paving Hummel St. at $1.93, and the Barber Asphalt Paving Co. the lowest bid for Moltke St., at $1.94.

Columbia, S. C.—Bids will be received by the Street Comn. until Nov. 25 for paving Main St. with either vitrified brick, wood block, asphalt or bitulithic about 65,000 sq. yds. and 17,000 lin. ft. combined concrete curb and gutter and 4,500 lin. ft. concrete storm drains, as advertised in The Engineering Record. Engineer, J. L. Ludlow, of Winston-Salem, N. C.

Knoxville, Tenn.—It is stated that contracts will soon be received for paving portions of Hill, Union, Asylum, Oak, Deaderick, 4th and 5th Aves., Locust, Arthur, Central Market, Central, Luttrell and Deery Sts. and Bway.

Memphis, Tenn.—Bids will be received until Nov. 7 at the office of Ennis M. Douglas, City Register, for paving with brick a portion of Orleans St.; also La Clede Ave. with gravel.

Ft. Worth, Tex.—The city of Ft. Worth expects to pave about 15 miles of streets with brick, asphalt or bitulithic. Specifications may be had on application to E. C. Woodward, City Engr.; J. I. Nunnally, City Aud.

**Olympia, Wash.*—The contract for grading and macadamizing State Road No. 2 is reported to have been awarded to C. H. Lansing, at $9,750. Bids opened by Jos. M. Snow, State Highway Bd., on Oct. 15.

**Chehalis, Wash.*—Anderson & Robinson are stated to have secured the contract for macadamizing Prindle St., at $8,498.

Bellingham, Wash. Bids will be received until Nov. 9 by the State Highway Bd. (Jos. M. Snow, Secy.), Olympia, for grading and graveling State Aid Road No. 3, near Bellingham.

* The Bd. Pub. Wks. is stated to have awarded the contract for improving a portion of Astor St. to K. Sauset for $4,781.

Seattle, Wash.—The only bid received on Oct. 12 by the Bd. of Pub. Wks. for grading, paving with asphalt and constructing sewers, etc., on 40th Ave. was submitted by Rich & Harris, of Seattle, as follows: Clearing and grubbing (lump sum), $5,000; 2,700 lin. ft. 8-in. pipe sewer, 95 cts.; 460 lin. ft. 10-in. pipe sewer, $1.25; 120 lin. ft. 8-in. wood pipe sewer, $2; 22 4½ ft. manholes, ea., $80; 5 4½ ft. manholes, to be remodeled, $80; 24 catch basins (1) inlet, ea., $75; 8 catch basins (2) inlet, ea., $85; 1,900 lin. ft. curb armored concrete, $1.10; 14,870 lin. ft. curb. standard concrete, 50 cts.; 2,420 lin. ft. curb, special concrete, 50 cts.; 100 sq. yds. sidewalk repair concrete, $1.50; 24,765 sq. yds. asphalt pave., $2.35; 3,225 sq. yds. brick gutters, $3.40; 420 lin. ft. wood stop, 50 cts.; 10 flush tanks, ea. $125; 2 catch basins to move, $25; 4 catch basins, no inlets, ea. $65; 2 single inlets, ea. $15; 8 inlets to be moved, ea. $5; 6 adjusting C. B. & M. H. covers, ea. $2.50; 26 monument cases, ea. $10; 680 sq. yds. concrete walks, $1.35; 150 lin. ft. tile drain, 20 cts.; 98 cu. yds. retaining wall, $10; 100 lin. ft. iron railing, $1.25; 3,210 lin. ft 8-in. C. I. pipe Class "A," $2; 3,123 lin. ft. 8-in. C. I. pipe Class "B," $2.10; 14 8-in. gates, ea. $45; 18 hydrants, ea. $100; 80 lin. ft. 6-in. C. I. pipes, hyd. conn. "A," $1.50; 80 lin. ft. 6-in. C. I. pipes, hyd. conn. "B," $1.60; 14 brick gate chambers, new, ea. $40; 4 brick gate chambers, exit gates, ea. $40; 7,500 cu. yds. subgrading, 60 cts. Total, $120,475.

The following are the bids opened on Oct, 12 by the Bd. of Pub. Wks. for maintenance of 24,765 sq. yds. asphalt pavt. on 40th Ave.: (*a*) price per sq. yd.; (*b*) totals: Rich & Harris, *a* 3 cts.; *b*, $7,429. Independent Asphalt Paving Co., Pioneer Bldg., *a* 2½ cts.; *b* $6,191. L. B. Loomis & Co., Western Ave. and Bell St., bid on Oct. 12 for improving 31st Ave. as follows: Fixed estimate, $1,500; clearing and grubbing (lump sum), $1,575; 59,000 cu. yds. earthwork, 37½ cts.; 16 manholes to be adjusted, ea. $20; 250 lin. ft. 10-in. pipe sewer, $1.85; 90 lin. ft. 12 in. pipe sewer, $2, and 120 lin. ft. 8-in. pipe sewer, $1.60. Total, $26,484. P. J. McHugh, 2228 7th Ave., bid for this work $27,873.

*The Bd. of Pub. Wks. on Oct. 14 awarded contracts as follows: Irving St., concrete sidewalks, to E. H. Rawle & Co., 313 Boston Blk., $5,976; 6th Ave. concrete sidewalks, Smith & Hall, Downs Blk., $10,806; Fuhman Ave., grading and constructing necessary bulkheads, International Contract Co., New York Blk., $41,465; Westlake Ave., planking, Holt & Jeffery, $10,352; Union St., paving with sandstone blocks, Sparger Concrete Co., 562 Colman Blk, $24,541.

We are informed that an ordinance has been passed by City Council authorizing the Bd. of Public Works to construct an asphalt plant capable of turning out 54,000 sq. yds. of asphalt per day, to be used in the maintenance of all future streets paved with asphalt. Estimated cost of plant, $60,000; 15 teams and wagons, $18,750, and stables and quarters for men, $22,500.

Bids will be received by the Bd. of Pub. Wks. (C. E. Bagley, Secy.) until Nov. 9 for the following improvements: Concrete sidewalks and wood crosswalks on Hanford and other streets, together with necessary drainage; estimated cost, $30,500; grading, curbing and constructing concrete sidewalks on 36th Ave., N.; estimated cost, $20,800; concrete sidewalks and wooden crosswalks on Meridian Ave., with necessary drainage; estimated cost, $72,000; concrete sidewalks and wood crosswalks on Brooklyn Ave., together with necessary drainage; estimated cost, $5,000, and grading and concrete sidewalks on Phinney Ave.; estimated cost, $5,600.

The lowest bid opened on Oct. 19 by the Bd. of Pub. Wks. for grading and constructing concrete walks on E. Olive St. was submitted by E. H. Rawle & Co., Arcade Annex, at the following bid: Fixed estimate, $900; cleaning and grubbing (lump sum), $175; 900 cu. yds. earthwork, 40 cts.; 3 M. ft. curbs and gutters, $26; 14 M. ft. crosswalks, $26; 5,457 sq. yds. concrete walks, $1.26; 2 catch basins, 2 inlets, ea., $85; 1,500 lin. ft. 3-in. sewer pipe, 15 cts.; 450 lin. ft. half tile gutter, 25 cts.; 658 lin. ft. 8-in. sewer pipe, $1.60; 5 manholes, ea., $78; total, $10,791. Hans Pederson, 511 7th Ave., S., bid for this work $11,476.

The only bid received and opened on Oct. 19 for grading, etc., Lakeside Ave., was submitted by S. Normile, New York Blk., at the following bid: Fixed estimate, $2,000; 5.5 acres cleaning and grubbing, $250; 35,000 cu. yds. earthwork, 43 cts.; 77 M. ft. curbs and gutters, $26; 260 lin. ft. box drain, 75 cts.; 36 M. ft. bulkhead lumber, $30; 210 bulkhead piles, ea., $7.50, and 1,500 lin. ft. bulkhead rail, 10 cts.; total, $23,427.

Milwaukee, Wis.—Chas. Poetsch, City Engr., is reported to have submitted a proposition to the Metropolitan Park Comm. for a boulevard system around the city.

**Ottawa, Ont.*—Newton J. Ker, City Engr., writes that the Iroquois Iron Wks., of Buffalo, N. Y., has secured the contract for constructing the asphalt and bituminous paving plant (bids opened Oct. 16) for $14,800.

Toronto, Ont.—Bids will be received until Nov. 5 by E. Coatsworth (Mayor), Chmn. Bd. Control, for paving with asphalt portions of Dewson St., Montrose, Ryerson and Barton Aves.; with bitulithic, Huron St. and Avenue Rd., and constructing concrete walks and curbs on portions of numerous streets.

*The Bd. of Control on Oct. 23 is reported to have awarded contracts as follows: Godson Contr. Co. paving Berkeley St., $3,724; Dutchess St., $5,496; Barber Asphalt Paving Co., Bloor St., $8,718; Warren Bituminous Paving Co., Lindsay Ave., $4,683.

Markham, Ont.—See "Power Plants, Gas and Elec-

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Montgomery, Ala.—The Montgomery Light & Water Power Co. (R J. Chambers, Mgr.), is reported to have decided to expend about $100,000 in. improvements to include the installation of a large amount of machinery for increasing the capacity of the plant, as well as improving the quality of gas furnished to Montgomery patrons. A complete new gas arch bench with 6 retorts for purifying the gas, in increasing the output, as well as the installation of additional scrubbers and exhausters; also the installation of an additional transmission line from Montgomery to the water power plant on the Tallapoosa river, 30 miles from here. In connection with this transmission line additional banks to step up and step down transformers, and the latest methods of lightning arresters will be installed.

**Arizona.*—The Secretary of the Interior at Washington, D. C., has awarded contracts for transformers and switchboard apparatus for use in connection with the Salt River irrigation project, Ariz., as follows: Transformers, the Wagner Electric Mfg. Co., of St. Louis, Mo., for $23,970; switchboard apparatus, the General Electric Co., of Schenectady, N. Y., for $37,671.

Calistoga, Cal.—Henry Brown is reported to have secured a franchise to furnish light, heat and power.

San Jose, Cal.—Chas. H. Pieper, City Engr., has completed and presented to the mayor and city council his report on the construction of a municipal electric light plant for the city, and recommends the selection of an electrical, steam driven unit of not less than 300-kw. capacity, arranged to permit future extension; the total

**Items marked thus give the names of parties awarded contracts.*

cost of the proposed plant together with pole lines, underground conduits, lamps, apparatus and appurtenances would cost about $200,000.

Colebrook, Conn.—See "New Industrial Plants."

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Nov. 12 to furnish at the navy yards and naval stations the following supplies: Brooklyn, N. Y.: Sch. 449—Steam disinfecting plant. Pensacola, Fla.: Sch. 435—175 boxes metallic shingles and 300 ft. galvanized ridge rolls. Sch. 436—125 bbls. Portland cement in wood, 31,500 ft. yellow pine. Sch. 437—14,400 lbs. bolts and nuts. Sch. 438—7,834 lbs. rolled bronze; 8,000 lbs. ingot copper; 10,500 lbs. bar iron; 39,551 lbs. steel rivets; about 63,256 lbs. medium steel plates; sheet steel; 9,900 lbs. steel angles; 201,298 lbs. steel. New Orleans, La.: Sch. 435—Electrical supplies. Bids will also be received until Nov. 19 as follows: Pensacola, Fla.: Sch. 448—1 motor driven rotary or centrifugal pump; 4 transformers and 4 motor generator sets; erecting complete 1 hot water heating system. New Orleans, La.: Sch. 448—Supplying new roof for north wing of building No. 6. California City Point, Cal.: Sch. 450—50-kw. generating set. Boston, Mass.: Sch. 445—1 double angle and beam punch; 4 variable speed gears. Norfolk, Va.: Sch. 445—12 2-ton trolley hoists; 1 motor-driven drilling, boring and milling machine. Charleston, S. C.: Sch. 445—1 combination band saw and rip saw. Portsmouth, N. H.: Sch. 446—1 motor-driven pipe threading machine ;1 engine lathe. Applications for proposals should designate the schedules desired by number. E. B. Rogers, Paymaster Genl., U. S. N.

**Savannah, Ga.*—The Savannah Lighting Co. is reported to have secured the contract for city lighting (bids opened Oct. 15).

Macon, Ga.—E. W. Gould, W. T. Morgan and others, of Savannah, representing the Citizens Electric Co. of Savannah, are reported to have petitioned the City Council of Macon for a franchise.

Hagerstown, Ind.—The Town Bd. is reported to have passed an ordinance providing for the issue of bonds for the construction of the proposed electric light plant. Plans and specifications have been ordered.

Knightstown, Ind.—The City Council is stated to have passed an ordinance providing for the issue of $12,000 bonds for the purchase of new machinery, boilers and equipment for the electric light plant.

Gosport, Ind.—The Gosport Electric Light & Power Co. is reported incorporated, to construct and operate an electric light and power plant. Directors: W. A. Montgomery, J. S. Davis and J. C. Brown.

Latonia, Ky.—At a recent meeting of Council the Kentucky Electric Co. is reported to have secured a franchise for electric lighting of the streets at $60 per arc lamp per yr. for the first 3 yrs.

Eunice, La.—The City Council is reported to have granted a franchise to Chas. Lauve, of Franklin, for an electric light plant, to cost about $30,000. Warren B. Reid, of New Orleans, will be associated with Mr. Lauve in the construction.

St. Michaels, Md.—Walter L. Butler, of Philadelphia, Pa., is reported to have petitioned the Town Comrs. for a franchise for an electric light plant.

Baltimore, Md.—The Bd. of Awards on Oct. 18 rejected bids recently received for dynamo to be installed in Eastern High School, and will receive new bids.

Traverse City, Mich.—The Manistee River Power Co. is reported formed, with a capital of $1,000,000, to develop power in Manistee River. It will construct four dams on Manistee River with a capacity of 20,000 h.p. continually for 24 hours. The first dam, developing 5,000 h.p., will be built in Greenwood Township, Wexford County, and the lines from the first dam will run to Cadillac, Elk Rapids and Traverse City. D. J. Albertson, of Kalamazoo, is reported to be the chief promoter.

Iron River, Mich.—A. J. Lytle and F. A. Morirson are reported to have in contemplation the purchase of machinery for an electric light plant.

Corunna, Mich.—The Shiawassee Light & Power Co. (H. A. Sprague, Mgr., Corunna,) is reported to be preparing to raise its dam at Shiatown from 8 to 15 ft.

Manchester, Mich.—W. J. Hoffer, City Clk., writes that the citizens have voted to purchase the electric light plant owned by J. H. Kingsley.

Kandiyohi, Minn.—It is reported that C. E. Kroona may install an electric light plant.

**Duluth, Minn.*—The Water & Light Comrs. on Oct. 11 awarded to Thomas & McCoy the contract for laying gas pipes in 1st Alley, between 8th Ave. west and 7th Ave. east, connecting with and extending the old Prindle Gas Co.'s main in the alley mentioned, for about $10,500. They bid 50 cts. per foot for laying pipe, $1.10 per yd. for excav. and $9 per yd. for rock work. The contract for laying water and gas mains on London Road, from 19th to 21st Aves. east was awarded to Emile Engle, 931 E. 54th St., Duluth, at 67 cts. per ft. for laying the pipe, $1.10 a yd. for excav and $7.75 per yd. for rock work, and Fairbanks, Morse & Co., of St. Paul, secured contract for laying 4-in. gas main in Main St. from 53d to 56th Aves. west, at 20 cts. per ft. for laying pipes and 87 cts. per yd. for the excav.

Louisville, Miss.—The Louisville Light & Water Co. is reported incorporated, with a capital of $20,000, by W. L. Strong, J. L. McCracken and others.

Burlington Junction, Mo.—The Burlington Junction Electric Light & Power Co. is reported incorporated with a capital of $6,000 by T. D. Garrett, Jesse F. Robertson and others.

Helena, Mont.—At a recent meeting of the State Bd. of Land Comrs. upon application of the Collins Land Co., of Helena, the Board sold to the Capital City Power Co. the land on each side of Missouri River in Sec. 36, Township 13 north, Range 3 west and in Sec. 16, and these lands will be flooded by the new dam to be constructed below Hauserlake.

Wahoo, Neb.—Edw. Lehmkull, Mayor, writes that the proposed water works and electric light plant will cost bet. $50,000 and $60,000. Engineer not yet selected.

Central City, Neb.—The City Council is reported to have passed on second reading the ordinance granting L. S. Jenkins and H. D. Forest, of Omaha, a franchise for an electric light plant.

Arlington, Neb.—The Arlington Electric Light & Power Co. is reported to have decided to erect a brick building and install a 130-h.p. boiler and a 90-h.p. engine.

**Tekamah, Neb.*—Bortenlanger & Co., of Omaha, are reported to have secured contract for constructing electric light plant.

Plattsmouth, Neb.—Earl C. Westcott, of Plattsmouth, writes that he proposes building 8 miles transmission line to connect with the plant of the Omaha Electric Light & Power Co., at Omaha, but will only need substation equipment and transformers.

Glens Falls, N. Y.—The International Paper Co., of Glens Falls, is reported to be considering the construction of a dam on Spier Falls for the purpose of furnishing power for a pulp mill or electrical plant. The Construction Dept. of the International Paper Co. is at 30 Broad St., New York City.

Niagara Falls, N. Y.—A franchise is reported to have been granted to the Niagara Falls Lighting Co.

Yorktown, N. Y.—The municipal authorities, it is reported, have granted to the Northern Westchester Lighting Co. a franchise for both gas and electricity.

Castile, N. Y.—Jas. C. Horning, of Lamont, Wyoming County, N. Y., writes that the proposed dam to be constructed across East Koy Creek to develop power for electric lights to be used in Castile, Silver Springs and Gainesville, will cost about $15,000 to $20,000. The company has not yet been organized but it is hoped to get work completed by next spring.

**New York, N. Y.*—The following are the bids opened on Oct. 21 by C. B. J. Snyder, Supt. School Bldgs., for installing electric equipment in addition to and alteration in School 59, Boro. of Manhattan, LeBaron B. Johnson, $7,738; Commercial Constr. Co., $7,589; T. Fred. Jackson, Inc., 592 Columbus Ave., $7,250 (awarded contract), and E. J. Duggen, $9,475.

The following are the bids opened on Oct. 24 at the office of the Superv. Archt., Treasury Dept., Washington, D. C., for the installation of a flashlight signal system for elevators in the U. S. Custom House Bldg., New York: Otis Elevator Co., N. Y. City, $7,280, and Electric Supply & Repair Co., N. Y. City, $7,280.

**Brooklyn, N. Y.*—The following are the bids opened on Oct. 28 by C. B. J. Snyder, Supt. School Bldgs., N. Y. City, for installing electric equipment in School 5, Boro. of Brooklyn: T. Fred. Jackson, Inc., 592 Columbus Ave., N. Y. City, $15,995 (awarded contract); Peet & Powers, $16,676, and Reis & O'Donovan, Inc., $16,439.

Hendersonville, N. C.—Bids are wanted for lighting the streets with electricity; at present 26 12,000-c.p. lamps are used; will increase to 30 or more. For further information address Michael Schenck, Mayor.

Smithfield, N. C.—We are informed that an engineer will probably be selected on Nov. 4 to prepare plans and specifications for water works, a sewerage system and electric light plant, and an election will the be called to vote on issuing bonds for the construction of same.

Thomasville, N. C.—B. F. W. Bryant, of Boston, Mass., is reported to have secured a franchise for an electric light plant. The company will be known as the Thomasville Light & Power Co., and proposed plant will cost $20,000.

Cincinnati, O.—Press reports state that contracts will probably soon be let for rewiring old City Hospital at a cost of $7,000. Architects, Elzner & Anderson.

Youngstown, O.—Press reports state that at a meeting of the Lighting Com. of City Council on Oct. 19 it was decided to report favorably on the proposition to construct an electric light plant.

Alliance, O.—J. G. White & Co., New York, N. Y., has contracted with the Alliance Gas & Power Co. to act as consulting engineers and supervise the purchase and installation of a large turbine generator and a battery of 350-h.p. boilers, with complete auxiliaries for both electrical and steam ends. The new equipment will be installed in the old plant of the Alliance Gas & Power Co. through the winter and will be transferred later to a new plant, the construction of which will be begun by the engineers early in the spring.

Newburgh Heights, O.—Bids will be received until Nov. 18 at the office of P. S. Ruggles, Village Clk., for lighting the village streets.

**Philadelphia, Pa.*—Director Stearns, of the Dept. of Pub. Wks., on Oct. 28 awarded contract for the elecrtical equipment at the Torresdale filter plant to the D'Olier Eng. Co. for $77,002.

Easton, Pa.—The Superintendent of Lighting is reported to have been authorized to prepare specifications and ask bids for 300 arc lamps.

Pittsburg, Pa.—Bids will be received until Nov. 7 by the Committee on High Schools (Chas. Reisfar, Jr.) for installing an electric lighting plant in the 5th Ave. High School; probable cost, $7,000.

**Womelsdorf, Pa.*—W. W. Lengel, Boro. Secy., writes that the contract for the construction of a municipal electric light plant (bids opened Oct. 15) has been awarded to the Reading Electric Co., of Reading, Pa., for $11,275. Engineer, F. W. Darlington, 1140 Real Estate Trust Bldg., Philadelphia.

Harrisburg, Pa.—Press reports state that the State Water Supply Comn. on Oct. 22 approved applications for charters for the Iroquois Power Co. and the Watts Power & Water Co.; also for the Mill Creek Water Co. to operate in Huntingdon County, and the Trevose-Manor Co., of Philadelphia.

Panama.—Bids will be received until Nov. 10 at the office of H. F. Hodges, Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for electrical fixtures, conductor wire, car wheels, wrought iron, steel tubing, etc., as per circular, No. 399.

Nashville, Tenn.—Mayor Brown in his annual message recommends extending the light plant facilities, and also the better lighting of both suburbs and business districts.

Clifton Forge, Va.—At at meeting of City Council on Oct. 21 a bid for the electric light franchise was received from the Clifton Forge Ice & Bottling Wks. and referred to the Light and Water Com.

Richmond, Va.—Mayor McCarthy on Oct. 22 approved the ordinance providing for the issue of $100,000, the first instalment needed for rehabilitation of the city gas plant. To thoroughly improve the plant it will require about $350,000, and several contracts have already been awarded.

Big Stone Gap, Va.—The Powell Valley Light & Power Co. is reported incorporated, with a capital of $5,000, to construct electric light and power plant. P. A. Morrison, Pres., and J. B. Ayers, Secy and Treas.

**Spokane, Wash.*—The lighting contract is reported to have been signed between the city and the Washington Water Power Co., by means of which the latter company supplies 525 lights to the city for a period of 5 yrs. and at an annual rate of $48 ea.

Spokane, Wash.—See "New Industrial Plants."

Stevenson, Wash.—H. C. Eckensberger, of Portland, Ore., general freight agent of the New York Central lines, is reported to have filed with the County Clerk a petition for permission to appropriate water on Columbia River at the Upper Cascade Rapids, for power and manufacturing purposes.

Marinette, Wis.—It is reported that a survey is to be made at once for the Holmes Lighting & Power Co. for the development of the Grand Rapids for electric power purposes. The work of construction will be started in the spring and power brought to Marinette and Menominee.

Crandon, Wis.—Otto Eckhoff, of Wittenberg, is reported to have petitioned for a franchise to construct an electric light plant.

Penticton, B. C.—The ratepayers are reported to be considering the question of constructing an electric light plant.

Kelowna, B. C.—R. Morrison, City Clk., writes that the proposed $40,000 water and electric light bonds to be issued have not yet been sold.

**Brandon, Man.*—The International Lighting & Htg. Co., of Cleveland, O., will, it is reported, soon commence work on the construction of a gas-producing plant at Brandon, for which it has the contract.

**Toronto Junction, Ont.*—The Town Council is reported to have awarded contract for lighting the town for 3 years to the Stark T. L. & P. System, Ltd., of Toronto, at 9 cts. per light per night.

Markham, Ont.—The citizens are reported to have voted on Oct. 22 to issue $3,000 bonds for extending electric light plant, $3,000 for granolithic sidewalk, and $3,000 for completion of new bridge over the Rouge.

London, Ont.—At a meeting of City Council on Oct. 21 the engineer is reported to have been instructed to make estimates of cost of a distributing plant for Niagara Falls power.

Campbellford, Ont.—The citizens are reported to have voted to issue $60,000 bonds to develop a municipal electric power plant at Middle Falls.

Mille Roches, Ont.—At a meeting of the International Waterways Comn. at the Queen's Hotel on Oct. 24 a proposition for the construction of a power plant for the development of the water power on St. Lawrence River at Mille Roches, near Cornwall, was presented by the St. Lawrence River Co. of Canada (Geo. Foster, Pres., Montreal, Que.) and by the Long Sault Development Co. (represented by Arthur V. Davis, of Pittsburg, Pa.; W. F. Rickey, of Massena, N. Y., and E. B. Freeman, of Hartford, Conn.) The cost of the work is estimated at about $20,000,000. It is proposed to develop power at this lower end of Barnard Island, where both companies would work together, and it is said that the scheme would improve navigation, doing away with lock 21 in the canal and saving 4 hours to steamers on the round trip. The St. Lawrence Co. at present supplies Cornwall with light and power, and its capacity is 1,250 h.p., and the new plan provides for 50,000 h.p. The Canadian concern will invest $5,000,000 and the American $15,000,000 in the scheme. The commission decided that the Canadian section should meet in Montreal on Nov. 5 to further consider the matter, and the Bd. of Trade, Harbor Comn. and other bodies there will be asked to present their views.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Ventura, Cal.—It is stated that bids will be received Nov. 12 for an electric railway franchise, as applied for by F. M. Packard and Julian P. Jones, along certain highways and streets in Ventura County. J. B. McCloskey, Co. Clk.

Woodstock, Ill.—It is stated that arrangements are being made for the construction of the proposed Woodstock, Marengo, Genoa & Sycamore Electric Ry., which is to connect Woodstock and Sycamore. It is proposed to make Woodstock the north and Sycamore the south terminals. The promoters of the company: M. W. Powell, John A. Schmidt, Thos. Edward, Irwin D. Stevens, Chas. A. Spenny, T. H. Rhodes, E. C. Spinney and E. B. Harang.

Ishpeming, Mich.—It is reported that the Marquette County Gas & Electric Co. (W. J. McCorkindale, Gen. Mgr., Ishpeming), will soon place contracts for the construction of 3 miles of track.

Elyria, O.—The City Council is stated to have granted the Cleveland, Southwestern & Columbus St. Ry. Co. a franchise for a belt line.

Millersburg, O.—The Millersburg & Eastern R. R. Co. is reported incorporated by O. S. Olmstead, Dan M. Miller, of Millersburg, and J. A. Burke, of Cleveland. The line proposed is to extend from Millersburg to Beach City, a distance of 26 miles.

Portland, Ore.—It is stated that the United Railways Co. will soon apply for a franchise for an electric railway from Portland through Linton to the county line.

***Items marked thus give the names of parties awarded contracts.**

Ambridge, Pa.—The French Point St. Ry. Co. is stated to have increased its capital stock from $6,000 to $31,200, and intends extending its line from Merchant and Wagner Sts., Ambridge, Pa., to a point on the right of way of the Economy Belt Line Ry. Jas. D. Collery, Pres.

Reading, Pa.—It is reported that a company to be known as the Reading & Philadelphia Short Line, to be operated on the third rail system, has been projected to build a line between Reading and Philadelphia via Norristown.

Altoona, Pa.—The Altoona & Bedford Springs Ry. Co. (T. G. Patterson, Pres.), is reported to have announced that the work of grading the line will begin within a few weeks. The line will be built first between Altoona and Newry.

Parsons, Pa.—The Borough Council is stated to have passed an ordinance authorizing the Wilkesbarre & Plains St. Ry. Co. to construct, maintain and operate a railway along Main and Mill Sts.

Johnstown, Pa.—Mayor Chas. Young is stated to have signed the ordinance granting the Johnstown Passenger Ry. Co. the right to double-track Bedford St. from the B. & O. crossing to Cedar St.

Mauch Chunk, Pa.—J. G. White & Co., operating managers and purchasing agents for the Eastern Pennsylvania Rys. Co., has just ordered $200,000 worth of electric railway material for the Tamaqua and Middleport, connecting link between Mauch Chunk and Pottsville. The order includes all material required for the permanent way and overhead electrical work of a standard interurban railway. Considerable grading has already been done.

West Newton, Pa.—It is expected that the work of connecting West Newton with Herminie and Irwin will begin within a few weeks. The proposed line is a branch of the Pittsburg, McKeesport & Westmoreland Ry., and rights of way and other privileges have already been secured. Jas. Bryan, Ch. Engr., Pittsburg.

Pen Argyl, Pa.—It is stated that surveyors are mapping out a straight track for the Slate Belt Street Ry Co. Curves will be removed at Allen's Corner, West Pen Argyl and at Alpha, where the tracks will be laid through Keller's field.

Monongahela, Pa.—A franchise is stated to have been granted to the Monongahela & Carroll St. Ry. Co., which proposes to build an electric line up Pigeon Creek and on to Bentleyville, Ellsworth and Washington.

Brackenridge, Pa.—The Saxonburg, Tarentum & Butler St. Ry. Co. is stated to have accepted the franchise granted some time ago by the Council of Brackenridge for the right of way through the town.

Shamokin, Pa.—Governor Stuart is stated to have approved the extension of the Shamokin & Edgewood Electric Ry. Co. from Shamokin to Sunbury. M. H. Kulp, Pres.

Corry, Pa.—The Corry & Columbus St. Ry. Co. is reported to have announced that 15 miles of track will be constructed during the next season. C. P. Northrup, Gen. Mgr.

Hunkers, Pa.—The West Penn. Rys. Co., of Pittsburg, is reported to have secured right of way for an electric railway between Hunkers and Scott Haven connecting with West Newton. The line will connect with the McKeesport and Scott Haven Line at Scott Haven and run across the Youghiogheny River over a bridge to Hunker.

Tacoma, Wash.—Articles of incorporation of the Seattle-Tacoma Short Line, which proposes to build the interurban between Seattle and Tacoma are reported filed. Incorporators: Merle J. Wightman, C. E. Muckler and F. J. Eitel. Capital of the company is placed at $6,000,000. The new company will acquire the franchises obtained in Seattle, Tacoma, Pierce and King counties for the road by Merle J. Wightman and C. E. Muckler. Preliminary surveys are stated to have been made for the entire route and most of the private rights of way have been secured. Construction work has been begun in Pierce County, near Tacoma, by the building of about 200 ft. of trestle work. It is said that active construction work will begin as soon as the remaining rights of way have been secured and material can be purchased.

Olympia, Wash.—See "Railroads."

Chehalis, Wash.—The City Council is stated to have granted a franchise to the Centralia-Chehalis Electric Ry. & Power Co. to construct an interurban and local electric railway system in and between Centralia and Chehalis.

Anacortes, Wash.—It is reported that articles of incorporation will shortly be filed with the Secretary of State by the Anacortes Improving & Developing Co., which propose to build an electric railway to connect Anacortes and Sedro Wooley. Incorporators: E. S. Morton, W. W. Robinson and R. P. Ball, of Anacortes, and Benjamin F. Weeks and H. B. Spear, of Tacoma.

Vancouver, B. C.—The British Columbia Electric St. Ry. Co. (R. H. Sperling, Gen. Supt.) is reported to have decided to expend next season about $1,500,000 in improvements and extensions.

Brantford, Ont.—It is stated that the Brantford St. Ry. Co. will be overhauled, new rails laid, loop lines extended to Eagle Pl. and Terrace Hills. In addition the line will be run to Cainesville, 3 miles east. To the south a new line will be built 30 miles to Port Dover on Lake Erie. The road from Brantford and Galt will be reconstructed, shortened and new rails laid. A spur will be built to St. George. From Brantford a new line will also be built west via Burford and Cathcart to Woodstock, where the Thames Valley Road, which has been acquired, will be used to Ingersoll.

RAILROADS.

Notes Arranged Alphabetically by States.

Chicago, Ill.—A charter has been granted to the Chicago, Fox Lake & Geneva R. R. Co., with principal office in Chicago; capital stock, $2,000,000. The road is to be constructed from Chicago, through Leyden, Maine, Elk Grove and Palatine, in Cook County; Ela, Cuba, Fremont, Wauconda and Grant, in Lake County; and Nunda, McHenry and Richmond, in the County of McHenry, to a point on the line dividing Illinois and Wisconsin, with branch lines to Fox Lake and Woodstock. Incorporators: Geo. H. Soward, Maurice B. Louis, Harry R. Yaryan and others.

Waterloo, Ia.—The residents of Lake Prairie Township, near Pella, are reported to have voted a tax to aid in the construction of the proposed Waterloo, Pella & Southwestern steam railroad. The line is to extend 120 miles southwest from Waterloo through an undeveloped coal field to Chariton.

Press reports state that the Iowa & Northwestern R. R. Co. has been financed, and construction will comence this fall. The line will be 100 miles long, running southeast from Waterloo through Independence and Anamosa to Stanwood.

**Hyde Park, Mass.*—John Cashman, of Quincy, is reported to have secured contract for elimination of Fairmount Ave. grade crossings.

Mankato, Minn.—Press reports state that the Chicago, Milwaukee & St. Paul R. R. Co. (D. J. Whittemore, Ch. Engr., Chicago, Ill.) is to build from Mankato to Granite Falls.

St. Louis, Mo.—The Missouri & North Arkansas R. R. Co. has 650,000 cu. yds. of side barrow and 3 miles of pile trestle to let on 28 miles of their extension between Kensett and Cotton Plant, Ark. W. S. Dawley, Ch. Engr., 820 Security Bldg., St. Louis.

Gotebo, Okla.—The Gotebo & Southwestern R. R. Co., originally chartered to build from Gotebo south to Frederick, has filed an amendment providing for the construction of 125 miles of road from Clinton via Gotebo to Frederick, and increasing the capital stock to $1,000,000.

Lawton, Okla.—Press reports state that plans and specifications have been completed and bids will soon be asked for the construction of the Lawton, Wichita Falls & Northwestern R. R. Co. J. M. Bellamy, Pres., Lawton.

Erie, Pa.—A charter has been granted to the East Erie Connecting R. R. Co to construct a railroad 2½ miles long in the suburbs of Erie; capital, $25,000. Matthew C. Griswald, Pres., Erie.

Manila, P. I.—The Philippine Ry. Co. has just ordered through J. G. White & Co., of New York, N. Y., construction engineers for its lines, 80 box cars and 15 passenger coaches from the American Car & Fdry. Co. J. G. White & Co. are now in the market for combination parlor and first-class passenger coaches for the Philippine Rys. Construction on these lines, which are being built under Philippine Government concession and with government guarantee of bond interest under Act of Congress of the United States, is progressing rapidly, and 20 miles of track are already in operation. The contract includes a total of about 295 miles of track.

Waco, Tex.—It is reported that the Texas Midland R. R. is to be extended from Enis to Waco, a distance of 70 miles. L. W. Wells, Ch. Engr., Terrell, Tex.

Pecos, Tex.—The Pecos, Saragosa & Balmorhea R. R. Co. is reported formed here, with a capital of $40,000, to construct a railroad from Pecos to Balmorhea.

Morgantown, Va.—The Morgantown Interstate R. R. Co. is reported to be arranging to make improvements and extensions on its line.

Olympia, Wash.—C. D. Hillman, of Seattle, is reported to have applied to the County Comrs. for a franchise for a double track steam and electric road from Tumwater through Olympia and on to his new townsite of Boston Harbor, at Dolphmeyer's Point, and will also apply at the next meeting of Council for the necessary franchise within Olympia. According to Mr. Hillman this 9-mile road will be built and in operation between Boston Harbor and Olympia inside of 18 months, and the line will be extended south to connect with the Union Pacific road proposed to be built to Grays Harbor.

**Buckhorn, W. Va.*—The Baltimore & Ohio R. R. Co. is reported to have awarded to F. H. Clement & Co., of Philadelphia, Pa., the contract for building a third track, with quick-acting switches at the altitude of the grade and with connections elsewhere along the 17 miles of the hard pull, to be used as a precaution against accidents at the steep grade at Buckhorn, between Altamont and Piedmont.

Torreon, Mex.—It is reported that the plans of Jones & Franklin, of Torreon, for the new municipal hospital have been accepted and work on the structure will begin at once. The building is to be of brick and stone and is to cost approximately $75,000.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

San Francisco, Cal.—See "Sewerage and Sewage Disposal."

Los Angeles, Cal.—It is stated that bids will be received until Nov. 18 by the Bd. Co. Superv. for erecting a kitchen building and extension to nurse's home at the County Hospital; also until Nov. 11 for erecting a 1-story brick morgue at said hospital. C. G. Keyes, Co. Clk.

Newark, N. J.—Wilson, Harris & Richards, Drexel Bldg., Philadelphia, Pa., it is reported, have prepared plans for a brick 300x80-ft. manufacturing plant, which is to be erected in Newark for the General Electric Co.

West Albany, N. Y.—Geo. H. Haselton, Supt. of Motive Power of the West Albany yards of the N. Y. Central & Hudson River R. R. Co., is reported to have announced that plans have been prepared for the erection of 3 buildings, 1 of which is now under construction. A blacksmith shop and machine shop are the other 2 buildings, and it is not known yet whether the work will be done by the R. R. company or let out by contract.

Wilkesbarre, Pa.—Edw. H. Post, Pres. Wilkesbarre Const. Co., writes that the company is in the market for derricks, hoisting engines, hand hoists or crabs, new or second-hand.

Pittsburg, Pa.—We are informed that fire on Oct. 20 destroyed the pattern and carpenter shops, steel furnace department and stables of the Stove & Range Co., of Pittsburg. H. M. Baldwin, Sales Mgr. It has not yet been decided whether to rebuild or not.

Riverpoint, R. I.—The Warwick Lace Wks., it is reported, propose erecting a lace mill here to cost about $100,000. Henry T. White and Henry C. Dexter are reported interested.

**Woonsocket, R. I.*—The J. W. Bishop Co., of Worcester, it is reported, has secured the contract to erect a thread mill in the Privilege dist. of Woonsocket for the Lawton Spinning Co., of Woonsocket. Probable cost, $450,000.

Beaumont, Tex.—Kyle Ward, Secy. Beaumont Ice, Light & Refrigerating Co., writes that it has been decided to add additional machinery to the ice department, and the company is now asking bids on 150-ton ice-making compressor, dry gas machine, connected up to a compound condensing engine. The engines in the electric plant are to be made condensing and are to be used in connection with this equipment. This machinery will increase the capacity to a total of 380 tons ice making. All the improvements contemplated will cost probably $100,000.

El Paso, Tex.—L. D. Gilbert, Secy. of the Cement Eng. Co., Union Trust Bldg., Los Angeles, Cal., engrs. in charge of the construction for the cement plant for the Southwestern Portland Cement Co., to be erected here, writes under date of Oct. 12 that machinery has not been purchased at this date, but requests have been sent out for most of it. Regarding the size of the buildings there will be 14 buildings and departments, including the office and laboratory, with an aggregate floor space of 80,000 sq. ft. These buildings will be built of structural steel and reinforced concrete, whichever method of construction will suit the work best. Expect to let contracts for the machinery in about 4 weeks. Regarding the power plant, it is proposed to install two 750 kw. 440 volts, 25 cycle, 3 phase generators, either direct connected to cross compound Corliss engines or steam turbines, to operate on 175 lb. gauge steam pressure, and 125 degrees superheat. The plant will be motor driven throughout, motors being direct connected to all the large size grinding machines.

Spokane, Wash.—The Schade Brewing Co. is reported to have been granted a permit to erect a 2-story brick and cement addition to its brewery at a cost of $28,000.
Chas. B. Pride, 508 Columbia Bldg., Spokane, is in charge of the operation of a large survey in this territory for a paper and pulp mill, water power, etc., but it will be at least two or three months before any plans are completed in connection with construction work.

Milwaukee, Wis.—The Kurth Brewing Co., of Columbus, Wis., it is reported, intends removing its plant to Milwaukee and will erect, beside a brewery, several large steel elevators at Burnham St. and 37th Ave.
The Plankinton Packing Co. is reported to have filed plans for a refrigerating plant to be erected on Meinecke Ave. It is stated that modern machinery for cold storage plants is to be installed.
Plans are being prepared, according to reports, by the Fred. Rueping Leather Co. for a tannery, to be erected on the Kinnickinnic River near the flushing tunnel plant.

Lachine, Que.—The ratepayers, it is stated, have voted to grant a bonus of $50,000 to the Imperial Locomotive Wks., of London, Eng., to erect a plant here. Probable cost, $3,000,000.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Altoona, Pa.—Bids will be received by the Bd. of Health (Saml. B. Trees, Secy.) until Dec. 4 for the collection and sanitary disposal of all city garbage for a period of 1, 3, 5 or 10 years, as advertised in The Engineering Record.

**Spokane, Wash.*—The contract for erecting an 80-ton crematory to increase the capacity of the present plant is reported to have been awarded by the Bd. of Pub. Wks. to the Decarie Co., of Minneapolis, Minn., for $60,000.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

**Ft. Morgan, Ala.*—The U. S. Government is reported to have on Oct. 24 awarded contracts for materials to be used in building the sea wall at Ft. Morgan, as follows: To the Vinegar Bend Lumber Co., of Vinegar Bend., 2,500,000 ft. of lumber, for $50,000, and to the Southern Lime & Cement Co., of Demopolis, for 19,000 bbls. of cement, for $40,000.

Pine Bluff, Ark.—It is stated that bids wil be received until Nov. 12 by Benj. Franklin, Chmn. Bd. Inspectors, Levee Dist. No. 2, at office of Taylor & Jones, attorneys, Main and Barrque Sts., for constructing a levee.

Wilmington, Del.—The following are the bids opened on Oct. 21 by Maj. C. A. F. Flagler, Corps. Engrs., U. S. A., for dredging entrance to Broadkill River (price given per cu. yd.): River & Harbor Improv. Co., Philadelphia, Pa., 19.2 cts.; Pennsylvania Dredging Co., Camden, N. J., 23⅜ cts.

Washington, D. C.—See "Power Plants, Gas and Electricity."

Lawrenceburg, Ind.—Bids will be received by Lieut. Col. Wm. T. Rossell, Corps Engrs., U. S. A., Cincinnati, O., until Nov. 12 for repairing and protecting Great Miami embankment, as advertised in The Engineering Record.

Louisville, Ky.—The following are the bids opened at the office of the U. S. Engrs. on Oct. 21 for 2 steel barges; (*a*) price for each, (*b*) time required for completion: Blaw Collapsible Steel Centering Co., Pittsburg, Pa., *a* $10,525, *b* 30 weeks; Howard Ship Yards Co., Jeffersonville, Ind., *a* $8,950, *b* 20 weeks; Chas. Hegewold Co., New Albany, Ind., *a* $8,999, *b* 6 mos.; American Bridge Co. of New York, Cincinnati, O., *a* $7,050, *b* 34 weeks.

New Orleans, La.—The Dock Board on Oct. 15 approved plans for building 1,600 ft. of steel sheds over the St. Andrew St. wharf, and extending the Celeste St. shed 480 ft., at a total cost of $140,000. Hugh McCloskey, Pres. J. F. Coleman, Consulting Engr.
Local press reports state that the Dock Bd. will shortly be made a loan of $200,000, with which to build dock facilities for the Austro-American Steamship Co.
*Michael Mitchell is reported to have secured the contract for about 13,000 cu. yds. of levee work from Egania to Andry Sts. (bids opened Oct. 22), at 82 cts per cu. yd.
*Bids were opened on Oct. 22 by the Executive Com., joint organization of the Atchafalaya Basin and Lafourche Levee Dists. (Jas. S. Brady, Chmn.), for the construction of the Cancienne Canal in the Parish of Assumption, to be about 8,500 ft. long and requiring about 250,000 cu. yds. excav., and the contract is reported to have been awarded to Johnston Armstrong, at 17.4 cts. per cu. yd.
T. S. McChesney, Asst. Secy. Dock Board, writes that the proposed steel sheds over St. Andrew St. wharf and for extending the Celeste St. shed will cost about $130,000. Bids have not yet been called for. Engineer, A. C. Bell, 606 Hibernian Bldg.

Boston, Mass.—Bids will be received until Nov. 18 by Maj. Edw. Burr, Corps. Engrs., U. S. A., for removing the wreck of the schooner "Phineas H. Gay," in Broad Sound, Boston Harbor.

**Manchester, Mass.*—The following are the bids opened on Oct. 18 by the Massachusetts Harbor & Land Comrs., at Boston, for dredging channel in Manchester, about 14,500 cu. yds. (price given per cu. yd.). W. H. Letteney, 101 Tremont St., Boston, 38 cts.; Bay State Dredge Co., 185 Summer St., Boston, 34.5 cts., and Eastern Dredging Co., 247 Atlantic Ave., Boston, 34 cts. (awarded contract).

Ludington, Mich.—Bids will be received until Nov. 20 by Col. M. B. Adams, Corps Engrs., Grand Rapids, Mich., for construction of breakwaters at Ludington, as advertised in The Engineering Record.

Muskegon, Mich.—Bids will be received until Nov. 20 by Col. M. B. Adams, Corps Engrs., U. S. A., Grand Rapids, Mich., for dredging at Muskegon Harbor, Mich., as advertised in The Engineering Record.

**Detroit, Mich.*—Col. Chas. E. L. B. Davis, Corps Engrs., U. S. A., writes that the contract for dredging Section 1, Plan B, Detroit River (bids opened Oct 7) has been awarded to Great Lakes Dredge & Dock Co., of Chicago, Ill., for $673,200. The contract for rock and earth excav., Sect. 2, Plan B, Detroit River (bids opened Oct. 7) has been awarded to Grant Smith & Co. & Locker, of Thorice, Mich., for $1,578,440. The latter contract was awarded on combined sub-aqueous and cofferdam method. For detail bids received for this work, see issue of The Engineering Record of Oct. 19.

Blue Earth, Minn.—The Comrs. of Faribault County are reported to have decided to construct a steel dam at the outlet of Walnut Lake.

Minneapolis, Minn.—It is stated that bids will be received until Nov. 11 by Hugh R. Scott, Co. Aud., for constructing Ditch No. 9.
Local press reports state that bids will be received until Nov. 12 by the Municipal Bldg. Com. at the Court House for installing 4 passenger elevators in the court

Duluth, Minn.—The Pittsburg Coal Co., of Pittsburg, Pa., is reported to have decided to erect a coal dock of steel construction in Duluth, to cost about $1,000,000.

St. Peter, Minn.—H. W. Daniels, County Surveyor, writes that the proposed Rushmers ditch will cost about $25,000, but it will be about 6 months before all reports are in, or bids called for.

West Point, Miss.—Bids will be received until Nov. 12 by the Co. Houlka Drainage Comrs., West Point, for constructing a canal 12 miles long through Houlka Creek bottom, requiring 238,000 cu. yds. of dirt to be excavated. For further information address B. H. McFarland, Aberdeen.

**Lincoln, Neb.*—The Brodoesser Elevator Mfg. Co., 514 Commerce St., Milwaukee, Wis., is reported to have secured the contract for the installation of an elevator at the Orthopedic Hospital, for $3,040.

Newark, N. J.—The Common Council on Oct. 22 passed a resolution to submit to a vote of the people of this city the provisions of the Lane Dock Bill, under which the Bd. of Works proposes to expend $1,000,000 in the acquisition of water rights and the building of docks along Newark Bay, with a ship canal across the meadows to the uplands as part of the scheme.

Atlantic City, N. J.—See "Paving and Roadmaking."

Brooklyn, N. Y.—The following are the bids opened on Oct. 17 by the Park Board, N. Y. City, for furnishing material and constructing a rustic masonry boundary wall around Sunset Park, Boro. of Brooklyn: Bonacci & Vincelli Contrg. Co., $39,921; Chas. Cranford, $45,856; F. W. Carlin Contrg. Co., for 2,700 lin. ft. completed wall, $43,000; Danl. Douglass, $44,826; Bart Dunn, $42,398; John M. Fox, $39,571; Guidone & Galardi Co., $40,497; Richd. E. Heningham, $45,375; Haggerty Contrg. Co., $42,558; Kelly & Kelley, Inc., $48,642; Michael Marrone, $40,461; McHarg-Barton Co., 299 Bway., N. Y. City, $34,325; Thompson & Kelsey, $37,442, and J. M. Vosburgh, $52,020.

Buffalo, N. Y.—Seperate bids will be received until Nov. 14 by the Dept. Pub. Wks. (F. G. Ward, Com.), for the following: Constructing a dock at the stub end of the Clark & Skinner Canal, bet. Ohio St. and Buffalo River, as a berth for the fire boat. Constructing an overflow through Hertel Ave., 10 ft., 2-in. diam., from Cornelius Creek to Tonawanda St., and 9-ft., 10-in. from Tonawanda St. to Niagara River, passing through Erie Canal through a concrete culvert.

New York, N. Y.—The following are the bids opened on Oct. 24 by the Dept. of Parks for (*a*) 1,000 cu. yds. broken stone of trap rock, (*b*) 5,000 cu. yds. screenings of trap rock, (*c*) totals: Clinton Point Stone Co., *a* and *b* $2.33, c $13,980; Jacob E. Conklin, *a* and *b* $2.25, *c* $13,500.

New York, N. Y.—Bids will be received until Nov. 11 by C. B. J. Snyder, Supt. School Bldgs., N. Y. City, for the general construction, etc., of a grandstand, etc., on the Athletic Field on Crotona Park North, Crotona Park, Boro. Bronx.
The only bid received and opened on Oct. 29 by Louis F. Haffen, Pres. Bronx Boro., for constructing anchorages for the concrete retaining walls and building drain at the Morris Heights approach to the bridge of the N. Y. C. & Hudson River R. R. was submitted by J. C. Rodgers at the following bid: 500 cu. yds. excav., $1; 500 cu. yds. fill., 30 cts.; 4,600 lin. ft. piles, 40 cts.; 7 cu. yds. Class "A" concrete, $10; 70 cu. yds. Class "B" concrete, $6; 6,200 lin. ft. ⅞-in. steel wire cable, $1; 110 lin. ft. 16-in. c. i. pipe, $6; 18 lin. ft. 8-in. c. i. pipe, $5; 2 M ft. lumber, $50; total, $10,030.

Cincinnati, O.—We are informed that the only bid received and opened on Sept. 30 by Maj. J. G. Warren, Corps Engr., U. S. A., for constructing a dredge was submitted by the Fairbanks Steam Shovel Co., of Marion, for $9,700.

**Reading, Pa.*—The City Council on Oct. 28 awarded to Hawman Bros., of Reading, the contract for constructing Spring St. subway (bids opened Oct. 17) for $110,480.

Valley Forge, Pa.—The State Water Supply Comn. is reported to have approved the application of the Philadelphia & Reading Ry. Co. (Wm. Hunter, Ch. Engr., Philadelphia) to construct embankments to straighten the banks of Schuylkill River at Valley Forge.

Panama.—See "Power Plants, Gas and Electricity."

Panama.—Bids will be received by H. F. Hodges, Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., until Nov. 12 for furnishing track-laying cars, journal jacks, motor, drain tile, iron, steel, rivets, chain, wire rope, etc., as per Circular No. 398.

Philadelphia, Pa.—Council's Com. on Commerce and Navigation on Oct. 17 referred with a favorable recommendation to the Finance Com. a bill appropriating $50,000 for the redredging of the ship channel in the Schuylkill River.
Council's Com. on Fairmount Park on Oct. 24 approved estimates submitted by the Park Comrs. for 1908 and sent it, with a favorable recommendation, to the Finance Com. The estimate is $1,054,029. The new items include $300,000 for the further extension of the Wissahickon boundaries of the park; improvements in the vicinity of Falls of Schuylkill, $25,000; laying out tennis grounds, constructing lockers, etc., $5,000; conduits for electric lights, $10,000; music pavilion and dining room at Belmont, $20,000; improving grounds and improvement of Zoological Garden, $30,000, and dredging Schuylkill River, $25,000. etc.
*Director of Public Health and Charities Neff, on Oct. 28, awarded to J. R. Wiggins & Co., for $34,125, a contract for building a brick and concrete conduit 6 x 6 ft. 9 in., 525 ft. long from power plant of new Municipal Hospital building to the scarlet fever ward, and to Chas. E. Monday a contract for a 6 x 3 ft. 3 in. conduit 1,525 ft. long from the power plant to smallpox pavilion at a cost of $37,362.

**Items marked thus give the names of parties awarded contract.*

Providence, R. I.—J. S. Packard & Son are reported to have secured the contract for dredging 35,000 cu. yds. of mud from Providence River, to form a channel connecting main channel of stream with its extensive wharfage property on Allens Ave., newly acquired, and this is said to be but the preliminary step in an extensive scheme which the General Chemical Co., of New York, has in contemplation for the enlargement of its facilities in this city. The company has completed purchase of property on West Side water front, north of Wm. M. Harris Co.'s property on Allen's Ave., and it is intended to erect there a large wharf to accommodate its shipping. At the same time large receiving tanks for mineral acids and chemicals will be built, and the property will be connected with the N. Y., N. H. & H. R. R. by spur tracks.

Newport, R. I.—Bids will be received by Lieut. Col. J. H. Willard, Corps Engrs., U. S. A., until Nov. 22, for dredging in Newport Harbor, as advertised in The Engineering Record.

Ft. Sumter, S. C.—Bids will be received until Nov. 21 by J. M. Fulton, Q. M., U. S. A., Ft. Moultrie, S. C., for constructing a wharf at Ft. Sumter.

Charleston, S. C.—Bids will be received by the Bureau of Yards and Docks, Navy Dept. (R. C. Hollyday, Ch.), Washington, D. C., until Nov. 16 for constructing a reinforced concrete wooden pile and timber deck pier at the U. S. Navy Yard, Charleston, S. C., as per Specification No. 1,565.

The only bid received and opened on Oct. 25 at the office of Capt. E. R. Stuart, Corps Engrs., U. S. A., for the construction of the hydraulic dredge to be delivered at Georgetown for use in deepening Congaree River was submitted by the Ellicott Machine Co., of Baltimore, Md., for $47,900.

Memphis, Tenn.—Bids will be received by Capt. Wm. D. Connor, Corps Engrs., U. S. A., until Nov. 25 for about 190,000 cu. yds levee work and 40,000 cu. yds. drainage ditch in Upper St. Francis Levee Dist., as advertised in The Engineering Record.

Galveston, Tex.—Bids will be received until Nov. 21 by Capt. John C. Oakes, Corps Engrs., U. S. A., Galveston, for dredging through Turtle Cove between Aransas Pass and Corpus Christi Bay, as advertised in The Engineering Record.

Bids will be received until Nov. 21 by Capt. John C. Oakes, Corps Engrs., U. S. A., Galveston, for jetty work at Aransas Pass, Tex.

Spokane, Wash.—Bids will be received until Dec. 16 by Robt. Fairley, City Compt., for $100,000 park improvement bonds.

Wausau, Wis.—Bids will be received until Dec. 3 by the Comrs. of the Dancy Drainage Dist. (Geo. H. Reynolds, Chmn.), at the office of the Clk. of the Circuit Court, at Wausau, for constructing a main ditch and all its branches. Specifications, etc., may be procured from the Harman Eng. Co., 109 S. Jefferson Ave., Peoria, Ill.

Eau Claire, Wis.—Press reports state that the special committee appointed several months ago to look up and submit a report on the proposed Shawtown dam and bridge are about ready to report; the proposed bridge and dam will, it is said, cost between $50,000 and $60,000.

Toronto, Ont.—Local press reports that contract for extension of breakwater on south side of island has been cancelled and new bids will be called for. A new plan is reported to have been approved by which, instead of extending the breakwater 1,000 ft. further west, a series of groynes will be built about 100 ft. into the water and 300 ft. apart, extending as far west as the water works pumping station. E. Coatsworth, Mayor, is Chmn. Bd. of Control.

CURRENT NEWS SUPPLEMENT

NOVEMBER 9, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

AMERICAN SOCIETY OF CIVIL ENGINEERS. Secretary, Charles Warren Hunt, 220 West 57th St., New York. Next meeting November 20, 1907. Paper on the Reinforced Concrete Work of the McGraw Building.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS. Secretary, Calvin W. Rice, 29 West 39th St., New York. Annual meeting, New York, Dec. 3-6, 1907. Next meeting November 12, 1907. Paper on Gearless Traction Electric Elevators.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS. Secretary, Ralph W. Pope, 29 West 39th St., New York.

AMERICAN INSTITUTE OF MINING ENGINEERS. Secretary, R. W. Raymond, 29 West 39th St., New York.

NATIONAL FIRE PROTECTION ASSOCIATION. Secretary, W. H. Merrill, Jr., Chicago.

AMERICAN INSTITUTE OF ARCHITECTS. Secretary, Glenn Brown, Washington, D. C.

ASSOCIATION OF ENGINEERING SOCIETIES. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS. Secretary, W. M. Mackay, 113 Beekman St., New York.

CANADIAN SOCIETY OF CIVIL ENGINEERS. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

SOCIETY FOR THE PROMOTION OF ENGINEERING EDUCATION. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

AMERICAN SOCIETY FOR TESTING MATERIALS. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS. Secretary, George W. Tillson, 831 Ocean Ave., Brooklyn, N. Y.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS. Secretary, S. F. Patterson, Concord, N. H.

AMERICAN RAILWAY ENGINEERING AND MAINTENANCE OF WAY ASSOCIATION. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

AMERICAN WATER WORKS ASSOCIATION. Secretary, J. M. Diven, Charleston, S. C.

AMERICAN STREET AND INTERURBAN RAILWAY ASSOCIATION. Secretary, Bernard V. Swenson, 29 West 39th St., New York.

AMERICAN FOUNDRYMEN'S ASSOCIATION. Secretary, Richard Moldenke, P. O. Box 432, New York.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

AMERICAN PUBLIC WORKS ASSOCIATION. Secretary, W. H. Flint, Chattanooga.

ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

NATIONAL ASSOCIATION OF CEMENT USERS. President, Richard L. Humphrey, Harrison Building, Philadelphia.

AMERICAN SOCIETY OF REFRIGERATING ENGINEERS. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

AMERICAN PUBLIC HEALTH ASSOCIATION. Secretary, Dr. C. O. Probst, Columbus, O.

PROPOSED INVESTIGATION OF STEEL AND STRUCTURAL MEMBERS.

An increased appropriation has been made available for the current fiscal year for the extension of the work carried on in the past at the Watertown Arsenal in the investigation of the properties of materials of construction. It is proposed to conduct this investigation along lines of the greatest practical value to users as well as manufacturers of materials. In the experimental study of steel and steel products it is proposed to begin with the metal in the ingot and thence to follow it out to the finished sections and to built members.

By authority of the Ordnance Department, Mr. William R. Webster, Consulting Engineer, and Mr. Edgar Marburg, Professor of Civil Engineering at the University of Pennsylvania, have been engaged to co-operate in the preparation of the program of tests, and in the prosecution of the work. A meeting attended, at their invitation, by about twenty-five consulting engineers and representatives of leading consuming and manufacturing interests was recently held at the Engineers' Club, New York City, for the purpose of meeting Major C. L. H. Ruggles, Commanding Officer, Watertown Arsenal, and Mr. J. E. Howard, in charge of the Watertown Testing Laboratory, with a view of determining the most desirable program for the initiation of the proposed investigation. This meeting was held in two sessions.

One session, presided over by Dr. Charles E. Dudley, Chemist, Pennsylvania Railroad, was devoted to a discussion of metallurgical questions applying to ingot structure, blooms, billets, slabs and forgings, and it was the sense of the meeting that it was desirable to make a study of these questions a special feature of the proposed work.

The second session, at which Mr. J. V. W. Reynders, Vice-President, Pennsylvania Steel Company, presided, was devoted to the consideration of a preliminary program for tests of structural members, including columns, riveted tension members, riveted splices, riveted connections in building construction and the general subject of riveting.

At the opening of the meeting Major C. L. H. Ruggles, Commanding Officer, U. S. Watertown Arsenal, explained that the work was not to be regarded in any sense a government investigation of steel, but that it was the desire of the Ordnance Department to utilize the increased appropriation with a view not only to the needs of the Government, but also to making the results as valuable as possible to all persons interested in the subject of steel, whether as consulting engineers or as representatives of consuming or manufacturing interests.

Mr. J. E. Howard, in charge of the Testing Laboratory at Watertown Arsenal, presented in abstract his report to the Ordnance Department in which attention was drawn to the desirability of making provision for the extension of the usefulness of the Testing Laboratory, and indicating in detail numerous lines of research that might be taken up to advantage.

It was the sense of the meeting that the extension of the testing facilities in this country had not kept pace with the advance in engineering construction, and a resolution was adopted by unanimous vote that the enlargement of the present facilities at the U. S. Watertown Arsenal by the erection of a testing machine of at least 10,000,000 pounds capacity was desirable. It was also decided to authorize the Chairman, Dr. Charles B. Dudley, to appoint two committees, subject to the approval of the Watertown authorities, one on Ingot Structure, Billets, Blooms, Slabs and Forgings, and the other on Tests of Structural Materials. These committees have since been appointed and much preliminary work has already been accomplished, which will be submitted at an early date to the engineering profession for criticism and suggestions.

THE STANDARD RAIL REPORT OF THE AMERICAN RAILWAY ASSOCIATION.

At the fall session of the American Railway Association held in New York on Oct. 30, the Committee on Standard Rail and Wheel Sections presented a progress report which was referred back to the committee with instructions to investigate further, and with authority to employ experts for this investigation. The committee made no express recommendations though the suggestions which it made were, in the main, concurred in. Special attention was called by the committee to the disputed percentage of discard from the ingot, and it is understood that in the further investigations special attention will be given to this point in order to reach a specification satisfactory to the railroads and the manufacturers.

SEPTEMBER EXCAVATION, ISTHMIAN CANAL.

The grand total of all excavation during September was 1,517,412 cu. yd. For the first time since United States control the million and a half limit was passed. Of the 1,517,412 cu. yd., 1,481,307 were taken from the canal prism. The Auugst total from the prism was 1,274,404 cu. yd., or 206,903 cu. yd. less than the September total. There were three less working days in September than there were in August, and the rainfall at nearly all points along the line was heavier than last year. At Empire, Culebra, Rio Grande and La Boca the rainfall was very much heavier, ranging from a half greater to more than twice as great. The excavation in detail is appended:

EXCAVATION BY STEAM SHOVELS.

Locality.	From Canal Prism.	From Accessory Works.	Total Excavation.
Culebra Division	753,288 cu. yd.	180 cu. yd.	753,468 cu. yd.
Mindi	28,837	...	28,837
Chagres Division	21,546	2,200	23,746
Gatun, locks.	87,423	...	87,423
Gatun, spillway	36,315	...	36,315
La Boca, locks	5,431	...	5,431
Total ...	932,840	2,380	935,220

The accompanying table shows the work performed in the Culebra Cut during the month as compared with the month of September, 1906:

SUMMARY OF WORK ON CULEBRA CUT DURING SEPTEMRER.

Period.	Total Excavation by Steam Shovels. Cu. yd.	Classification. Rock.	Classification. Earth.	Shovels at Work.	Work'g Days.	Excavation per Shovel. Cu. yd.	Railfall During Month. In.
Sep., 1906.	291,452	64%	36%	21.33	24	13,664	6.82
Sep., 1907.	749,529	70%	30%	38.50	24	19.468	11.12

The steam shovels which made the highest record for the month of September, 24 working days were as follows:

Class.	No.	Earth.	Rock.	Total.
95-ton	207	11,284 cu. yd.	16,927 cu. yd.	28,211 cu. yd.
	202	13,485	13,486	26,971
70-ton	122	2,912	21,370	24,282
	110	......	17,497	17,497
		27,681	69,280	96,961

EXCAVATION BY DREDGES.

Locality.	Canal Prism.	Accessory Wks.	Total Excav.
Colon Division	403,842 cu. yd.	17,000 cu. yd.	420,842 cu. yd.
La Boca Division	144,625	9,350	153,975
Do. ..	....	7,375	7,375
Total ..	548,467	33,725	582,192

During the month four dredges were in operation on the Colon Division, three of which worked in the Canal prism and the fourth outside of the prism. The amount and character of material removed by each dredge are as follows:

Dredges.	Material.	Amout. Place Measurement.
1 5-yard dipper dredge.......	Soft	17,000 cu. yd.
1 old French ladder dredge...	....	132,101
1 16-in. suction dredge.......	Soft	10,968
1 sea-going suction dredge ("Ancon")	Soft	260,773
		420,842

ENTIRE CANAL.

How Excavated.	Canal Prism.	Accessory Works.	Total Excavation.
By steam shovels	932,840 cu. yd.	2,380 cu. yd.	935,220 cu. yd.
By dredges.	548,467	33,725	582,192
Total ..	1,481,307	36,105	1,517,412

A NEW YORK ENGINEERING LIBRARY TO OPEN EVENINGS.

Since Nov. 6, the reference libraries of The American Institute of Electrical Engineers, The American Society of Mechanical Enginees, and The American Institute of Mining Engineers, 29 West 39th St., New York, have been open evenings until nine o'clock, and this will continue to be the case on all week days except public holidays. These libraries, constituting practically one library of engineering, situated near the New York Library, in the new headquarters of the Engineering Societies are available to members of the above societies, engineers, and the public generally, subject to proper regulations. Strangers are requested to bring letters of introduction from members or to secure cards fom the secretaries of the respective societies.

PERSONAL NOTES.

Mr. J. B. Hodgdon has been appointed city engineer of Joplin, Mo.

Prof. William B. Clark, chief of the Maryland State Geological Survey, returned recently from a tour of Europe.

Mr. J. W. Budd, formerly city engineer of Des Moines, Ia., has opened an office for private practice in that city.

Mr. J. C. Newsom, architect, San Francisco, Cal., has been appointed a member of the California State Board of Architects.

Mr. Charles A. Ingersoll, of Medina, N. Y., has been appointed a resident engineer on the New York State barge canals, with headquarters at Medina.

Mr. John W. Young has resigned as general European manager of the Allis-Chalmers Co. and will return to the United States about the first of December.

The Municipal Civil Service Commission of New York will hold examinations Dec. 17 and 19 of candidates for positions as structural steel or topographical draftsmen.

Mr. Robert Lindenthal has resigned as manager of the Arthur Koppel Co., and will establish himself in Berlin, Germany, as a representative of American manufacturing firms.

Mr. Arthur F. Ballou has been appointed superintendent of water-works of Woonsocket, R. I., succeeding Mr. E. W. Kent, whose resignation was noted recently in these columns.

Mr. H. Holbert Porter, of the firm of Sanderson & Porter, engineers, New York City, has been appointed consulting engineer to the Interborough-Metropolitan Co. of the same city.

Civil Engineer P. L. Reed, U. S. N., has been transferred from the Bureau of Yards and Docks to the works of the General Electric Co., Schenectady, N. Y., for special temporary duty.

Mr. E. F. Robinson, assistant engineer of track of the Buffalo, Rochester & Pittsburg Ry., has been appointed chief engineer of the line, succeeding Mr. J. M. Floesch, who recently resigned.

The Board of Water Supply of New York City has appointed Messrs. York and Sawyer, of that city, as its consulting architects, and Mr. Charles W. Leavitt, Jr., as its consulting landscape architect.

At a meeting of the board of directors of the Pennsylvania R. R. Co., Oct. 23, Mr. Percival Roberts, Jr., formerly head of the Pencoyd Iron Works, was elected a director to succeed the late A. M. Fox.

Mr. W. D. Taylor, chief engineer of the Chicago & Alton R. R., has been appointed chief engineer of the Toledo, St. Louis & Western R. R. also, the two roads now being controlled by the same interests.

W. S. Whiting, a civil engineer, who in 1901 took part in the organization of the Brown-Corliss Engine Co., died Nov. 2, at Racine, Wis., as the result of a recent railroad accident in which he lost both legs.

Capt. Lytle Brown, Corps of Engineers, U. S. A., on temporary duty in the office of the Chief of Staff, has been ordered to join the second battalion of engineers, stationed at Washington Barracks, Washington, D. C.

Mr. John S. Henderson, Jr., formerly connected with the Westinghouse Electric & Manufacturing Co., in the Baltimore offices of that company, has opened an office at Salisbury, N. C., as a consulting electrical and mechanical engineer.

The Pittsburgh Automatic Vise & Tool Co., Pittsburgh, Pa., have under way a shipment of "Pittsburgh" vises amounting to $5,000, consigned to a large manufacturing plant in England. They report an extensive volume of export business.

The New York State Civil Service Commission will hold examinations Nov. 30, of candidates for positions as assistant civil engineer in the State Engineer's Department; and electrical engineer and gas engineer to the Public Service Commissions.

Messrs. James A. Fairleigh, George H. Cushman, L. B. Lockwood, H. C. Beck and D. W. Hughes have applied for a charter for the Cushman-Fairleigh Engineering Co., Chattanooga, Tenn. The firm will engage in a general engineering business.

Mr. C. F. Muralt, of the firm of Muralt & Co., consulting engineers, 114 Liberty St., New York City, has been appointed to fill the newly-created chair of applied electrical engineering at the University of Michigan. He will continue in active practice.

Mr. Felix F. Wiener has resigned as vice-president and treasurer of Messrs. Henry Pels & Co., importers and manufacturers of punching and shearing machines, to become a partner in the International Electric & Engineering Co., 150 Nassau St., New York.

Mr. E. Stanley Field, formerly connected with Mr. Lewis E. Kitchen, of Chicago, and Mr. Henry M. Lilly, of Albemarle, N. C., have formed a partnership to conduct a general practice as architects and engineers, with offices in the Garrell Bldg., Wilmington, N. C.

Messrs. Allen Hazen, New York; Frederick P. Stearns, Boston, and Minard L. Holman, St. Louis, have been selected to represent the City of Denver on the board of appraisal which is to determine the value of the plant of the Denver Union Water Co., which the city is to acquire.

Prof. C. L. DeMuralt, of the electrical engineering department at the University of Michigan, has been appointed consulting engineer to the state railways of Austria in connection with the electrification of the Arlberg tunnel under the Tyrolean Alps. The tunnel is 7 miles long.

Mr. Nathaniel P. Craighill has been appointed professor of electrical and mechanical engineering at the University of Montana, Missoula, Mont. Prof. Craighill has had wide experience in electrical and mechanical engineering. At one time he was associate editor of the American Electrician.

Messrs. C. F. Chism, E. J. Pickwick, W. H. Van Wie, T. R. Ripley, F. J. Wagner, C. A. Ingersoll, T. J. Morrison, O. F. Bellows, F. C. Davis, E. Styring, J. A. O'Connor, C. H. McCullough and Herbert Spencer have been appointed resident engineers in the department of the New York State Engineer and Surveyor.

Mr. Clyde T. Griswold, superintendent of the Green Hill mine of the Canadian Copper Co., has been appointed professor of mining and metallurgy at Colorado College, Colorado Springs, Colo., succeeding Dr. Thomas T. Read, who is to be professor of metallurgy at the Imperial University, Tientsin, China. Professor Griswold is a graduate of Amherst College and Columbia University.

Mr. George S. Rice has resigned the position of chief engineer of the New York City Public Service Commission and Mr. Henry B. Seaman, consulting engineer to the Department of Bridges of the same city, has been appointed to fill the vacancy. Mr. Rice will continue in the service of the commission in charge of subway construction, with which he has been identified since the work began.

An investigation of deep wells for furnishing water supplies to small towns in the Atlantic Coast region is now being carried on by Dr. G. McCarthy, biologist of the North Carolina Board of Health, whose offices are at Raleigh. He is particularly desirous of securing information concerning artesian or deep well waters polluted by sewage or other surface material liable to convey typhoid fever germs. Water works engineers who have information along this line are requested to communicate it to Dr. McCarthy.

Mr. Orville H. Ensign, electrical and mechanical engineer in charge of electrical and pumping problems on the Pacific Coast for the United States Reclamation Service, has been appointed to succeed Prof. Dugald C. Jackson as head of the department of electrical engineering at the University of Wisconsin. Prof. Ensign has had a wide experience in the electrical profession. His early training, subsequent to his college work, was had in the service of the General Electric Co. and other Eastern concerns. In 1893 he moved to the Pacific Coast where he has since maintained a practice largely of a consulting nature.

At the quarterly meeting of the Massachusetts Highway Association at the American House, Boston, on Nov. 12, papers will be read by Messrs. John A. Pettigrew, superintendent of parks of Boston; John R. Rablin, engineer of the Metropolitan Park Commission of Boston; Frank C. Pillsbury, division engineer of the Massachusetts Highway Commission; Charles W. Ross, of the Newton Street Commission; George Kimball, superintendent of streets of Manchester; Alm. D. Sohier, of Beverly; Benjamin P. Richardson, of Brookline, and A. B. Cowdery, of Boston.

Mr. Richard T. Laffin, vice-president and general manager of the Manila Electric Railroad & Light Co., has resigned, having completed the task of establishing the operating organization of this property. The management is now assumed by Mr. C. B. Graves, who has been Mr. Laffin's right-hand man since the property was placed in operation, three years ago, as manager of the lighting and power department. Mr. Laffin is still interested financially in the Manila properties. He resigns to take the management of another group of public utility properties in which Messrs. J. G. White & Co., Inc., are interested. Mr. Graves has had extended experience in the management of electrical properties in the tropics. Before becoming connected with the Manila Electric Railroad & Light Co., he was electrical engineer and assistant manager of the San Paulo Tramway Light & Power Co., San Paulo, Brazil.

BUSINESS NOTES.

The Hunt Engineering Co. has placed an order with the Lehigh Car Wheel & Axle Works, Catasauqau, Pa., for the necessary pulverizing machinery for the 2,000-bbl. plant (shale and limestone) being built at Chanute, Kan., for the Ash Grove Lime & Portland Cement. Co.

A small town in Southern Pennsylvania has a site which it will offer to a manufacturing industry employing from 50 to 75 men, and its citizens are prepared to raise at least $25,000 in financing an attractive project, a business already established being preferred. Full information can be obtained from Mr. Geo. W. Aubrey, attorney-at law, B. & B. Building, Allentown, Pa.

The Allis-Chalmers Co. has opened an office at Deadwood, S. D., with Mr. O. F. Purnell as district manager. Special attention will be given by Mr. Purnell and the members of his staff to the sale of mining, crushing, pumping, power and electrical machinery, many installations of which have been made by Allis-Chalmers Co. and its predecessors throughout that section of country.

The Expanded Metal & Corrugated Bar Co., Frisco Bldg., St. Louis, Mo., is furnishing the reinforcement required in the construction of the Pennsylvania Railway Terminal Station, Seventh to Ninth Aves. from 31st to 33d Sts., New York City. An order for one thousand tons of corrugated bars has been placed with the above company by the contractor, the National Fire Proofing Co. McKim, Mead & White are the architects for the station.

The Southwestern Bridge Co., Joplin, Mo., has received the following orders for structural steel work: Texas Central R. R., two through plate girder bridges for Waco, Tex.; structural steel for the Allen Bldg., Shreveport, La.; 100,000-gal. tank and tower for the St. Louis & San Francisco R. R., at Springfield, Mo.; four additional steel buildings for the Kansas Natural Gas Co., Independence, Kan.; bridges on the Joplin & Pittsburg Interurban R. R.

W. & B. Douglas, Middletown, Conn., have acquired the pump department of the Union Mfg. Co., of New Britain, Conn., and will continue the manufacture of the Union make of pumps at their Middletown plant. The two concerns have been competitors for about thirty years, but from now on the Union Mfg. Co. will confine its attention to lathe, planer and drill chucks. All of the patterns, tools and machinery for the pumps are in the hands of W. & B. Douglas, who can furnish all repair parts.

Mr. S. T. DeLaMater, formerly with the Standard Construction Co., Chicago, has been engaged by the General Fireproofing Co., and for the present is located at the home office in Youngstown, O. Mr. DeLaMater is a graduate of Cornell University, and through his connections with contracting firms has acquired a wide experience in reinforced concrete design and construction. Among his connections have been the Osborne Engineering Co., Cleveland, O., Paul F. P. Mueller, Falenau Construction Co., Standard Construction Co., Chicago, and L. P. & J. A. Smith Co., of Cleveland.

J. H. Wagenhorst & Co., manufacturers of electric blue printing machines, report the following partial list of recent sales: Eugene Dietzgen Co., Toronto, Canada; H. W. Caldwell & Son Co., Chicago, Ill.; Betts Machine Co., Wilmington, Del.; Green Fuel Economizer Co., Matteawan, N. Y.; Atlantic Terra Cotta Co., Tottenville, N. Y.; Kansas City Structural Steel Co., Argentine, Kan.; Sawyer & Garstin, Colorado Springs, Colo.; H. Vogt Machine Co., Louisville, Ky.; Toledo Machine & Tool Co., Toledo, O.; S. G. Fetterman Engineering Co., Johnstown, Pa.; American Locomotive Works, Schenectady, N. Y.; H. L. Sprague, Springfield, Mass.; R. M. Jones Co., Muscogee, I. T.; Ajax Forge Co., Chicago, Ill.

Among the noteworthy features of the textile industry, this fall, has been the ordering of steam turbines, of the improved type built by Allis-Chalmers Co., for installation in some of the large mills of New England and the Central and Southern States. Contracts recently awarded by textile manufacturers include three turbines for the new 10,000-h.-p. plant of the Pacific Mills, Lawrence, Mass., one of 2,200 h.-p. for the American Thread Company's Watuppa Mills, one of 3,000 h.-p. for the Tremont & Suffolk Mills, and machines of 800 h.-p. each for the Jamestown Worsted Mills and Cherry Cotton Mills. These turbines are of the same general type as the machines installed on the new liners "Lusitania" and "Mauritania."

The Sandusky Portland Cement Co., Sandusky, O., reports that Medusa waterproof compound was used in the following work: By the Atchison, Topeka & Santa Fe Ry. Co. in the concrete depot at Las Animas, Colo., and by the same railroad in their tie and timber treating plant at Albuquerque; in the Owen Office Building and Peninsular Bank Building, both in Detroit, Mich.; in the roof of the North Chicago Hardware Co.; in a concrete reservoir for the Knickerbocker Ice Co.; in the Chicago Junction Ry. Co. and Chicago & Northwestern Ry. Co. track elevation at Chicago. The compound has also been recommended by the engineer in charge for the new Phipps Natatorium being constructed in Pittsburg, this recommendation having been made after a series of tests.

The B. F. Sturtevant Co., through Mr. F. R. Chinnock, manager of the New York office, 114 Liberty St., reports the following sales of electric generating sets: Kiernan & Hughes Co., Jersey City, N. J., one 9 x 8 vertical engine, 30-kw. generator; Millard & McLean, New York City, one 4½ x 4½ vertical engine, 5-kw. generator; Henry Steers, Inc., New York City, one 4½ x 4½ vertical engine, 5-kw. generator, two 6 x 5 vertical engines, 7½-kw. generators; Sonora Co., New York City, three 10-h.-p. motors; Washburn Brothers Co., Saugerties, N. Y., 13 x 12 horizontal engine, 50-kw. generator, 20-h.-p. motor; Eberhard Faber Pencil Co., Brooklyn, N. Y., 16 x 14 horizontal engine, 100-kw. generator; Department of Water Supply, Babylon, L. I., 9 x 8 vertical engine, 40-kw. generator; Samuel Smith & Sons Co., Paterson, N. J., 16 x 14 horizontal engine, 100-kw. generator; Isidor Fajans, New York, 9 x 8 vertical engine, 30-kw. generator; Charles Hakemeyer Co., Paterson, N. J., 17½-kw. generator, three 5-h.-p. motors. The above are a few of the recent orders and illustrate the class of clientele using Sturtevant generating sets.

CONTRACTING NEWS
OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS
ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

**Los Angeles Cal.*—G. O. Newman, 226 Mercantile Pl., Consulting Engr., Beaumont Land & Water Co., writes that K. Simonds Co. have secured the contract for constructing irrigation plant, for $25,000. Engineer in charge, L. S. Preston, of Beaumont.

**Atlanta, Ga.*—The Water Bd. is reported to have on Oct. 29 awarded to the New York Continental Jewell Filtration Co., of New York, N. Y., the contract for a filter plant for $26,000 (bids opened Oct. 23).

Ashland, Ga.—This city is reported to have voted to issue $20,000 water works bonds.

Hazelhurst, Ga.—It is reported that the Council is preparing to establish a water system, estimated to cost $25,000.

Chicago, Ill.—Bids will be received until Nov. 12 by John J. Hanberg, Comr. Pub. Wks., for furnishing and delivering at the city pipe yards about 178 tons special castings.

Coweta, Ind. Ter.—It is reported that arrangements are being made to establish water works, estimated to cost $20,000.

Sapulpa, Ind. Ter.—J. A. Fulp, City Recorder, writes that engineer has not yet been selected to prepare plans for water works, for which it is proposed to issue $50,000 bonds.

Waterloo, Ia.—The citizens on Oct. 28 voted to purchase present water works or construct a municipal plant.

Garrison, Ia.—Press reports state that it is proposed to construct water works here.

Mt. Washington, Baltimore, Md.—The Mt. Washington Water Co. is reported to have secured a franchise to lay mains from Rogers Station, in the Green Spring Valley, to Mt. Washington, a distance of about 9 miles.

Milan, Mich.—We are informed that bonds are now being printed, to be used for the construction of water works and sewers.

Hildreth, Neb.—It is stated that bids are wanted until Nov. 25 for $10,000 water works bonds. A. L. Beck, Village Clk.

Wood River, Neb.—See "Power Plants, Gas and Electricity."

Kearney, Neb.—The citizens are reported to have voted to issue bonds for the construction of water works.

Santa Fe, N. M.—Bids will be received until Nov. 21 by Maj. M. Gray Zalinski, Q. M., U. S. A., Washington, D. C., for repairs to water supply and improvements at the Santa Fe (N. M.) Natl. Cemetery.

Alcove, N. Y.—The State Water Supply Comn. at Albany is reported to have granted to the Hannicroix Water Co., of Ravenna, permission to construct a reservoir at Alcove.

Spencerport, N. Y.—The Village Trus. are reported to have granted Melville T. Page, Geo. M. Cole and Berton W. Brown, of Spencerport, and P. F. Coleman and Dr. H. M. Roberts, of Herkimer, representing the Spencerport Water Co., a franchise to lay water mains and furnish this village with water and also for sewerage system.

Mt. Olive, N. C.—It is reported that an issue of $25,000 in bonds has been voted for a water supply.

Wilmington, N. C.—C. R. Humphreys, City Engr., writes that the citizens have voted to issue $500,000 for water works and a sewerage system.

Local press reports state that the city has not yet definitely decided to purchase the present water works.

Grand Forks, N. D.—Bids will be received until Nov. 14 by the City Council for constructing water mains in portions of Pakenham and Ione Aves. W. V. O'Connor, City Aud.

Pleasant Ridge, O.—The City Council is reported to have decided to lay water mains to the city limits of Cincinnati.

Barnesville, O.—Bids will be received until Nov. 18 by the Bd. Co. Comrs. at the office of A. W. Beaty, Co. Aud., for furnishing material and installing a complete penumatic water system in the Co. Children's Home, near Barnesville.

Lakewood, O.—Bids will be received until Nov. 18 by B. M. Cook, Village Clk., for furnishing material and laying a water main in Nicholson Ave. Wm. H. Evers, Engr. Co., Engrs., 237 The Arcade.

**Philadelphia, Pa.*—We are informed that contracts have been awarded as follows (bids opened Oct. 22 by the Dept. of Pub. Wks., Bureau of Water, Fred C. Dunlap, Ch. Engr.):

*Contract 127.—Boilers for Torresdale pumping station to the D'Oliver Eng. Co., 121 S. 11th St., for 3 Heine boilers complete with Murphy stokers, Foster superheaters and Sturtevant economizers, for lump sum of $32,250.

*Contract 128.—For one centrifugal pump, driven by vertical cross compound steam engines, duty of 78,000,000 foot lbs. per 1,000 lb. steam consumed, to Allis-Chalmers Co., Milwaukee, Wis. (lump sum), $18,700.

*Contract 134.—For Magnesia covering at Lardners Point pumping station to H. W. Johns-Manville Co., 21 No. 2d St., at 8 cts. per lb. for furnishing Magnesia cement and for covering all steam piping at the station (lump sum), $4,933. John Jameson & Son, 2581 E. Huntington St., secured contract for painting 3 engines for $750.

The citizens on Nov. 5 voted to authorize Council to negotiate a loan of $10,000,000 to be apportioned as follows: Filtration, $800,000; for new school sites and buildings, $2,500,000; parkway, $1,000,000; mandamus, $1,000,000; high pressure fire system in the mill district, $500,000; police and fire stations and new fire apparatus, $500,000; League Island Park, $500,000; improvement of small parks, $150,000; bath houses, $100,000; South Broad St. boulevard, $400,000; Passyunk Ave. bridge, $300,000; new bridges, $300,000; main sewers, $600,000; branch sewers, $500,000; paving intersections, $200,000; grading, $300,000; surfacing unpaved streets, $150,000; house of detention for juvenile prisonrs, $200,000.

Bids were opened on Nov. 4 at the office of the Bd. of Pub. Wks., Bureau of Water for contracts as follows:

Contract 90.—For a 6,000,000-gal. pumping engine for Belmont high service pumping station; Snow Steam Pump Works, $39,000, to be completed in 270 days; Laidlaw Dunn Gordon Co., $36,500 (270 days); Bethlehem Steel Wks., $39,750 (260 days); Allis-Chalmers Co., $32,970 (240 days); Southwark Fdry. Machine Co., $44,385 (175 days).

Nos. 93 and 94.—Furnishing (*a*) pipe fittings and materials, and (*b*) excavating pipe trenches for high-pressure fire main system. John McMenomimy, *a*, 39 cts.; *b*, $160. Mack Paving Co., *a*, 60 to 70 cts.; *b*, $2.10. O. J. Evers, *a*, 35 cts.; *b*, $2.25. M. & J. B. McHugh, *a*, $1.30 to $1.90; *b*, $3.45. M. T. Quinn, *a*, $1.25 to $1.75; *b*, $2.37. Wm. C. Watson, *a*, $1.25 to 2; *b*, $.2.25.

Reading, Pa.—The citizens on Nov. 5 voted to issue $500,000 bonds for the filtration of the water supply.

Temple, Tex.—Bonds to the amount of $150,000 are reported to have been voted for the construction of water works.

Lufkin, Tex.—The citizens are reported to have voted on Oct. 24 to issue $5,000 bonds to drill an artesian well and improve water works.

Sweetwater, Tex.—Burns & McDonnell, 823 Scarritt Bldg., Kansas City, Mo., are preparing estimates for the construction of water works at Sweetwater. Bids will probably be called for in about 2 months.

Cisco, Tex.—It is stated that water works will be established at a cost of $16,000.

Norfolk, Va.—Bids will be received until Nov. 18 by the Bd. of Control (H. Hodges, Chmn.), for the following: Furnishing and installing 2,000 5-8 in. and 3-4 in. water meters and meter boxes; installing 2,000 5-8 in. and 3-4 in. meters and boxes; furnishing 2,000 5-8 in. and 3-4 in. water meters; furnishing 2,000 water meter boxes.

Alexandria, Va.—Bids are wanted by the Alexandria Electric Co., 502 King St., for furnishing material and extending the water suction line into the river at its plant, foot of Wolfe St.

Seattle, Wash.—Bids will be received by C. B. Bagley, Secy. Bd. Pub. Wks., until Nov. 26 for water mains in 11th Ave., N. W., together with necessary sewers; estimated cost, $8,075.

*The International Contract Co., New York Blk., has secured contract for laying water mains on 31st St., S., for $4,430.

**Tacoma, Wash.*—The Lister Constr. Co. is reported to have secured the contract for laying a 6 and 8 in. c. i. water main in Local Improv. Dist 524 (bids opened Oct. 26), for $20,075.

Spokane, Wash.—City Engr. Chas. McIntyre is reported to have recommended repairs to dam in Spokane River to prevent present leakage and that provision be made for widening the overflow and raising the crest of dam.

De Forest, Wis.—Fred Moeller, City Clk., writes that bids will probably be called for in Jan. or Feb. for the construction of water works, for which the National Constr. Co., of South Bend, Ind., is preparing plans; probable cost, $10,000.

Hamilton, Ont.—We are informed that the citizens will in Jan. vote on issuing $50,000 bonds for purchasing electric pumps to supply city with water.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Redondo, Cal.—Olmsted & Gillelen, 616 Grand Bldg., Los Angeles, are compelting plans for the construction of a sewerage system for Redondo, to cost about $80,000.

Fairfield, Cal.—F. L. Morrill, Town Clk., writes that bids will be received on Dec. 4 for the purchase of $20,000 bonds, to be used for the construction of a sewerage system.

**Plainville, Conn.*—A. B. Griswold, of New Britain, is reported to have secured the contract for constructing a surface water sewer in Whiting St. for $2,885.

Ft. Du Pont, Delaware City, Del.—Bids will be received by Capt. J. L. Knowlton, Constr. Q. M., U. S. A., until Nov. 25 for remodeling sewer system and installing two sewage ejectors and ejector chamber at Ft. Du Pont, as advertised in The Engineering Record.

Forsyth, Ga.—H. F. Wilder, City Clk. and Treas., writes that bids will be received on Dec. 6 for the construction of a sewerage system, to cost about $15,000.

**Nampa, Idaho.*—E. P. Bigelow, City Engr., writes that the contract for constructing gravity sewer (bids opened Sept. 18) has been awarded to Jos. Goggins & Co., of Nampa as follows: 1,920 ft. 15-in. pipe, main sewer pipe, $1.20; 5,140 ft. 8-in. laterals, 60 cts.; 1,438 ft. under 6 ft., 58 cts.; 2,433 ft 6 to 8 ft., 60 cts.; 1,606 ft. 8 to 10 ft., 63 cts.; 1,373 ft. 10 to 12 ft., 68 cts.; 210 ft. 12 to 14 ft. 71 cts.; 14 manholes (brick), each, $65; 5 flush tanks (automatic siphon), each $88; total, $9,958.

Belleville, Ill.—This city has in contemplation the extension of Town Grove sewer system. Fred Deutschman, Jr., City Engr.

Glencoe, Ill.—The Village Council is reported to be considering plans for the construction of a disposal plant and for drains leading away from the lake.

Elgin, Ill.—The City Engineer is reported to be preparing plans for a complete system of combination sewers for the 6th Ward.

Richmond, Ind.—Local press reports state that new bids will soon be asked, for the construction of two sections of the Northwest 2d St. sewer, to cost about $23,000.

Des Moines, Ia.—The following are reported to be the bids opened on Oct. 28 by the Bd. of Pub. Wks. for the construction of a septic tank: Cook Constr. Co., Des Moines, $5,000; J. L. & F. A. Hansman, $6,100; Jas. Horrabin, $6,450; O. P. Herrick, $6,900; Geo. M. King Constr. Co., $6,250, and Chas. Weitz, $8,361.

Sioux City, Ia.—Bids will be received until Nov. 12 at the office of the City Clk. for furnishing material and constructing an 8-in., vitrified tile pipe sanitary sewer in portions of Jennings, 20th, 22d and Jones Sts., Park Ave. and Higman's Park addition, and an 8-in. pipe sewer in a portion of W 2d St. T. W. Bayne, Chmn. Com. on Sewers.

Shelbyville, Ky.—The citizens are reported to have voted to issue $30,000 bonds for the construction of a sewerage system.

Louisville, Ky.—Local press reports state that work will start at once on the construction of an 18-in. sewer in Central Ave., from 7th to Jones St. Jos. Claybrook, City Engr.

Paducah, Ky.—L. A. Washington, City Engr., writes that all bids opened on Oct. 1 for the construction of 14 miles of 6-in. vitr. pipe sewer laterals, ranging from 12 to 6 ft., have been rejected, all being too high. No further steps have been taken as yet to procure new bids.

Springfield, Moss.—The City Council on Oct. 28 authorized the issue of $20,000 for sewers and $62,000 for constructing the Abbe Ave. crossover.

Southbridge, Mass.—Bids will be received until Nov. 12 by the Bd. Sewer Comrs. (Wilfred J. Lamoreux, Clk.) for constructing sewage purification works. John A. Whittaker, Engr., Southbridge.

Wyandotte, Mich.—R. Winthrop Pratt, of Columbus, O., has completed plans for a slow sand filtration system for Wyandotte, and is stated to have estimated its cost, with a capacity of 1,000,000 gals. daily, at $30,000.

Port Huron, Mich.—The City Engineer is reported to be preparing plans for a system of sewers for the 9th Ward.

Milan, Mich.—See "Water."

Sturgis, Mich.—Geo. S. Pierson, of Kalamazoo, is reported to have been selected to assist in preparing plans for a sanitary sewer system. This city is also said to be considering the advisability of installing a purification plant.

**St. Paul, Minn.*—The General Contr. Co. is reported to have secured contract for a sewer across the Soo Line's right-of-way on York St., for $11,490.

Paterson, N. J.—Governor Stokes has signed the bill authorizing Paterson to construct a sewage disposal plant, a companion measure to the trunk sewer bill passed at last session of Legislature. The law authorizes any municipality to issue bonds for the erection of a plant for sewage disposal, which may be located either within or without boundaries of municipality under certain restrictions.

Madison, N. J.—We are informed that a special election will be held on Dec. 2 to vote on issuing bonds for constructing sewerage system and disposal plant. Engineers, Hering & Fuller, of New York, N. Y.

Morristown, N. J.—The Bd. of Aldermen is reported to have on Nov. 1 decided to issue $400,000 sewer bonds.

Buffalo, N. Y.—Bids will be received until Nov. 16 by the Dept. Pub. Wks. (F. G. Ward, Comr.) for constructing a 10-in. tile sewer in Barton St.

Cornwall, N. Y.—It is reported that plans have been completed for the construction of a sewerage system.

Brooklyn, N. Y.—Bids will be received until Nov. 20 by Bird S. Coler, Boro. Pres., for furnishing material and constructing sewers in 44th and E 4th Sts. Engineer's estimate: 3,951 lin. ft. 15 and 12 in. pipe, 762 lin. ft. brick sewer, 5,100 lin. ft. 6-in. house connection drain, 45 manholes, 30 M. ft. sheeting and bracing, etc.

Spencerport, N. Y.—See "Water."

White Plains, N. Y.—Bids will be received by the Bronx Valley Sewer Comn. (Frank N. Glover, Secy., 2 Grand St.) until Nov. 27 (extension of date from Nov. 7) for the construction of about 12 miles of circular sewer from 3 1-3 to 6 ft. in diam. and about 3 miles of circular lined tunnel, mostly 6½ ft. and 8½ ft. diam., as advertised in The Engineering Record. The material for construction to be either monolithic reinforced concrete, reinforced concrete block or brick masonry.

**Rochester, N. Y.*—The contract for building the substructure for a pumping station in connection with the new sewer in the 12th Ward and partially in the 23d Ward, is reported to have been awarded on Oct. 30 to Houston Barnard for about $6,000.

The Bd. of Contract and Supply on Oct. 31 awarded contract to Wm. Summerhays & Son for building the ventilating tower for the East Side sewer at Norton and St. Paul Sts., for $3,760.

Wilmington, N. C.—See "Water."

**Cleveland, O.*—At the meeting of the County Bldg. Com. on Oct. 30 it was decided to award contract for constructing sewer on court house site to Andrew Dall & Son, Euclid Ave. and Erie St.; cost, about $30,000.

Youngstown, O.—It is stated that bids are wanted until Nov. 14 for $25,000 Riverview sewer bonds. Wm. J. Davies, City Clk.

Bids will be received until Nov. 21 by Bd. Pub. Service (W. H. McMillin, Clk.), for furnishing material and constructing sewers in portions of Fairview and Ridge Aves. and Regent St.

Orrville, O.—We are informed that bids will be received on Dec. 9 by S. W. Jackson, Village Clk., for the construction of a sewerage system and sewage disposal plant for Orrville, to cost about $70,000. Engineer, L. E. Chapin, of Chapin & Knowles, Canton, O.

Philadelphia, Pa.—See "Water."

**Ardmore, Pa.*—R. A. Warner, Supt. of Health and Drainage, writes the the contract for constructing 1,575 ft. 8-in. terra cotta sewer on Lehigh Ave. (bids opened Oct. 31), has been awarded to Brubaker & Co., of Philadelphia, for $2,225.

**Items marked thus give the names of parties awarded contracts.*

Reading, Pa.—Bids will be received until Nov. 20 by the Bd. Pub. Wks., care Caleb Weidner, City Clk., for constructing and laying about 27,600 lin. ft. 10-in. and 32,500 lin. ft. 5-in. pipe sewer, together with Y's and manholes also same date for constructing storm water sewers as follows: Northeastern Intercepting Sewer; Canal St. sewer; Rose Valley sewer, as advertised in The Engineering Record.

Florence, S. C.—Wm. W. Lyon, of Sumter, is reported to have been selected to prepare plans and estimates for a sewerage system.

Buffalo, N. Y.—See "Miscellaneous."

Cincinnati, O.—Bids will not be called for until next year by the Bd. of Pub. Service for a lift bridge over canar at 14th St., to cost about $28,000. P. N. Jonte, Engr. of Bridges.

Bids will be received until Nov. 15 by Bd. Co. Comrs. (Fred Dreihs, Clk.), at Cincinnati, for repairing bridge over Big Miami River near New Baltimore, Crosby Township.

**Allentown, Pa.*—Ex-Mayor Fred E. Lewis, of Allentown, and other local capitalists are reported to have accepted the proposition of Brown Bros. & Co. and E. B. Smith & Co., of Philadelphia, to complete the erection of the $400,000 steel bridge to span the 118-ft. ravine between Allentown and South Allentown. The local company has expended about $100,000 on the substructure. This bridge is to form a connecting link in the system of electric railways owned or leased by the Lehigh Valley Transit Co.

or other corporations occupy the lake front the boulevard will be constructed on made ground out in the lake.

Salem, Ind.—Sam'l. G. Ellis, Co. Aud., writes that no bids were received on Nov. 4 for the construction of the following gravel roads: Salem and Martinsville road, 10,046 ft.; Borden and Martinsburg road, 9,738 ft.; Martinsburg and Greenville road, 10,363 ft.; Martinsburg and Palmyra road, 9,000 ft.; Old Grade road, 18,639 ft.; Livonia and Mt. Pleasant road, 24,845 ft.; Millsport gravel road, 24,220 ft.

Tecumseh, Mich.—The following are the bids opened on Oct. 29 by the Bd. of Village Trus. for furnishing material and constructing sewers (Engineers, Riggs & Sherman Co., of Toledo, O.): (*a*) F. M. Benner, Marion, Ind.; (*b*) Gould & Maybach, Collingwood, O.; (*c*) Ferdinand M. Porath, Detroit, Mich.; (*d*) Geo. W. Winterhalter, Detroit, Mich.; (*e*) J. A. Mercier, Detroit, Mich.; (*f*) A. P. Southworth, Adrian, Mich.; (*g*) Theo. W. Hill, Bellefontaine, O.; (*h*) Shoup & Baird, Dayton, O.; (*i*) D. W. J. Townsend Construction Co., Cleveland, O.; (*j*) Williams & McRitchie, Chicago, Ill.; (*k*) Emanuel Schneider, Ann Arbor, Mich.; (*l*) Algate & Johnson, Lansing Mich.; (*m*) Weage & Swonk, Coldwater, Mich.

Seattle, Wash.—Bids will be received on Nov. 26 by C. B. Eagley, Secy. Bd. of Pub. Wks., for constructing sewers and altering existing water mains in Elliott Ave.; estimated cost, $6,200, and sewers in W. 54th St.; estimated cost, $5,000.

*E. H. Rawle & Co., 313 Boston Blk., has secured contract for concrete walks on E. Olive St. and extending existing sewer, for $10,791; Stirral & Goetz, Pioneer Blk., for relief sewer on E. Denny Way, for $7,234, and to Rich-Harris Constr. Co. for sewer on Fremont Ave., for $3,047.

McMechen, W. Va.—Bonds to the amount of $25,000 are reported sold, to be issued for the construction of a sewerage system.

BRIDGES.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—It is stated that bids will be received until Nov. 25, by the Bd. of Public Works, for the construction of a reinforced concrete bridge across Arroyo de los Posos at Macy St. (Horace B. Ferris, Secy.).

Denver, Colo.—It is stated that T. W. Jaycox, State Engr., Denver, will receive bids until Nov. 13, for constructing the following bridges: 30-ft. reinforced concrete bridge across South Clear Creek, near Georgetown; 200-ft. steel highway bridge across the Gunnison River at Iola; reinforced concrete bridge, 50 ft. span, across the Rio La Jara River, at Capulin; 80-ft. steel bridge and approaches across the White River, about 1 mile east of the State line, Rio Blanco Co.

South Bend, Ind.—Bids will be received until Nov. 22 by the Bd. of Co. Comrs., at South Bend for constructing a concrete steel girder bridge at La Salle Ave., South Bend, to be 80 ft. long and 80 ft. wide. John W. Harbow, Co. Aud.; Alonzo J. Hammond, of South Bend, Engr in charge.

Indianapolis, Ind.—Plans for approaches to the bridge over the canal at 29th St. are reported under consideration.

Erie, Kan.—It is stated that bids will be received until Nov. 19 by the Bd. Co. Comrs. for constructing 3 all-steel or iron bridges across the Neosho River; also 1 40-ft. span, concrete piers, 8½ ft. high. O. M. Johnson, Co. Clk.

Williamsport, Md.—E. W. Byron, Secy. Williamsport & Berkeley Bridge Co., writes with regard to bids which were to have been opened on Oct. 30 for a reinforced concrete arch bridge, 15 spans, total length 1,570 ft., over Potomac River, that the matter has been deferred for two weeks. Mason D. Pratt, Consulting Engr., Harrisburg, Pa.

Baltimore, Md.—The City Council is stated to have passed an ordinance appropriating $11,500 toward the construction of a bridge over Gwynn's Falls, at Hollins St.

Mankato, Minn.—The construction of a bridge over the Minnesota River is reported contemplated, at a cost of $30,000.

Philadelphia, Pa.—See "Water."

Uniontown, Pa.—The construction of a bridge over the Monongahela River is reported contemplated.

**Philadelphia, Pa.*—The following are the bids opened Oct. 23 by Geo. R. Stearns, Dir. Dept. Pub. Wks., for *a* constructing a 4-track railroad bridge at 12th St. and *b* a highway bridge containing 2 concrete arches at Wyoming Ave.: Thos. F. Riley, *a* $51,897, *b* $124,975; J. F. Stanley & Co., *a* $52,000; Armstrong & Latta, *a* $53,500; Eastburn & Chiles, *a* $54,700, *b* $132,000; Jas. McGraw Co., *a* $57,197, *b* $157,000; Richard Walsh, *a* $58,000, *b* $102,000 (awarded contract); McGaw & Gray, *a* $58,-200, *b* $107,900; Mack Co., *a* $61,462, *b* $139,636; M. & J. B. McHugh, *a* $63,891; J. A. Kelly Co., *a* $63,900, *b* $134,500; Filbert Co., *a* $84,416, *b* $149,900; David Peoples, *b* $100,300; John McMenamy, *b* $113,500, and Riley and Riddle, *b* $124,975.

Eau Claire, Wis.—See "Miscellaneous."

Wailuku, Hawaii.—It is stated that bids will be received until Dec. 11 by the Bd. of Superv. at Wailuka, Maui County, for constructing three steel bridges. W. F. Kaae, Co. Clk.

Toronto, Ont.—Bids will be received until Nov. 12 by E. Coatsworth, Chm. Bd. Control, for the erection of the superstructure of Riverdale Park steel foot bridge.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

**Stamford, Conn.*—O'Connor Bros., of Stamford are stated to have secured the contract for macadamizing 5,450 ft. of the Bedford Road, at $1.96 per ft., and 3,547 ft. on Summer St., at $1.69 per ft.

Washington, D. C.—Bids will be received at the office of the Comrs., D. C. until Nov. 16 for furnishing the District government during the fiscal year ending June 30, 1908, granite curbing as advertised in The Engineering Record.

Atlanta, Ga.—Bids will be received until Nov. 18 by the Mayor and General Council for repaving Broad St. with creosote blocks, about 13,000 sq. yds. R. M. Clayton, City Engr.

Chicago, Ill.—Bids will be received until Nov. 12 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and paving with No. 2 granite blocks and constructing retaining walls on portions of W. Harrison and S. Canal Sts.

A boulevard which will completely encircle Lake Michigan, traversing the shores of the lake bordering on Michigan, Indiana, Illinois and Wisconsin, is reported contemplated. The first sketches of the proposed boulevard and parkway have been prepared by D. H. Burnham. The boulevard will keep close to the shore line wherever possible. In places where railroads

Jasper, Ind.—M. A. Sweeney, Co. Aud., writes that no contract was let on Nov. 4 for improving Holland and Huntingsburg Road No. 2, as all were higher than estimate.

Bluffton, Ind.—The Bo. Co. Comrs., it is reported, will receive bids until Nov. 16, for the construction of several gravel roads in each of the following townships: Rockcreek, Lancaster, Chester and Notingham.

Winchester, Ind.—The City Council is stated to have directed the City Engineer to prepare plans and specifications for paving with brick all the streets in the mile square north of Main and east of Mandian Sts.; also for the improvement of Washington, Franklin and North Sts.

**Ft. Wayne, Ind.*—Geo. W. Lindemuth, Co. Aud., writes that the contract for constructing 9,563 ft. macadamized road in Madison Township (bids opened Nov. 2) has been awarded to Wm. Busching, of Ft. Wayne, for $7,650.

**Greencastle, Ind.*—C. C. Hurst, Co. Aud., writes that the contract for construcing 16,340 ft. gravel road in Russell Township (bids opened Nov. 2) has been awarded to Shannon & Sutherlin, of Russellville, for $6,112.

Des Moines, Ia.—Bids will be received until Nov. 23 by the Bd. Pubfl Wks. (W. W. Wise, Chm.) for paving Elm, School, W. 2d. Center and W. 3d Sts. and an alley with vitrified paving blocks, in all about 11,067 sq. yds.

**Des Moines, Ia.*—J. L. & T. A. Hansman Constr. Co. is stated to have secured the contract for paving and curbing, as follows(bids opened Oct. 30 by Bd. Pub. Wks): W. 2d and W. 4th St., at $2, and W. 28th and W. 29th Sts., at $2.14½ per sq. yd.

**Iola, Kan.*—R. S. Gilfilian, of Iola, is reported to have secured the contract for paving portions of Lincoln, S. Walnut and S. Kentucky Sts., at $1.32 per sq. yd.

Baltimore, Md.—The Com. on Highways is stated to have approved ordinances for the following paving: Payson, Richmond, Lanyale, Wolfe, Chase, Pine Sts.; Woodbrook, North, Fremont, Lakewood Aves. and numerous other streets, at a probable cost of $500,000.

St. Paul, Minn.—The resurfacing of a portion of 4th St. is reported contemplated, at a cost of $108,215.

Gulfport, Miss.—See "Schools."

**Kansas City, Mo.*—The Economic Paving Co. is reported to have secured the contract for repairing asphalt pavements, at 93 cts. per sq. yd.

St. Louis, Mo.—Bids will be received until Nov. 19 by the Bd. Pub. Improv. (And. J. O'Reilly, Pres.) for paving portions of numerous alleys with vitrified paving brick blocks; est. cost, $90,000.

Woodbury, N. J.—Bids will be received until Nov. 16 by the Com. Bd. Chosen Freeholders for constructing with gravel about 6 miles of the Malaga and Downtown Rd. Wm. C. Cattell, Engr., Wenonah.

Brooklyn, N. Y.—Bids will be received until Nov. 20 by Bird S. Coler, Boro. Pres., for repaving with asphalt a portion of Classon Ave., and with granite on a concrete foundation, Columbia St. Engineer's estimate: 3,620 sq. yds. asphalt pavt., 3,300 sq. yds. granite block pavt., 3,270 lin. ft. new curb, to be set in concrete, etc.

Los Angeles, Cal.—The following are the bids opened on Oct. 14 by Bd. of Pub Wks. (Horace B. Ferris, Secy.) for constructing bridge across Los Angeles River at 7th St.: (*a*) Robt. Beyrle, (*b*) Union Iron Wks., (*c*) C. Leonardt, (*d*) Atlantic Gulf & Pacific Co., (*e*) Mercereau Bridge & Construction Co., (*f*) Burrell Bridge & Construction Co., (*g*) Cotton Bros. & Co., (*h*) Thomson Bridge Co., (*i*) Pacific Construction Co., (*j*) Melville Sheldon.

**Concord, N. C.*—John A. Cline, Chmn. Co. Comrs., writes that the contract for grading and macadamizing about 10 miles of public road from Concord to Kannapolis, also about one mile on the Concord and Charlotte road (bids opened Oct. 24), has been awarded to J. Thos. Bennett, of Danville, Va.

Wilmington, N. C.—C. R. Humphreys, City Engr., writes that the citizens have voted to issue $400,000 bonds for street improvements.

Lakewood, O.—Bids will be received until Nov. 18 by B. M. Cook, Village Clk., for furnishing material and paving portions of five streets. Mm. H. Evers, Engr. Co., Engrs., 237 The Arcade.

Youngstown, O.—The City Council is reported to have passed a resolution providing for the paving of a portion of Marshall St.

Norwood, O.—It is stated that bids will be received until Nov. 16 by the Bd. Pub. Service (L. H. Gebhart, Clk.) for grading, macadamizing and constructing concrete curb and gutters in a portion of Warren Ave. J. B. Stewart, Engr., 712 Traction Bldg., Cincinnati.

Lima, O.—It is stated that bids will be received until Nov. 12 by the Bd. Pub. Service (L. L. Crumrine, Secy.), for sewering, curbing and macadamizing a portion of N. Jefferson St.

Bids will be received, it is stated, by Fred. C. Beam, City Aud., until Nov. 25 for $25,000 N. Main and S. Metcalf St. paving bonds.

**Cincinnati, O.*—The Kirchner Constr. Co. 8th and Plum Sts., is reported to have secured the contract for repairing asphalt pavements, at $7,500.

Ashley, Pa.—The Wilkes-Barre Constr. Co. is reported to have submitted the only bid for paving with brick a portion of Main St., at $11,850.

Philadelphia, Pa.—See "Water."

Lancaster, Pa.—Bids will be received until Nov. 21 by Jos. Hunter, State Highway Comr., Harrisburg, for constructing 2 sections of road in East Hempfield Township, Lancaster County, one 14,315 ft. long and the other 5,287 ft. long.

Media, Pa.—Bids will be received until Nov. 12 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 6,427 ft. road between Chester and Aston Township, Media.

El Pasa, Tex.—The Texas Bitulithic Co. is reported to have secured the contract for paving a portion of Magoffin Ave., at $1.87½ per sq. yd.

Manassas, Va.—O. E. Newman, Chmn. Improv. Com. of Council, writes that the Street Com. will macadamize the streets by day's work, at a cost of $5,000.

Ft. Myer, Va.—Bids will be received by Capt. B. B. Hyer, Constr. Q. M., U. S. A., until Nov. 25 for the construction of a roadway leading to quartermaster's shop, as advertised in The Engineering Record.

Bellingham, Wash.—Geo. Gerhard, City Engineer, is reported to have estimated the cost of improving a portion of 14th St., at $8,512.

Ft. Flagler, Wash.—Bids will be received until Nov. 26 by Lieut. John C. Henderson, Q. M., U. S. A., for clearing and grading a roadway 3,575 ft. long to connect with county road, at this post.

Seattle, Wash.—Bids will be received by the Bd. of Pub. Wks. (C. B. Bagley, Secy.) until Nov. 26 for paving alley in Block 21, C. D. Boren's addition, with sandstone blocks; estimated cost, $2,800; grading and concrete walks on 19th Ave., N. W.; estimated cost, $8,654; grading and regrading Roanoke St. and constructing concrete sidewalks with necessary sewers; estimated cost, $15,000, and grading, curbing and constructing concrete walks on W. 85th St.; estimated cost, $8,400.

The only bid received and opened on Oct. 29 for grading, etc., Lakeside Ave., was submitted by Holt & Jeffery, as follows: Fixed estimate, $500; celaring and grubbing, sum, $3,000; earthwork, 45,000 cu. yds., 15 cts.; curbs and gutters, 22 M. ft., $24; catch basins, 2 inlets, ea., $80; 3 catch basins, 1 inlet, ea., $70; inlet, $30; 6 manholes to be constructed, ea., $50; total cost, $11,398.

The lowest bid opened on Oct. 29 for paving Madison St. with sandstone block was submitted by Hans Pedusa, 501 Fairview Ave., for $5,794.

*Contracts have been awarded as follows: To Rich-Harris Constr. Co., Seattle, for concrete walks on Kilbourne St., for $13,533, and to the Independent Asphalt Paving Co., Pioneer Blk., paving Boylston Ave. with asphalt, $7,234.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Jackson, Ala.—B. H. Warren, of Jackson, Pres. Jackson Light & Power Co., writes that bids will probably be received about Dec. 1 for the construction of dam across creek near Jackson. The company was recently formed to construct water works, electric light plant and street railway. Engineer, T. W. Nicol, of Mobile.

Imboden, Ark.—The Arbuckle Mining & Milling Co. is reported to have decided to construct a dam to develop 800 h. p. for electric purposes.

San Rafael, Cal.—It is reported that petitions will soon be filed by the Snow Mountain Power Co., with the Trus. of San Rafael, Mill Valley, San Anslemo, Sausalito and Belvedere for a franchise to construct power lines. The plan is to construct a sub-power plant in Marin County to supply the various towns. Ex-Senator Chas. N. Felton is one of the principal stockholders in the new concern.

Oakland, Cal.—E. M. Downer, of Pinole, Cal., is reported to have petitioned the Supervisors of Alamedo County for a franchise to construct an electric light plant and supply electricity in Alamedo County.

Sonora, Cal.—The Consolidated Stanislaus Water & Power Co. is reported incorporated, with a capital of $1,000,000. Directors: C. T. Tullock, R. R. Bigelow, W. B. Cadman and others, all of San Francisco.

**Savannah, Ga.*—Later reports state that the Savannah Electric Co. (M. L. Sperry, Mgr., Savannah) secured the contract for lighting the city (bids opened Oct. 15).

Columbus, Ga.—Charles E. Main and John E. Porter, consulting engineers of the Stone-Webster syndicate of Boston have been here and made an inspection of the power house at the City Mills, with a view to making improvements to increase the capacity of that plant, which is leased by the Columbus R. R. Co. They also inspected the water power plant at the Eagle and Phenix Mills, which are also to be greatly improved.

Moscow, Idaho.—H. H. Robinson, City Clk., writes that the question of constructing municipal power and lighting plant has been discussed by City Council, but nothing definite has yet been done.

Pocatello, Idaho.—The Idaho Consolidated Power Co., of Pocatello, Idaho, with a capital of $2,000,000, is reported to have absorbed the American Falls Power, Light & Water Co., the Pocatello Electric Light & Power Co., and the Blackfoot Power & Water Co. The plans include development of 50,000 h. p. at American Falls and transmission of electrical energy to surrounding towns; 2,500 h. p. is now being generated at American Falls, and an additional 4,000 can be placed on the wires inside of 60 days. Jas. H. Brady, of Pocatello, will be president of the new comuany.

Ft. Wayne, Ind.—Articles of incorporation are reported filed by the Ft. Wayne Power Co. for the purpose of establishing and equipping a plant to manufacture and distribute electric current for mechanical power and commercial purposes. Fred H. Schmidt, F. H. Cutshall, L. M. Morris and others, Directors.

Indianapolis, Ind.—The Citizens Gas Co. recently organized, is reported to have purchased mains of the Consumers' Gas Trust Co., and will proceed at once to construct and equip an artificial gas plant. Geo. Vonegut, Pres.; J. D. Forest, Secy.

Evansville, Ind.—It is reported that bids will be received until Nov. 16 (readvertisement) by the Bd. of Co. Comrs. for wiring the new County Infirmary building. Harry Stinson, Co. Aud.

Davenport, Ia.—The J. C. Settle Constr. Co., of St. Louis, Mo., are reported to have secured the contract for constructing a power building for the Independent Light Co. It will be of concrete block, 100x118 ft.

**Leavenworth, Kan.*—F. E. Newherry & Co., St. Louis, Mo., are reported to have secured the contract for the addition to the electric plant at the Federal Prison, at $8,126.

Grand Haven, Mich.—This city will shortly ask for bids for furnishing one 150-kw., 2-phase, 2300-volt alternator; one 220-h.-p. engine for direct connection to this alternator; a series alternating-current series enclosed type arc lighting system, complete with switchboard and 100 alternating-current series enclosed type arc lamps. F. W. Weber, Supt.

Calumet, Mich.—The stockholders of the Calumet Gas Co. are reported to have decided to increase its capital from $1,000,000 to $1,500,000, and propose making additions to the plant.

Allegan, Mich.—Fred. Littlejohn and associates are reported to be asking for a franchise to construct and operate an electric power plant here.

Columbia, Miss.—The Columbia Ice & Power Co. is reported incorporated, with a capital of $60,000, by G. W. Grayson and Lee Elder, both of Biloxi; L. A. Lundy, of Ocean Springs, and others.

Maysville, Mo.—Burns & McDonnell, Scarritt Bldg., Kansas City, have prepared preliminary estimates for the construction of an electric light plant for Maysville, to cost about $10,000. Bonds have not yet been sold.

Scotts Bluff, Neb.—L. L. Raymond, City Secy. and Attorney, writes that J. C. Cain is interested in the construction of an electric light plant here, to cost abont $10,000.

St. Paul, Neb.—The citizens are reported to have voted to establish an electric light plant.

Wood River, Neb.—D. D. O. Kane, Village Clk., writes that bids will be received about Jan. 15 for the construction of water works and an electric light plant, to cost $17,000. Engineer not yet selected.

Newark, N. J.—The citizens on Nov. 5 voted in favor of constructing a municipal electric light plant for lighting the streets; probable cost, $1,000,000.

Alpha, N. J.—The Alpha Cement Co., with main offices in Easton, Pa., is reported to be arranging to construct a power plant along the Pennsylvania side of Delaware River, near Foulrift, next spring. The plans are for the building of a canal 40 or 50 ft. wide and 3 miles in length, for the generation of electricity for the operation of its mills.

Atlantic City, N. J.—The City Council, on Oct. 29, passed the bill appropriating $35,000 for the installation of a new system of illumination for Atlantic Ave.

Fulton, N. Y.—The Fulton Light, Heat & Power Co. will install immediately generators, switchboard and belts. L. W. Emerick, Vice-Pres. and Gen. Mgr.

Holley, N. Y.—The franchise for laying pipe in Holley for the purpose of furnishing gas for light, fuel and power purposes is reported to have been granted by the Village Bd. to John F. Brush and Wm. McBain. The gas is to be manufactured at Brockport and supplied to Holley either from a gasometer, which will be erected here, into which the gas will be forced and stored, or direct from Brockport under high pressure, a pressure registering device being supplied with each service. The work of laying the pipes must begin not later than July 1, 1908.

Brocsport, N. Y.—See "Public Buildings."

Newport, N. Y.—The Public Service Com. at Albany is reported to have authorized the Newport Electric Light & Power Co. to construct lines in the Town of Newport and in the village of Poland. It also authorizes the company to issue a mortgage to secure the payment of 30-year bonds, amounting to $75,000, the proceeds to be used for retiring $15,000 of bonds outstanding and the balance for construction and equipment.

Utica, N. Y.—The Public Service Comn. at Albany is reported to have granted permission to the Utica Gas & Electric Co. to operate the franchises granted by the village of Frankfort and the towns of Frankfort, German Flatts and Little Falls, and to commence construction under them.

Pittsburg, Pa.—The Select Council is reported to have adopted a resolution authorizing the Dir. of Pub. Wks. to prepare an estimate of cost of establishing a system of conduits in the principal thoroughfare of the city for telegraph, telephone and electric wires.

Cresson, Pa.—The Cresson Electric Light Co. is planning to install a 60-kw., alternating-current, 1100-volt, 133-cycle generator in its plant, and is also contemplating the establishment of a day service beginning Jan. 1. J. F. Marsteller, Gen. Mgr.

**Philadelphia, Pa.*—We are informed that the following is the detailed bid of the D'Olier Eng. Co. 121 S. 11th St., the successful bidder for the electrical equipment for the Torresdale filter plant, bids for which were opened on Oct. 22 by the Dept. of Pub. Wks., Bureau of Water: 3,000 cu. yds. excav., 60 cts.; 17 manholes, ea., $140; 45,000 duct. ft. terra-cotta conduits, 6 cts.; laying 47,275 duct. ft. terra-cotta conduits, 15 cts.; 500 lin. ft. sewer connection to manholes, 30 cts.; underground cable equipment, complete, lump sum, $24,322; incandescent lighting equipment, complete, lump sum, $27,465; arc lamp equipment, complete, lump sum, $7,324; watchman's signal system, complete, lump sum, $2,250; total, $77,002. Totals of other bids: Penna. Electric Equipment Co., 1202 Race St., $85,346; the Mack Paving Co., 2032 Land Title Bldg., $83,327; Walker & Kepler, 531 Chestnut St., $85,275, and J. F. Buchanan & Co., 36 No. 4th St., $90,802.

Spartanburg, S. C.—The Southern Power Co. (W. S. Lee, Jr., Ch. Engr., Charlotte, N. C.) is reported to be preparing plans for a steam-electric plant, to be constructed near Spartanburg, to have a capacity of about 50,000 h. p. and cost about $2,000,000. It is stated it will be built in sections, work to commence next year.

Sioux Falls, S. D.—The Sioux Falls Light & Power Co. contemplates rebuilding its entire plant, developing water power to the extent of 1,200 h.-p. H. M. Byllesby & Co., of Chicago, Ill., are the engineers.

Charlotte, Tenn.—This city is reported to be considering the issue of $5,000 bonds for the construction of an electric light plant.

Alexandria, Va.—See "Water."

Richmond, Va.—Local press reports state that new bids will probably be asked for the rehabilitation of the city gas plant.

Roanoke, Va.—The Roanoke Water Power Co. is planning to install a 1000-kw. steam turbine to be used as an auxiliary to its water power plant next spring. R. E. Camp, mgr.

Tacoma, Wash.—Beall Foster, of the Foster Lumber Co. proposes installing electrical machinery to supply electric light for a community of about 1,000 houses, and would like to receive estimates for cost of furnishing equipment.

Pardeeville, Wis.—The Fox River Milling & Power Co. is planning to extend its lines and establish a 24-hour service. Myron L. Aldrich, mgr.

**Winnipeg, Man.*—The following contracts are reported recommended for award in connection with the construction of the general works, and for the supply and erection of the various portions of the equipments for the Hydro-Electric Works and station at Point du Bois, for a transmission line between Point du Bois and Winnipeg, and for a receiving transformer station in Winnipeg (bids for which were opened by the Bd. of Control on Oct. 1): Telephone system, J. Y. Hyland & Co., $24,840; general work at Point du Bois, Robinson, Pratt & Ryckman, including possible contingencies, $862,000; generators, exciters and induction motors, Swedish General Electric Co., $145,000; low and high tension electric equipment, Canadian Westinghouse Co., $382,000; steel towers, Naylor Bros., $99,000; insulators, Lima Insulator Co., including estimated cost of inside insulators, $18,500; transmission cable, Northern Aluminum Co., $180,000; auxiliary appliances, Canadian Fdy. Co., Allis-Chalmers-Bullock Co., Canadian Fairbanks Co., including estimated cost of oiling system, $35,000; repair shop equipments, Canadian-Fairbanks Co., $6,715. Total, $1,753,055.

It is further reported that bids received on the turbines, terminal station, protective appliances, electric cranes, turbine generators and governors were not recommended for award, and will probably be readvertised. No bids were received on the erection of the line, estimated to cost $104,400; clearing of remainder of transmission line, estimated cost, $12,500, and bridge, estimated cost, $15,000. M. Peterson is Secy. Bd. of Control.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

San Diego, Cal.—It is stated that the San Diego Electric Ry. Co. contemplates erecting machine shops, car shops and extending the trackage.

Merced, Cal.—Articles of incorporation of the Sierra Nevada Electric Co. are reported filed by H. E. Huntington, Wm. Kerckhoff, A. C. Balch, of Los Angeles, and J. S. Eastwood and Frank H. Short. Capital, $1,000,000.

Trinidad, Colo.—It is stated that Trinidad Electric

**Items marked thus give the names of parties awarded contracts.*

R. R. Co. proposes constructing an extension from Sparis to Cokedale. G. L. Horton, Gen. Mgr.

Bristol, Conn.—The Railroad Comrs. are stated to have approved the extension of the line of the Bristol & Plainville Tramway Co. to Terryville.

Chicago, Ill.—The Chicago, Fox Lake & Lake Geneva R. R. is reported incorporated to construct an interurban electric railroad from Chicago to Lake Geneva, with branches to Fox Lake and Woodstock. Capital, $2,000,000. Incorporators: Geo. M. Seward, Sidney F. Malette, Lewis E. Starr, Maurice B. Louis and others.

Belleville, Ill.—The Belleville & Interurban Ry Co. is reported incorporated to construct an electric railway from Belleville to Smithton. Capital, $100,000. Incorporators: Jacob Gundlach, Jr., Benj. H. Gundlach, R. W. Hofsommer, Geo. Hippard and Thos. A. Bell.

Murphysboro, Ill.—The Murphysboro & Interurban Ry. Co. is reported organized to build in and around Murphysboro and to Carbondale. A. B. Minton, Willard Wall, W. C. Alexander and others are reported interested.

Evansville, Ind.—It is said that the Evansville & Southern Indiana Traction Co. is to build an electric railway in the northeastern part of Evansville. R. H. Cole, Ch. Engr.

Indianapolis, Ind.—The Grand Central Traction Co. is reported to have petitioned for a franchise to construct an electric railway from Indianapolis to Evansville, with a branch from Terre Haute to Bloomington. G. C. M. Shanks is reported interested.

Plymouth, Ind.—It is stated that the Logansport & South Bend Traction Co. has secured a franchise to enter Plymouth. According to reports contracts will soon be let for constructing the line from Plymouth to Logansport.

Muncie, Ind.—The Logansport & Marion Traction Co. (A. J. Jenkins, Ch. Engr.) is reported to have announced that contract will soon be let for constructing an electric railway from Muncie to Logansport.

Cedar Rapids, Ia.—The construction of an interurban railway from Cedar Rapids to Tipton and Davenport via Muscatine is reported contemplated. Jas. H. Collins is said to be interested.

Sioux City, Ia.—Articles of incorporation of the Sioux City & Spirit Lake Ry. Co. are reported filed with the Secy. of State. Capital stock, $50,000. The object is the construction, equipment and operation of a line of railroad from Sioux City in a northeasterly direction via Hartley to Spirit Lake, Ia.; the said line may be operated either by electric, gasoline or steam power. Incorporators: J. F. Conn, G. E. Kusack, D. A. Fletcher, Geo. Coleman and Frank Patch.

Negaunee, Mich.—The Marquette County Traction Co., of Ishpeming, is reported to have in contemplation the expenditure of $20,000 for the improvement of tracks and new power machinery.

Moorehead, Minn.—The Northwestern Interurban Ry. Co. is reported incorporated, with a capital of $1,500,000, to construct an electric line from Moorehead to Detroit Lake. Incorporators: H. O. Coughlan, S. A. Anderson and John R. Turner.

St. Louis, Mo.—The Carondeles & Western Groves R. R. Co. is reported incorporated with a capital of $200,000 to construct a line from St. Louis to Webster Groves, a distance of 8 miles. Willard E. Winner and J. G. Hughes are reported interested.

Hamilton, N. Y.—F. K. Baxter, of Utica, is now at work on map and profile of an electric railway proposed between Hamilton and Norwich.

Asheville, N. C.—It is said that preliminary surveys have been made and the right-of-way secured for the proposed electric railway between Asheville and Hendersonvill. J. D. Murphy, Pres.; C. F. White, Treas.

Oklahoma, Okla.—The Oklahoma-Southwestern Interurban R. R. Co. is reported chartered to build 190 miles of road from Oklahoma City to Hollis, at a cost of about $10,000 per mile. Incorporators: M. W. Curry, of Eaton, O., and J. N. Street, of Bloomington, Ill.

Donora, Pa.—It is stated that the Donora & El Dorado St. Ry. Co. has secured right-of-way for an electric line to connect Donora and El Dorado. Incorporators: B. Allen, Monongahela, and J. A. Sprowls, of Donora.

Sykesville, Pa.—A charter is stated to have been granted the United Traction Extension Co., with a capital of $100,000. The company has decided to construct a line from Sykesville to Big Run. Directors: Austin Blakeslee, J. D. Sykes, Frank Hahne, J. E. Merris and others.

Tarentum, Pa.—The Butler, Saxonburg & Tarentum Ry. Co. is reported chartered to construct an electric railway 24 miles long, extending from Allegheny through Tarentum to Saxonburg and Butler. Capital, $50,000. Directors: Jos. Cirigliano, Emil T. Rudert, E. C. Rudert, all of Saxonburg, and others.

Harrisburg, Pa.—The Lewisberry & Strinestown St. Ry. Co. it reported to have secured the right to build an extension from near New Market to Harrisburg via New Cumberland. The Susquehanna River will be bridged at New Cumberland. This will be the final link in the proposed system connecting Harrisburg and York by electric railway, the new company connecting below New Market with the York County system and at Harrisburg with the Central Pennsylvania Traction and Valley Traction systems of over 100 miles of line. The surveys have been completed and the plans call for a high-speed line. David Pepper, Jr., of Philadelphia, Pres.

Covington, Tenn.—The Memphis, Covington & Northern Electric Ry. Co. is stated to have applied for a charter to construct an electric railway between Memphis and Covington. Capital $14,000. G. B. Gillespie and John F. Garner are reported interested.

Houston, Tex.—The Commissioners are stated to have granted the Houston Electric Co. a franchise, permitting the company to extend its lines to a point near Harrisburg.

Onalaska, Wis.—The La Crosse & Winona Electric Ry. Co., of La Crosse, is stated to have applied to Onalaska for a franchise for a street railway through the city.

Appleton, Wis.—The Fox River Valley Interurban Co. is reported to have announced that all surveys for the interurban line from Fond du Lac around the east shore of Lake Winnebago to Kaukauna and Appleton have been completed and that construction work will be begun early next spring. The cost of the new line will be $600,000. John S. Seaman, of Sheboygan, Pres.

Port Colborne, Ont.—It is stated that plans of the proposed Niagara Peninsula Ry. Co. have been filed with the Ontario Ry. and Municipal Bd. and certified by that body. The line will run from Port Colborne through the Townships of Humberstone and Wainfleet.

RAILROADS.

Notes Arranged Alphabetically by States.

Chicago, Ill.—The Chicago & East St. Louis Short Line Ry. is reported incorporated, with a capital of $50,000, and with principal offices at Chicago, to construct a steam railway between Chicago and East St. Louis, and the incorporation papers state that the road is to run through Madison, Montgomery, Christian, Macon, DeWitt, McLean, Livingston, Kankakee and Will Counties. It was also stated that construction would be begun at the Chicago end of the line. The Osterman Company, of West Pullman, is deeply interested in the project. Incorporators: H. C. Osterman, Wm. M. Drennan, Treas. of the Osterman Mfg. Co.; H. C. Dolph, of B. Nicoll & Co., iron merchants; Thomas W. Flynn, attorney, and Wm. Anderson, in charge of the lumber department of the Pullman Co.

Coffeyville, Kan.—The promoters of the Coffeyville & Memphis R. R. Co. are reported to have signed a contract with the citizens of Vinita, I. T., by which the citizens agree to pay a $25,000 bonus if the road builds through that city. The Coffeyville & Memphis was chartered early this year to build southeast from Coffeyville, Kan., through the coal fields of Ind. Ter. and Arkansas to Memphis, Tenn. A branch line is provided in the charter to build from Coffeyville south to Shawnee, Okla.

Stockbridge, Mass.—The New York, New Haven & Hartford R. R. Co. (E. Gagel, Ch. Eng., New Haven, Conn.), is reported to have decided to abolish the grade crossing south of the railroad station in Stockbridge; total cost of the changes to be bet. $50,000 and $60,000.

Rochester, N. Y.—The Buffalo, Rochester & Eastern R. R. Co. is reported incorporated and is making preparations to apply for a certificate and charter from the Public Service Comn. The route selected parallels the New York Central lines at an average distance of 20 miles, passing from Troy, through the city limits of Albany, thence south of Schenectady, through Rome, Utica, Syracuse, Rochester, Batavia, to Buffalo, Tonawanda and Suspension Bridge. The motive power of the road will be steam and it will be double track all the way. Incorporators: Jas. A. Bryan, Westfield, Mass.; Fred T. Ley, Springfield, Mass.; A. W. Eaton, Pittsfield, Mass.; Franklin Weston, Dalton, Mass.; Jos. Skinner, Holyoke, Mass., and others.

Asheville, N. C.—The citizens of Buncombe County are reported to have voted Oct. 29 to issue $200,000 bonds in aid in constructing the new Appalachian R. R.

Oklahoma City, Okla.—A charter has been granted to the Oklahoma, Mexico & Pacific R. R. Co., with headquarters at Oklahoma City, and with $500,000 capital stock, to build a 200-mile line southwest from Oklahoma City across the counties of Oklahoma, Canadian, Caddo, Washita, Kiowa and Greer to Hollis, at an estimated cost of $35,000 per mile. Incorporators: Jos. E. Kirkes, T. H. Lindley and O. S. Rice, of Oklahoma City; J. M. and F. D. Kroeger, of Guthrie.

Lawton, Okla.—J. M. Bellamy, of Lawton, Pres. Lawton, Wichita Falls & Northwestern R. R. Co., writes that bids will be received until Nov. 10 for grading 7 miles of road; cost, about $8,000 per mile. Engineer, A. J. Robinson, of Frederick.

Nashville, Tenn.—At a meeting of local capitalists on Oct. 25 it was decided to at once charter the Tennessee Western R. R. Co., with a capital of $3,000,000, and put engineers in the field to make a preliminary survey. The road is planned to connect with the Nashville & Huntsville at some point in Giles County and then run through Giles, Lawrence, Wayne, Harding, McNairy and Hardeman Counties to a connection with Illinois Central at Bolivar, Tenn.

Bristol, Tenn.—Application has been filed with the Secy. of State for the Bristol & Kingsport Ry. Co., which proposes constructing a line. The route is from Bristol to Blountville and Kingsport; Ex-Gov. John I. Cox, Jas. B. Cox, F. Percell, all of Bristol, are the incorporators. The new line will connect with the Southwestern at Kingsport and the Holston River Railway and the Virginia & Southwestern Railway at Moccasin Gap, Va.

Radford, Va.—A charter has been granted to the Radford & Carolina Ry. Co. to build and operate a steam railroad from Radford, Va., to the North Carolina line, through the counties of Patrick, Floyd, Carroll, Pulaski and Montgomery. Incorporators: J. Hoge Tyler, of Radford; J. J. Mott, Statesville, N. C.; R. L. Jordan, Radford, and others.

Guernsey, Wyo.—The Chicago, Burlington & Quincy R. R. Co. (G. W. Holdredge, Gen. Mgr., Omaha, Neb.), is reported to have decided to build across the State of Wyoming to connect its Guernsey line with the line recently built from Frannie to Worland, near the Yellowstone National Park. The surveys have been completed and the reports of the engineers received, but it has not yet been decided when the work will begin. The line will be 170 miles long.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Little Rock, Ark.—The Bd. of Directors of the Methodist Orphanage, it is reported, proposes erecting a $20,000 building.

Napa, Cal.—An appropriation of $35,000 has been made by the legislature with which, it is stated, a treatment ward building is to be erected at the Napa State Hospital.

**Redondo, Cal.*—J. T. Atkinson, of Los Angeles, it is reported, has secured the contract to erect the city hall at $25,787.

**Denver, Colo.*—F. F. Adams, of Denver, has secured contract for an extension to the U. S. Post Office (bids opened Oct. 18) for $13,250.

Washington, D. C.—Bids will be received until Nov. 27 by Elliott Woods, Supt. U. S. Capitol Bldgs. and Grounds, for steel framing for roof of office building, U. S. Senate. Plans and specifications may be had upon a deposit of $25.

Atlanta, Ga.—The following are the bids opened on Oct. 30 at the office of Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., for the construction, including plumbing, of U. S. Post Office and Court House at Atlanta, Ga.; (*a*) for marble, (*b*) deduct if granite is used, (*c*) deduct if limestone is used: Chas. McCane Co., Philadelphia, Pa., *a* $869,000, *b* $31,000, *c* $85,000; Miles & Bradt, Atlanta, *a* $992,000, *b* $59,000, *c* $170,000; Conners Bros. Co., Lowell, Mass., *a* $936,241, *b* $29,800 *c* $139,000; Gude & Walker, Atlanta, *a* $997,000 *b* $29,000, *c* $150,000; Cramp & Co., Philadelphia, Pa., *a* $954,000, *b* $37,300, *c* $149,400; F. F. Nesbit, New York, N. Y., *a* $1,032,000, *b* $37,490, *c* $143,800; Henry Smith's Sons, Baltimore, Md., *a* $988,100, *b* $49,000, *c* $130,000.

East St. Louis, Ill.—The following are the bids opened on Oct. 28 at the office of the Super. Archt., Treas. Dept., Washington, D. C., for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring) of U. S. Post Office and Court House at East St. Louis: Hiram Floyd Bldg. Co., St. Louis, Mo., $213,305; C. L. Grey Const. Co., St. Louis, Mo., $239,300; Gedney Lumber & Mfg. Co., E. St. Louis, $238,791; A. B. Stannard, New York, N. Y., $227,000; I. H. Wiese, S. Omaha, Neb., $221,890, and Cramp & Co., Philadelphia, Pa., $222,960.

Chicago, Ill.—The lowest bid opened on Nov. 6 at the office of the Superv. Archt. Treas Dept., Washington, D. C., for painting U. S. Post Office was submitted by O'Brien Bros., of Chicago, for $22,000.

Chicago, Ill.—Bids are wanted until Nov. 12 for erecting a boathouse for the Illinois Naval Reserve, at Chicago. W. Carbys Zimmerman, State Archt., 1101 Steinway Hall.

South Bend, Ind.—Bids will be received until Nov. 15 by the Bd. Pub. Wks. (W. A. McInerney, Pres.) for erecting a brick hose house.

Terre Haute, Ind.—It is reported that all bids received Oct. 30 for erecting a jail have been rejected, as they exceeded the amount available, which is $75,000. The County Council, according to later reports, has appropriated an additional $50,000, making $125,000 available.

**Pittsfield, Mass.*—The contract to erect the armory on Summer St. is reported awarded by the State Armory Comrs. at Boston, as follows: Construction to Richardson & Burgess, of Boston, at $43,997; plumbing to Sullivan & Carnody, of Holyoke, at $1,725, and heating to Robbins & Gamwell, of Pittsfield, at $2,722.

Lowell, Mass.—The Council, it is reported, has appropriated $20,000 for fire station in the Centerville suburb.

Worcester, Mass.—The following are reported to be the bids opened on Oct. 30 for the erection of the Worcester Armory: Central Bldg. Co., $48,950; A. T. Robbins, $46,800; J. M. & C. J. Buckley, $46,150; J. D. O'Brien, $45,980; E. D. Ward, $44,940; Ed. J. Cross, $37,629; Jas. Miles & Son, 33 Merrick St., $37,277; F. W. Mark, 1 Benefit Terrace, $36,719. Reports state that new specifications are to be drawn and new bids asked.

Ann Arbor, Mich.—Bids will be received until Dec. 23 by Jas. Knox Taylor, Superv. Arch., Washington, D. C., for the construction (complete) of the U. S. Post Office at Ann Arbor.

Saginaw, Mich.—W. S. Linton, John L. Jackson and E. L. Hardwick are reported appointed as trustees for the auditorium which is to be erected at a cost of about $100,000.

Flint, Mich.—The following are the bids opened on Nov. 5 at the office of the Superv. Archt. Treas. Dept., Washington, D. C., for the construction (complete) of the U. S. Post Office at Flint: Chas. Hoertz & Son, Grand Rapids, $85,423; Geo. Richmond's Sons, Kalamazoo, $74,900; Ed. Henry, Tipton, Ind., $73,000; W. I. McAlpine, Dixon, Ill., $72,700; Gen'l. Constr. Co., Milwaukee, Wis., $87,000; Northern Constr. Co., Milwaukee, Mo., $82,000; E. W. Reid & Co., Detroit, $82,900; Trunchtel & Schurman, Saginaw, $73,839.

St. Paul, Minn.—The erecting of a new wing at the City and County Hospital (Dr. A. B. Decker, Supt.), to cost about $120,000, is reported under consideration. Clarence H. Johnston, Manhattan Bldg., is the archt.

**Warren, Minn.*—The Co. Comrs. it is stated have authorized the Co. Comrs. to accept the bid of the Pauly Jail Bldg. Co., St. Louis, Mo., for jail cells, at $3,217.

Faribault, Minn.—Albert Schippel, of Mankato, is reported to have been engaged to prepare plans for a hospital which is to be erected here by the German Evangelical Synod of North America. Probable cost, $40,000.

Houston, Miss.—The Bd. of Superv. of Chickasaw Co., it is stated, has ordered an issue of $65,000 bonds to erect a court house and will consider plans at its Nov. meeting.

St. Louis, Mo.—Bids will be received until Nov. 15 (re-advertisement) by the Bd. Pub. Improv. (A. J. O'Reilly, Pres.) for furnishing material and rebuilding the east wing of the main building of the City Poorhouse, known as Bldg. No. 1; estimated cost, $25,000.

Leeds, Mo.—It is reported that at the meeting of Dr. Robt. O. Cross, Pres. of Jackson County Society for the Prevention of Tuberculosis, Mayor Beardsley, City Physician Sanders and the Council Sanitary Com. it was decided to erect at Leeds the tuberculosis hospital which Kansas City intends building. The cost of the building is to be about $20,000, of which the Jackson County Society will contribute $10,000.

Breesport, N. Y.—Bids will be received until Nov. 12 by Frank J. Gordon, Clk. Bd. Superv., at Elmira, for additions and alterations at the County Farm Buildings, at Breesport, including steam heating, electric light

**Items marked thus give the names of parties awarded contracts.*

plant and gas lighting. J. H. Considine, Archt., 323 Carroll St., Elmira.

Remsen, N. Y.—Bids will be received until Dec. 7 at the office of Walter G. Frank, Archt., 17 Clarendon Bldg., Utica, for erecting the Didymas Thomas Library at Remsen.

**Watervliet, N. Y.*—It is stated that the contract to erect a shop and stock room at the Arsenal has been awarded to Elmer H. Havens, of Albany. The building is to be of concrete and brick, 50x80 ft.

**Raleigh, N. C.*—W. A. Erwin, of West Durham, Chmn. Bldg. Co. State Hospital, writes that M. Underwood, of Durham, N. C., has secured contract for erecting addition to State Hospital (bids opened Oct. 25).

**Fayetteville, N. C.*—W. Lee Harvey, of Greensboro, is reported to have secured the contract to erect the $35,000 auditorium and market house.

Defiance, O.—Mahurin & Mahurin, of Ft. Wayne, are reported to be preppariug plans for an infirmary to be erected here at an estimated cost of $35,000.

Cleveland, O.—The following are the bids opened on Oct. 31 at the office of the Superv. Archt. Treas. Dept., Washington, D. C., for the Mechanical Equipment (except Elevators) of the U. S. Post Office Custom House and Court House at Cleveland: John Pierce, New York, N. Y., $129,000; L. H. Niehaus, Pittsburg, Pa., $142,550; S. Faith & Co., Philadelphia, Pa., $165,000; E. H. Alodie Co., St. Louis, Mo., $193,974; the Chafer Co., Cleveland, O., $179,162, and John Gill & Co., Cleveland, O., $172,460.
The following are the bids opened same time and place for interior partitions and mason work of U. S. Post Office at Cleveland: John Gill & Co., Cleveland, O., $63,968; John Pierce, New York, N. Y., $59,000, and A. B. Stannard, New York, N. Y., $92,867.

Philadelphia, Pa.—The Lutheran Hospital is reported organized, with Rev. S. D. Daugherty, Pres., and Dr. Luther C. Peters, Secy., for the purpose of erecting a hospital.

Pittsburg, Pa.—The improving of the Municipal Hospital, at a cost of about $150,000, is reported under consideration.

Philadelphia, Pa.—See "Water."

**Knoxville, Tenn.*—Brinner & England Bros., of Knoxville, are reported to have secured the contract to erect the city stables, 2-story brick, at a cost of $12,000.

Nashville, Tenn.—Bids will be received until Nov. 27 by Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., for the construction (including heating apparatus, electric conduits and wiring), of a new mailing platform and for miscellaneous betterments at the U. S. Custom House and Post Office at Nashville.

Wichita Falls, Tex.—It is reported that plans are being prepared for a city hall and jail, to cost $12,000.

Seattle, Wash.—The Sisters of Providence, according to reports, will erect a hospital at 17th Ave. and Jefferson St., at a cost including site of about $800,000.

Madison, Wis.—The Capitol Bldg. Com., it is reported, decided on Oct. 29 to build the separate heating plant for the State House next year. It is stated that bids will be asked at once for the tunnel which is to be constructed between the heating plant and the capitol, a distance of 5 blocks, and will award the contract Dec. 18. Geo. B. Post, of New York, N. Y., is reported to be preparing plans for the heating plant and as soon as plans are completed contract for the construction will be let. Storm Bull of the State Univ. is preparing specifications for the boilers and machinery to be used and these plans will be ready for bidders, according to reports, early next year.

Green Bay, Wis.—The Bldg. Com. of the Bd. of Superv., it is reported, has decided to recommend to the Bd. of Superv. at its meeting on Nov. 12 the plans of C. E. Bell, of Minneapolis, Minn., for the Court House, and those of Foeller & Schober, Fox Blk., for the jail.

**Dover, N. J.*—The citizens have voted an additional $30,000 for erecting the high school and contracts for its construction are reported awarded as follows: (Bidders of Dover unless otherwise stated): O'Donnell & McManiman, Newton. masonry, $23,000; A. L. Shoemaker, carpenter work, $22,412; J. T. Kerr & Co., heating and ventilating, $12,995; J. T. Kerr & Co., plumbing, $3,095; Rich. P. Ward, electrical work, $1,400. J. J. Vreeland, Jr., of Dover, Archt.

Jersey City, N. J.—Bids will be received until Nov. 14 by the Bd. Educ. (Fred Ege, Secy.) for furnishing material and erecting a school on the plot adjacent to School No. 14, on Union St. Bids to be submitted, as a whole or separately, on the following: Masonry, carpentry, plumbing, ventilating and heating, etc.; also erecting fire escapes on Schools Nos. 1, 9, 13, 17, 18, 19, 20, 21, 22, 23 and 26. John T. Rowland, Jr., Archt., 15 Exchange Pl.

El Rito, N. M.—It is stated that bids will be received until Nov. 15 by the Bd. Trus. New Mexico Reform School (Venceslao Jaramillo, Secy.) for the completion of the basement, 2-story and attic of the administration building for above school. I. H. and W. M. Rapp, archts., Trinidad, Colo.

Cincinnati, O.—Bids will be received until Nov. 25 (readvertisement) by Wm. Grautman, Clk. Bd. Educ., for $250,000 school bonds.

New Wilmington, Pa.—It is stated that plans are being prepared for a musical auditorium which is to be erected for Westminster College at a cost of $15,000.

Philadelphia, Pa.—See "Water."

Philadelphia, Pa.—Cope & Stewardson, Achts., 320 Walnut St., according to reports, will invite estimates in a few days on the new building for the College of Physicians, at 22d and Ludlow Sts. The structure will cost about $300,000. They are also said to be preparing plans for an extension to the veterinary college of the University of Pennsylvania at 39th and Spruce Sts.

The directors of the Academy of Science, it is stated, have engaged Wilson, Harris & Richards, Drexel Bldg., to prepare plans for a 3-story 50x130 ft. white marble addition, which it is proposed erecting at a cost of about $125,000.

Jas. H. Windrim, Commonwealth Trust Bldg., is reported to have completed plans for a gymnasium 124x118 ft., to be erected at Girard College. The building is to be of steel, brick, granite and marble 1 story high.

**Lenoir City, Tenn.*—It is reported that the contract to erect a high school has been awarded to Baumann Bros., at $13,500.

Morrison, Tenn.—An administration building, estimated to cost $25,000, it is reported, is to be erected for the Normal and Industrial School. Dr. Judson S. Hill, Pres. Bd. Trus.

Eagle Pass, Tex.—The Attorney General is reported to have approved the issue of $30,000 Independent school dist. bonds.

**San Diego, Tex.*—The School Bd., it is stated, has awarded the contract to erect a school to Albert & Fuess, of Cuero, at an estimated cost of $12,000.

San Angelo, Tex.—The Bd. of Educ., it is stated, proposes erecting a school to cost $30,000.

Cleburne, Tex.—It is stated that bids will be received by John L. Cleveland, Chmn. School Bd., until Nov. 14, for installation of central heating plant for school buildings. Plans on file at office of Sanguinet & Staats, Archts., Wilson Bldg., Dallas.

**Spokane, Wash.*—The following are reported to be the bids received by the Bd. of Educ. Oct. 24 for erecting the North Central High School: J. C. Cunningham, $63,056 (awarded contract); J. B. Sweatt, $72,878, and N. Norman, $77,138.

Milwaukee, Wis.—Frank M. Harbach, Secy. Bd. School Dirs., writes that all bids opened on Oct. 31 for erecting school on Forest Home and 11th Avs. have been re-

****Items marked thus give the names of parties awarded contracts.***

jected and new bids will be called for. Amount available, $100,000.

Galesville, Wis.—The following are reported to be the lowest bids received Oct. 25 for erecting the high school: Construction, G. H. Smith, Viroqua, $29,800; heating, Baker-Niebuhr, of La Crosse, $5,560, and plumbing, $1,597.

Wauwatosa, Wis.—The Bd. of Educ., it is reported, has appropriated $5,000 for a heating plant for the high school.

Toronto, Ont.—It is reported that a site has been secured on which it is proposed erecting new buildings for the Knox College, the cost of site and buildings to be about $500,000. Rev. Dr. John Gray may be able to give further information.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Sheffield, Ala.—We are informed that the Stanford Steel Range Co., of Sheffield, will in the near future erect a plant to manufacture ranges of the Stanford patent, to cost from $100,000 to $250,000, but location of plant has not yet been decided upon.

St. Stephens, Ala.—John R. Markley, of Markley & Miller, of Chicago, Ill., is reported to be interested in a company which proposes constructing a cement plant in St. Stephens. Probable cost, $2,000,000.

Hartford, Conn.—The Hoag Rapid Press Co., 32 Union Pl., are reported to have decided to erect new factory building on Bartholomew Ave.

**Sioux City, Ia.*—Benj. E. Short, of Sioux City, is reported to have secured the contract to erect the main building for the Interstate Brewing Co., at $82,000. The building is to be 5 stories of steel, brick and fire-proof construction. The contract for the bottling house, office building, loading sheds, barns and other small buildings will be let soon. The machinery for the buildings will probably cost $100,000.

Des Moines, Ia.—It is reported that Cohen Bros., 307 E. 3d St., iron and metal dealers, have secured a site on which they propose erecting a steel roller mill costing about $100,0000.

Iola, Kan.—The Iola Portland Cement Co., incorporated in W. Va., is reported to have secured a charter in the State of Kansas on Nov. 1; the company has a capital stock of $4,500,000 and is incorporated to build a cement plant in Iola.

Charlotte, Mich.—F. S. Beach, Gen. Supt. Beach Mfg. Co., mfgrs. of everything for roads, writes that the company has broken ground for a new building of steel construction, 80x200 ft., to be used for structural iron work, and fitted with latest machinery for this class of work, the greaest portion of which is already on hand. Will do its own work and their engineer is drawing plans.

Minneapolis, Minn.—Wm. M. Kenyon, Guaranty Bldg., it is stated, has prepared plans for an addition which it is proposed erecting to the Soo machine shops in Northeast Miineapolis. The addition is to be of brick and stone, 123 x 180 ft. and cost about $65,000. Bids are being received. Thos. Green, Ch. Engr., Minneapolis, St. Paul & Sault Ste. Marie Ry., Minneapolis.

Laurel, Miss.—The Wausau Southern Lumber Co., of Wausau, Wis., is reported to have decided to erect a lumber mill in Laurel to have a capacity of 60,000,000 to 65,000,000 ft. per annum.

Wellsville, Mo.—The International Screen Door Co. is reported to have secured the plant of Burheu & Finley and intends enlarging and erecting new buildings.

Newberry, N. C.—F. N. Martin, Geo. S. Mower and others are reported to have filed articles of incorporation with a capital of $300,000 for the purpose of constructing the Highland Cotton Mill. Edw. R. Hipp and others, it is stated, are considering the erection of another cotton mill.

Cincinnati, O.—It is reported that the Jos. Joseph & Bros. Co., Harrison Ave., dealers in metals, contemplate making extensive improvements at its plant at a cost of about $40,000. The company, it is stated, has retained the Reliance Eng. Co. to prepare plans and supervise the erection of a new power house and installation of new power equipments. The capacity of the plant is to be greatly increased, with the addition of a battery of boilers of 1,000 h. p., new engines, generators and motors for the operation of a direct-drive system. The work will completely modernize the plant and increase its facilities.

The Reliance Eng. Co., according to reports, has been engaged by the Cincinnati Soap Co. to prepare plans for a plant to cost about $150,000.

**Riverpoint, R. I.*—It is stated that the contract to erect the building at Riverpoint for the Warwick Lace Wks. has been awarded to E. K. Watson & Co., of Warren. It is reported that the machinery has been ordered.

Hartsville, S. C.—The Hartsville Cotton Mills will add to its equipment spindles and looms.

Newport, Tenn.—We are informed that the proposed addition of the Crescent Eng. Co. will have about 25,000 sq. ft. of floor space, and it will be built of concrete with steel con. roof. The power plant will have a capacity of 200 to 300 h.p. None of the material has been ordered yet. Plans are not yet ready, but the company will be glad to hear from manufacturers and dealers.

Memphis, Tenn.—See "Miscellaneous."

Spokane, Wash.—Reinhart Martin, John Schnoor and Chas. J. Martin, according to reports, have filed plans in Olympia for the incorporation of the Schnoor Cooperage & Box Mfg. Co., which proposes erecting a general cooperage and box manufacturing plant in Spokane. It is also reported that the company has secured land in Bonners Ferry, Idaho, on which it is proposed erecting a similar plant.

Milwaukee, Wis.—We are informed that the Kurth Brewing Co., of Columbus, Wis., will erect a new plant at Milwaukee, to include a 600,000 bushel malting plant and a 250,000 bushel storage elevator, two 150-h.p. boilers and one 200-h.p. generator.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Baltimore, Md.—All bids opened on Oct. 16 by the Bd. Awards (J. Barry Mahool, Pres.), for the removal and final disposition of garbage, dead aniamls and market refuse of this city from Jan. 1. 1908, until Jan. 1, 1918, have been rejected, and new bids will be received until Nov. 20. J. L. Wickes, Comr. Street Cleaning.

Pittsburg, Pa.—The Council is reported to have on Oct. 28 passed an ordinance providing for the appointment of a consulting engineer in the Bureau of Health to prepare palns for collection and disposal of ashes, rubbish, etc.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Mobile, Ala.—See "Churches and Dwellings."

Mobile, Ala.—The following are the bids opened on Oct. 5 by Maj. H. Jervey, Corps Engrs., U. S. A., for constructing locks and dams Nos. 2 and 3 and lock tender's house on Tombigbee River, Ala.: (*a*) P. H. O'Brien, Anniston; (*b*) Lane Bros. Co., Lynchburg, Va.; (*c*) Engineer's estimate:

Lock tender's house, at Lock No. 3	2,500	3,000	.....

Harrisburg, Ark.—The Comrs. of Poinsett County are reported to be considering the draining of the entire county at a cost of $595,000.

Paragould, Ark.—Press reports state that there are five drainage projects now on foot in Greene County, which, if carried out, will cost about $250,000.

Oakland, Cal.—The City Council has under consideration estimates presented by City Eng. Turner for new wharves, which the city proposes to build by means of a bond issue. Three estimates of cost are furnished for two wharves, 1¼ miles long and 200 ft. wide. The expense for ordinary construction, with creosoted piles and lumber superstructure, will be $1,425,000, for piles protected by concrete cylinders, timber stringers and floor, $5,702,400; for, protected piles and concrete floor, reenforced concrete superstructure, $6,336,000. The cost of dredging, buildings or railroads is not included in the estimate. The bulkhead would cost $54,900. To dredge a slip 300 feet wide to a depth of 25 ft. below water and to dredge a fan-shaped approach to the same depth out of the channel would require approximately the removal of 2,205,000 cu. yds., at a cost of $330,000.

Pesotum, Ill.—It is stated that bids will be received until Nov. 23, by the State Drainage Comrs., of Dist. No. 1 at the office of B. A. Hyatt, Town Clerk, for the construction of a tile drain, the work to be done to consist of the following: 4,200 ft. 16-in.; 3,480 ft. 15-in.; 980 ft. 14-in.; 1,445 ft. 12-in.; 600 ft. 10-in. tile, together with the necessary connections.

Chicago, Ill.—Bids will be received until Nov. 12 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and removing about 5,500 cu. yds. material from the bed of the Chicago River at the south end of Oakley Ave., and to construct about 75 ft. new dock across the south end of Oakley Ave. on the north branch of the Chicago River.

Logansport, Ind.—It is stated that bids will be received until Nov. 12, by the Surv. for the construction of the Jas. T. Braun ditch, in Jackson Township, Cass County.

Ft. Dodge, Ia.—Bids will be received, it is stated, until Nov. 19 by the County Auditor for constructing drainage works in Drainage Dist. No. 30. C. Anderson, Lake City, Engr.

Emmetsburg, Ia.—Bids will be received until Dec. 11 by the Bd. of Superv., at the office of Sim R. Stedman, Co. Aud., Emmetsburg, for constructing work in drainage districts Nos. 6, 12, 16, 18, 19 and 28, for which G. D. McNabb is the engineer, and also for work in Drainage Dists. Nos. 15, 23 and 25, of which Guy. R. Campbell is the engineer. The work includes excavating and tile work.

New Orleans, La.—Bids will be received at the Bureau of Yards and Docks, Navy Dept., Washington, D. C. (Wm. M. Smith, Acting Ch.), until Nov. 23 for an electric freight elevator in Bldg. 6, naval station, New Orleans, La, as per specification No. 1568; est. cost, $4,100.

Springfield, Mass.—See "Sewerage and Sewerage Disposal."

Blue Earth, Minn.—Jesse L. Herring, Co. Aud., writes that J. A. Bachtel, of Easton, Minn.; B. Bieri, of Wells, Minn., and C. H. Garnsey, of Winnebago, have been appointed to arrange plans for the construction of a steel dam at outlet of Walnut Lake.

**Minneapolis, Minn.*—The contract for the dredging at Lake of the Isles is reported to have been awarded to the La Crosse Dredging Co. at 12¾ cts. per cu. ft.

Wheaton, Minn.—Bids will be received, it is stated, until Dec. 3, N. F. Schroeder, Co. Aud., for constructing Sec. 1 of Ditch No. 2.

Madison, Minn.—It is stated that bids will be received until Nov. 18 by A. G. Shogren, Aud., Lac qui Parle Co., at Madison, for constructing judicial ditch No. 1 in Lac qui Parle and Yellow Medicine Counties.

Newark, N. J.—The citizens on Nov. 5 voted in favor of the Lane Dock Bill, under which the Bd. of Works proposes to expend $1,000,000 in the acquisition of water rights and the building of docks along Newark Bay, with a ship canal across the meadows to the uplands as part of the scheme.

New York, N. Y.—A. V. Porter, Archt. for the New York City Ry. Co., has filed plans with Supt. of Pub. Bldgs. of N. Y. City, for protecting against fire the two East Side and West Side car houses of the Metropolitan system, on Lexington ave. and 129 st., and on Amsterdam ave. and 128th st., by equipping them with sprinkler extinguishing plants. Each plant will be supplied with two storage tanks of 25,000 gals. capacity ea. and five pressure tanks, ea. of 7,500 gals. capacity. Large roof houses will be erected to shelter the plants; the improvements are to cost $9,500.

We are informed that all bids opened on Oct. 31 by J. A. Bensel, Com. of Docks, N. Y. City, for furnishing material and preparing for and building a new ferry house for the Staten Island Ferry, at the Manhattan terminal, foot of Whiteball St., Boro. of Manhattan, have been reiected. The following are the bids received: John J. Hopper, $666,333; Phoenix Constr. Co., $714,679, and Post & McCord, $524,900.

**Reading, Pa.*—The following are the bids opened on Oct. 18 by the Bd. of Pub. Wks. for the construction of a subway under the P. & R. tracks at Spring St.: (*a*) Howard E. Ahrens Co., Reading; (*b*) L. H. Focht & Son, Reading; (*c*) Hawman Bros, Reading (awarded contract); (*d*) David Peoples, Philadelphia; (*e*) Mack Paving Co., Philadelphia; (*f*) Jacob Meyer, Reading; (*g*) Jos. O'Reilly, Reading; (*h*) Eastburns & Childs, Philadelphia.

*Items marked thus give the names of parties awarded contracts.

Canton, N. Y.—Bids will be received by the Indian Creek Drainage Comrs. until Dec. 6 for deepening the Van Rensselaer ditch at and near village of Rensselaer Falls, in the town of Canton, as advertised in The Engineering Record. E. M. Townsley, Engr.

Buffalo, N. Y.—Bids will be received until Nov. 19 by the Dept. Pub. Wks. (F. G. Ward, Comr.) for furnishing and installing 2 vertical high-pressure double cylinder, 8 in. x 8 in. reversing engines at the Michigan St. Bridge over Buffalo River.

Ft. Caswell, N. C.—Bids will be received by L. Cravens, Q. M., U. S. A., until Nov. 30 for building creosoted bulkhead here, as advertised in The Engineering Record.

•*Panama.*—The Isthmian Canal Comn. has awarded to the Marion Steam Shovel Co., of Marion, O., the contract for supply 12 steam shovels, at $13,180 each, a total of $158,160 (bids opened Sept. 25). A contract has also been awarded to the Davenport Locomotive Co., of Davenport, Ia., for supplying 4 locomotives at $3,163, a total of $12,652.

•The Newport News Shipbuilding Co., of Newport News, Va., has secured the contract for building 6 steel barges for use in construction work on Panama Canal for $120,000.

Philadelphia, Pa.—See "Water."

Yankton, S. D.—The Comrs. of Yankton and Clay counties are reported to have voted to levy an assessment to raise $20,000 needed to construct the Turkey Valley ditch, near Irene, which will be 4½ miles in length.

Memphis, Tenn.—The Mississippi River Terminal Co. is reported organized by Columbus Beiree, W. J. Crawford, C. C. Hanson and others, stockholders of the Gulf Compress Co. It will erect and maintain a terminal, consisting of docks and elevators, at the foot of Livermore Ave., and handle the river cotton for the Gulf Compress Co.

Bay City, Tex.—The citizens are reported to have voted on Oct. 19 to create a drainage district to be known as Matagorda County Drainage Dist. No. 1; estimated cost $146,000.

•*Austin, Tex.*—John O. Johnson, City Clk., writes that R. V. Dixon has secured the contract for constructing retaining wall and embankment at Congress Ave., for $6,493.

Bremerton, Wash.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Nov. 26 to furnish at the navy yard, Puget Sound, Bremerton, Wash., the following supplies: Sch. 462—11 M. ft. white ash and 109 M. ft. white ash No. 1, 38 M. ft. fir; 31,400 ft. white oak, 44 M. ft. sugar pine, 17 M. ft. spruce lumber and 31 M. ft. spruce No. 1. Sch. 464—Standard iron pipe sets. Sch. 465—Brass rod, 25,000 lbs. ingot copper, round and square bar iron, 75 tons pig iron, 15,000 lbs. sheet lead, 3,000 lbs. ingot tin, medium bar steel, about 210,000 lbs. galvanized sheet steel, 124,000 lbs. mild steel billets, 4,000 lbs. slab zinc. Sch. 468—Seamless drawn brass pipe, wrought iron pipe, bushings, couplings, elbows, plugs, tees, crosses and unions, 70 doz. globe and angle valves and 1 doz. gate valves, etc.

•*Marinette, Wis.*—The contract for constructing drainage canal in Marinette County is reported to have been awarded on Oct. 26 to Hanson & Krienbring, of Peshtigo, at 10 cts. per cu. yd. for dirt, 30 cts. for hardpan and 70 cts. for rock.

Eau Claire, Wis.—Wm. Danforth, City Engr., writes that there is a committee to consider the construction of a dam and bridge at Shawtown, but nothing definite has yet been done.

Madison, Wis.—See "Public Buildings."

Toronto, Ont.—At a meeting of the Cabinet at Ottawa on Oct. 22 plans for the construction of a new western entrance to Toronto barbor were ratified, on recommendation of Hon. Mr. Pugsley, Minister of Pub. Wks. The work contemplated will involve an expenditure of between $300,000 and $400,000. A new western entrance is to be dredged out through the sand strip just south of the present channel; it will be 400 ft. wide and 18 ft. deep. Long piers will be built.

Trenton, Ont.—Bids will be received until Dec. 2 by the Central Ontario Ry. at its General Offices in Trenton (Geo. Collins, Mgr.) for the clearing, grading track laying, ballasting and other work required in the construction of the Whitney Extension between the 24th mile near Lake St. and Whitney, a distance of about 18 miles.

Peterboro, Ont.—Bids will be received until Nov. 21 Alex. J. Grant, Supt. Engr., Trent Canal, Peterboro, for the works connected with the construction of the Rosedale section of the canal.

•*Colborne, Ont.*—Kastier & Porter, of Wiarton, are reported to have secured the contract for constructing dock at Colborne (bids opened Oct. 24, by the Dept. of Pub. Wks. at Ottawa).

AMERICAN PUBLIC HEALTH ASSOCIATION. Secretary, Dr. C. O. Probst, Columbus, O

The Johnson system of fireproof floor construction has now been used in 131 buildings in 53 different cities, although it is comparatively new. These buildings are used for manufacturing, warehouse, office and public purposes, and several modifications of the flooring have been made in them to answer different requirements. The system has a bottom course of concrete containing a reinforcement of metal fabric, a middle course of rows of hollow terracotta blocks separated by 1-in. strips of concrete, and a top course of concrete. These floors are built by the National Fire Proofing Co., New York and Chicago, which has issued a pamphlet illustrating them and containing reports of tests.

THE HENRY HUDSON MEMORIAL BRIDGE.

The New York City Department of Bridges has just submitted for the approval of the Municipal Art Commission a design for the Henry Hudson Memorial Bridge across the Harlem River at Spuytenduyvil at a point about equivalent to the location of what would be 220th St., if the present system of streets were extended so far. It is proposed to create a public park at this point and to extend Riverside Drive to connect with it, thus making the bridge not only a memorial of the great discoverer, but also an important element in the magnificent river-front improvements of the metropolis.

The bridge will carry the driveway, promenade and four lines of car tracks across the river and valley at a maximum height of about 217 ft. above mean high water and will have extreme dimensions of about 2,840 ft. in length and 80 ft. in clear width. It will have a center span of 710 ft. in the clear with massive ornamental abutment piers flanked on one side by three and on the other side by four 100-ft. full-centered arches with wide piers and approaches terminating at each end in elaborate grand stairways. The construction will be mainly of concrete containing steel members and faced in some places with cut-stone masonry. The design is essentially monumental and has been carefully developed in strict conformity with the latest theories and structural practice and to present a beautiful appearance.

The axis of the bridge is on a tangent and is fortunately located at a point where the gneiss and dolomite rock rises nearly to the surface of the ground at the abutment and, according to the indications of numerous diamond drill exploration borings, will afford satisfactory footings at a depth probably not greater than about 20 ft. below datum, which is taken at mean high water, thus enabling the substructure to be advantageously constructed entirely in open excavation. Between the abutments the maximum depth of the water is about 25 ft. and the surface of the rock dips in both directions at a maximum angle of about 34 deg. toward the center of the river, where it is about 125 ft. below the datum.

The main span crosses the full width of the Harlem River and four tracks of the New York Central R. R. The center line of the arch ring has a span of 725 ft. and a rise of 177 ft. and the arch itself is a single continuous mass of concrete 70 ft. wide increasing in radial thickness from 15 ft. at the crown to 28 ft. at the skewbacks. It carries longitudinal spandrel walls at the crown and vertical piers and arches on the rest of the span. These piers form 8x22-ft. columns supporting on each side of the center line five pairs of spandrel arches of 31 ft. 7 in. clear span. Above them steel columns, girders, floor beams and stringers carry the concrete arches of the 50-ft. roadway and the reinforced concrete slabs of the 15-ft. cantilever sidewalks forming the upper or main deck. Below this is a second deck providing for the future installation of four car tracks in an arcade over and between the spandrel arches.

The character of the structure is designated by the designer, Prof. Wm. H. Burr, as articulated concrete construction calculated to concentrate definite stresses and to provide the requisite strength and rigidity for the large concrete surfaces without involving additional dead load from large masses of concrete not necessary to resist the working stresses, results which are attained by the system of embedded steel members and by the use of counterforts, ribs and flanges extended from the main body of the concrete.

The arch ring is reinforced by forty-eight full length 30x30-in. rectangular steel ribs each made of four 8x8-in. corner angles latticed together with inside bars. The ribs are arranged in twelve vertical planes and are thoroughly braced together by struts in vertical, longitudinal and transverse planes. The ends are seated on skewback footings and are thoroughly anchored to the masonry, and the ribs together form a complete span which will be erected on falsework before the commencement of the concreting. At each abutment the main ribs are supplemented by three intermediate I-shape auxiliary ribs, two panels long.

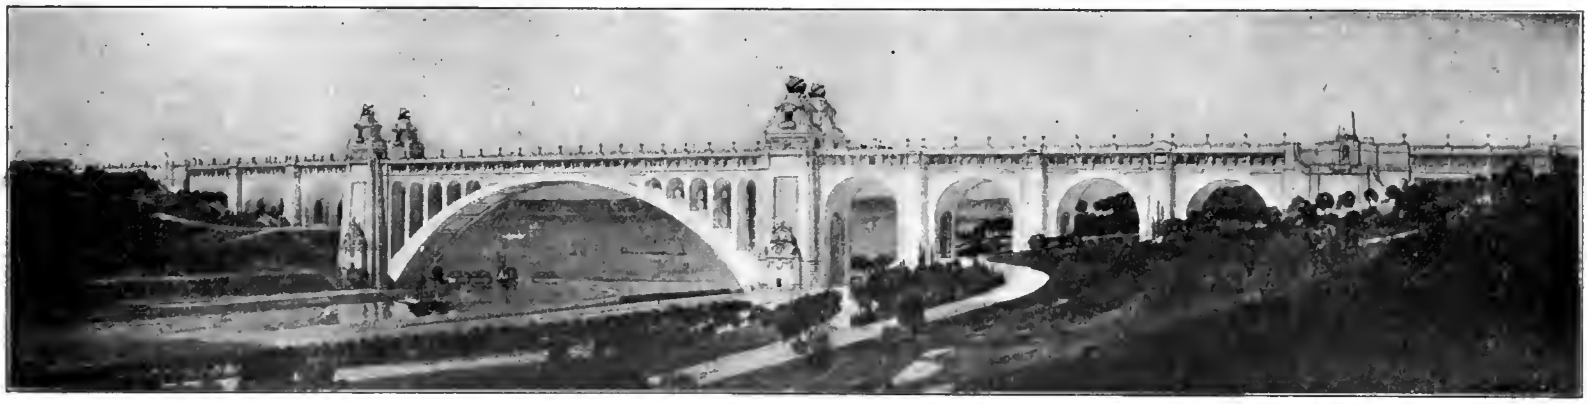
Groups of six rectangular vertical posts, each 2 ft. square and composed of four 6x6-in. angles latticed, are supported on the arch ribs and are riveted to all of them at intersections, thus forming an additional connection between the ribs. They are also riveted to horizontal transverse distributing plate girders connecting them just above the tops of the ribs, distributing the stresses and securing perfect alignment in the members. The vertical posts as well as the arch ribs are filled with concrete, and the former, in groups of six, are enclosed by concrete curtain walls which form the 8x22-ft. hollow spandrel posts.

The function of the steel is to strengthen the concrete by semi-hooping effects, to carry its proportion of the compressive stresses, and to resist the shrinkage stresses developed as the wet concrete becomes hardened. Great care is taken to avoid seating principal steel members on the concrete and to provide steel bearings for them in every case.

The calculations are made by two independent methods, first, the arch curve was determined by the approximate graphic method; second, the least work method was used analytically with the Cain graphic method and all principal dimensions were computed, not scaled. The results of both methods checked satisfactorily. The live load is assumed at 15,000 lb. per lineal foot and the position of maximum strain at all points is determined by the influence line method combined with reaction locus curves. In addition to direct dead and live load stresses, the calculations were made for stresses due to temperature changes, shrinkage during setting, deformation of arch curves by deflection and axial strain. The location of the curve is so near the center of gravity of the arch ring that under no possible condition can the unit compression in the concrete fall below 400 lb., the maximum compression under no condition exceeding 750 lb. The exact proportions of the concrete have not yet been determined, but it is expected that a rich concrete will be specified which will develop a strength of about 3,000 lb. for 12x12-in. test cubes. It is estimated that there will be in the main span, including the roadway platform, about 12,000 tons of structural steel and 47,000 cu. yd. of concrete.

The skewback piers are very prominent and important features of the design. They are 115x155-ft. hollow towers with concrete walls faced with granite and rise above the roadway to a total height of 300 ft. above mean high water. They are richly ornamented and have in the lower portions carvings in high relief representing portions of the hulls of Hudson's ancient ships.

The structure is being designed under the direction of Prof. Wm. H. Burr, who prepared a general outline of it for Commissioner Stevenson, of the Department of



THE PROPOSED HENRY HUDSON MEMORIAL BRIDGE, WITH A 710-FOOT REINFORCED CONCRETE CENTER SPAN.

Bridges more than a year ago. Since that time Mr. L. S. Moisseiff, of the Department's engineering staff has been in direct charge of the computations under Professor Burr's supervision and the approval of Mr. C. M. Ingersoll, chief engineer. Mr. Whitney Warren, of Warren & Wetmore, is the associated architect.

THE BOSTON TERMINAL PROBLEM.

In a long report to the Massachusetts Railroad Commission on the traffic and equipment conditions of the Boston & Albany R. R., Vice-President A. H. Smith, of the New York Central Lines, throws some interesting light on the terminal problem in Boston with reference to its present capacity and future improvement of electrification. Mr. Smith states that there has been no abatement of the interest taken to find a solution of the passenger terminal problem in Boston, but further study and investigation tend to create grave doubt as to the wisdom of abandoning, in such a short time, without abundant reasons, the commodious South Station, which was provided at great cost and after long and comprehensive studies by the best experts obtainable; especially when all the facilities originally contemplated and partially provided have not yet been fully utilized. This abandonment, if it happens, means the severance of union facilities for the convenient transfer of passengers, and the discommoding to some extent of certain commercial relations which the station has created, irrespective of the consideration of the great expense involved. Mr. Smith emphasizes the fact that if a serious error was committed in the building of this terminal for the special purpose for which it is now being used, which conclusion he hesitates to accept, it affords a monumental illustration of the necessity of conservative action.

During the period of densest traffic, the South Station is now handling about 88 trains per hour or approximately one train per track in the station every 20 minutes. During the rush hours of the holiday season, it has handled 97 trains per hour, or a train per track every 17 minutes. Considering the time required to load baggage, mail and express, this compares favorably with any terminal in the world in efficiency.

The plans which have thus far been evolved in the Park Square site to handle the present train service of the Boston & Albany would require the handling of four trains per track per hour, or the equivalent of a train per track per 15 minutes, requiring greater efficiency than the service now given at the South Station. The business now handled at the South Station, aggregating 850 trains per day, includes about 50 per cent. suburban trains, for the major portion of which electric operation was anticipated and double-track subways provided with an estimated capacity of 10,000 passengers per hour in each direction. If this subway operation of the suburban service may be realized in the future, it will permit a corresponding increase in the through train service on the main track level. This involves, according to Mr. Smith, a system of electric traction which will be entirely reliable at all times under the peculiar tidal and climatic conditions which prevail in that section, and for which there is now no precedent as a guide. It is hoped that the electric service at New York, with different kinds of construction, may indicate a satisfactory solution of the problem.

THE FORBES STERILIZER.

Some of our San Francisco readers will doubtless recognize that the apparatus shown in the accompanying illustration is the same in principle as the sterilizers sent to that city by the War Department eighteen months ago to furnish pure drinking water to the people of the afflicted city. For some eight or ten years the Forbes Company's shop at 1234 Callowhill St., Philadelphia, has been kept busy furnishing apparatus of this nature to various federal departments, and aside from supplying a few sterilizers to large companies which urgently requested them for thorough trial, the company has not been selling the appliances outside of government circles. The reason for this unusual condition is worth mentioning. The army in the Philippines during the early days of the occupation of the islands had much trouble in securing suitable drinking water and Drs. Walter Reed, E. O. Shakespeare and Victor C. Vaughn were appointed a board to ascertain the best method of obtaining it. Over thirty appliances for the purpose were thoroughly tested and the Forbes sterilizer was judged to be superior to all others submitted for trial, a decision that led to the steady government demand for the apparatus in various forms, from a little portable apparatus supplying hourly 10 or 12 gal. to the large plant in the State, War and Navy Building at Washington. It might be added that the company is now prepared to furnish plants having capacities of 500,000 gal. of sterilized water per hour, employing a number of units for the purpose.

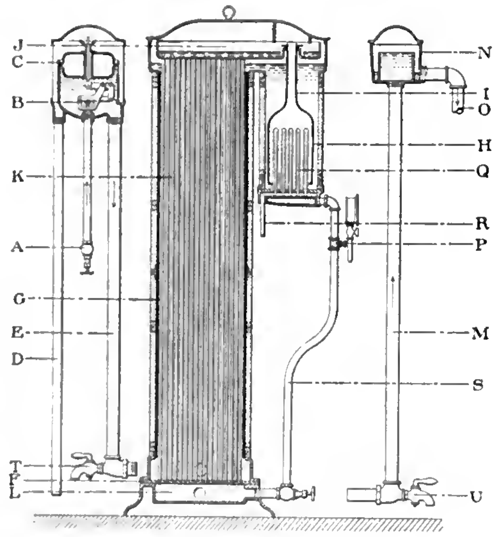
The object of the sterilizer is to boil the water in a closed receptacle for just sufficient time to sterilize it enough for all potable purposes and then cool the boiled water by making it give up its heat to the fresh supply which is about to be treated. In this way none of the natural gases in the water, which make it palatable, is lost, and the utmost use is made of the applied heat.

The illustration shows the type of apparatus operated by exhaust steam, which need not have a pressure exceeding 1 lb. The water passes through a raw-water valve A and its riser pipe to a level-regulating chamber, which it enters through a valve B controlled by a float. When the water reaches the desired level the valve is closed automatically, but should the water rise slightly above the operating level the excess passes over the little weir, C, into the overflow pipe, D. From the regulating chamber the raw water passes down the pipe, E, into G, the so-called "heat exchange." This is much like a surface condenser, the raw water entering above the tube sheet, F, while the hot sterilized water is circulated within the tubes. The raw water is warmed and the hot water cooled in this part of the apparatus, which, when working under ordinary good conditions furnishes sterilized water at a temperature of 5° to 8° above that of the raw supply.

The water from G enters the heater, H, containing steam pipes, Q, which raise its temperature to the boiling point. When it arrivers at this condition, it boils over like a full kettle on a hot stove, except that the water boils up through a fountain tube, I, into a hot-water pan, J, from which it enters the tubes of the heat exchange. These tubes end in a sterile water chamber, L, from which the water rises in the pipe, M, into a chamber containing a cup weir, N, for maintaining the correct level in J. The sterile water is drawn off through the pipe, O. Steam for sterilizing is admitted at P, and the condensed steam is drawn off at R; the apparatus itself can be sterilized by sending steam through the pipe, S.

The makers state that very little sediment or scale is found in the apparatus, but as all parts are readily reached for cleaning it is not believed that trouble will ever arise from this cause. The raw and sterilized water compartments can be flushed out at any time through the washout cocks, T and U.

The apparatus is made of copper and brass thoroughly protected by tin coatings. It is provided in many



THE FORBES WATER STERILIZER.

forms and sizes, including special patterns that can be transported to the most remote camp without special difficulty. The heating may be done with gas, kerosene, gasoline, electricity, coal or wood, and the makers will provide apparatus which will work below or above the atmospheric boiling point if it is desired.

The efficiency of the apparatus may be indicated by repeating some of the statements of the army board previously mentioned. Three styles of the apparatus were tested, and were found to rid water of all living germs except a few spore-bearing bacteria, without causing any loss of the natural gases or any flat taste. The bacteria which passed through the apparatus were considered of no significance by the board. The temperature of the sterilized water was 4½° above that of the raw supply.

TURBINES FOR THE UTILIZATION OF EXHAUST STEAM.

The firm of Willans & Robinson, of Rugby, England, builders of high-speed turbines and steam engines, has been recently engaged on the construction of turbines for the utilization of exhaust steam. They have at present under construction at their Rugby Works, two machines of the normal output of 1350 kw. with an overload capacity of 2000 kw. These are the largest exhaust turbines constructed in Europe. These machines are for the works of Sir Bernard Samuelson & Co., of Middlesbrough, and have been arranged to take steam from a number of non-condensing blowing engines used for supplying air to a number of blast furnaces.

The turbines are coupled to three-phase generators working with a periodicity of 40 with a pressure of 3000 volts and running at a speed of 2400 r.p.m. This is a very high speed for the output developed. The machines will work in parallel with a number of other turbines working in the same district, and will supply power to iron works and also power in bulk to the local power distribution company. Each steam turbine exhausts into a surface condenser of Messrs. Willans & Robinson's type, each condenser being designed to give a vacuum of 29 in. with a temperature of circulating water of 60° F., the quantity of steam to be dealt with at normal load being 45,000 lb. and about 70,000 lb. at the overload.

One special feature of the plant is the arrangement of relief valves, all low pressure steam that is not required for doing work in the turbine being by-passed direct into the condenser, so that all the steam output of the blowing engine is returned to the boilers as condensed water. The condensing plant is fitted with Edwards type, three-throw air pumps, driven by means of three-phase induction motors through machine cut gearing. The circulating pumps are of the centrifugal type and are driven by low-tension induction motors. The water for circulating is pumped from the river and forced through 27-in. cast-iron mains to the turbine house, a distance of some 250 yards, the amount of circulating water being about 4500 imp. gal. per minute.

Messrs. Willans & Robinson have also on hand 2000-kw. exhaust turbines for the South Wales District, the machines being arranged to work in conjunction with heat accumulators, the exhaust steam in this case being furnished by colliery winding engines. Amongst other sets on hand at Rugby, there is a 500-kw. exhaust turbo-alternator for supplying power to an ironworks and colliery in the Staffordshire district, working in conjunction with a vertical non-condensing blowing engine. The Willans & Robinson exhaust turbine is suitable not only for driving electric generators, but also for driving blowers, exhausters, ventilators and also high lift centrifugal pumps.

Messrs. Willans & Robinson also supply high-pressure steam turbines of all outputs from 2,000 to 10,000 h.-p. and have supplied or have on order within the last three years near one-quarter million horse-power in steam turbines, the machines being exported to all parts of the world.

AUTOBIOGRAPHICAL STATEMENTS OF AN EMINENT ENGINEER.

A few months ago the new Welfare Building of the Westinghouse Air Brake Co. was dedicated, and in an address at that time Mr. Walter C. Kerr made some very interesting statements concerning his early engineering experiences. These statements are here quoted verbatim:

When I look at the opportunities, comforts and pleasures afforded by an institution of this character, which you have justified by being a body of men banded together so firmly and with such good motives as to warrant the creation of this structure, I cannot help think of the contrast all this presents to the conditions under which I worked when I was as young as the youngest boy here and continued to work until I was as old as the average apprentice; how at the age of twelve I was shingling roofs and tacking on laths for the plasterers in a town buried so far in the middle of a far western state that I had never seen a railroad. Then working at several things until I landed at one end of a surveyor's chain, tramping the Western prairies, often wading waist deep in the waters of the marshes, sleeping in a tent, eating what I could get, and drinking water so bad that it would not make tea nor coffee, but would turn into something like ink. The best school I had was not as good as your worst one, and I did not have much time to attend it either. Such a thing as a night school was never heard of. The night was the time to sleep, and we did not have electric lights, gas, nor much of anything brighter than moonshine. No one was thinking about organized welfare, and the world, with its facilities, as you know it, was very far away.

It happened, however, that I got hold of a catalogue, from which I selected about half a dozen drawing instruments and a book called "Gillespie's Land Surveying," another on "Elementary Projection," and another on "Shades, Shadows and Perspective," scarcely knowing what these books were about, except that I thought from their titles that they would teach drawing and surveying. From the pictures in the books, I made a drawing board, a T-square, and two triangles, and I well remember mortising the T-square blade into the head, which prevented the triangles running over the left hand edge of the board. Notwithstanding such ignorance of the things you always knew all about, I learned to draw the kind of things these books taught, studied land surveying until I understood it, studied the surveying instruments from the pictures in the books and it was shortly after this that, when working as chainman, the head surveyor found that—although I had never had a transit in my hands—I could run one from what I had dreamed about it, and so I was promoted to transitman. It thus came that I ran a transit on the Western prairie when I was only sixteen years old and got a man's wages for doing it. It was

then that I learned for the first time that if any one would learn something that no one expected him to do, some one would soon want it done and want him to do it. I also learned in a good many ways what a day's work was and it was a good deal longer than anything we know of now.

I mention these things, not to tell the story of my life, but just that little piece of it which is necessary to show some of the younger men who live in this land of plenty, surrounded on every hand by things that help them, something I know personally of what a boy can do when his lot is cast so far away from everything that he has to even use his imagination to believe that the things of the world exist.

In the course of time a small foundry grew up in the neighborhood and I used to get the job of running the engine and boiler, fired with wood, Saturday afternoons while the engineer went into the foundry to help pour. Then I got a chance to mold waffle irons and bob sled shoes. In the winter, when the snow was several feet deep on the ground, I used to go to a little grist mill and help the engineer and the miller until I knew every nut and bolt in the engine, the condition of the piston rings, and every step of the process of milling flour. I would walk five or ten miles back into the woods to get a chance to work for a day without pay in a saw mill. When a steamboat landed at the levee, perhaps once or twice a week, I would always run from wherever I was at the first blow of the whistle, get there as soon as the boat, and stay on board, generally with the engineer, as long as the boat was tied up. To have a steamboat go up or down the river was a much bigger day to me than a day's holiday would now be to any of you. Even a corn sheller, a mowing machine, a piano, or a door lock was food for investigation. I lost no opportunity to get them apart and together again and well remember as a boy of fifteen repairing the action of a disabled piano on which most of the hammers stuck.

Now there is a lot of talk about opportunities, and lots of money is being spent in and about Pittsburgh to provide opportunities for young people, all the way from welfare buildings to libraries and technical schools, but I want to tell you that you have a thousand times as many opportunities around you every day as anybody can ever intentionally provide you with, and it is these opportunities that you must see and grasp. As a boy I would have walked a hundred miles to have spent one week in any shop that any of you have ever worked in, and I would have walked from Minnesota to Pittsburgh to have had a tenth part of the opportunities many throw away every day. The real trouble is that you have so many in this dense civilization that by familiarity they are likely to seem commonplace and be overlooked.

DOUBLE LOCK FOR STEEL SHEETING.

Some time ago, details were printed in this journal of a lock for steel sheet piling, by means of which the driving of such piles was materially facilitated. This device has proved entirely successful, and a modification of it has recently been placed on the market for use where double piles are considered necessary. In this system standard steel channels without bolts or rivets are used, and the salvage is thereby materially increased. The channels are held at the top and the bottom by locks, which differ only in a cutting edge being used on the bottom lock instead of the flat top adopted for the top lock, of which a diagram is given in the accompanying illustration. The double lock holds the pair of piles at a uniform distance apart and thus leaves a space into which any kind of water-tight material may be poured or rammed. The National Interlocking Steel Sheeting Co., 70 West Washington St., Chicago, are the makers of the lock.

PUMPING IN THE WILLISTON IRRIGATION PROJECT.

The actual pumping of water from the Missouri River into the canal system of the Williston irrigation project in western North Dakota has begun, and until cold weather prevents, tests of the apparatus and the gradual filling and priming of the main canals and pressure pipes will continue in order that the system may be in good condition to deliver water for next season's crops. A great deal of interest attaches to this project by reason of the fact that it is the first to be undertaken in North Dakota, and also because of the unique engineering features in connection with it.

The Missouri River has a habit of constantly cutting its banks and changing its channel, so that it was found impossible to locate any structure for the diversion of water by gravity without incurring enormous expense to protect it from the scour of the stream, moreover its grade was so flat that any gravity canal would be of prohibitive length. Fortunately large beds of lignite were discovered in the vicinity, affording cheap fuel, and the engineers conceived the plan of building a station at the coal mines and transmitting power electrically to the river. The pumps are placed on floating barges which will accommodate themselves to changes in the river channel and in the water level. The water is delivered through pipes with flexible joints into several basins located at a sufficient distance from the shore to be safe from encroachment by the shifting river. From these basins the water will be pumped into canals to cover the irrigable lands. The basins also serve for the purpose of settling silt, large quantities of which are carried in suspension by the Missouri River. During the winter the barges will be drawn out of the water to points where they will be safe from ice gorges and sudden freshets.

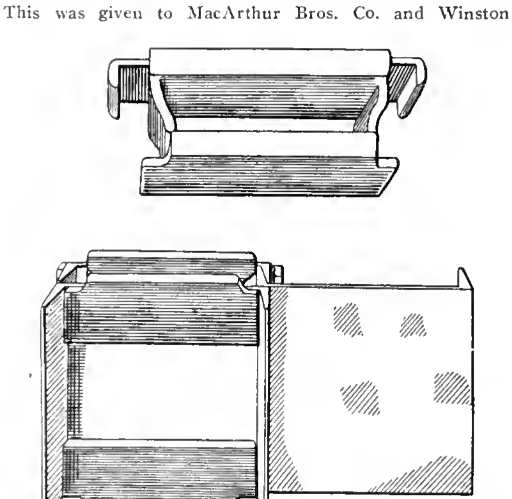
On Sept. 25 the steam turbine generating machinery was started up for the first time, and on the following day the electric current at 22,000 volts was turned on the transmission line to the intake pumping station. On Sept. 27 the two pumping units located on the barge were started. During the present month the pumping system has been operated at various times, raising the water gradually in the settling basin so that the banks could be puddled wherever there was any indication of weakness.

A producer designed for burning lignite coal is used. As the mine is carried farther into the vein the quality of the coal improves, and the little difficulties experienced in starting the plant are being overcome. It is expected that 5,000 acres will be irrigated during 1908.

The Williston power house will also supply power for the Buford-Trenton project, transmitting it by wire 22 miles. The installation of the electrical apparatus and the four pumping units in the station which receives the power from Williston has been completed at Buford, and the pumping machinery is now about mounted on the barge. The wires will be manufactured this winter, and it is hoped to have them placed on the poles early in the spring, so that power may be transmitted in time for supplying water as anticipated. It is expected that more than 3,500 acres can be supplied with water under the Buford-Trenton project in 1908.

AN ASHOKAN DAM INQUIRY.

The Commissioners of Accounts of New York City have been ordered by Mayor McClellan to investigate the recent award by the Board of Water Supply of the contract for the construction of the Ashokan dam. This was given to MacArthur Bros. Co. and Winston



DOUBLE LOCK FOR STEEL PILES.

& Co. at a tender of considerably higher than that of the lowest bidder, the John Peirce Co. The latter company's bid was very low, due to certain estimates regarding earthworks, which apparently did not allow for the difference between railway and dam construction. Mr. Peirce is understood to have stated that while he would lose money on the contract, he would take it if the Board of Water Supply insisted. This Board and its engineers recognized the many dangers to the public interests which arise when a great contract is let at a figure that will make it a source of loss rather than profit, and accordingly the contract went to the next bidder. This decision has received the hearty approval of all engineers who have had experience in the construction of large dams. It was urged by Messrs. John R. Freeman, F. P. Stearns. Wm. H. Burr and J. Waldo Smith, whose collective opinion on such a subect cannot be excelled professionally. The Commissioners of Accounts oppose to that testimony a statement by Col. T. W. Symons, H. P. Gillette, D. J. Hauer and Otto H. Klein, to the effect that the Peirce bid was large enough to give the contractor a profit.

FAST TURBINE INSTALLATION.

What is probably a record in furnishing and installing steam turbines was made by Allis-Chalmers Co. in connection with two 1,000-kw. units and accessories which that company built for the South Works of the Illinois Steel Co., at South Chicago, Ill. The contract was signed on May 13, 1907; shipment commenced from factory on May 25, and was finished on May 31; the erection of both units was completed July 16, and commercial load was put on the machines July 22. Since that time they have operated almost continuously, carrying loads up to 1,500 kw. each; that is, loads 50 per cent. above their rated capacity. At one stretch the turbines ran over three weeks day and night without being stopped. The turbines are installed in a temporary wooden building, and no crane nor the usual facilities were available during the erection. Since starting, the turbines have given no trouble whatsoever, and the manufacturer's engineers left them in charge of the Illinois Steel Co.'s operators within a few days after load was first carried.

The installation consists of two units, each comprising a 1,000-kw. Allis-Chalmers steam turbine coupled to a 1,000-kw., 25-cycle, 3-phase, 2,300-volt, Allis-Chalmers turbo-alternator; together with necessary surface condensing apparatus, pipe connections, and switchboard. The speed of the turbines is 1,500 r.p.m.; each is provided with a direct-connected exciter.

THE WAINWRIGHT PROTECTED CURB PATENTS.

The United States Circuit Court for the Eastern District of Louisiana has rendered the following decision in the case of the Steel Protected Concrete Co. et al. v. Central Improvement & Contracting Co., the opinion being written by Judge Saunders.

1. The bill herein alleges that one of the complainants, the Steel Protected Concrete Co., is the owner, and that the other complainant, the Grasser Contracting Co., is the exclusive licensee of three certain patents, taken out by one H. H. Wainwright, for improvements in concrete curb and gutter work; and that the defendant is infringing said patents. The relief prayed for is an injunction, restraining the defendant from further infringements and a decree ordering an accounting by defendant of profits realized from past infringements and payment to complainants of the sum so found to be due. The defendant denies the validity of the Wainwright patent and claims to be constructing metal protected curbs under a valid patent issued to one Gustave Soniat du Fossat.

2. The Wainwright patents are as follows:

(1) Patent No. 428,432, issued May 20, 1890. Application filed August 21, 1889.

In this patent Mr. Wainwright asserts that he "has invented a new and useful improvement in street curbs. . . . My invention consists of a curb for pavements, roads, lots, etc., embodying a frame for holding a filling, such as artificial stone, or pavement, etc., and an anchor for said frame; the novel features being hereinafter fully set forth and definitely claimed." The claims allowed in this patent are five in number. The first four describe the particular frame and anchor, and the corner bar shown in the drawings. The fifth claim is general:

"5. In a curb, a frame having a corner bar with a tongue on its inner face, substantially as and for the purpose set forth."

The general object of the entire device described in this patent seems to have been to construct a frame in which a concrete curb could be built in situ, and, as one of the incidents of this construction, it was proposed to place a metal bar on or imbedded in the upper outer edge of the curb so as to protect that edge from being chipped and broken by the impact of wheels backed against the curb. "It will be noticed," the patent sets forth, "that the frame, excepting the outer face of the corner bar, is embedded in the composition or filling; said frame thus preventing disintegration of the filling and materially adding to the strength of the curb. The (corner) bar protects the corner of the curb from contact with the wheels of the vehicles, and the curb is firmly supported and sustained, owing to the anchors. . . . It will be seen that I produce a superior curb, the same possessing strength and durability, rendering good service, and avoiding the heavy stone heretofore in use."

The claimed utility of the device is thus seen to consist: (1) In strengthening the entire structure of a curb made of artificial stone or cement; and (2) in protecting the outer upper edge of such a curb from being chipped and broken. The protection of the upper outer edge of the curb is not the sole nor even the special and prominent utility claimed to be effected by the combination. The patentee seems to have imagined that the principal utility of his invention consisted in the supposed strengthening of the mass of the curb by the frame in which it was formed, or the anchors holding that frame. The function of the corner bar is mentioned only in one sentence, and then inexactly.

That the patentee believed that the chief value of his device was due to the frame and anchors, which he described minutely and carefully, becomes more evident on reference to the claims made in his first application. These claims were also five in number, and all of them were concerned solely with the frame, and the corner bar is mentioned only once, and that brief reference is comprised in eight words. The claims in the first application are as follows:

"1. A frame for a curb consisting of uprights, a bar

or rod connecting the same, and pieces at the base of said uprights, substantially as described.

"2. A frame for a curb adapted to be filled, substantially as described, provided with a protecting corner piece as stated.

"3. A frame for a curb, adapted to be filled, substantially as described in combination with a supporting anchor as stated.

"4. A curb, consisting of a frame, an anchor supporting the same, and filling material embedding said frame; the parts being combined and substantially as described.

"5. A frame consisting of uprights, a rod or bar connecting the same, base pieces for said uprights and anchors supporting said frame, in combination with filling for said frame, resting on said base pieces and embedding the uprights, substantially as described.

"HENRY H. WAINWRIGHT."

It is obvious, I think, both from the claims as first made, and from the claims as allowed in the patent, and from the language of the body of the patent, that Mr. Wainwright's idea was that the frame and anchors described in his patent was the feature which gave it value. The corner bar is only on incident. His chief object was to strengthen the mass of the curb, not to protect its outer upper edge. While this fact does not disentitle him to the benefit of any invention he may have made incidentally and as a minor part of his main purpose, it is a material fact in determining the real meaning and extent of his claims.

The patent gives no verbal description of the corner bar used to protect the upper outer edge of the curb, except that it has a tongue at the back of it to enter certain slots or recesses in the arms of the frame. This does not state or imply that the tongue is continuous from one end of the bar to the other. Nor does the description in the patent indicate whether the corner bar is flat or curved. The drawings show a curved corner bar, with a flat tongue between parallel faces, from the point where it leaves the bar. A cross-section of the bar in the drawings shows that it is a section of a pipe. The entire bar as shown in the drawings might be obtained by splitting a small iron pipe and fastening an iron sheet at the middle point of the segment taken and extending to or beyond the center. The only function which is stated to be subserved by the tongue is that it rests in the slots of the arms of the frame. There is no suggestion that more tongue is required than enough to rest in these slots, nor that the tongue helps in any way to hold the corner bar in place.

(2) Patent No. 614,587, issued Nov. 22, 1898. Application filed January 26, 1898.

On January 26, 1898, Mr. Wainwright filed an application for a patent for "Improvements in the means for protecting projecting edges of concrete work." This application was eventually changed so as to read: "Improvements in the construction of concrete curb and gutter work." The first clause in this application as filed read: "This invention relates to improvements in means for protecting projecting edges of concrete work." This clause was also finally changed so as to read: "This invention relates to improvements in the construction of curbing, guttering and similar concrete work." Under this application, Mr. Wainwright made seven claims, as follows:

"1. The combination in concrete work, of a continuous metal bar for protecting the corner of the work, guides for temporarily supporting said bar during construction of the work, and concrete backing laid against said bar, whereby amalgamation of the concrete and metal surfaces fixes the bar in place, substantially as described.

"2. The combination in concrete work of a continuous metal bar for protecting the corner of the work, adjustable guides for temporarily supporting said bar during construction of the work and concrete backing laid against said bar, whereby amalgamation between the concrete and metal surfaces fixes the bar in place, substantially as described.

"3. The combination in concrete work of a continuous galvanized metal bar for protecting the corner of the work and concrete backing laid against the bar, whereby amalgamation of the cement and concrete surfaces fixes the bar in place, substantially as described.

"4. The combination in concrete work of a continuous galvanized metal bar for protecting the corner of the work, guides for the bar consisting of a support and an adjustable bracket thereon, and concrete backing placed around said guides and against said bar, substantially as and for the purpose described.

"5. The combination in concrete work of a concrete curb and gutter, and a continuous metal bar at the front edge of the gutter and between it and the street paving, substantially as described.

"6. The combination in concrete work of a continuous galvanized metal bar for protecting the corner of the work, temporary guides for said bar consisting of supports, j, and brackets, k, adjustably secured to said supports and recessed to receive said bar, substantially as described.

"7. The combination in curbing and guttering of a continuous galvanized metal bar, E, for protecting the corner of the curb, temporary guides for said bar consisting of supports, j, and brackets, k, adjustably secured to said supports and recessed to receive said bar, E, and continuous metal bars, G, at the front edge of the gutter and between it and the street paving, substantially as described."

All the above claims as made were finally rejected by the Patent Office and tacitly abandoned by Mr. Wainwright, who substituted in lieu thereof the following three claims, which were allowed, after considerable time and discussion, viz.:

"1. The combination in curb and gutter work of a continuous galvanized metal T-bar at the exposed corner of the work, brackets adapted to support said bar during the progress of the work, and concrete backing laid against the said bar and embedding said brackets, substantially as and for the purpose described.

"2. The combination in curb and gutter work of a continuous metal T-bar at the exposed corner of the work, brackets recessed to receive the rib of said bar and support the bar during the progress of the work, and concrete laid against said bar and embedding said brackets, whereby the union between the set concrete and the bar holds said bar in place, substantially as described.

"3. The combination in curb and gutter work of adjustable recessed brackets, a continuous metal T-bar provided with a rib adapted to fit said brackets, and concrete laid against said bar and embedding said brackets substantially as described."

In his specifications in this patent, Mr. Wainwright says:

"When curbs and similar work are constructed of concrete, it is indispensable that the corners of the curbs, etc., shall be protected from breakages due to the collision of vehicles and other objects therewith, and I have devised a system of protecting such corners by practically continuous bars of iron or steel. This system is not broadly herein claimed, since it is the subject of my earlier patent; but I do claim the improvements thereon, hereinafter particularly described. Said improvements, in general terms, comprise the following principles and mechanical elements: The protection of the corners of the work consists of a bar of galvanized iron or steel of peculiar shape (hereinafter described)

A T-bar, the sections of which are laid with closely abutting ends so that the sections together form a continuous bar. Now, I have discovered that, when a surface of iron or steel is backed with concrete, such an adhesion or union takes place that the iron or steel is held to the concrete with great tenacity, even when the iron or steel is not embedded in but merely laid firmly against the concrete backing. I have made a highly useful application of this discovery in my present invention, wherein I first set up brackets containing guide ways. These brackets support the protecting bars, while the cement or concrete backing which forms the curb is being laid, shaped and set. When set, the union between the cement or concrete and the bars has taken place and said bars are held most firmly in position practically as a part of the structure itself. It is to be particularly noticed here that the structure mentioned presents a very different condition from that existing in a bar of iron or steel, as a stay-bolt or tie rod is embedded in a mass of concrete. The present case is merely a superficial contact on only the back and tongue of the protecting bar and embedding the whole bar in the concrete is impossible, since that would defeat the purpose of the structure, which is that the bar should project or show at the front of the work."

He then goes on to claim the use of galvanized iron bars as part of this combination. Now, obviously, no weight can be given to Mr. Wainwright's statement that he had discovered that concrete adheres with great tenacity to an iron or steel surface on which it is laid, since that fact has been observed and known for centuries. Practically the claimed improvement consists, then, simply in this: That Mr. Wainwright devised a very simple frame to hold in place a bar having a tongue and a convex surface while the cement was hardening on the inner surface of the bar. There was no invention in remarking that the upper outer corner of the curb was liable to be chipped and broken by the impact of wheels against it. There was no invention in the general idea that this upper corner might be protected by a metal covering or bar of some kind. The only question, then, is whether there could be an invention in suggesting that the metal protection for the corner should consist in a solid galvanized iron bar having a convex surface on the outside, with a tongue extending into the cement, and held in position by a frame until the cement hardened. The convex surface of the bar had already been suggested for this very purpose in a patent issued to I. L. Landis for a pavement curb on July 8, 1890, and it had also appeared in the drawings in the first patent issued to Mr. Wainwright, and no invention was claimed. The general idea that the protecting bar should have a tongue set into the concrete also appears, though not clearly, in the drawings to Mr. Wainwright's first patent. As neither the idea of a protecting bar, nor the convex surface of that bar, nor the existence of a tongue extending from it diagonally into the mass of the cement were patentable, it seems to me that there was nothing patentable in the protecting bar shown in Mr. Wainwright's patent, No. 614,587, issued November 22, 1898.

The general idea of protecting with metal pieces the edges and corners of blocks of artificial stone dates back to a patent issued on December 21, 1869, to Francois Coignet. Coignet claimed that his invention consisted in:

"Protecting the exposed corners, sides, edges or angles of artificial stones by means and with the use of metallic shields fastened thereto in the process of manufacturing said stone, substantially in the manner herein set forth."

The drawings accompanying and showing the Coignet patent show that his proposed edge protector consisted of two metal planes at right angles and held in place by bolts or rods extending diagonally from the corner into the mass of the concrete. Coignet, it is true, proposed to form the artificial stones in which the corner was protected in molds, from which the stones would be taken and carried to the place where they were to be used. Mr. Wainwright, on the other hand, builds up the stones in the very place and position in which they are used, so that they do not require to be moved, but remain where they set and harden. But the present litigation is not concerned with this aspect of the two inventions. The only matter now under consideration is the feature of the two patents which relates to the protection of the edges of artificial stone with a metal shield or guard of some shape. Clearly Coignet was the first to conceive the general idea of this invention. The only difference between his metal protector and that of Wainwright was that Coignet's metal protector was square-edged and held in place by bolts or rods with expanded ends, and running diagonally from the corner into the concrete, while Wainwright's metal protector was convex, and was held in place by a continuous tongue extending into the concrete in the same direction as the bolts. Mr. Wainwright's first patent in 1890 shows, but does not claim any invention for, the convex surface of the corner metal protector. This feature of the bar was, therefore, not patentable in the second patent, that of 1898. Besides the Landis patent, No. 431,898, issued July 8, 1890, shows a metallic edge-protecting bar, having a convex surface at the edge. The use of a galvanized iron bar, instead of a plain iron bar, was certainly not patentable. The use of a continuous expanding tongue to hold the metallic edge protector in place while the concrete is hardening, and to help hold it in place after the concrete has set, is shown in a patent issued to R. S. Griffin on April 16, 1872, for holding a corner head of wood on the edge of a body of plaster. In any case it does not seem to me that the substitution of a continuous tongue in place of the bolts and stays shown in Coignet's patent presents patentable novelty.

(3) Patent No. 727,233, issued May 5, 1903. Application filed March 8, 1900.

In this patent Mr. Wainwright claimed invention for the form of the corner bar and tongue. The only difference between the corner bar and tongue described in this patent and the corner bar and tongue described in the patent of 1898 is that the tongue in the 1903 patent is spread out or enlarged at the inner end. I can see no invention in this change of the form of the tongue. The function of the tongue being to help hold the corner bar tight to the curb, it was so obvious that this function would be better performed if the end of the tongue were enlarged that it would occur to any mechanic of the most ordinary capacity and skill to enlarge it. Nor would any mechanic, so enlarging the tongue, dream that he had thereby invented anything worth patenting.

So far as concerns the metal protecting corner bar, all three of the patents taken out by Mr. Wainwright seem to me to be merely slight modifications of Coignet's construction. The only features in the Wainwright construction of the corner bar for which patentability could ever have been claimed—and the claim for them would have been of very doubtful validity—were the substitution of the convex corner bar for the square-edged corner bar and the continuous tongue for the bolts and stays of the Coignet bar. But these features appeared for many years in Wainwright's patents before he attempted in the 1903 patent to patent them. It was then too late. They had become common property. In Coignet's patent the drawings exhibit the bolts enlarged at the end to hold them more firmly in the concrete. It was inevitable almost to adopt the same construction, when a continuous tongue was substituted for the separate bolts. The imbedded end of the tongue would be enlarged to make it more difficult to draw the tongue out of the concrete, just as the imbedded end of the bolt had been enlarged for precisely the same purpose. As regards the corner bar, my conclusion therefore is that none of the patents issued to Mr. Wainwright show invention or novelty, and that they are all void.

This conclusion necessarily results in the rejection of plaintiff's demand. I was strongly inclined to hold that the defendants were estopped from contesting the validity of the plaintiff's patents by reason of the fact that the defendants set up a patent which is nothing more

than a copy, with immaterial variations, of the 1903 Wainwright patent. This patent of defendants is that issued to Soniat Du Fossat on November 22, 1904, under application filed on November 13, 1903. The Du Fossat patent was applied for more than six months after the issuance of Mr. Wainwright's last patent. Du Fossat's construction is so obviously copied from the last Wainwright patent that its nullity is beyond question. But can the defendants deny patentability in the Wainwright patent, when they claim patentability for an illegal imitation of that patent? I am strongly inclined to hold that they cannot. I would so hold if there were authority for thus deciding this controversy as between plaintiffs and defendant. On reflection, however, I have concluded that the evidence does not necessarily implicate the defendant in fraud. They took advice of reputable patent lawyers as to their rights and seem to have acted in good faith. Mr. Mioton, who was instrumental in procuring the Du Fossat patent, says he never examined the Wainwright corner bar until he had filed application for the Du Fossat patent.

On the whole, I have concluded that the only judgment I can render is one based on the invalidity of the Wainwright patents. There must then, be a decree in favor of defendants, rejecting plaintiff's demands.

PERSONAL NOTES.

Mr. J. L. Elder has been elected county surveyor of Cambria County, Pa.

Mr. Bailey Morledge was recently elected city engineer of Newport, Ohio.

H. W. Scott, principal assistant city engineer of Seattle, Wash., died recently.

Mr. H. B. Melat was recently elected county surveyor of Vernango County, Pa.

Mr. Charles H. Moon has been elected county surveyor of Bucks County, Pa.

Mr. Charles J. Maddox has been elected county surveyor of Montgomery county, Md.

Mr. Frederick Young was recently elected county surveyor of Luzerne County, Pa.

C. W. Sanders, chief engineer of the Copper Range R. R., Houghton, Mich., died recently, aged 51 years.

Charles E. Perkins, formerly president of the Chicago, Burlington & Quincy R. R., died at his home in Westwood, near Boston, Nov. 9, aged 67 years.

C. D. Wyman, managing director for the Stone & Webster Engineering Corporation in the Puget Sound region, died recently in Boston, aged 57 years.

Mr. Thomas Wheeler, who recently resigned as assistant state superintendent of public works of New York, has been elected mayor of Utica, N. Y.

Frank H. Earle, senior member of the firm of Earle & Harrison, civil engineers, Jersey City, N. J., died at his home in Newark, N. J., Nov. 7, aged 56 years.

Messrs. H. S. Gwin, M. W. Jenkins and J. C. Webster were recently elected county surveyors of Blair, Mercer, and Greene counties, respectively, Pennsylvania.

Mr. E. E. E. Piper has been elected county surveyor of Washington County, Md., and Mr. C. C. Billott was recently elected county surveyor of Prince George County, Md.

James F. Jones, a well-known civil and mining engineer, for many years consulting engineer to the Reading R. R. system, died Nov. 6, at his home in Philadelphia, aged 69 years.

William R. Kellogg, one of the oldest civil engineers in Chicago, died recently. He was prominently connected with the construction of the Kansas City extension of the Chicago & Alton R. R.

Mr. A. Buckel has resigned as sales manager of the Hodge Electric & Mfg. Co., and is now identified as contract manager with the Freeborn Engineering & Construction Co., Scarritt Building, Kansas City, Mo.

Mr. M. L. Hohman, of the firm of Hohman & Laird, consulting engineer, St. Louis, Mo., has been nominated as the next president of the American Society of Mechanical Engineers by the nominating committee of that society.

Mr. H. L. Hibbard, electrical expert to the Bureau of Construction and Repair, U. S. Navy Department, has resigned to enter the employ of The Cutler-Hammer Mfg. Co., Milwaukee, Wis., makers of electric controlling devices.

Col. Charles Bromwell, Corps of Engineers, U. S. A., in charge of public buildings and grounds in the District of Columbia, has returned to his duties after two months' absence most of which time he spent in Athens inspecting the army of Greece.

Mr. F. B. Freeman, designing engineer of the New York Central & Hudson River R. R., has been appointed engineer of construction in charge of the electric zone of the New York Central, with headquarters at the Grand Central Station, New York.

Mr. W. J. Wilgus, formerly vice-president of the New York Central & Hudson River R. R., has been retained as consulting engineer by the Detroit River Tunnel Co., a subsidiary company of the New York Central Lines, which is building the tunnel for the Michigan Central tracks under the Detroit River.

The Meade Testing Laboratories have recently been established in the Young Bros. Building, Nazareth, Pa., for the inspection and testing of Portland cement. The laboratories, which are fully equipped, are under the direction of Mr. Richard K. Meade, chemist and cement expert, and Mr. Clarence E. Kline is engineer of tests. A specialty will be made of the inspection of cement at the mill for which the laboratories are very favorably located.

The American Dittler Sewage Disposal Co., 1123 Broadway, New York, has elected to its board of directors the following members of its engineering staff: Mr. Richard Godeffrey, consulting engineer, president; Mr. Augustus G. Hepp, Chief engineer, vice president; Mr. William H. Schaladitz, mechanical engineer, secretary and treasurer. Mr. Schaladitz recently sailed for Germany to study present sewage disposal practice in Europe. During his absence Mr. Hepp will be the executive officer of the company.

Mr. W. Edgar Reed, electrical engineer, formerly with the Westinghouse interests, for some time in Paris, and for a considerable time at East Pittsburg, has opened an office for general consulting work in the Machesney Building, Pittsburg. Mr. Reed entered the employ of the Westinghouse Electric & Mfg. Co. in 1891 as an engineering apprentice. Upon finishing his apprenticeship course in the Westinghouse works he took a course in the Massachusetts Institute of Technology, from which he was graduated in 1897. Later he took a post-graduate course in Paris at the laboratory of the late Prof. Henri Moissan, the well-known chemist and metallurgist. Following this Mr. Reed became connected with the French Westinghouse Co., at Havre, France, filling the position of chief designing engineer of that company from 1898 to 1903. In 1903 Mr. Reed came to Pittsburg, filling the position of designing engineer for the French and American Westinghouse companies, which position he has filled up to this time. He has had long experience in designing both continuous and alternating current machinery, and has had direct charge of induction motor designing for several years. He has also had much experience in the practical application of direct and alternating current motors and generators, and is thoroughly familiar with their characteristics and applications.

The following candidates for membership in the American Society of Civil Engineers were elected Nov. 6: As members—A. M. Byers, Chf. Engr., The Southern Eng. & Constr. Co., City of Mexico, Mex.; T. W. Clayton, Engr., Internal Improvement Comm. of Illinois, Shawneetown, Ill.; G. R. Field, Contr. Engr., Risdon Iron & Locomotive Works, San Francisco, Cal.; F. C. Herrmann, Chf. Engr., California Development Co. and Sociedad de Riego y Terrenos de la Baja California, Calexico, Cal.; C. H. Kendall, Asst. Director Bureau of Public Works, Philippine Islands, Manila, P. I.; G. A. McCarthy, Chf. Engr., Temiskaming & Northern Ontario Ry. Comm., North Bay, Ont., Canada; Hood McKay, Div. Supt., Eastern Div., The Lehigh Coal & Navigation Co., Lansford, Pa.; J. B. Rohrer, Asst. Mgr., American-Hawaiian Eng. & Const. Co., Ltd., San Francisco, Cal.; H. E. Smith, Asst. Engr., Computing and Designing Dept., Barge Canal Office, Albany, N. Y. As associate members—F. W. Altstaetter, Capt. of Engrs., U. S. Army, Pittsburg, Pa.; Emanuel Anderson, Chf. of Eng. Dept., Mexican Light & Power Co., Ltd., Mexico, D. F., Mexico; F. H. Bass, Asst. Prof. of Municipal and San. Eng., Univ. of Minnesota, also Engr., Minnesota State Board of Health, Minneapolis, Minn.; W. B. Bates, City Engr., Roanoke, Va.; P. A. Beatty, Asst. Engr., Connellsville and Pittsburg Divs., Baltimore & Ohio R. R., Baltimore, Md.; E. C. Bebb, Engr., U. S. Reclamation Service, Glendive, Mont.; M. O. Bellingrodt, Asst. Engr., Atlanta, Birmingham & Atlantic R. R. Co., Atlanta, Ga.; W. H. Broughton, Head of Dept. of Civ. Eng., West Virginia Univ., and Cons. Engr. to County Court of Monongahela Co., W. Va., Morgantown, W. Va.; Charles Bradshaw, Hydrographic Engr., Arrowhead Reservoir & Power Co., San Bernardino, Cal.; L. D. Brownell, Asst. Engr., Dept. of New York State Engr. and Surv., Syracuse, N. Y.; R. G. Dieck, Portland, Ore.; S. D. Dodge, Asst. Engr., Board of Water Supply, New York City; E. B. Espenshade, Res. Engr., Chicago, Milwaukee & St. Paul Ry. Co., Roundup, Mont.; Wager Fisher, Engr. and Supt. for David Pepper, Jr., Engr. and Gen. Contr., Philadelphia, Pa.; P. M. Fogg, Asst. Engr., U. S. Reclamation Service, Newlon, Mont.; Philip Guise, Asst. Engr., Dept. of Docks and Ferries, New York City; W. C. Hattan, Res. Engr., South & Western R. R., Altapass, N. C.; G. F. Hosmer, with O. Perry Sarle, Providence, R. I.; F. M. Hough, Engr. of Track and Bridges, Saratoga & Encampment Ry., Saratoga, Wyo.; Anders Jordahl, Reinforced Concrete Specialist, W. S. Barstow & Co., Engrs. and Contrs., New York City; G. I. Oakley, Asst. Engr., New York State Barge Canal, Little Falls, N. Y.; J. M. Obreiter, Asst. Engr. with Earle & Harrison, Civ. Engrs., Jersey City, N. J.; H. G. Perring, Engr., Keystone Fireproofing Co., Philadelphia, Pa.; E. H. Ravenscroft, Cons. Engr., Chicago, Ill.; W. F. Rugg, Asst. Engr., New York Board of Water Supply, Peekskill, N. Y.; G. M. Stevens, Asst. Engr., Boston Street Dept., Boston, Mass.; T. P. Stevenson, Stevenson & Headman, Engrs. and Contrs., Rio de Janeiro, Brazil; Garfield Stubblefield, Office Assist. to Project Engr., Umatilla Project, U. S. Reclamation Service, Hermiston, Ore.; H. E. Wagner, Asst. Engr., with H. W. Edwards, Cons. Engr., Providence, R. I.; Ralph Whitman, with Isthmian Canal Comn., Washington, D. C.; H. B. Wrigley, Chf. Engr., R. H. Beaumont Co., Philadelphia, Pa. As associates—Robert Anderson, Vice-Pres., The Ferro-Concrete Construction Co., Cincinnati, O.; Henry McBurney, Stockbridge, Mass.; D. H. Morris, member of firm, The Dayton Hydraulic Machinery Co., Dayton, O.

BUSINESS NOTES.

In order to take care of its rapid increase in business The Bruner Steel Wagon Co., Wapakoneta, O., has increased its capital stock of $50,000 to $100,000.

The receivers of Milliken Brothers (Inc.), 11 Broadway, New York City, have been awarded the contract for the 2,500 tons of structural steel for the new 18-story Masonic Temple, at 24th St. and 6th Ave., New York City, another contract for the steelwork of a British Columbia paper mill, and the steel frame for an extension of the grandstand of the Sheepshead Bay race track in Brooklyn.

The Tremont & Suffolk Mills, of Lowell, Mass., will add to the present power equipment, recently purchased, a 1,500 kw. Allis-Chalmers turbine direct coupled to a 2,000 kw. generator, wound for 60 cycles 3-phase, to operate at a speed of 1,800 r. p. m. The new equipment includes, in addition to the main unit, two exciter units, one motor and the other engine-driven.

J. G. White & Co. recently shipped railway equipment to the value of $250,000 from New York to Manila. The consignment included locomotives, rolling stock, and construction plant of nearly every description. The material goes to the Islands of Cebu and Panay, upon which the construction of the lines of the Philippine Railway Co. is now well advanced.

Mr. Reginald Trautschold, formerly with the Robins Conveying Belt Co., has become manager of the Intercontinental Engineering Co., 126 Liberty St., New York City. The latter company will conduct a general engineering business, and act as manufacturers' agent. In the engineering line the design and equipment of power and industrial plants with particular attention to the economical handling of materials, will be made a specialty. In the agency department the company has received the American agency for Unic and Aries automobiles of France. The European agencies obtained from manufacturers in the United States include the Chester B. Albree Iron Works Co., the Dayton Pneumatic Tool Co., and the H. M. Richardson Steel & Iron Co. The company wishes to make arrangements to represent American manufacturers of shoe making machinery and machine tools of merit, as it has received inquiries for these. The European branch, which is located in Paris, has connections in every country of Europe, and is in a position to place American machinery before the trade of the continent.

The Pittsburgh Automatic Vise & Tool Co., general offices Pittsburgh, Pa., has been awarded the gold medal for vises, the highest honor obtainable, by the Jury of Awards of the Jamestown Exposition. The company reports that it has recently furnished equipment to the shops of the New York Central, the Pennsylvania, Louisville & Nashville, Atlantic Sea Coast, Seaboard Air Line, Norfolk & Western, Grand Trunk, and the St. Louis & Southwestern.

Mr. W. J. Roseberry, Jr., has resigned as manager of the Chicago Concrete Machinery Co., to become associated with the Chicago Builders' Specialties Co., 1118 Chamber of Commerce Bldg., Chicago, as manager of the machinery department. The latter company has made arrangements with the Koehring Machine Co., Milwaukee, Wis., to handle their entire output of Koehring concrete mixers in the United States.

Sixty-nine Curtis turbines, aggregating 60,000 hp. capacity, have been delivered to Japanese purchasers by the General Electric Co. These have been installed in textile mills, steel mills, railway shops, arsenals, dockyards, electric light stations and the power plants of tramways. The largest units so far shipped there are rated at 1,500 kw.

The contract for the three large skylights for the new National Museum at Washington has been awarded to Arthur E. Rendle, who will use his Paradigm system on the work. This was used to the extent of 80,000 sq. ft. on the new Union Depot buildings in that city.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Phoenix, Ariz.—Bids will be received until Dec. 2 by C. F. Larrabee, Acting Comr. Indian Affairs, Washington, D. C., for furnishing material and constructing an addition to the water system at the Phoenix School. For further information apply to C. W. Goodman, Supt. School.

Tucson, Ariz.—Chas. F. Slack, Mayor, writes that the date of opening of bids for the construction of water works has been extended from Nov. 4 to Jan. 6. Frank S. Treat, City Recorder.

El Dorado, Ark.—The question of constructing water works at a cost of $35,000 is reported under consideration.

Oakland, Cal.—The City Council on Nov. 4 passed an ordinance appropriating $40,000 for the construction of a salt water pumping plant.

The Peoples Water Co., under direction of L. D. Adams, Constructing Engr., is reported to be carrying out plans for the development of water sources to supply Oakland, Alameda and Berkeley. The work includes the construction of a second reservoir near Lake Chabot, and a tunnel from Cull Canyon north of Hayward, work on which is reported to have already commenced. The development will extend to San Pablo and Pinole Creeks in the northern part of the county, the waters of which will be utilized.

Grand Junction, Colo.—J. F. O'Malley, City Engr., writes that the question of issuing $400,000 bonds for the construction of a mountain water system to supply the city was defeated at the election on Nov. 2. A petition is being circulated asking Council to call another election.

Paonia, Colo.—E. P. Martin, of Paonia, Ch. Engr. Mt. Lamborn Canal & Reservoir Co., writes that all bids opened on Oct. 6 for constructing reservoir, etc., have been rejected, and the matter has been postponed until spring.

Pensacola, Fla.—Bonds to the amount of $350,000 are reported sold to be used for water works and sewers. It is stated that the plant of the Pensacola Water Co. will probably be purchased and improved.

Sparks, Ga.—See "Power Plants, Gas and Electricity."

Bloomington, Ill.—Bids are wanted until Nov. 28 for furnishing all material for 4,000 ft. 10-in. c. i. water main. C. F. Fauntz, City Engr.

Anamosa, Ia.—The citizens are reported to have voted on Oct. 28 to issue $30,000 bonds to purchase present water works or construct a municipal plant.

Lamoni, Ia.—The W. K. Palmer Co., 718 Dwight Bldg., Kansas City, Mo., is preparing plans for water works for Lamoni.

Marion, Kan.—Thos. W. Bown, City Clk., writes with regard to the proposed water works, that the plan is now to purchase the present water works and put it in good repair. Engineers, Burns & McDonnell, Dwight Bldg., Kansas City, Mo.

Beloit, Kan.—The city is reported to have purchased the water works owned by E. E. Stevens, of Chicago, Ill.

Versailles, Ky.—The citizens are reported to have voted Nov. 5 to issue $60,000 bonds for water works and sewers.

Norway, Me.—Bids will be received until Jan. 1 by the Norway Water Co. (S. D. Andrews, Pres.) for constructing a 1,000,000-gal. reservoir.

Grand Rapids, Mich.—The Gen. Mgr. of the water works is reported to have decided to recommend to Council the purchase of a new steam pump, the repair of old pumps, repairing and rebuilding of pumping station, etc.

Thief River Falls, Minn.—Lars Backe, City Clerk, writes that the citizens on Nov. 6 voted to issue $10,000 bonds for water works.

St. Cloud, Minn.—The Great Northern R. R. Co. is reported to be considering the construction of a new pumping station, also new water mains from the yards on 1[illegible]th Ave. to the river.

Harrisonville, Mo.—The citizens are reported to have voted to issue $30,000 bonds for the construction of municipal water works.

Kearney, Neb.—Geo. E. Ford, City Clk., writes that the proposed water works will cost about $100,000; no time yet set for the receiving of bids. Engineer, C. A. Edwards, of Kearney.

**Chatham, N. J.*—W. F. Inman, of New York, N. Y., is reported to have secured the contract for extending the water mains here, for about $2,000.

Alcove, N. Y.—E. W. Moxley, of Ravenna, Supt. Harrtcroix Water Co., writes with regard to the reservoir proposed to be constructed at Alcove, that the company will in the spring hire men and do the work under the supervision of its superintendent. Cost not yet estimated.

Madison Barracks, N. Y.—Bids will be received until Nov. 27 by 2d Lieut. R. W. Drury, Constr. Q. M., Madison Barracks, N. Y., for constructing a 300,000-gal. steel tank, quarter master stable, one set quarters, wagon shed and remodeling old mess building, as advertised in The Engineering Record.

Rome, N. Y.—A blue print of the general plan for the proposed contracts to be advertised during the winter months is now on file at the office of The Engineering Record, 239 West 39th St., N. Y. City, to consist of the dam on Fish Creek, tunnel aqueduct and reservoir, as stated in the advertising columns of The Engineering Record. The city also expects to let a contract early next year for furnishing and laying about 6 miles of gravity main from Stokes reservoir to connect with the distributing systems in the city. The general plans of all of the above work are completed, and contractors can now see practically everything relating to the extent and conditions of the contemplated work, as it would be to the advantage of contemplating bidders to visit the site of this proposed work during the month of November or early December as later the ground is likely to be frozen and obscured by snow. The engineers on this work will go over it any day with those wishing to bid. Engineers, Knight & Hopkins, of Rome. Harvey S. Bedell, Chmn.

Smithfield, N. C.—See "Power Plants, Gas and Electricity."

Hamlet, N. C.—W. R. Bonsal and J. M. Jamison are reported to have secured franchises for water works.

Bowbells, N. D.—J. P. McCusker, City Aud., writes the proposed water works and system of fire protection will cost about $12,000. Engineer not yet selected.

Swanton, O.—It is stated that bids will be received until Nov. 25 by the Bd. Trus. Public Affairs (A. B. Lathrop, Secy.) for furnishing a deep well pump, together with an electrically driven pump head, motor and the necessary switches and controlling devices; also one elevated tank and tower having an approximate capacity of 22,000 gals. Wm. G. Clark, Consulting Engr., 1050 Spitzer Bldg., Toledo.

Rockport, O.—Bids will be received until Dec. 2 by W. L. Nichols, Village Clk., for $13,000 bonds, to be issued for the purpose of extending the water mains of said village.

Reading, Pa.—Caleb Weidner, City Clk., writes that bids for the proposed filtration plant, for which the citizens voted Nov. 5 to issue $500,000 bonds, will not be called for until about July, 1908. Engineer, E. L. Nebling, of Reading.

**Philadelphia, Pa.*—Local press reports state that the Holly Mfg. Co., of Buffalo, was on Nov. 5 awarded contract for the construction and installation of two 20,000,000-gal. pumps at Lardner's Point pumping station for $268,769 (time of completion 360 and 420 days.) (Bids opened Oct. 22.)

Cambridge Springs, Pa.—Bids will be received until Dec. 12 by A. H. Drake, Boro. Clk., for constructing a mechanical filter plant as advertised in The Engineering Record.

Mountville, Pa.—The citizens are reported to have voted Nov. 5 to issue $22,800 bonds for the construction and equipment of water works.

Florence, S. C.—See "Power Plants, Gas and Electricity."

Temple, Tex.—This city is reported to have purchased the plant of the Temple Water Works Co. F. P. Hamill, Mayor.

Wheeling, W. Va.—The City Council is reported to be considering the question of issuing bonds for water works improvements.

**Union, W. Va.*—This town is reported to have awarded a contract to John R. Shanklin, Gen. Mgr. of the West Virginia Htg. & Plumbing Co., of Charleston, W. Va., for installation of water works. Water will flow by gravity from a reservoir with capacity of 250,000 gal., to be constructed on site about 115 ft. above level of town.

La Crosse, Wis.—H. J. Beckwith, Pres. Bd. of Pub. Wks., is reported to have recommended the construction of a filter plant.

Cheyenne, Wyo.—C. C. Carlisle, City Engr., writes that the citizens on Nov. 5 voted to issue $160,000 bonds to improve the city water works, which is a gravity system.

Kelowna, B. C.—See "Power Plants, Gas and Electricity."

Chesley, Ont.—The citizens are reported to have voted to expend $38,000 for a system of water works.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Ft. Morgan, Colo.—The City Council is reported to have selected B. H. Meeker, of McCook, Neb., to prepare plans for a sewerage system.

Washington, D. C.—Bids will be received by the Coms. D. C. until Nov. 25 for constructing sewers in the Dist. of Columbia as advertised in The Engineering Record.

Pensacola, Fla.—See "Water."

Tampa, Fla.—The City Council on Oct. 31 passed on second reading the ordinance providing for an issue of $50,000 bonds for storm and sanitary sewers.

**Springfield, Ill.*—John Spence, has secured the contract for constructing sewer in Miller St. at 72 cts. per sq. ft. 18 in. sewer, 30 cts. per ft. for 12-in. inlet pipe and $24 ea. for manholes.

**Duquoin, Ill.*—Rech Bros., of Belleville, are reported to have secured contract for the construction of a sewerage system, for $24,500.

Indianapolis, Ind.—Plans for the 26th St. sewer are reported to have been completed by Chas. A. Brown, Asst. City Engr.; it will cost $25,000 and will be 2⅓ miles long.

Richmond, Ind.—C. W. Merrill, Pres. Bd. Pub. Wks., writes that bids will be received on Nov. 20 for the construction of the Northwest 2d St. sewer; it will be built in two sections and cost about $23,000. Fred R. Charles, City Engr.

Kendallville, Ind.—The City Council, it is reported, will receive bids until Nov. 22 for constructing a sewer in Richmond St.; probable cost, $7,000.

Lafayette, Ind.—It is reported that the Bd. of Pub. Wks. is preparing plans for the construction of a sanitary sewer system from Kossuth to Elliott St. with laterals in Central Ave., 9th, 10th and 11th Sts.

Churubusco, Ind.—The Town Board is reported to be receiving bids for the construction of an addition to Deckers addition sewer, about 2,500 ft.

Wapello, Ia.—Press reports state that all bids opened on Oct. 10 for the construction of the Van Buren St. sewer have been rejected as being too high, and new bids will be received until Dec. 19; probable cost, $6,000. E. T. Christie, City Recorder; W. S. Kremer, Engr., Wapello.

Des Moines, Ia.—Plans are reported to have been completed and approved for the Woodland Ave. sewer. The improvement contemplates a network of 10-in. pipe in the northwestern part of the city and will cost from $20,000 to $25,000; total length will be 12,325 ft. According to local press reports bids will be received by the Bd. of Pub. Wks. for this improvement on Nov. 20.

Fredonia, Kan.—The question of constructing a sewerage system is reported under consideration.

Louisville, Ky.—J. P. Claybrook, City Eng., writes that the proposed sewer on Central Ave. will be of 18-in. vitr. pipe and cost $3,650. The work is being done by city with its own force of labor.

Dayton, Ky.—Chas. A. Bird, City Clk., writes that the citizens on Nov. 5 voted to issue $28,000 bonds for the construction of trunk sewers on Vine, McKinney and Main Sts. Bids for construction will be called for next year. Engineer, Geo. G. Lindsey, of Dayton.

Versailles, Ky.—See "Water."

Baltimore, Md.—The Sewerage Comn. on Nov. 4 approved specifications for the superstructure of the pumping station on East Falls Ave.

**Toronto, Ont.*—The Bd. of Control is stated to have awarded on Nov. 5 contracts as follows for paving: Contracting & Paving Co., Barton Ave., asphalt, $2,734; Godson Contr. Co., Montrose Ave., with asphalt, $4,292; Dewson St., with asphalt, $7,580; Warren Bituminous Paving Co., Huron St., with bitulithic, $2,442; C. H. Rust, Avenue Road, with bitulithic, $15,000.

Hamilton, Ont.—The construction of a road from the Jolley Cut to Victoria Ave. is reported contemplated.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Tuscaloosa, Ala.—See "Schools."

Birmingham, Ala.—The Muscle-Shoals Power Co. and the Hydro-Electric Co. propose, according to reports, to construct a series of 3 locks and dams across Tennessee River near Muscle Shoals in Alabama for the purpose of securing electric power therefrom.

The Birmingham Electric Light & Power Co. is reported incorporated with a capital of $196,000, and intends constructing a power plant on Village Creek for the purpose of supplying electricity for lighting purposes. The purpose of the company is to erect a building about 100 ft. square on Village Creek and install machinery of about 1,000 h.-p. All wires within the fire limits of Birmingham will be laid underground. The capacity of the plant at first will be 1,600 16-c.-p. incandescent lights, and franchises will be applied for in the various municipalities in the Birmingham district.

**Oakland, Cal.*—The Oakland Gas, Light & Heat Co. has been granted a permit to erect a steel gas storage tank to cost $162,000 near Market St. gas plant. Capacity, 2,000,000 cu. ft. It is reported that the contract for the work has been awarded to R. D. Wood & Co., of Philadelphia, Pa.

Las Animas, Colo.—Bids will be received until Nov. 23 (readvertisement) at the Bureau Yards and Docks, Navy Dept. (Wm. M. Smith, Acting Ch.), Washington, D. C., for power plant, building and machinery at U. S. Naval Hospital, New Ft. Lyon, Colo.

Branford, Conn.—The Connecticut Co. is said to be planning to install an alternating-current day service about June 1, 1908. E. T. Gilbert, Supt.

Jacksonville, Fla.—The following are reported to be the bids received by the Bd. of Bond Trus. on Nov. 4 for furnishing a 1,500-kw. steam turbo generator for the electric light plant: General Electric Co., Schenectady, N. Y., 900 revolution generator, $45,005; 1,800 revolution generator, $34,805. Allis-Chalmers Co., Milwaukee, Wis., $34,985. Westinghouse Machine Co., Atlanta branch, $36,509, for 1,800 revolution generator, and $49,172, for 1,200 revolution generator.

Sparks, Ga.—It is stated that the citizens have voted to issue $30,000 bonds to establish an electric light plant and a system of water works. It is reported that the bonds have been sold.

Centralia, Ill.—The Centralia Gas & Electric Co. is planning extensive improvements to its plant and will change its system from 2 to 3 wire and increase the boiler capacity. G. E. Fish, Supt.

Oregon, Ill.—Paul F. Shuster, of Rockford, writes that he, with Warren S. Stearns, of Rockford, have franchises and propose to erect gas plants at Marengo, Ill.; Oregon, Ill.; Harvard, Ill., and Platteville, Wis. The Platteville Gas Co. is fully organized; the others will be within a few days. No contracts have been made for construction work. All mail should be addressed to Paul F. Schuster, 424 Ashton Bldg., Rockford.

Princeton, Ill.—The Bureau County Light & Power Co. of Princeton is reported incorporated, with a capital of $50,000 to manufacture and sell electricity. Incorporators: R. R. Priestly, C. F. Sturtevant and B. C. Lindley.

Valley Junction, Ia.—The Valley Junction Water & Light Co. proposes increasing the capacity of its plant and will install new boilers and an engine. R. M. Lewis, Supt.

Cedar Rapids, Ia.—The Cedar Rapids & Iowa City Ry. & Light Co. contemplates the enlargement of its boiler room and equipment, including coal and ash handling apparatus, chain grates, conveyors and possibly economizers. W. J. Greene, Mgr.

Elkader, Ia.—The Turkey River Power Improv. Co., it is reported, will construct 3 water power dams and proposes an interurban line from Elkader to Oelwein and Dubuque.

Nevada, Ia.—M. A. Harrison and H. H. Caughlin are reported to have purchased the electric light plant and will make improvements.

Beloit, Kan.—This city is reported to have purchased the electric light plant owned by A. T. Rogers.

Lecompte, La.—Press reports state that the council will on Dec. 3 consider plans and specifications from electrical engineers for a complete electric light system.

Winchendon, Mass.—The Winchendon Electric Light & Power Co. is said to have in contemplation the installation of an auxiliary plant in connection with its present water-power plant. Frank W. Nourse, Mgr.

**Berrien Springs, Mich.*—We are informed that the C. L. Olds Constr. Co., of Ft. Wayne, Ind., on Nov. 7 secured the contract for 4¾ miles of wire, 25 street lights, regulator, transformer and erection of poles, wire, etc., for municipal lighting system for $3,220. Other bids received for this work were: W. Worth Bean, Jr., of Benton Harbor, $4,305, and Falkenau Electrical Constr. Co., Chicago, Ill., $3,895. Engineer, A. J. Hammond, of South Bend, Ind.

Onaway, Mich.—The Onaway Light & Power Co. proposes constructing a new dam next year to supply the increased demands made on its plant. W. W. Vaughn, Pres.

Bay City, Mich.—Wm. H. Fitzhugh, Supt. municipal electric light plant, writes that all bids opened on Oct. 30 for two 250-h.p. boilers for the electric light plant have been rejected, and new bids will be received on Nov. 27 on new specifications. The lowest bid amounted to $9,800. He further states that the following are the lowest bids received on other portions of the plant: Allis-Chalmers Co., Milwaukee, Wis., turbine and generator of 500 kw., $15,100, and exciters of 15 kw., $1,025; Westinghouse Electric Mfg. Co., Pittsburg, Pa., for 300 lamps, A. C. series, 6.6 ampere, $10,372, and the J. Lang Electric Co., Chicago, Ill., for a 5-panel switchboard, $1,085.

Nashwauk, Minn.—The Village Trustees contemplate increasing the capacity of the municipal electric light plant by the installation of an 80-kw alternator with engine and other necessary apparatus, and also the extension of lines to two miens. G. A. Lindsay, Supt.

Little Fork, Minn.—Jos E. Cummings, of Duluth, is reported to be contemplating the developing of Little Fork and Sturgeon Rivers for electrical power.

Stewartville, Minn.—The Stewartville Electric Light Co. is reported to have in contemplation improvements to its plant, including purchase of new boiler.

Virginia, Minn.—The Virginia Light & Water Co. is contemplating the installation of a 100-kw. alternating-current 2,300-volt direct-connected unit in its plant. O. H. Griggs, Mgr.

Canton, Miss.—It is proposed to purchase a 50-light transformer for the municipal arc lighting system and extend fire main to the corporate limits. John T. Sharp, Jr., Mgr.

Steelville, Mo.—A franchise is reported granted to Janus Bright for 20 years to furnish electric light for Steelville. The power house will be at Evans Mill, 1 mile east of the city, using water power.

Chinook, Mont.—Bids will be received until Dec. 21 by the Town Council for constructing an electric light system. John C. Duff, Town Clk.

Papillion, Neb.—The citizens are reported to be in favor of installing an electric light plant.

Stella, Neb.—It is reported that the Stella Electric Light Co. has closed a contract with the city for street lighting for a term of years and will begin at once to install the plant. The plant is to be in operation by Jan. 1, and John Brenner, of Humboldt, is to be the electrician.

North Platte, Neb.—Chas. F. Temple, City Clk., writes that City Council has granted the North Platte Electric Light & Power Co. (Lester W. Walker, Mgr., North Platte) a franchise for 20 years. The company will do considerable improving.

Reno, Nev.—The Lower Truckee Electric Co. is reported incorporated to construct a power plant to supply the mines of Fairview, Wonder and Olinghouse with power and lights, and probably run a line into Reno and the Carson valley. Capital, $50,000. Incorporators: T. W. Haines, of Oakland, Cal.; W. H. Hall, of Gridley, Cal., and Henry W. Esden, of Reno, Nev.

Alpha, N. J.—The Alpha Cement Co., of Easton, Pa., writes that it is not prepared to erect a power plant as recently reported.

Elmer, N. J.—The Elmer Gas Co. is reported to have secured a 50-year franchise from the Boro. Council.

Rhinebeck, N. Y.—R. Raymond Rikert, Secy. Dutchess Light, Heat & Power Co., of Rhinebeck, writes that plans for the proposed extension are not yet complete.

Smithfield, N. C.—The Holmboe Co., Lincoln Savings Bank Bldg., Louisville, Ky., has been selected to prepare plans and specifications for water works, sewers and an electric light plant at Smithfield. After estimates are ready an election will be held to vote bonds, and if bonds carry the work will be commenced at once.

Swanton, O.—See "Water."

McConnelsville, O.—The McConnelsville-Malta Electric Co. proposes installing gas engines of 150 h. p., to be used in case of emergencies. A. Durban, Supt.

Columbus, O.—Bids will be received until Nov. 25 by the Bd. Pub. Service (E. F. McGuire, Secy) for furnishing material and making the following improvements at the municipal electric light plant, Dublin Ave.: Boiler blow-off, tunnel foundation for additional boilers, continuation of ash pit tunnel, retaining wall and driveway, foundations for the 1,000-kw. steam turbine and exciter, watertight pit around foundations for turbine, etc. The bids for this work were recently rejected.

Oklahoma City, Okla.—The Citizens Electric Light & Power Co. is reported incorporated, with a capital of $50,000, by W. E. Grigsby, W. L. Peck and W. L. Bradford.

New Pine Creek, Ore.—The electric power plant of the California & Oregon Light & Power Co. at New Pine Creek is reported to have been destroyed by fire, and it is stated that plans for a new plant are being considered. E. Keller, Pres. & Mgr., New Pine Creek.

**Pittsburg, Pa.*—Chas. Reisfar, Jr., Secy. Central Bd. of Educ., writes that the contract for installing electric lighting plant in 5th Ave. School (bids opened Nov. 7) has been awarded to P. F. Magion & Co., 1025 Forbes Ave., Pittsburg, for $8,800.

A permit has been granted to St. Francis Hospital to erect a $100,000 5-story brick and stone power house to furnish heat and power to the Hospital.

Philadelphia, Pa.—See "New Industrial Plants."

**Delta, Pa.*—The Ambursen Hydraulic Constr. Co., of Boston, has secured contract from the Delta Electric Power Co., of Delta, Pa., for a reinforced concrete dam in Southeastern Pennsylvania for supplying power to the slate quarries and other industries in that district; it also received contract from the Big Horn Power Co., of Chicago, Ill., for a dam on the Big Horn River in Wyoming. These two dams are almost exactly similar in dimensios and characteristics. Each is situated in a deep, narrow gorge, where there is no possibility of a detached or independent power house. The Wyoming dam will create a head of 60 ft. and the Pennsylvania dam of 65 ft., and both structures are about 70 ft. high above foundations. The power houses in both cases will be under the rollway of the dam and protected by an inner shell. The great height of the dam allows ample space for a power house, together with traveling crane, switchboard, office, etc. Both dams will be of the half-apron type. Work has already been commenced and will be carried on throughout the winter. It is expected to complete both dams before the spring floods.

Norristown, Pa.—See "Sewerage and Sewage Disposal."

Rock Hill, S. C.—W. S. Lee and L. C. Harrison are reported to have petitioned City Council for a franchise to construct and operate a gas plant.

Charleston, S. C.—See "Sewerage and Sewage Disposal."

Florence, S. C.—The installing of a sewer system, costing $60,000, an electric light plant, costing $25,000 and additional water facilities costing $15,000, is reported under consideration.

Amarillo, Tex.—The Amarillo Water, Light & Power Co. contemplates the complete rearrangement of its system and doubling the capacity of its plant. Frank W. White, Manager.

Bristol, Va.-Tenn.—Engineers Chas. Hansel & Co., 43 Exchange Pl., New York, N. Y., are reported to represent a company which proposes constructing power plant and distribute electricity in Bristol. Harry Roberts, of Bristol, is attorney for the company.

Lynchburg, Va.—It is stated that C. W. Hancock & Sons, of Lynchburg, have secured a contract with the company owning the Natural Bridge property for the construction of a concrete dam 200 ft. long and 35 ft. high in Cedar Creek. The dam will be located about half a mile below the bridge, and the water will be used to develop 100 h.-p. which is for electric power purposes.

Buena Vista, Va.—The Buena Vista Light & Power Co. contemplates installing a new switchboard and making other improvements to its plant. E. C. Fowlkes, Supt.

Spokane, Wash.—H. C. Eckensberger, of Portland, Ore., general freight agent of the New York Central Lines, writes that it is proposed to harness the Columbia River, the power to be used for manufacturing and other purposes. Nothing definite has yet been done.

Wheeling, W. Va.—The City Council on Nov. 7 appropriated $150,000 for improvements to the gas and electric light plant.

North Milwaukee, Wis.—The North Milwaukee Light & Power Co. proposes changing part of its system to alternating current. Theodore Waech, Mgr.

Wauwatosa, Wis.—The question of constructing a municipal electric light plant is reported under consideration here.

Marinette, Wis.—It is reported that the Economic Light & Power Co. has been incorporated, with a capital of $25,000, by Theo. A. Pamnerin, Geo. Bever and others. A. W. Wilson, of Marinette, and A. L. Gillette, Oconto, representing Chicago, Ill., capitalists, have applied to City Council for a franchise to establish a new lighting system for the city. It is also proposed to build an interurban line in connection with the water power development. It is proposed to take power from Peshtigo River.

Eau Claire, Wis.—The City Council is reported to have decided to procure bids for lighting the streets and bridges for 5 years.

Madison, Wis.—Bids will be received until Nov. 22 by the Wisconsin Capitol Comn. (Lew F. Porter, Secy.), at Madison, for the following equipment for the heating and power plant for the Capitol Bldg., now under construction at Madison: Boilers, engines, electrical generators and motors, mechanical stokers, pumps (feed), pumps (building supply), storage tanks, conveying machinery, hoisting crane and open heaters, as advertised in The Engineering Record. Storm Bull, Consulting Engr., Madison.

West Bend, Wis.—The State R. R. Comn. is reported to have granted the West Bend Htg. & Lighting Co., of West Bend, permission to issue $25,000 additional stock and to purchase plant and to make certain improvements.

Big Horn, Wyo.—See "Delta, Pa."

Montreal, Que.—Official reports state that bids will be opened on Dec. 16 by the Fire and Light Com. of City Council for the supply of electrical energy for lighting the streets, squares and other real estate belonging to or under control of city; also for lighting, heating and industrial purposes for the citizens. Separate bids will also be received for the supply of gas, by burners, for lighting the streets, parks and squares; also gas to citizens for lighting, heating and industrial purposes, per 1,000 cu. ft. L. O. David, City Clk.

Kelowna, B. C.—R. Morrison, City Clk., writes that as soon as bonds are sold work will commence on the construction of water works and an electric light plant; probable cost, $40,000.

Toronto, Ont.—See "Schools."

Campbellford, Ont.—E. C. West, City Secy., writes that John S. Fielding, 15 Toronto St., Toronto, is engineer for the proposed power plant to be constructed at Middle Falls, to cost about $60,000.

Listowel, Ont.—Bids are wanted for lighting this town by electricity, arc and incandescent. For further information address C. A. Lee, Chmn. Light Com.

West Lorne, Ont.—The West Lorne Electric Light Co., Ltd., is contemplating the installation of a producer gas power plant soon. D. F. Webster, Secy.

* *Items marked thus give the names of parties awarded contracts.*

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Lakeport, Cal.—The Sonoma & Lake County Ry. Co. is stated to have announced that all the rights of way, terminals and franchises have been secured and that construction work is to begin next spring. The road is to be 30 miles long and will connect Cloverdale, Lakeport and Kelseyville. A. E. Dickinson, of Ukiah, Cal., Pres.; J. E. Fulton, of Lakeport, Gen. Manager; W. S. Fry, Lakeport, Secy.; J. R. Garner, of Upper Lake, Cal., Treas.

Murphysboro, Ill.—The Murphysboro Electric Ry., Light, Heat & Power Co., Murphysboro, is reported incorporated to operate electric railway and public utilities. Capital, $36,000. Incorporators: John G. Hardy, Walter C. Alexander and Philip H. Eisenmeyer.

Chicago, Ill.—The Chicago & East St. Louis Short Line Ry. Co., with principal offices at Chicago, is reported incorporated to construct an electric railway from East St. Louis through Christian, Macon, Dewitt, McLean, Livingston, Kankakee and Will Counties to a point in Chicago. Capital, $50,000. Incorporators: H. C. Osterman, Wm. M. Drennan, H. C. Dolph, Thos. W. Flynn and Wm. Anderson.

Edwardsville, Ill.—The St. Louis & Staunton Ry. Co. is reported incorporated by the McKinley Syndicate for the purpose of constructing an interurban railway from Edwardsville to Staunton. Incorporators: Geo. M. Mattis, W. H. Carnahan, C. Zilly, D. E. Brambel and R. H. Watson, all of Champaign.

Sycamore, Ill.—A charter is stated to have been granted to the Woodstock, Marengo & Sycamore Electric Ry. Co. to construct a road from Woodstock to Sycamore. Capital $25,000. Incorporators: Chas. A. Spenny, Edward B. Harang, M. W. Powell and others.

Tulsa, I. T.—The Tulsa Interurban Ry. Co. is reported to have petitioned for a charter to construct a line from Sapulpa to Tulsa. John O. Mitchell, L. D. Marr, H. R. Cline and others are reported interested.

Elkader, Ia.—See "Power Plants, Gas and Electricity."

Shreveport, La.—It is stated that a movement is uder way to extend the Shreveport Traction Co.'s lines to Centenary College, a distance of several mines.

**Boston, Mass.*—The contract for constructing open incline north of Boston City Hospital Relief Station (bids opened Oct. 31 by the Boston Transit Com.) has been awarded to C. R. Gow Co. for $27,771.

Manistee, Mich.—It is reported that the R. G. Peters Salt & Lumber Co., of Manistee, is considering the construction of an interurban electric railway between Manistee and Cadillac.

Mexico, Mo.—The Mexico & Perry Traction Co. is reported to have awarded the contract for grading the electric line from Mexico to Perry to J. M. Wolf, of Collinsville, Ill.

Canal Dover, O.—It is stated that the Tuscarawas Valley Transit & Power Co. will build its line from Canal Dover to Canton by way of Zoar and Bolivar, using a private right of way. The line will extend from Canton to Columbus, passing through Coshocton.

Upper Sandusky, O.—It is stated that Frank M. Ohl, of Toledo, contemplates constructing an electric railway through Upper Sandusky.

Oklahoma City, Okla.—The Red River Ry. Co., with $5,000,000 capital and headquarters at Oklahoma City and Durant, is reported chartered to build an electric line from a point on the Texas State line, just north of Bonham, Tex., to Oklahoma City, 200 miles. Incorporators: Geo. T. Robertson, of Atoka; E. M. Abernathy, S. C. Hawk and F. J. Hawk, Lexington; J. W. Hocker, of Purcell, and T. H. Bayless, of Durant.

La Plume, Pa.—Plans are stated to have been approved by the Governor for the extension of the Dalton St. Ry. from La Plume through Factoryville to the north side of Lake Winola.

Luzerne, Pa.—The Governor is reported to have approved plans of the Wilkesbarre & West Side Ry. Co. for the extension of the line on Courtdale Ave. through Courtdale Borough to Plymouth Township, a distance of about 1 mile.

East Conemaugh, Pa.—The Borough Council is stated to have passed an ordinance granting the Southern Cambria Street Ry Co. the right to lay tracks and operate an electric railway within East Conemaugh.

San Antonio, Tex.—A franchise is stated to have been granted the San Antonio Traction Co. to construct an extension to the Tobin Hill line. W. B. Tuttle, Gen, Mgr.

Buenos Aires, Argentina, S. A.—Bids are wanted and will be received before May, 1908, by the Municipal Intendente, Buenos Aires, for constructing two of the principal lines of the proposed system of th Metropolitan Subway Electric Railways; also for the lease of the two lines now under construction. Further information can be had by addressing the Argentine Legation, Washington, D. C.

RAILROADS.

Notes Arranged Alphabetically by States.

Champaign, Ill.—The St. Louis & Staunton Ry. Co. has been incorporated, with principal office at Champaign, and capital $2,500, to construct a railroad from Edwardsville to a point in or near Staunton. Incorporators: Geo. M. Mattis, W. H. Carnahan, C. Zilly and others.

Jefferson City, Mo.—The Jefferson City, Albuquerque & San Diego Valley R. R. Co. is reported chartered in Guthrie, Okla., with a capital of $7,000,000. It proposes to build a road from Jefferson City, through Missouri, Kansas and Beaver County, Okla., New Mexico and Arizona to San Diego, 1,600 miles. Incorporators: J. H. Langston and O. S. Jent, of Guymon, Okla.; W. F. Bort. of Wichita, Kan.; C. R. Wright, of Liberal, Kan., and others.

Hannibal, Mo.—The City Council is reported to have adopted an ordinance granting the Chicago, Burlington & Quincy R. R. Co. (T. E. Calvert, Ch. Engr., Chicago, Ill.), a franchise to lay double tracks on the levee. The company agrees to construct a good levee at a cost of about $300,000; it also proposes erecting a new depot, to cost about $100,000.

Portsmouth, N. H.—The Boston & Maine R. R. Co. (H. Bissell, Ch. Engr., Boston, Mass.), is reported to have decided to expend $1,250,000 on improvements to its property in this section. Of this amount between $50,000 and $75,000 will be used for a new railroad station on Maplewood Ave. and about $400,000 for a new steel bridge across Piscataqua River bet. New Hampshire and Maine. The remainder will be used in making the necessary changes that will result from placing the bridge a half-mile above present wooden structures.

Rochester, N. Y.—J. W. Dwyer, 875 Ellicott Sq., is reported to be the lowest bidder for excavating and masonry work of the Culver Road subway under the tracks of the New York Central R. R. at Rochester, for about $100,000. The total cost of the grade crossing improvement is estimated at $200,000. The New York Central is to pay one-half, the city of Rochester a quarter and New York State a quarter. The actual construction work will be in the hands of the railroad. It is estimated that a year will be required to complete the subway.

Columbus, O.—The citizens on Nov. 5 voted to issue $1,000,000 bonds for the abolition of railroad grade crossings in Columbus, about 25 in all. Henry Maetzel, City Engr., is reported to have completed the plans and the railroad companies interested have approved the plans.

Richmond, Va.—The survey for the extension of the Richmond & Chesapeake Ry. to deep water will be resumed in the early spring. J. M. McLure, Ch. Engr., Chester, S. C.

Spokane, Wash.—See "Business Buildings."

Winnipeg, Man.—The Saskatchewan, Peace River & Dawson R. R. Co. is reported to have petitioned Dominion Parliament for permission to construct a road from Winnipeg to Dawson City.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Whipple Barracks, Ariz.—Bids will be received until Dec. 12 (readvertisement) by Capt. Chas. C. Walcutt, Jr., Acting Q. M., Prescott, for construction, plumbing, hot water heating and electric wiring, hospital at Whipple Barracks, Ariz., as advertised in The Engineernig Record.

Clarendon, Ark.—We are informed that it is proposed to erect a court house, to cost about $50,000. Nothing definite will be done until about Feb .

Corona, Cal.—See "Paving and Roadmaking."

Las Animas, Colo.—See "Power Plants, Gas and Electricity."

Denver, Colo.—It is stated that plans for the new Franciscan Orphanage to be erected on Osceola St. and W. 26th St. have been completed and filed with the building inspector. The plans provide for several 3-story fireproof buildings, costing in all about $150,000.

Norwich, Conn.—It is stated that plans are now being prepared for the erection of an addition to the Hospital for the Insane, the cost to be $25,000.

**Wilmington, Del.*—A. S. Reed & Bro. Co., 85 Shipley St., it is stated, have secured the contract for the boiler house and coal bins at the new city pumping mill at 16th and Walnut Sts., at $13,747, and the contract for the laboratory in connection with same at $727.

Washington, D. C.—The five-story building at 321 C St., N. W., occupied by the seed distributing department of the Department of Agriculture, is reported destroyed by fire.

Bids for the erection of the building for the International Bureau of American Republics are to be submitted, according to reports, on Dec. 15. Amount available, $1,000,000. Elihu Root, Secy. of State, is a member of the Bd. of Governors.

Bids will be received until Nov. 20 by the Comrs. D. C. (Henry B. McFarland, Chmn.) for constructing an engine house on Lanier Pl. and Ontario St., Lanier Heights; also an engine house at 22d and Evarts Sts., Langdon, D. C.

The Comrs. D. C. opened bids on Nov. 9 for erecting a stable for the water dept. in the rear of the Bryant St. pumping station and for a storehouse at 14th and D Sts. Thos. Melton, 19 T St., n. w., submitted the lowest bid on both buildings, at $23,000 to construct the stable with concrete floors, or $21,300 with wood floors, and $7,095 for the cement storehouse. The other bids received for the stable (bids being on concrete and wood floors, respectively) were as follows: Robt. T. Humphrey, $26,500 and $25,300; and Jos. H. Gibbons, $31,700 and $29,700.

Tampa, Fla.—The Council has passed on second reading an ordinance providing for the issue of bonds, as follows: For a new city hall and its site, $245,000; city hospital, $35,000. An election is to be held Dec. 10 to confirm the Council's action in this matter.

Ocala, Fla.—Bids will be received until Dec. 19 by Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., for the construction (includnig plumbing, gas piping, heating appartus, electric conduits and wiring) of the U. S. Post Office and Court House at Ocala, as advertised in The Engineering Record.

Great Lakes, North Chicago, Ill.—Bids will be received at the Bureau of Navigation, Navy Dept. (W. H. Brownson, Ch.), Washington, D. C., until Dec. 2 for the construction of a commandant's house, 6 officers' houses and a receiving guard house at the naval training station, Great Lakes, North Chicago.

**Peoria, Ill.*—The contract for constructing an extension, remodeling, etc., including mechanical equipment (except lift) to the U. S. Post Office and Court House at Peoria has been awarded by the Superv. Archt., at Washington, D. C., to the General Constr. Co., of Milwaukee, Wis., at $170,325 (bids opened Oct. 7).

Chicago, Ill.—It is reported that active work is to be started at once on the plans for the central police station, municipal court headquarters and city jail; probable cost, $600,000.

New Albany, Ind.—The Bd. Co. Comrs., it is stated, will receive bids until Nov. 29 for remodeling the county jail.

Michigan City, Ind.—The County Council of Laporte County is stated to have appropriated $125,000 for the erection of a superior court building at Michigan City.

Laporte, Ind.—The County Comrs. are reported to have appropriated $85,000 for a county jail to be erected at Laporte.

South Bend, Ind.—Bids will be received by Jas. Knox Taylor, Super. Arch., Washington, D. C., until Jan. 2, for the construction of an extension to and the remodeling, etc., of the U. S. Post Office at South Bend.

Princeton, Ind.—An appropriation of $20,000 is reported made by the County Bd. for the erection of a jail.

Des Moines, Ia.—The plans of Proudfoot & Bird, Crocker Bldg., are stated to have been accepted by the Bd. of Pub. Wks. for the City Hall.

**Des Moines, Ia.*—Paul Riemers & Sons, of Milwaukee, Wis., have secured the contract to erect, complete, the U. S. Post Office at Des Moines (bids for which were opened by the Superv. Archt., at Washington, D. C., on Oct. 21), at $367,793.

**Muscatine, Ia.*—The Superv. Archt. at Washington, D. C., awarded the contract to erect, complete, the U. S. Post Office at Muscatine to W. J. McAlpine, of Dixon, Ill., at $65,232.

**Louisville, Ky.*—The contract to erect a fire engine house at Frankfort and Frank Aves. is reported awarded to Geo. H. Rommel, 1014 E. Bway., at $21,174.

**Leesville, La.*—C. K. Oakes, Clk. Police Jury, writes that the contract for erecting a county building (bids opened Nov. 4) has been awarded to W. C. Whitney, of Beaumont, Tex., for $88,000.

Grand Rapids, Mich.—The erection of a new armory for the batallion is reported contemplated; probable cost, $125,000.

St. Peter, Minn.—J. D. Mills, Secy. State Bd. of Control, St. Paul, writes that all bids opened on Oct. 26 for erecting, plumbing and heating tuberculosis building at State Hospital have been rejected. Architect, C. H. Johnston, 712 Manhattan Bldg., St. Paul.

Rochester, Minn.—The bids received recently for erecting a wing at the Rochester Hospital, it is reported, have been rejected.

**Hastings, Minn.*—It is stated that the contract to erect a cottage for men at the Hastings Asylum for the Insane has been awarded to C. Ash & Co., of Hastings, at $42,800.

Minnehaha, Minn.—It is reported that bids will be opened Nov. 20 for improvements to the old hospital building at the Soldiers' Home at Minnehaha. The work includes carpenter and brick work, electric wiring, new plumbing fixtures, etc. A. F. Gauger, Scandinavian-American Bank Bldg., St. Paul, is the archt.

Houston, Miss.—The Bd. of Superv., it is reported, has adopted the plans of R. H. Hunt, of Chattanooga, Tenn., for the court house, which is to cost, exclusive of furnishings, about $65,000.

Paris, Mo.—The Co. Bd. is reported to have accepted plans for an infirmary estimated to cost $25,000. J. N. Magruder, Co. Clk.

Rockport, Mo.—The citizens are stated to have voted in favor of issuing bonds to erect a county infirmary to cost $30,000.

Kansas City, Mo.—The following are reported to be the bids received by the County Clerk Oct. 31 for the walls, roof, floors and windows of the 3-story brick 55x310-ft. county home for the poor (bidders of Kansas City unless otherwise stated): T. H. Ludlow, $148,920; Taylor & Winn, 121 W. 8th St., $148,208; Andrew Mathers, $149,100; Urban Constr. Co., $177,000; Geo. W. Huggins, $170,492; G. E. Strickler, $177,793; W. H. Mapes and Jos. Overly, $184, 977; J. H. Stone, $175,500; Chris Yetter, Independence, Mo., $201,800, and W. R. Atkinson, Colorado Springs, Colo., $183,000. Architects, Smith & Rea, 722 Dwight Bldg.

Omaha, Neb.—Dan B. Butler, City Clk., writes that the citizens on Nov. 2 voted to issue $30,000 bonds for the erection of a fire house on 24th St. Bids will probably be called for in the spring.

Ely, Nev.—It is reported that bids are wanted until Dec. 2 for erecting a courthouse and jail. J. W. Miles, Co. Clk.

Secaucus, N. J.—Bids will be received until Nov. 26 by the Bd. Chosen Freeholders (Walter O'Mara, Clk.), Jersey City, for erecting a tuberculosis hospital at Secaucus. Plans and specifications may be had from the Clk., Bd. Chosen Freeholders, upon a deposit of $25. Fredk. Hensel, Archt., 246 Summit Ave., Hoboken.

**Galesville, Wis.*—E. F. Clark, Clk. School Bd., writes that the contract for erecting brick and stone high school (bids opened Oct. 23) has been awarded to Geo. L. Smith Co., of South Kaukauna, for $29,800.

Milwaukee, Wis.—The Bd. School Directors (Frank M. Harbach, Secy.) will open bids Nov. 25 for erecting a 9-room addition to 21st Dist. School No. 2, 9th and Ring Sts. Bids to include heating, plumbing, etc.

**Toronto, Ont.*—Contracts for the installation of heating and ventilating apparatus and plumbing in the 4 new Normal schools at Hamilton, Stratford, Peterborough and North Bay, it is stated (bids for which were received Nov. 4), have been awarded by the Provincial Pub. Wks. Dept. at Toronto to Purdy, Mansell & Co., of Toronto. The electric wiring of the new buildings was awarded to Fred Armstrong & Co., of Toronto. The work involved will entail an expenditure of about $62,000.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Thomson, Ga.—The erection of another mill is reported decided upon by the John E. Smith Cotton Mfg. Co. of Thomson, to have 6,000 spindles and 200 looms. The enlargement will cost about $100,000.

Wallace, Idaho.—The Buffalo Mining Co. is reported to have decided to increase its capital stock from $1,000,000 to $1,500,000, and has awarded the contract to construct 1,300 ft. of the lower tunnel to O. H. Linn, of Wallace. Three drill compressors with motive power for same, will be installed at once by the contractor.

Muskogee, Ind Ter.—A. L. Holtom, of Muskogee, Secy. Union Machine & Fdy. Co., writes that this company proposes manufacturing the King hydro carbon engine and the King alcohol motor for mine haulage and will expend about $40,000 for buildings and equipment.

Marshalltown, Ia.—We are informed that the Iowa Central Ry. Co. (L. F. Day, Gen. Mgr., Minneapolis, Minn.) will rebuild car shop, 75x500 ft., and paint shop, 30x16 ft., which were recently burned; probable cost of building, $40,000; no power plant will be installed; 150-h. p. engine will run mill.

Buffalo, N. Y.—Hazard, Coates & Bennett, of Rochester, dealers in scrap iron, it is reported, have purchased a site for a plant on the line of the South Buffalo Railway, near the Lackawanna steel plant. Machinery for handling of heavy metals will be installed. The yards will have a storage capacity of about 75,000 tons.

DeKalb Junction, N. Y.—The Mutual Milk & Cream Co., of New York, N. Y., according to reports, is planning the erection of a milk condensary next spring at DeKalb Junction; probable cost, $100,000.

Youngstown, O.—It is reported that the Wm. B. Pollock Co. intends making additions to its plant next year. A shop and new machinery will be needed.

Cincinnati, O.—We are informed that contracts will probably be let in the spring for the construction of the proposed plant of the Cincinnati Soap Co. for which the Reliance Eng. Co., of Cincinnati, is preparing plans; the building will be 100 x 100 ft., and the power plant have a capacity of 100 kw.; probable cost of work, $55,000.

Philadelphia, Pa.—The Spreckels Sugar Refining Co., it is stated, has been granted a permit to build a 3-story steam generating plant on Meadow St., south of Reed St. The building will be 84 x57 ft., of steel, concrete and brick construction, and cost $60,000.

Philadelphia, Pa.—The A. Schoenhut Co., toy manufacturers, it is stated, is having plans prepared by Ballinger & Perrot, 102 S. 12th St., for a 5-story brick reinforced concrete addition to its plant at 2215 Adams St.

Nesquehoning, Pa.—W. B. Lovatt, who was manager of the Read-Lovatt Silk Mill at Weatherly, is reported to have procured a site from the Lehigh Coal & Navigation Co. and will erect a silk mill at Nesquehoning. Recorder of Deeds Van Dyke, of Weatherly, is associated with Mr. Lovatt. The plans for the structure are now being made.

Canton, S. D.—Bids will be received until Dec. 10 by C. F. Larrabee, Acting Comr. Indian Affairs, Washington, D. C., for furnishing material and constructing a laundry building with equipment at the Indian Insane Asylum, Canton. For further information apply to Oscar S. Gifford, Supt. Sschool, Canton.

Superior, Wis.—See "Miscellaneous."

Hamilton, Ont.—The Dominion Power & Transmission Co., it is reported, has announced its intention of building a car factory in the east end of the city.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Tampa, Fla.—The City Council on Oct. 31 passed on second reading the ordinance providing for an issue of $23,000 bonds for crematory improvements.

Evansville, Ind.—The Bd. Pub. Wks., it is reported, will receive bids until Nov. 26 for sweeping and cleaning brick and asphalt streets from Jan. 1, 1908, to Dec. 31, 1908. W. F. Wunderlick, City Clk.

Dover, N. J.—The Town Clk. writes that the conference committee of the Bd. of Health has been directed to confer with Common Council on the question of garbage disposal. The matter of cremating the garbage has been suggested, but nothing definite has yet been done.

Columbus, O.—Mayor Badger on Nov. 8 signed the ordinance passed by Council appropriating $150,000 for the construction of a garbage disposal plant.

Easton, Pa.—See "Sewerage and Sewage Disposal."

Wheeling, W. Va.—The City Council on Nov. 7 appropriated $35,000 for a new crematory.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Oakland, Cal.—The Atlas Gas Engine Co. is reported to have decided to construct 3 or 4 wharves and dredge its 1,800-ft. frontage to a depth of 25 ft. and a width of 500 ft.; about $200,000 will be expended.

**Stockton, Cal.*—A. C. Russell, City Clk., writes that the contract for constructing a bulkhead on the north side of the Stockton channel (bids opened Oct. 17) has been awarded to Clark & Henery Constr. Co. at $44.50 per lin. ft.

Berkeley, Cal.—All bids opened on Oct. 28 by the Town Trus. for the construction of the municipal wharf are reported to have been rejected. The lowest bid received amounted to about $49,000.

Wallace, Idaho.—See "New Industrial Plants."

Danville, Ill.—Bids will be received until Dec. 4 by M. J. Barger, Treas. Danville Branch N. H. D. V. S., at Danville, for furnishing material and installing a telephone system at the branch, as advertised in The Engineering Record.

**Prophetstown, Ill.*—F. W. Sears, Engr. Big Slough Special Drainage Dist., writes that contract for enlarging the ditch (bids opened Nov. 11) has been awarded to G. A. McWilliams, of Walnut, at 6¼ cts. per cu. yd.

Lagrange, Ind.—The County Comrs. are reported to be preparing to ask for bids for the construction of drains in Lagrange County.

Portland, Ind.—The Comrs. of Jay County are reported to have ordered plans and specifications prepared for the dredging of Salamonia River through Knox and Penn. Townships.

**New Orleans, La.*—The Orleans Levee Bd. is reported to have awarded to the Columbia General Const. Co. the contract for filing in behind bulkhead erected by the Port Comrs. bet. Jackson Ave. and St. Andrew St. at 65 cts. per cu. yd..

Hannibal, Mo.—See "Railroads."

Jersey City, N. J.—Bids will be received until Nov. 26 by the Bd. Chosen Freeholders (Walter O'Mara, Clk.) for $140,000 Park bonds.

* *Items marked thus give the names of parties awarded contracts.*

Murray, Minn.—Bids will be received, it is stated, by I. E. Ware, Co. Aud., until Nov. 19 for constructing Ditch No. 3, requiring about 10,000 cu. yds. excav.; probable cost $...

Kyr. N. Y.—Geo. L. Henderson, Village Clk., writes that all bids received Nov. 6 for constructing a dock or bulkhead at Milton, Kys., N. Y., were returned to bidders unopened, as no bids were received for bonds which were to cover work. Chas. S. Fowle, Village Engr., 5 E. 42d St., N. Y. City.

Ft. H. G. Wright, N. Y.—Bids will be received until Dec. 11 by Capt. Wm. E. Horton, Q. M., U. S. A., New London, Conn., for constructing a timber retaining wall and for filling and grading around wharf at Ft. H. G. Wright.

New York, N. Y.—The Committee on Design of the Robert Fulton Memorial Assoc. has decided in favor of site selected at 114th to 116th St. on Hudson River for the proposed water gate and memorial, and at a meeting of the association at the office of Isaac. Guggenheim, 71 Bway, a committee was selected, including Saml. G. Clemens, Col. H. O. S. Heistand and others to determine upon a definite plan as to the form that the water gate and memorial shall take.

Albany, N. Y.—F. C. Stevens, State Supt. Dept. of Pub. Wks., is reported to have canceled contract of the Scofield Co. for construction of dams in Mohawk River and other incidental barge canal work in the vicinity of Amsterdam, the company being financially embarrassed. The Supt. of Pub. Wks., under provisions of contract, has taken charge of plant of company, in order to do such work as is necessary to insure safety of structure of present canal, and also to do what can be done to protect uncompleted structures. It is expected that the balance of the work will be readvertised and a new contract let.

Hamilton, O.—The contract for arching the Hamilton and Rossville hydraulic bet. 4th and Water Sts. is reported to have been let by the Bd. of Pub. Service to the Thos. Bridges Son's Co. for $17,000.

Minerva, O.—Bids will be received, it is stated, until Dec. 4 by the Bd. Public Affairs (L. E. Weber, Secy.) for a 150 h. p. boiler, 150 lbs. steam pressure.

Panama.—Bids will be received until Dec. 6 by H. F. Hodges, Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for pumps, engine lathe, pneumatic tools, steel plates and angles, iron roofing, copper tubing, iron pipe and fittings, valves, screw jacks, anvils, forges, etc., as per circular 402.

Norristown, Pa.—See "Sewerage and Sewage Disposal."

Ft. Adams, R. I.—Bids will be received until Nov. 22 by Capt. Willis C. Metcalf, Q. M., U. S. A., 200 Thames St., Newport, for constructing coal bin, sea wall and railway at the power house, Ft. Adams.

Providence, R. I.—The following bids for dredging Long Bed, Providence River, were opened Oct. 30 by Lieut. Col. J. H. Willard, Corps Engrs., U. S. A., at Newport (about 36,000 cu. yds.); price given per cu. yd.: R. G. Packard Co., New York, N. Y., 43 cts.; J. S. Packard Dredging Co. and Chas. M. Cole, Providence, R. I., 25 cts.; Morris & Cumings Dredging Co., New York, N. Y., 26 2/11 cts.; International Contrg. Co., New York, N. Y., 24 cts.; Columbia Dredging Co., New York, N. Y., 22 cts.; Maritime Dredging Co., New York, N. Y., 61 cts.; John A. Seeley, New York, N. Y., 48 cts., and Atlantic Dredging Co., New York, N. Y., 29 cts.

Bids will be received until Nov. 26 by Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., for elevator equipment for the U. S. Post Office, Court House and Custom House at Providence.

Port Royal, S. C.—Bids will be received until Nov. 26 by Col. J. W. Pope, Ch. Q. M., U. S. A., Atlanta, for supply f. o. b. cars, Port Royal, one 30-h. p. boiler.

Nashville, Tenn.—Bids will be received by Maj. Wm. W. Harts, Corps Engrs., U. S. A., until Dec. 14 for 1,258,605 ft. B. M. long leaf yellow pine lumber, as advertised in The Engineering Record.

Bremerton, Wash.—Bids will be received until Dec. 3 at the Bureau Supplies and Accounts, Navy Dept., Washington, D. C., for furnishing at the navy yard, Puget Sound, Wash., the following supplies: Sch. 439—One Universal radial drill, two 32-in. and two 24-in. upright drills, two 14-in. x 12-ft. engine lathes, one 16-in new model engine and tool room lathe, two 18x8-ft., two 36-in. x24 ft., two 24x18 ft. and two 18-ftx12-in. screw cutting engine lathes. Applications for proposals should designate the schedules desired by number. C. B. Rogers, Paymaster Genl., U. S. N., Washington, D. C.

Wheeling, W. Va.—The City Council on Nov. 7 appropriated $2,000 for repairing Caldwells Run.

Superior, Wis.—The Pittsburg Coal Co. is reported to have awarded contracts to the Barnett-Record Co., of Superior, and the Great Lakes Dredging Co. for work on its big coal dock at Allouez Bay, Superior, preparatory to the enlargement and rebuilding of that structure; a sum of $100,000 will be expended. Complete new steel machinery is to be one of the improvements.

North Erced, Ont.—It is stated that bids will be received until Nov. 29 by Fred Gelinas, Secy. Dept. Pub. Wks., Ottawa, for constructing a wharf and stone approach at White Cloud Island, Georgian Bay. J. G. Sing, Engr., Confederation Life Bldg., Toronto.

Port ..., Ont.—Bids will be received, it is stated, until Nov. 26 by Fred Gelinas, Secy. Dept. Pub. Wks., Ottawa, for constructing a wharf and stone approach at R... J. G. Sing, Engr., Confederation Life Bldg., Toronto.

CURRENT NEWS SUPPLEMENT

NOVEMBER 23, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

American Society of Civil Engineers. Secretary, Charles Warren Hunt, 220 West 57th St., New York. Next meeting, December 4, 1907. Paper, "Invar (Nickel-Steel) Tapes on the Measurement of Six Primary Base Lines."

American Society of Mechanical Engineers. Secretary, Calvin W. Rice, 29 West 39th St., New York. Annual meeting, New York, Dec. 3-6, 1907.

American Institute of Electrical Engineers. Secretary, Ralph W. Pope, 29 West 39th St., New York. Next meeting, December 13, 1907. Paper on Duplex Stoker Boiler and Results of Tests.

American Institute of Mining Engineers. Secretary, R. W. Raymond, 29 West 39th St., New York.

National Fire Protection Association. Secretary, W. H. Merrill, Jr., Chicago.

American Institute of Architects. Secretary, Glenn Brown, Washington, D. C.

Association of Engineering Societies. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

American Society of Heating and Ventilating Engineers. Secretary, W. M. Mackay, 113 Beekman St., New York.

Canadian Society of Civil Engineers. Secretary, Clement H. McLeod, 877 Dorchester St., Montreal.

Society for the Promotion of Engineering Education. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

American Society for Testing Materials. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

American Railway Engineering and Maintenance of Way Association. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago

American Water Works Association. Secretary, J. M. Diven, Charleston, S. C.

American Public Works Association. Secretary, W. H. Flint, Chattanooga.

Association of American Portland Cement Manufacturers. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

National Association of Cement Users. President, Richard L. Humphrey, Harrison Building, Philadelphia

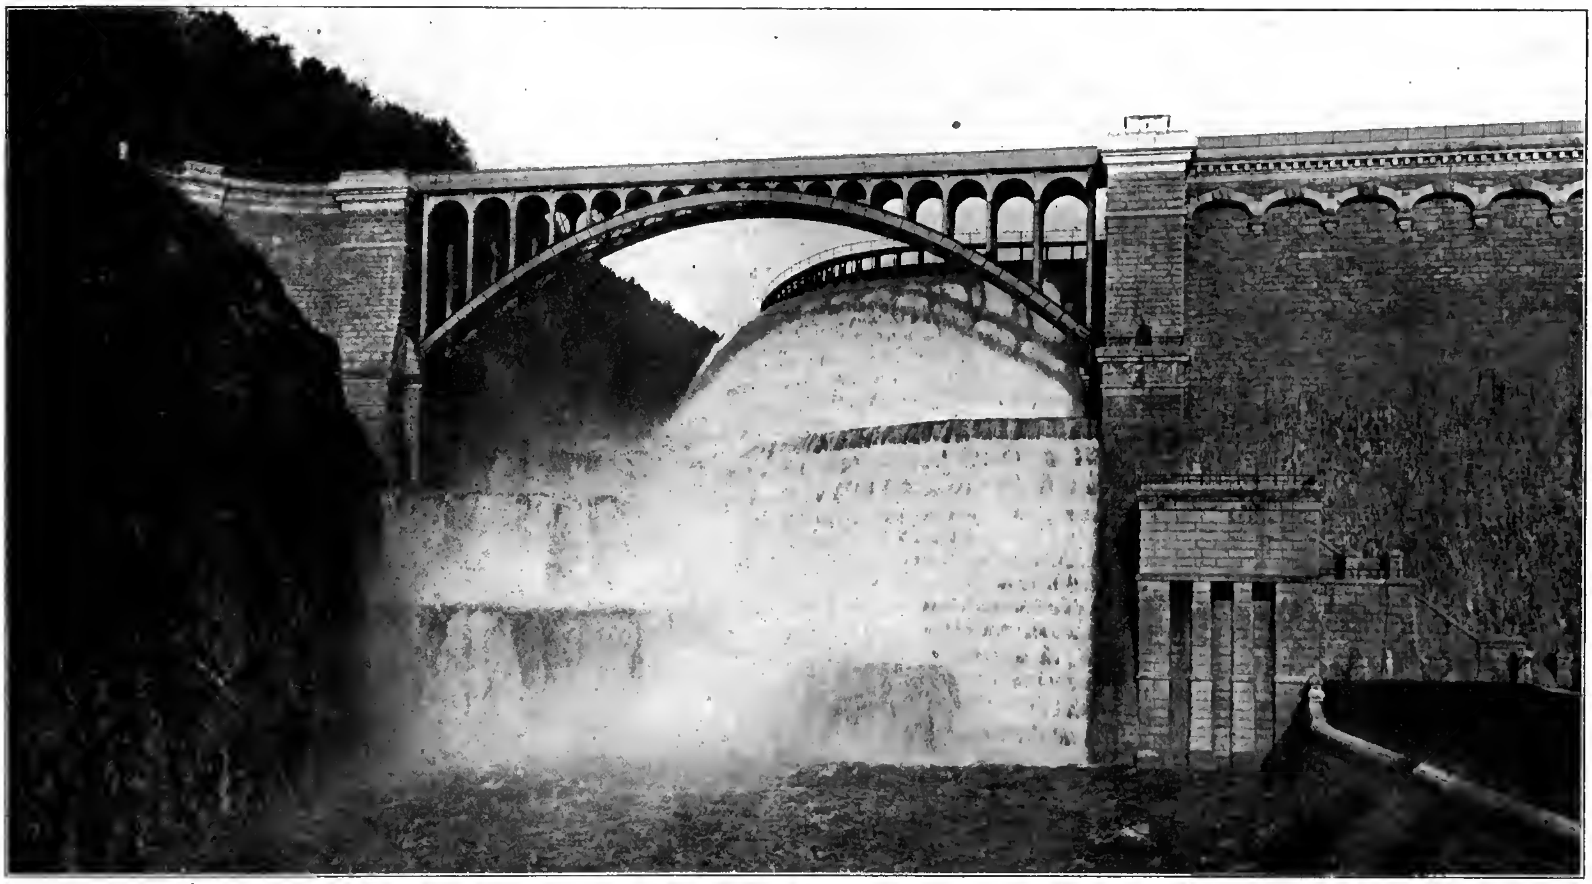
American Society of Refrigerating Engineers. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

American Public Health Association. Secretary, Dr. C. O. Probst, Columbus, O

THE FILLING OF THE NEW CROTON RESERVOIR.

The 38,000,000,000-gal. reservoir formed by the new Croton dam has recently been filled and water ran down the spillway for the first time on Nov. 6. This reservoir impounds the water that overflows from the ten dams in the Croton valley above it and is a lake having a maximum length of nearly 20 miles. During last month it has supplied a daily average of 314,000,000 gal. of water to New York City.

The dam now presents a beautiful appearance on account of the large volume of water pouring over the waste weir, falling in cascades down the spillway to the channel at the foot of the dam through which it finds its way to the original bed of the river. The overflow sweeps around the end of the main structure and, passing under the 200-ft. arch roadway span, makes a total descent of about 150 ft. The fall is broken by curved steps which, although intended to diminish the impact of the falling mass, add greatly to the beautiful effect.



NORTH END OF NEW CROTON DAM, SHOWING WATER DISCHARGING OVER WASTE WEIR INTO SPILLWAY FOR FIRST TIME.

It will be remembered that this dam, which has been fully described in many articles in these columns, was commenced in 1892 and was officially completed Jan. 17, 1906, at a total cost of about $7,500,000. It is notable for being the highest and largest dam yet constructed and contains about 850,000 cu. yd. of masonry, which extends about 150 ft. above the surface of the ground at the foot of the dam and to a nearly equal depth below it, where it has an extreme width of about 206 ft. At the top there is an ornamental cornice and balustrade along the roadway crossing it, the width being about 26 ft. over all, while the minimum width of the dam is 18 ft. The dam is built entirely of granite masonry faced with ashlar, and has at one end a waste weir 1,000 ft. long nearly at right angles with the axis of the dam and 16 ft. below its crest. The water flows over the crest of the waste weir into a spillway 40 ft. wide at the upper end and 200 ft. wide at the lower end, which was formed by excavating about 400,000 cu. yd. of rock out of the side of the valley.

Cast-iron brackets 12 ft. high are set about 8 ft. apart on the large granite coping blocks on the crest of the waste weir and are provided with two vertical grooves 8 in. apart. The brackets carry a reinforced concrete platform 3 ft. wide, provided with a hand-rail on one side and a track for a small car for handling the flash boards. This platform serves as a sidewalk and enables the attendants to place 4x12-in. horizontal planks in the vertical grooves and fill the space between them, if necessary, with puddle. At the end of the platform a reinforced concrete house is built on the bastion for the storage of the planks and of necessary tools.

During September the average rain-fall recorded at ten stations in the Croton valley was 10.82 in. During October it was 8.43 in., including a 4-in. fall for Oct. 27, 28 and 29. On Nov. 2 there was a fall of from 1 to 1½ in., and on Nov. 6 a fall of 1½ to 1¾ in. This large precipitation caused so great a run-off that the water in the reservoir rose rapidly, until on Nov. 7 it was about 1 ft. above the crest of the waste weir. The remarkable rapidity with which this water was stored was indicated by the difference in capacity of the reservoir at the different levels during the week, which amounts to 1,586,000,000 gal.

Observations have been made on the tightness of the dam, and no important percolation through it has been observed. A slight seepage does, of course, take place through the masonry, but it is only on dark or cloudy weather that moisture can be observed on the downstream face. This has been noticed to maintain a distance of about 30 ft. below the water level on the upper side of the dam as the latter fluctuates. A very careful examination below the dam fails to show as yet the appearance of any new springs or evidences of leakage through or around its foundations. No indications of change in the ground water level in the adjacent country have yet been observed above the dam, but it is possible that these may later appear.

The dam was built under the direction of the Croton Aqueduct Commission during the administration of several successive chief engineers, commencing with the late Mr. Alphonse Fteley and succeeded by Messrs. W. R. Hill, J. Waldo Smith, and Walter H. Sears. Messrs. Coleman, Breuchaud & Coleman were the contractors.

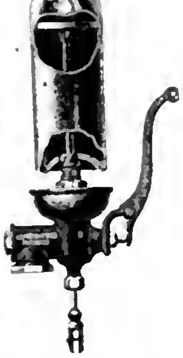
THE FIRST ANNUAL CEMENT SHOW AT CHICAGO.

The First Annual Cement Show will be held in Chicago at the Coliseum, Dec. 17 to 21. The Exposition will be held under the auspices of the Cement Products Exhibition Co., incorporated under the laws of the State of Illinois for the purpose of holding annual expositions of cement products. The enterprise is being promoted by Portland cement manufacturing interests of the Middle West. The Exposition will be of marked educational importance, and will accomplish a good work in advancing the interests of the concrete industry. The scope of the Exposition may be judged from the outline of the various divisions of exhibits as follows. Cement, concrete mixers, block machines, brick machines, cement pipe machines, cement tile machines, cement post machines, cement coloring mixtures, reinforcing metal, cement publications, testing machinery, sheet piling, aggregates, sand, technical institutions, etc. The management of the show has been placed in the hands of Mr. L. L. Fest, an experienced manager of great trade exhibitions of this nature. His connection with the affair is an assurance of its energetic and competent supervision.

The time of the Exposition is opportune, coming as it does during the holiday season, when the cement men from all over the West come to Chicago. It is hoped by those in charge that everybody directly or indirectly interested in the cement industry will do something to contribute to the success of this great demonstration intended to exploit cement as a leading building material of the future.

A NEW FIRE ALARM WHISTLE.

The cut herewith illustrates an improved form of whistle manufactured by The Lunkenheimer Co., of Cincinnati, Ohio, and known as a combination or fire alarm whistle. It answers the purpose of an ordinary whistle, as well as of a fire-alarm, and is provided with a piston, to be worked up or down within the bell, thus changing the length, and consequently, also the tone. When the piston is not operated, the whistle gives but one tone like any plain whistle, but when pulled up or down, a howling, penetrating noise is produced. An extension rod is connected to the fork at the bottom of the piston rod, when the whistle is placed above the roof of a building, and a rope or wire is attached to the valve lever for the purpose of operating it.



At its upper end the bell is dome-shaped, and its lower end is securely supported by a three-arm spider, the stem of which is adjustably screwed into the whistle base and fastened by a lock-nut. This construction keeps the lower edge of the bell always in line with the slot in the base, through which the steam escapes, thereby insuring best results by the production of a perfectly clear and loud tone.

THE DEVELOPMENT OF SMALL CURTIS TURBINES.

Mr. R. H. Rice contributed the following account of the development of small Curtis turbines to a recent number of the "General Electric Review."

The first small Curtis turbines produced by the General Electric Co. were constructed and installed some four years ago. These first units, which were designed for 160 lb. steam and 80 volts, had a capacity of 15 kw. and were used for train lighting. They were of the square type, so-called on account of the cross section of the generator frame, and were originally placed on pilots of locomotives, a location extremely exposed to dust, cinders, rain and extremes of temperature. In order to avoid any possible detriment from this exposure, these sets were removed later to the baggage car, where they gave very satisfactory service. The present machines of this size, "round type," embody the results of all the experience gained with the old type, and are designed both for installation in baggage cars and for mounting on the top of the locomotive boilers. In this latter type the generator is so perfectly enclosed that no moisture or dust can gain access to the commutator or windings.

A particularly inviting field presents itself in the use of these sets mounted on the locomotive boiler, for use in lighting suburban trains; in which case the turbine is used without battery or other complicated and expensive apparatus, and the necessity for the employment of a flexible steam coupling is entirely eliminated. A number of sets are being installed in this way, and this use is undoubtedly destined to increase in popularity as its simplicity and reliability become demonstrated.

Beginning with these train lighting sets, many sizes have been developed, all of the horizontal type, up to 300 kw. These machines have until recently been of the direct current type, and for voltages varying from 80 to 250. All the generators are connected to the turbines directly without gearing and consequently run at turbine speeds. The Curtis principle renders this possible, and permits the attainment of excellent results with great simplicity of mechanism. In order, however, to attain good operation at turbine speeds, special methods of commutator construction had to be devised which would be capable of maintaining the commutator bars in absolutely fixed relationship against the influence of considerable centrifugal forces. In fact, this relationship has to be maintained more perfectly than is necessary in case of slower running machines on account of the increased liability to mechanical sparking present at high speeds. As might be expected, however, commutators constructed to meet these conditions are more rigid and more perfect than those made in the old way; they possess greater wearing depth and are therefore capable of longer life.

The construction of the turbine and of these sets has been so planned as to obtain the greatest possible simplicity. Naturally, there are differences in design in machines varying as widely in capacity as 300 kw. and 15 kw. In the larger unit economy in the use of steam is perhaps the most important consideration; while in the smaller one simplicity and small bulk are the prime requisites. These, and similar considerations, will be found to have influenced the development consistently.

In the smallest sizes plain throttling has been used for governor control, since this method is the simplest possible; and as the size of the unit increases, the governing methods are increased in perfection from an economical standpoint, with the necessary accompaniment of a larger number of parts. So also in the construction of the turbine itself; the smaller sets have only a single stage, while as the capacity is increased, stages are added in order to increase the efficiency.

In this connection it may be noted that the Curtis type of turbine permits extreme of simplicity in the support of the shaft in these smaller sizes. These machines are provided with two bearings only, one of which does all the work, while the other simply maintains the shaft alignment. Machines with a multiplicity of stages, or of the reaction type, which require long drums and many rows of buckets, necessarily have to have a number of bearings. Some of the Curtis machines now have four bearings, but the tendency in recent designs is toward the use of two, or three at the most. In the latter case, the form of flexible coupling used ensures perfect operation, without the necessity of maintaining absolute alignment of bearings.

A surprising perfection of speed control has been attained in this apparatus, due to the use of governors working on knife edges and therefore without friction; to the valve gears instantly responding to the action of the governor; and to the fact that action of the valve gear makes itself felt in the control of the turbine speed without any lag. In governing an engine no effect can be produced on the speed except at one point in each stroke (the point of cut-off), and consequently there is frequently considerable lag between governor action and speed control. In the turbine, however, where the steam flow can be varied at any instant, no lag occurs and speed control is more prompt.

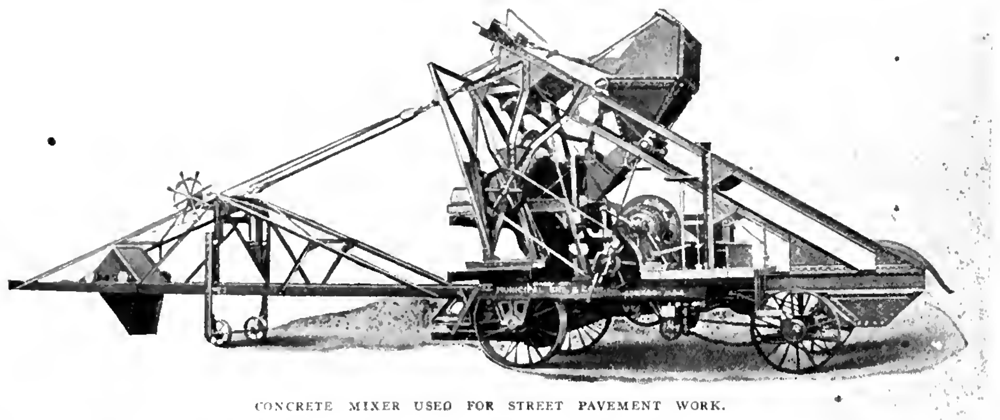
In these machines every effort has been made to reduce the amount of attention required to a minimum. Lubrication is as nearly automatic as possible; the packings are non-adjustable and durable; the polished surfaces are small in extent; and the oil is confined to the inside of bearings and does not escape, therefore the machines are readily kept clean. Furthermore the generators are of open construction, so that brushes may be readily attended to and windings kept clean. Additional safety governors are always provided which act to stop the apparatus when the speed, for any reason, reaches a certain predetermined maximum in excess of normal.

The New York Cableway & Engineering Co., a Rector St., New York, has issued a folder illustrating a typical cableway system of its design, and also the hoisting engine built for operating the cableway.

A SPECIAL CONCRETE MIXER FOR STREET WORK.

Most paving contractors have at one time or another experimented with some kind of a concrete mixer, and while a great saving in labor can be realized with mechanical mixers on every other kind of work, the laying of concrete base for street pavements involves conditions that have not, until very recently, been overcome. In other words, the work of setting up and taking down a mixer, building platforms, runways, etc., for each block of work, conveying the mixed concrete from the mixer to the work in wheelbarrows or carts, for which runways are usually necessary, bring the cost so high that the small saving in labor over hand work would not justify the purchase of a machine, a better quality of concrete being practically the only inducement.

The Municipal Engineering & Contracting Co., Railway Exchange, Chicago, recogizing that some special machine for reducing the cost of handling materials on this kind of work must be devised, and looking at the matter from the contractor's standpoint, have been experimenting with that end in view. The accompanying illustration shows a machine brought out by them some months ago, which has been in operation during the past season by one of the largest street paving concerns in the East, with results so satisfactory that the manufacturers have decided to place the machine on the market next season along with their regular "Chicago Improved Cube" mixer. Recently the machine referred to mixed and put in place 1,000



CONCRETE MIXER USED FOR STREET PAVEMENT WORK.

sq. yd. of concrete base 6 in. thick in less than 8 hours, with 17 laborers, which reduces the labor cost to about one-half that of hand work.

The machine consists of one of their standard cube mixers mounted on an extra heavy truck frame, discharging from the rear into a specially-designed bucket which receives the whole batch and travels rearward on a truck which is 25 ft. long and pivoted to swing either way 80 to 85 degrees, permitting the placing of the concrete just where wanted on a street 50 ft. wide. There is also a device for quickly and economically elevating the material and charging the mixer, which consists of an elevating hopper traveling on an inclined track and dropping down to the ground in front of the machine, where the entire batch of ingredients can be dumped in from wheelbarrows, or materials can be shoveled in directly from the piles which have been previously distributed along the street. There is an automatic water-measuring supply tank mounted in the upper part of frame, which insures a uniform supply of water at all times.

The machine has a substantial self-propelling device with both go-ahead and back-up motion and complete steering gear. Future machines will be equipped with steam power. The manufacturers aim to carry these machines in stock next season, but at present delivery can be made, it is understood, in about six weeks.

PERSONAL NOTES.

Messrs. Chester Stevens and Harry Keerl will open an office for civil engineering work at Mason City, Ia.

Mr. Glenn D. Holmes has been appointed chief engineer of the Intercepting Sewer Board, of Syracuse, N. Y.

Richard D. Hurley, manager of the Pittsburg office of the Independent Pneumatic Tool Co., died at Chicago, Ill., Nov. 5, of heart disease, aged 39 years.

Mr. H. H. Russell, supervisor of the Maryland division of the Pennsylvania R. R., has been made assistant engineer of the Allegheny division at Pittsburg, succeeding Mr. J. R. McGraw.

Mr. Charles E. Phelps, Jr., and Mr. Charles G. Edwards, have been re-elected chief engineer and assistant engineer, respectively, of the Baltimore Electrical Commission.

President Roosevelt recently reappointed Rear Admirals Charles W. Rae and W. L. Camps, U. S. N., to be chief of the Bureau of Steam Engineering and chief of the Bureau of Construction and Repairs of the Navy Department, respectively.

Mr. H. B. Ayers, for the past two years in charge of the Canadian Locomotive Works and prior to that general manager of the Pittsburg Locomotive Works, has become general manager of the locomotive works of the H. K. Porter Co., Pittsburg, Pa.

Mr. William H. Ford, for several years sales manager of the Kosmos Portland Cement Co., has been elected vice-president of the William G. Hartranft Cement Co., of Philadelphia, and first vice-president and general manager of the William G. Hartranft Cement Co. of Canada, with general sales offices in Montreal.

Col. Garrett J. Lydecker, Corps of Engineers, U. S. A., division engineer of the Central Division, with headquarters in Detroit, Mich., has been placed on the retired list, having reached the age limit of 64 years. He was retired with the rank of brigadier general, the advance in rank being in recognition of his service in the civil war.

Capt. George M. Hoffman, Corps of Engineers, U. S. A., in charge of river and harbor work in the vicinity of Vicksburg, Miss., has been detailed for duty with the Isthmian Canal Commission. He will be relieved at Vicksburg by Capt. Clarke S. Smith, commanding Company G, Second Battalion of Engineers, on duty connected with road construction in Cuba.

The United States Civil Service Commission will hold an examination, Dec. 11, in the large cities of the country, of candidates for the position of assistant superintendent of construction in the Quartermaster's Department at Large. On Dec. 11 and 12 the Commission will also examine candidates for the following positions: Engineer draftsman, in the office of the Supervising Architect, Treasury Department mechanical draftsman and topographic draftsman, in the service of the Isthmian Canal Commission.

Storm Bull, professor of steam engineering at the Univercity of Wisconsin, died, Nov. 18, at his home in Madison. He was born in Bergen, Norway, in 1856, and was graduated from the Federal Swiss Polytechnic Institute in 1877, receiving the degree of Engineer of Mines. After two years of professional work in America, he became an instructor in the University of Wisconsin in 1879, and was made a full professor five years later. He was a member of the American Society of Mechanical Engineers, the Society for the Promotion of Engineering Education, and the Western Society of Engineers.

The Secretary of Agriculture has divided into two sections the irrigation and drainage investigation work of the Office of Experiment Stations, formerly managed by Dr. Elwood Mead, who recently resigned to assume direction of government irrigation work in Australia. Dr. Samuel Fortier, irrigation engineer in charge of the Pacific district of the irrigation and drainage investigations, and stationed at the University of California, Berkeley, Cal., has been made chief of irrigation investigations. Mr. C. G. Elliott, for several years past engineer in charge of the drainage investigations of the Office, has been made chief of drainage investigations.

H. W. Scott, principal assistant city engineer of Seattle, Wash., whose death was noted in these columns Nov. 16, had been in the service of the city continuously since 1888. One of his most important pieces of work before entering its employ was the location of the Seattle, Lake Shore & Eastern R. R., now the Seattle & International. His first important work for the city was the direction of the construction of the Cedar River water system. After the completion of this project he was made principal assistant city engineer, with general supervision of all city work. He continued in this capacity until three years ago, since when he has been in charge of the construction of all water system extensions. He was the treasurer of the Pacific Northwest Society of Engineers for several years.

BUSINESS NOTES.

The General Fireproofing Co. announces the removal of its Washington offices from 420 Colorado Building and 501 Fourteenth St., to 725 Fourteenth St., N. W., corner of New York Ave. Samples of Allsteel furniture, and materials for reinforcing concrete and for fireproofing are kept on hand. Mr. W. A. Kennedy is district manager, and Mr. C. A. Hamilton is in charge of the Allsteel furniture department.

The Birmingham branch office of the Sullivan Machinery Co. is now located at 1 Twentieth St., South, where additional space is provided for rock drills and their parts and the other mining and quarrying machinery carried in stock.

The Northern Engineering Works, Detroit, Mich., reports the following recent sales: The Hilgartner Marble Co., Baltimore, 3-ton crane; Erie Foundry Co., Erie, Pa., 3-motor 10-ton electric traveling crane; Peninsular Motor Co., Grand Rapids, Mich., No. 54 Newten cupola; the Modern Iron Works, Quincy, Ill., No. 66 Newten cupola.

The New York offices of the Raymond Concrete Pile Co. have recently been moved to 140 Cedar St., in the new West Street Building, where more commodious quarters have been secured than those previously occupied. The company has been carrying out a number of contracts for concrete pile foundations lately and has recently secured one for the pile supports of the electric wiring conduit in the Long Island R. R. terminal at Long Island City, probably the first use made of concrete piles for such a purpose. Another contract which is of special engineering interest is for the footings of the Cuyahoga viaduct of the Cleveland Short Line.

The past year has been a busy one for the Artesian Well & Supply Co., Banigan Bldg., Providence, R. I., which has sunk about eighty wells and is now at work on about a dozen more. Two of the wells were 13-in. holes for elevators, but most of the work was sinking 8-in. wells for water. A number of the wells were for the Citizens Water Supply Co., Douglaston and Little Neck, N. Y., which contracted with the Providence company about two years ago; up to date 53 wells have been sunk, all flowing, which yield 9,000,000 gal. of water daily.

It is understood that the report for the last quarter of the Union Switch & Signal Co. will show very favorable returns. Net earnings for the year are estimated at $1,100,000 on a total capital stock of $2,500,000 and bonds of $243,000. There are $1,250,000 of accounts receivable and enough money in the bank to meet pay rolls for two months if no more money is collected within that time.

The Steel Protected Concrete Co., Philadelphia, states that it has appealed from the recent decision of Judge Saunders of the U. S. District Court holding three of the six Wainwright curb patents to be void.

Mr. George A. Gallinger has been appointed manager of the Pittsburg office of the Independent Pneumatic Tool Co., of Chicago. The office is at the Farmers Bank Bldg., and a complete line of Thor tools and spare parts will be carried there.

The New Jersey Zinc Co., Franklin Junction, N. J., has ordered two 22x48-in. Allis-Chalmers duplex direct-acting Corliss hoisting engines, with double drums. They will handle a total load of 19,600 lb. up an incline of 47½ deg. from a vertical depth of 1,050 ft.

Mr. C. W. Whitney has resigned as manager of the Publicity Department of Abner Doble Co. and accepted a position as purchasing agent with the Ransome Concrete Co., of California, whose main offices are in the Crocker Building, San Francisco. In addition to the regular duties of his new office, Mr. Whitney will have charge as well of publicity matters, for which his previous experience well qualifies him.

The Berger Mfg. Co., Canton, Ohio, has constructed at 11th Ave. and 22d St., New York, a building in which the visitor has an opportunity of seeing metal ceiling work of satisfactory workmanship. The company manufactures a great variety of such ceilings and wall coverings, and its purpose in fitting up the building mentioned is to show how to avoid butchering this material in putting it in place.

TRADE PUBLICATIONS.

Slip-drum electric winches for hauling car floats are described in bulletin 21, just issued by the Lidgerwood Mfg. Co., 96 Liberty St., New York. These winches are designed to place the entire control of hauling in a car float in the hands of one man, the frictional drive of the winding drum exerting full power without danger to the hawsers, but permitting slippage if the proper strain is exceeded or the float is clear into its berth. It also facilitates control of the float if the mooring gear should part, pulling it steadily back into place until moored again, slippage of the drum occurring in case there may be a tendency to back away. This winch mechanism was designed for the transfer terminals of the Pennsylvania R. R. at its new freight yards at Greenville, N. J., and South Brooklyn, N. Y., using the type of slipping friction drum developed for maintaining a constant tension on the cables of the Lidgerwood cableways for coaling war ships at sea. The friction can be adjusted at will, those above referred to being set to exert a pulling strain of 11,000 lb. on the hawser before it begins to slip, reducing then to 9,000 lbs., which is maintained as long as slippage occurs.

A 55 per cent. saving in current consumption through the use of roller bearings on street car journals is announced by the Standard Roller Bearing Co., 5003 Lancaster St., Philadelphia, in a folder recently issued. The folder reprints an article that was published in the Street Railway Journal giving the results of a series of tests on an electric car at Syracuse, N. Y., in which roller bearings supplied by this company were used. Details of the tests and a description of the bearings are given.

The C. O. Bartlett & Snow Co., Cleveland, Ohio, has issued its 1908 catalogue of elevating, conveying, mining and milling machinery and supplies. It is a 325 page book, containing in the first portion illustrations of special coal-loading machines, coal carriers, fueling scows, coal and ore elevators and other labor-saving machinery. Following this are listed a variety of milling machinery for oatmeal and other food stuffs, and grain elevator equipment, and also machinery for other industries, such as cement machinery, gypsum machinery, phosphate machinery and paint mills. A large stock of millwright supplies which are kept on hand is also listed.

The North Star Ash Can Co., 167 Chrystie St., New York, has issued a folder relative to its extensive line of ash and stable cans and masons' salamanders. The latter are made with grates of angle iron that cannot be broken. Special engineers' ash cans are offered for use in office building plants where large quantities of ashes are handled, the body of the can being protected by four heavy bars and having a removable malleable iron bottom.

The October bulletin of the Barriett Electric Mfg. Co., Cincinnati, describes the company's polyphase induction motors, which are made in all sizes from ½ to 50 h. p. for two and three phase circuits and all standard voltages. The leading details of the design are explained.

The economical heating of water and air in breweries and malt houses is the subject of a bulletin of The Green Fuel Economizer Co., Matteawan, N. Y. Half of the bulletin consists of a study of hot water and boiling by steam for breweries, reprinted from the proceedings of one of the German steam engineers' societies. The methods and results obtained in utilizing the furnace gases before allowing them to escape are studied at length and an ideal arrangement for the hot water and boiling-steam supplies for a brewery are presented. The second half of the bulletin treats of the blower and exhaust systems for malt houses and breweries, and describes the company's apparatus for this work.

Some interesting data and pictures relating to dredging and harbor improvements are brought together in a booklet descriptive of the work of the North American Dredging Co., engineers and contractors, main office, Merchants' Exchange Bldg., San Francisco, Cal. The company has dredging plants of the sea-going self-propelling type capable of steaming to any part of the world, and acts as consulting engineer on all kinds of river and harbor work, levees, earth dams, canals and similar works. Among the interesting views are one of the sea-going, self-propelling hydraulic dredge "Pacific" discharging through 6,000 ft. of pipe and elevating material 16 ft. at Tacoma, Wash., a number of views of large fills made by the same dredge at Honolulu, one of the dredge "Galveston" discharging through 10,500 ft. of pipe with a vertical lift of 17 ft. at Galveston, Tex., and one of a levee building dredge with a 155-ft. boom having a 6-yd. clam-shell bucket at its end. The capacity of the large dredges is given between 200,000 and 300,000 cu. yd. of earth each per month, when discharging through 6,000 ft. of pipe. The indicated horse-power in 1,600, 1,200 for the pumps and 400 for auxiliary machinery. They are capable of dredging a channel 50 ft. deep and 200 ft. wide at one operation.

Two publications recently received relate to Smith concrete mixers made by The T. L. Smith Co., Milwaukee, Wis., and sold by the Contractor's Supply and Equipment Co., Old Colony Bldg., Chicago. The first of these publications is a catalogue, No. 13, stating the increases in plant equipment made by the manufacturers to keep pace with the growth of business, and describing the Smith mixer, the various methods of mounting it with steam and gasoline engines, side loading cars, self-contained side loaders and batch feeding hoppers. A list at the end gives full data on Smith mixers of various sizes. The second publication is a mixer manual for the use of salesmen and operators of Smith mixers, which in addition to the data of the first publication, contains many things of value to the contractor who is operating concrete mixers. A series of questions and answers makes plain the requisites of good concrete, and suggests the way of best complying with these requisites. Data on ordering mixers fitted with hoists, on friction clutches, cart pullers for inclines, setting up mixers, and their proper care, as well as illustrations and descriptions of various parts for convenience in ordering repairs, are certain to be of value to contractors and mixer operators.

Economy drawing tables in great variety from simple tables without any drawers to elaborate outfits with conveniences for a great quantity of drawing materials and for storing tracings and blue prints, are shown in a catalogue of the Economy Drawing Table Co., 1303 Utah St., Toledo, O. Sectional filing cases for drawings are also listed and described.

Symons crushers, made by the Smith & Post Co., Merrill Bldg., Milwaukee, Wis., and sold by the Contractor's Supply and Equipment Co., Old Colony Bldg., Chicago, are described in a small folder recently received. Both the gyratory and jaw crushers are shown mounted on trucks so as to be readily moved about.

A recent bulletin of the General Electric Co., Schenectady, N. Y., is devoted to catenary line material. The details of the equipment which are fully described and illustrations are presented of the various forms of construction for single and double track, curves, anchorages, etc. Another new bulletin is devoted to direct-current motor starting rheostats types SA and SO.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Bay Minnette, Ala.—See "Public Buildings."

Ft. Morgan, Ala.—We are informed that the following are the bids which were opened in Sept. at the office of the Quartermaster for a 150,000-gal. elevated tank and a 75-ft. tower, and which were rejected: R. D. Cole Mfg. Co., Newnan, Ga., $20,150, and the Chicago Bridge & Iron Wks., Chicago, Ill., $19,250. New bids will be received on Nov. 28 by Capt. L. F. Garrard, Q. M., U. S. A.

**Oceanside, Cal.*—H. D. Brodie, City Clk., writes that the contract for one horizontal return tubular boiler 48 in. in diam. and 16. ft. long, and one cross-compound, high-duty pumping engine of 1,000 gals. capacity (bids opened Nov. 5) has been awarded to the Pacific Coast Mfg. Co., of Los Angeles, for $16,862.

Denver, Colo.—The Antero & Lost Park Reservoir & Canal Co. is reported incorporated, with a capital of $2,000,000, by Horace G. Clark, clerk of the Supreme Court; E. J. Riethmann and Geo. A. Starbird, of Denver; S. J. Perry and D. A. Camfield, of Greeley, and others. The company will build two dams. The larger, at Antero, will cover 4,000 acres and have a capacity of 3,000,000,000 cu. ft. of water. One branch of South Platte River will supply water to this reservoir. The other will be at the middle fork of the South Platte. The reservoir will be fed by the Four-Mile, High and Goose Creeks. The company will supply the High Line ditch lands and the irrigable land under the Burlington ditch. Work upon the project is said to have already been commenced.

**Atlanta, Ga.*—Bids were opened on Nov. 12, by the Bd. of Water Comrs. for 13,000 ft. of 36-in. water pipe, and the contract is reported to have been awarded to the U. S. Cast Iron Pipe & Fdy. Co., of Chattanooga, Tenn., at $24.97 per ton for c. i. pipe.

Elgin, Ill.—The City Council is reported to be considering the question of erecting a stand pipe on N. Spring St., to cost about $10,000.

Elkhart, Ind.—The City Council is reported to have selected C. A. Maltby of Chicago, Ill., to prepare plans and specifications for water works.

Evansville, Ind.—The City Council is reported to have decided to construct a mechanical filtration plant.

Claremore, Ind Ter.—The citizens are reported to have voted to expend $40,000 to extend the water works.

Russell, Mass.—T. H. Clark is reported to have been selected to investigate the question of installing municipal water works.

**Baudette, Minn.*—M. D. Stoner, of Bemidji, and C. W. Jewett, of Blackduck, are reported to have secured the contract for constructing water works at Baudette.

Stevensville, Mont.—The Town Council is reported to be considering the question of constructing water works.

Benson, Neb.—The citizens are reported to have voted to issue $9,000 bonds for the improvement of the water system.

Jersey City, N. J.—Bids will be received until Nov. 25 by the Bd. Street and Water Comrs. (Geo. T. Bouton, Clk.) for furnishing and delivering special castings; also water gate boxes and covers and manhole heads and covers.

Verona, N. J.—T. E. Brooks, Boro. Clk., writes that the citizens on Nov. 14 voted in favor of constructing water works. Another election will be held to vote on amount to be raised by bonds, the date of which has not yet been decided upon. Engineer not yet appointed.

Roswell, N. M.—Fred J. Beck, City Clk., writes that an election will be held on Jan. 15, to vote on issuing $155,000 bonds for water works and sewer extensions. If the election is successful, bids will be invited and work will be in charge of a commission, consisting of John W. Poe, J. F. Hinkle and R. D. Bill.

Syracuse, N. Y.—We are informed that the question of constructing high service reservoir and conduit line to Skaneateles Lake will not be definitely decided until after official state canvass of returns in Dec. If it is found that the amendment to the constitution carried on Nov. 5, plans will be prepared and contracts let soon after Jan. 1. Henry C. Allen is City Engr.

Durhamville, N. Y.—Bids will be receievd until Nov. 26 by F. C. Stevens, Supt. Pub. Wks., Albany, for constructing a new aqueduct under the Erie Canal at Durhamville on the line between the counties of Madison and Oneida.

New Brighton, S. I., N. Y.—The Mayor of the City of New York, on Nov. 11, approved the ordinance passed by the Bd. of Aldermen on Oct. 29, providing for an issue of corporate stock in the sum of $1,100,000 to provide means for the purchase of the property and franchises of the Staten Island Water Supply Co.

Wilmington, N. C.—The Bd. of Aldermen is stated to have adopted the recommendation of the special committee that a contract be entered into with the Clarendon Water Works Co., for the purchase of its plant for $140,000.

Grand Forks, N. D.—It is reported that bids are wanted for extending water mains in several streets. W. V. O'Connor, City Aud.

Ironton, O.—It is stated that bids will be received until Dec. 10 by F. A. Ross, City Aud., for $10,000 water and street improvement bonds, also until Nov. 26 for $20,000 water works bonds.

Wilmington, O.—The Village Council is reported to have passed on second reading, an ordinance granting [illegible] Neff a franchise for water works.

[illegible] *Okla.*—C. F. Dunham, City Clk., writes that Burns & McDonnell, Dwight Bldg., Kansas City, Mo., are preparing plans for water works to cost about $50,000.

Pawhuska, Okla.—See "Power Plants, Gas and Electricity."

Eugene, Ore.—It is stated that bids will be received until Jan. 6 by B. F. Dorris, Recorder, for $300,000 water bonds.

**Philadelphia, Pa.*—We are informed that the following are the bids opened on Oct. 22 by the Dept. of Pub. Wks., Bureau of Filtration (Fred C. Dunlap, Ch. Engr.) for Contract 126, two pumping engines of 20,000,000-gal. capacity, for Lardner's Point pumping station: Walter Wood, 400 Chestnut St., Philadelphia, $294,000; Holly Mfg. Co., Buffalo, N. Y., $268,769 (awarded contract); Southwork Fdry. & Mch. Co., Washington Ave. & 5th St., Philadelphia, $272,000; Allis-Chalmers Co., Milwaukee, Wis., $284,000, and Bethlehem Steel Co., So. Bethlehem, $244,800. Each engine of the Holly Mfg. Co., the successful bidder, will perform a duty of not less than 172,000,000-ft. lbs. per 1,000 lbs. of dry steam, the first engine to be installed in 360 days and the second in 420 days.

Bids will be received until Nov. 27 by the Dept. Pub. Wks. (Geo. R. Stearns, Dir.), for Sch. A—Restoring burnt portion of testing station, cast iron force main, etc.

Ridgeville, S. C.—See "Power Plants, Gas and Electricity."

Temple, Tex.—This city is reported to have decided to purchase the plant of the Temple Water Works Co., and will make improvements to same.

Roanoke, Va.—The Roanoke Gas & Water Co. is reported to be preparing to lay 4 miles of 10-in. to 4-in. water mains. It is stated that a new pumping station will be installed in the spring. H. H. Baughman, Supt.

Spokane, Wash.—The City Council on Nov. 12, acting on recommendations from Mayor Moore and the Bd. of Health, with which were submitted reports of experts, ordered the Bd. of Pb. Wks. to proceed at once with the installation of the necessary machinery for the development of the underground flow.

**Seattle, Wash.*—The International Contract Co., 636 New York Block, has secured the contract for constructing water mains on E. 65th St. and on 3d Ave. S. for $6,475.

The City Council on Nov. 11, ordered the laying of salt water mains on 1st, 2d and 3d Aves., from Pipe St. to Jackson St., about 10,067 lin. ft. of 20-in. C. I. pipe, and 9,438 lin. ft. of 16-in. C. I. pipe. There will also be built, at the foot of Madison St., an auxiliary pumping station of concrete and brick, 20 x 40 x 60 ft. with eight 5-stage centrifugal pumps, direct connected electric motor. Capacity of motor, 2,600 H. P., plant to be capable of pumping 12,000 gal. per minute; total estimated cost of mains and plant, $340,000. Bids will be called for within a short time.

Manitowoc, Wis.—Press reports state that if this city will agree to improvements contemplated by company, providing it purchases plant, the Manitowoc Water Works Co. will install an additional boiler and also sink another well, the improvements being estimated at bet. $25,000 and $35,000.

Hamilton, Ont.—The Fire & Water Com. of Council on Nov. 12 decided to recommend that a by-law for $50,000 for electric pumps for the Beach pumping house be submitted to the rate payers, and the Council passed same on second reading. The specifications call for bids on both hydro-electric and cataract power.

Collingwood, Ont.—It is stated that it is proposed to extend the water system, at a cost of $3,800.

London Ont.—The City Council on Nov. 17 passed on second reading the ordinance providing for an expenditure of $393,500 for water works extension.

Weyburn, Sask.—Edgar A. Chappell, City Secy., writes that the bids for constructing the proposed water works will not be called for until the spring. It is intended, however, to construct a dam this fall by day's work under direction of the Town Engineer, so that the spring flow will be available for next summer.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Santa Monica, Cal.—Bonds to the amount of $160,000 are reported sold, the proceeds to be used for sewers, street improvements and a large pier.

It is reported that plans and specifications are wanted by Dec. 21 by Thomas H. James, City Engr., for constructing a septic tank, also a pier 1,600 ft. long, from the medium tide line of the Pacic Ocean, extending into the Pacic Ocean, for the purpose of carrying an outfall pipe from the septic tank; also estimates for construction of improvements either separately or combined.

Waterbury, Conn.—Bids are wanted, it is stated, until Dec 16, for $125,000 sewerage bonds. Wm. E. Thomas, Mayor.

Tampa, Fla. The City Clk. writes that about $50,000 will be expended for sewer work if approved by the voters. Election will be held Jan. 7. G. P. Sullivan, City Engr.

Bloomington, Ill.—Bids will be received by Bd. of Local Improv. at the office of Chas. F. Fauntz, City Engr. until Nov. 29, for 3,147 ft. of 12-in. pipe sewer, 1,478 ft. of 12 in. pipe sewer and 580 ft. of 18-in. pipe sewer.

Canton, Ill.—The Special Sewer Committee is stated to have presented to council its report on the construction of a sewerage system. Two new systems are planned, one to drain the south and east portions of city, the other the north and northwest portions. No action has yet been taken.

Indianapolis, Ind.—Chas. A. Brown, Asst. City Engr., is reported to be preparing plans for the Fulton St. sewer to extend from Ohio St. to St. Clair St., with a branch on Spring St.

Lafayette, Ind.—E. H. Andress, City Clk., writes that bids will be received on Nov. 27 for the construction of sanitary sewers in several streets.

Aurora, Ind.—Frank D. Johnson, City Clk., writes that bids for sewer construction were rejected on Nov. 11, and the matter will be laid over until Feb. or March, when new bids will be called for.

South Bend, Ind.—Specifications have been adopted for about 22,880 lin. ft. 6 to 30 in. pipe sewers, with manholes, flush tanks, etc. Bids will be called for in Dec. A. J. Hammand, City Engr. W. A. McInerney, Pres. Bd. Pub. Wks.

Fredonia, Kan.—R. S. Spencer, City Clk., writes that Burns & McDonnel, Dwight Bldg., Kansas City, Mo., are preparing plans for a sewerage system to cost between $40,000 and $50,000. Nothing definite has yet been done.

Louisville, Ky.—Bids will be received at the office of the Comrs. of Sewerage (P. L. Atherton, Chmn.), until Dec. 17, for constructing Sect. B of the Southern Outfall Sewer, Contract No. 2, to consist of a sewer 3,322 ft. long, 15 ft. 2 in. x 15 ft. 6 in. diam.; 1,820 ft. of 14 ft. 5 in. x 15 ft., and 970 ft. 13 ft. 11 in. x 14 ft. 3 in.; 17,000 cu. yds. concrete, 6,143 lin. ft. excav., 22 to 42 ft. deep; 1,200,000 lbs. steel bars, 21,000 bbls. Portland cement, as advertised in The Engineering Record. Harrison B. Eddy, Consulting Engr., 14 Beacon St., Boston, Mass. J. B. F. Breed, Ch. Engr.

Baltimore, Md.—The Sewerage Committee is reporetd to have decided to increase its expenditure for storm water drains to $100,000 next year.

Boston, Mass.—Bids were opened at the office of the Metropolitan Water and Sewerage Bd., Boston, Mass., on Nov. 15, for constructing in rock and earth trench and tunnel Sec. 81 and parts of Secs. 83 and 85 of the Extension of the High Level Sewer, South Metropolitan System, in Brookline and Brighton, and the following are the bids received (Wm. M. Brown, Ch. Engr. Sewerage Wks.):

Contract 60—Sect. 81 Chestnut and Kendall Sts., Brookline: (*a*) 2,140 ft. trench; inside diam. of sewer, 78 x 84 in.; (*b*) 50 cu. yds. Portland brick masonry; (*c*) 3,400 cu. yds. concrete masonry in trench; (d) 2,000 cu. yds. rock excav. in trench; sewer invert, 13 ft. to 29 ft. below street surfaces; (*e*) totals): Falvey & Kelly, 15 Intervale Park, Dorchester, *a*, $20; *b*, $20; *c*, $9; *d*, $7; *e*, $88,400. Geo. J. Regan, 92 Stoughton St., Dorchester, *a* $18.90; *b*, $18.50; *c*, $8.25; *d*, $5.50; *e*, $80,421. Jas. Driscoll & Son, Brookline, *a*, $12.50; *b*, $18; *c*, $7.90; *d*, $5; *e*, $64,510. Geo. M. Bryne Co., 7 Water St., *a*, $13; *b*, $16; *c*, $7.50; *d*, $4.50; *e*, $63,120. T. J. O'Connell, 158 Adams St., Dorchester, *a*, $10; *b*, $16; *c*, $8; *d*, $6; *e*, $61,400. Donavon & Phillips, 87 Border St., E. Boston, *a*, $9.75; *b* $15; *c*, $8.50; *d*, $4.50; *e*, $59,515. Donovan & Doyle, 22 Weld Ave., *a*, $8.20; *b*, $13.50; *c*, $8; d, $7; *e*, $59,423. Hugh Nawn Cont. Co., 82 Savin St., *a*, $10; *b*, $17; *c*, $8; *d*, $4; *e*, $57,450. Bruno & Petitti, 23 Court St., *a*, $9.50; *b*, $15; *c*, $8.50; *d*, $3.50; *e*, $56,980.

Contract 61, Sect. 83, Cypress St., Brookline; (*a*) 920 ft. rock and earth tunnel; (*b*) 355 ft. trench, inside diameter of sewer, 78 x 84 in.; (*c*) 50 cu. yd. Portland brick masonry; (*d*) 600 cu. yd. conerete masonry in trench; (*e*) 1,200 cu. yd. concrete masonry in tunnel; (*f*) 1,000 cu. yd. rock excavation in trench, sewer invert, 24 ft. to 34 ft. below street surfaces; (*g*) total. Jas. Driscoll & Son, *a*, $46; *b*, $15; *c*, $18; *d*, $8.50; *e*, $12; *f*, $6; *g*, $74,045. T. J. O'Connell, *a*, $33; *b*, $15; *c*, $16; *d*, $8; *e*, $10; *f*, $6; *g*, $59,285. Pat. McGovern, 6 Beacon St., *a*, $31.50; *b*, $15; *c*, $16; d, $9; *e*, $11; *f*, $4.75; *g*, $58,455. Bruno & Petitti *a*, $25; *b*, $18; c, $16; *d*, $9.50; *e*, $14; *f*, $4; *g*, $56,690. Hugh Nawn Cont. Co., *a*, $29.50; *b*, $12; *c*, $18; *d*, $8; *e*, $10; *f*, $4, *g*, $53,100.

Contract 62, Sect. 83, Winchester St., Brookline. (*a*) 1,664 ft. earth tunnel, inside diameter of sewer, 69 x 72 in.; (*b*) 50 cu. yd. Portland brick masonry; (*c*) 2,500 cu. yd. concrete masonry; (*d*) 100 cu. yd. rock excavation, sewer invert of the tunnel, 28 ft. to 43 ft. below street surfaces; (*e*) totals. Pat. McGovern, 6 Beacon St., Boston, *a*, $24; *b*, $17; *c*, $12; *d*, $7; *e*, $71,486. James Driscoll & Son, *a*, $22.50; *b*, $18; *c*, $12; *e*, $69,540. Hugh Naun Cont. Co., *a*, $27; *b*, $18; *c*, $9; *d*, $4; *e*, $68,728. John E. Palmer, 79 Journal Bldg., *a*, $19; *b*, $15; *c*, $12; *d*, $8; *e* $63,166. Chas. G. Craib & Co., 249 Pleasant St., Winthrop, *a*, $20; *b*, $14; *c*, $10; *d*, $10; *e*, $59,980. T. J. O'Connell, *a*, $16.75; *b*, $16; *c*, $10; *d*, $10; *e*, $54,672.

Contract 63, Sect. 85, Warren St., Brighton, (*a*) 1,252 ft. rock in tunnel, inside diameter of sewer, 69 x 72 in; (*b*) 50 cu. yd. Portland brick masonry; (*c*) 1,500 cu. yd. concrete masonry, sewer invert of the tunnel 53 to 63 ft. below street surfaces; (*d*) totals. Jas. Driscoll & Son, *a*, $40; *b*, $20; *c*, $11; *d*, $67,580. Falvey & Kelly, *a*, $32; *b*, $20; *c*, $10; *d*, $56,064. Coughlin & Shiels Co., Boston, *a*, $28; *b*, $20; *c*, $12; *d*, $54,056. Bruno & Petitte, *a*, $25; *b*, $16; *c*, $14; *d*, $53,100. Pat. McGovern, *a*, $27.50; *b*, $17; *c*, $11 50; *d*, $52,530. Hugh Nawn Cont. Co., *a*, $30; *b*, $17; *c*, $9; *d*, $51,910. D. F. O'Connell Co., *a*, $28; *b*, $20; *c*, $10; *d*, $51,056. Geo. M. Byrne Co., *a*, $28; b, $16; *c*, $10; *d*, $50,856.

Contract 64, Sect. 85, Warren, Cambridge and Washington Sts., Brighton; (*a*) 2,300 ft. rock in tunnel, inside diameter of sewer, 69 x 72 in.; (*b*) 50 cu. yd. Portland brick masonry; (*c*) 2,700 cu. yd. concrete masonry, sewer invert of the tunnel, 54 ft. to 64 ft. below street surfaces; (*d*) totals. Falvey & Kelly, *a*, $48; *b*, $20; *c*, $12; *d*, $143,800. Bruno & Petitti, *a*, $30; *b*, $16; *c*, $14; *d*, $107,600. Coughlan & Sheils Co., 104 Hanover St., *a*, $28; *b*, $20; *c*, $12; d, $97,800. Patrick McGovern, *a*, $27.50; *b*, $17; *c*, $11.50; *d*, $95,150. Hugh Nawn Cont. Co., *a*, $30; *b*, $17; *c*, $9; *d*, $94,150. D. F. O'Connell Co., *a*, $28; *b*, $20; *c*, $10; *d*, $92,400.

Contract 65, Sect. 85, Washington St., Brighton, (*a*) 1,650 ft. rock and earth tunnel, inside diameter of sewer, 69 x 72 in.; (*b*) 50 cu. yd. Portland brick masonry; (*c*) 1,900 cu. yd. concrete masonry, sewer invert of the tunnel, 27 to 62 ft. below street surfaces; (*d*) total. Patrick McGovern, *a*, $30; *b*, $17; *c*, $11.50; *d*, $72,200. D. F. O'Connell Co., *a*, $30; *b*, $20; *c*, $20; *d*, $71,400. Hugh Nawn Cont. Co., *a*, $30; *b*, $17; *c*, $9; *d*, 67,450.

Southbridge, Mass.—The lowest bid on Nov. 12, by the Bd. of Sewer Comrs. for constructing sewage purification works, is stated to have been submitted by C. E. Trumbull, of Boston, at the following bid: Grubbing, 42 cts. per cu. yd.; excavat. 29½ cts. per cu. yd.; trenching, 29½ cts. per cu. yd.; rock excavat, $2 per cu. yd.; for 8-inch main pipe, 30 cts. per lin. ft.; 10-inch, 40 cts.; 12-inch, 50 cts.; 18-in., 70 cts.; 20-in., 75 cts.; 4-in. distributing pipe, 30 cts. per lin. ft.; 6-in. 35 cts.; 8-in., 40 cts.; masonry, $8 per cu. yd; woodwork $50 per m. ft.; total, $30,582. Total of other bids: $50 per m. ft.; total, $30,582. Totals of other bids: Geo. M. Byrne Co., Boston, $31,811; John F. Gill & Co., Somerville, $35,689; John E. Palmer, Boston, $38,546; Bruno & Petetti, Boston, $39,484; Hassam Paving Co., Worcester, $45,935; Frank Williams, Boston, $51,213, and Donovan & Doyle, Boston, $71,023.

**Items marked thus give the names of parties awarded contracts.*

*Luverne, Minn.—The City Council on Nov. 5, awarded contract for sewers to Greene & Delate, at 65 cts. lin. ft. for sewer, manholes ea. $60 and flush tanks, ea. $90.

St. Paul, Minn.—The Bd. of Pub. Wks. is reported to have received from the City Engr. preliminary estimate of cost of a new sewer to be constructed on Prior Ave., from Feronia to Chelton; probable cost $30,536.

Forsyth, Mont.—The citizens are reported to have voted to issue $10,000 bonds for sewers.

*Pitman, N. J.—John Hanlon & Co., of Philadelphia, Pa., are reported to have secured the contract for constructing sewers for $4,283.

Woodbury, N. J.—The citizens are reported to have voted to issue $7,000 bonds for a surface drainage system west of Park Ave. in the meadow section.

Roswell, N. M.—See "Water."

Stittville, N. Y.—Bids will be received until Dec. 7 by the Sewer Comrs. of the First Sewer Dist. of the Town of Marcy (W. S. Pentland, Stittville, Chmn.), for the construction of about 1,500 lin. ft. of vitrified pipe sewer in the unincorporated village of Stittville, W. G. Stone, Engr., Mann Bldg., Utica.

Valley City, N. D.—Bids will be received until Dec. 2, by the City Council for constructing sewers in two alleys. H. F. Halverson, City Aud.

Trenton, O.—It is stated that bids will be received until Dec. 2 by Armstrong Ashbrook, City Aud., for $20,000 sewer and street improvement bonds.

*Girard, O.—E. L. Hauser, City Clk., writes that the contract for constructing portion of main sewer (bids opened Nov. 5), has been awarded to C. L. Allen, of Marion, O., for $19,329.

Cincinnati, O.—The following are the bids opened on Nov. 8 by the Bd. of Pub. Service for constructing sewers on Western Ave. and Bridge St.: M. J. Connelly Constr. Co., $8,031; Kirchner Constr. Co., $9,062; A. J. Henkel, $9,142, and J. E. Mahoney, $9,523.

Warren, O.—It is stated that bids will be received until Nov. 28 by the Bd. Co. Infirmary Dirs. (John B. Lewis, Chmn.) for constructing a tile drain system.

Xenia, O.—See "Power Plants, Gas and Electricity."

Dayton, O.—Bids will be received until Dec. 4 by the Bd. Pub. Service (T. M. Pexton, Pres.), for constructing sanitary sewers in part of Dist. No. 3, North Dayton, requiring 70,050 ft., 6 to 15-in. vitrified pipe sewers, 68,250 ft. trench and back fill 6 to 28 ft. deep, 80 lamp holes, 75 flush tanks, flush tank connections, repaving 1,500 sq. yds. brick pavement, 100 sq. yds. asphalt, 6,000 lin. ft. boulder repaving, c. i. pipe and specials, etc.

Stillwater, Okla.—It is stated that bids will be received until Dec. 3 by the City Clk. for $60,000 sewer bonds.

Pawhuska, Okla.—See "Power Plants, Gas and Electricity."

Norristown, Pa.—We are informed that $60,000 will be expended for pipe and concrete sewers. S. Cameron Corson, Boro. Engr.

New Cumberland, Pa.—The Town Council is reported to be considering the question of constructing a sanitary sewerage system.

Prairie View, Tex.—Press reports state that the Bd. of Directors of the Agricultural and Mechanical College will soon receive bids for a sewer system at the Prairie View Normal School, to cost about $5,000. C. E. Andrew, of College Station, Tex., is Secy. Bd. of Directors.

Cameron, Tex.—The City Council is reported to have selected N. Werenskiold, of Dallas, to prepare plans for a system of sewers.

Seattle, Wash.—Rich & Harris Constr. Co., Mutual Life Bldg., has secured the contract for constructing sewer in Kilbourne St. for $13,533. Smith & Hall, Downs Blk., bid for this work $15,947, and Hans Federson, 501 Fairview Pl., $17,045.

Bids will be received by the Bd. of Pub. Wks. (C. B. Bagley, Secy.) until Nov. 23 for constructing a sewer in Railroad Ave., estimated to cost $2,900, and a sewer in Columbia St., at a cost of $9,000.

The Bd. of Pub. Wks. is reported to have on Nov. 9 received bids on the North trunk sewer, lowest bidder being Jas. Black Masonry & Con. Co., $993,036, and North 39th St. sewer, lowest bidder H. F. John & Co., $56,943, both being considered too high.

Green Bay, Wis.—It is reported that bids will be received until Nov. 27, by the Com. on Sewers and Plumbing of Common Council, for construction of a 12-in. vitr. pipe sewer in Grignon St. W. W. Reed, City Engr.

*North Milwaukee, Wis.—E. H. Klamp, Village Clk., writes that all bids opened on Nov. 11, for constructing septic tank 42-ft. diam., and 16 ft. deep, have been rejected. Engineer, W. G. Kirchoffer, of Madison.

Vancouver, B. C.—Wm. McQueen, City Clk., writes that it is proposed to extend the sewerage system to the unsewered districts of city. W. A. Clement, City Engr.

BRIDGES.

Notes Arranged Alphabetically by States.

*San Luis Obispo, Cal.—The County Bd. of Supervisors on Nov. 5, is stated to have awarded the contract for constructing a steel and concrete bridge over the Arroyo Grande Creek at Bridge St., to Atlantic Gulf & Pacific Co., 220 Market St., San Francisco, at $10,589.

Council Bluffs, Ia.—It is reported that bids will be received until Dec. 3, by W. C. Cheyne, Co. Aud., for constructing all bridges required by this county for one year, from April 1, 1908.

*Lehigh, Ia.—The contract for constructing a bridge over Des Moines River at Lehigh is reported to have been awarded to the N. M. Stark Bridge Co., of Des Monies, for $11,300. The structure to be 375 ft. long.

Wichita, Kan.—It is stated that bids were received for the construction of a concrete bridge across the drainage canal on Douglas Ave., as follows: Topeka Bridge & Iron Co., $11,975 and $10,975; Topeka Carthage Bridge Co., $11,890, and the Cement Stone & Supply Co., $11,850.

*Williamsport, Md.—We are informed that Coder & Miller, of Harrisburg, Pa., have secured the contract for constructing a reinforced concrete arch bridge of 15 spans over Potomac River for the Washington & Berkeley Bridge Co., (bids opened Nov. 13), for $123,660. Other bids received were: McGaw & Gray, Philadelphia, Pa., $186,940; Meigs & Hanford, Washington, D. C., $160,712; H. H. Geist, Baltimore, Md., $151,130; Alsop & Pierce, Newport News, Va., $136,376; E. G. Nave Bros., Portsmouth, O., $127,000. Engineer Mason D. Pratt, of Harrisburg.

Jackson, Minn.—It is stated that bids will be received until Dec. 10, by P. D. McKellar, Co. Aud., for constructing a 100-ft. steel bridge with approaches.

*Athens, Minn.—The County Comrs. are stated to have awarded the contract for constructing a bridge over the Rum between Stanford and Athens, to A. Y. Bayne & Co., of Minneapolis, at $5,235.

Ft. Benton, Mont.—It is reported that bids will be received until Dec. 2, by W. R. Leet, Co. Clk., for the construction of two bridges across Highwood Creek, near Bucklands.

Cincinnati, O.—Bids will be received until Nov. 29, by the Bd. Co. Comrs. (Fred Dreihs, Clk.), for repairing the suspension bridge over Whitewater River, Whitewater Township.

Cincinnati, O.—The City Council is reported to have instructed the City Engineer to prepare estimates for the construction of lift bridges over the Miami Canal at Elm, Vine, Main, Findlay and Liberty Sts.

Toledo, O.—F. I. Consaul, City Engr., is reported to have estimated the cost of repairing Cherry St. Bridge at a cost of $22,000.

Norwood, O.—Bids will be received at the office of the Bd. of Pub. Service (L. H. Gebhart, Clk., until Dec. 14, for furnishing material and constructing substructure of viaduct over the B. & O. S. W. Ry. and Section Ave., as advertised in The Engineering Record. Engineer, Jas. A. Stewart, 712 Traction Bldg., Cincinnati.

Bethlehem, Pa.—The construction of a bridge at Broad St. is reported contemplated.

Webster, Pa.—The following bids are reported opened Nov. 8 by the Comrs. of Westmoreland County and the County Comrs. of Washington County at Greensburg for the construction of a joint bridge over Mohongahela River between Webster and Donora. The superstructure to have 5 truss spans, 2 viaduct approaches with a roadway 25 ft. wide and length of structure 1,550 ft.: Franklin Bridge Co., $189,000; Toledo-Massillon Co., $190,000; American Bridge Co., $193,000; Chambersburg Bridge Co., $292,000.

Philadelphia, Pa.—See "Railroads."

Beaver, Pa.—The War Dept. is stated to have approved the plans for the Pittsburg & Lake Erie R. R. bridge to be constructed over the Ohio River, between Monaca and Beaver.

*Uniontown, Pa.—We are informed that the Penn. Bridge Co., of Beaver Falls, has secured the contract for constructing bridge over Monongahela River at Uniontown.

River Falls, Wis.—Bids will be received until Dec. 5, by Allen P. Weld, City Clk., for constructing a steel truss bridge at the Cedar St. crossing of the Kinnickinnic River, to be 140-ft. long, concrete floor 20-ft. wide, cement sidewalks, 5-ft. wide and abutments.

Menominee, Wis.—The Special Bridge Committee is reported to have submitted a favorable report to Common Council for the construction of a bridge over the Red Creek River below the dam.

Superior, Wis.—The Northern Pacific Ry. bridge located at Superior, is reported destroyed by fire. W. L. Darling, Ch. Engr., St. Paul, Minn.

Brandon, Man.—W. H. Shillinglaw, City Engr., writes that it is proposed to construct reinforced concrete bridge of three 90-ft. spans, and two 60-ft. spans, with 24-ft. clear roadway and provision will be made for street car traffic.

Carman, Man.—A. Malcomson, City Secy.-Treas., writes that all bids opened on Nov. 8, by the Bd. of Pub. Wks. for the construction of a 90-ft. Pratt truss steel bridge with 18-ft. roadway, concrete abutments, across Boyne River, near Carman, have been rejected, all being above the estimate.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Decatur, Ala.—The City Council is reported to have passed an ordinance providing for the construction of about 7 miles of concrete sidewalks on Pon, Oak Canal, Cain, Market and Cherry Sts.

*San Francisco, Cal.—C. L. Harney is reported to have secured the contract for repairing a portion of East St. with asphalt blocks for $12,625.

*The contract for repairing the roadway on Center St. is reported to have been awarded to Eureka Constr. Co. at $7,302.

Santa Monica, Cal.—See "Sewerage and Sewage Disposal."

Denver, Colo.—The Park Comrs. are stated to have decided to construct a boulevard from William to High St., connecting Congress Park and the Country Club.

Ansonia, Conn.—The macadamizing of a portion of N. Main St. is reported contemplated.

Collinsville, Ill.—The Council is reported to have under consideration the paving of certain streets, probably with brick. Jas. E. Simpson, City Clk; J. L. R. Wadsworth, Mayor.

Ottawa, Ill.—It is stated that bids will be received until Nov. 27, by the Bd. Local Improv., for constructing 41,000 sq. yds. brick pavement, with granitoid curbs, etc.

Peoria, Ill.—The Bd. of Local Improvements is stated to have recommended that Glen Oak and S. Glendale Aves. be paved with brick.

Rock Island, Ill.—The Tri-City Constr. Co., 2422 7th Ave., is reported to have secured the contract for paving portion of 25th St. with brick and asphalt at $5,600.

Edwardsville, Ill.—The paving of S. Fillmore St. with brick is reported contemplated at a cost of $15,000.

Lebanon, Ill.—The paving of St. Louis St. is reported contemplated.

Crawfordsville, Ind.—Plans and specifications are stated to have been completed and bids will soon be received for the paving of Walnut, College and Water Sts. with brick.

Bedford, Ind.—The citizens of Mitchel Township are stated to have voted to issue a tax of $30,000 for the construction of a macadamized road. According to reports bids will be received by Bd. of Comrs.

Anderson, Ind.—It is reported that the Bd. Co. Comrs. will receive bids until Dec. 12, for the constructing 9,140 ft. free gravel road. Jas. Kinnard, Co. Aud.

Martinsville, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Dec. 2, for the constructing 8,165 ft. gravel road, known as the Jones Rd., Jackson Township. E. E. Thornburg, Co. Aud.

Columbus, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Dec. 2, for constructing 7,942 ft. free gravel road in Clifty Township. John M. Davis, Co. Aud.

Hartford City, Ind.—It is reported that bids will be received until Dec. 4, by the Comrs. of Blackford County for the construction of the Bugh macadam road in Washington Township, about 15,810 ft. in length. L. W. Daugherty, Co. Aud.

Portland, Ind.—Bids will be received until Dec. 3 by the Bd. Co. Comrs., for grading, draining and graveling 2 roads in Noble Township, to be 10,333 and 5,280 ft., respectively. W. Lea Smith, Co. Aud.

New Orleans, La.—Specifications are reported prepared for the paving of a portion of Soniat St., with asphalt.

Providence, La.—Bids will be received until Dec. 17 at the office of T. J. Powell, Mayor, for paving and curbing about 4 miles of sidewalks.

Jackson, Mich.—We are informed that bids will probably be received in Jan. for paving W. Main and 1st Sts. A. W. D. Hall, City Engr.

Cadillac, Mich.—The City Clerk is reported to have been instructed to receive bids for paving with brick, bitulithic and concrete 23,888 sq. yds.

St. Peter, Minn.—Bids will be received until Nov. 29 by the Bd. Co. Comrs., for grading and graveling the State Road in the towns of Traverse, Bernadotte and Lake Prairie. A. H. Freeman, Co. Aud.

Bemidji, Minn.—It is reported that bids will be received until Dec. 3, by John Hillmann Co. Aud., for constructing a county road.

Kansas City, Mo.—Bids will be received until Nov. 27, by the Bd. of Pub. Wks., for constructing asphalt pavements on portions of numerous streets. E. A. Harper, City Engr.

Billings, Mont.—Bids will be received by the City Council until Feb. 4, for paving with slate brick certain streets in Special Improv. Dist. No. 21; also same date for macadamizing, draining and building cement gutters in Special Improv. Dist. 20; both proposals advertised in The Engineering Record. J. D. Matheson, City Clk.

Atlantic City, N. J.—Bids will be received by the City Clk., until Nov. 25 (change of date from Nov. 11), for repaving Pacific Ave. and constructing drainage conduits, to include 23,500 sq. yds. asphalt paving, 1,040 lin. ft. bluestone heading, stone and a drainage system complete, consisting of 25 lines of conduits, including new vitr. fire clay block gutters upon concrete around 50 curved corners at end of conduits, as advertised in The Engineering Record.

Falconer, N. Y.—The Bd. of Supervisors of Chautauqua County is stated to have passed a resolution providing for the construction of a state road from Falconer to Levant, at a cost of $11,500.

Riverhead, L. I., N. Y.—The Bd. of Supervisors on Nov. 13, is stated to have adopted a resolution favoring the improvement of the Onogue-Riverhead Road under the state aid plan. This road is 7.69 miles long and will cost $81,600. It was also voted to proceed with the work of having the Amityville-Babylon road improved under the same plan. This road is 3.82 miles long, and will cost $37,700.

*Long Island City, L. I., N. Y.—The Barber Asphalt Paving Co., 114 Liberty St., New York City, is reported to have secured the contract for paving with asphalt block Onderdonk Ave., Ridgewood Heights, for $10,661.

Brooklyn, N. Y.—Bids will be received until Dec. 4 by Bird S. Coler, Boro Pres., for regulating and repaving with asphalt portions of several streets, including Engert, Irving, Morgan and Prospect Aves., Kossuth Pl., Skillman and Ten Eyck Sts. Engineer's estimate, 35,650 sq. yds. asphalt, 13,365 lin. ft. new curb, set in concrete, etc.

New York, N. Y.—The lowest bid opened on Nov. 7 at the office of the Pres. of Manhattan Boro. for regulating and repaving with asphalt on concrete foundation Madison Ave. from 23d to 32d St., was submitted by the Sicilian Asphalt Co., 41 Park Row, as follows: 11,000 sq. yds. asphalt pave. including binder course, $1.35; 1,000 cu. yds. concrete, $5.50; 1,750 lin. ft. new bluestone curb, 90 cts.; 200 lin. curb, 40 cts.; 37 noiseless covers, complete, for sewer and water manholes, ea. $20; total, $22,745. Totals of other bids: Barber Asphalt Co., 114 Liberty St., $24,465, and Uvalde Asphalt Co., 1 Broadway, $29,295.

Items marked thus give the names of parties awarded contracts.

The lowest bid opened on Nov. 7, at the office of the Pres. of Manhattan Boro. for regulating and repaving with granite block on concrete foundation roadway of 10th Ave., from Little W. 12th St., to 23d St., was submitted by John E. Quinn, of Brooklyn, at the following bid: 15,914 sq. yds. granite block pave, with paving cement joints, $2.44; 15,914 sq. yds. old stone blocks, to be purchased by contractor and removed, 7 cts.; 3,054 cu. yds. concrete, $5.10; 4,770 lin. ft. new bluestone curb, 78 cts.; 100 lin. ft. old bluestone curb, reset, 50 cts.; 17 new sewer manhole heads and covers, $14; 13 new water manhole heads and covers, $20; 7,130 sq. ft. new granite bridgestone, 70 cts.; total, $62,540. Totals of other bids: Sheehan Constr. Co., $63,570; Republic Constr. Co., 180 Broadway, $64,977; George & Farrell, Brooklyn, $65,617; Atlanta Constr. Co., 432 E. 91st St., $64,370; Jas. Quinn, Jr., $62,825.

The following are the bids opened on Nov. 14, by the Park Board for furnishing and constructing material, granolithic and brick sidewalks and granite curb on concourse and approach to Baird Court, in the New York Zoological Park, in Bronx Park: Bart Dunn, $17,254; Kelly & Kelley, Inc., $15,933; John B. Malatesta, $13,699; Michael Marrone, $17,975; W. H. Masterson, $18,427; McHarg-Barton Co., $17,700; Murray Contr. Co., Inc., $17,484; John V. Schaefer, Jr., & Co., $15,360; Thompson & Kelsey, $18,400.

Steubenville, O.—Bids will be received, it is reported by the Bd. Pub. Service (T. W. Vance, Clk.), until Dec. 16, for paving a portion of Market St.

Cincinnati, O.—The Bd. of Pub. Service is reported to have passed resolutions providing for the paving of Glendora Ave. and Lyons St. with brick and York St. with asphalt; probable cost, $28,918.

Portsmouth, O.—It is stated that bids will be received until Dec. 2 by Filmore Musser, City Clk., for $7,000 street improvement bonds.

Ironton, O.—See "Water."

Trenton, O.—See "Sewerage and Sewage Disposal."

**Canton, O.*—W. E. Sarver, City Engr., writes that the contract for paving Navarre St., 22,800 sq. yds. (bids opened Sept. 3), has been awarded to Wise, Wise, Smith & Sbekels, of Canton, O., for $37,459.

Boyertown, Pa.—The Town Board is stated to have directed that plans and estimates be prepared for paving several streets, at a cost of $28,000.

Norristown, Pa.—We are informed that about $140,000 will be expended for paving. S. Cameron Corson, Boro. Engr.

**Memphis, Tenn.*—M. Larkin is reported to have secured the contract for paving with brick, Orleans St., at $23,030.

Seattle, Wash.—The Bd. of Pub. Wks. is stated to have rejected all bids opened for grading 31st Ave. and 40th St., paving Madison St., and constructing concrete walks on 2d Ave., north and 23d St. north.

*The Bd. of Pub. Wks. on Nov. 12, awarded contracts as follows: To E. H. Rawle & Co., for concrete walks on E. Olive St., $10,791; Smith & Hall, Downs Blk., concrete walks, sewers, etc., on Phinney Ave., $5,592; also same contractors for concrete walks on Brooklyn Ave., $3,556; and to Hans Pederson, 501 Fairview Ave., concrete walks on Meridian Ave., at the following bid: Fixed estimate, $3,400; earthwork, 6,500 cu. yds., at 25 cts. per cu. yd.; crosswalks, 183 M. ft. $22; concrete walks, 47,790 sq. yds. $1.15; alley crossings, concrete, 71 sq. yds. $1.40; 2 catch basins, 2 inlets, $90 ea.; 4 catch basins, 1 inlet, $80 ea.; 3-in. sewer pipe, 10,000 lin. ft., 15 cts.; total, $66,109. Andrew Peterson, 410 Washington Bldg. bid for this work, $67,311, and MacAdam & Co., Grand Union Hotel, $68,460.

Bids will be received by the Bd. of Pub. Wks. (C. B. Bagley, Secy.), until Nov. 23, for grading and regrading 15th Ave. W., and planking same; estimated cost $89,000.

West Salem, Wis.—The County Bd. of Supervisors at La Crosse, is stated to have passed a resolution appropriating $8,500 toward the construction of a highway between West Salem and Mindoro.

Hamilton, Ont.—We are informed that the proposed road to be constructed from the Jolley Cut to head of Victoria Ave. will cost about $50,000. Plans and estimates not yet made. E. E. Barrow, is City Engr.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Birmingham, Ala.—The Coosa River Electric Power Co. (Roswell H. Cobb, Pres., Birmingham), is reported to have under consideration the development of power at Ten Island Shoals on Coosa River about 48 miles from Birmingham.

Hot Springs, Ark.—Press reports state that Atwood Benton, of Kansas City, Mo., will construct an electric light plant here to be complete April 1.

Vallejo, Cal.—See "Miscellaneous."

Needles, Cal.—Carl F. Schrader is reported to have petitioned the Bd. of Super. at San Bernardino, for a franchise for an electric light system and gas plant for Needles. It is stated that he will obtain electric power from the Victor & Virgin Mining Co. and will construct a gas plant.

Moscow, Idaho.—The City Council is reported to be considering the question of constructing a municipal electric light plant.

Marengo, Ill.—Stearns & Schuster, of Rockford, are reported to have received franchise for an electric light plant.

Vincennes, Ind.—It is reported that the Black Hawk Light, Heat & Power Co., recently incorporated with a capital of $1,000,000, will soon ask for bids for the construction and equipment of gas and electric light plants; also for laying gas mains. H. C. Bauer and H. M. Gentry, are among the directors.

Lafayette, Ind.—Bids will be received by the Bd. of Pub. Wks. at the office of L. H. Andress, Jr., City Clk., until Dec. 20, for the electrical lighting of the streets, alleys and other places of the city for a period of 10 years from Sept. 1, 1908, as advertised in The Engineering Record. R. H. McGrath, Chairman Bd. Pub. Wks.

**Kokomo, Ind.*—W. T. Meck, City Clk., writes that the contract for lighting the city (bids opened Nov. 8) has been awarded to the Kokomo, Marion & Western Traction Co., of Kokomo.

Baltimore, Md.—Local press reports state that all bids opened on Oct. 23 by the Bd. Awards, care J. Sewell Thomas, City Register, for furnishing, installing, equipping, maintaining and operating gasoline or naptha street or outdoor lamps, with the use of incandescent mantle fixtures have been rejected and new bids will probably be called for.

Newtonville, Mass.—See "Schools."

Owosso, Mich.—The Owosso Light & Power Co. is reported organized with E. M. Hopkins, of Detroit, Pres., and Frank Wescott, of Owosso, Treas. The company proposes to build a dam 500 ft. long and 30 ft. high at a point on Shiawassee River, 2½ miles north of city. The dam will close the outlet of a body of water containing about 10 acres and this head of water will be used to generate electricity, for the proposed Grand Rapids-Pontiac electric line, and for light and power in Owosso.

Glenwood, Mich.—The owners of the Glenwood electric light plant contemplate installing a new 220-h-p. engine. H. Peterson, secy.

Faribault, Minn.—F. C. Nelson, of St. Paul, is reported to have purchased the plant of the Polar Star Electric Co., and will make improvements to same.

Sauk Rapids, Minn.—The city is reported to considering the installation of a pole line for a street lighting system and securing power from the water works plant of John M. Brown.

Natchez, Miss.—An ordinance is reported to have been introduced in Council authorizing the Municipal Water Works Comn. to get figures on cost of adding an electric light plant to the water works for street lighting.

Chinook, Mont.—Bids will be received until Dec. 21 by John C. Duff, Town Clk., for constructing a system of electric lights.

Elmer, N. J.—We are informed that the Union Railway Constr. Co., of Philadelphia, Pa., proposes installing a gas plant at Elmer.

Lockport, N. Y.—At a meeting of Common Council on Nov. 11 a petition was received from the International Power & Transmission Co., by W. W. Higgs, as secy., applying for permission to enter the city with its power lines from the west side and furnishing several industries in the corporation with light, heat and power.

Xenia, O.—The Trus. of the Ohio Soldiers' and Sailors' Home at Xenia, in their annual report filed with the Governor on Nov. 17, ask for an appropriation of $100,000, with which to install a complete new power plant and sewage system.

Newburgh, O.—Bids will be received until Dec. 5 by the Bd. Pub. Service (Wm. H. Jentzen, Clk.), for furnishing, lighting, extinguishing and keeping in repair, including the furnishing of gas and gasoline, and all material necessary therefore, 140 street lights for a period of 1 year.

Cleveland, O.—Local press reports state that as soon as the franchises pending before Council are ratified the Cuyahoga Light Co. will proceed to erect four more power plants in downtown sections of the city. John C. Keys, Pres.

New Bremen, O.—A. M. Steinebrey, Village Clk., writes that the citizens on Nov. 12, voted to issue $20,000 bonds for an electric light plant. Engineer, A. W. Fischbaugh, of Celina.

**Pawhuska, Okla.*—W. W. Cook & Son, of Muskogee, Ind. Ter., are reported to have secured the contract for constructing water works, sewers and an electric plant, for about $100,000.

Norristown, Pa.—We are informed that about $20,000 will be expended for the improvements to the electric light plant. Geo. W. Kite, Secy. Electric Comn.

Panama.—Bids will be received until Dec. 13 at the office of Lieut. Col. H. F. Hodges, Corps Engrs. U. S. A., Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for furnishing motor generator sets, switchboard, electric switches and fuse block, electric fans, steel plates and angles, lumber, repair parts for steam shovels, driving wheel tires and centers for locomotives, etc., as per circular, No. 403.

Philadelphia, Pa.—It is reported that the Equitable Electric Power Co. has secured a charter for the lighting of houses by electricity. It also hopes to enter the Pittsburg field. Jas. Collins Jones, Bullitt Bldg., is counsel for the company. I. C. Splane, of Pittsburg, and Geo. R. Sheldon, of New York, N. Y., are also reported to be interested. It is said that the power plant of the Philadelphia & Western R. R. Co., at Cobb's Creek may be used in connection with the Equitable Co.

Ridgeville, S. C.—There is reported to be a movement on foot here looking to the construction of water works, also an acetylene gas plant.

Anderson, S. C.—The stockholders of the Savannah Power Co., which company owns several shoals and power plants on Savannah River, is reported to have passed resolutions authorizing the directors of the company to transfer all property over to the Georgia-Carolina Power Co. The latter company was formed several months ago with a capital of $8,500,000, and is merging many companies on the Savannah and Tugaloo Rivers. The company will develop between 125,000 and 150,000 h. p. H. A. Orr, of Anderson, is president.

Aberdeen, S. D.—The Wagner, Lake Shore & Armour Traction Co. is reported to have secured a franchise in this city and intends to organize a new company to carry on the operations here. It will be known as the Aberdeen Light and Power Co. and will have a capital of $200,000. Representatives expect to begin building operations before the close of the present year.

Mitchell, S. D.—The Mitchell Illuminating & Power Co. is reported incorporated with a capital of $100,000 and will put in a water gas plant to supplant the acetylene plant. The electric light plant will be overhauled. The company agrees to furnish incandescent lights at 10 cts. per thousand watts.

Bristol, Va., Tenn.—We are informed that the Fish dam development, near Bristol, Tenn., of which Chas. Hansel, 43 Exchange Pl., New York, N. Y., is engineer, has not yet been financed. The matter of construction has also been deferred for the present.

South Pittsburg, Tenn.—D. A. Tate is reported to have purchased the city electric light plant, and will make improvements to same.

Chattanooga, Tenn.—The Chattanooga Electric Co. is reported to have decided to install a 1,500-kw. turbine generator.

Beaumont, Tex.—See "New Industrial Plants."

Ft. Worden, Wash.—See "Public Buildings."

Toronto, Ont.—Local press reports state that various plnas and estimates for a municipal plant for the distribution of electric power were submitted at a conference at the Mayor's office on Nov. 15 between the city officials, the Hydro-Electric Power Comn. and the engineering experts. There were seven schemes presented at the conference, ranging from $1,775,000 to $5,250,000. Three plans were presented by W. G. Chase, of the engineering firm of Smith, Kerry & Chase; the other plans were from the engineers of the Hydro-Electric Power Comn. If one of these estimates is selected the citizens will be asked to vote on Jan. 1 on the question of issuing bonds for same.

Woodstock, Ont.—Chief Engineer Richards is reported to have forwarded his estimate of cost of distributing power in Woodstock, which he figures will cost about $18,000.

Galt, Ont.—Chief Engineer Richards, of the Hydro-Electric Power Comn. is reported to have estimated the total cost of a distributing plant for manufacturers of this city at $46,195; cost of plant for street lighting $16,583 and for a private service, giving 500 lights, $18,000 to $19,000.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Ft. Smith, Ark.—The Nelson Investment Co. is reported organized, with a capital of $100,000, to build an interurban electric line between Ft. Smith and West Fort Smith, a distance of about 10 miles.

San Mateo, Cal.—The right-of-way for the Peninsular Electric R. R. is reported secured from San Mateo to Stanford Univ. A. W. Bell, of Palo Alto, is reported interested.

Denver, Colo.—The Intermountain Ry. Co. is reported incorporated and contemplates electrifying the recently purchased Denver & Intermountain R. R. between Denver, Lakewood and Golden: Capital, $1,000,000. Incorporators: T. J. Milner, Caldwell Yeaman, Frank Loveland and Thos. B. Doran, all of Denver. At present the road uses electric power as far as Denver city limits and steam power for the remainder of the distance to Golden.

Smyrna, Del.—The Smyrna, Kent County & Delaware Bay Traction Co. is stated to have secured the right-of-way through New Castle County with 1½ miles of Delaware City, and they expect in a short while to begin the construction of an electric railway. A power house will soon be constructed at St. George's.

Bids will be received until Dec. 16, at the office of the Mississippi River Comn., 1539 Louisiana Ave., New Orleans, for constructing 771,600 cu. yds. levee work in the lower Tensas, Atchafalaya and Pontchartrain Levee Dists. Maj. J. F. McIndoe, Corps Engrs., U. S. A.

Ft. Howard, Md.—Bids will be received until Dec. 9 by the Quartermaster at Ft. Howard, for repairs to government wharf at this post.

Scituate, Mass.—Bids will be received at the office of the Harbor and Land Comrs. at Boston, until Nov. 29 for riprap work at the Third Cliff in the town of Scituate, as advertised in The Engineering Record.

Boston, Mass.—Bids will be received until Dec. 14 by The Bureau of Yards & Docks, Washington, D. C. (R. C. Hollyday, Ch. of Bureau), for dredging in the slip at the Navy Yard, Boston. Appropriation available, $4,500.

Adrian, Mich.—It is reported that bids will be received until Nov. 27, by Hope Welch, County Drain. Comr., for the construction of the Stoddard tile drain.

Minneapolis, Minn.—Park bonds to the amount of $50,000 are reported sold.

Ft. Stanton, N. M.—Bids will be received until Nov. 27, by P. M. Carrington, Surgeon, Public Health and Marine Hospital Service, for furnishing lumber, engineer's supplies, hardware, etc.

Brooklyn, N. Y.—The contract for the construction of the concrete drydock at the Brooklyn Navy Yard, known as Contract No. 4, which was awarded in Feb., 1905, has been declared forfeited, and new bids will probably be called for.

In his coming report to Congress, Sec. of the Navy Metcalf will ask for about $1,000,000 with which to rebuild dry docks Nos. 2 and 3, at the Brooklyn Navy Yard.

Buffalo, N. Y.—We are informed that bids were opened by the Bd. Pub. Wks. on Nov. 14 for constructing dock at Ohio St. and Buffalo River along the Clark and Skinner Canal, and it has been recommended to award contract to Geo. Parks & Son, 217 15th St., Buffalo, for $3,396. C. M. Morse, Deputy Eng. Comr.

Steubenville, O.—It is reported that bids will be received by T. W. Vance, Clk. Bd. Public Service, until Dec. 2, for constructing a cement retaining wall along Fisher's Run.

Portland, Ore.—Bids will be received by Lieut.-Col. S. W. Roessler, Corps Engrs., U. S. A., until Dec. 20, for one stern wheel steamboat, as advertised in The Engineering Record.

Charleston, S. C.—We are informed that the following are the bids on Nov. 16 at the office of the Bureau of Yards and Docks, Navy Dept., Washington, D. C., for a pile and timber wharf at the Navy Yard, Charleston: (a) For pier complete, in accordance with plans and specification; (b) for pier complete, length to be 570 ft. instead of 650 ft.; (c) for complete work with modifications: Grant Wilkins, 23½ Whitehall St., Atlanta, Ga., a. $153,000; b. $134,000 c (2 bids), $123,000 and $96,000. Alsop & Peirce, 138 28th St., Newport News, Va., a. $123,000; b. $18,500; c (2 bids), $98,000 and $87,358. Simons-Mayrant Co., 16 Broad St., Charleston, S. C., a. $139,365; b. $15,353 (to deduct); c. (8 bids) deduct $8,000 to $57,000. Raymond Concrete Pile Co., 140 Cedar St., New York, N. Y., c (2 bids), $139,875 and $129,963. New York Continental Jewell Filtration Co., 15 Broad St., New York, N. Y., a, $139,840; b $124,890; c $89,885. A. F. Chapman & Co., 20 Breckenridge St., Buffalo, N. Y., a, $103,400; b, $93,000; c. (2 bids), $80,000 and $75,000. Bernard Rolf, 39 Cortlandt St., New York, N. Y., a, $109,333; b. $96,333. William L. Miller, 19 Milk St., Boston, Mass., a, $99,900; b, $90,000; c (two bids), $79,600 and $78,430. General Contracting & Eng. Co., 15-25 Whitehall St., New York, N. Y., c (2 bids), $73,630 and $64,840. The Foundation Co., 115 Bway, New York, N. Y., a, $126,676; b, $113,054.

**Galveston, Tex.*—The grade raising contractors, Goehart & Bates, are reported to have sublet to the North American Dredging Co., of San Francisco, Cal., a contract for about 1,000,000 cu. yd. of fill.

**National Soldiers' Home, Va.*—John T. Hume, Treas. Southern Branch, N. H. D. V. S., National Soldiers' Home, Va., writes that the contract for dredging channel extension, Jones' Creek, about 4,800 cu. yds. (bids opened Nov. 1) has been awarded to W. H. French, of Norfolk, at 35 cts. per cu. yd.

Meaford, Ont.—Bids will be received until Dec. 2 by the Dept. Pub. Wks. (Fred Gelinas, Secy.), Toronto, for the construction of an extension to breakwater, the removal of portion of landing pier, the construction of a pile and concrete revetment wall, and a line of tongued and grooved sheet piling, at the town of Meaford. J. G. Sing, Resident Engr., Confederation Life Bldg., Toronto

Engine Builders' Association of the United States. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

PERSONAL NOTES.

Mr. Howard R. Smart has been appointed town engineer of Lincoln, R. I.

Mr. Leopold Mercader, formerly an assistant engineer in the United States highway work, has been appointed bridge inspector of the Department of the Interior of Porto Rico.

Mr. W. T. Dorrance has been appointed designing engineer of the Exterior Zone of the New York Central & Hudson River R. R., with headquarters in the Grand Central Station, New York.

Mr. Charles P. Hart, building inspector in the Bureau of Buildings, Philadelphia, Pa., has been appointed engineer of construction in the same bureau, succeeding Mr. F. G. Myhlertz, resigned.

Prof. Robert Sibley, formerly associated with Mr. T. L. Greenough and the University of Montana, has established The Engineering Offices, at Missoula, Montana, for the practice of civil, mechanical and mining engineering.

Mr. W. A. Cornelius has been appointed general manager of the National Tube Co., of McKeesport, Pa., succeeding Mr. G. G. Crawford, who recently resigned to become president of the Tennessee Coal, Iron & Railroad Co.

Mr. Foster Crowell, the well-known New York consulting engineer, has been appointed Commissioner of Street Cleaning of that city, to succeed Dr. Walter Bensel, who has resigned to resume his former position as sanitary superintendent of the Department of Health.

Charles S. Magowan, professor of municipal and sanitary engineering in the College of Applied Science in the State University of Iowa, died Nov. 14, 1907. Professor Magowan had been a member of the faculty of the University of Iowa for twenty-one years.

Mr. C. F. Maitland, formerly resident engineer of the Wyoming Division of the Union Pacific R. R., has been appointed engineer of the Utah division of that railroad. Mr. S. W. Rano becomes resident engineer of the Utah division and Mr. W. C. Ferguson is in charge of the resident engineer's office on the Wyoming division.

In addition to the regular civil engineering courses of Columbia University, arrangements have been made for a series of supplementary lectures by prominent specialists. Among those who will lecture on sanitary engineering and allied subjects are Mr. George C. Whipple, Dr. Daniel D. Jackson, Prof. G. N. Calkins and Mr. Allen Hazen.

The following appointments are announced in the engineering department of the Boston & Albany R. R.: Mr. L. G. Morphy to be assistant engineer of maintenance of way and construction, with headquarters in Boston; Mr. E. A. Haskell to be division engineer of the Boston division, with headquarters in Boston; Mr. W. F. Barclay to be division engineer of the Albany division, with headquarters in Pittsfield.

Mr. George J. Roberts, chief engineer of the United Gas Improvement Co., of Philadelphia, has been appointed first vice-president of the Public Service Corporation of New Jersey, in charge of the operation of all its gas, electric and railway properties. This is one of the most difficult positions that American public-service companies can present, and Mr. Roberts has the hearty good wishes of those who are acquainted with his past successes as he assumes these for more trying burdens.

Edward A. Handy, general manager of the Lake Shore & Michigan Southern Ry., died on Nov. 21, in a Chicago hospital from pneumonia, after a three days' illness. He was graduated from the Massachusetts Institute of Technology and entered railroad work in 1878 as an assistant engineer of construction of the Atchison, Topeka & Sante Fe R. R. After several promotions, he left the Sante Fe and for a year was locating engineer of the Mexican National R. R. In 1881 he became principal assistant engineer of its Northern division and in 1883 chief engineer of the same road, holding the latter position about five years. In 1888 he was appointed engineer of the Lake Shore division of the Lake Shore & Michigan Southern Ry., and in 1891 chief engineer of the same road. He held this position five years and was then promoted to the executive department.

The members of the American Society of Civil Engineers and of the American Society of Mechanical Engineers in Denver and vicinity entertained the appraisers of the Denver Union Water Works, Messrs. John R. Freeman, Charles L. Harrison, Allen Hazen, M. L. Holman and Frederic P. Stearns, at a formal dinner at the University Club in Denver on Thursday evening, Nov. 21. The thirty engineers in attendance were seated at one large circular table. After dinner the five guests responded extemporaneously to subjects suggested by Mr. T. B. Stearns, as toastmaster. Mr. George G. Anderson, as a local member of the American Society of Civil Engineers, and Mr. F. E. Shepard, as a local member of the American Society of Mechanical Engineers, spoke as representatives of their respective societies. Mr. C. W. Comstock and Mr. Thos L. Wilkinson, to whom the idea and the success of the dinner were due, replied to the remarks of the toastmaster made in recognition of their efforts to bring the local members of the two societies together and thus promote the professional interests of the individuals, as well as of the Societies. In addition to those mentioned, the following were also present: H. C. Crocker, T. W. Jaycox, J. M. Houston, L. B. Curtis, H. A. Summer, H. J. Burt, M. S. Ketchum, Y. A. Kauffman, F. C. Finkle, G. T. Prince, L. E. Ashbaugh, E. C. Jansen, J. H. Matthes, Albert Carr, John B. Harper, E. A. Lee, J. A. Beeler, C. A. Yont and R. S. Sumner. Practically the same party was also entertained on Nov. 24 by a trip over the Moffat Road from Denver to the Continental Divide and return by Mr. H. A. Sumner, chief engineer of that railroad.

BUSINESS NOTES.

The Expanded Metal & Corrugated Bar Co., St. Louis, Mo., is furnishing the reinforcement for three circular reservoirs, 100 meters in diameter, for the Potable Water Commission, City of Mexico. The order calls for 2,600 tons of corrugated bars. The latter product has been awarded a gold medal by the Jury of Awards of the Jamestown Exposition. This is the fourth medal awarded to the corrugated bar, the last one being given at the International Exhibition in New Zealand.

The U. S. District Court for the Southern District of New York has decided in favor of the plaintiff in the suit of Jules Breuchaud vs. the Mutual Life Insurance Co. and Arthur McMullen. This action was brought for infringement of Mr. Breuchaud's patent, No. 563,130, issued June 30, 1906, for the system of underpinning called by his name and involving the sinking of piers through soft strata to a firm support in the plane of the wall to be underpinned.

The Ball & Wood Co. announces the addition to its well-known engine business of a line of high grade air compressors, designed to meet the modern requirements for air compressing machinery equal in material and workmanship to the highest class of steam engine construction. These compressors are the product of long experience in the design and manufacture of high grade engines, combined with important improvements in the air compressing elements. They are designed, with large bearings and wearing surfaces, rigid frames, effective lubrication, ample valve areas and intercooling capacities. The main office and works of the company are in Elizabethport, N. J., and the New York office at 17 Battery place.

The Northern Engineering Works, Detroit, Mich., have sold a 50-ton 3-motor traveling crane to the Columbia Improvement Co., Seattle, Wash., for its new power station, and a 10-ton 60-ft. span crane to the Pittsburg plant of the United Engineering & Foundry Co. The Northern Engineering Works also reports the following sales of Newten cupolas: The Hilgartner Marble Co., Baltimore; Noyes Stove Co., Waterville, Me.; Progressive Stove Co., Colorado City; Pocahontas Iron Works, South Norfolk, Va.; Mississippi Seating Co., Jackson, Miss.; Chickasaw Iron Works, Memphis, Tenn.

The Pittsburgh Automatic Vise & Tool Co., Pittsburgh, Pa., has just completed a large shipment of double and single swivel vises to the Brazilian Government, Rio Janeiro. The order is a direct outcome of an inspection and test made by the Brazilian Government at the Jamestown Exposition. The company reports that its plant is running double time to fill orders promptly, and that despite the financial scare the business of October was over twice that of any previous month.

Concrete piles are being extensively used at present for the foundations of buildings in localities where the soil is of an extremely poor character, the extent of their use being shown by the large number of contracts which are at present calling for the use of such foundations. Simplex concrete piles have been used for foundations of the Fruit Auction Exchange Bldg., corner of Franklin and Washington Sts., New York City; Isaac G. Johnson Steel Castings Foundry on Spuyten Duyvil Creek, Spuyten Duyvil, New York City; the refuse destructor for the Borough of Richmond, City of New York, foot of Taylor St., West New Brighton, S. I.; and the addition to the plant of the Standard Oil Co., at Claremont Ave., Jersey City. The Foundation Co., 115 Broadway, New York City, has just been awarded the contract for borings and for placing Simplex concrete piles in the foundations of a new refining plant for the S. T. Baker Oil Co., of New York City, at Bay Way, Elizabeth, N. J. These piles are to be used in the foundations of the tanks, and the walls of the filling, storage and tank houses.

QUEBEC BRIDGE TESTIMONY.

Last month the Canadian Commission of Inquiry concerning the Quebec bridge made public the testimony of Mr. Cooper concerning the structure, and last week it gave out copies of the testimony of the Phœenix Bridge Co.

Mr. Cooper testified that he corrected the original specifications to provide for a smaller wind load and larger vertical loading than was required at first. In order to keep the weight of the structure designed to meet these requirements within the original estimated

[illegible] made modifications in the unit working strains in various members. The floor system proposed for the structure he considered excessively heavy and advised reducing its weight to that of the floors of first-class railroad bridges in the United States. The preparation of the plans by the Phœnix Bridge Co. was not given sufficient time, he testified. As a result of the rush with which they were pushed through after work was begun on them, and his own frail health, he was forced to rely upon others concerning many parts of the design.

The workmanship on the bridge material was perfectly satisfactory to Mr. Cooper in many respects, he testified, but he nevertheless had to make frequent complaints of the mechanical department, especially regarding the facing of the compression members and the boring of the pin-holes. The material in the bridge he considered most excellent. He did not consider that the Phœnix Bridge Co. had on the work at all times, in charge of the erection, an engineer fully cognizant of the details of the structure, the action of the different members under the different strains and camber movements, and the steps to take in case the theoretical expectations were not fulfilled. He judged that there was not due care in handling bridge members at all times.

In September, 1906, the anchor arm did not work itself free from the falsework near chords 8, 9 and 10, as it should have done, but showed a tendency to lift at the shore end. This Mr. Cooper believed to be due to a failure to consider the compression of the main center post under the additional load of the cantilever arm; it threw an undue load on the bents near point 9 of the anchor arm. An undue strain was thus probably produced near lower chord 9, for at that time the splices, the weakest portion of the structure, were not riveted and perhaps not fully bolted.

On Aug. 6, 1907, a condition in chords 7 and 8 in the cantilever arm was reported to Mr. Cooper which he considered unsatisfactory and subsequent correspondence convinced him that "the Phœnix Bridge Co. did not desire to make any corrections of importance or to put this chord in a safe condition." Before he could take final action, the more serious problem of the bending of chord 9 in the anchor arm was reported to him. Mr. Cooper testified that when the condition of lower chord 7-8 of the cantilever arm was reported to him, he first became uneasy about the lower chord members. When an inspector personally reported to him on the morning of Aug. 29 a 2¼-in. deflection of the west member of lower chord 9 in the anchor arm, he at once telegraphed to the Phœnix Bridge Co. to put no more load on the bridge until after due consideration of the facts. The inspector who made the report took the first train to the bridge shops, but on the evening of the same day telegraphed that the bridge was in the river. Mr. Cooper testified that such a deflection in an important member would indicate to any intelligent mind that the chord was less capable of doing the duty it should have done than were it in a perfectly straight condition. He considered that if prompt action had been taken to protect west lower chord 9 of the anchor arm, which could have been done by three hours' work and $100 worth of timber and bolts, the bridge could have been made perfectly safe and sufficient for its intended purpose.

Long before the large traveler had passed to the cantilever span, according to Mr. Cooper's testimony, he called the attention of the designing engineer of the Phœnix Bridge Co. to the undesirability of using it for erecting the suspended plan. A small traveler was accordingly designed for this erection, and Mr. Cooper consented to the use of the large traveler to erect it, on the understanding that as soon as the small traveler was completed the large one should be removed. He did not know until after the collapse of the bridge that this large traveler remained on the structure after the erection of the suspended span had commenced.

The testimony of the officers and engineers of the Phœnix Bridge Co. is to the effect that Mr. Cooper ordered the main span increased from 1,600 to 1,800 ft. and raised some of the unit stresses to an unprecedented amount in order to keep the weight of the bridge down. The Phœnix Bridge Co., being paid on a pound basis, would naturally have been glad to use lower unit stresses and more metal. The fall of the bridge is directly attributed by President Reeves of the company to this change in the unit stresses by Mr. Cooper. The company's designing engineer testified that when the first deflection was noticed in the lower chord he immediately prepared a plan for remedying it, which was submitted to Mr. Cooper and was in his possession when the bridge fell. One of the company's representatives testified that when engineers of the Phœnix Bridge Co. reported a deflection of the chords, Mr. Cooper had replied that there was no danger.

Leadite, a composition for making bell and spigot pipe joints, is the subject of a pamphlet from The Leadite Co. of America, 1215 Filbert St., Philadelphia. Tests of Leadite joints to determine their resistance to injury by expansion and contraction, unequal settlement, oxidation, frost, shock and vibration, are described. Pressure tests as high as 450 lb. per square inch are said to have been made without causing leakage of the joints.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Washington, D. C.—See "Public Buildings."

**Wilmington, Del.*—The Water Comrs. on Nov. 25 contracted with P. H. & F. Root of New York, N. Y., for a 75-h.-p. motor and blower, which will have a capacity of 3,000 ft. of cubic air per minute, for use in connection with the preliminary filter plant.

Palmetto, Fla.—T. D. Pollard, Town Clk., writes that the citizens on Nov. 12 voted to issue $25,000 bonds for water works improvements. Engineer not yet selected.

Leesburg, Fla.—Mayor Dozier is reported to be in favor of bonding the town for the construction of municipal water works.

Ft. Dade, Fla.—Bids will be received until Dec. 19 by the Constructing Quartermaster at Ft. Dade, for constructing 3 cypress cisterns at this post.

Savannah, Ga.—The Water Com. of Council (Alderman Wilkinson, Chmn.), is reported to be considering the general improvement of the water works, to include new mains, new wells and improvements at pumping station.

Dallas, Ga.—The citizens are reported to have voted to issue $30,000 bonds for the construction of water works.

Aurora, Ill.—It is stated that bids will be received until Jan. 17 for furnishing an air compressor for the pumping station.

Rockton, Ill.—There is reported to be a movement on foot here looking to the construction of water works.

Rock Island, Ill.—The City Clerk is asking for prices for twenty-five ⅝-in. meters and three ¾-in. meters. W. Treichler, City Engr.

Atlantic, Ia.—Bids will be received until Dec. 7 by T. E. Nichols, City Clk., for furnishing material and drilling 2 wells 8 or 10 in. in diam. and 50 ft. or deeper as the supply of water warrants, casing, valves and fittings for 8 or 10-in. wells and 8 or 10-in. c. i. pipe to connect wells with suction main; 1,000 or less water meters from ⅝ to 2-in. in size; a high duty pumping engine capable of lifting water from a depth of 26 ft. and against a head of 90 to 160 lbs., and pump 700,000 gals. in 24 hours; a triplex or power pump to be driven either by steam engine or operating under 80 lbs. boiler pressure or by electric motor and capable of performing the service from a depth of 26 ft. and against a head of 90 to 160 lbs. and pump 700,000 gals. in 24 hours.

Hancock, Md.—Henry P. Bridges, 1,119 Calvert Bldg., Baltimore, writes that the proposed water works reservoir and sewerage system will cost between $35,000 and $40,000. Engineer Arthur Giesler, 29 B'way, New York, N. Y.

Benson, Neb.—E. A. Steiger, City Clk., writes that it is proposed to extend the water mains, at a cost of $9,000. Nothing definite will probably be done until spring.

Fremont, Neb.—See "Power Plants, Gas and Electricity.

Atlantic City, N. J.—Water Supt. Van Gilder is reported to favor the building of new pumping stations and laying new mains across the 5-mile stretch of meadows from Absecon; about $250,000 will be expended.

Ogdensburg, N. Y.—The question of procuring a pure supply of water is reported under consideration by the Water Board.

New York, N. Y.—Bids will be received until Dec. 11 by John H. O'Brien, Comr. Water Supply, Gas and Electricity, N. Y. City, for furnishing, delivering and erecting a system of water curtains, with all piping, valves, manifolds, sprinkler heads, brackets, supports and all other appurtenances, complete in place and ready for operation in the high-pressure pumping stations at Oliver and South Sts. and at Gansevoort and West Sts., Bor. of Manhattan.

Lenoir, N. C.—It is stated that bids will be received until Dec. 15 by J. C. Seagle, Town Secy. and Treas., for $80,000 water and $20,000 street bonds.

Sulphur Springs, N. C.—See Power Plants, Gas and Electricity.

Fargo, N. D.—Bids will be received until Dec. 2 by N. C. Morgan, City Recorder, for making connections with the sewer and water main on Northern Pacific Ave.

Minerva, O.—See "Power Plants, Gas and Electricity."

Cincinnati, O.—The Bd. of Water Works Comrs. is reported to have decided to make some changes in settling reservoir No. 2 of the new water works at a cost of about $43,000.

East Stroudsburg, Pa.—The Boro' Council is reported to be considering the construction of a new reservoir, also the procuring of a better water supply for the town.

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

Pittsburg, Pa.—Controller John B. Larkin is reported to have submitted to Mayor Guthrie estimates for work proposed for the Greater Pittsburg as follows: Preliminary filtration plant, $600,000; free bridges, $3,000,000; subway tunnel for traction purposes, with 2 spurs, $8,000,000; new city hall, $3,000,000, and new market house, $3,000,00.

Ft. Pierre, S. D.—Bids are wanted, it is stated, until Jan. 21, for the $9,000 water works bonds. M. A. MacMillen, City Aud.

Elgin, Tex.—See "Power Plants, Gas and Electricity."

Mineral Wells, Tex.—The State Attorney General has approved an issue of $10,000 water bonds and $15,000 sewer bonds.

Puyallup, Wash.—The City Council is reported to be considering the matter of utilizing the five springs owned by the city in connection with the Salmon Creek spring at Sumner, to furnish a water supply for Puyallup. City Engr. Wheeler is reported to have suggested the construction of a concrete reservoir to hold about 24 hours' flow.

**Seattle, Wash.*—Sanfield & Gifford, of Seattle, secured contract on Nov. 16 for furnishing and laying water mains in 6th Ave. N. W., as follows: 3,874 lin. ft. 12 in. wood water pipe, $2; 13,100 lin. ft. 8 in. wood water pipe, $1.35; 230 lin. ft. 6 in. c. i. pipe hydrant connections, $1.50; 100 cu. yd. extra excav., 10 cets.; total, $32,668, including valves, hydrants, etc. They also secured contract for water mains on Ewing St., $2,148.

Marinette, Wis.—The City Council is reported to have voted to purchase the local water plant.

Winnepeg, Man.—Magnus Peterson, Secy. Bd. of Control, writes that the date of opening of bids for the supply of approximately 15 miles of assorted pipe has been extended from Nov. 15 to Jan. 15. Specifications and forms of tender may be obtained at the office of H. N. Ruttan, City Engr.

Hamilton, Ont.—The Fire and Water Com. of Council is reported to have decided to procure bids for electric pumps, and competition, it is said, will be open to foreign as well as Canadian manufacturers.

City Engr. Barrow is reported to have estimated the cost of laying a 12-in. pipe to supply the town of Dundas with water at $38,000, but nothing will be done in this matter until after pumps are purchased.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Washington, D. C.—See "Public Buildings."

Vienna, Ga.—Surveys and estimates are being prepared to determine the cost of constructing a sewerage system.

Galva, Ill.—The Bd. of Local Improv. is reported to have decided to construct sewer system, to cost $30,000.

Anna, Ill.—J. L. Hammond, Secy. Bd. Local Improv., writes that Chas. W. Brown, of Jacksonville, is preparing plans for a sewerage system, to cost about $12,000.

Elgin, Ill.—Local press reports state that plans have been completed for the proposed sewer system for the 6th Ward.

Evansville, Ind.—We are informed that bids will be received on Dec. 7 by the Bd. of Pub. Wks. (W. F. Wunderlich Clk.) for constructing pipe sewers on 7th and 4th Aves., and in an alley east of Main St.

**Kendallville, Ind.*—Wm. P. Myers, City Clk., writes that the contract for constructing sewer in Richmond St. (bids opened Nov. 22) has been awarded to Moellering Constr. Co., of Ft. Wayne, for $4,945.

Sterling, Kan.—Mayor D. J. Fair, Jr., is reported to favor the construction of a sewerage system for the town.

Paola, Kan.—E. D. McLaughlin, City Clk., it is stated will receive bids until Dec. 3 for constructing lateral sewers.

Shelbyville, Ky.—The citizens are reported to have voted to construct a system of sewers.

Lexington, Ky.—E. G. Katenhuber, Jr., Asst. Engr. on Sewers, writes that bids will probably be called for early in Jan. for about one-half mile of 12-in. sewer in heavy rock cut. He further states that bonds to the amount of $25,000 will be sold about Jan. 1 to be used for main sewer work now under construction.

Hancock, Md.—See "Water."

Gloucester, Mass.—The citizens will on Dec. 3 vote on the question of establishing a sewerage system. Winslow L. Webber, City Engr.

Boston, Mass.—See "Power Plants, Gas and Electricity."

Minneapolis, Minn.—Local press reports state that work is about to commence on the construction of a tunnel and drop-shaft on 38th St. at the Mississippi River in connection with the proposed construction of a new sewerage system throughout the extreme southern part of the city, to include Linden Hills and Cottage City.

St. Louis, Mo.—A bill has been introduced in Council providing for the extension of the Glaise Creek sewer through Carondelet Park to Kansas St., to cost about $140,000.

Holdrege, Neb.—N. Nelson, City Clk., writes that about $20,000 will be expended for sewers.

Portsmouth, N. H.—See "Power Plants, Gas and Electricity."

Albuquerque, N. M.—Jas. N. Gladding, City Engr., writes that plans are being prepared for a sewerage system; probable cost $375,000.

Brooklyn, N. Y.—See "Power Plants, Gas and Electricity."

Rochester, N. Y.—The Bd. of Contract has rejected bids received Sept. 25 for 500 ft. of riveted steel pipe for a part of the new 21st ward sewer; the lowest bid amounted to $3,543. The plans will be changed and longer lengths of pipe used.

Fargo, N. D.—See "Water."

Springfield, O.—All bids opened by the Bd. of Pub. Wks. (F. A. Crothers, clk.) Nov. 20 for furnishing material and constructing a portion of the high level intercepting sewer to include 9,816 lin. ft. vitri. pipe, plain or reinforced concrete sewer, 9,376 lin. ft. 6 in. pipe house connections, Y branches, manholes, 17,875 cu. yds. rock excav., 115 cu. yds. Class A concrete, etc., have been rejected and new bids will be received on Dec. 18 as advertised in THE ENGINEERING RECORD. W. H. Sieverling, City Eng.

Norwood P. O., Cincinnati, O.—It is stated that the Bd. Pub. Service (L. H. Gebhart, Clk.) will receive bids until Dec. 14 for constructing a sanitary sewer in a portion of Sherman Ave. Jas. A. Stewart, Engr., 712 Traction Bldg., Cincinnati.

Items marked thus give the names of parties awarded contracts.

Brooklyn, N. Y.—Bids will be received until Dec. 11 by Bird S. Coler, Boro. Pres., for furnishing material and constructing sewers in E. 4th and 44th Sts. Engineer's estimate; 762 lin. ft. 36-in. brick sewer; 3,965 lin. ft. 12-in., 981 lin. ft. 15-in pipe; 5,100 lin. ft. 6-in. house connection drain; 45 manholes; 30 M. ft. sheeting and bracing. etc.

Eaton, O.—Bids are wanted, it is stated, until Dec. 16 for $10,000 sewer bonds. R. F. Craig, Mayor.

**Lancastetr, Pa.*—The detail bid of Reilly & Riddle, of Philadelphia, the successful bidder for completing Water St. sewer (bids opened Nov. 11), is as follows: Nine thousand cu. yd. earth excavated, classes A and B, 90 cents; 3,700 cu. yd. rock excavation, $2.80; laying 2,200 ft. 6-in. rock underdrain, 62 cents; 1,000 ft. 108 in. concrete sewer in earth, $12.50; 1,200 ft. 108 in. concrete sewer in rock, $12.50; 75 ft. 72 in. concrete sewer in earth or rock, $8.75; 60 in. concrete sewer in earth or rock, $7.10 48 in. concrets sewer in earth or rock, $5.60; 36 in. concrete sewer in earth or rock, $5; 30 in. concrete sewer in earth or rock, $4.35; 20 ft. 30 in. pipe sewer, $3.75; 300 ft. 24 in., $2.15; 900 ft. 18 in., $1.25; 15 in., 94 cents; 100 ft. 12 in., 60 cents; 300 ft. 10 in., 62 cents; 8 in., 38 cents; 300 ft. 6 in., 30 cents; 5M. ft. timber cradle, $56.25; 10M. ft. sheeting left in trench, $37.50; 60 cu. yd. earth excavated below grade filled with crushed stone, $3.10; 25 cu. yd. earth excavated below grade filled with Port. cem. con., $11.25; 40 cu. yd. brick masonry laid in Port. cem. mortar, $12.50; brick masonry laid in Nat. cem. mortar, $10; 50 cu. yd. Portland cement concrete, $10; 50 cu. yd. rubble masonry laid in Nat. cem. mortar, $6.25; 3,000 lbs. iron castings, 5 cents; 2,000 lbs. wrought iron fittings, 5 cents; 25 cu. yd. rip rap, $2.50; total, $52,842, to be completed Sept. 1, 1908. Totals of other bids: E. G. Gummel, Washington, D. C., $54,226 (300 days); R. A. Malone, Lancaster, $55,655 (200 days).

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

McKeesport, Pa.—It is stated that bids will be received until Dec. 5 by C. E. Soles, City Compt., for constructing a 15-in. terra cotta sewer in Jim Crow Alley.

Kane, Pa.—The Borough Council (Dr. J. Baher, Pres.) is reported to be making preparations for the disposal of the sewage of Kane.

Scranton, Pa.—The City Council is reported to be considering the construction of a septic tank and contract bed system for sewage disposal in the 10th Ward to cost about $33,000.

Yorkville, S. C.—The citizens are reported to have voted to issue $25,000 bonds for the construction of a sewerage system.

Chattanooga, Tenn.—Local press reports state that bids will be received until Dec. 3 by Robt. Hooke, City Engr., for constructing 1½ miles of sanitary sewers in Grand View Hotel Dist., known as No. 12. Estimated cost, $28,000.

Cameron, Tex.—C. B. Beatty, City Secy., writes that the proposed sewerage system will cost about $12,000. Bonds have not yet been sold. Engr., N. Werenskiold, of Dallas.

Seattle, Wash.—We are informed that new bids will probably be called for in about 6 weeks for constructing the Green Lake section of the north trunk sewer. The lowest bid recently received for the sewer amounted to $993,036 and was rejected as being too high. C. B. Bagley, Secy. Bd. of Pub. Wks.

Chester, W. Va.—We are informed that Engineer John A. George, of East Liverpool, O., is constructing a sewerage system here for the Chester Improvement Co.

Cashton, Wis.—It is reported that surveys are being made for a sewerage system.

BRIDGES.

Notes Arranged Alphabetically by States.

Newport, Ind.—It is stated that bids will be received until Dec. 4 by the Co. Comrs. at Newport for constructing the superstructure of the bridge across Wabash River.

Muncie, Ind.—It is stated that bids will be received until Dec. 4 by the Co. Comrs. at Muncie for constructing 3 bridges, 2 across Mississinewa River and the other across White River.

Pooli, Ind.—It is stated that bids will be received until Dec. 3 by the Bd. Co. Comrs. for constructing a new floor system for the Finley bridge. Alvin B. Ham, Co. Aud.

**Iowa City, Ia.*—The Bd. of Supervisors is stated to have awarded the contract for constructing a bridge over Iowa River to the Iowa Bridge Co., of Des Moines, for about $26,500.

Topeka, Kan.—Bids will be received any time prior to Jan. 1 for the construction of a steel viaduct at Branner St. for Topeka St. Ry. Co. (A. M. Patten, Gen. Supt., Topeka) and the Atchison, Topeka & Santa Fe Ry. Co. (C. A. Morse, Ch. Engr., Topeka); cost reported to be $60,000.

Girard, Kan.—It is stated that bids will be received until Dec. 10 for constructing the iron superstructure for 4 I-beam and a 70-ft. truss bridges.
It is stated that bids will be received until Dec. 9 by Fred. A. Gerren, Co. Clk., Girard, for constructing the stone superstructure for the following bridges: Vehlow Bridge in Walnut Township; Dunlop Bridge in Baker Township; Devlin Bridge in Washington Township; stone arch bridge consisting of 2 10-ft. arches in Sherman Township.

**Chanute, Kan.*—The Southwestern Bridge Co., of Joplin, Mo., has secured the contract to build a bridge across Neosho River, near Chanute. The crossing consists of one 200-ft. span, one 70-ft. span, and two 30-ft. steel approaches, the roadway being 20 ft.; contract price, $11,573. Work will be completed about June 1, 1908.

Sunrise, Minn.—Bids will be received until Dec. 15 by G. E. Deming, Town Clk., for $4,000 bridge bonds.

Kansas City, Mo.—We are informed that a reinforced concrete bridge is to be constructed over Gooseneck Creek at Independence Ave. in the spring, at a cost of about $12,000. E. A. Harper, City Engr.

St. Louis, Mo.—The City Council is stated to have passed the bill pending for the construction of a free bridge over the Mississippi River at Chouteau Ave., for which the citizens voted to issue $3,500,000 bonds.

Niagara Falls, N. Y.—See "Railroads."

New York, N. Y.—Bids will be received until Dec. 9 by Jas. W. Stevenson, Comr. of Bridges, New York City, for the construction of the masonry piers, surface and sub-surface changes, and steel super-structure of the Manhattan and Brooklyn approaches of the Manhattan bridge, over East River, between the Boroughs of Manhattan and Brooklyn. Security, $800,000.

Fargo, N. D.—It is stated that Arthur G. Lewis, Co. Aud., will receive bids until Dec. 4 for replanking or paving Front St. bridge and approach thereto; also repairing bridge in Barnes Township over Sheyenne River.

Tiffin, O.—The County Surveyor has completed plans and specifications for repairing and painting Washington St. bridge; estimated cost, $2,960.

Toledo, O.—The Bd. of Pub. Service is stated to have approved plans for the construction of the Lake Shore's bridge to cross Swan Creek from Monroe St. to Goose Point. The bridge will be a rolling lift, and cost approximately $85,000. S. Rockwell, Ch. Engr., Cleveland.

Cleveland, O.—Wm. J. Carter, City Engr., is stated to have been authorized to prepare plans for high level bridges to be constructed over Cuyahoga River.

Celina, O.—It is reported that bids will be received until Dec. 4 by the Co. Comrs. at Celina, for constructing the superstructure of John Bridge, Blackcreek Township, also a steel bridge, known as Tickle Bridge in Blackcreek Township, each bridge to have a 64-ft. span and 16-ft. roadway. T. A. Weis, Co. Aud.

Pittsburg, Pa.—See "Water."

Etna, Pa.—Bids will be received at the office of A. R. Dunbar, Boro. Clk., for constructing 2 bridges; a steel girder bridge with the necessary abutments, over Pine Creek on Grant Ave.; also a bridge over Little Pine Creek on Dewey St. Bids to be submitted on 3 different plans: 1st, a steel girder bridge with necessary abutments: 2d, reinforced concrete arch bridge; 3d, a masonry ribbed arch bridge.

**Spokane, Wash.*—The County Comrs. are stated to have awarded the contract for constructing the Le Pray Bridge over Spokane River about 26 miles below the city, to Mm. Oliver, of Spokane, for $8,500.

Mt. Vernon, Wash.—John W. Meehan, County Engr., is reported to have been authorized to secure plans and specifications for a 262-ft. steel span, 20 ft. wide, for the Mt. Vernon Bridge.

Wheeling, W. Va.—The City Council is reported to have decided to issue $25,000 bonds for the Market St. Bridge.

La Crosse, Wis.—It is stated that bids will be received until Dec. 6 at the office of C. H. Rawlinson, Co. Clk., for constructing a steel bridge over Black River; also laying new girders and flooring in the McGillivrary bridge.

Menominie, Wis.—Bids will probably be received about Dec. 6 by F. W. Rowe, City Clk., for the construction of a bridge over Red Cedar River; cost about $30,000.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—The construction of a road from Los Angeles to Yuma via San Diego is reported contemplated.

Oakland, Cal.—The City Council is reported to be considering the construction of a boulevard around Lake Meritt.

Boulder, Colo.—It is stated that bids will be received until Dec. 7 by T. W. Jaycox, State Engr., Denver, for constructing and repaving 1 2-3 miles of county wagon road from Jamestown to Allen Park.

Washington, D. C.—See "Public Buildings."

**Wilmington, Del.*—Francis A. Price, State Highway Comr., writes that the contract for constructing a macadam road 2 64-100 miles long in New Castle (bids opened Nov. 26), has been awarded to Amies Asphalt Co., of Wilmington, Del., for $20,498.

Pensacola, Fla.—We are informed that the time of receiving of bids for approximately 170,700 sq. yds. of clay or shale blocks, sheet asphalt, bitulithic, wood block or macadam pavement, and 115,950 lin. ft. of concrete curb, which were to have been opened on Nov. 15, has been postponed until after Jan. 1st. L. Hilton Green, Chmn. Bd. Bond Trus.; T. Chalkley Hatton, Consulting Engr., Wilmington, Del.

Clarksville, Ga.—J. H. Asbury, Mayor, writes that it is proposed to macadamize about 1¼ miles of streets with crushed stone, at a cost of about $5,000.

Atlanta, Ga.—The City Council is reported to have opened bids Nov. 18 for paving with creosoted blocks Broad St. as follows: Venable Bros., Atlanta, $3.29, small granite blocks, between double car tracks, at $2.65. Georgia Granite Co., $3.49. Creosoting Co., of Ficklin, Ga., $3.61. Price given per sq. yd.

Chicago, Ill.—Plans are stated to have been prepared by the South Park Bd. for the widening of Michigan Ave.

Rock Island, Ill.—We are informed that bids will be received on Dec. 2 for 2 blocks of asphalt paving on 19th St.; estimated cost, $6,300. W. Treichler, City Engr.

Peoria, Ill.—The Bd. of Local Improv. has recommended the paving of Lincoln Ave. with brick; estimated cost, $28,600.

Danville, Ind.—It is stated that bids will be received until Dec. 5 by the Co. Comrs., at Danville for constructing 1¼ miles of gravel road in Marion Township. David D. Mills, Co. Aud.

**Crawfordsville, Ind.*—It is proposed to pave College and Walter Sts., about 20 blocks in all, with brick, cement curb and gutter. B. R. Johnston, City Engr.; Henry B. Hulett, City Clk.

Baltimore, Md.—Bids will be received until Dec. 4 by the Bd. of Awards (J. Barry Mahool, Pres.), to curb, regutter and resurface with bitulithic a portion of 22d St.

Boston, Mass.—See "Power Plants, Gas and Electricity."

St. Louis, Mo.—Bids will be received until Dec. 10 by the Bd. Pub. Improv. (J. J. O'Reilly, Pres.) for improving portions of numerous alleys by paving with vitri. paving brick blocks.

Portsmouth, N. H.—See "Power Plants, Gas and Electricity."

**Woodbury, N. J.*—The Bd. Chosen Freeholders is stated to have awarded the contract for constructing about 6 miles of the Malaga and Downstown road to J. S. Fisler, for $12,911.

**Malaga, N. J.*—The contract for the construction of the Malaga and Downstown Road is stated to have been awarded to J. Sheppard Fisler, of Clayton, for $12,911.

Newark, N. J.—Plans and specifications are reported completed for the paving of Clay St. at an estimated cost of $85,000.

Brooklyn, N. Y.—See "Power Plants, Gas and Electricity."

Brooklyn, N. Y.—Bids will be received until Dec. 11 by Bird S. Coler, Boro. Pres., for paving with asphalt portions of Throop Ave., Grafton and 80th Sts., and with granite Wolcott St. Engineer's estimate 6,451 sq. yds. asphalt pavt.; 400 sq yds. granite block pavt, with tar and gravel joints; 830 cu. yds. concrete, etc.

Buffalo, N. Y.—Separate bids will be received until Dec. 16 by F. G. Ward, Comr. Pub. Wks., for paving portions of Detroit, Holt and Pine Sts., repaving Lafayette Ave. and Beau Alley.

New York, N. Y.—The following are the bids opened by the Dept. of Parks, Nov. 7, for furnishing and delivering two 12-ton, 3-wheel, steam road rollers for Dept. of Parks, Borough of Bronx: Buffalo Steam Roller Co., Buffalo, for Pitts-Niagara Rollers, each $1,595; total, $3,190; for Pitts Standard Rollers, each $3,175; total, $6,350; Iroquois Iron Works, Land Title Bldg., Philadelphia, Pa., each $2,338; total, $4,677; The Kelly-Springfield Road Roller Co., Springfield, O., each $3,050; total, $6,100; Chas. Longenecker & Co., each $2,650; total, $5,300.

Lenoir, N. C.—See "Water."

Fargo, N. D.—See "Bridges."

Hamilton, O.—Bids are wanted, it is stated, until Dec. 11 for $40,000 street bonds. John A. Keller, City Clk.

Toledo, O.—It is stated that bids will be received until Dec. 5 by Reynold Voit, Secy., Bd. Pub. Service, for constructing sidewalks on several streets.

Conneaut, O.—It is stated that H. G. Culp, City Aud., will receive bids until Dec. 14, for $20,000 Washington St. sidewalk bonds, also $2,000 street improvement bonds.

Washington, Pa.—Bids will be received until Dec. 20 by Wm. Wylie, Co. Road Engr., Washington, for repairing the roadway and culverts and cleaning out the side ditches in the sections of the Laboratory, Zollarsville, Beallsville and Claysville Roads.

Allentown, Pa.—The City Council is reported to have passed ordinances providing for the paving of Fulton and 12th Sts., also the opening and grading of a portion of Fairview Ave.

Altoona, Pa.—An ordinance is reported passed by City Council providing for the paving with brick a portion of 9th St.

Pittsburg, Pa.—Bids were opened as follows for macadamizing extension of Lovedale Road according to reports: McLaughlin Constr. Co., $3,186; Collins Garden Co., $2,379; Pitts Constr. Co., $3,597, and Albert G. Rathey, $2,821.

Williamsport, Pa.—The City Council is reported to have passed an ordinance providing for the paving of a portion of Washington St.

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

Memphis, Tenn.—Bids will be received until Dec. 5 by Ennis M. Douglass, City Register, for paving with gravel on a portion of La Clede Ave. Jas. H. Malone, Mayor.

Salt Lake City, Utah.—Bids will be received at the office of the Bd. of Pub. Wks. (F. J. Leonard, Chmn.) until Jan. 3 (extension of date from Dec. 6), for grading, curbing and paving First South St., to include 60,000 cu. yds. grading, 17,000 lin. ft. curb and 41,000 sq. yds. asphalt, as advertised in The Engineering Record. Louis C. Kelsey, City Engr.

Spokane, Wash.—Bids are wanted until Dec. 15, it is stated, for $400,000 street bonds. Robert Fairley, City Comptr.

**Seattle, Wash.*—H. F. Jahn & Co. have secured the contract for paving Jackson St. with brick for $6,102.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Columbiana, Ala.—The Columbiana Light & Power Co. is reported to have selected E. N. Cunningham, of New Orleans, La., to prepare plans for the installation of an electric light plant. After plans are completed bids will be received on equipment for complete plant.

**Arizona.*—The Secretary of the Interior at Washington, D. C., has executed contract with Roeblings Sons & Co., of Trenton, N. J., for furnishing approximately 685,000 lbs. of copper wire required for the transmission line and other purposes in connection with the Salt River irrigaton project, Arizona, at 15 1-4 cents per lb.

Chico, Cal.—The City Council is reported to have on Nov. 13 sold to L. D. Macy, a franchise to construct and operate an electric light, heat and power system in Chico.

Long Beach, Cal.—The Edison Electric Light Co. will expend about $100,000 to $150,000 for a new plant at Long Beach.

**Items marked thus give the names of parties awarded contracts.*

Berkeley, Cal.—At a recent meeting of the Chamber of Commerce, C. S. Forney is reported to have submitted a proposition for the establishment of an electric light plant.

**Pasadena, Cal.*—The City Council has voted to enter into a contract with the Ft. Wayne Electric Co., of Ft. Wayne, Ind., for the needed supply of electric transformers.

**Denver, Colo.*—The Northwestern Electric Equipment Co. of St. Paul, Minn., is reported to have secured the contract for the electrical equipment for the Auditorium for about $40,000.

Las Animas, Colo.—The following are the bids opened on Nov. 23 at the office of the Bureau of Yards and Docks, Navy Dept., Washington, D. C., for power plant for naval hospital (new) Ft. Lyon. (a) Price for the entire work, complete, in accordance with plans and specification; (b) amount to be deducted if garbage crematory and stack are omitted; (c) price for garbage crematory and stake; (d) for complete work in accordance with the spirit of specification, but with modifications: Lewis & Kitchen, 1,200 Michigan Ave., Chicago, Ill., (a) $90,728, (b) $2,150, (c) $2,150; Evans, Almirall & Co., 281 Water St., New York, N. Y. (a) (two bids) $91,472 and $98,750, (b) $2,285, (c) $2,285, (d) $85,582, $90,935 to $96,840; Stearns Rodger Mfg. Co., 1,720 California St., Denver, Colo., (a) $90,800; Dixon Eng. & Constru. Co., 323 1-2 Huron St., Toledo, O., (c) $2,850; D'Olier Eng. Co., 121 South 11th St., Philadelphia, Pa., (a) $77,800, (b) $2,090, (d) (3 bids) $77,000 to $77,500; Joseph S. Sweigard, Betz Bldg., Philadelphia, Pa., (d) $1 058; C. L. de Muralt, 114 Liberty St., New York, N. Y., (a) $72,000, (b) $2,600, (c) $2,600, (d) $62,250.

Washington, D. C.—R. C. Hollyday, Chief of the Bureau of Yards and Docks, in his annual report recommends an appropriation of $985,047 for the Washington Navy Yard, of which $300,000 will be expended for purchase of land and change of railroad system; rewiring certain yard buildings, $21,500; machinery for power plant extension, $12,000; night watch time detector system, $10,000; underground conduit system, to extend, $10,000; electric light plant extension, $5,000; extension and improvement of electric fire alarm and telephone systems, $4,000; completing switchboard in power plant building No. 118, $2,500; locomotive and locomotive crane house, $61,747; new foundry (to cost $300,000), $100,000; fireproof general storehouse for supplies and accounts, $200,000; quay wall, to complete, $25,000; new floors in north and south gun shops, east and west gun carriage, and other shops, $25,000; quay wall in front of old part of yard, $85,800, etc.

Washington, D. C.—See "Public Buildings."

Washington, D. C.—See "Miscellaneous."

Leesburg, Fla.—The question of holding an election to vote on issuing electric light bonds is reported to be under consideration.

Lagrange, Ga.—The Mayor writes that about $20,000 will be expended for electric light improvements. Bids will probably be called for in February. J. R. Black is Supt. and Ch. Engr. municipal plant.

Powell, Village Clk., will receive bids until Dec. 20 for furnishing all material, copper wire and arc lamps and constructing a system of electric street lighting to be operated in connection with the substation of the Scioto Valley Traction Co. Plans and specifications may be obtained from R. Fullerton, care Scioto Valley Traction Co., Columbus.

Clinton, Okla.—F. Murch, of Hennessey, is reported to have secured a franchise for an electric light and gas plant.

Philadelphia, Pa.—In his annual report R. C. Hollyday, Chief of Bureau of Yards and Docks, Washington, D. C., asks for an appropriation of $903,000 for League Island Navy Yard to be expended as follows: Extension to central power plant, $322,500; extension to electric conduit system, $8,000; electric elevators, $8,000; electric motors for Dry Dock No. 1, $35,000; to continue retaining wall about reserve basin, $50,000; repairs to fenders on sea wall of Delaware water front, $8,000; repairs to shore ends of piers 2 and 3, Delaware water front, $10,000; grading and paving to continue, $25,000; sewer system, extensions, $11,000; hydraulic dredge for Dept. of Yards and Docks, $125,000; locomotive crane track extension, $30,000; extension to railroad system, $18,000; extension of artesian water system, $4,250; extension of fire protection system, $20,000; central heating system for yard, $50,000; intermediate keel blocks for Dry Dock No. 2, $5,675; equipment for railroad, $5,000; intermediate keel blocks for Dry Dock No. 1, $6,800; dredging and filling Delaware water front, $75,000; sawmill, boat and joiner shop (to cost $300,000), $100,000, etc.

Panama.—Bids will be received at the office of Lieut.-Col. H. F. Hodges, Corps Engrs., U. S. A., Gen. Purchasing Officer, Isthmian Canal Comm., Washington, D. C., until [illegible], for furnishing electrical material, consisting of cable, wire, flexible conduit, wire attachments, switches, push buttons, shade holders, annunciators, bells, lamp shades, electroliers, incandescent globes, dry cells, wire grips, etc.

Sumter, S. C.—See "Electric Railways."

Freeman, S. D.—The citizens and business men are reported to have petitioned City Council to construct an electric light plant.

Elgin, Tex.—B. H. Graham, of Smithville, writes that a stock company is about to be formed, to construct electric light plant, water works and an ice plant, to cost between $50,000 and $60,000. Will be ready for plans about Jan. 1. No engineer yet selected.

Ft. Worth, Tex.—Bids will be received at the office of Jas. Knox Taylor, super Treas. Dept., Washington, D. C., until Dec. 20 for the installation of a conduit and electric wiring system for extension to U. S. Postoffice, as advertised in THE ENGINEERING RECORD.

Amherst, Va.—The Amherst Electric Light & Power Co. is reported incorporated, with a capital of $15,000, for the purpose of establishing plant for furnishing electric light and power. H. L. Page, Pres.

Tulalip, Wash.—See "Schools."

Fayetteville, W. Va.—The Fayetteville Water & Light Co. is reported incorporated with a capital of $25,000, and has secured franchise; will soon begin construction of plant. Jos. Hawkins is one of the incorporators.

Woodstock, Ont.—At the coming municipal election, it is stated that a by-law will be submitted for the expenditure of $27,000 for a distributing plant for Niagara power, and to provide a new motor and an electric pump.

London, Ont.—The City Council is reported to have passed on first reading, the Niagara power by-law, and the Special Com. of Council was authorized to instruct the engineer to prepare a statement of estimated cost of distribution, and prepare plans showing area proposed to be covered.

Hamilton, Ont.—See "Water."

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—It is stated that the Los Angeles & Owens Valley R. R. Co. will begin construction work in the spring on the line to connect Los Angeles, Randsburg, Independence and Bishop, which will be about 325 miles long. S. P. Jewett, Pres.; A. M. Chaffey, Secy. and Treas.

Hayward, Cal.—It is stated that bids will be received Dec. 4 for a franchise as applied for by the Oakland Traction Co.

Washington, D. C.—It is reported that the Washington, Spa Springs & Gretta Electric Ry. Co., which is to connect Washington, Bladensburg and Branchville by an electric railway will begin construction work in January. The line will be about 8 miles long. Capital, $100,000. Benj. D. Stephens, Hyattsville, Md., Pres., and S. S. Yoder, Gen. Mgr.

Americus, Ga.—It is stated that the Americus Ry. & Lighting Co. is planning to begin construction of the electric railways within 60 days. The company contemplates building 4 miles of track. The power house and repair shop will be located at Americus. A. N. Walker, Scranton, Pa., Pres.

**Atlanta, Ga.*—The contract for constructing the Atlanta-Augusta Interurban Electric Ry. is stated to have been awarded to Cook & Laurie Co., of Montgomery.

Marietta, Ga.—It is stated that a charter for the Marietta-Macland Ry. Co., which will build an electric railway from Marietta to Powder Springs, will be secured next month, and as soon as the financial situation becomes more settled the company will be financed and work pursued to completion on the road. John N. McEachern is reported interested. Capital, $500,000.

Bedford, Ind.—The City Council is reported to have granted the Grand Central Traction Co. a franchise for the construction of an interurban line through the city and also operate an electric light plant.

New Orleans, La.—J. W. I. Stephens is reported organizing a company to construct an electric railway between New Orleans and Grand Isle.

Calumet, Mich.—It is stated that Calumet & Lac la Belle Traction & Power Co. will soon be organized for building an electric railway between Calumet and Lac la Belle. S. M. Wells, of Chicago, is promoting the scheme.

Manchester, N. H.—See "Business Buildings."

New York, N. Y.—Bids were opened at the office of Jas. W. Stevenson, Comr. Bridges, N. Y. City, on Oct. 24, for the construction of train spacing signals for the elevated railway tracks of the Brooklyn Bridge and the contract was awarded to the Union Switch & Signal Co., 143 Liberty st., for $39,950.

Defiance, O.—The Toledo & Defiance Ry. Co. and the Defiance, Hicksville & Ft. Wayne Ry. Co. have been granted franchises to construct electric railways in Defiance, according to reports.

Oklahoma City, Okla.—A charter is stated to have granted to the Oklahoma Interurban Traction Co., of Oklahoma City, with $500,000 capital to build an electric interurban line in Oklahoma City and Capitol Hill to El Reno. Incorporators: L. E. Patterson, S. C. Glasgow, G. F. Benz and others.

Hershey, Pa.—It is reported that the extension of the Hershey & Campbellstown Elecrtc Ry. to Elizabethtown, is contemplated.

Morrellville, Pa.—The City Council is reported to have passed an ordinance granting the Johnstown Passenger Ry. Co. the right to operate on certain streets in Morrellville. C. N. Smith, Ch. Engr., Johnstown.

Linesville, Pa.—The Meadville & Conneaut Lake Traction Co. (H. L. Kellenbaugh, of Meadville, Supt.) is reported to have announced that the extension of the line from Linesville to Greenville, a distance of 21 miles, is contemplated.

Smithfield, Pa.—The Borough Council is reported to have granted the Brownsville, Masontown and Smithfield

*Items marked thus give the names of parties awarded contracts.

St. Ry. Co. a franchise on Geneva, Masontown, Church Morgantown and Water sts. E. M. Wilkins, Ch. Eng.

Pittsburg, Pa.—See "Water."

Sumter, S. C.—It is reported that J. L. Alnut has petitioned the Council for a franchise for a street railway and gas works.

Memphis, Tenn.—See "Business Buildings."

Spokane, Wash.—It is stated that the work of clearing the right of way of the Panhandle Electric Ry. & Power Co. is proceeding rapidly, and in a short time the grading of the road will be started. The company will at once proceed to erect a large power plant on Priest River to furnish power for the road, and will also sell power to the mines in the Priest Lake district. Terminals for the road have been purchased at the town of Priest Lake, on the Great Northern, and at the foot of the lake itself.

Prosser, Wash.—The Prosser Traction Co. is reported organized to construct an electric railway. The company announces that a power site has been selected 7 miles below Prosser. In case it secures the site the company will construct a dam and build a power plant at that place, transmitting its power to Prosser. It is proposed to construct a line south into Horse Heaven County as far as the Columbia River and another east to connect with the North Coast R. R. in case that road builds its line, as now proposed, through Kiona and up the Yakima Valley.

North Yakima, Wash.—It is stated that surveys have been completed for the Hanford Electric R. R., which is to connect the Hanford irrigation tract on the Columbia River with the Milwaukee and also with the Northern Pacific at this point. Grading work will be commenced either this winter or early in the spring and power to operate the road will be generated at the power plant of the irrigation company at Priest Rapids. The line from the town of Hanford to North Yakima will run straight through the Moxee Valley to North Yakima, traversing the Black Rock and Cold Springs districts.

Bluefield, W. Va.—The Bluestone Traction Co. is reported to have been granted a franchise to extend its line over So. Bland St., and into South Bluefield.

Niagara Falls, Ont.—The Buffalo, Niagara & Toronto Ry. Co. is stated to have secured the right of way from Falls View to a point on the Niagara, St. Catharines and Toronto line.

St. Vital, Man.—The Town Council is reported to have decided to construct a municipal street railway system in St. Vital.

RAILROADS.

Notes Arranged Alphabetically by States.

Washington, D. C.—See "Power Plants, Gas and Electricity."

Eunice, La.—The Eunice, Lafayette & Abbeville Ry. Co. (Mr. Clarke, Mgr., 1st Natl. Bank Bldg.) is reported to be completing surveys for its new line.

Boston, Mass.—See "Power Plants, Gas and Electricity."

Biloxi, Miss.—It is reported that surveys have been made for the Biloxi Great Northern R. R., which it is proposed to build from Biloxi to a connection with the Mobile & Ohio R. R. It is stated that surveys have been made to Bucatunna, making the distance about 100 miles. W. L. Covell, Ch. Engr., Biloxi.

Portsmouth, N. H.—See "Power Plants, Gas and Electricity."

Brooklyn, N. Y.—The East River Terminal Co. is reported incorporated to build and operate a standard gauge steam railroad, to be used exclusively for freight purposes, in the Boro. of Brooklyn. The road is to begin at the East River, bet. No. 3d and No. 4th Sts., and run easterly about half a mile to a point east of Wythe Ave., bet. No. 3d and No. 4th Sts. Capital, $10,000. Directors: H. O. Havemeyer, Jr.; B. E. Martin, J. H. McCafferty and others, of New York City; John Unger, of Morristown, N. J., and Wm. B. Duncan, Jr., of Port Washington, L. I.

Brooklyn, N. Y.—See "Power Plants, Gas and Electricity."

Albany, N. Y.—Press reports state that the Boston & Albany R. R. Co. (Walter Shepard, Ch. Engr., Boston, Mass.) is having plans and specifications prepared for installing a signaling system on its road, at an estimated cost of $900,000. This work will be completed in 2 to 3 years and will be started in the spring. It will entail replacing signals on ¾ of the length of the system.

Niagara Falls, N. Y.—At a session of the Grade Crossings Comn. on Nov. 14 Engr. John L. Harper, of the Niagara Falls Hydraulic Power & Mfg. Co., and Engr. Wm. D. Robins, of the Niagara Falls Power Co., were selected to prepare a complete set of plans for the elimination of all grade crossings in the city. The board also took under consideration the resolution of the Common Council recently passed directing the Comn. to take necessary steps to eliminate the No. Main St. crossing by means of a viaduct from Ontario Ave. to Bellevue Ave. This proposition will also be looked into by the engineers of the Comn.

Bellaire, O.—The officials of the Northwest system of the Pennsylvania Co. and those of the Southwest system, which operates the Pan Handle R. R. are reported to have decided to construct during 1908 a second track on the Cleveland & Pittsburg division from Bellaire to Mingo Junction, O., and also build a large freight yard at New Cumberland Junction, W. Va., 6 miles east from Steubenville, O. Thos. Rodd, Ch. Engr., Pittsburg, Pa.

Philadelphia, Pa.—Geo. S. Webster, Chief of the Bureau of Surveys, on Nov. 21 reported to the Special Joint Committee appointed by Councils to consider the removal of grade crossings in the downtown district that the estimated cost would be for an elevated steel structure along Washington Ave. $4,650,000, and a partly elevated, partly subway track for the Oregon and Shunk street lines $4,000,000. A subcommittee was appointed to confer with the Mayor, the Bureau of Surveys and the officials of the Pennsylvania and Baltimore & Ohio R. R. Companies as to the most practicable plans for the accomplishment of this work. The subcommittee consists of Charles R. Campbell, Select Councilman from the 39th Ward; Wm. A. Miller, Common Councilman from the same ward, and Wm. J. Crawford, Select Councilman from 30th Ward.

Wilkesbarre, Pa.—Local press reports state that the Grade Crossing Comn. of Council have adopted plans for abolishing the grade crossings as amended, which will permit Market and Northampton Sts. remaining open. E. B. Morgan, Chmn. Hollenback Bldg.

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

Stamford, Tex.—The Stamford & Northwestern Ry. Co. has completed the location of its proposed new line. The line starts at Stamford and runs through Jones, Haskell, Stonewall, Kent and Dickens Counties; total length of line, 100 4/10 miles. It is expected that work will commence on construction before end of year. L. M. Buie, Pres., and W. E. Bogart, Ch. Engr., both of Stamford.

Cheyenne, Wyo.—The Wyoming Short Line R. R. Co. is reported incorporated to construct a line in the Big Horn country, to be 50 miles in length, extending from Wiley and reaching the eastern border of Yellowstone National Park. The road will pass through Germania, Grey Bull and other towns. The new enterprise is financed by the Big Horn Development Co., which has capitalized the new railroad at $2,500,000.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Ocean City, N. J.—Chas. A. Doe, of Philadelphia, Pa., it is stated, is having plans prepared for a $15,000 apartment house and 2 cottages, which are to cost $35,000 each, to be erected in Ocean City.

Wilmington, N. C.—It is reported that the members of the Baptist Church are having plans prepared for a $20,000 edifice. Rev. C. H. Durham, pastor.

Pemberville, O.—It is stated that bids will be received until Jan. 15 by Rev. E. H. D. Winterhoff, Chmn. Bldg. Com., for erecting a 1-story 73x120-ft. brick and stone edifice for the Evangelical Lutheran congregation. Bids to be submitted separately on roofing and sheet metal work. R. C. Gotwald, Archt., Springfield.

Enola, Pa.—It is stated that the Trus. of the Presbytery of the Dist. of Carlisle propose erecting a $30,000 Presbyterian Church in Enola.

Philadelphia, Pa.—Abel Bottoms, of West Philadelphia, it is stated, has secured a site at Walnut and 36th Sts. on which, it is said, he intends erecting a 6 or 8-story apartment house to cost $100,000.

Carrere & Hastings, of New York, N. Y., are reported to be the archts. engaged to prepare plans for the edifice which is to be erected for the First Church of Christ (Scientist), at Walnut and 39th Sts.

It is stated that Wilson, Harris & Richards, Drexel Bldg., have prepared plans for a $100,000 edifice and Sunday school building to be erected at Wayne Ave. and Queen St., Germantown, for the M. E. Church of the Advocate.

Greenville, Pa.—The Bd. of Directors of St. Paul's Orphans' Home of Pittsburg Synod Reformed Church of the United States, it is stated, has voted to erect a new $65,000 home near Greenville, changing the present location from Butler. Plans for the building as prepared by Milligan & Miller, of Wilkinsburg, have been accepted. It is stated that bids for the construction will be received early in Jan.

Milwaukee, Wis.—Leenhouts & Guthrie, 102 Wisconsin St., according to reports, have completed plans for a $60,000 apartment house to be 4 story, brick and stone, and erected by John Bennett, Secy., General Constr. Co., at 13th and Well Sts.

Oshkosh, Wis.—The members of the Christian Science Church, it is stated, have secured a site on Washington St. and Jefferson Ave., on which it is proposed next spring erecting an edifice costing about $25,000.

Kiel, Wis.—It is stated that plans are being prepared for an edifice which is to be erected for the members of Sts. Peter and Paul R. C. Church at a cost of $20,000. Rev. Father R. W. Nickle, pastor.

SCHOOLS.

Notes Arranged Alphabetically by States.

Cullman, Ala.—The directors of St. Bernard's College, it is stated, are planning to expend $20,000 in improvements.

Montgomery, Ala.—It is stated that work will soon commence on the erecting of buildings for the Methodist College for Women, probable cost of proposed structures, $50,000.

Pasadena, Cal.—Pres. A. H. Chamberlain, of Throop Institute, is reported to have announced that plans are being prepared for new buildings which it is proposed erecting at E. California and San Pasqual Sts., at a cost of about $2,000,000.

Washington, D. C.—The following are the bids opened on Nov. 16 by the Comrs. D. C. for (*a*) erecting McCormick School, an 8-room building; (*b*) 6-room addition to the Langdon School: R. T. Humphrey, *a* $45,600; *b* $25,300; J. M. Dunn, *a* $47,220; S. J. Brinkley, *a* $49,000; Burgess & Parsons, *a* 49,420; Pavarini & Wyne, *a* $49,900; *b* $23,800; T. H. Melton, *a* 50,900; W. E. Mooney, *a* $51,975; J. H. Gibbons, *b* $22,933; M. Haclison, *b* $23,583; W. T. Davis, *b* $24,660.

The following are reported to be the bids opened Nov. 23 by the Comrs. D. C. for erecting a public school at Lincoln Ave. and Prospect St.: J. M. Dunn, $21,533; Pavarini & Wyne, $23,700; B. B. Knell, $21,644; R. B. Humphrey, $21,800; S. J. Brinkley, $23,700; T. H. Melton, $25,450, and Burgess & Parsons, $22,965.

Paris, Ill.—Bids will probably be received about Jan. 1 for the erection of a high school, to cost about $60,000. Architects, Reeves & Baillie, of Peoria; J. C. Risser, Chmn. Bldg. Com.

Anderson, Ind.—The School Bd., it is stated, has accepted the plans of R. P. Daggett-Dunlap Co., of Indianapolis, for the high school, which is to cost about $125,000.

Lexington, Ky.—J. O. H. Simrall, Clk. Bd. of Educ., writes that the citizens on Nov. 5 voted to issue $75,000 bonds for the erection of schools. No architect yet selected.

Ann Arbor, Mich.—The Bd. of Regents of the Univ. of Michigan, it is stated, has decided to erect a chemistry building. Probably $300,000 will be appropriated for the erection of said building.

Grand Rapids, Mich.—Plans and specifications have been approved for the boiler and heating plant for the Coit Ave. School. According to reports bids will soon be received for installing the same.

*Items marked thus give the names of parties awarded contracts.

Northfield, Minn.—It is stated that preliminary plans will be received until Dec. 15 by Paul G. Schmidt, for a ladies' dormitory at St. Olaf College.

Vicksburg, Miss.—It is stated that the Mississippi Episcopal Girls' College is to be situated in the National Park addition to this city. The main building will be erected at once, at a cost of $75,000. Philip S. Garnder, of Laurel, Miss., can be addressed.

St. Louis, Mo.—Plans are stated to have been approved for a high school to be erected at Union Boule. and Fairmount Ave. The building to contain 92 rooms and cost about $750,000. According to reports the contract will soon be let.

Omaha, Neb.—It is reported that the Mount St. Mary's Seminary, Fifteenth and Castellan Sts., will be enlarged at a cost of $20,000.

Bayonne, N. J.—Bids will be received until Dec. 10 by the Bd. Educ. (J. F. Desmond, Secy.) for furnishing material and erecting School No. 10. Bids to be submitted separately on plumbing and gas fitting and the Warren Webster ventilating and heating system. S. Edson Gage and Donald G. Anderson, Archts., 3 Union Sq W., New York, N. Y.

**Jersey City, N. J.*—Jos. H. Cutley, 508 Pavonia Ave., is reported to have secured the contract to construct the granite approach to the High School grounds, at $43,045.
*The contract for furnishing and erecting fire escapes at schools Nos. 1, 9, 13, 17, 18, 19, 20, 21, 22, 23 and 26 (bids received Nov. 14) is reported awarded by the Bd. Educ. to the Oltmer Iron Wks., at a total of $16,485.
The following are reported to be the bids received by the Bd. Educ. on Nov. 14 for erecting an annex to school No. 14: Mason work—M. T. Connolly, $49,738; Gavin & Doris, $54,000; Wm. L. Crow, $55,129; also a bid for the whole job for $113,000; W. H. & F. W. Cain, mason and carpentry work, $86,312, and P. S. Van Kirke for the same work, $92,632. Carpenter work—Jos. Jewkes & Sons Co., $26,490; John Hansen, $28,972; Herman Brugel, $26,775; Robt. Cook, $30,415; J. Ditmar & Son, $32,000. Plumbing—F. T. Keleher, $5,595; Crescent Co., $10,000. Painting—M. A. H. Miller, $2,164; A. Lemon, $2,230; Chas. Rabe, $1,942; Jas. Treasner, $2,558. Heating and ventilating—Storms & Co., $15,968; Baldwin Eng. Co., $15,940; T. P. Schroeder, $19,500; John F. McLaughlin, $10,479.

East Orange, N. J.—The erection of an addition to the High School to cost $75,000, is reported under consideration.

Dayton, O.—Bids will be received until Dec. 19 by Wm. G. Haenssler, Clk. Bd. Educ., for furnishing material and erecting the west wing of the Manual Training High School, on E. 5th St. Bids on labor and material to be stated separately.

Springfield, O.—W. H. Holmes, Clk. Bd. of Educ., writes that the citizens have voted to issue $200,000 bonds for the erection of a school. Nothing definite has yet been done.

Cincinnati, O.—Bids will be received at the office of the Clerk, Bd. of Educ., until Jan. 6 for the erection of a high school at Clifton Ave. and McMilan St. as advertised in The Engineering Record. Henry Klein, Supt. of Bldgs., 910 Main St.

Philadelphia, Pa.—Mitchell Bros. are stated to have been granted a permit to erect 2 three-story 26x36-ft. stone additions to the Kenderton School, at a cost of $20,986.

Cheyenne, S. D.—Bids will be received until Jan. 10 by Commissioner of Indian Affairs, at Washington, D. C. (C. F. Larrabee, Acting Comr.) for furnishing material and constructing a building for employers' quarters at the school at Cheyenne River Agency, S. D.

Cisco, Tex.—Te Attorney-General has approved the issue of $30,000 independent school district bonds.

Emory, Va.—The directors of Emory & Henry College, it is reported, have decided to expend $100,000 in improvements.

**Williamsburg, Va.*—Geo. C. Ware, of Newport News, is reported to have been awarded the contract for erecting a building for the Female Seminary.

Colville, Wash.—Bids will be receeived until Jan. 8 by Comr. of Indian Affairs, at Washington, D. C. (C. F. Larrabee, Acting Comr.) for furnishing material and constructing 2 day school buildings at Nespelem and Barnaby, Colville Agency, Wash. For further information apply to Capt. J. McA. Webster, U. S. Indian Agent, Ft. Spokane (Miles P. O.), Wash.

Tulalip, Wash.—Bids will be received until Dec. 27 by Comr. of Indian Affairs at Washington, D. C. (C. F. Larrabee, Acting Comr.) for furnishing material and constructing a dormitory, hospital, power house and electric lighting system at Tulalip School, Washington. For further information apply to Chas. M. Buchanan, Supt., Tulalip.

LeCrosse, Wis.—The Bd. of Normal Regents, it is stated, has decided to postpone the awarding of the contract to erect the Normal School here until early in 1908. Van Ryn & De Gelleke, of Milwaukee, are the archts., and have completed the plans for the school.

Belleville, Ont.—The Convent School is reported destroyed by fire.

NEW INDUSTRIAL PLANTS.

Notes Arranged Alphabetically by States.

San Francisco, Cal.—Miller & Lux have applied for a permit to build an abattoir and packing house on Kentucky St. and Second Ave., South. Only about one-fourth of the structure finally to be built will be erected at once at an estimated cost of $150,000.

Wilmington, Del.—The Harlan & Hollingsworth Corporation, is said to be planning the erection of modern car shops.

Washington, D. C.—See "Power Plants, Gas and Electricity."

**Eastport, Me.*—It is stated that the contract to erect the 2-story reinforced concrete and brick canning factory for the Seacoast Canning Co. at Eastport has been awarded to Frank B. Gilbreth, of New York, N. Y.

Waterville, Me.—The Central Maine Potato & Starch Co. is reported organized with Jacob Hedmann, of Aroostook, Pres., and Simon P. Hedman, Secy., and a capital of $100,000. Headquarters of the company to be in Waterville. It is stated that a starch mill will be erected in Waterville, and others in several towns in central Maine.

Jersey City, N. J.—The Levinson Mfg. Co., 171 Canal St., New York, N. Y., is reported to have purchased a site in West Bergen on which it is proposed erecting a factory for the manufacture of chairs.

**Harrison, N. J.*—The contract to erect a 3-story 62x121-ft. reinforced concrete building for the General Electric Co. at Sussex and 4th Sts., it is reported, has been awarded to Salmond Bros. Co., of Kearny. The cost of the building, including equipment, it is stated, will be about $32,000.

Buffalo, N. Y.—The International Eng. Co., at a meeting in Buffalo Nov. 16, it is reported authorized the erection of a plant for the manufacture of high-grade engines and boilers. The location of the plant has not yet been decided upon. H. S. Jeffrey, of Scranton, is Pres. of the company, and C. W. Limstrom, of Galesburg, Ill., Secy. and Treas.

Sandusky, O.—The plant of the Bay Bay View Fdy. Co., for which the Osborne Eng. Co., of Cleveland, is preparing plans, will cost about $35,000. The building will be 80x150 ft. and the power plant will have a capacity of 75 h. p. with foundry equipment. Contracts will be let in the spring.

**Reading, Pa.*—The Brown Engineering Co. is reported to have secured the contract for the electric light and power equipment for the plant of the Nolde & Horst Co., at 9th and Douglass Sts. Individual electric motors will be placed under the several tables, together with specially designed motors placed in the elevator towers to operate the cars.

Girard, Pa.—The U. S. Steel Corporation, 71 B'way, N. Y. City, it is reported, has had tentative plans prepared for an ore harbor to be established on Lake Erie near Girard, for the care and shipment of ore from the Northwest to the lower lakes and the furnaces in the Pittsburg district. The improvements, it is stated, will be started soon, and extensive machinery will be installed and the total cost will be several millions.

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

Erie, Pa.—The Erie City Iron Works has under consideration the erection of a 75x400-ft. storage building, in one bay, with a 30-ton crane. It has not been decided whether to use steel or concrete construction.

Morristown, Tenn.—H. G. Gildard, of the Brookside Mills, Knoxville, is said to be planning the organization of a company to establish a cotton cloth mill at Morristown. It will have a capital stock of $150,000 and a mill of 9,000 spindles and 200 looms will be erected. The product will be cloth used by the linoleum and rubber trades.

Elgin, Tex.—See "Power Plants, Gas and Electricity."

Milwaukee, Wis.—It is reported that C. H. Stehling is preparing plans for a tannery to be erected next spring by the Fred. Rueping Leather Co., of Fond du Lac, on Kinnickinnic Ave. and Lincoln St. To protect the establishment from the river a concrete wall 1,200 ft. long and 30 ft. high will be built. Two 6-story buildings 60x120 ft., will be used for the currying and finishing departments. In addition to these there will be hide trimming, glue storage, beam hair drying, lime and boiler houses and a pattern and machine shop. The boilers will be of 4,500 h. p. each, and the machinery of the plant will be operated by motors. A water tower, storage house and heater house will also be erected. All of the buildings will be built of steel and concrete.

STREET CLEANING AND GARBAGE DISPOSAL.

See also "Business Buildings."

Las Animas, Colo.—See "Power Plants, Gas and Electricity."

Baltimore, Md.—Bids were opened on Nov. 20 by the Bd. of Awards for the removal and final disposal of garbage, dead animals and market refuse of this city from Jan. 1, 1908, until Jan. 1, 1918, and the Baltimore Products Co., of which Michael T. Horner is president is reported to have secured the contract; for the first year the company agrees to dispose of the garbage for $45,000, and $1,800 additional will be charged yearly, so that for the 10th year it will cost the city $61,200. In addition, the company agrees to pay to the city $100,000 for the disposal plant in South Baltimore; total amount of contract for 10 years is $531,000 less $100,000 for city plant. The company is to remove the reduction plant to a distance of 10 miles from city. The collection of garbage is to be done under supervision of J. L. Wickes, Street Cleaning Comr., and carried to central points, and will be scowed to the reduction plant. The same system of reducing refuse will be used as is now employed by the Baltimore Sanitary Contr. Co. The only other bid received was that of the Southern Products Co., whose aggregate bid was $587,500. Both companies agreed to pay the city $100,000 for its plant.

St. Louis, Mo.—Local press reports state that the Bd. of Pub. Improv. is about to let contract for garbage disposal. It will receive bids for the privilege of disposing of garbage, and if no one offers to pay for privilege, the contract will be let to lowest bidder.

West Orange, N. J.—The Town Council is reported to have on Nov. 19 rejected all bids for the removal of ashes and garbage and will receive new bids.

Brooklyn, N. Y.—See "Power Plants, Gas and Electricity."

New York, N. Y.—Bids will be received by W. Bensel, Comr. Street Cleaning, until Dec. 2 (extension of date) for furnishing all the labor and material required for the removal of snow and ice in the Boros. of Manhattan, Bronx and Brooklyn, for the period ending April 15, 1908.

Columbus, O.—Bids will be received by the Bd. of Pub. Service (E. F. McGurre, Secy.) until Jan. 14, for the construction of garbage reduction works of 100 tons capacity per 24 hours, as advertised in The Engineering Record; probable cost, $150,000. John H. Gregory, Engr. in charge.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

**Mobile, Ala.*—P. H. O'Brien, of Anniston, is reported to have secured contracts for constructing locks and dams Nos. 2 and 3, on Tombigbee River (bids opened Oct. 5)at $350,275 and $389,725, respectively. For detail bids received for this work see issue of The Engineering Record of Nov. 9.

Washington, D. C.—Bids will be received at the office of the Bureau Supplies and Accounts, Navy Dept., Washington, D. C., until Dec. 3 for furnishing at navy yards and naval stations the following supplies: Boston, Mass. Sch. 521, generators, etc.; Sch. 524, wire rope; Sch. 527, 8 doz. ratchets; Sch. 529, 75,000 lb. rivet steel; Sch. 530, 1 motor controller; Sch. 531, 5,400 lb. brass pipe, 10,500 lbs. bronze, 2,800 lbs. sheet brass, 1,600 lbs. sheet copper; Sch. 532, bar steel, 4,590 lbs. sheet lead, 36,200 lbs. sheet zinc; Sch. 533, valves, 33 doz. gate valves, bushings, elbos, pinions, etc. League Island, Pa., Sch. 521, 17,000 ft. conduit steel, 12,500 ft. wire junction boxes, etc.; terminal boxes, switches, etc.; fuses and fuse wire batteries and cells, 12 ventilating sets; Sch. 527, drill chucks, drills, etc.; Sch. 528, 11,750 ft. white oak, 21M. ft. white pine, 225M ft. yellow pine; Sch. 531, 6,500 lbs. brass pipe, sheet brass, sheet copper and copper rod; Sch. 532, 15,000 lbs. sheet zinc; Sch. 533, 192 gate valves, pipe fittings. Portsmouth, N. H., Sch. 521, generating set, etc., 5,000 ft. wire. Brooklyn, N. Y., Sch. 521, 6,500 ft. interior cable, 25,000 ft. lighting wire, etc., about 56,000 ft. rubber covered wire, elbow, nipples, couplings, etc.; Sch. 528, 26M. ft. white oak; 110M. ft. white pine, 30M. ft. North Carolina pine, etc.; Sch. 533, 156 gate valves. Washington, D. C., Sch. 526, motor, 5,790 lbs. waterproof stranded copper cable, 65M. ft. white pine, 1 air pump, 84,000 lbs. machine steel; Sch. 529, 19,400 lbs. structural steel beams. Bids will also be received same place until Dec. 17, as follows: Puget Sound, Wash., Sch. 513, 4,800 ft. conduit, 4,800 ft. rubber covered wire, 3 switchboard cabinets; Sch. 515, 7,000 ft. flexible steel wire cable, about 14,000 lbs., copper pipe; Sch. 516, 60M. ft. teak, 15,500 ft. mahogany; Sch. 518, 28,200 lbs. steel angles, 121,500 lbs. mild steel. Mare Island, Cal., Sch. 515, 1,400 bronze plates, 1,000 lbs. brass metal, 36 gate valves; Sch. 5-- lavatories, showers, water heaters, plumber's supplies, etc.; Sch. 518, 25,000 lbs. rolled sheet zinc boiler plates, 15,000 lbs. rolled sheet zinc. Boston, Mass., Sch. 538, centering machine, crank shaper, rod and double machine, steam hammer, etc. Brooklyn, N. Y., Sch. 537, engine lathe, boring and turning mill, etc. League Island, Pa., Sch. 538, 1 gear generator. Washington, D. C., Sch. 538, 1 milling machine. Pensacola, Fla., Sch. 537, engine lathe, crank shaping machine. Applications for proposals should designate the schedules desired by number. H. B. Rogers, Paymaster Genl., U. S. N.

New Boston, Ill.—Bids were opened on Nov. 7 by the Comrs. of the Bay Island Drainage and Levee Dist. for constructing about 50,000 cu. yds. muck ditch and 724,700 cu. yds. levee work and F. B. Stevens, of Geneseo, Ill., bid for portions of muck ditch 22 cts. per cu. yd. and for portions of levee work 16 and 15 cts. per cu. yd. R. J. Phelps & Co., muck ditch 18 cts. and levee work 14 cts. G. A. McWilliams, Walnut, muck ditch and levee work 13.45 cts.; R. H. McWilliams, of Mattoon, muck ditch and levee work 10.75 cts.; Peoples' Constr. Co., Davenport, Ia., muck ditch and levee work, 16.5 cts. Grand, Smith & Co. and C. H. Locker, Northern Trust Co., Chicago, Ill., muck ditch and levee work, 10.25 cts., and Havemeyer, Contr. Co. & C. A. Denham, C. E., Chicago, for muck ditch and levee work 12¼ and for levee work 12¾ and 15¾ cts.; R. H. McWilliams, of Walnut, bid also for 138,000 cu. yds. ditch 10 cts. and 165,000 cu. yds. ditch 9.75 cts., and J. E. Rogers, of Forrest City, for same work 10 cts.

Webster City, Ia.—Bids will be received until Dec. 14 by the Bd. Superv. (Geo. S. Neel, Chmn.) for constructing the Robbins Drainage Ditch No. 32; also the Brandrup Drainage Ditch No. 31. O. A. Cragwich, Co. Aud.

Sac City, Ia.—It is stated that bids will be received until Dec. 10 by J. J. Harter, Co. Aud., at Sac City, for constructing Ditch No. 10, Sac Co., and Ditch No. 69, Calhoun Co.

Annapolis, Md.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Dec. 10, to furnish at the Naval Academy, Annapolis, Md., a quantity of pipe fittings and forge. Applications for proposals should refer to Schedule 570. E. B. Rogers, Paymaster Genl., U. S. N.

Boston, Mass.—See "Power Plants, Gas and Electricity."

Boston, Mass.—Bids will be received by Maj. Edw. Burr, Corps Engrs., U. S. A., until Dec. 27, for removal of wreck of steamship "City of Birmingham" lying in Upper Main Ship Channel of Boston Harbor, as advertised in The Engineering Record.

Grand Rapids, Mich.—City Engr. L. W. Anderson is reported to have presented to the Bd. of Pub. Wks. his report on the construction of a flood wall on west side of river from 6th St., south to the gates at the power dam, which he estimates at $19,317.

Detroit, Mich.—The following are the bids opened on Nov. 20 by Col. Chas. E. L. B. Davis, Corps Engrs., U. S. A., for rock and earth excavation at Sect. 3, Plan B, Detroit River: (*a*) 1,465,000 cu. yds. earth excav. (full rate); (*b*) 145,000 cu. yds. earth excav. (half rate); (*c*) 560,000 cu. yds. rock excav. (full rate); (*d*) 260,000 cu. yds. rock excav. (half rate); (*e*) total: P. B. McNaughton & O. E. Dunbar, Buffalo, N. Y., *a* 50 cts, *b* $25, *c* $2.80, *d* $1.40, *e* $2,700,750; Great Lakes Dredge & Dock Co., Chicago, Ill., *a* 58 cts., *b* $29, *c* $3.22, *d* $1.61, *e* $3,113,550.

Olivia, Minn.—It is stated that H. J. Lee, Co. Aud., will receive bids until Dec. 5 for constructing Ditch No. 37.

Ivanhoe, Minn.—It is stated that bids will be received until Dec. 3 by R. H. Sisson, Co. Aud., for $6,000 bonds for the construction of Ditch No. 6, and $4,500 bonds for Ditch No. 8.

**Morris, Minn.*—F. E. Ware, Co. Aud., writes that the contract for constructing ditch No. 3 (bids opened Nov. 19) has been awarded to Brown & Sutcliff, of Benson, at 13½ cts. per cu. yd.; total, $10,341.

**West Point, Miss.*—B. H. McFarland, of Aberdeen, Secy. and Attorney for the County Houlka Creek Drainage Comrs., writes that G. A. McWilliams, of Walnut,

Items marked thus give the names of parties awarded contracts.

La., has secured the contract for constructing a canal 12 miles long, 25 ft. wide and 5 ft. deep through Houlka Creek and through timbered sandy loam creek bottom, about 230,000 cu. yds. (bids opened Nov. 12), at 12.7 cts. per cu. yd. Other bids received were: Woolman Constr. Co., Sandusky, Mich., 12.75 cts.; R. L. Brand, Prairie, Miss., 14.5 cts.; Northern Alabama Constr. Co., Riverton, Ala., 15.7 cts.; E. C. Spencer, Vandalia, Ill., 10 cts.

Portsmouth, N. H.—See "Power Plants, Gas and Electricity."

New York, N. Y.—Bids will be received until Dec. 2 by Col. Wm. S. Patten, Depot Q. M., 30 Whitehall St., New York, for furnishing and delivering at either the Philadelphia, Boston, New York, Chicago or St. Louis depots of the Q. M. Department, U. S. Army, 400 enameled recruiting signs, subject to increase or decrease in quantity of 25 per cent., if desired by this department.

Bids will be received until Dec. 5 by John V. Coggey, Comr. of Correction, N. Y. City, for furnishing and delivering iron, steam fittings, lumber and miscellaneous articles.

Bids will be received Dec. 5 by W. Bensel, Comr. Street Cleaning, N. Y. City, for furnishing and delivering 10,000 North River bricks (red), 8,000 sq. fire bricks, 5,000 end wedge fire bricks, 50 barrels fire clay, 30 cu. yds. Cow Bay sand.

Brooklyn, N. Y.—See "Power Plants, Gas and Electricity."

Brooklyn, N. Y.—Bids will be received until Dec. 10 by the Bureau of Supplies & Accounts, Navy Dept., Washington, D. C. (E. B. Rogers, Paymaster Gen.), to furnish at the Navy Yard, New York, a quantity of naval supplies as follows: Schedule 667—bolt and pipe threading and drilling machines, lathes, emery grinders; Schedule 567—Portland cement, etc.; Schedule 569—insulating tape, steel rope, brass, etc.; Schedule 572—lumber; Schedule 574—bolts and nuts, steel iron, etc.; Schedule 575—brass bronze, etc.; Schedule 576—bolts and nuts, jacks, cement compound, copper tubing, valves, thermometers; Schedule 577—bolts and nuts, wire, etc. Applications for proposals should designate the schedule desired by number.

Albany, N. Y.—At a meeting of the State Canal Board on Nov. 26 plans are reported to have been approved for contract No. 20, Sections 2 and 3 of the barge canal. This work includes the dredging of the Mohawk River from Rexford Flats to Mindville, involving an expenditure of $4,000,000.

Grand Forks, N. D.—It is stated that Hans Anderson, Co. Aud., will receive bids until Dec. 10 for $15,500 drainage bonds.

Cleveland, O.—W. A. Stinchcomb, Engr. of the Park Dept., is reported to be making plans for new docks to be built at foot of E. 9th St. to accommodate the intercity steamship lines. Two schemes of construction are under consideration by the steamship companies, one temporary and the other permanent.

Portland, Ore.—Bids will be received by Lieut. Col. S. W. Roessler, Corps Engrs., U. S. A., until Dec. 23 for the construction of one wooden hull hydraulic dredge, as advertised in The Engineering Record.

**Philadelphia, Pa.*—The following are the bids opened on Nov. 15 at the office of Maj. J. C. Sanford, Corps Engrs., U. S. A., for dredging in Delaware River: (a) 694,400 cu. yd. excav. scow meas. Sect. 4; (b) 716,800 cu. yd. Sub-Sect. 5A; (c) 716,800 cu. yd. Sub-Sect. 5B; (d) totals: P. Sanford Ross, Inc., Jersey City, N. J., a, 18¾ cts.; b, 19¼ cts.; c, 20¼ cts; d, $409,864. Morris & Cumings Dredging Co., New York, N. Y., a, 20.5 cts.; b, 21.3 cts; c, 26 cts.; d, $481,398. American Dredging Co., Philadelphia, Pa., a and b, 16 cts.; c, 17.5 cts.; d, $351,232 (recommended for award).

Girard, Pa.—See "New Industrial Plants."

Philadelphia, Pa.—See "Power Plants, Gas and Electricity."

McKees Rocks, Pa.—Press reports state that a brick lined tunnel 461 ft. long and 36 ft. wide, will be constructed in West Park, of which the Comrs. of Stowe Township will pay $25,000 for its construction, and the West End Land Co. $25,000.

Newport, R. I.—The following are the bids opened on Nov. 22 by Col. J. H. Willard, Corps Engrs., U. S. A., for dredging in Newport harbor (price given per cu. yd.): John P. Randerson, Albany, N. Y., 40 cts., W. H. Beard Dredging Co., New York, N. Y., 29 cts.; the International Contracting Co., New York, N. Y., 22 cts., and Chas. M. Cole & J. S. Packard Dredging Co., Fall River, Mass., and Providence, R. I., 22 8-9 cts. (Approximate amount to be expended under this contract, $171,-000.)

Providence, R. I.—The following are the bids opened on Nov. 26 at the office of Jas. Knox Taylor, Superv. Archt. Treas. Depart., Washington, D. C., for elevator equipment for U. S. Post Office, Court House and Custom House at Providence: Otis Elevator Co., New York, N. Y., $17,975; Standard Plunger Elevator Co., New York, N. Y., $20,235.

Desmet, S. D.—Bids will be received it is stated until Jan. 7 by P. A. Carroll, Co. Aud., for constructing Drainage Ditch No. 1, Baker Township.

Superior, Wis.—C. P. White, of Pittsburg, Pa., Gen. Mgr. Pittsburg Coal Co., writes that bids will be received on Dec. 10 for the construction of a dock in Superior. C. J. A. Morris, of Superior, is Consulting Engr.

PROPOSALS OPEN.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

THE PROPOSED BUILDING CODE FOR NEW YORK CITY.

The Building Code Revision Committee of the City of New York has completed its labors and submitted to the Board of Aldermen a draft of a code which is to apply to all boroughs. No public hearings concerning the proposed text of the code, as submitted, have been held, and as the composition of the Board of Aldermen will change before a reasonable opportunity for criticizing the multifarious regulations can be given by the present Board, it is generally considered that there is no immediate prospect of the adoption of the regulations. Very strong criticism from real estate interests and others has already been heard regarding some sections of the proposed code, and these criticisms are increasing in number and vigor as the time for study of the regulations grows. Apart from critics whose interests are injuriously affected by some of the suggested rules, a number of engineers and architects whose work makes them familiar with the conditions in New York have expressed the opinion that while the proposed code as a whole is a distinct advance, there are some sections in it, notably that relating to fireproofing, which on no account should receive aldermanic approval, and there are isolated clauses in other sections that would become powerful aids to favoritism and even graft in the hands of an unscrupulous superintendent of buildings.

The opportunity for displaying partiality or for grafting which the proposed code offers is illustrated, according to one architect of long experience, by several clauses scattered through the regulations, whose full significance is only appreciated when they are brought together and considered as a whole. The office of Superintendent of Buildings is one defined in the New York city charter and the Board of Aldermen cannot, of course, change any of the charter provisions. His judgment is final on certain subjects, and one of these subjects, according to the proposed code, would be the classifications of buildings coming under two types, known as Classes D and E and defined as follows:

"Class D—Mercantile Buildings shall be construed to mean and include all structures used for, or adapted to, the transaction of business, the operation of machinery, or the manufacture or storage of machinery or materials, the housing of horses or live stock, or other industrial purposes. This class shall include office buildings, restaurants, markets, refrigerating plants, stables, carriage houses, laboratories and observatories.

"Class E—Special Hazard Buildings shall be construed to mean and include all mercantile buildings which are used for the manufacture, storage or sale of inflammable products, goods and materials, that is to say, materials that will readily ignite by the application of a flame, or in which heavy machinery is used. Factories, workshops, lofts, printing houses, stores, warehouses, slaughter houses, rendering plants, light and power stations, smoke houses, and garages shall be included in this class."

It is asserted by critics of the code that, in view of the very inflammable nature of office furniture and the use or display of machinery in many office buildings, notably such as the World Building or the Times Building, coupled with the peculiar working of the clauses, the Superintendent of Buildings is practically left without any very strong code control in determining in what class a proposed structure shall be officially placed. The full value of this power of selection to an unscrupulous official will be seen, according to the critics, only when other provisions are examined.

According to Section 105 every building of these two classes which is more than 60 ft. high must be fireproof, and according to Section 106 all Class E buildings must be of so-called first-class construction, while all others may be of so-called second-class construction. These two classes are defined at considerable length in clauses which are quoted not only to show the extent of the power placed in the hands of the Superintendent of Buildings but also because the same clauses are held by some critics to show unwarranted favor toward certain types of concrete floor construction, and to be prejudicial to hollow-tile of equal architectural merit in the opinion of experienced structural designers.

First Class Construction.—"The fireproof floor and roof construction between the steel beams shall be in the form of segmental arches consisting of Portland cement concrete, brick, or hollow tile of hard burned clay, or semi-porous or porous terra cotta. Such arches shall be designed to carry safely the imposed loads, and shall have a rise of not less than 1 in. for each foot of span between the beams. [Section 130 says that the ground and lower floors of Class D buildings must be figured for not less than 150 lb. per square foot and the upper floors for not less than 75 lb.; all floors of Class E buildings must be figured for not less than 150 lb.].

"Arches of Portland cement concrete shall be not less than 4 in. in thickness at the crown of the arch, and shall be mixed in the proportions of 1 part of Portland cement, 2 parts of clean sharp sand, and 5 parts of steam boiler cinders or crushed slag, brick, tile or stone passing a 1-in. ring. These arches shall in all cases be reinforced and protected with steel rods or bars, reticulated or meshed steel, or similar metal weighing not less than 1 lb. per square foot of superficial floor area. If the metal is in the form of rods or bars they shall be spaced not over 16 in. center to center.

"Brick arches shall have a thickness of not less than 4 in. for spans of 5 ft. or less, and 8 in. for spans over 5 ft. and up to 8 ft. [The code makes 8-ft. the maximum span between beams.] Said brick arches shall be composed of good hard common brick or porous terra cotta without cellular spaces, the brick to be laid to a line on the centers, and properly and solidly bonded. Each longitudinal line of brick breaking joints with the adjoining line in the same ring and with the ring under it when the arches are 8 in. thick. The arches shall spring from suitably designed, solid skewbacks made from the same material as the arches and properly keyed. The brick shall be well wetted before laying, and the joints filled in solid with Portland cement mortar, mixed in the proportions of 1 part cement to 3 parts of sand.

"Hollow tile arches or hard burned clay or semi-porous or porous terra cotta shall be of uniform density and hardness of burn and shall have sufficient depth between the top and bottom surfaces of the arch to carry the load to be imposed thereon without stressing the material beyond its safe working load, but such depth shall in no case be less than 6 in. for spans of 5 ft. or less than 8 in. for greater spans, and all blocks shall have at least two cellular spaces in said minimum depth. The shells and webs of all arch blocks shall be not less than 1 in. in thickness. Skewbacks of side construction shall be used with all forms of hollow tile arches. They shall be of such form and section as to accurately fit the beams and properly receive the thrust of the arches, and shall have shells and webs not less than 1¼ in. in thickness. The arches shall be laid in Portland cement mortar as required for brick arches and shall be built with the key in the center of the arch. The shells and webs of all end construction arch blocks shall abut one against the other.

"All metal structural members supporting loads or resisting stresses, and which are not covered with brickwork to a minimum thickness of 4 in. or of stone masonry to a thickness of 8 in., shall be fireproofed as follows: The protection of the columns shall consist of concrete as defined for floors filled solidly around them, or of brick as defined for floors laid in Portland cement with Portland cement concrete filled in solidly so as to leave no voids or spaces between the brick and the columns. [This clause has come in for severe criticism from structural designers as a particularly unjust discrimination against certain forms of terra cotta fireproofing that are largely used in important buildings.] In every case this protection to cover the columns at all points to a thickness of not less than 4 in. and to be continuous from the base to the top of the column. The extreme outer edges of lugs, brackets and similar supporting metal may project to within 2 in. of the outer surface of the protection. The protection of the girders shall be of the same material as the columns and shall not be less than 3 in. thick at all points. The protection of the webs and soffits of beams, lintels and other lesser structural members supporting loads or resisting strains shall be not less than 2 in. in thickness at any point.

"The fireproof protection of all the above structural members shall be held in position by suitably designed interior steel anchors hooked rigidly around the flanges or angles of the structural members and spaced not over 16 in. apart, horizontally and vertically. These anchors to be made with hooked ends from steel stock weighing not less than ½ lb. per linear foot and extending to within 1 in. of the outside surface of the concrete or brick protection."

Second Class Construction.—"The fireproof floor and roof construction between the steel beams may be in the form of flat arches or slabs with horizontal surfaces. Such flat arches shall consist of Portland cement concrete, or hollow tile of hard burned clay or semi-porous or porous terra cotta.

"Flat arches of Portland cement concrete shall be not less than 4 in. in thickness and shall consist of the same materials and mixed in the same proportions as specified in First Class Construction. These arches shall in all cases be reinforced with steel rods or bars, reticulated or meshed steel, or similar metal, designed so as to secure the required strength, but in no case shall such reinforcing metal weigh less than 1 lb. per square foot of superficial floor area. The center of the section of such reinforcing metal shall in no case be less than 1¼ in. from the under side of the concrete slab. If the reinforcing metal is in the form of rods or bars, they shall be spaced not more than 16 in. center to center, and if in the form of mesh it shall have no openings smaller than 16 sq. in.

"All flat hollow tile arches of hard burned clay and semi-porous and porous terra cotta shall have the arch blocks and skewbacks complying with the requirements of First Class Construction, except that the depth shall be not less than 1¾ in. for each foot of span, between the beams, not including any portion of the depth of the tile projecting below the under side of the beams, the total depth in no case to be less than 8 in.

"All metal structural members supporting loads or resisting strains and which are not covered by brick or stone masonry to a thickness of 4 in. shall be fireproofed as follows: The columns and girders shall be protected in the same manner as specified in First Class Construction, except that the thickness of the concrete or brick protection at all points of the columns and girders may be reduced to 2 in. and at the extreme outer edges of lugs, brackets and similar supporting metal to 1 in. Columns may also be protected by hollow tile blocks not

less than 4 in. in thickness, with shells and webs not less than 1 in. in thickness, with the space between the blocks and the columns filled solidly with Portland cement concrete. The concrete and the blocks to be anchored with interior steel anchors as specified in First Class Construction. Columns may also be protected by a double layer of metal lath and plaster as follows: The columns to be wrapped with metal lath weighing not less than 5 oz. per square foot, corrugated or with metal furring so as to offset the metal lath at least ¾ in. from the surface to be protected, the ends of the lath to be thoroughly secured by lapping and lacing with No. 18 galvanized steel wire. Plaster gauged with 25 per cent. of Portland cement shall then be applied to a minimum thickness of 1 in., filling the space solidly between the metal lath and the column. Over this first layer of metal lath and plaster shall be constructed a second layer of metal lath and plaster, similar in every respect to the first layer except that the corrugations or metal furring shall offset the metal lath at least 1½ in. from the outside surface of the first layer, and that the first coat of cement plaster of the second layer shall be not less than ¾ in. in thickness. The brown coat and finishing coat may be of similar material as is used in the finishing of other portions of the building.

"The members of all metal trusses and the webs of all floor beams projecting above or below the arches shall be protected by not less than 2 in. of the arch material. The soffits of all floor beams shall be protected by not less than 1 in. of the arch material. Said soffit protection, if of concrete, shall be secured in place by interior steel anchors, as defined under First Class Construction, or by meshed metal or metal in other forms weighing not less than ½ lb. per square foot, the said metal to be anchored by extending the ends at least 2 in. in the fireproof protection of the webs above.

"If of tile the protection shall consist of lugs forming part of the skewbacks and extending around the lower flange of the beam and meeting at the center; or of tile slabs held in position by dovetailed lugs projecting from the skewbacks.

"The soffits of floor beams may be protected with metal lath and plaster to a thickness of 1 in. as follows: The metal lath shall weigh not less than 5 oz. per square foot and shall be wrapped around the soffits of the beams so as to be offset ¾ in. from the surface to be protected, with the ends of the lath secured by extending them at least 2 in. in the concrete protection of the webs above. Plaster gauged with 25 per cent. of Portland cement shall then be applied to a thickness of 1 in. in a single coat, filling the space solidly between the metal lath and the soffit of the beam. No exposed metal clips or clamps of any character shall be used to support the soffit protection. Lintels and other lesser structural members supporting loads shall be protected in the same manner as the soffits of the the floor beams."

Another section which makes Second Class Construction less expensive than the First Class Construction relates to metal lath and plaster ceilings, in which this provision occurs: "Metal lath ceilings as herein specified, when covered with plaster to a thickness of 1 in., will be considered equivalent to 1 in. of protection to the steel beams supporting the floor arches above it in fireproof buildings of Second Class Construction only, and the protection of said floorbeams may be reduced by 1 in. wherever such ceilings are erected underneath them in Second Class Construction."

Still another clause which has been criticized as enabling an unscrupulous Superintendent to show favoritism to certain methods of fireproofing is found in Section 120 and reads as follows: 'In the construction of fireproof floors and roofs, tie-rods [between floorbeams] can be omitted if the weight of steel called for in Section 106 is incorporated in the construction of the floor, unless specifically ordered to the contrary by the Superintendent of Buildings, in which case he may designate tie-rods shall be used in accordance with this Section."

Height of Buildings.—A feature of the proposed code which has aroused real estate interests relates to the height of buildings. The more important clauses read as follows:

"The height of fireproof buildings, except such buildings as are occupied for office or hotel purposes, shall not exceed 100 ft. unless such buildings are of First Class Construction in accordance with Section 106 of this Code and are provided with a standard equipment of automatic sprinklers, in which case the height shall not exceed 150 ft. Fireproof buildings to be occupied for office or hotel purposes over 100 ft. in height shall be of First Class Construction in accordance with Section 106 of this Code, but the height of such buildings shall not exceed 200 ft. except in case the building shall have such offsets, yards or courts in excess of those required in Section — of this Code that the cubage of the building measured above the mean street grade level shall not exceed 174 times the area of the lot.

"The height of buildings with either walls, columns or girders constructed of reinforced concrete shall be limited not to exceed 75 ft." This requirement places reinforced concrete and mill construction in the sameclass, according to the views expressed this week.

INSPECTION OF THE EAST RIVER TUNNEL.

The Interborough Rapid Transit Co.'s directors, engineers and officials, together with a number of New York City officers and guests, started from Bowling Green on Nov. 27 and passed down through the north tube under the East River to Brooklyn as far as Borough Hall station, riding in a train of Interborough standard cars, consisting of two motor cars and one trailer. The distance from Bowling Green to Borough Hall is 1.6 miles, and the length of the tube proper is 1.2 miles. The distance from center to center of the two tubes is 28 ft. The inside diameter of the tubes is 15 ft. 6 in. The lowest part of the tubes is 95 ft. below mean high water. The lowest part of the tube in the center is 40 ft. below the bottom of the river. The grades down from New York to the bottom of the tube and from the bottom of the tube up to Brooklyn is 3.1 per cent., which is the same grade as that under the Harlem River, under which cars have been operated for upwards of two years.

Ventilating shafts have been provided on the New York shore and on the Brooklyn shore, which will be equipped with very large capacity ventilating machinery. The ventilating shafts will also be equipped with emergency stairways.

The tube is lighted by an independent lighting system which is not in any way connected with the third rail. Therefore, should at any time the power or current go off the third rail, the lights in the cars will be extinguished, but the lamps lighting the tunnel, which are arranged on each side wall, will still continue to burn. This independent lighting circuit is arranged on two separate circuits, so that if a short-circuit occurs on one of the lighting mains, the other one will still continue to burn.

Chief Engineer Geo. H. Pegram explained that while the alignment of the tunnel had necessarily been made to a very large degree with considerable curvature, great care had been exercised in its construction and the elevation of the tracks to suit the curvatures, which had been accomplished to such a degree of perfection that a passenger riding in the car could scarcely perceive that the track was curved.

There are three sumps equipped with air lifts and pumps sufficient to handle a very large volume of water. Each is connected from one tube to the other, which makes it possible for workmen to pass from one tube to the other in the performance of their duty. Each of these tubes is equipped with a 3-in. city water main running the entire length of the tube, with connections for hose at about every 300 ft.

The trolley rail is of special section, rolled in an umbrella shape, secured from the bottom section of the rail by means of insulators to the track ties and protected above the top by means of an insulating board. The trolley shoes pass under the bottom of board and on top of the rail.

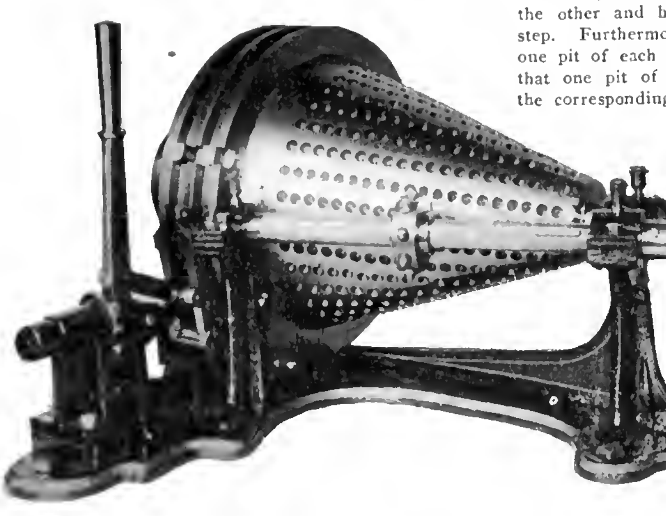
On each side of the track is constructed a bench wall made of concrete. In this bench wall the cable ducts are located. A large number of these cables have already been installed. The signalling system through the tubes is being rapidly installed and through the tubes will be of the type known as the track circuit over-lapping block signals. The tubes will be equipped with automatic train stops.

In the office at the south end of the Bowling Green station on Manhattan Island there are a number of ingenious safety devices for the purpose of controlling the movement of trains and the ventilation of the tube. The man in charge in this office will have a miniature track model with the signals on it, which will indicate by means of colored lights the exact location of each train at all times through the tube. There is also arranged a system of wiring running to this office, which will enable the operator to cut the power on or off the third rail or lighting system. A separate telephone system has been installed through these tubes in to the same office at Bowling Green on Manhattan Island. These telephones are arranged all through the tubes every 300 ft. and at the same points 300 ft. apart are devices for automatically tripping the circuit breakers in the power houses. These circuit breakers can either be tripped at every 300 ft. through each tube or tripped by the man in charge in the Bowling Green office.

A NEW VARIABLE SPEED DRIVE.

The "R-W. Speed Variator," for deriving variable speeds from a constant speed motor, is based on the gear-and-cone principle, consisting of a gear cone provided with a number of circumferential rows of gear pits, and, parallel with the slant of the cone, a shaft on which is feathered a spur gear having pin teeth of a general conoidal form. This gear is adjustable longitudinally on its shaft so as to be brought into mesh with any desired row of gear pits on the cone, thereby causing the driven element, which of course may be either the gear or the cone, to rotate at a corresponding speed.

If the number of pits in the successive rows differ in arithmetical progression the rows themselves must be equidistant from each other. For example, if the row nearest the apex has 11 pits, the next row 12, the next 13, and so on, the distance from the first row to the second, from the second to the third, and so on, is, and must be, the same. Hence the gear can be shifted by equal steps from either end of the cone to the other and be in mesh with a row of pits at each step. Furthermore, the rows can be so arranged that one pit of each row will lie in the same axial plane, so that one pit of each row will be exactly in line with the correspondingly located pits on all other rows. This



SPEED-CHANGE DEVICE FOR POWER TRANSMISSION.

straight or longitudinal series of pits is formed on a sliding bar capable of movement in both directions a distance equal to the space between successive circular rows of pits. The speed changes are accomplished by shifting the pin tooth gear to other rows of pits by means of this bar, which is accomplished at the instant in the cone's rotation when the slide is parallel with the gear shaft; if the slide is then quickly shifted, it will carry the gear to the next row of pits.

At the base of the cone are two grooves, which the slide crosses, and projecting from the slide into the grooves are two studs, the arrangement and proportioning of the parts being such that the studs, when the slide is in its normal position, are spaced slightly from the rib between the grooves. Adjacent to the grooves are two oppositely inclined vertical cams, operated by a controlling handle, each cam equal in width to the distance which the slide must move to transfer the gear from one row of pits to the next, so that either cam, engaging the stud in its slide, will shift the slide the proper distance either way. Thus, suppose the left-hand cam is thrown into the corresponding groove; then, with the cone rotating forward, as the stud strikes the cam the slide will be carried toward the base of the cone, thus carrying the pin tooth gear in the same direction. Similarly, the other cam shifts the slide, and with it the gear, in the opposite direction.

The cams are mounted on the upper ends of two arms pivoted at their lower ends, which are actuated by links to a controlling lever on opposite sides of the pivot of the latter. This method of connecting the cam-arms with the controller makes it impossible to throw both the cams into the grooves at once. Normally both cams are retracted to the inoperative position, and to produce this retraction instantly when the operator releases the control handle, a spring-pressed plunger is provided on the outer side, having a flat face bearing against the controller on both sides of its pivot. Oscillation of the handle in either direction compresses the plunger spring; which will, on release of the lever, throw the latter immediately to its inoperative position with both cams retracted. To restore the slide to its normal position after each actuation, an inclined guide is provided at each side of the flanges at the

base of the cone, against one or the other of which one of the slide lugs, projecting beyond the flange, strikes after passing the gear, and is thereby thrown back to the normal position.

It will be seen that as long as one of the cams is held in its grooves, each revolution of the cone will produce an actuation of the slide and a corresponding shifting of the pin tooth gear, so that the latter will move step by step up or down the cone, according to which cam is operating. When this gear arrives at the end of its shaft and can, of course, go no farther, the cam shifting it is retracted before the next succeeding revolution of the cone brings the slide again into position for actuation; this retraction is effected automatically by mechanism inside the cone, which acts to throw the cam out of its groove, against the force exerted by the operator, just before the slide-lugs reach the position of the cam. This mechanism is controlled by the R-W Speed Variator Co., Singer Bldg., New York.

A NEW NARROW-GAUGE CAR.

A short while ago an order was placed with the Arthur Koppel Co., manufacturers of industrial railway materials, for 200 mine cars by the New River Pocahontas Consolidated Coal Co. The first sample car of the order was ready for inspection about Nov. 15, and a committee consisting of several of the best mine superintendents in the vicinity went to Koppel to inspect the car. The committee examined the car in minute detail and an additional order for 200 cars was immediately placed with the Koppel Co.

This car is of all-steel construction, and is a very low car for its capacity, the overall height from top of rail being only 30 in. and the capacity 57½ cu. ft. The gauge is 44 in. A special feature in the design is embodied in the round buffer, which is built of a special steel channel having a small depth and very wide flanges. At the ends, this channel is bent to a semi-circular shape and projects beyond the car, so as to give clearance between the corners of the cars on curves. Between the ends this bumper channel is continued clear through the car, making a continuous buffing column capable of carrying the end shocks met in service, from car to car, without transmitting the whole strain to any particular car. This feature secures the desirable results obtained with the draft gear of ordinary standard freight cars.

The large over-hang of the sides, which gives the car its large capacity, has been well stiffened, and its shape, composed of large radial corners, facilitates the discharge of the load. The door at one end is of the lift type, and is also well stiffened to give it the necessary rigidity. The wheels, axles and bearings are of a special patented self-oiling type, the wheels being 16 in. in diameter.

A MISLEADING CALL FOR ENGINEERS.

A Pacific Coast correspondent answers a recent letter from this journal as follows: "Some time ago you forwarded to me a letter evidently written by a young man in Kansas or that vicinity asking for information in regard to work for the Los Angeles aqueduct and referring to advertisements in an 'Engineering Journal' of Inglewood, Cal. I replied to the young man's letter that I questioned very much the legitimacy of this publication and advised him to write directly to the Aqueduct Commission in Los Angeles, with which I was acquainted. That my suspicions were well founded, you may judge by the enclosed despatch from Los Angles to the San Francisco 'Call.' It might be advisable to make some mention of this matter in the Record."

The article in the "Call" is as follows:

"Los Angeles, Nov. 23.—The post office authorities, at the request of Chief Engineer Mulholland of the Los Angeles Aqueduct Commission, has promptly put a stop to a scheme for defrauding thousands of men throughout the United States out of various sums which in the aggregate would have amounted to many thousands of dollars. The so-called 'Engineering Journal' of Inglewood, this county, has been obliged to cease its shady existence, and, although no arrests have been made, criminal prosecutions will follow any attempt to revive the swindle. The mail of the concern has been stopped and hundreds of letters, nearly all of them containing money orders, have been returned to their senders. The 'Engineering Journal' should not be confused with a legitimate publication of that name, for it exists in name only and was used only to further the scheme of the sharpers. Advertisements appeared in newspapers throughout the country announcing that 5,000 men and 1,000 teams were needed in the construction of the Owens River aqueduct, on which Los Angeles is about to expend millions of dollars. The 'ads' said that upon payment of from $1 to $5 registration fees positions paying from $100 to $500 a month could be secured through the agency of the 'Journal.' Another part of the swindle was to induce persons to pay various sums for reservations of land along the line of the aqueduct, water from which, the circulars said, would insure abundant crops. Tempting bait was offered engineers for big fees and several eastern engineers took the bait and paid the fees demanded. The truth is that there is no scarcity of laborers on the aqueduct work, that the work of construction has not reached a stage where an army of men is needed. There is no registration bureau here and no person has authority to offer positions on the work, much less collect fees for such a service. When the matter was called to the attention of the postal authorities a fraud order was issued and the swindle stopped."

PERSONAL NOTES.

Mr. John C. McMynn has resigned his connection with Robert W. Hunt & Co.

Mr. J. Clyde Power has resigned as superintendent and engineer to the Board of Park Commissioners of Indianapolis, Ind.

Everett B. Webster, president of the National Steel & Wire Co., New York, died, Nov. 29, at Jacksonville, Fla., aged 38 years.

Mr. Allen R. Boudinot has opened an office in the Lane Building, Davenport, Ia., where he will engage in a general civil engineering practice.

Mr. Stephen E. Kieffer has opened offices for the practice of civil and hydraulic engineering in the First National Bank Building, Berkeley, Cal.

Mr. Richard L. Humphrey, consulting engineer, Philadelphia, Pa., and president of the National Association of Cement Users, has been elected a member of the Société des Ingenieurs de France.

E. M. Collins, formerly chief engineer of Quincy, Omaha & Kansas City R. R., died recently as the result of a stroke of paralysis, which occurred in December, 1905, and caused him to retire from the service of the road.

Civil Engineer A. C. Lewerenz, U. S. N., has been transferred from the navy yard at Puget Sound to the Bureau of Yards and Docks, at Washington, and Civil Engineer P. L. Reed has been ordered from Schenectady, N. Y., to Puget Sound.

Mr. W. R. C. Corson, consulting engineer, Hartford, Conn., has entered the service of the Hartford Steam Boiler Inspection and Insurance Co., as assistant to Mr. Frank S. Allen in the mechanical engineering department.

Mr. Theodore P. Shonts, head of the Interborough-Metropolitan Co., New York, was recently elected president of the Chicago & Alton R. R., succeeding Mr. Samuel M. Felton, who resigned to become president of the Mexican Central Ry. Co., Ltd. Mr. Shonts has long been president of the Toledo, St. Louis & Western R. R., which recently gained control of the Chicago & Alton.

The United States Civil Service Commission will hold an examination in the large cities of the country, on Jan. 8-9, of candidates for the position of civil engineer and superintendent of construction in the Quartermaster's Department at Large, at $1,500 per year. Examinations will also be held on Jan. 8, 9 and 10 to fill vacancies in the position of mechanical and electrical draftsman in the Ordnance Bureau, War Department.

BUSINESS NOTES.

Mr. Carl G. A. Schmidt, Jr., 265 Broadway, New York, has made arrangements for manufacturing a detachable silent chain for driving machinery which has been tested for some time in several installations.

An important reorganization has taken place in the Whitney Power Co., now engaged in completing a large hydro-electric enterprise in North Carolina. Mr. George I. Whitney has resigned the presidency and been succeeded by Mr. Edward F. Buchanan, of the New York brokerage firm of A. O. Brown & Co. A number of directors resigned and Messrs. G. L. Stout, L. G. Young, W. D. Sargent, J. S. Henderson and A. O. Brown have been elected their successors.

The Alpha Portland Cement Co. at a meeting in Easton, Pa., last week, voted to increase the capital stock of the company from $2,000,000 to $6,000,000. The increased stock will be held in the treasury to be used in the business as required.

The Expanded Metal & Corrugated Bar Co., St. Louis, Mo., has just completed a shipment of 1,000 tons of open hearth steel corrugated bars for the irrigation works of the Tieton project of the U. S. Reclamation Service. This order is one of several received by the above company for bars for irrigation works.

Owing to the increased demand for its cement in the South, the Edison Portland Cement Co., Arcade Building, Philadelphia, has opened an office in the National Bank Bldg., Savannah, Ga., in order to supply the trade better than can be done from New York. Arrangements are being made to carry stocks of cement at various Southern seaports so as to enable the company to give prompt deliveries.

Mr. A. Borlido Maia, the surviving partner of the late firm of Borlido Moniz & Co., Rio de Janeiro, Brazil, has established a new firm to be known as Borlido Maia & Co., to continue the original business in lubricating oils, greases, paints, hardware and railroad supplies. The new partners are Mr. C. H. de Niemeyer and Mr. F. X. G. Flores, both of whom were employees of the original firm.

Paradigm skylights to the extent of 55,000 sq. ft. are to be installed on the new locomotive shops at Stratford, Ont., for the Grand Trunk Ry. by Arthur E. Rendle, of Montreal, New York and Chicago. The Arnold Co., Chicago, are the engineers. Mr. Rendle has also the contract for about 17,000 sq. ft. of skylights for the Grand Trunk car shops at London, Ont.

The Carbolineum Wood Preserving Co., of New York, announces that it has secured the services of Mr. George S. Blanchard, who until recently was interested in lumber, and more particularly treated lumber on the Pacific Coast. Mr. Blanchard will make his headquarters in New York City, and will also be actively engaged in supervising the treating operations of the Carbolineum Timber Treating Co.

Allis-Chalmers Co. has engaged for its offices in St. Louis, Mo., a new suite of rooms at 1302-1304 Third National Bank Bldg., where the company's district manager, Mr. F. L. Bunton, and his staff, will be prepared to receive visitors after Jan. 1, 1908.

J. G. White & Co., of New York, engineers and constructors for the Philippine Railways, have contracted with the American Car & Foundry Co. for four combination first-class and parlor coaches. The cars will be furnished with easy chairs in the parlor compartment in addition to the regulation seats, and will have fully equipped buffets and commodious lavatories. This class of rolling stock has become very necessary for the accommodation of foreigners and the better class of natives, and will be used on the lines terminating in the southern ports of Cebu and Iloilo, the construction of these lines being now well advanced.

At the recent annual meeting of the stockholders of the Independent Pneumatic Tool Co., held at Jersey City, N. J., the following directors were re-elected for the ensuing year: Messrs. J. B. Brady and W. O. Jacquette, of New York; John P. Hopkins, J. D. Hurley, J. J. McCarthy, J. M. Glenn, M. S. Rosenwald and Simon Florsheim, of Chicago; and J. R. Turner, of Jersey City. At the annual meeting of the board of directors held at Chicago all of the present officers were re-elected for the ensuing year as follows: Mr. J. B. Brady, Pres.; Mr. W. O. Jacquette, first V. Pres.; Mr. J. D. Hurley, second V. Pres.; Mr. A. B. Holmes, Secy. and Treas. The annual statement shows a very gratifying increase in business over the previous year. The company has recently greatly enlarged its plant at Aurora, Ill., installing a large amount of new machinery and now has facilities for practically doubling its output. The company reports that the outlook for business during the coming year is very promising, notwithstanding the present financial stringency.

The Pittsburg Automatic Vise & Tool Co., Pittsburg, has made a simple but useful improvement in its vises by cutting a groove in one of the jaws, which enables a firm hold to be secured on small round work.

TRADE PUBLICATIONS.

Recent bulletins issued by the Fort Wayne Electric Works, Fort Wayne, Ind., describe a multiple system of street arc lighting, enclosed direct-current multiple arc lamps, and portable wattmeter calibrators that are built by this company and have recently been considerably improved. The multiple street lighting system was especially designed to permit of both street and commercial lighting from one set of street mains, particularly desirable in small towns, while the wattmeter calibrators are portable instruments for testing the accuracy of service current meters.

A pamphlet on the subject of the concentration and briquetting of iron ores has recently been issued by the American Gröndal Kjellin Co., New York, which has the sale of the American rights of Mr. Gustaf Gröndal's process of treating low-grade iron ores. The process is well described and the necessary machinery illustrated, representative plants in both Norway and Sweden being explained and reference made to tests with ores from other countries. It is claimed that ores may be profitably treated by the crushing process for poor magnetites containing down to 25 per cent. of metallic iron and those high in phosphorus or copper, while by concentration, nearly all iron ores with a high percentage of sulphur and nearly all small ores, such as fine concentrates and iron sand, may be successfully treated.

A supplement to Catalogue 17 of the Marine Iron Works, Chicago, Ill., illustrates a number of improvements in steam machinery of all classes for use in marine service. Surface condensers, engine-driven centrifugal pumps, deck and freight hoists, triple and compound propellor engines, stern paddle-wheel engines and boilers, are among the equipment discussed.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Harrison, Ark.—Geo. W. O'Neal is stated to have petitioned Town Council for a franchise to lay and maintain water mains.

Denver, Colo.—The Agricultural Ditch Co. at the Chamber of Commerce Bldg. on Nov. 20 indorsed the project of constructing a tunnel through the mountain 3 miles long, and to bring water from Williams Fork on western slope to a point near Georgetown; the work will cost about $1,500,000. After determining to form an irrigation district the stockholders appointed a committee to arrange details and report to the annual meeting of the stockholders next January, including F. J. Chamberlin, W. W. Garwood, George J. Bancroft, and others.

Palatka, Fla.—The city is reported to have voted to issue $10,000 water works bonds.

Jacksonville, Fla.—See "Power Plants, Gas and Electricity."

Savannah, Ga.—We are informed that the city of Savannah has selected H. S. Jaudon, of Thomasville, to go over its water works, with a view of reinforcing and bettering the service.

Blue Ridge, Ga.—See "Power Plants, Gas and Electricity."

Atlanta, Ga.—Local press reports state that the following are the bids opened on Nov. 25 by the Bd. of Water Comrs. and Special Com. of Council for furnishing and erecting one vertical triple expansion high-duty pumping engine of the self-contained type, to have a capacity to deliver 20,000,000 U. S. gal. of water in 24 hours against a varying pressure of from 120 to 160 lbs. per square in., at Hemphill Sta.: (*a*) 20,000,000-gal, vert. triple expansion pump, (*b*) 20,000,000 centrifugal pump, (*c*) 25,000,000 centrifugal: Wisconsin Engine Co., of Corliss, Wis., *a* $139,500; Bethlehem Steel Co., of South Bethlehem, Pa., *a* $132,000, *b* $68,000, *c* $74,000; Holly Mfg. Co., Lockport, N. Y., *a* $156,000; Wm. Todd Co., Youngstown, O., *a* (2 bids) $157,400 or $165,000; General Electric Co., Atlanta, *b* $56,000, *c* $61,930; Camden Iron Wks., Philadelphia, Pa., *a* $147,000; Dolin Eng. Co., Philadelphia, Pa., *b* $39,900, *c* $42,500; Allis-Chalmers Co., Milwaukee, Wis., *a* (2 bids) $134,700 and $149,300, *b* $43,700, *c* $48,200.

Chicago, Ill.—Separate bids will be received until Dec. 11 by the Bd. Local Improv. (H. S. Dietrich, Pres.) for constructing water service pipes in 37th St., Normal and Parnell Aves., and drains in W. 37th St.

Spirit Lake, Ia.—A. W. Osborne, City Clk., writes that $17,000 will probably be expended for water works, but no steps have yet been taken to issue bonds.

Owensboro, Ky.—The question of sinking wells to procure an increased water supply, is reported under consideration.

Murray, Ky.—See "Power Plants, Gas and Electricity."

Peabody, Mass.—The citizens are reported to have voted Dec. 2 to appropriate $12,000 for new water pipe.

**Cloquet, Minn.*—The contract for erecting steel pressure tank for the city water works, to be located on south side of E Ave., bet. Market and Arch Sts., is reported to have been awarded to the Des Moines Bridge & Iron Co., of Des Moines, Ia., at $8,718 (bids opened Nov. 18). The tower will be 166 ft. high and the tank 41 ft., with a diam. of 24 ft., and will have a capacity of 125,000 gal.

McComb City, Miss.—Bids will be received until Dec. 17 by the Bd. Mayor and Selectmen for sinking an artesian well at the water plant. J. Dock Darrell, City Clk.

**Newton, Miss.*—The Board of Mayor and Aldermen is reported to have awarded contracts for water works as follows: To Ahrens & Ott Mfg. Co., New Orleans, La., pipe and specials, valves, boxes and hydrants, $13,365; A. M. Lockett & Co., New Orleans, La., pumps, connections and valves for same, erection of all machinery except deep well and pump; furnishing feed water heater and wrought iron pipe and valves for boiler and pump connections and asbestos cover for same, $3,865; P. H. Porter, Clinton, Ky., foundation for tank and tower, construction reservoir, construction of pipe line, $7,153; L. R. Sperry, New Mexico, furnishing and installing deep well and pumping outfit, $1,600. Enberg Electro & Chemical Works, St. Joseph, Mich., Enberg electro hydraulic, $175, and J. F. Mercer, erecting building for the plant, $5,339.

Atlantic City, N. J.—There is reported to be a movement on foot here to install a high-pressure salt water main system in the hotel district between Pacific Ave. and the beach front; estimated cost, $475,000.

Lockport, N. Y.—The Council on Nov. 25 accepted the grant of the Common Council of North Tonawanda, giving this city the right to go through the streets of that city with Lockport's new water supply.

* *Velva, N. D.*—The Des Moines Bridge & Iron Wks., Des Moines, Ia., is reported to have secured the contract for constructing water works, for $15,027.

Claremore, Okla.—Burns & McDonnell, Scarritt Bldg., Kansas City, Mo., are preparing plans and specifications for the new water supply and remodeling of the water works. The new plant recently completed is without water, and the proposed improvements contemplate securing water supply from the Verdigris River.

Hermiston, Ore.—It is reported that arrangements are being made to establish water works.

East Stroudsburg, Pa.—H. B. Bush, Secy. Boro Council, writes that $10,000 to $15,000 will be expended for water works improvements. Engineer, Harry A. Kent, of Stroudsburg.

**Philadelphia, Pa.*—Bids were opened on Nov. 4 by the Dept. of Pub. Works, Bureau of Water (F. C. Dunlap, Chief of Bureau) for one 6,000,000-gal. pumping engine for Belmont high-service pumping station (Contract No. 90), and the Allis-Chalmers Co., of Milwaukee, Wis., secured the contract at $32,070, to be completed in 240 working days. Other bids received were: The Snow Steam Pump Works, 114 Liberty St., New York, N. Y., $39,000, 250 days; the Laidlaw, Dunn, Gordon Co., 114 Liberty St., New York, N. Y., $36,500, 270 days; Bethlehem Steel Co., So. Bethlehem, Pa., $30,750, 260 days; Southwark Fdry. & Mchy. Co., 5th and Washington Ave., $44,385, 175 days.

Reading, Pa.—The Water Board is reported to be considering the covering of the reservoirs at the head of Penn St., at a cost of $25,000, and that of Hampden, to cost $80,000.

Yorkville, S. C.—The citizens are reported to have voted to issue $25,000 bonds for water works and sewers.

Platte, S. D.—It is reported that arrangements are being made to issue $10,000 bonds for water works extension.

Estelline, S. D.—The City Council is reported to be considering the question of constructing water works.

Lebanon, Tenn.—The citizens are reported to have voted to issue $10,000 bonds for water works.

Victoria, Tex.—The State Attorney General is reported to have approved plans for the issue of $415,000 water works bonds.

Childress, Tex.—The citizens are reported to have voted on Nov. 20 to construct water works.

Seattle, Wash.—City Engr. R. H. Thomson estimates the cost of laying water mains on 36th Ave. for $7 300. The City Council has passed an ordinance providing for the laying of water mains on Hella St., at a cost of $7,700.

Odessa, Wash.—The citizens are reported to have voted to expend $11,500 in improvements, to include the replacing of the wooden mains with iron pipe.

New Westminster, B. C.—W. A. Duncan, City Clk., writes that the building of an additional reservoir is being talked of, but has not been decided upon finally. If done, it will most likely be by day's work under supervision of City Engr. and Supt. of Water Wks.

Hamilton, Ont.—Local press reports state that bids will be received until Dec. 21 by the Fire and Water Com. of Council, for electric pumps to be installed at the beach.

Hamilton, Ont.—See "Power Plants, Gas and Electricity."

Chesley, Ont.—Wm. McDonald, City Clk., writes that it is proposed to construct water works, at a cost of $38,000.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Santa Monica, Cal.—Thos. H. James, City Engr., writes that about $35,000 will be expended for main and outfall sewer, a portion of which has been let. The balance will be let in about 60 days.

Santa Monica, Cal.—See "Miscellaneous."

Sacramento, Cal.—M. J. Desmond, City Clk., writes that the citizens on Nov. 19 voted to issue $300,000 bonds for the construction of sewers.

Stockton, Cal.—The lowest bid recently received for constructing the east side sewer extension from E. 11th St., to E. 8th St. is reported to have been submitted by C. D. Vincent for $8,800.

Washington, D. C.—The lowest bid opened on Nov. 25 by the Comrs. D. C., for constructing sewers, was submitted by E. G. Gummel, at the following bid: 3,400 cu. yd. sewer excavation, 70 cts.; 62 cu. yd. brick masonry, $15; 115 cu. yd. vitr. brick masonry, $21; 450 cu. yd. concrete "B," $8, and 450 cu. yd. concrete "C," $8; total cost, $12,025. Totals of other bids: W. F. Brenizer Co., $13,481, and R. L. Beall Const'n Co., $15,991. D. E. McComb, Engr. of Sewers.

Belleville, Ill.—Bids will be received until Dec. 14 by the Bd. Local Improv. for constructing sewers in portions of 6 streets; estimated cost, $15,000.

**Bloomington, Ill.*—E. F. Fauntz, City Engr., writes that the contract for constructing pipe sewers (bids opened Nov. 29) has been awarded to D. H. Rider, of Bloomington, for $3,939.

**Summit, Ill.*—The Corns Products Mfg. Co. has awarded contract for a system of sewers at its new plant at Summit, to the Federal Improvement Co., of which Wm. Lorimer is president. Offices 949 to 959 Rookery, Chicago. Contract price, $75,000.

Cicero, Ill.—The citizens are reported to be in favor of co-operating with the city of Chicago in building the 52d Ave. sewer.

**Springfield, Ill.*—The contract to lay an 18-in. pipe sewer in Osburn Ave. from Dorlan Ave. to No. Grand Ave. has been awarded to John Spence, of Springfield, at 98 cts. per lin. ft. for 18-in. pipe, 40 cts. for 12-in. inlet pipe, and $25 for each manhole, complete.

Richmond, Ind.—Fred. R. Charles, City Engr., writes that Philip Hipskind & Sons, of Wabash, bid on Nov. 20 a total of $11,700 for constructing Northwest 2d St. sewer, to consist of 2,660 yd. rock excavation; 610 yd. earth excavation; 7 manholes, 3 inlets, 1,100 ft. 48 in. sewer, 1,100 ft. 6 in. subdrain pipe, 60 ft. 12 in. sewer pipe, 3 12-in. elbows and 30 squares repaving.

The Bd. of Pub. Wks. is reported to have ordered plans for the construction of a trunk sewer in E. Madison St., and pipe sewers in Niles Ave. and Edward, Webster, Howard and other streets.

South Bend, Ind.—The Bd. of Pub. Wks. is reported to have decided to construct a sewer in Pennsylvania Ave. from Wenger St. to Michigan St.

Greenfield, Ind.—O. O. Beaver, City Clk., is reported to be receiving bids for the construction of a sanitary sewer in and along Grant St.

Muncie, Ind.—The Bd. of Pub. Wks. is reported to have decided to construct a sewer in Kilgore Ave. and Jackson St.

Evansville, Ind.—The Bd. Pub. Wks., it is reported, will receive bids until Dec. 28, for the construction of a large sewer in a portion of 7th Ave. W. F. Wunderlick, City Clk.

Evart, Mich.—Bids will be received at the office of Irvin Chase, Village Clk., until Dec. 13, for the construction of a sanitary district sewer system, requiring 4,766 lin. ft. of 10, 15 and 18-in. pipe sewer, with necessary Y's and manholes, as advertised in The Engineering Record.

St. Paul, Minn.—Bids were opened by the Bd. of Pub. Wks (John S. Grode, Pres.) on Nov. 18 for constructing St. Anthony sewer extension No. 2, which includes about 12 miles of sewers, and the lowest bid submitted was that of the General Constr. Co., at $317,000. Other bids were: Fielding & Shepley, $330,575; Feyen & Keough Bros., $349,993; Green & Sons Co., $365,000, and O'Neil & Preston, $369,000.

St. Louis, Mo.—The Bd. of Pub. Improv. is reported to be considering the extension of Glaze Creek sewer through Carondelet Park to Kansas St.; probable cost of work, $140,000.

**Omaha, Neb.*—McCar & Cathrol are reported to have secured the contract for constructing a sewer on 33d St. from Taylor to Ames St., for about $5,478.

Riverside, N. J.—We are informed with regard to sewerage system bids for which were to have been opened on Nov. 1 at the office of Irven Kollo, Township Clk., that the award of contract is withheld for present. The system consists of approximately 10 miles of sewers 8 to 24 in. in diam., pump house, engines, pumps, pump well and disposal works. Engineer, Wm. H. Boardman, 426 Walnut St., Philadelphia, Pa.

Madison, N. J.—Bonds to the amount of $125,000 were voted Dec. 2 for the construction of sewerage and sewage disposal works, from plans of Hering & Fuller, of New York, N. Y. Jas. H. McGraw, Chmn. Sewer Com.

**Buffalo, N. Y.*—The following are the bids recently received by the Bd. of Pub. Wks. for constructing a 9-ft. 10-in. overflow and 10-ft. 2-in. overflow drain through Hertel Ave., bet. Cornelius Creek and Niagara River (biders all of Buffalo): Jos. F. Stabell Co., $156,000 (bid informal); Dark & Co., $159,200 (recommended for award); Miller & Franklin, $168,000.

The following bids have been received for constructing sewer in Military Road from Cornelius Creek to Hertel Ave. (bidders all of Buffalo): Miller & Franklin, $5,800 (recommended for award); Jos. F. Stabell Co., $6,000, and Dark & Co., $6,300.

Mt. Vernon, N. Y.—The officials of Mt. Vernon, North Pelham and Pelham Manor are reported to have decided to construct at once reduction works for the treating of the sewerage and the pumping of the residue into the sound.

Mt. Kisco, N. Y.—The citizens are reported to have voted on Nov. 23 to issue $59,000 bonds and raise $40,200 by a tax for the construction of sewers, to take care of the refuse, the city having decided to construct a sewage disposal plant if the village would construct the sewers. Engineer, J. M. Farley, of White Plains. F. J. Carpenter, Village Clk.

White Plains, N. Y.—Press reports state that the lowest bids opened on Nov. 27 at the office of the Bronx Valley Sewer Comn., 2 Grand St., White Plains, for constructing the Bronx Valley sewer is stated to have been submitted by Frank E. Gore, of New York City, at a cost of about $1,500,000. The bids called for furnishing work and materials necessary for the watertight and enduring construction of each one of the seven sections

**Reading, Pa.*—The following are the bids opened on Nov. 20 by the Bd. of Pub. Wks. for the construction of house sewer in Dist. 12: (*a*) Jos. O'Reilly, Reading (awarded contract); (*b*) David Peoples, 1200 Betz Bldg., Philadelphia; (*c*) Hawman Bros., Reading; (*d*) John F. Albrecht & Co., Reading; (*e*) Hawman Constr. Co., Reading. (Elmer H. Beard, City Engr.)

which together comprise about 12 miles of circular sewer from 3⅓ to 6 ft. diam. and about 3 miles of circular lined tunnel mostly 6½ ft. and 8½ ft. diam. The material to be either monolithic reinforced concrete, reinforced concrete blocks or brick masonry.

Cincinnati, O.—The Bd. of Public Service is reported to be considering the construction of a sewer system in the annexed territory, which was formerly the village of Westwood.

Upper Sandusky, O.—The Council is reported to have passed an ordinance providing for the issue of $15,000 bonds for the construction of sewers in Sub-Dist. No. 2. John T. Carey, Mayor.

Mingo Junction, O.—It is stated that bids will be received until Dec. 23 by Frank McIlster, Village Clk., for $50,000 sewer bonds.

Wapakoneta, O.—It is stated that Chas. E. Fisher, Village Clk., will receive bids until Dec. 13 for constructing sewers in several streets.

**Reading, Pa.*—David Peoples, 1200 Betz Bldg., Philadelphia, has secured the contract for constructing intercepting storm water sewer from 11th and Greenwich St. to 12th and Walnut St. (bids opened by Bd. Pub. Wks. on Nov. 20), at the following bid: 1,072 lin. ft 4x6-ft. concrete, plain, $6.15; 1,062 lin. ft. 3-ft. 6-in. x 5-ft. 3-in. concrete, plain, $5.25; 580 lin. ft. 2-ft. 10-in. x 4-ft. 3-in. concrete, $4.45; 760 lin. ft. 24-in. pipe, $2.10; 110 lin. ft. 18-in. pipe, $1.90; 150 vertical ft. concrete manhole, with cover, concrete sewer, $4.25; 100 vert. ft. concrete manhole, with cover, for pipe sewer, $4.25; 20 plate "C" basin, including connection, ea., $90; 5 plate "I" basins, including connection, ea., $80; 50 M ft. lumber, $25; brick masonry, per cu, yd., $16; vitr. brick masonry, per cu. yd., $20; rubble stone masonry, per cu. yd., $6; concrete in place, complete, per cu. yd., $8; lumber in place, per 1,000 B. M., $30. Extra work: For earth excav., $1.50 per cu. yd.; loose rock excav., $1.60 per cu. yd.; rock excav., $1.60 per cu. yd. Total, $18,602. Totals of other bids: Fehr & O'Rourke, Reading, $23,043; Hawman Constr. Co., Reading, $24,895; Jos. P. O'Reilly, Reading, $26,617.

*Jos. P. O'Reilly, of Reading, has secured the contract for constructing Rose Valley Creek sewer from Neversink St. to river, at $17,935. Totals of other bids: Fehr & O'Rourke, Reading, $24,894; David Peoples, 1200 Betz Bldg., Philadelphia, $22,739; and Hawman Constr. Co., Reading, $36,253.

Yorkville, S. C.—See "Water."

Seattle, Wash.—The City Council has passed an ordinance providing for the laying of a sewer in 3d Ave. N., for $5,600.

BRIDGES.

Notes Arranged Alphabetically by States.

Red Bluff, Cal.—Plans are stated to have been completed for a 360-ft. I-beam bridge, to be constructed over Peynes Creek Slough on the Cone Road. The plans provide for twelve 30-ft. spans.

**Sacramento, Cal.*—We are informed that the Bd. of County Superv. recently awarded contract to Jenkins & Wells for repairs to American River bridge at 12th St. for $5,388; also to McDougall & Kennedy, for repairs to 2,800 ft. of trestle north of American River on 12th St. road for $13,795.

San Francisco, Cal.—The Bd. of City Superv. on Nov. 25 passed an ordinance setting aside $10,000, and the state to build an overhead bridge for foot passengers, from Market St. crossing east of the ferry.

Denver, Colo.—G. W. Houston, Deputy State Engr., writes that the following are the bids opened on Nov. 13: (*a*) Gunnison County bridge, a 125-ft. steel span, 80-ft. pile approaches; (*b*) Rio Blanco County bridge, 80-ft. steel span, including grading approaches; (*c*) 50 ft. reinforced concrete slab and girder type bridge in Capulin Conejos County; (*d*) 30-ft. arch type reinforced concrete bridge at Empire, Clear Creek County: South Western Bridge Co., Joplin, Mo., *a* $4,350 (awarded contract), *b* $3,940; Denver Bridge Co., Denver, *b* $4,700; Midland Bridge Co., Kansas City, Mo., *a* $4,800, *b* $4,767; Pueblo Bridge Co., Pueblo, *a* $4,650, *c* $2,800; C. G. Sheelly, *d* $1,949 (rejected); Walter Sharp Bridge Co., *a* $2,400.

Hartford, Conn.—Bids will be received by Morgan G. Bulkeley, Pres. Connecticut River Bridge and Highway Dist., until Dec. 16 for the sale of the superstructure of the present temporary highway bridge across the Connecticut River at Hartford, as advertised in The Engineering Record.

Colona, Ill.—The Joint Bridge Com. of Rock Island and Henry Counties is stated to have selected Colona as a site for the erection of a bridge over Rock River, the structure to consist of three 200-ft. spans, and cost $26,000.

Lafayette, Ind.—Bids will be received by the Comrs. of Tippecanoe County until Dec. 18 for the construction of a bridge near Granville, between Wayne and Shelby Townships, as advertised in The Engineering Record.

South Bend, Ind.—We are informed that all bids opened on Nov. 22 by the Bd. of Co. Comrs., at South Bend for constructing a concrete steel girder bridge at La Salle Ave., South Bend, to be 80 ft. long and 80 ft. wide, have been rejected and new bids will be called for about Mar. 1. The following are the bids received: C. L. Copp, Osceola, $13,234; Falkenau Electric Constr. Co., Chicago, Ill., $14,248; Marsh Bridge Co., Des Moines, Ia., $16,764; and Elkhart Bridge Co., Elkhart, $17,500. John W. Harbow, Co. Aud.; Alonzo J. Hammond, of South Bend, Engr. in charge.

Colfax, La.—It is stated that bids will be received until Jan. 6 by the Police Jury (J. B. Roberts, Clk.) at Colfax for constructing 2 steel bridges, one across Big Creek at Fishville, and the other across Fish Creek on the Pollock and Rochelle Rd.

New Orleans, La.—Bids will be received by Chas. R. Kennedy, Compt., until Jan. 2, for constructing a bascule trunnion bridge over Bayou St. John at intersection of Esplanade Ave.

Mankato, Minn.—The following bids are reported opened Nov. 14 for the construction of a steel highway bridge over the Minnesota River at A St.: A. Y. Bayne & Co., complete with wood floor, $25,800, with concrete floor, $2,100 extra Minneapolis Steel & Machinery Co., of Minneapolis, plan A, $27,800; B, $26,300, and C, $23,500. The Hennepin Bridge Co., plan A, $23,530; B, $22,265; C, $20,968, and D, $18,968. The Minneapolis Bridge & Iron Co., $27,485, complete with concrete floor; $26,000, with wood floor.

Red Wing, Minn.—Bids will be received until Dec. 20 by the Co. Bd. and the Bd. of the Town of Hay Creek at the Co. Auditor's office, Red Wing, for constructing a steel or reinforced concrete bridge over Bullid Creek, Town of Hay Creek, to be 60 ft. long between the two end walls.

Duluth, Minn.—The City Council is reported to have under consideration the construction of a steel viaduct over the railway tracks at Banks Ave. and 3d St., probable cost $20,000.

Kansas City, Mo.—The Commercial Improvement Co. is stated to have accepted the ordinance which authorizes it to build a viaduct on Main St. from 20th to 23d; estimated cost, $135,000.

New York, N. Y.—Plans are stated to have been approved by the Art Commission for the bridge to be constructed at Mott Ave. and tracks of Spuyten Duyvil & Port Morris Branch of the New York Central & Hudson River R. R.

Wilmington, N. C.—Blueprints are now on file at the office of The Engineering Record, 239 West 39th St., New York, N. Y., showing location of proposed bridge over Northeast River at Castle Haynes, bids for which will be received until Jan. 7 by the counties of New Hanover and Pender, as advertised in The Engineering Record. It will be a steel highway bridge approximating 400 ft., including draw span, and the bids are to include foundations; depth of water, about 32 ft. Bridge to have 16-ft. road clearance, and to carry 15-ton road roller. Design of bridge and details to be submitted by the bidders, and bidders must take their own measurements and soundings. D. McEachern, Chmn. Com.

**Newark, O.*—H. L. Maddocks, Co. Engr., writes that the contract for constructing superstructure Fallsburg Bridge (bids opened Nov. 25) has been awarded to Columbus Bridge & Iron Co., of Columbus, for $2,295.

Dayton, O.—Bids will be received until Dec. 17 by the Bd. Pub. Service (W. A. Maynes, Clk.), for re-erecting 2 of the old spans of the Stratford Ave. bridge at the mouth of Wolf Creek, including all necessary oak plank and joists for new floor and guard railing complete; also cleaning and repainting said 2 spans; also 730 cu. yds. steel reinforced concrete for the abutment piers and wing walls, including excavations. The contractor will be required to haul said 2 old spans from the present place of storage and furnish new material in place of all the missing or defective members of said 2 spans.

Meadville, Pa.—The construction of a bridge over French Creek at Mead Ave. replacing present structure is reported contemplated.

**Graham, Tex.*—Geo. H. McLaren, Co. Judge, writes that Mitchell & Pigg, of Weatherford, have secured the contract for building two suspension bridges across Brazos River (bids opened Nov. 20), for $37,280.

Houston, Tex.—Bids will be received until Dec. 11 by John B. Asbe, Co. Aud., for constructing 4 bridges on the Webster Ave. Line Co. Road.

Ogden, Utah.—The Oregon Short Line R. R. Co. is reported to have decided to construct a viaduct over the railroad yards at 24th St.

Ft. Monroe, Va.—Bids will be received at the office of Capt. Ernest R. Tilton, Constr. Q. M., until Jan. 6 for the reconstruction of Mill Creek Bridge, as advertised in The Engineering Record.

**Curlew, Wash.*—William Oliver, of Spokane, is stated to have secured the contract for constructing a steel bridge over Kettle River at Curlew, for $9,000.

Wheeling, W. Va.—Preliminary plans are stated to have been prepared for the construction of a bridge over the creek at Market St.

Lake Mills, Wis.—The County Bd. and citizens of Milford are stated to have appropriated $14,000 toward the construction of a bridge over Crawfish River, replacing Hubbleton Bridge.

Milwaukee, Wis.—The Bd. of Pub. Wks. is stated to have been authorized to receive bids for the construction of a bascule bridge over Kinnickinnic River, also for the Highland Boulevard Viaduct.

Eau Claire, Wis.—Wm. Danforth, City Engr., writes that a committee of City Council has arranged with Lang & McAnulty to prepare plans for a bridge and dam across Chippewa River near the southerly city limits.

Walkerton, Ont.—Bids will be received until Dec. 11 by P. A. Malcomson, Co. Clk., for $20,000 bridge bonds.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

**Birmingham, Ala.*—Southern Bitulithic Co., of Nashville, Tenn., has received an additional contract for 2,500 sq. yds. of bitulithic.

San Francisco, Cal.—The Bd. of City Supervs. on Nov. 25 passed the ordinance providing for an appropriation of $50,000 for the repair of bituminous and asphalt streets.

Santa Monica, Cal.—Thos. H. James, City Engr., writes that bids will probably be received about Feb. 15 for paving about 2,000 sq. yds. asphaltum, with concrete base, including grading and cement curb; cost about $6,000.

Creede, Colo.—Bids will be received, it is stated, until Dec. 23 (re-advertisement) by T. W. Jaycox, State Engr., Denver, for the construction and repairs of a flume and wagon road on Willow Creek near Creede

Ridgefield, Conn.—Bids will be received until Jan. 2, by the Bd. Selectmen (Geo. H. Whitlock, Chmn.) for grading and graveling a section of road.

**Christiania, Del.*—The Levy Court at Wilmington is reported to have awarded the contract for constructing a portion of Christiana Road between Christiana and the bridge across White Clay Creek near Stanton, to Theobold Harsch, for $8,500.

Atlanta, Ga.—Venable Bros., Temple Court, are stated to have secured the contract for repaving 13,000 sq. yds. of Broad St. with creosoted wood block at $3.98 per sq. yd. and granite block at $2.65 per sq. yd., to be used between car tracks.

Augusta, Ga.—This city proposes installing new rock crusher for street improvements.

**Springfield, Ill.*—The contract for paving Rutledge St. from Carpenter St. to Miller St. has been awarded to John Bretz, of Springfield, at $1.67 per sq. yd. for paving, and 54 cts. per lin. ft. for stone curb.

**Greencastle, Ind.*—C. C. Hurst, Co. Aud., writes that the contract for improving 16,371 ft. of road in Jackson Township (bids opened Nov. 30) has been awarded to James M. Stewart, Roachdale, for $9,500.

Indianapolis, Ind.—It is stated that bids will soon be received for paving with brick Ray St.

Greenfield, Ind.—The Comrs. of Hancock and Marion Counties will soon let the contract for constructing 15,840 ft. of gravel road on the county line.

Columbus, Ind.—The City Council, it is reported, will receive bids until Dec. 16 for the construction of cement curbs, gutters and cement walks on 4th and Brown Sts. and cement walks on 11th and 12th Sts. L. F. Orr, City Clk.

Donville, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Dec. 15 for constructing a gravel road in Marion Township, 6,600 ft. in length. D. D. Mills, Co. Aud.

Des Moines, Ia.—The following bids are reported opened Nov. 23 by Bd. Pub. Wks., for paving about 11,067 sq. yds. on *a*, Enos Ave.; *b*, Alley between 5th and 6th, Clark and State St.; *c*, Alley between 1st and 2d, Postal and Court St.; *d*, 2d and 3d Sts.; *e*, School St.; *f*, Centre St.; *g*, Postal St., and *h*, Elm St. Flint Brick Co., *a* and *e*, $1.95; *b*, $2.05; *c*, $2.15; *d*, $1.38; *f*, $2.04½; *g*, $2.01; *h*, $2.06. Hausman Improvement Co., *a*, *g* and *h*, $2.05; *b*, $2.13; *c*, $2.08; *d*, $1.40; *e*, $2.19; *f*, $2.17. Jas. Horrabin, *a* and *b*, $2.15; *c*, $2.19; *d*, $1.42. O. P. Herrick, *e*, *f* and *g*, $2.09.

New Orleans, La.—The Com. on Buget and Assessment is stated to have reported favorably on the ordinance providing for the paving with bitulithic a portion of Roberts St., and with asphalt a portion of Octavia St.

The Streets and Landings Com. is stated to have reported favorably on the paving with bitulithic Walnut St., with asphalt Soniat St. and Carondelet St., also the paving of portion Bell and Pine Sts., and sidewalks on Audubon St.

Long Beach, Miss.—The Citizens are stated to have voted to issue $10,000 bonds for street improvements.

**Kansas City, Mo.*—The Engineering & Constr. Co. is reported to have secured the contract for repairing asphalt paving on Brooklyn St. at $1.09 per sq. yd.

Omaha, Neb.—It is stated that $150,000 will be expended in improving Douglas County Roads.

**Woodbury, N. J.*—The contract for paving about 2,950 sq. yds. on S. Broad St. with bitulithic is reported to have been awarded to the Standard Bitulithic Co., at $2.25 per sq. yd. Bids opened Nov. 25 by John E. Estell, City Clerk.

Albany, N. Y.—Fredk. Skene, State Engr., is reported to have opened bids Nov. 18 for the following improvements: Road No. 345, Canajobarie-Sprout Brook, Montgomery County—Brown & Lane, Schenectady, $41,278; Stewart, Kerbaugh, Shanley Co., New York City, $38,611. Road No. 462, Old-Forge-McKeever, Herkimer County—Pennell & Hern, Yonkers, $71,210; Brown & Lane, $99,839; P. A. Herliby, Glens Falls, $110,307; Casey & Murray, Rochester, $70,664; D. Moynohan, Herkimer, $74,979. Road No. 477, Valley Falls Road, Rensselaer County—Patrick A. Lillis, Troy, $43,371; Thos. H. Karr, Troy, $43,596; M. F. Dollard, Albany, $49,405; Stewart, Kerbaugh, Shanley Co., $47,500. Road No. 478, Haynerville-Raynertown, Rensselaer County—Croliss Constr. Co., Troy, $27,226; Patrick A. Lillis, Troy, $25,279; Brown & Lane, $29,362; Martin Murray, $27,067; Thos. H. Karr, $25,716; M. Kantrowitz, Albany, $25,969; Stewart, Kerbaugh, Shanley Co., $28,132. Road No. 490, Hoosick-NorthHoosick, Rensselaer County—M. Fitzgerald, Hoosick Falls, $24,127: Thos. H. Karr, $24,969; P. A. Lillis, $24,106; Brown & Lane, $34,311; Stewart, Kerbaugh, Shanley Co., $25,778.

Other bids opened at the same time are reported to be as follows: Road No. 273, Seneca River, North Side, Chambers & Brady, Rochester, $14,886.

Road No. 308, New Paltz-Rifton, Joseph Walker, Stone Ridge, $43,009; Stewart Kerbaugh Shanley Co., New York City, $45,560.

Road No. 355, Wellsburg, Bennett & Ryan, Silver Creek, $32,923.

Road No. 358, Horseheads-Corning, Bennett & Ryan, Silver Creek, $79,537; Casey & Murray, Rochester, $77,954. Road No. 382, Walden-Pine Bush, De Graff & Hogaboom, Bloomington, N. Y., $59,943; Orange County Road Constr. Co., New York City, $57,609; D. Moynehan, Herkimer, $58,358; Stewart Kerbaugh Shanley Co., $57,546.

Road No. 391, Clarendon-Holly, Sec. 1, Greece Constr. Co., Rochester, $25,136; Chambers & Grady, $31,832; Henry P. Burgard Co., Buffalo, $30,368; Stewart Kerbaugh Shanley Co., $28,631.

Road No. 398, County Line, Orleans and Monroe counties, Greece Constr. Co., $30,809; Stewart Kerbaugh Shanley Co., $30,342.

Road No. 401, Rapids, Jeremiah T. Finch, Glens Falls, $32,586; Whitmore Rauber Vicennes Co., $27,170.

Road No. 402, Buffalo Sec. 3, Greece Constr. Co., $24,805; Gantz-Wilson Constr. Co., Buffalo, $29,796; Chambers & Grady, $30,274; Whitmore-Rauber-Vicennes Co., $29,696.

Road No. 403, Churchville-Riga, Patrick A. Lillis, Troy, $17,412; Greece Constr. Co., $17,551; Chambers & Grady, $20,036.

Road No. 408, Rich's Dugway-Penfield, Monroe County, Monroe Roads Co., $24,398; Whitemore-Rauber-Vicennes Co., $27,179; Patrick A. Lillis, Troy, $23,790.

Road No. 421, Conklin, Casey & Murray, $58,766; A. D. Bridge's Sons, Hazzardville, Conn., $58,852.

Road No. 426, State Road, Sec. 2, Wm. J. Semper, $48,231.

*Items marked thus give the names of parties awarded contracts.

Road No. 428, Watertown-Carthage, Sec. 3, Wm. J. Semper, Watertown, $35,862; Burns Bros. & Haley, Watertown, $37,972; Stuart Kerbaugh Shanley Co., $32,047.

Road No. 445, Lisle Center Lisle, J. McCormick, East Providence, R. I., $20,144.

Road No. 474, Clover St. Road, Sec. 2, Monroe Roads Co., $14,735; Patrick A. Lillis, Troy, $14,695; Whitmore Rauber-Vicennes Co., $16,034.

Road No. 479, Fairport, Sec. 2, Monroe Roads Co., Rochester, $3,301; Whitmore-Rauber-Vicennes Co., $3,434; Patrick A. Lillis, Troy, $3,376.

Road No. 485, West Bloomfield, Honeoye Falls, Bert Warren, Honeoye Falls, $26,416; Henry P. Burgard Co., Buffalo, $30,013.

Road 480, Tully Roads, Chambers & Grady, Rochester, $36,305.49; Stewart Kerbaugh Shanley Co., New York City, $30,269.

Road No. 531, Base Line, Sec. 2, Gantz, Wilson Constr. Co., Buffalo, $23,150; Stewart Kerbaugh Shanley Co., $18,194.

Road No. 532, Base Line, Sec. 3, Gantz-Wilson Constr. Co., $14,891; Stewart Kerbaugh Shanley Co., $10,425.

**Rochester, N. Y.*—The contract for paving with brick Shepard St. is stated to have been awarded to Whitmore, Rauber & Vicinus, for $14,861.

**Winston, N. C.*—A contract for 72,000 sq. yds. of bitulithic has been awarded to the Atlantic Bitulithic Co., of Richmond, Va.

**Toledo, O.*—H. P. Streicher & Co., of Toledo, will lay 6,325 sq. yds. of bitulithic in this city.

Cleveland Heights, O.—It is stated that bids will be received until Dec. 10 by Wm. G. Phare, Village Clk., for $9,669 sidewalk bonds.

Cincinnati, O.—The City Council is reported to have passed the following resolutions for paving with granite Lawrence and Griffin Sts., with brick Bishop St., with asphalt Winchell Ave., and macadamizing Edwards Road.

Struthers, O.—Bids will be received until Dec. 30 at the office of L. S. Creed, Village Clk., for $5,000 bonds, to be issued for the purpose of resurfacing and improving streets.

Columbus, O.—Bids will be received until Dec. 11 by the Bd. Pub. Service (Edwd. F. McGuire, Secy.) for improving portions of 13 streets.

Ashtabula, O.—It is reported that bids will be received until Dec. 10 by the Bd. Pub. Service (A. J. Richardson, Clk.) for paving with brick portions of several streets.

Dayton, O.—The City Council is reported to have passed resolutions providing for the paving of portions of Grand Ave. and Jackson St.

Guthrie, Okla.—W. W. Miller, City Engr., is now preparing plans for paving Noble Ave., about 24 blocks, and 1st St. for 3 blocks.

**Portland, Ore.*—An additional contract for 15,802 sq. yds. of bitulithic has been awarded to the Warren Constr. Co.

**Eugene, Ore.*—2,834 sq. yds. of bitulithic will be laid by the Warren Constr. Co., of Portland, Ore., in Eugene.

**Salem, Ore.*—An additional contract for 14,429 sq. yds. of bitulithic has been awarded to the Warren Constr. Co., of Portland, Ore.

**Harrisburg, Pa.*—The County Comrs. are stated to have awarded the contract for constructing the Paxtang Pike along the Reading Road to McCormick & Co., of Philadelphia, at $18,000.

Bids will be received until Dec. 16 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 5,280 ft. of road, 16 ft. wide, in Londonderry Township, Dauphin County.

Altoona, Pa.—The lowest bid opened Nov. 19 by State Highway Dept. at Harrisburg for constructing a portion of the state road from Young's Crossing along Logan Valley St. Railway is stated to have been submitted by John Vipond, of Altoona, at $26,238.

Erie, Pa.—The County Comrs. on Nov. 23 are stated to have received from State Highway Dept. at Harrisburg bids, as follows, for constructing *a* 8,158 ft. of road in Waterford Borough and *b* 3,670 ft. in Waterford Township: W. C. McIntyre & Son, of Sharon, *a* (3 bids) $21,597 to $28,424, *b* (3 bids) $9,597 to $12,818; John L. Hanna, Jr., of Franklin, *a* (2 bids) $31,936 and $34,667, *b* (2 bids) $11,378 and $14,853; Franklin Constr. Co., of Franklin, *a* (3 bids) $14,448 to $29,404, *b* (2 bids) $10,045 and $10,509; E. M. Love & Son, of Corry, *a* (4 bids) $21,741 to $36,147, *b* (2 bids) $9,988 and $16,779; South Shore Constr. Co. *a* (3 bids) $19,175 to $30,170, *b* (4 bids) $8,811 to $14,395, and C. B. McCray and M. J. Crowell, of Corry, *a* (2 bids) $19,960 and $30,416, *b* (2 bids) $8,725 and $13,611.

Carlisle, Pa.—It is stated that bids will be received until Dec. 11 by the State Highway Dept. (Jos. W. Hunter, Comr.), Harrisburg, for constructing 2 roads, 2,700 ft. and 6,932 ft. long, respectively, in Lower Mifflin Township; also until Dec. 13 a road 600 ft. long in Mechanicsburg Boro. and 2 roads in Hampden Township, 5,730 ft. and 1,520 ft. long, respectively.

**Columbia, S. C.*—The Georgia Engineering Co., of Augusta, Ga., is reported to have secured the contract for paving a portion of Main St., for $173,559. Bids opened Nov. 25 by Street Comn. Other bidders were as follows: W. F. Bowe, Augusta, $174,780; John J. Cain, Columbia, $225,808; Atlantic Bitulithic Co., Richmond, $203,592; Southern Paving & Constr. Co., Chattanooga, $237,873.

Greenville, Tenn.—See "Public Buildings."

**Ft. Worth, Tex.*—The Texas Bitulithic Co., of Dallas, Tex., has been awarded contract for 114,940 sq. yds. of bitulithic.

**Vancouver, Wash.*—A contract for 36,987 sq. yds. of bitulithic is being constructed by the Warren Constr. Co., of Portland, Ore.

Seattle, Wash.—City Engr. R. H. Thomson has submitted the following estimates on proposed street improvements: [illegible] and W. 70th St., grading, estimated cost, [illegible]; [illegible] Ave., concrete walks, $9,900; Madison St., [illegible] $21,500; Virginia St., planking, $4,760; [illegible] St., paving, $16,200.

The [illegible] has passed ordinances for grading [illegible] 4th S. and 34th Aves., at a cost of $92,640; grading and concrete walks on 37th and 3d Aves., cost $27,100; concrete walks on Fremont Ave., cost $32,650; and paving Columbia and Cherry Sts., cost $15,100.

Janesville, Wis.—The County Board is stated to have voted to expend $15,000 for road improvements.

Vancouver, B. C.—W. A. Clement, City Engr., writes that about $100,000 will be expended for concrete sidewalks and $400,000 for wood block, stone block and asphalt pavement.

**Port Arthur, Ont.*—The Warren Bituminous Paving Co., of Toronto, has been awarded contract for 6,593 sq. yds. of bitulithic.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Sulphur Springs, Ark.—The Kihiberg Co. (E. B. Guthrey, Secy.) is reported to have decided to install an electric light and power plant.

Booneville, Ark.—The Booneville Ice, Light & Storage Co. is reported incorporated, with a capital of $50,000, by C. G. Yates, S. P. McConnell, and others.

Denver, Colo.—A. E. Wilson, of Denver, is reported to have decided to construct a power plant on South Platte River, a short distance from Denver, to cost about $1,000,000. It will permit the generation of 20,000 h.-p.

Washington, D. C.—Bids will be received at the office of Elliott Woods, Supt. U. S. Capitol Bldg. and Grounds, until Jan. 15, for equipment for the heating, lighting and power plant for the U. S. Capitol and Congressional Buildings, including boiler feed pumps, barometric condensers, centrifugal pumps, motors, cranes and chimneys, as advertised in The Engineering Record.

Jacksonville, Fla.—The A. A. Kind Electric Co. is planning to install an ice plant, water works and gas plant next summer. A. A. Kind, Mgr.

Leesburg, Fla.—Mayor Dozier is reported to favor the construction of an electric light plant.

Walkersville, Ga.—A committee is reported to have been formed, with Dr. J. D. Nicodemus as chairman, to form a stock company to furnish this city with electric lighting.

Blue Ridge, Ga.—The citizens are reported to have voted to issue $35,000 bonds for water works and an electric light plant.

Elk City, Idaho.—Jacob Schlosser, of Chicago, Ill., Pres. Umatilla Mining Co., is reported interested in a new company about to be formed, to develop the water power of the south fork of Clearwater River near the mouth of Ten Mile Creek, near the Elk City and Orogrande mining districts, to furnish power to run the Umatilla mine and also supply the Buffalo Hump, Orogrande and Elk City mining districts.

Hailey, Idaho.—The Idaho Consolidated Mines is reported to have decided to install an electric light and power plant for the mines, to cost about $50,000. Work is reported to have been started on the construction of a power dam across Wood River.

Chicago, Ill.—See "New Industrial Plants."

Cairo, Ill.—See "Electric Railways."

Fisher, Ill.—The Village Trus. are reported to have decided to purchase the electric light plant and will make improvements to same.

Winchester, Ind.—The Citizens Water & Light Co. will start a day service May 1, 1908, and will be in the market for motors and all equipment for power use.

Shelbyville, Ind.—The Shelbyville Gas Co. is reported formed, to take over the property of the Shelbyville Gas & Light Co. and to enlarge and re-equip the plant.

Ligonier, Ind.—The question of constructing a municipal electric light plant is reported under consideration.

**South Bend, Ind.*—The South Bend Fuel & Gas Co. is reported to have awarded a contract to H. G. Christman & Co., for the construction of gas holder on Pennsylvania Ave.

Keosauqua, Ia.—A. W. Carpenter, Box 315, Memphis, Mo., writes that J. W. Andrews, 7 Pine St., New York, N. Y., is engineer for two dams to be constructed over Des Moines River for power purposes, to cost about $500,000. D. Fitzgerald, 80 Wall St., New York, N. Y., is also interested.

Jefferson, Ia.—Percy Gray, Mgr. Jefferson Light, Heat, Power & Water Co., writes that among the improvements contemplated are the installation of one 150-kw., 3-phase alternator, 100 to 200 kw. new 3-phase set, 100 to 200 h.-p. boilers and possibly a heating plant.

Ida Grove, Ia.—The citizens are reported to have voted to grant a 15-year franchise to the Ida Grove Electric Co. to maintain a light and heating plant. The company is said to have in contemplation many new extensions and improvements.

Alma, Kan.—The Alma Light & Ice Co. is making arrangements to install an ice and light plant and give a 24-hour service. W. B. Wilson, Mgr.

Wichita, Kan.—The Wichita Heat, Power & Space Co. is reported formed, with a capital of $250,000, to construct a heat, power and lighting plant for the purpose of encouraging and aiding small manufacturers.

Murray, Ky.—It is stated that bids are wanted for $20,000 water and light bonds. W. D. Wear, City Clk.

Ponchatoula, La.—The Ponchatoula Electric Light Co. expects to be ready to install a new plant in January, the equipment of which will consist of a 60-kw. alternator, a 125-h.p. engine and a boiler of 150 h. p.; also transformers and arc lamps. S. Bowling, Mgr.

Grand Rapids, Mich.—The Grand Rapids-Muskegon Power Co. (A. J. Bemis, Gen. Mgr., Grand Rapids), is reported to have decided to construct a dam at Ox Bow, on Muskegon River, 8 miles north of Croton dam. It will have a 54-ft. head and develop about 15,000 h.-p.

Winona, Minn.—The Winona Ry. & Light Co. is reported to have decided to install a 450-hp. boiler at the power plant.

Minneapolis, Minn.—Archibald S. White, of New York, N. Y., is reported to be owner of the Minnesota Power & Trolley Co., which was formed to utilize the Mississippi River at Otsego and Monticello for the generation of electricity to be conveyed to Minneapolis for commercial purposes. It is said that work on the development will probably be started in the spring.

Houston, Miss.—The citizens are considering increasing the capacity of the municipal electric light plant and will install a 120-kw., 60-cycle, 2,200-volt alternator direct connected. J. C. Arnold, Mgr.

Neosho, Mo.—The Neosho Electric Light Co. is planning to install a 400 or 500-h.p. water tube boiler in its plant. S. W. Carver, Mgr.

Nebraska City, Neb.—The Citizens Gas Co. is reported to have decided to expend $15,000 in improvements.

Grand Island, Neb.—The Grand Island Electric Co. (T. H. Fritts, Mgr.) contemplates increasing the capacity of its plant by the installation of a 300-kw. steam turbo-generator set, cooling tower and pumps complete.

Waynesville, N. C.—The Waynesville Electric Power Co. contemplates developing other water powers and installing more equipment. Engineer, Geo. E. Ladshaw, of Spartanburg, S. C.

Kenmare, N. D.—The Kenmare Light & Power Co. is making arrangements to install a 100-kw. generator and perhaps another boiler. F. W. Amster, Mgr.

**Columbus, O.*—The Bd. of Pub. Service (E. F. McGuire, Secy.) on Nov. 27 awarded to D. W. McGrath, of Columbus, the contract for putting in foundations for boilers and turbines and other work incident to the installation of new machinery in the municipal electric light plant for $11,680.

New Bremen, O.—A. M. Steinebrey, Village Clk., writes that it is proposed to purchase the present lighting plant and transfer same to water works plant.

Cincinnati, O.—The Bd. of Pub. Service is reported to have awarded to the Sun Vapor St. Light Co. the contract for new mantles for the natural gas lamps in the Hyde Park Dist. at 55 cts. for 1,700 single burner lamps and $1.35 for 98 double burners.

**Lebanon, Pa.*—The City Council is reported to have on Nov. 25 awarded contract to the Edison Electric Illuminating Co. of Lebanon for lighting the city for 5 years at $79.92 per year for each arc lamp, and $16.80 for incandescents.

Madison, S. D.—Plans are being considered for increasing the capacity of the municipal electric light plant, which will include the installation of two 80-h.-p. boilers carrying 130 lbs. working pressure, one 65-kw. alternating-current generator with exciter, and also changes on switchboard.

Flandreau, S. D.—We are informed that the Flandreau Water Power Co., with the city, are considering the question of constructing an electric light plant to be run by water power. It is proposed to organize a stock company, and a practical electrical man is wanted to take stock and look over field and estimate probable cost of plant.

Limestone, Tenn.—W. N. Mitchell is reported interested in the construction of an electric light plant.

McKinney, Tex.—R. F. Dowell, City Secy., writes that the citizens on Nov. 26 voted to issue $26,000 bonds for water and electric light extension and park work.

San Saba, Tex.—The San Saba Light, Ice & Bottling Co. (Frank Hall, Mgr.), contemplates installing a gas producer or oil engine to operate the lighting plant.

Amherst, Va.—O. V. Hauger, Secy. Amherst Electric Light & Power Co., writes that the company has been organized, and will in about 10 days decide on size of plant, etc.; propose, if possible, to run plant by water power.

Monroe, Wash.—The Monroe Water & Light Co. proposes making improvements and extensions to its plant and will install a new engine, boiler and generator, and about 4½ miles of line. R. V. Greene, Mgr.

Waterloo, Wis.—Jackson & Jackson, of Madison, are reported to be preparing plans for an extension to the municipal electric light plant, to cost about $10,000.

Hamilton, Ont.—See "Water."

Hamilton, Ont.—The City Council on Nov. 25 passed on second reading two by-laws, one to issue $225,000 bonds for an electric light distribution system, and the other $50,000 for electric pumps for the water works, to be submitted to the ratepayers on Jan. 1 for approval.

Toronto, Ont.—The citizens will on Jan. 1 vote on the question of issuing bonds to the amount of $2,750,000 for a plant to distribute electric power to be supplied by the Hydro-Electric Power Commission of Ontario from Niagara Falls.

Parry Sound, Ont.—The Ontario Ry. and Municipal Board has been asked to approve a by-law of the Town of Parry Sound, providing for the issuance of $20,000 bonds for the purpose of extending and improving the electric light and water works system.

St. Thomas, Ont.—Estimates submitted to City Council on Nov. 26, by Engineer Richards of the Hydro-Electric Power Comn. are said to provide for a distribution plant costing $42,493, making a total annual charge of $4.46 per h.-p., and provides for the construction of two branch lines through the city.

Minnedosa, Man.—We are informed that Jos. Barrett, 573 Dufferin St., Toronto, Ont., is manager of the Minnedosa Power Co., which proposes constructing a water power plant at Minnedosa.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Vallejo, Cal.—The Vallejo & Northern Ry. Co. is reported to have decided to begin construction work in the spring of an electric railway which is to connect Vallejo, Napa Junction, Creston, Cordelia, Suisun, Fairfield, Clement, Vacaville, Winters, Woodland and Sacramento. All franchises and terminal sites together with a large portion of the right of way have been secured. The railway will be standard gauge and about 130 miles long. Power will be obtained from Bay Counties Power Co., and both third rail and trolley will be used. Melville Dozier, Jr., Oakland, Pres. and Engr.; T. T. C. Gregory, Fairfield, Secy., and Geo. S. Lackie, Oakland, Treas.

**Items marked thus give the names of parties awarded contracts.*

Red Bluff, Cal.—The Bd. of Supervisors is stated to have passed the electric railway franchise ordinance applied for by F. S. Granger.

Milner, Idaho.—The Milner & North Side R. R. Co. is reported to have under consideration the construction of an electric railway which, when completed, will connect Milner, Jerome, Wendell and Gooding. It is announced that considerable grading has been done on the line, which is to be 65 miles long. It is planned to erect the power station at Shoshone Falls. Capital, $250,000. D. C. McWatters, Pres.; Fentress Hill, Secy., and Paul S. A. Bickel, Ch. Engr.

Cairo, Ill.—O. C. Macy, Mgr. Cairo Electric & Traction Co., writes that about $150,000 will be expended on improvements, but nothing will be done for the present.

**Gary, Ind.*—The Co-operative Constr. Co., of Chicago, Ill., is stated to hae been awarded the contract to construct the Gary & Interurban Ry.

Keokuk, Ia.—Articles of incorporation of the Keokuk & Columbus Junction Transit Co. are reported filed at office of County Recorder. Capital, $10,000. Directors, J. E. Peterson, Ira W. Wills, W. J. Francey and others.

Dodge Center, Minn.—It is stated that the Dean Patch Electric R. R. Co. contemplates constructing an electric railway through Dodge County.

Goldfield, Nev.—H. G. Merry is reported to be interested in a company which proposes constructing a standard-gauge electric railway from Bonnie Claire station on Tonopah & Goldfield R. R. to their mines, a distance of 50 miles.

Akron, O.—The Akron-Youngstown Electric R. R. Co. is stated to have applied for a charter to construct a line between Youngstown and Akron. Capital, $100,000. Thos. L. Childs, of Akron, is reported interested.

Toledo, O.—The Toledo Railways & Light Co. is stated to have been granted a franchise for a line of tracks on Holland St. and Oakdale Ave. in East Toledo. It will connect the East Broadway and Woodville St. lines of the company and also provide an entrance into Toledo for the Toledo, Tiffen & Fostoria Electric Ry.

Portland, Ore.—The Portland, Eugene & Eastern Ry. Co. is reported incorporated with a capital of $1,000,000, for the purpose of building an electric railway from Portland to Salem, Eugene, Yaquina, Prineville and Ontario, with branches to numerous towns. The total mileage contemplated is more than 800 miles. It is proposed to develop from the Mackenzie, the Santiam and the Deschutes rivers and streams in central Oregon the power necessary for operating the system planned. Incorporators: J. O. Story, J. C. Bracher, Geo. A. Welch, E. M. Hall and John McNary. According to the incorporation papers the following lines of electric road will be built: From Portland to Salem, to Eugene, from which point they will branch out in several directions. A line from Eugene via Springfield and the Mackenzie River valley will extend to Prineville and across the State to Ontario, Ont. Another line from Eugene will tap Yaquina Bay points and lines will also connect Eugene with Florence, Cottage Grove, Corvallis, Wendling, Mehana and Dallas, passing through Lane, Polk and Lincoln counties.

Westchester, Pa.—The Westchester & Wilmington Electric Ry. Co. is reported to have applied to the State Dept. at Harrisburg for the extension of the line along the Westchester and Wilmington turnpike between these two cities, a distance of about 18 miles. Thos. E. O'Connell, of Westchester, Pres.

Huntington, Pa.—It is stated that surveys have been made and all rights of ways secured for the Big Valley Electric Ry. Co., which is building an electric railway to connect Huntingdon Mill Creek, Allenville, Belleville, White Hall, Reedsville and Lewistown, a distance of 32 miles in all. The company is owned and controlled by the Juniata Valley Electric St. Ry. Co., of which R. W. Jacobs is Gen. Mgr.

Greenville, S. C.—The Greenville Interurban Co. is stated to have begun a survey of its proposed electric railway from Williamston to Greenville and is now engaged in securing rights of way for another line, which it proposes to build from Greenville to Spantanburg. John C. Carey, Pres.; C. C. Good, Secy. and Treas.; H. H. Prince, Gen. Man.

Haileybury, Ont.—The Silver Belt Electric Ry. Co. is reported to have been granted a charter for the construction of an electric railway from Latchford north to Cache River, passing through Cobalt, North Cobalt, Haileybury and New Liskeard. The first portion of the road constructed will be between Cobalt and Haileybury. Arrangements are now being made for the granting of a right of way and all necessary preliminaries.

RAILROADS.

Notes Arranged Alphabetically by States.

Washington, Ga.—A petition for charter has been filed with the clerk of Wilkes Superior Court for the Washington & Elberton Constr. Co., with a capital of $75,000, for the purpose of constructing the projected line between Washington and Elberton, Ga., and ultimately to be extended to Hartwell. Incorporators: J. J. Wilkinson, W. THE ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS.

The annual meeting of the Association of American Portland Cement Manufacturers was held at the Hotel Astor, New York, on Dec. 10 and 11. Mr. John B. Lober, who has been president for several years, presided. One new member was admitted, making the list as follows: Aetna Portland Cement Co., Detroit, Mich.; Alabama Portland Cement Co., Demopolis, Ala.; Alma Cement Co., Wellston, O.; American Cement Co., Philadelphia; Alpena Portland Cement Co., Alpena, Mich.; Alpha Portland Cement Co., Easton, Pa.; Alsens American Portland Cement Works, Alsen, N. Y.; Atlas Portland Cement Co., New York; Bath Portland Cement Co., Bath, Pa.; Bonneville Portland Cement Co., Philadelphia; Buckeye Portland Cement Co., Bellefontaine, O.; Buckhorn Portland Cement Co., Philadelphia; Castalia Portland Cement Co., Pittsburg; Catskill Cement Co., Cementon, N. Y.; Chicago Portland Cement Co., Chicago, Ill.; Coplay Cement Mfg. Co., Philadelphia; Dexter Portland Cement Co., Nazareth, Pa.; Diamond Portland Cement Co., Cleveland, O.; Edison Portland Cement Co., Stewardsville, N. J.; Elk Cement & Lime Co., Petoskey, Mich.; Empire Portland Cement Co., Warners, N. Y.; German-American Portland Cement Works, La Salle, Ill.; Glens Falls Portland Cement Co., Glens Falls, N. Y.; Helderberg Cement Co., Albany, N. Y.; Hudson Portland Cement Co., Hudson, N. Y.; Iola Portland Cement Co., St. Louis, Mo.; Ironton Portland Cement Co., Ironton, O.; Kansas Portland Cement Co., Iola, Kan.; Lawrence Cement Co., New York; Lehigh Portland Cement Co., Allentown, Pa.; Louisville Cement Co., Louisville, Ky.; Marquette Cement Mfg. Co., La Salle, Ill.; Thomas Millen Co., Wayland, N. Y.; Nazareth Cement Co., Nazareth, Pa.; Newaygo Portland Cement Co., Newaygo, Mich.; Northampton Portland Cement Co., Stockertown, Pa.; Omega Portland Cement Co., Jonesville, Mich.; Peerless Portland Cement Co., Union City, Mich.; Peninsular Portland Cement Co., Jackson, Mich.; Penn-Allen Portland Cement Co., Allentown, Pa.; Pennsylvania Cement Co., New York, N. Y.; Phoenix Cement Co., Nazareth, Pa.; The Portland Cement Co., Denver, Colo.; Portland Cement Co. of Utah, Salt Lake City; St. Louis Portland Cement Co., St. Louis, Mo.; Standard Portland Cement Co., Napa Junction, Cal.; Sandusky Portland Cement Co., Sandusky, O.; United States Cement Co., Bedford, Ind.; Universal Portland Cement Co., Chicago, Ill.; Virginia Portland Cement Co., Fordwick, Va.; Vulcanite Portland Cement Co., Philadelphia; Wabash Portland Cement Co., Detroit, Mich.; Western Portland Cement Co., Milwaukee; Western States Portland Cement Co., Independence, Kan.; Whitehall Portland Cement Co., Philadelphia; Wolverine Portland Cement Co., Coldwater, Mich.; Superior Portland Cement Co., Charleston, W. Va.; Kosmos Portland Cement Co., Louisville, Ky.

The Association was formed but a few years ago for the purpose of bringing together the manufacturers of

TUCKER & VINTON PANEL, CONCRETE EXHIBITION.

Portland cement for the discussion of problems affecting the entire industry. Prior to its organization there was a feeling of deep distrust by many cement manufacturers concerning their competitors, largely due to a lack of real personal acquaintance. The demand for the material was advancing by leaps and bounds, and those who had been engaged longest in the industry recognized that unless something was done to form the same kind of a trade association that existed in other lines of manufacture conditions would go backward rather than advance. It was also felt that something should be done to spread a knowledge of the rational uses of Portland cement, so as to encourage its legitimate use and discourage any attempts to accomplish the impossible with it. Accordingly the Association has two distinct sides, one for the investigation and discussion of business and technical subjects of interest only to those engaged in the industry, and the collection of statistics after the fashion long followed by the American Steel & Iron Association, and the other for the collection and distribution of information regarding the uses of concrete.

The Association has already issued from its headquarters at 1232 Land Title Bldg., Philadelphia, a large number of bulletins of much value to users of cement. These cover a great variety of subjects, and some of them are complete monographs. It also publishes a small monthly containing a survey of important articles on concrete that have appeared in other journals, along with original contributions. This feature of the Association's work is to be further developed, and Mr. Percy H. Wilson, Assoc. M. Am. Soc. C. E., has been elected secretary of the Association in order to further this purpose as well as to relieve Mr. Lober of much of the detail work he has been carrying. It should be added that those who desire copies of this monthly publication or the bulletins can obtain them by writing to the Association or to any one of its members.

At the convention this week three papers were presented of technical interest. The first of these, by Mr. Wm. A. Aiken, general inspector of materials of the Public Service Commission of New York, First District, was a discussion of the effect of chemical composition and other properties on the strength of Portland cement, continuing the discussions of the same subject which he has contributed to the Society for Testing Materials and other Bodies. The second paper was a report of some investigations made by Mr. Robert W. Lesley and the Henry S. Spackman Engineering Co. These investigations were made to determine the effect of regrinding on set cement and to ascertain what proportion of the total amount of cement was actually affected in the setting process. The paper is one of the most surprising nature, and the investigation, which was made at Mr. Lesley's initiative, seems likely to arouse wide interest. The third paper was an abstract of a detailed report which Mr. Sanford E. Thompson was retained by the Association to make on the design, construction and serviceability of reinforced concrete chimneys. As a result of his examination of many such stacks and a study of their design and construction, Mr. Thompson reports favorably on them, provided they are carefully built and of proper proportions. All these papers will be issued by the Association as soon as practicable.

During the meeting of the Association an important step was taken in the organization of the "Sales Managers' Section" of that body, which has been formed for "the elevation of salesmanship." The officers of the Association are: President, Albert Moyer, Vulcanite Portland Cement Co.; vice-president, J. U. C. McDaniel, Chicago Portland Cement Co.; secretary and treasurer, C. L. Johnson, Castalia Portland Cement Co.; executive committee, R. E. Griffith, Lesley & Trinkle; L. V. Clarke, Lawrence Cement Co.; C. H. Wood, Wolverine Portland Cement Co.; B. F. Affleck, Universal Portland Cement Co.; E. R. Stapleton, Iola Portland Cement Co.; W. P. Corbett, Alsens Portland Cement Co.; P. B. Beery, Sandusky Portland Cement Co.; W. G. Hartranft, Virginia, Buckhorn and Phoenix Portland Cement Companies; Mr. McVay, Western Portland Cement Co.; A. H. Craney, Jr., St. Louis Portland Cement Co., and George G. Sykes, Lehigh Portland Cement Co.

THE PERMANENT EXHIBITION OF THE CONCRETE ASSOCIATION OF AMERICA.

The Concrete Association of America is composed of those who are desirous of encouraging and developing the intelligent and scientific use of concrete, to standardize methods of construction, to promote social intercourse among those engaged in concrete construction and its allied fields, to secure an exchange of views upon subjects of interest, and to collect and circulate accurate and reliable data and information relating to all matters pertaining to and affecting the concrete industry. The work of the Association is largely to be devoted to educating the investing public, architects, engineers and concrete contractors in the scientific, practical and proper use of Portland cement concrete. The members of the Association realized that the very best method of obtaining this end and of advancing the concrete and fireproof building construction was to show those interested what can and has been done.

To follow out this plan the Executive Committee of the Association, some months ago, leased part of the eleventh floor of the Brunswick Building, located in the heart of the building centre of New York City, at Fifth Ave., 26th and 27th Sts. Here it is now installing a permanent exhibition of the various products of concrete, reinforcements, methods of construction, and materials which are closely allied with the concrete and fireproof building industries. It is the first exhibition of its kind in the United States and enough of the exhibits are already in place to make it well worth visiting. Those who have already taken space are: Alpha Portland Cement Co., New York; Whitehall Portland Cement

Co., Philadelphia; Keasbey & Mattison Co., New York; Dillman Fireproof Construction Co., New York; Webber Construction Co., New York; J. W. Rapp, New York; Tucker & Vinton, Inc., New York; M. L. Freeman, New York; Albert Oliver, New York; Turner Construction Co., New York; The American Machinery Co., New York; The N. Y. Concrete Block Co., New York; J. F. Blanchard Co., New York; Dr. Chas. F. McKenna, New York; The American Concrete Steel Co., Newark, N. J.; Voigtmann & Co., New York; Vulcanite Portland Cement Co., Philadelphia; The Expanded Metal & Corrugated Bar Co., St. Louis; Barrett Mfg. Co., New York; The Expanded Metal Engineering Co., New York; Herringbone Metal Lath Co., New York; Toch Bros., New York; Automatic Door & Gate Co., New York; American Mason Safety Tread Co., New York; Pennsylvania Cement Co., New York; Alsens American Portland Cement Works, New York; Engineering News Publishing Co., New York.

The informal opening of the exhibition was on the afternoon of Dec. 11, a date fixed to enable the members of the Association of American Portland Cement Manufacturers to see what the Concrete Association was doing in an educational way. As before mentioned all the exhibits are not yet in place, but enough are installed to form a very interesting collection. A complete description is hardly in order at this time, owing to the unfinished condition of some displays, but a few notes concerning some of the exhibits will indicate the variety of things to be seen.

The Expanded Metal Engineering Co. has arranged its space as indicated in one of the accompanying illustrations. Here the applications of expanded metal can be studied and some excellent concrete works examined. An associated company, the Expanded Metal & Corrugated Bar Co., of St. Louis, exhibits among other things a long bar of concrete containing one of its corrugated bars; this has been cut longitudinally and the bond of the concrete and steel is finely demonstrated.

The Turner Construction Co. displays a large model of the Robert Gair Building in Brooklyn, one of the first large reinforced structures to be erected in Greater New York, which, it might be added, has been so satisfactory that another building like it is now being erected by the same company for Mr. Gair. The model is a fine piece of work, made to scale and so arranged that the inside can be examined with the help of small electric lights. The roof is shown in all stages of construction, and this part of the model is particularly instructive as showing how a reinforced concrete floor is constructed.

Tucker & Vinton, Inc., show some large models of reinforcement in place, together with excellent examples of admirable concrete art work. The accompanying illustration gives a rather poor idea of a beautiful panel, demonstrating what can be done in concrete by the proper co-operation of artist and artisan. The artist who modeled this panel made a careful study of the eagles at the New York Zoological Gardens, and the finished work is vigorous and effective. Attention should also be drawn to some remarkable specimens of color effects in concrete shown by the Vulcanite Portland Cement Co.

Another exhibit that will attract immediate attention is the display of the American Concrete Steel Co. In addition to numerous photographs of structures erected by the company, there are models of its system of floor construction for steel frame buildings and of the built-up frames employed for the reinforcement of beams and girders. The system of floor construction does away with floor beams, and requires only steel girders, an end attained by a special type of reinforcement.

The Barrett Mfg. Co. has on exhibition a number of models showing many types of waterproofing in different stages of construction. The company has been engaged in such work for two generations and in the course of its long experience has evolved certain types of construction which the test of time shows to yield the best results, which are exhibited here.

Mr. Albert Oliver makes a good display in the form of a small structure showing Clinton wire fabric applied to various structural purposes and the General Fireproofing Co. has a similar exhibit.

An entirely different type of exhibit is that made by Dr. Charles F. McKenna, who has made arrangements to instruct the visitor concerning the various testing methods employed to insure the use of nothing but proper cement in a structure. It was a particularly happy thought to have such a display in an educational exhibition, and it was noticeable on the opening day that there was always a group of interested visitors about it.

The secretary of the Association is in constant attendance and from him visitors can always get authentic information regarding any of the exhibits.

The Pond rigid turret lathe, a new design of heavy duty turret lathe, recently designed by the Pond works of the Niles-Bement-Pond Co., is illustrated and described in an attractive catalogue recently issued by this company. The details of the new machine are well illustrated, and the great variety of work for which it is adapted is well shown by illustrations of the lathe engaged in various machining operations.

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS.

The fifty-sixth convention of the American Society of Mechanical Engineers was held in New York, from Dec. 3 to 6, inclusive. It was the first annual meeting of the society at its new headquarters in the Engineering Societies' Building, at 29 West 39th St., and was the largest meeting in the history of the organization. The total registered attendance was 1,332, of which 727 were members and 605 guests. Features of the meeting were a well-attended excursion to the terminals of the Hudson Companies and a trip through their recently completed tunnels under the Hudson River; visits to a new 300-h.p. gas producer power plant at the works of the Watson-Stillman Co., Aldene, N. J., and a lecture on color photography. The last was given by Mr. F. E. Ives, of New York, and included a complete account of the progress of the art to date, and the development of the Lumiere process, with illustrations by stereopticon.

The technical papers presented at the meeting included symposiums on gas engine power development, on foundry practice and on superheated steam, all of which received much attention and aroused considerable discussion. A paper calling forth animated comment was that by Mr. W. B. Russell on "The Apprentice System of the New York Central Lines," which described the lately developed system now in use on this railroad, in which the apprentices are given thorough educational advantages while fully under the shop discipline and environment. The methods and experiences obtaining there elicited numerous references to similar systems in industrial establishments in which satisfactory results have been obtained. The papers on other subjects included one by Prof. W. F. M. Goss of the University of Illinois on "Power Transmission by Friction Driving," in which the results of an extensive series of tests on friction wheels of various compositions are presented, and another by Mr. Jacob H. Wallace, of the University of Colorado on "Cylinder Port Velocities," in which studies of cylinder port proportions for steam engines by valve diagrams were discussed.

The papers on gas power development included: "The Rational Utilization of Low Grade Fuels in Gas Producers," by E. F. Junge, Berlin, Germany; "Duty Test on Gas Power Plant," by Messrs J. R. Bibbins and G. I. Alden; "Control of Internal Combustion in Gas Engines," by Prof. C. E. Lucke, of Columbia University, and "The Evolution of the Internal Combustion Engine," by Sidney A. Reeve. The second was a report on a duty test of a 300-kw. producer gas engine generating unit at the works of the Norton Co., Worcester, Mass., in which bituminous coal is used in the producer, and throws considerable light on the question of operating efficiency and character of service of this type of equipment. The paper attracted much attention and was liberally discussed.

The papers on foundry practice included "The Foundry Department and Department of Engineering Design," by Mr. W. A. Bole, Pittsburg, Pa.; "Moulding Sand," by Mr. A. E. Outerbridge, Philadelphia, Pa.; "Power Service in the Foundry," by Mr. A. D. Williams, Pittsburg, Pa.; "A Foundry for Bench Work," (the new foundry of the Michigan Stove Co.), by Mr. W. J. Keep and Mr. Emmet Dwyer, Detroit, Mich.; "A Volumetric Study of Cast Iron," by H. M. Lane, Cleveland, O.; "Specifications for Iron and Fuel, and Method of Testing Foundry Output," by Mr. R. Moldenke; "The Foundry Cupola and Iron Mixtures," by Mr. W. J. Keep, Detroit, Mich.; "Foundry Blower Practice," by Mr. W. B. Snow, Boston, Mass.; "Patterns for Repetition Work," by Mr. E. H. Berry, New York, and "Some Limitations of Molding Machines," by Mr. E. H. Mumford, Philadelphia, Pa. The first of the papers was of particular interest in showing the interdependence between the foundry and drafting room, and pointed out many classes of design work in which difficulties in obtaining satisfactory castings may be avoided by observance of elementary principles of foundry practice.

The papers on superheated steam were "The Specific Heat of Superheated Steam," by Prof. C. C. Thomas, of Cornell University, and "Engine Design as Adapted for Use of Superheated Steam," by Mr. Max E. R. Toltz, St. Paul, Minn. The former presented the most recent data regarding the specific heat of superheated steam, which have recently been determined by elaborate tests with improved apparatus. The paper by Mr. Toltz was a resume of superheater practice upon locomotives and the tendencies in future designs. Both of these papers elicited extended discussion on topics of all sorts in connection with use of superheated steam, in which numerous favorable and adverse opinions were expressed.

EXHIBIT OF EXPANDED METAL ENGINEERING CO. AT CONCRETE EXHIBITION.

THE NEW BUILDING FOR THE AMERICAN SCHOOL OF CORRESPONDENCE.

The building recently erected for the American School of Correspondence, Chicago, partakes to some extent of the nature of an office building as well as a school. It stands in the immediate vicinity of Washington Park and the Midway Plaisance, of World's Fair fame, now an essential link in Chicago's great boulevard system. In conjunction with the University of Chicago, whose administration offices stand only two blocks away, the school is to be instrumental in making this the educational center of the city. This location dictated for the school a design that would combine in the exterior the picturesqueness appropriate to collegiate architecture and the solidity required in an office building. This scheme has been worked out in the utmost simplicity by the architects, Messrs Pond & Pond, Chicago.

The building contains four stories and basement. The general interior plan is that of the letter E; the return of the east and west wings encloses on two sides an open court, 60 ft. square, walled in at the rear and entered through an arched driveway.

The administrative offices are on the second floor; the remainder of the building is used for the accommodation of the large staff of instructors, editors, and other employees in charge of the various details of the work of the school. An interior telephone system connects all departments. To facilitate the work of the business office and mailing room, several of the latest electrical appliances have been installed, including adding ma-

chines, folding machines, and envelope sealers, all operated by electric power. In the basement are the stock room, the shipping room and the steam heating plant. Electricity is used throughout for lighting purposes. The corridors and larger rooms are equipped with Nernst lamps, the other parts of the building with incandescent lamps. Lavatories with hot and cold water are located on each floor.

On the second floor are the lecture room and the rest room for employees. The lecture room is used as a meeting place for the clubs that have been formed at the works of the Crane Co., the McCormick Harvester Co., and other large manufacturing plants in and near Chicago. At these plants students of the American School have organized, appointed leaders from their own number, and found mutual assistance in studying together. From time to time they meet in the lecture room of the school, where they are provided with instructors, apparatus, and—since most of them come direct from the shop to the school—with a substantial lunch, all for the usual tuition. The school also provides its employees with free coffee and lunch at noon time.

ANOTHER MANUFACTURER OF BIG GAS ENGINES.

As an indication of the rapid development in the manufacture of big gas engines and the importance of the field occupied by this type of prime mover, it is of interest to note that another manufacturer of large Corliss steam engines has actively taken up the manufacture of gas engines, and is bidding strongly for engines in medium and large sizes.

The Wisconsin Engine Co., with works at Corliss, Wis., which has built some very large and successful Corliss steam engines, is building gas engines for all services in sizes from 400 to 5.000 b.h.p. The engines utilize natural gas, producer gas, coke-oven gas or blast-furnace gas in the Otto cycle (four-cycle), and are of the horizontal tandem and twin-tandem double-acting type. This company controls the Sargent patents on internal combustion engines, and has employed Mr. Charles E. Sargent as the engineer of its gas engine department. Mr. Sargent has a wide reputation as an engineer, and in 1898 designed a horizontal tandem double-acting gas engine, which was probably the first of the type, and was a wide departure from the accepted practice of those days, when the most prominent manufacturers of gas engines declared such a type was impracticable and doomed to failure. However, the largest gas engines are of the horizontal, twin-tandem, double-acting, four-cycle type, and with one exception this is the only type in which large units are being built in this country to-day.

The gas engines built by the Wisconsin Engine Co. bear some of the distinctive features of their large Corliss engines, and utilize in design most of the Sargent patents. The design is remarkably simple and embodies features which are of considerable interest to the engineer and power user. There is but one poppet valve for each explosion chamber, and as this is located on the bottom of the cylinder the cumbersome and unsightly air and gas pipes, as well as the stairs, galleries and railings found on most horizontal tandem engines, are entirely eliminated; provision is made for preventing the dangerous pressures caused by possible pre-ignitions, and the engines are started automatically.

Tests of even small Sargent engines show a heat consumption of less than 9,000 B.t.u. per brake horse power hour.

This company has recently shipped some large steam engines to such concerns as the Illinois Steel Co., Jones & Laughlin Steel Co., Packard Motor Car Co., American Sheet & Tin Plate Co., Amoskeag Mfg. Co., New Hampshire Spinning Mills, National Tube Co., City of Milwaukee. Carnegie Steel Co., American Woolen Co., United States Envelope Co., and the Carnegie Natural Gas Co. It takes pride in its reputation for shipping on time, and promises to do as well on gas engine orders.

The air-brake department of the Allis-Chalmers Co., Milwaukee, has recently issued two bulletins, one descriptive of its new type OB pneumatic governor for the control of pressure delivered from motor-operated air compressors, and the other explaining the new type J emergency valve for straight air-brake equipments. The pneumatic governor contains important improvements in general design and arrangement, facilitating inspection and care.

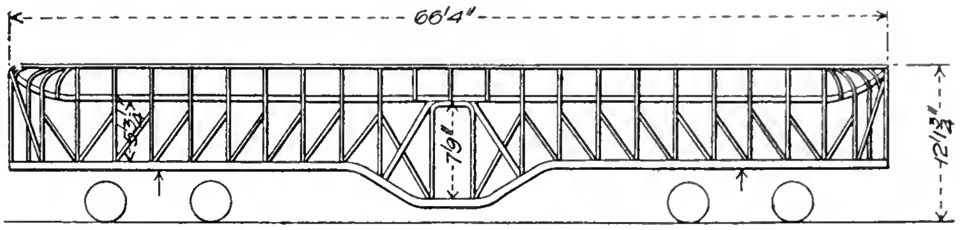
AN UNUSUAL BLUE PRINT.

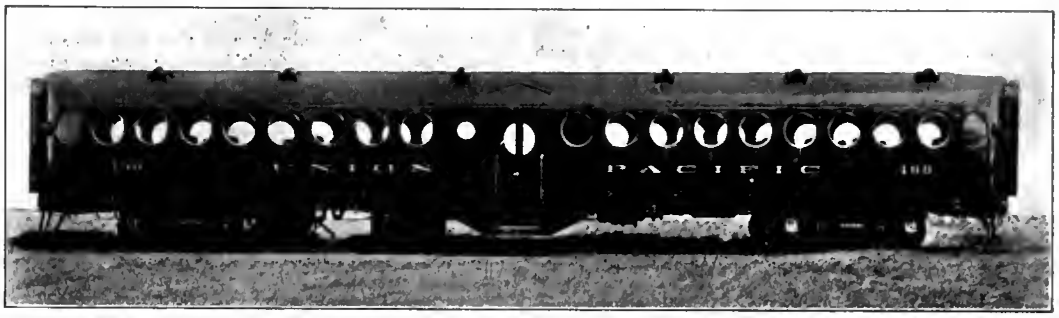
The blue print shown in the accompanying illustration is probably the longest single-piece print that has ever been made. It is 54 in. wide and 120 ft. long and shows the arrangement of offices in the extension of the Capitol at Washington. The 540 sq. ft. of paper in this print is surprisingly uniform in tone, without streaks or other defects. It was made on one of the six Everett-McAdam machines used by the Federal Government and was printed by one man, although it took two men to handle the wet paper during the washing and drying processes. The print was run through a 10-ft. tank, where it was sprayed with water from a hose, and was then hung up in long loops over sticks to dry.

A SINGLE-SHEET BLUE PRINT, 120 FEET LONG.

The machine has also been used to make some very large Van Dyke negatives from which prints having blue lines on a white field are prepared. The machine has a rotating transparent cylinder containing two mercury vapor lamps longer than the cylinder, so as to secure a uniform distribution of the light. The cylinder lies in a series of narrow belts surrounding three-fourths of its circumference; the paper and tracings are fed in between the belts and the glass cylinder, and rotate with the latter. After passing once around they are delivered into a box in the front of the machine. The glass cylinder is 8¼ in. in diameter and 45 in. long for a 42-in. print or 60 in. for a 54-in. print. The machines are made by the Revolute Machine Co., of New York.

THE UNION PACIFIC STEEL CARS.





THE ALL-STEEL CARS OF THE UNION PACIFIC RAILROAD.

With the idea of bettering its present passenger coach equipment and providing greater safety for its passengers and trainmen, the Union Pacific R. R. Co. has designed and constructed at its Omaha shops an all-steel passenger coach that marks a wide departure from the familiar car. The length over vestibule diaphragms is the same as the present standard coach, and only in this respect does the new coach bear any similarity to equipment now in service. A decrease in height from rail to roof of 24 in. marks a very noticeable change from the regular equipment.

The underframing is composed of two 12-in. I-beam center sills, 16 in. apart on centers, and 6x3½-in. angle iron side sills, all securely fastened by cross ties, needle beams and diagonal bracing. The 12-in. center sills are intended chiefly for the buffing and pulling stresses, and do not carry any load, as they themselves are carried by the sides of the car, which are of girder construction. The double-body bolsters, end sills and end bracing of the underframe are made of a one-piece steel casting, 11 ft. long by 9 ft. 9 in. wide, weighing 3,700 lb. each.

On top of the underframing is riveted a course of 1/16-in. sheet steel, forming a fire protection from below. On these steel sheets is a layer of ¾ in. of hair-felt, and on top of this is a flooring of fireproof composition in 3x4-ft. pressed sheets, ½ in. thick, laid on 2x¾-in. nailing strips embedded in the hair-felt. The whole floor construction is securely bolted together by small stove bolts, the heads being let in flush with the top of the floor.

The side posts and carlines are of one continuous piece of 3-in. channel iron, bent in the form of an inverted U, extending from side sill to side sill, forming the contour of the half-oval roof, and extending down to the side sill on the opposite side of car from whence it started.

To these channel-iron posts, which are formed with

flat side outward, is riveted the 15-in. steel side sheathing, which with the posts is riveted to the angle-iron side sills. The steel sheathing extends from the bottom of the side sills to the top of the 4-in. channel side plate, forming a deep substantial girder, which is additionally stiffened by diagonal braces placed below the windows and riveted to the sheathing. Holes 25 in. diameter are cut out of the sheathing to accommodate the circular aluminum window frames.

The interior arrangement differs widely from any present coach. The four entrances, steps, and end vestibules, found in the ordinary coach, have been discarded and a single vestibule at the center of car, with an entrance on each side, has been adopted. This style of entrance proved to be extremely satisfactory in all the gasoline motor cars recently described in this journal. Both ends of the coach are rounded in order to lessen wind and air resistance.

One of the most noticeable features of this new type of car is the system of ventilation. Cottier suction ventilators are placed at intervals on the roof, along each side of the center line. In the fresh air system, air is admitted at the circular ends of the car, about 8 ft. from the rail, at each side of the end train-line doors, through intakes 12 in. in diameter, covered with a fine brass netting; thence downward to an air-tight galvanized sheet iron box beneath car which contains two sets of removable dust-collecting screens, set vertically. After passing through these screens, the air is admitted upward to the inside of car through a galvanized sheet duct having perforations at each seat. Along the outside of this fresh air duct are placed the steam heating pipes, which warm the incoming fresh air to the desired temperature. The amount of fresh air admitted to car is regulated by dampers in the intakes.

The lighting equipment consists of an electric generator on one of the trucks, belted to a pulley on the truck axle. An auxiliary storage battery has been placed in steel boots below the car floor. At each seat is placed an 8-c.-p. lamp, with frosted globe, located slightly above a seated passenger's head, and at the side of the car.

In regard to weight, this 78-passenger coach is lighter than any all-steel coach, with an equal seating capacity or length, ever built. It has a weight per passenger of only 1,145 lb., or 89,300 lb. in all.

The above information has been supplied by Mr. W. R. McKeen, Jr., superintendent of motive power and machinery, under whose personal supervision the coach was designed and built.

THE TATA STEEL PLANT IN INDIA.

It has long been known that valuable deposits of hematite iron ore exist in India, and the late J. N. Tata, a leading merchant and manufacturer of Bombay, spent a large sum in investigations of them. He employed Mr. C. P. Perin, an American engineer, who for two years made extensive examinations and located two distinct fields of superior value. One field, in the state of Majurbang, has large deposits of ore containing from 60 to 62 per cent. of iron. The other field, in the Central Provinces, contains ore yielding from 67 to 68 per cent. of iron. The Hierria coal fields, about 200 miles northwest of Calcutta, are the most important in India and produce coal low in sulphur, suitable for coking. Coke from this field has already been used in the blast furnaces at Barakar, which for several years have been established on a paying basis.

The 28,000-mile railroad system of British India is considerably larger than that of Great Britain, and all of its supplies are now imported from England at a high cost and great inconvenience. Besides the large amount of supplies required for this system, there is now in India a considerable market for structural shapes and other steel products, which was considered sufficient to justify Mr. Tata in the establishment of a local iron and steel industry. The preparations for it were interrupted by his death two years ago. Since then his sons have continued the preliminary work and last year unsuccessfully endeavored to raise the required $7,500,000 capital in England. On this account the enterprise was temporarily delayed, but during the past summer the native Indian capitalists became so much interested that they have subscribed the entire amount of capital required, and the Tata Iron & Steel Co., Ltd., has been formed to construct and operate a large iron and steel plant designed on the most modern lines.

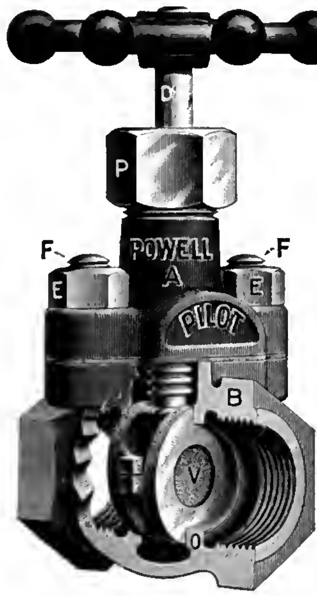
Strenuous efforts were made by English and European engineers to secure the design and construction of these important works, a contract which was, however, awarded to the engineering firm of Julian Kennedy, Sahlin & Co., who have been retained to make all designs and to purchase and inspect machinery and materials, and to supervise the erection of a complete iron and steel plant of a capacity of 120,000 tons a year, which will be located at Sini Junction, on the Bengal and Nagpur Railway, 171 miles west of Calcutta.

The plant will include two blast furnaces, each of a capacity of 200 tons per day, basic open hearth steel furnaces, blooming mills, rail mills, merchant bar mills, foundries and shops, in addition to extensive water-works and coke ovens. The distinctive features will be the use of standard well-tried plans modified to meet difficult local and climatic conditions. The machinery and plant will, of course, be mainly purchased in America and Europe.

The work of constructing an industrial village and suitable bungalows for engineers and foremen is already under way. The Indian Government has undertaken to give to the new plant favorable freight rates for incoming and outgoing material and to construct and equip at its own expense a broad gauge railroad from the iron mines to the works, the latter being already connected by rail with the coal mines. The Indian Government has also guaranteed an order of 200,000 tons of rails distributed over a ten-year period.

Labor in this district is plentiful and exceedingly cheap and is sufficiently intelligent to be trained to operate this plant, as is demonstrated by the fact that for several years Tata & Co. have operated what is said to be the largest cotton factory in the world, the Empress mills, at Nagpur, exclusively with native labor, staff and officers. These mills have proved to be exceedingly profitable and are well organized. The native workmen are, however, very weak physically, and every effort will be made to substitute machinery for manual labor. As the cost of raw materials assembled in the plant is very low, the project will be started under very favorable auspices.

The project is of great importance, both for its intrinsic magnitude and as the commencement of what will probably be a large Oriental development, making it specially gratifying that it should be executed and controlled by American engineers, especially by a firm of such wide experience. Mr. Julian Kennedy, it is hardly necessary to say, has been connected with much of the most important iron and steel work in Pittsburg and throughout this country.



A NEW PILOT GATE VALVE.

Mr. Axel Sahlin, who has been for several years the head of the firm in Europe, was formerly superintendent of the Maryland Steel Co., and afterward consulting engineer for the Brown Hoisting & Conveying Co., Cleveland. He is now in this country in conference with Mr. Kennedy for the organization of the plant.

THE PILOT GATE VALVE.

The Pilot iron-body gate valve is another addition to the long list of steam specialties manufactured by the Wm. Powell Co., Cincinnati. The body has heavy lugs on either side of the neck, carrying stud bolts *F*. The bonnet cap *A* has corresponding lugs drilled to template, which insures constant alignment at all times and also allows the bonnet to be replaced without unusual care after taking apart. The semi-finished hexagon nuts *E* large enough to admit wrenching down hard, with a joint of the best packing material between the faces of bonnet and body, make a joint which the makers state is tight for all pressures up to 100 lb. The large brass packing nut *P* affords room for packing material to prevent leakage around the stem. The brass steam *D* and bonnet are chased and cut to a true Acme thread of unusual length, which is considered the best for wear. The long thread has been provided to keep the steam in a true axial position at all times whether open or closed. The knobby hand wheel is furnished to give a firm grip, even when the hand is oily.

The discs are double, with ball and socket back, making them adjustable, and are hung in recesses to the collar on the bottom of the stem. The discs, working in a tapering seat, expand or collapse in opening or closing, in order that the valve may close tight without straining or open easily, no matter what the conditions may be.

The Pilot gate valve is also made wholly of iron without any brass used in its construction anywhere. This all-iron valve is intended for controlling ammonia, cyanide solutions, acids and other liquids or gases that attack brass.

BUSINESS NOTES.

The marble and monument works of Benisch Bros., New York, have recently purchased a Northern crane of 71-ft. span, 15-tons capacity, with 5-ton high-speed auxiliary hoist. This crane was furnished by the Northern Engineering Works, of Detroit.

The Bury Compressor Co., Erie, Pa., has recently shipped to the Navy Yard at Brooklyn a steam-driven air compressor for the "Panther," which is to sail with the Pacific squadron. The company has also received orders from the Japanese navy for one 350-ft. belt-driven compressor, and from the Navy Department of France for a direct connected motor-driven compressor.

Goff, Horner & Co., Ltd., Frick Bldg., Pittsburg, Pa., have taken over the sole sales agency in the United States of the Cummings system of concrete reinforcement, and are looking for agents in the large cities. Mr. A. C. Kuester, formerly with The Scofield Co., contractors, Philadelphia, has recently taken charge of agencies, his office being in the Frick Bldg., Pittsburg.

The new electric generating units in the addition to the Lincoln Wharf station of the Boston Elevated Ry. Co., are two Allis-Chalmers direct current railway type of 2,700 kw. each. They are multi-polar compound-wound and are driven by 42 and 90x60-in. engines, which run at 72 r.p.m.

In 1900 the Tonawanda Iron & Steel Co., of North Tonawanda, N. Y., installed a 4,000-h.p. We-Fu-Go water softening and purifying system. Since that time it has been necessary to open the boilers only once a year for washing out and inspection. They have just placed a second order with Wm. B. Scaife & Sons Co., of Pittsburg, Pa., for an addition to their present system, to take care of increased boiler capacity of 4,000-h.p., making a total of 8,000 h. p. Among the recent orders taken by Wm. B. Scaife & Sons Co. for We-Fu-Go water softening and purifying systems are the following: Rochester & Pittsburg Coal & Iron Co., Walston, Pa., 1,250 h.p., (fourth order); Clearfield Bituminous Coal Corporation, Rossiter, Pa., 1,800 h.p.; Wickwire Steel Co., Buffalo, N. Y., 4,000 h.p.; Union Brewing Co., Sharon, Pa.., 500 h.p.; Saratoga Textile Co., Saratoga Springs, N Y., 2,400 gal. per hour; American Sheet & Tin Plate Co., Cambridge, O., 2,000 h.p.; People's Brewing Co., Terre Haute, Ind., 700 h.p.; and a 500-h.p. Scaife system for George J. Renner, Jr. Brewery, Youngstown, O.

PERSONAL NOTES.

Mr. Julian Kendrick has been re-elected city engineer of Birmingham, Ala.

Mr. Arthur O'Brien, a member of the Fort Orange Construction Co., of Troy, N. Y., has been apppointed city engineer of Utica, N. Y.

Mr. L. M. Muzzy has been appointed an assistant division engineer in the maintenance of way department of the Boston & Albany R. R.

William H. Ward, a well-known contractor of Lowell, Mass., was struck by a derrick boom and instantly killed, recently. He was 78 years old.

Robert Augst, chief engineer of the Duluth & Iron Range R. R., Duluth, Minn., and an authority on iron ore dock construction, died recently aged 60 years.

All offices connected with the Stone & Webster organization in Boston have been collected in the company's building at 147 Milk St. corner of Batterymarch St.

Prof. J. P. Jackson, who has charge of instruction in electrical engineering at the Pennsylvania State College, has been appointed dean of the School of Engineering there.

Mr. R. O. Jones, formerly chief engineer of the Jeanesville Iron Works, Hazleton, Pa., has become chief engineer of The Dayton Hydraulic Machinery Co., Dayton, Ohio.

One of the new members of Congress, Mr. George W. Gordon, of the Tenth district of Tennessee, is a civil engineer. He rose to the rank of brigadier-general in the Confederate army.

Mr. Carl C. Witt has resigned as assistant engineer of the Pierre & Fort Pierre Bridge Ry., to become chief engineer of the South Dakota R. R. Commission, with headquarters in Sioux Falls, S. D.

Mr. James Logan, one of the most active trustees of the Worcester Polytechnic Institute, has been elected mayor of Worcester, Mass., He is the first vice-president and general manager of the United States Envelope Co.

Mr. William J. Moore, assistant professor of electrical engineering at Stevens Institute, Hoboken, N. J., has resigned to accept a professorship in the North Carolina State College of Agriculture and Mechanical Arts.

Mr. Thomas Appleton, superintendent of construction, U. S. Public Buildings, Supervising Architect's Office, has been transferred from Evanston, Wyo., to the supervision of the new post-office and court house building at East St. Louis, Ill.

Mr. James Douglas, vice-president of the American Institute of Mining Engineers, has given to the United

States Government four acres of land on the Palisades of the Hudson, including the site occupied by Fort Lee in Revolutionary times.

Capt. Robert R. Raymond, Corps of Engineers, U. S. A., in command of Company K, third battalion of Engineers, has been ordered to Denver, Col., as chief engineer officer of the Department of the Colorado, to relieve First Lieut. George R. Spalding.

Gen. Cyrus B. Comstock, Corps of Engineers, U. S. A., has given to the National Academy of Sciences, of which he is a member, the sum of $10,000, the income from which is to be devoted to the advancement of knowledge in magnetism, electricity and radiant energy.

Mr. Austin Lord Bowman, consulting civil engineer, has been appointed consulting engineer to the Department of Bridges of New York City, succeeding Mr. Henry B. Seaman, who recently resigned to become chief engineer of the New York Public Service Commission, First district.

Mr. L. D. Hadwen, assistant engineer, Chicago, Milwaukee & St. Paul Ry. Co., bridge and building department, has been appointed acting engineer of masonry construction in place of Mr. J. J. Harding, who has been assigned to other duties in connection with the Pacific Coast extension.

Prof. Wm. H. Burr and the engineers of the Department of Bridges of New York City, are being congratulated on the approval this week by the Municipal Art Commission of the plans for the Henry Hudson Memorial bridge described at length in the current news supplemen of this journal for Nov. 16.

The fortieth annual convention of the American Society of Civil Engineers, will be held in Denver, Col., beginning on Tuesday, June 30, and ending Friday, July 3, 1908. The first meeting of the society for 1908 was scheduled to be held on New Year's Day. By action of the board of direction that meeting will be held one week later on Wednesday, Jan. 8, 1908.

Charles Philo Matthews, professor of electrical engineering and director of the electrical laboratory at Purdue University, Lafayette, Ind., died at Phœnix, Ariz., Nov. 23, aged 40 years. He was widely known for his contributions to scientific knowledge, his chief work being an investigation of photometric standards for arc lights. He was collaborator in the production of text books in physics and electricity with Professors Nichols and Shearer, of Cornell University, and with Prof. Esterline, of Purdue University, and he also published a number of papers on electrical subjects.

At the meeting of the American Society of Civil Engineers Dec. 4 the following were elected to membership: As members—A. L. Black, Engr., New Orleans Ry. & Light Co., New Orleans, La.; Francis Blossom, member of firm of Sanderson & Porter, Engrs. and Contrs., New York City; W. C. Boyd, Asst. Engr., Pittsburg Railways Co., Pittsburg, Pa.; G. R. G. Conway, Chf. Engr., Monterey Water Works and Sewer Co., Ltd., and Monterey Ry., Light & Power Co., Ltd., Monterey, Mex.; S. F. Crecelius, U. S. Engr. Office, Louisville, Ky.; L. N. Farnum, Gen. Mgr. of Constr., J. G. White & Co., New York City; James B. Goodwin, senior Asst. Res. Engr. of Constr., McCall Ferry Power Co., McCall Ferry, Pa.; R. H. Ober, Engr. of Columbia River Bridge at Beverly, Wash., Chicago, Milwaukee & St. Paul Ry. Co., Vulcan, Wash.; Umesaburo Ogawa, Prof. of Civil Engineering, Kyoto Imperial Univ., and private practice, Kyoto, Japan; E. J. Pearson, Chf. Engr. Chicago, Milwaukee & St. Paul Ry., Pacific Extension, west of Butte; Julius Pitzman, Surv. and Civ. Engr., St. Louis, Mo.; Henry Souther, Pres. and Treas. The Henry Souther Eng. Corporation, Hartford, Conn.; C. C. Wilson, Wilson Sompayrac & Urquhart, Engrs. and Archts., Columbia, S. C. As associate members—M. A. Ananthalwar, Asst. Engr., Channapatna Sub. Div. of Bangalore Div., Mysore Public Works Dept., Channapatna, Mysore, India; C. N. Bennet, Chf. Engr. and Supt. of Constr., Webster, Monessen, Belle Vernon & Fayette City Street Ry. Co. and West Side Electric Street Railway Co., Charleroi, Pa.; J. A. Donahey, Res. Engr., Lake Shore & Michigan Southern R. R., Darrowville, Ohio: T. C. Fischer, Asst. Engr., Central R. R. Co. of New Jersey, Elizabeth, N. J.; J. C. Fruit, Asst. Mgr. American Plant, American Bridge Co., of New York, Chicago, Ill.; H. T. Griswold, in office of Gen. Mgr. of Constr. J. G. White & Co., New York City; A. F. Hartman, Asst. Engr. and Chf. Draftsman for Geo. F. Hardy, Mill Archt. and Hydr. Engr., New York City; H. P. Hoyt, Draftsman and Asst. Engr., with H. S. Ferguson, Millinocket, Me.; C. W. Killam, Chf. Engr., Peabody & Stearns, Archts., Boston, Mass.; E. K. Knight, with Cuban Govt. as Engr. in charge of constr. of water supply system for city of Camaguey, Cuba; M. J. Leahy, Engr. in charge of construction, Champion Coated Paper Co., Hamilton, Ohio; R. J. Middleton, Asst. Engr., Bridges and Buildings, Chicago, Milwaukee & St. Paul Ry., Ottumwa, Ia.; Ray Murray, Res. Engr. Poughkeepsie Bridge, Poughkeepsie, N. Y.; C. H. Quimby, Jr., Res. Engr., New York, Westchester & Boston Ry. Co., Mt. Vernon, N. Y.; J. P. Richmond, First Asst. to Prin. Asst. Engr., Executive Div. Board of Water Supply, New York City; R. H. Stearns, Asst. Engr. Designer, New York Board of Water Supply, New York City; George Sykes, Civ. Engr. and Building Contr., New York City; H. E. Van Ness, Asst. Engr., Central R. R. Co. of New Jersey, Little Falls, N. J.; S. J. Van Ornum, City Engr., Pasadena, Cal.; E. B. Wardle, Asst. Engr. for Geo. F. Hardy, Mill and Hydr. Engr., New York City; H. W. Woodcock, Civ. Engr. and City Surv., Brooklyn, N. Y.; A. M. Zabriskie, Asst. Engr., Central R. R. of New Jersey, Plainfield, N. J.

TRADE PUBLICATIONS.

The Berger Mfg. Co., Canton, O., has recently issued a pamphlet on sheet metal building material which it manufactures from the ore to the storehouse. The variety of materials supplied is very extensive, including all kinds of metal roofing, eaves troughs, conductor pipes, cornices, ridging, finials and other exterior metal work, and all kinds of interior metal finish such as metal ceilings, wall covering, metal lath and construction materials. A specialty is also made of metal window frame and sash, skylights, and steel filing devices, lockers and other fireproof furniture for offices.

A well-prepared catalogue of the truss method of reinforcement has just been published by the Truss Metal Lath Co., 147 Fourth Ave., New York. The truss metal lath and Kuhne's clinch lath are referred to in considerable detail and simple and economical methods of construction of partitions and hanging ceilings, by the use of these forms of lath are suggested. A set of specifications is included in the catalogue and instructions are presented for the use of temporary studding in erecting partitions, the insertion of gas pipes and conduits in the center of thin partitions, fastening to door and window bucks, forming corners and similar work. A report is given of fire and water tests made of this partition construction, which has been approved by the New York building department, and there are illustrations of a large number of installations in which the lath is used, including concrete fencing reinforced with the truss lath.

The use of lifting magnets for the rapid handling of materials is discussed in a 32-page pamphlet just issued by the Cutler-Hammer Clutch Co., of Milwaukee, which contains a number of full-page illustrations showing lifting magnets handling pig iron, steel stampings, castings, scrap and other material, together with diagrams, data on current consumption, and information on lifting capacity of magnets. A new cable take-up device is also described and reference is made to the Cutler-Hammer system of control by which the strong kick which occurs when the circuit is suddenly opened on a magnet coil, is automatically shunted to a discharge resistance, thus protecting the magnet insulation by dissipating the energy of the induced voltage outside of the coil itself.

The General Electric Co., Schenectady, N. Y., has recently issued two bulletins of particular interest on heavy electric traction, one concerning the electrification of the West Shore R. R. between Utica and Syracuse, and the other on the electric locomotive in heavy passenger and freight work. The former is a well-illustrated pamphlet of 24 pages describing the entire electrification equipment and shows typical third rail and overhead line construction, trains, substations and operating train sheets that well indicate the increase in traffic over steam operation with the same track capacity. The pamphlet on electric locomotives illustrates a number built by this company and several proposed types, the entire group embracing a series ranging from 17 to 150 ton units and adapted for all classes of service.

Recent bulletins of the Electric Storage Battery Co., Allegheny Ave. and 19th St., Philadelphia, Pa., explain the use of the storage battery in connection with alternating-current power transmission, one describing an installation of 275 type R-33 chloride cells at one of the substations of the Spokane & Inland Empire System in Washington, and the other describing apparatus furnished for use in alternating current regulation. The operation of the split-pole variable ratio convertor and of the carbon regulator are explained. As a result of the installation on the Inland Empire System, it is stated that the bills for power, which is purchased from the Washington Water Power Co., have been reduced by one-half.

The Ashcroft prismatic water gauge for indicating boiler water levels is described in a recent pamphlet issued by the Ashcroft Mfg. Co., 85 Liberty St., New York. The gauge utilizes a special flat glass of peculiar quality, little affected by changes of temperature, which is enclosed in a metal chamber so designed as to appear black in the portion below the water level, while taking on a silvery appearance above. The water level indications are stated to be exceptionally clear and this design ensures almost entire freedom from glass breakages.

The Oswego Boiler & Engine Co., Oswego, N. Y., has issued a revised edition of its catalogue on the Oswego-McNaull water-tube boilers. This is of the steel header type with straight tubes and longitudinal drums, and is so designed that it may be shipped in sections and erected in the field without driving rivets. The details of construction and the advantages of the principal features are explained, and data added relative to the horse power and principal dimensions of the various sizes of units built. It is stated that nearly 200,000 h.p. of these boilers are now in operation.

Power pumps and paper mill machinery are listed in a catalogue lately issued by the Sandusky Foundry & Machine Co., Sandusky, Ohio. The line of pumps embraces single-acting types ranging in capacity from 3 to 1,000 gal. per minute and for pressures from 50 to 5,000 lb., and double-acting pumps of 500 to 2,500-gal. capacity and for pressures from 40 to 350 lb. In this line are also included vacuum pumps and stuff and sewage pumps and a series of low-pressure multiple-cylinder pumps for tank purposes. In paper machinery revolving suction rolls, centrifugal screens and the Millspaugh shower pipe system are shown.

A booklet on slag and its uses has been published by Emanuel & Co., Catasauqua, Pa., in which there is an extended discussion of the use of slag for concrete. The properties necessary in slag for successful use in concrete are pointed out and a large number of slag concrete works are referred to. The use of slag for fireproofing is explained, and underwriters' tests of structures constructed of this material are quoted. Other uses of slag mentioned are for paving, road making and roofing, it being considered preferable in many ways to gravel for covering. The pamphlet is profusely illustrated.

A catalogue of valves and fittings for ammonia has been issued by the Crane Co., Chicago, Ill., embracing an extensive line of special equipment for use in connection with refrigerating machinery. There are included globe angle and cross valves, expansion valves, check valves and all types of fittings and flanges, including the special return bends for condenser construction. A specialty is made of Boyle unions and brine cocks. Forty pages of the book are devoted to tables of properties of ammonia and other data used in connection with the design and operation of ammonia refrigerating equipments.

The eighth edition of the catalogue of the Eugene Dietzgen Co., 181 Monroe St., Chicago, is a well bound volume of 473 pages, measuring 5¼ x 8¼ in. Drawing materials and surveying instruments in great variety to suit all conditions and tastes are described and illustrated. Gem Union and Richter drawing and Dietzgen surveying instruments receive especially good attention. The excellent illustrations and full descriptions will make the book of value to those who are selecting drafting room equipment and engineers' supplies.

The Ferro-Concrete Construction Co., Cincinnati, has sent out a cover for binding the bulletins which it issues from time to time, describing its work. Separate bulletins are issued for different classes of work. Among the bulletins received are those on office buildings, theatres and hotels, factory buildings, footings, piers, retaining walls, stacks and tanks, tests of floors, and a reprint of an article on the 16-story reinforced concrete Ingalls Building in Cincinnati

The Gould Storage Battery Co., New York, has recently issued two bulletins, referring to the use of storage batteries in electric railway systems. One contains a comprehensive description of an installation of two 240-ampere-hour batteries on the line of the Dayton & Western Ry. for use in connection with the railway's power distribution system, and the other a 400-ampere-hour battery in connection with the alternating current distribution of the Rutland Railway, Light & Power Co.

A pamphlet has been issued of the Liberty Manufacturing Co., 6.910 Susquehanna St., Pittsburg, Pa., describing the flue cleaners, water strainers, oil purifier, and the blow-off valve manufactured by this company. The flue cleaners include a heavy-duty type for use in tubes carrying heavy scale, the Liberty standard cleaner, the Liberty pneumatic cleaner and the Niagara cleaner of the turbine type. The Faber blow-off valve has a steam jet for cleaning the seat of the valve of scale and sediment before the disc seats itself firmly.

Bruner steel wagons, all parts of which, including the wheels and the box, are made of cold pressed steel, are described in a small folder from The Bruner Steel Wagon Co. Wapakoneta, O. They are used for farm work, trucking, logging and general purposes, and not only present a neat appearance, but are said to be lighter than wagons of similar size made of wood. The wheels are made of two circular cone-shaped discs with flanged edges which are forced into the tire under great pressure by a hydraulic press. Holes are punched through the tire and the flanges of the discs and the parts riveted together, the rivets being countersunk on the outside of the tire.

The Rathbun vertical gas engines are described in a well-illustrated catalog recently issued by the S. M. Jones Co., Toledo, O. This company has built engines for use with producer or natural gas since 1896. It has developed many refinements of details in two or three cylinder vertical types and has recently perfected a six-cylinder engine which it especially recommends for use with 60-cycle alternating current electrical generators to be operated in parallel.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Phoenix, Ariz.—New bids will be received on Jan. 10 by Robt. A. Craig, Supt. Water Dept., for laying c. i. water pipe, as advertised in The Engineering Record.

*Bids were opened on Dec. 1 for furnishing material for water works construction, and contracts are reported to have been awarded as follows: For pipe, to the American Cast Iron Pipe Co., Birmingham, Ala., $86,747; specials, same company, at $65 per ton; hydrants, R. D. Wood & Co., Chicago, Ill., $4,512, and valves and boxes, the Ludlow Valve Mfg. Co., Troy, N. Y., $5,748.

Los Angeles, Cal.—This city is reported to have purchased property at head of San Fernando Valley as a site for the twin storage reservoirs for the waters of the Owens River. At this end a dam half a mile long and 130 ft. high will be built; 4,000,000 ft. of earth must be removed, at an expense of $500,000. The volume of water stored will be 10,000,000,000 gal.

Oakland, Cal.—Mayor Mott has signed the ordinance appropriating $40,000 toward the construction of a salt water plant for auxiliary fire protection. The system as projected contemplates mains through the business section of the city and the utilization of the main lake sewer, a 6-ft. aqueduct connecting Lake Merritt with San Francisco Bay, traversing 22d St., and a reservoir for salt water. The whole plant is to cost about $100,000. The $40,000 appropriated is placed at the disposal of the Bd. of Public Works, with which to commence the construction of the pumping plant at the Willows, on the shore of Lake Merritt. Any surplus is to be used for the laying of mains.

Mokelumne Hill, Cal.—A. E. Shaw, of Berkeley, is reported interested in the organization of the Mokelumne Water Co., recently formed, to take over a plant in Calaveras County. The company is said to have a capital of $1,500,000 and will expend a large sum in refitting and repairing the property, building dams and making other improvements.

Johnstown, Colo.—The citizens are reported to have voted to issue $20,000 bonds for the construction of water works.

Las Animas, Colo.—W. R. Murphy, City Engr., writes that bids will be called for about Feb. 1 for the construction of water works, to cost about $67,000.

Macon, Ga.—C. K. Lawrence, of Savannah, Ch. Engr. of the Central of Georgia Ry., is reported to have prepared plans for the construction of a water plant at the railway shops; estimated cost, $30,000.

Twin Falls, Idaho.—The Twin Falls Salmon River Irrigation Co. is reported incorporated with a capital of $500,000, by I. B. Perrine, H. L. Hollister, Robt. McCullom and others, to construct a reservoir system to cost about $2,500,000. The water is taken from Salmon River after being stored in a reservoir that will hold 350,000 acre feet. The dam will be 70 ft. across at the bottom and will be 200 ft. high; a tunnel will be driven from the lava wall of the river, located at a point 75 ft. below top of the dam, a distance of 3,000 ft. The tunnel will open directly upon the land to be irrigated and will require no canals other than for distribution of water. Near the head of the river a reinforcing reservoir is to be installed. Title to a section of land has been secured 17 miles southwest of Twin Falls near center of new tract, upon which the town of Hollister will be located. A telephone and power line has been surveyed from Twin Falls and work on the same will begin at once. J. E. Hayes, the engr. who laid out Twin Falls, will begin at once the work of laying out the town of Hollister.

**Chicago, Ill.*—We are informed that the contract for furnishing 5,300 tons c. i. water pipe (bids opened Dec. 7) has been awarded to U. S. Cast Iron Pipe & Fdry. Co. at $27.20 per ton.

Rockton, Ill.—Geo. C. Morgan, of Chicago, is reported to be preparing plans and estimates for water works; probable cost, $17,000.

Evanston, Ill.—The Bd. of Local Improv. has ordered ordinance prepared for laying 6-in. water main in Milburn St.; estimated cost, $2,772. Ready for letting about April 1, if confirmation is had in court.

Claremore, Ind. Ter.—G. W. Chalfant, who will be Supt. in charge of construction of proposed water works improvements, writes that bids will probably be called for in about 2 weeks from plans of Burns & McDonnell, Scarritt Bldg., Kansas City, Mo.; probable cost, $35,000. W. P. Johnson, City Recorder.

Baltimore, Md.—Bids will be received until Dec. 18 by the Bd. Awards (J. Barry Mahool, Pres.) for furnishing and delivering to the Water Bd. supplies for the year ending Dec. 31, 1908, including lumber, brick, cement, c. i. work, lead-lined iron pipe, c. i. pipe and fittings, brass castings, water meters, hauling pipe, pipe fittings, etc. Alf. M. Quick, Water Engr.

**Cumberland, Md.*—Fred M. Prescott, of Milwaukee, Wis., is reported to have secured the contract for furnishing and installing complete at the water works a 5,000,000-gal. pumping engine for $23,410.

Boston, Mass.—See "Miscellaneous."

Belchertown, Mass.—The Bd. of Selectmen and the Water Supply Com. are reported to be considering the question of procuring a water supply for fire and domestic purposes.

Marion, Mass.—Louis E. Hawes, 101 Tremont St., Boston, is reported to have been appointed as engineer of construction of the proposed water-works, and is now making surveys for same.

Blandford, Mass.—C. A. Tinker, of Springfield, has been selected to make surveys and estimates looking to the construction of water works. It is proposed to petition State Legislature for permission to issue $20,000 bonds for the purpose. Rev. S. G. Wood, Secy. Water Com.

St. Paul Park, Minn.—Bids will be received by W. H. [illegible], Village Recorder, until Dec. 27 for the construction of water works, consisting of about 2 miles of c. i. distribution pipe line system and 75,000-gal. steel tank and steel tower; probable cost, $22,500. Engineer, Oscar Claussen, German-American Bank Bldg., of St. Paul.

St. Louis, Mo.—The question of constructing a water system for fire protection is under consideration; probable cost $2,000,000. Benj. C. Adkins, Water Comrs., 312 City Hall.

Harlowton, Mont.—See "Power Plants, Gas and Electricity."

Lincoln, Neb.—The Water Com. is reported to be considering the question of an improved water supply.

Orange, N. J.—Bids will be received until Jan. 1 by the Common Council for suction and delivery pipe connections of pumping engine at the Chestnut St. Pumping Station; also bids for steam and feed water piping at the Chestnut St. Pumping Station. Willet B. Gano, City Clk.

Jersey City, N. J.—C. H. Van Keuren, Ch. Engr. Street and Water Comrs., is reported to have been authorized to prepare plans and specifications for two 36-in. pipes under Hackensack and Passaic Rivers; estimated cost $100,000.

Albany, N. Y.—City Comptroller Howard N. Fuller will receive bids until Dec. 11 for $100,000 water bonds.

New York, N. Y.—Bids will be received by the Comr. Water Supply, Gas and Electricity until Dec. 18 for furnishing, delivering and constructing gate vaults for the high-pressure pumping stations located at Gansevoort and West Sts. and at Oliver and South Sts., Boro. Manhattan.

Albion, N. Y.—The taxpayers are reported to have voted in favor of appropriating $500 to locate a pure and adequate water supply.

Mt. Olive, N. C.—See "Sewerage and Sewage Disposal."

Burlington, N. C.—A. F. Barrett, Mayor, writes that the citizens on Dec. 3 voted to issue $100,000 bonds for constructing water works and a sewerage system.

Worthington, O.—Bond S. Neff, of Powell, who was recently granted a franchise for water works at Worthington, writes that bids will be received about Apr. 1 for construction, to cost about $35,000.

Anadarko, Okla.—See "Power Plants, Gas and Electricity."

Enid, Okla.—See "Sewerage and Sewage Disposal Plants."

Philadelphia, Pa.—The Council's Water Com. on Dec. 5 approved the Water Bureau's budget for next year, calling for an appropriation of $3,420,667. Included in that amount was $1,700,000 for improvement, extension and filtration of the water supply.

According to local press reports, it is proposed to supply the entire city with filtered water by the spring of 1909. Only three contracts are yet to be let before every unit will be in working order. These are for coal handling machinery at the Lardner's Point pumping station, the preliminary filter wash pumps and the shelter houses and administration building at Torresdale. Fred C. Dunlap, Ch. Engr., Water Bureau.

**Manila, P. I.*—J. F. Case, Ch. Engr., Dept. Sewer and Water Works Construction, writes that the following are the totals of bids opened on Sept. 14 for valves and sluice gate for use in gravity system of water works: Findlay & Co., of Kilmarnock, Scotland, with office at Manila, $5,417 (awarded contract); Manuel Earnshaw & Co., $6,646; Fred Wilson & Co., $6,804; Frank Strong, $5,699, and Henry W. Peabody & Co., $6,253 (bidders all of Manila).

Columbia, S. C.—It is proposed to lay a double 8-in. main along Main St. from Richland to Gervais St., at a cost of about $12,000.

Teague, Tex.—W. R. Boyd, Jr., Mayor, writes that an election will be held on Jan. 2 to vote on issuing bonds for the construction of water works.

Childress, Tex.—Jos. H. Aynesworth, City Secy., writes that the proposed water works will cost about $15,000. Plans and specifications have not yet been prepared.

Bronte, Tex.—It is reported that plans and specifications are being prepared for the construction of water works.

Salt Lake City, Utah.—City Engr. L. C. Kelsey is reported to have recommended that a 5,000,000-gal. reservoir be built at the intake in the City Creek Canyon.

Puyallup, Wash.—See "Sewerage and Sewage Disposal."

Odessa, Wash.—W. M. Nevins, Town Clk., writes that about $15,000 will be expended for water-works improvements. Engr., W. M. Schoonover, of Odessa.

Seattle, Wash.—R. H. Thomson, City Engr., has made the following estimates: Phinney Ave., connecting fire hydrants to existing mains, $20,200; East Olive St., water mains, $19,700, and Bagley Ave., grading, $27,400.

An ordinance has been passed providing for the construction of a salt water fire protection system and pumping plant, to cost about $340,000.

Lethbridge, Alta.—The question of constructing waterworks is reported under consideration.

Winnipeg, Man.—It is stated that bids will be received by the Bd. Control (M. Peterson, Secy.) until Jan. 2 for supplying and installing pumping and air compressing machinery for well No. 7.

Brantford, Ont.—This city is reported to have petitioned the Ontario Ry. and Municipal Board for permission to issue bonds to extend the water works.

Aylmer, Ont.—J. Bradley, Town Clk., writes that contract has not yet been let for water conduit, and the city is still open for bids; probable cost, $8,000. Engineer, Jas. A. Bell, of St. Thomas.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

East Lake (P. O. Birmingham), Ala.—The question of constructing a sewerage system is being considered; probable cost, $25,000.

Los Angeles, Cal.—The Bd. of Pub. Wks. on Nov. 22 authorized City Council to construct Arroyo de las Posas sewer, at a cost of $18,000; Boyle Heights sewer, at a cost of $10,000, and West Boyle Heights main sewer, at a cost of $15,000.

Durango, Colo.—Bids will be received until Jan. 6 by Herman Berndt, Mayor, for furnishing material and constructing 3 sanitary sewers in Sewer Dist. No. 1, said sewers to be known as Sewers Nos. 1, 2 and 3, as advertised in The Engineering Record.

Hartford, Conn.—Local press reports state that bids will probably soon be asked for the construction of tunnel Sec. B, of the Homestead Ave. intercepting sewer system. F. L. Ford, City Engr.

**Washington, D. C.*—E. G. Gummel, 612 F St., N. W., is reported to have secured the contract for constructing sewers in Arkansas Ave. (bids opened Nov. 25) for $12,925.

Ft. Du Pont, Delaware City, Del.—The following are the bids opened at the office of Capt. J. L. Knowlton, Q. M., on Nov. 25 for (*a*) remodeling sewer system, (*b*) 2 sewage ejectors and ejector chamber, at Ft. Du Pont: Jos. Anderson, Delaware City, *a* $4,924; Harry A. Miller, Wilmington, *a* $7,780, *b* $7,195; M. B. Bunyear, Chester, Pa., *a* $4,300, *b* $7,900.

Forsyth, Ga.—We are informed that the Mayor and Aldermen on Dec. 6 rejected all bids received for $15,000 sewer bonds, and the city will not install any sewers for the present. H. F. Wilder, City Clk.

Pekin, Ill.—It is reported that specifications are being prepared for a sewer system for the North Dist.

Moline, Ill.—There is reported to be a movement on foot by the citizens of the 6th Ward to secure sewerage system for that portion of the city.

Ft. Dodge, Ia.—K. E. Beal, City Clk., writes that it is proposed to construct new pipe sewers. Engineer, C. H. Reynolds, of Ft. Dodge.

Traer, Ia.—The City Council is reported to be considering the construction of a sewerage system.

Sterling, Kan.—D. J. Fair, Mayor, writes that no engineer has yet been selected for the proposed sewerage system; if constructed it will cost about $43,000.

**Baton Rouge, La.*—Krumbhaar & Aiken, of New Orleans, are reported to have secured the contract for the construction of an electrical sewerage station for Baton Rouge, at $3,200.

**St. Paul, Minn.*—The contract for constructing St. Anthony Park sewer system, about 12 miles in length, was awarded by Bd. of Pub. Wks. on Dec. 2 to the General Contracting Co., 430 Temple Court, Minneapolis, for $317,000.

Specifications are reported to have been completed for a sewer on Armstrong Ave. from View St. to Chatsworth St., 4 blocks long, to have 900 ft. tunneled in the sand rock.

Specifications for a sewer on the West Side to cover 13 blocks have been completed and presented to the Board of Pub. Wks. The sewer is in three parts. It will extend on Stickney St. from south city limits to Concord and Curtice Sts. and to the Chicago Great Western right-of-way. Another section on Andrew St. will connect with the Concord sewer, and another branch on Page St. from Andrew will make similar connection. It will be constructed in the spring.

Duluth, Minn.—It is reported that it is proposed to construct a trunk line or outlet sewer for West Duluth.

Minneapolis, Minn.—Local press reports state that the city engineer's office will commence at once plans for a tunnel and drop-shaft on 38th St. at the Mississippi River as a preliminary step to establish a new sewer system throughout the extreme southern portion of city, including Linden Hills and Cottage City. L. A. Lydiard, City Clk.

St. Louis, Mo.—We are informed that an ordinance is now under consideration providing for the construction of sewers in Wyoming Street, Dist. No. 21, to be known as Glaze Creek sewer, to cost about $140,000. A. J. O'Reilly, Pres. Bd. Pub. Improv.

Elizabeth, N. J.—Bids will be received until Dec. 16 by the City Council, for furnishing material and constructing 1,710 lin. ft., 10, 12 and 15-in. pipe sewer, 1,596 lin. ft. 6-in. pipe, 26 6x15-in., 32 6x12-in., 56 6x10-in. connections, 12 manholes, etc.

Niagara Falls, N. Y.—The Bd. of Pub. Wks. is reported to have approved the plans of City Engr. Read for a tunnel trunk sewer on Royal Ave. for the relief of the factories to the east of Echota. Estimated cost, $67,000.

Troy, N. Y.—See "Street Cleaning and Garbage Disposal."

Albion, N. Y.—The Village Trus. are reported to be considering the question of establishing a system of sewage disposal for the village.

**White Plains, N. Y.*—Bids were opened on Nov. 27 at the office of the Bronx Valley Sewer Comn., 2 Grand St., White Plains, for constructing the Bronx Valley sewer, and we are informed that the contract has been awarded to the Mack Paving & Constr. Co., of Philadelphia, Pa.; contract price reported to be $1,800,000. The bids called for furnishing work and materials necessary for the watertight and enduring construction of each one of the seven sections, which together comprise about 12 miles of circular sewer from 3⅓ to 6 ft diam. and about 3 miles of circular lined tunnel mostly 6½ ft. and 8½ ft. diam. The material to be either monolithic reinforced concrete, reinforced concrete blocks or brick masonry. Geo. R. Byrne is Ch. Engr. in charge of the sewer. Frank N. Glover, Secy.

New Rochelle, N. Y.—Bids will be received until Dec. 19 by the Bd. Pub. Wks. (Jas. K. Wilkes, Ch. Engr.) for constructing sewers in Glen and Colonial Pl. and drains in Lockwood Ave. and Hickory St.

Burlington, N. C.—See "Water."

Mt. Olive, N. C.—Albert S. Grady, Mayor, P. O. Box 105, writes that bids will probably be called for in the spring for the proposed sewerage system, to be constructed inconnection with the establishment of water works; probable cost, $25,000. Engineer not yet selected.

Ashtabula, O.—Plans for sewerage for Dist. No. 3 have been submitted to the State Bd. of Health for approval.

**Items marked thus give the names of parties awarded contracts.*

**Canton, O.*—We are informed that contracts for pipe sewers (bids opened Dec. 3) have been awarded as follows: Bridge St., to John Skeeles, for $3,000, and Short St., to S. A. Haskell $1,900.

Dayton, O.—Bids were opened on Dec. 4 by the Bd. Pub. Service (T. M. Pexton, Pres.), for constructing sanitary sewers in part of Dist. No. 3, North Dayton, requiring 70,050 ft., 6 to 15-in. vitrified pipe sewers, 68,250 ft. trench and back fill 6 to 28 ft. deep, 80 lamp holes, 75 flush tanks, flush tank connections, repaving 1,500 sq. yds. brick pavement, 100 sq. yds. asphatl, 6,000 lin. ft. boulder repaving, c. i. pipe and specials, etc., and the following are reported to be the totals of bids received: John T. Reese, $72,856.36; Shafor and Dill, $75,860.; C. F. Sullivan, $75,960; T. J. Backus Constr. Co., $77,532, and Wm. Hilt, $77,850.

Youngstown, O.—It is stated that bids will be received until Dec. 16 for $14,485 sewer bonds and $10,285 sidewalk bonds.

Upper Sandusky, O.—It is stated that bids will be received until Dec. 28 by W. C. Ruopp, Village Clk., for $15,000 sewer bonds.

**Mingo, O.*—Ferry & Neville are reported to have secured the contract for constructing trunk sewer for $42,400.

Enid, Okla.—It is stated that bids are wanted until Dec. 19 for $285,000 sanitary sewer, $10,000 septic sewer and $15,000 water extension bonds. E. R. Lee, City Clk.

Lancaster, Pa.—The State Health Comr. at Harrisburg is reported to have approved plans for the new sewer system for the northern section of city.

Philadelphia, Pa.—The budget of the Survey Bureau for the year 1908 is reported to contain $500,000 for main sewers, $300,000 for branch sewers and $500,000 for bridges.

Salt Lake City, Utah.—It is stated that bids will be received by Bd. of Pub. Wks. (F. J. Leonard, Chmn.) until Jan. 3, for constructing pipe sewers in sewer extension No. 191. Louis C. Kelsey, City Engr.

**Norfolk, Va.*—Duffy & Co. are reported to have secured the contract for constructing lateral sewers in the 7th ward for $34.075.

Puyallup, Wash.—The City Council is stated to have authorized City Engr. Wheeler to prepare plans and specifications for sewer and water service for the South Hill Dist., to cost about $3,000.

Aberdeen, Wash.—It is stated that bids will be received until Jan. 8, by P. F. Clarke, City Aud., for $30,628 sewer bonds.

North Milwaukee, Wis.—We are informed that all bids have been rejected for constructing a concrete septic tank, 42 ft. diam. by 16 ft. deep, and the work will be done by the day. Engineer, W. G. Kirchoffer, of Madison. E. H. Klamp, Village Clk.

Fond du Lac, Wis.—The City Council is reported to have ordered the construction of a 12-in. sewer on W. 1st St. from Union St. to east branch of Fond du Lac River.

BRIDGES.

Notes Arranged Alphabetically by States.

Madison, Ark.—Bids will be received until Jan. 2 by the Bd. Co. Comrs., at the office of T. C. Merwin, Co. Clk., Forrest City, for constructing a 700-ft. steel highway drawbridge over the St. Francis River at Madison. H. M. Pharr, Consulting Engr., 216 Randolph Bldg., Memphis, Tenn.

**Los Angeles, Cal.*—Horace P. Ferris, Secy. Bd. of Pub. Wks., writes that the contract for constructing reinforced concrete bridge over Arroyo de los Posos at Macy St. (bids opened Nov. 25) has been awarded to Union Iron Works of Los Angeles, for $51,787.

Washington, D. C.—The construction of a bridge over Rock Creek at Q St. is reported contemplated.

Waycross, Ga.—The construction of a steel bridge over the Satilla River is reported contemplated.

King's Ferry, Ga.—Bids will be received until Dec. 30 by the Bd. Co. Comrs. and Ex-Officio Judges (G. Reuben Butler, Clk.) at Savannah for furnishing material and constructing a steel highway drawbridge over the Great Ogeechee River at King's Ferry.

Supervisors providing for the building of a State road from Coxsackie through New Baltimore to the line of Greenville, surveys of which have been made. The road will be 5.14 miles in Coxsackie and .42 in New Baltimore. The cost of building the road is estimated at $52,600.

Buffalo, N. Y.—Separate bids will be received until Dec. 24 by Francis G. Ward, Comr. Pub. Wks., for paving portions of Oberlin St., repaving Franklin, Babcock, N. Division, and 15th Sts.

Albany, N. Y.—The following are reported to be additional bids opened recently by Frederick Skene, State Engr., for constructing roads: Road 539, Fulton-Volney, Chambers & Grady, Rochester, N. Y., $16,782; John H. Gordon, Albany, N. Y., $18,852; Stewart, Kerbaugh-Shanley Co., New York City, $17,765; Barnett Contracting Co., Oswego, N. Y., $16,850. Road 553, Fly Road—John H. Gordon, Albany, N. Y., $22,596; Stewart, Kerbaugh-Shanley Co., $21,539. Road 554, Fabius Road—Stewart, Kerbaugh-Shanley Co., $45,282. Road 555, East Syracuse-Chittenango—Stewart, Kerbaugh-Shanley Co., $88,593. Road 568, Milbrook-Lithgaw—General Constr. Co., Bridgeport, Conn., $37,416; Stewart, Kerbaugh-Shanley Co., $38,761; Saml. Beskin, Fishkill, N. Y., $37,398. Road 587, Mt. Kisco-Millwood—T. E. Vermilyea, New York City, $40,232; Wm. F. McCabe, White Plains, N. Y., $36,775; Frank J. Fowler Constr. Co., Mt. Kisco, N. Y., $41,011; Bellew & Merritt Co., Tuckahoe, N. Y., $36,841; Latta & Terry Constr. Co., Philadelphia, Pa., $63,969; Stewart, Kerbaugh-Shanley Co., $44,258. Road 595, Homer-Tully Section 2—Chambers & Grady, $43,327; Patrick A. Lillis, Troy, N. Y., $42,427; Stewart, Kerbaugh-Shanley Co., $43,764. Road 598, Norwich-Preston—Stewart, Kerbaugh-Shanley Co., $52,664. Road 607, Manchester-Clifton Springs—Mosier & Summers, Buffalo, N. Y., $27,159; Gantz-Wilson Constr. Co., $26,487; Chambers & Grady, $26,[illegible]. Road 566, Wolf Hill-Berne—Brown & Lowe, $6[illegible]; M. Krantrowitz, Albany, N. Y., $66,797; Jeremiah T. Finch, Glens Falls, N. Y., $67,425; Stewart, Kerbaugh-Shanley Co., $67,849. Road 608, Phelps-Clifton Springs—Gantz-Wilson Constr. Co., Buffalo, $14,975; Mosier & Summers, $15,278; Chambers & Grady, $15,400. [illegible] Washington Hollow-Milbrook—Stewart, Kerbaugh-Shanley Co., $13,648; General Constr. Co., $12,787; [illegible] Beskin, $12,776. Road 613, Catskill-South Cairo—[illegible] E. Consalus, $57,086; M. Kantrowitz, $57,138; [illegible], $59,072; Stewart, Kerbaugh-Shanley Co., [illegible]. Road 6[illegible], Geneseo-Avon—Stewart, Kerbaugh-[illegible] Co., $56,314. Road 643, North Tonawanda [illegible] Sections 1 and 2—Stewart, Kerbaugh-Shanley Co., $3[illegible]. Road 649, Hudson-Stottsville—Stewart, Kerbaugh-Shanley Co., $[illegible],932. Road 651, Clintonville-Keeseville—Jeremiah T. Finch, Glens Falls, N. Y., $55,750; Buckley Constr. Co., Plattsburg, N. Y., $55,764. Road 653, Granby Roads—Stewart, Kerbaugh-Shanley Co., $57,586. Road 657, Croton River-Peekskill—Bellew & Merritt Co., Tuckahoe, N. Y., $71,200; Wm. F. McCabe, White Plains, N. Y., $71,087; A. W. Canney, Croton, N. Y., $82,880; Stewart, Kerbaugh-Shanley Co., New York City $76,990. Road 660, Griswold-St. Bratts Bridge—Akron Constr. Co., Akron, N. Y., $65,551; Stewart, Kerbaugh-Shanley Co., $65,286. Road 674, Milford Center-Milford—Berkley Constr. Co., Plattsburg, N. Y., $70,547; J. K. Palmer & Co., Clearfield, Pa., $70,050; M. L. Seiver & Co., Sidney, N. Y., $76,016. Road 765, Otsego-Onconta—Buckley Constr. Co., $43,575; J. K. Palmer & Co., Clearfield, Pa., $43,179; M. L. Seiver & Co., Sidney, N. Y., $46,002. Road 676, Otsego-Wilsey's Cor.—M. L. Seiver & Co., $10,576; J. K. Palmer & Co., Clearfield, Pa., $17,038; S. B. Van Wagoner, Rondout, N. Y., $17,163. Road 677, Edmeston-West Burlington-Kelsey Cor.—M. L. Seiver & Co., Sidney, N. Y., $43,255. Road 678, Morris-Gilbertsville—M. L. Seiver & Co., $24,621; S. B. Van Wagoner, Rondout, N. Y., $24,577. Road 684, Cato-Meridan-Baldwinsville—Stewart, Kerbaugh-Shanley Co., $55,752.

Reading, O.—The City Council is stated to have approved plans for the resurfacing of the principal streets of the village.

Toledo, O.—The lowest bids opened Dec. 5 for constructing sidewalks by Bd. Pub. Service is stated to have been as follows: East District, cement, O. A. Schroeder, $1,796; stone, the Knopp Bros. Co., $6,282; South District, cement, J. H. Horen, $1,796; stone, C. Peck & Sons, $7,437; North District, cement, Chas. Neuendorf, $1,708; stone, C. Peck & Son, $6,262.

**Cincinnati, O.*—T. Strack, 518 Walnut St., is reported to have secured the contract for paving a portion of St. Lawrence St. for $9,686.

Bluffton, O.—It is stated that bids will be received until Dec. 21 by B. G. Biery, Village Clk., for $37,107 Main St. improvement bonds.

Youngstown, O.—See "Sewerage and Sewage Disposal."

Cleveland, O.—Bids will be received until Jan. 4 by the Bd. Co. Comrs. (Julius C. Dorn, Clk.) for grading, draining and paving Fisher and Dillie Roads. A. B. Lea, Co. Engr.

Pittsburg, Pa.—The City Council is reported to have passed an ordinance providing for the grading and paving of a portion of Howley St.

Chester, Pa.—The City Council is reported to have approved the ordinance providing for the paving of 2d St.

Norristown, Pa.—It is proposed to expend about $130,000 for street paving; material not yet decided upon. S. Cameron Corson, City Engr.

Pottsville, Pa.—Bids will be received until Dec. 26 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 3,300 ft. road in Pine Grove Township; also 22,800 ft. road in Wayne Township, both in Schuylkill Co.

Reading, Pa.—Bids will be received until Dec. 27 by Jos. W. Hunter, State Highway Comr., Harrisburg, for constructing 11,000 ft. road between Exeter and Amity Townships, Berks Co.

Dorranceton, Pa.—Bids will be received until Dec. 23 by the Town Council, for grading, curbing and paving a portion of James St. with U. S. creo-resinate wood block on concrete foundation; also Dorrance St., with vitrified fire clay paving block upon a concrete foundation.

Allentown, Pa.—The City Council is reported to have passed an ordinance providing for the paving of portions of Fulton and 12th Sts.

Dallas, Tex.—The City Secy. is reported to have been authorized to receive bids for bituminous paving with concrete base on a portion of Griffin St.

Salt Lake City, Utah.—Specifications are on file at the office of the The Engineering Record, 239 West 39th St., New York City, for the paving First South St. to consist of 60,000 cu. yd. grading, 17,000 lin. ft. curb and 41,000 sq. yd. of asphalt, and bids for this work will be received at the office of the Bd. of Pub. Wks. (F. J. Leonard, Chmn.) until Jan. 3, Louis C. Kelsey, City Engr.

Richmond, Va.—The Committee on Annexed Territory is stated to have decided to open and grade 34th St. from the old corporate lines to Oakwood Ave. at a cost of $25,000.

Tacoma, Wash.—The paving of St. Helens Ave. is reported contemplated.

Spokane, Wash.—Bids will be received until Dec. 23 by the Bd. Pub. Wks. (J. T. O'Brien, Secy.) for constructing a roadway across E. Sprague Ave., to consist of an earthen fill, with proper masonry, retaining walls, or of a concrete viaduct.

Seattle, Wash.—See "Water."

Seattle, Wash.—An ordinance has been passed providing for concrete walks on 33d Ave. N. W. to cost $4,191.

Neenah, Wis.—The Bd. Pub. Wks. is reported to be preparing plans for the paving of a portion of Wisconsin Ave. with brick.

Racine, Wis.—It is stated that bids will be received until Dec. 28 by the Bd. Pub. Wks. (P. H. Connolly, Chmn.), for grading and paving a portion of 5th St.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Oakland, Cal.—It is reported that the Great Western Power Co., of Richmond, Cal., has purchased property on Brooklyn basin, south of 5th Ave., in East Oakland, to be used as a site for a power plant.

South San Francisco, Cal.—The Bd. of Superv. at Redwood City, is stated to have granted a franchise to W. J. Martin, of the South San Francisco Land and Improv. Co. to erect poles and wires for furnishing electricity for power and light purposes in South San Francisco.

Monterey, Cal.—Bids will be received until Dec. 30 by John L. Clem, Ch. Q. M., U. S. A., at the Presidio of San Francisco, for furnishing and installing electric lighting fixtures in a double set of non-commissioned officers' quarters for sergeant 1st class hospital corps at the Presidio of Monterey.

Aguilar, Colo.—Hawkins & Barnett, of Pueblo, are reported to have secured an electric light franchise and will immediately commence construction of a $25,000 electric light and power plant. They will furnish light and power to several coal mines adjacent to Aguilar.

**Las Animas, Colo.*—C. L. de Muralt, 114 Liberty St., New York, N. Y., has secured the contract for constructing power plant for the U. S. Naval Hospital at (new) Ft. Lyon (bids opened Nov. 23) for $72,000.

**Glastonbury, Conn.*—The Glastonbury Power Co. is reported to have awarded contract for its entire plant to the Ley Constr. Co., of Springfield, Mass. The work of construction will begin early in the spring. The entire plant will cost about $200,000. The power-house will be equipped with one dynamo, also a spare one and will have at the beginning 3 water wheels and 3 generators. The whole equipment of the power-house will be capable of furnishing 1,300 h.-p., all by water. The power will be used partly for electric lighting on Main St., Glastonbury, Rocky Hill and Manchester. The company will run about 25 miles of primary line.

Dover, Del.—The city contemplates installing a 90-kw. generator in the municipal electric light plant. Harvey B. Roop, Mgr.

Jacksonville, Fla.—The following are reported to be the bids opened on Dec. 4 by the Bd. of Pub. Wks. for furnishing, complete, f. o. b. Jacksonville, one surface condenser, with separate circulating and vacuum pumps: Wheeler Condenser & Eng. Co., of Atlanta, Ga., $12,238; C. H. Wheeler Mfg. Co., of Philadelphia, Pa., $11,495; Alberger Condenser Co., of New York, N. Y., $9,890, or condenser with ¾-in. tubes instead of 1-in. tubes for $9,540; J. G. Christopher (2 bids), $10,792 and $10,000.

Lagrange, Ga.—The citizens are contemplating doubling the capacity of the municipal electric light plant, increasing the number of city lamps and making other extensions. J. R. Black is Supt.

Twin Falls, Idaho.—See "Water."

Pella, Ia.—Henry Rhynsberger and Walter Fowler, of Pella, are reported to have purchased the electric light plant and will make improvements to same.

Griswold, Ia.—Dan Eppelsheimer, City Clk., writes that the Griswold Light & Power Co., composed of R. C. Prather and J. M. McAvoy, both of Griswold, has received franchise for electric light plant; probable cost of plant proposed, $3,000.

Guthrie Center, Ia.—The Guthrie Center Electric Light Co. is planning to install another unit in its plant next year. C. T. Harney is Mgr.

Lecompte, La.—The Mayor and Bd. of Aldermen on Dec. 5 adopted the plans of C. Scott Yaeger, of Alexandria, for an electric light plant.

Lake Charles, La.—F. S. Price, of Hannibal, Mo., is reported interested in the construction of a gas plant.

**Kirksville, Mo.*—The Ft. Wayne Electric Wks., of Ft. Wayne, Ind., is reported to have secured the contract to install dynamos and other electrical machinery and equipment in the new power house.

Harlowton, Mont.—A. C. Graves and Benj. Turner are reported interested in the construction of water works and an electric light plant.

Pender, Neb.—The Village Board is reported to be considering a proposition from M. M. Neumann to install an electric light plant.

Omaha, Neb.—H. E. Babcock and F. Jaeggi are reported interested in the organization of a company which proposes to develop Loup River for power purposes. The cost of a 40,000 h. p. plant has been estimated by Geo. Sturtevant, 279 Dearborn St., Chicago, Ill., at $4,250,000.

Atlantic City, N. J.—Plans for the burial of overhead electric lighting wires in the city were submitted to City Council on Dec. 9 by the Electric Light and Power Co. It is proposed to start wire removal on the Boardwalk and place the entire system in conduits within two years. The operation will cost about $400,000. Council approved the plan and it is said that the company will probably receive a renewal of a 10-year contract to light the city.

**New York, N. Y.*—Comr. O'Brien, of the Dept. of Water Supply, Gas and Electricity, on Dec. 10 opened bids for supplying the city with electricity for 1908, and contracts were awarded as follows: To the Edison Electric Light & Power Co. and the New York Edison Co., for electric lights in Manhattan, the Westchester Lighting Co. in The Bronx, the Edison Electric Illuminating Co. in Brooklyn, the Queens Borough Gas & Electric Co. in Queens, and the Richmond Light & R. R. Co. in Richmond. The city's lighting bill for this year will amount to between $3,500,000 and $4,000,000. Electric arc lights will cost about the same this year as last. The city will pay $100 a lamp a year for 5,000 arc lights of 450 kilowatts. All lamps over that number, $95. When the city has 7,500 of these arc lights the cost will be $95 each. Incandescent lights will cost the same as this year—$22.50 a lamp a year. Current for public buildings for heat and other purposes wil lcost from 7½ to 10 cts., while power current will cost 6 cts. The only increase was in the cost of mantles for Queens.

**Dunkirk, N. Y.*—The Water Bd. on Dec. 2 awarded contract for connecting up condenser and doing necessary steam fitting at city's electric light plant to the John W. Danforth Co., of Buffalo, for $2,492.

Newburg Heights, O.—Bids will be received until Jan. 7 by P. S. Ruggles, Village Clk., for furnishing material and supplying this village with street lighting. Bids will be received as a whole or separately on material and labor.

Bergholz, O.—The Bergholz Electric Light & Power Co. is reported incorporated with a capital of $10,000 by E. Steinetz, James B. Marshall and others.

New Bremen, O.—It is stated that bids will be received until Dec. 30 by A. M. Steinbray, Village Clk., for $20,000 electric light bonds.

Anadarko, Okla.—The City Council is reported to be considering the question of issuing $75,000 bonds for improving the electric light plant and water works.

*Items marked thus give the names of parties awarded contracts.

Erie, Pa.—Bids were opened on Dec. 9 by City Council for lighting the city, and the Erie County Electric Co. secured the contract for lighting the city by electricity at $65.70 per lamp per year and the Erie Gas Co. for gas lighting for 5 years at 5 1-2 cts. per lamp per night.

Easton, Pa.—The Clymer Power Co. is reported incorporated to manufacture gas, electricity or heat. Leo S. Clymer and B. F. Feckenthal are the incorporators.

Mt. Pleasant, Tex.—The Mt. Pleasant Electric Co. contemplates installing a 75-kw. generator direct connected in its plant. C. S. Johnson is Supt.

Salt Lake City, Utah.—D. M. Griffiths, of Salt Lake City, is reported to have filed application to appropriate 10 cu. ft. of water per second from Stairs Gulch Creek, a branch of Big Cottonwood Creek. The power produced will be used for electric lighting and propelling machinery.

Colton, Wash.—The City Council has passed the ordinance granting the Idaho-Washington Light & Power Co., of Moscow, Idaho, a franchise to construct and operate an electric light plant in Colton.

Elkins, W. Va.—The Valley Improvement Co. (C. C. Bosworth, Supt.) will reorganize under the name of the Elkins Power Co. and will build an entirely new plant, reconstruct its lines, etc. The company has secured a new franchise for 50 years, and the city contract for street lighting has been extended for a term of 10 years. A new arc lighting system for street lighting will be installed as soon as the plant is ready to furnish the current. The present 1,100-volt, single-phase, 60-cycle system will be replaced with a 2,200-volt, 3-phase system.

**Minnedosa, Man.*—Jos. Barrett, 573 Dufferin St., Toronto, Ont., writes that the Minnedosa Power Co. has awarded to the Hydro-Electrical Constr. Co., of Toronto, Ont., the contract for constructing its plant at Minnedosa, for about $80,000.

Sherbrooke, Que.—F. J. Griffith, City Secy.-Treas., writes that Ross & Holgate, of Montreal, are preparing plans for an eletric light and power plant for Sherbrooke.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

San Francisco, Cal.—The Ocean Shore Ry. Co. has let a contract to Geo. Pratchner for grading its branch from the coast up Seattle Creek to Swanton, and there is every indication that this line will later be extended to the State Park.

**Jerseyville, Ill.*—The certificate of incorporation of the Improved Electric Ry. Co. is reported filed with a capital of $200,000. Directors: S. H. Bowman, S. L. Hill, Dr. A. A. Shobe, Wm. J. Herman and others.

Centralia, Ill.—The Centralia & Sandoval Ry. Co. is reported formed by the owners of the Centralia & Central City Traction Co., for the purpose of building a four-mile extension from the present terminus of the line to Sandoval, Ill. Construction work probably will begin about April 1. E. R. List, pres., and G. E. Hubbard, Gen. Engr. of the Centralia & Central City Traction Co.

Gillespie, Ill.—The Gillespie Electric R. R. is reported incorporated with a capital stock of $30,000 to construct and operate an electric railway in Macoupin County. Incorporators: J. M. Rodiner, H. T. Bycroft and R. H. Isaacs, of Gillespie.

Indianapolis, Ind.—It is reported that the Grand Central Traction Co. will soon be in the market for all kinds of material necessary for the construction of its line. The surveys and estimates have just been completed for this railway, which is to connect Indianapolis and Evansville. A branch line will also be built from Bloomington, Ill., to Terre Haute, Ind. W. Duncan, Ch. Engr.

Logansport, Ind.—The Ft. Wayne & Wabash Valley Traction is said to be asking for a franchise to lay a double track on Erie Avenue.

Frederick, Md.—T. J. King, of Washington, D. C., consulting engineer and superintendent of transportation of the Great Falls & Old Dominion Ry., is reported to be arranging for a preliminary survey for the proposed connecting line between that railway and the Washington, Frederick & Gettysburg Ry., now being built northward from Frederick. The survey for the line from Frederick to Great Falls, where it will connect with the Great Falls & Old Dominion Ry. will be run through Buckeystown and Park Mills, thence on the west side of Sugar Loaf Mountain to Deckerson Station, thence to the east of Beallsville, through Poolesville to Seneca and thence to Great Falls, a distance of 31 miles. At Great Falls it will be necessary to bridge the Potomac River to reach the present terminus of the Great Falls and Old Dominion Ry., which runs along the Virginia side of the river to Rosslyn, where it crosses to Washington.

Manitou, Minn.—It is reported that the Twin City Rapid Transit Co. (E. H. Scofield, Ch. Engr., Minneapolis) will electrify and operate that portion of the Minneapolis & St. Louis line between Manitou and Tonka Bay, Lake Minnetonka. The company will build a mile and a half of line from its present terminus at Excelsior to Manitou and will improve the mile and a half of the Minneapolis & St. Louis track from that point to Tonka Bay. There will be one station at Manitou and one at Wildhurst on the extension.

**Excelsior Springs, Mo.*—J. S. Berger is reported to have applied to the City Council for a franchise to build an electric railway to the Milwaukee depot.

Brooklyn, N. Y.—Chief Engr. Seaman, of the Public Service Comm., and Geo. S. Rice, Engr. of Subway Construction, are reported to be making alterations in plans for the construction of 4th Ave. subway to Coney Island; as soon as changes are completed, bids for construction will be called for by the Public Service Comm., office in Tribune Bldg., N. Y. City (Wm. R. Wilcox, Chmn.).

Patchogue, N. Y. The South Shore Traction Co., it is stated, has filed with the Secy. of State a certificate of extension of route, as follows: Beginning at the junction of Railroad Ave. with the westerly limits of the town of Brookhaven, thence east along Railroad Ave. to Blue Point Ave., thence south to the South Country road, and thence easterly to the west corporate limits of the village of Patchogue; also beginning at the intersection of Blue Point Ave. and the South Country road, in Brookhaven, thence easterly over private right-of-way to the corporate limits of the village of Patchogue.

Mineola, N. Y.—Application is stated to have been made to the Nassau County Supervisors by the New York & North Shore Traction Co., formerly the Mineola, Roslyn & Port Washington Traction Co., for a franchise to build an electric street railway on the North Hempstead and Flushing Turnpike at its intersection with the Middle Neck road.

Burlington, N. C.—A charter is stated to have been issued to the Burgrahaw Traction Co., of Burlington, which proposes to equip, operate and maintain a line of street railway in Burlington, Graham and Haw River. Capital, $250,000. Junius N. Harden, John M. Cook and J. W. Murray are said to be interested.

Lidgerwood, N. D.—E. A. and J. H. Movius are reported interested in a company which has been organized to construct an electric railway from Veblen to Lidgerwood. Capital, $500,000. Arrangements are now being made to survey the route, also estimate the cost of the road.

Findlay, O.—It is stated that an interurban line that will connect Prairie Depot with Bradner on the new extension of the Toledo, Fostoria & Findlay Ry. to Toledo, is being planned. M. R. Black, of Toledo, is taking the right of way.

Donora, Pa.—It is stated that bids will be received by the Donora & Eldora St. Ry. Co. (B. M. Hanna, Pres., 718 Pennsylvania Ave., Pittsburg), until Jan. 15, for constructing overhead line from Donora to Eldora.

Sayre, Pa.—Gov. Stuart, it is stated, has approved the extension of the line of the Sayre Ry. Co. from South and Loder Sts. in So. Waverly, Bradford County, along South and Fulton Sts. to the new station of the Delaware, Lackawanna & Western Ry.

South Bethlehem, Pa.—It is reported that the South Bethlehem & Saucon St. Ry. Co. has begun operations on its new line between South Bethlehem and Colesville, a distance of eight miles. Next spring the line will be extended from Colesville to Center Valley, where it will connect with the Philadelphia division of the Lehigh Valley Transit Co.

Erie, Pa.—It is stated that the Conneaut & Erie Traction Co. is planning to make a number of improvements on its line. All bad curves will be eliminated and some parts of the road will be re-ballasted. A. B. Nelson will have charge of the reconstruction work.

Johnstown, Pa.—The City Council, it is stated, has passed over Mayor Young's veto the ordinance granting the Johnstown Passenger Railway Company the right to operate in Morrellville.

Phoenixville, Pa.—The Philadelphia Interurban Railway Co. (Chas. H. Detwiler, Pres.), formerly the Roysersford St. Ry. Co., it is stated, has accepted the ordinance from the borough of Phoenixville, permitting the company to construct, maintain and operate an electric railway upon certain streets and avenues in Phoenixville.

Beaver Falls, Pa.—The Beaver Falls & Koppel Ry. and Beaver & Lawrence St. Ry. Co., it is reported, have been chartered in the Beaver County courts. The Beaver & Lawrence line begins in North Sewickley, just on the boundary between Beaver and Lawrence Counties, and will be built as far as Beaver Falls. The other system will extend from Beaver Falls to Koppel, a distance of about 10 miles. T. P. Simpson, S. L. Tone and others are the incorporators.

Colfax, Wash.—According to reports the line of the Inland Electric Ry. Co. will be extended from Colfax, its present terminus, to Walla Walla, in the near future. Jay P. Graves, of Spokane, Pres.

RAILROADS.

Notes Arranged Alphabetically by States.

Stockton, Cal.—The Southern Pacific R. R. Co. (Wm. Hood, Ch. Engr., San Francisco) is reported to have filed an application with the City Council for perimssion to install another track alongside of the main line through Stockton, and also for additional spurs at various points along the road.

Denver, Colo.—The Rock Island system is reported to be planning to enter Denver on its own tracks from Limon Junction, to build from Denver to Colorado Springs, and to secure terminal facilities at Denver. The surveys for the line to Colorado Springs have been completed. The engineering department is now engaged in locating a route into Denver from Limon and the company is engaged in taking options on land in Denver which can be used as terminals. A. T. Abbott, of Colorado Springs, Supt. Colorado Div.

Ft. Wayne, Ind.—The Bd. of Pub. Wks. is reported to have ordered plans and specifications and will soon ask for bids for the elevation of the tracks in Calhoun St.

Indianapolis, Ind.—A resolution to elevate tracks of Union Ry. Co. at E. Washington St. has been prepared and will be submitted to the Bd. of Pub. Wks. The plans approved by Blaine H. Miller, City Engr., provide that tracks shall be elevated 12 ft. above present grade of street and the street depressed 6 ft. There is to be a vertical clearance of 15 ft. 9 in. The plans provide for 4 railway tracks over the street.

Bartlesville, Ind. Ter.—The St. Louis, Bartlesville & Pacific R. R. Co. is reported formed and is surveyed to run west from Webb City, Mo., through Joplin and the Quapaw Reservation into Bartlesville, where it will deliver zinc ore, and on through the Osage Reservation to a connection with the Kansas City, Mexico & Orient R. R.. The new road will be practically a belt line and will connect at Webb City, the eastern terminus, with the Iron Mountain, Missouri Pacific and Frisco; with the Frisco at Joplin and the Kansas City Southern; will cross the Katy at Welch, the Iron Mountain at Delafare, the Katy and Santa Fe at Bartlesville, the Midland Valley at Pawhuska, and will have connection in Oklahoma with the Frisco at two points; crossing the main line of the Santa Fe at Ponca City and the Rock Island at Pond Creek. The shops and general offices are to be located at Bartlesville.

Huron, Mich.—The State R. R. Comn., at Madison, is reported to have granted the Lake Superior & Southern Ry. Co permission to issue bonds to the extent of $9,000,000. The company proposes to build a line from Huron to Champion.

St. Louis, Mo.—The Terminal Railroad Assoc. is reported to have notified the Municipal Bridge and Terminals Comn. of its intention to provide depot and yard facilities in practically the entire area between Ewing, Grand and Manchester Aves. on the north side of the Mill Creek Valley tracks. The improvements will cost about $4 000,000, including the viaduct, depot, etc.

Cleveland, O.—Bids will be received, it is stated, until Dec. 17 by A. R. Callow, Secy. Pub. Wks., for track special work, consisting of curves, switches, turnouts, etc., needed for track construction. The work involves finishing special work for 22 different places and separate bids will be received on the material for each place. Bidders will be required to name in their bids the place of delivering f. o. b. Cleveland of material for each job.

Ashland, O.—Jos. Ramsey, Jr., and associates are reported to have completed negotiations to buy the Ashland & Western R. R. from C. V. Davis, of Canton, O., which is to be consolidated with the Industrial R. R. of Lorain and the Lorain & Ashland, now owned by them. It is said that work will begin next spring in extensions, additional terminals and equipment, entailing an expenditure of $1,000,000.

Pittsburg, Pa.—Press reports state that at a meeting of the directors of the New York, Pittsburg & Chicago R. R. Co., in Pittsburg on Dec. 4, Jos. Ramsey, Jr., was elected president. This railroad is the short line from New York to Chicago through the State of Pennsylvania. It was also decided to send out five corps of engineers to revise the survey between this city and the summit of the Allegheny Mountains. This will be done in the early spring. The total distance on the New York, Pittsburg & Chicago to Sunbury, on the Susquehanna River is 193 miles, and if the Reading system is used from that point to New York the total distance from Pittsburg to New York will be 383 miles.

Janesville, Wis.—Plans are reported to be on foot for the extension of the Chicago & Lake Superior R. R. (B. L. Delamater, Pres., Cambridge, Wis.) between Cambridge and London, a distance of 4 miles, to Janesville, passing through Rockdale, Albion and Edgerton and making the total length of the road 29 miles. It is expected that the construction of the extension will begin in the spring.

Edmonton, Alta.—It is stated that bids are wanted until Dec. 23 for construction work for the Grand Trunk Pacific Ry., 120 miles west of Edmonton. B. B. Kelliher, Ch. Engr., Montreal, Que.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

**Selma, Ala.*—The contract to construct, including heating apparatus, plumbing, gas piping, electric conduits and wiring the U. S. Post Office at Selma (bids for which were opened recently at the office of the Superv. Archt., Washington, D. C.) has been awarded to the King Lumber Co. of Charlottsville, Va., at $108,775.

Washington, D. C.—Cramp & Co., Philadelphia, Pa., it is reported, submitted the lowest bid on the proposed addition to the mess hall for the U. S. Soldiers' Home, at Washington, at $25,000.

Pensacola, Fla.—The Bd. Co. Comrs. has decided to call an election to vote on the issuing of $75,000 bonds to erect a jail.

Chicago, Ill.—Bids will be received until Dec. 18 by John J. Hanberg, Comr. Pub. Wks., for furnishing material and erecting a 3-story and basement brick and stone police station at 39th St. and California Ave. Bids to be submitted on the following: Cut stone, iron work, plumbing, etc.; sheet metal, etc.; cell work, heating, electric work, etc. Also until Dec. 19 for erecting a 3-story and basement brick and stone police station at 75th St. and Jackson Ave. Bids to be submitted on work as given above.

**Lincoln, Ill.*—V. Johst & Sons, of Peoria, Ill., according to reports, have secured the contract for the erection of a gymnasium building at the asylum for feeble minded, at $19,974.

Terre Haute, Ind.—It is stated that bids will be received until Dec. 18 by the Co. Aud. for erecting a 3-story jail, to cost about $125,000. W. H. Floyd, Archt., 656½ Wabash Ave.

Auburn, Ind.—It is reported that plans have been prepared by C. H. Griffiths, of Ft. Wayne, Ind., for a $30,000 infirmary to be erected in Auburn.

It is stated that plans are being prepared for a Carnegie Library. Bids will be invited, according to reports, about Jan. 1.

Indianapolis, Ind.—The Bd. of Pub. Wks. is said to be preparing to receive bids for the furnishing and installation of a heating plant in the city hospital.

Brazil, Ind.—The taxpayers have petitioned the Commissioners to construct a new $200,000 court house in this city.

Kokomo, Ind.—The County Council, it is stated, has appropriated $10,000 additional, making $16,000, for the construction of an orphan home. Bids will be solicited, according to reports, as soon as modified plans are prepared.

Waldoboro, Me.—W. H. Glover, of Rockland, submitted the only bid Dec. 5 to the Superv. Archt. at Washington, D. C., for the construction, except plumbing, electric wiring and conduits) of the extension to the U. S. Post Office and Custom House at Waldoboro at $4.775.

Baltimore, Md.—Bids will be received at the office of Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., until Dec. 18 for iron window guards and gates for the U. S. Custom House, Baltimore.

Clinton, Mass.—The Town Hall is reported destroyed by fire.

Chicopee, Mass.—Mrs. Sarah E. Spaulding has bequeathed $20,000 to the city of Chicopee to erect a library.

Boston, Mass.—The following are reported to be the bids opened Dec. 6 by the Trus. of the Boston City Hospital for erecting an addition to the Relief Hospital in Haymarket Sq. and for plumbing, heating and electric

**Items marked thus give the names of parties awarded contracts.*

wiring the same. Construction—Mack & Moore, $45,900; Central Bldg. Co., $47,950; Henry A. Root, $41,738; McGahey & O'Connor, $40,421; Geo. W. Harvey Co., $41,970; Connors Bros. Far Rockaway, L. I., N. Y.—Prof. J. D. Sulsona, Director of the American Collegiate Inst., it is stated, intends erecting on Mott Ave. a 3-story brick, stone and steel school, lighted by gas and electricity and heated by steam; estimated cost, $75,000.

Lawrence, L. I., N. Y.—The Committee of Taxpayers representing Inwood, Lawrence and Cedarhurst, to confer with the Bd. of Educ. of Union Free School Dist. No. 15 on the proposition to assess the district for $75,000 for the purpose of repairing and enlarging the Lawrence High School, has decided that the building is too old to spend so much money on and will report at a special meeting of the school district on Dec. 17 that it approves a proposition to sell the present high school property in Central Ave. and to purchase a new site at some point north of the railroad tracks on which to erect a new and modern brick and stone building.

Weedsport, N. Y.—J. Mills Platt, 921 Chamber of Commerce Bldg., Rochester, is completing plans for a district high school to be erected at Weedsport, to cost $30,000.

Poughkeepsie, N. Y.—Ewing & Chappell, 345 5th Ave., N. Y. City, are preparing plans for a 3-story chemical laboratory for Vassar College.

Greensboro, N. C.—J. I. Faust, Pres. State Normal & Industrial College, writes that C. C. Hook, of Charlotte, is preparing plans for a science building to cost about $50,000.

Cincinnati, O.—It is reported that a donation of $250,000 has been made to the Hebrew Union College (Isaac Broom, Secy.) for the erection of a building.

Edw. H. Dornette, Pickering Bldg., it is stated, has been authorized to prepare plans for an annex to the 22d Dist. School, cost not to exceed $45,000.

Madisonville, O.—Plans and specifications will be received until Jan. 6 by the Bd. Educ. (J. F. Klein, Clk.) for a school to be erected here at a cost of $100,000.

Lorain, O.—It is stated that bids will be received until Dec. 23 by E. Bruell, Clk., Bd. Educ., 1730 Penfield Ave., for erecting fire escapes on schools.

Tulsa ,Okla.—A. Grant Evans, Pres. Henry Kendall College, writes that W. Avelett Cann, 1023 Missouri Trust Bldg., St. Louis, Mos., is preparing plans for the proposed buildings for the college. The first building will cost $35,000.

Newport, R. I.—The citizens, it is stated, have authorized the appropriation of $50,000 to erect a school for the children of the lower grades.

Richmond, Va.—Bids will be received until Jan. 20 by the Chmn. School Bd. for erecting a high school. Chas. K. Bryant, Archt., 1014 E. Main St.

Milwaukee, Wis.—It is stated that bids will soon be asked by F. M. Harbach, Secy. School Bd., for erecting the 10th Dist. School, and as soon as alterations are completed in the plans for the 11th Dist. School new bids will be asked.

Edgerton, Wis.—It is stated that all bids recently received for erecting the Florence Childs Memorial High School have been rejected, as they were too high. The plans are being revised and new bids will be asked. Appropriation, $40,000.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Montbrook, Fla.—We are informed that the Florida Lumber Co., of Monthrook, will erect its own plant, but is in the market for one 150-h.-p. plain balanced valve engine. Architect, J. M. Parker, of Floral City, Fla.

Danville, Ill.—J. Scully, of Chicago, Ill., is reported to have secured a site near the plant of the Danville Car Co., on which he intends erecting a plant, to cost $150,000. J. O. Gordon, of the firm of Gordon & Ganor, contractors of Danville, is reported interested.

Jersey City, N. J.—Jabez Burns & Sons, dealers in machinery at 542 Greenwich St., N. Y. City, according to reports, will erect a $50,000 2-story factory building, 157x275 ft. at Claremont Ave. and Halsey St., for which Architect John T. Rowland, Jr., 15 Exchange Pl., Jersey City, has prepared plans. It is reported that no awards have yet been made.

Marinette, Wis.—The Pike River Granite Co., now located at Amberg, it is reported, intends removing its plant to Marinette.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Troy, N. Y.—Bids will be received until Dec. 17 by Bd. Conrtact & Supply (Jas. M. Riley, Clk.) for the following for the year 1908: Furnishing necessary grounds for dumping garbage, ashes, loose stones, street dirt, filth and rubbish collected by carters in 15th, 16th and 17th Wards; labor and services required in sweeping, cleaning and caring for public streets, avenues, alleys and highways; labor, services and teams required in removing garbage, street dirt and other refuse from the streets, avenues, alleys, highways and public places, and removing silt from catchbasins and silt and other deposits from public sewers.

New York, N. Y.—Bids will be received until Dec. 18 (readvertisement) by Foster Crowell, Comr. St. Cleaning, for furnishing material and removing the snow and ice in the Boros. of Manhattan and Bronx for the period ending April 15, 1908.

*Brooklyn, N. Y.—The Bd. of Estimate of N. Y. City on Dec. 6 awarded contracts for removal of snow in Brooklyn Boro. to Hugh Starr, 208 Bay 8th St.; Chas. Cranford, Foster Ave. and Bracken-MacAveney Co., foot of 6th St. (bids opened Dec. 2).

East Liverpool, O.—The question of constructing a garbage reduction plant is reported under consideration here.

Pittsburg, Pa.—Rudolph Hering, of New York, N. Y., is reported to have been selected to prepare plans for collection and disposal of ashes, rubbish, etc. Dr. J. F. Edwards, Supt. Bureau of Health.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Woodland, Cal.—State Engineer Ellery, of Sacramento, is stated to have submitted to Governor Gillett plans for closing the Kripp break in the levee on the Yolo side of the Sacramento River. Engineer Ellery estimates the expenditure at about $8,000, half of which to be paid by the property owners and Yolo County, the balance by the State.

San Francisco, Cal.—The Mercer-Frazer Co. is reported to have submitted the lowest bid to the Bd. of Harbor Comrs. on Nov. 29 for the construction of a wharf on Illinois St. for $56,786. The lowest bid received, same time and place, for laying new rails for Belt Line R. R. was submitted by Flynn & Treacy, for $7,905.

The Bd. of Harbor Comrs. is reported to have completed plans for harbor improvements under the first $2,000,000 bond issue authorized by State Legislature. The improvements as projected will consist of 2 sections of sea wall and 7 large concrete piers. The work is to be done in the vicinity of the mail dock.

Washington, D. C.—Bids will be received by Maj. Spencer Cosby, Corps Engrs., U. S. A., Washington, until Jan. 11 for dredging in Rappahannock River, Va., as advertised in The Engineering Record.

Havana, Ill.—Press reports state that plans are being considered for the improvement of the Spring Lake Drainage Dist.; it will be necessary to construct 15 miles of levee along Illinois River, dig 50 miles of ditches inside of district and erect a pumping station; it is also planned to build a lock at the lower end of the district.

Ft. Wayne, Ind.—W. H. L. Weber, Ch. Engr. of the Ft. Wayne & Wabash Valley Traction Co. is reported to be preparing plans for the improvement of Robison Park. A new combined concrete dam and bridge will be constructed in St. Joe River, also 3 new aqueducts

*Items marked thus give the names of parties awarded contracts.

Princeton, Ind.—The Comrs. of Gibson and Posey Counties are reported to be preparing to ask for bids for the construction of a ditch 75 miles in length; estimated cost $75,000.

Evansville, Ind. The Comrs.* of Vanderburg County are reported to have decided to construct a large drain in Knights Township. Harry Stinson, Co. Aud.

Danville, Ind. A petition is reported to have been filed with the Comrs. of Hendricks County for the construction of a tile ditch, known as the Lee and Hogan ditch.

Columbus, Ind.—The Comrs. of Bartholomew County are reported to have ordered plans and specifications prepared for the construction of a drain in Columbus Township.

Mt. Vernon, Ind.—It is stated that bids will be received until Dec. 20 by the Co. Drainage Comrs., for constructing a ditch and drain.

Anderson, Ind.—It is stated that bids will be received until Dec. 28 by Edwin J. Wilcox, Supt. Constr., for constructing the Chas. Baxter tile ditch.

Estherville, Ia.—Bids will be received, it is stated, by R. J. Ridley, Co. Aud., until Jan. 16, for constructing county drain No. 24.

Jefferson, Ia.—Bids will be received until Dec. 27 by E. S. Gose, Co. Aud. Jefferson, for furnishing material and constructing county drains No. 33 and 10. C. P. Walker, Chmn. Bd. Superv.

Boston, Mass.—Rear Admiral Wm. S. Cowles, Chf. of the Bureau of Equipment for the Navy, in his annual report asks an appropriation of $100,000 for the installation of three chain-making machines at the Boston Navy Yard; also for a building for use as a wireless telegraph station, $5,000; tower on coaling plant and system of fire protection improved, cost $40,000; installation of efficient water system for fire protection of ropewalk, $10,000.

St. Louis, Mo.—See "Railroads."

Ada, Minn.—It is stated that D. E. Fulton, Co. Aud., will receive bids until Dec. 20 for constructing Ditch No. 33; probable cost, $12,096.

Aitkin, Minn.—It is stated that bids will be received until Jan. 7 by Fred Stearns, Co. Aud., for constructing Ditch No. 4.

Minneapolis, Minn.—See "Schools."

New Jersey.—In his estimates of appropriations needed for the year ending June 30, 1909, and which Congress is expected to appropriate at the present session, Secy. of the Treasury Cortelyou asks for the following amounts for New Jersey: For improving Passaic River, $100,000; for completion of improvements to public building at Trenton, $25,000; for various improvements at Sandy Hook proving grounds, $175,700; for improving Arthur Kill, $100,000; for completing the improvements at Cold Spring Inlet, with a view to securing a depth of 25 ft., $900,000, and for improving Delaware River, $50,000.

Canton, N. Y.—H. M. Townsley, Engr. Indian Creek Drainage Comn., writes that all bids opened on Dec. 6 for widening and deepening Van Rensselaer ditch have been rejected, and new bids will be called for.

Brooklyn, N. Y.—Press reports state that new bids will be received by the Bureau of Yards and Docks at Washington, D. C., until Jan. 18, for the completion of the new dry dock at the Brooklyn Navy Yard, Contract No. 4.

Long Island City, L. I., N. Y.—Dock Comr. J. A. Bensel, of N. Y. City, is reported to favor the construction of a public dock at foot of Nott Ave. in the Hunter's Point section.

Albany, N. Y.—Press reports state that at a recent meeting of the advisory board of consulting engineers in charge of the barge canal work it was voted to recommend to the State Canal Board the building of a harbor near Lockport, to cost between $50,000 and $100,000. The board also discussed the proposed work on the Champlain Canal and the Erie Canal near St. Johnsville.

At a recent conference of the State Barge Canal engineers, held in Albany, it was decided that the route of the canal will follow through Genesee Valley Park in Rochester. Contract drawings will be prepared and bids for construction will be received during the year 1908.

It is stated that contract No. 9 of the barge canal near Medina will probably be awarded within the next two months.

The Advisory Board of Consulting Engineers in charge of the barge canal work is reported to have decided to recommend to the State Canal Board that the dam over Oswego River at Phoenix be a fixed, circular dam, with openings admitting two gates, each 9 ft. deep and 40 ft. wide. The new dam will cost about $50,000. The height of it will govern the water surface for about 30 miles.

Wilmington, N. C.—Bids will be received by Capt. Earl I. Brown, Corps Engrs. U. S. A., until Jan. 10 for two 6-pocket bottom dump scows, as advertised in The Engineering Record.

Portsmouth, O.—It is stated that Filmore Musser, City Aud., will receive bids until Dec. 27 for $20,000 Kendal Ave. subway bonds.

**Cincinnati, O.*—The Bd. of Pub. Service is reported to have on Dec. 6 awarded to C. H. Glandorf, 8th and Plum Sts., the contract for building a retaining wall and restoring street at McMicken Ave. and Borden St. for $7,070, and to Edw. Meier, 3846 Colerain Ave., for retaining walls on Duckcreek Road for $2,876.

Panama.—Bids will be received until Jan. 2 by Lieut.-Col. H. F. Hodges, Corps Engrs., U. S. A., Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for furnishing steam gauges, valves, inspirators, sight-feed lubricators, injectors, etc., and repair parts for above fittings, as per circular, No. 407.

The Secretary of the U. S. Treasury at Washington, D. C., has accepted bids for the Panama Canal bonds to the amount of $2[illegible].

**Ottawa, Ont.*—The Dept. of Rys. and Canals is reported to have awarded contract for Sect. 1 of the Ontario-Rice Lake division of the Trent Canal to Lewis P. Nott, of Montreal, Que.

CURRENT NEWS SUPPLEMENT

DECEMBER 21, 1907.

DIRECTORY OF NATIONAL TECHNICAL AND TRADE SOCIETIES.

AMERICAN SOCIETY OF CIVIL ENGINEERS. Secretary Charles Warren Hunt, 220 West 57th St., New York. Annual meeting, New York, Jan. 15-16, 1908. Next meeting, Jan. 8, 1908.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS. Secretary, Calvin W. Rice, 29 West 39th St., New York.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS. Secretary, Ralph W. Pope, 29 West 39th St., New York.

AMERICAN INSTITUTE OF MINING ENGINEERS. Secretary, R. W. Raymond, 29 West 39th St., New York.

NATIONAL FIRE PROTECTION ASSOCIATION. Secretary, W. H. Merrill, Jr., Chicago.

AMERICAN INSTITUTE OF ARCHITECTS. Secretary, Glenn Brown, Washington, D. C.

ASSOCIATION OF ENGINEERING SOCIETIES. Secretary, Frederick Brooks, 31 Milk St., Boston, Mass.

AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS. Secretary, W. M. Mackay, 113 Beekman St., New York.

CANADIAN SOCIETY OF CIVIL ENGINEERS. Secretary, Clement H. McLeod, 413 Dorchester St., West, Montreal. Annual meeting, Montreal, Jan. 28, 1908.

SOCIETY FOR THE PROMOTION OF ENGINEERING EDUCATION. Secretary, Prof. M. S. Ketchum, University of Colorado, Boulder, Colo.

AMERICAN SOCIETY FOR TESTING MATERIALS. Secretary, Prof. Edgar Marburg, University of Pennsylvania, Philadelphia, Pa.

AMERICAN RAILWAY ENGINEERING AND MAINTENANCE OF WAY ASSOCIATION. Secretary, E. H. Fritch, 962 Monadnock Block, Chicago.

AMERICAN WATER WORKS ASSOCIATION. Secretary J. M. Diven, Charleston, S. C.

AMERICAN PUBLIC WORKS ASSOCIATION. Secretary, W. H. Flint, Chattanooga.

ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS. President, J. B. Lober, 1232 Land Title Building, Philadelphia.

NATIONAL ASSOCIATION OF CEMENT USERS. President, Richard L. Humphrey, Harrison Building, Philadelphia. Annual convention, Buffalo, N. Y., Jan. 20-25, 1908.

AMERICAN SOCIETY OF REFRIGERATING ENGINEERS. Secretary, H. W. Ross, Room 806, 258 Broadway, New York.

AMERICAN PUBLIC HEALTH ASSOCIATION. Secretary, Dr. C. O. Probst, Columbus, O.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS. Secretary, S. F. Patterson, Concord, N. H.

AMERICAN STREET AND INTERURBAN RAILWAY ASSOCIATION. Secretary, Bernard V. Swenson, 29 West 39th St., New York.

AMERICAN FOUNDRYMEN'S ASSOCIATION. Secretary, Richard Moldenke, P. O. Box 432, New York.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

LORD KELVIN.

William Thompson, first Lord Kelvin, who died in Glasgow on Dec. 17, was known the world over as the possessor in an extraordinary degree of great scientific ability and also of attainments enabling him to use his scientific knowledge for direct practical purposes. He inherited his talents from his father, a man of Scotch-Irish descent, who was professor of mathematics at a Belfast institution for many years. His son William was born there on June 25, 1824. In 1832 his father became professor of mathematics at the old College of Glasgow, and from that time until the close of his life the distinguished son was a resident of that city. His early education was obtained mainly from his father, although he attended the college at Glasgow, and his later education was obtained at Cambridge, where he was graduated in 1845 with high honors. It may be added that in addition to achieving success as a student he found time to take part in various athletic sports and rowed in the winning boat in a race with Oxford. In fact, throughout his long life, Lord Kelvin was noted for his keen interest in everything going on about him, and had none of the petulant disregard for human affairs which is currently assumed to be an inevitable part of the character of an eminent scientist.

The scientific achievements of Lord Kelvin are altogether too numerous to be enumerated here. Many of them were due to his extraordinary mathematical ability and that peculiar quality which has been termed a mathematical imagination. He showed a great deal of interest from the earliest days of his career as a physicist in the causes of things, particularly in theories regarding the more important phenomena of physics. The ultimate nature of matter, the relations between heat and mechanical power, the basic facts of electricity, all received a great deal of attention from him and his writings on the subject have received international recognition as statements by high authority.

To the engineer, his career has been particularly interesting on account of the deep interest he has shown in the development of apparatus for utilizing the facts discovered by himself and other physicists. The part he played in the development of the Atlantic cable service was of the utmost importance, in fact it is safe to say that he made submarine telegraphy a practical art. He also took a great deal of interest in the development of wireless telegraphy, although he did not contribute personally to its practical development. It should be added that he was knighted in 1866 on account of his work in submarine telegraphy.

Just as important was his work for navigation. Until he investigated the mariner's compass, ascertained the cause of its numerous defects, and devised means for remedying them, navigators were subjected to all kinds of hazards on account of a ship's magnetism, after iron hulls came into use. Lord Kelvin found a method of overcoming these troubles, and the practical value of his invention was probably as great as his achievements in submarine telegraphy. Another of his inventions which

LORD KELVIN.

played an important part in the development of electric measurements was the quadrant electrometer. From his early days Lord Kelvin was accustomed to tell his students that their knowledge was not good for much until it was sufficiently accurate to enable them to measure things by it. It was this belief in the desirability of measuring things that probably led to his making so many improvements in electrical apparatus. His machine for automatically computing the courses of tides in any part of the world is another interesting example of his ability to harness the laws of science in an unusual way for the service of man. All his inventions of an important nature did not prevent him from improving a great many little things with the same care; for example he devised a form of faucet for plumping that has had a wide use in Great Britain.

RECLAMATION SERVICE WORK, 1907.

A summation of the work of the Reclamation Service for 1907 shows that it has dug 1,815 miles of canals, or nearly the distance from Washington to Idaho. Some of these canals carry whole rivers, like the Truckee River in Nevada, and the North Platte in Wyoming. The tunnels excavated are 56 in number, and have an aggregate length of 10¾ miles. The Service has erected 214 large structures, including the great dams in Nevada and the Minidoka dam in Idaho 80 ft. high and 650 ft. long. It has completed 670 headworks, flumes, etc. It has built 611 miles of wagon road in mountainous country and into heretofore inaccessible regions. It has erected and placed in operation 830 miles of telephone lines. Its own cement mill has manufactured 80,000 bbl. of cement, and the purchased amount is 403,000 bbl. Its own saw mills have cut 3,036,000 ft. B. M. of lumber, and 23,685,000 ft. have been purchased. The surveying parties of the Service have completed topographic surveys covering 10,970 square miles, an area greater than the combined areas of Massachusetts and Rhode Island. The transit lines had a length of 18,900 miles, while the level lines run amount to 24,218 miles, or nearly sufficient to go around the earth.

The diamond drillings for dam sites and canals amount to 66,749 ft., or more than 12 miles. To-day the Service owns and has at work 1,500 horses and mules. It operates 9 locomotives, 611 cars and 23 miles of railroad, 84 gasoline engines and 70 steam engines. It has constructed and is operating 5 electric light plants. There have been excavated 35,419,222 cu. yd. of earth and 4,745,000 cu. yd. of rock. The equipment now operated by the Service on force account work represents an investment of a million dollars.

This work has been carried on with the following force: Classified and registered service, including Washington office, 1,126. Laborers employed directly by the Government, 4,448; laborers employed by contractors, 10,789, or a total of all forces of 16,363. The expenditures now total nearly $1,000,000 per month. As a result of the operations of the Reclamation Service eight new towns have been established, 100 miles of branch railroads have been constructed, and 14,000 people have taken up their residence in the desert.

The Corbett Tunnel, one of the main features of the Shoshone irrigation project in Wyoming, has just been completed by the Reclamation Service under force account, the work having been turned over to the United States by the contractor on Aug. 10, 1906. The tunnel is 3½ miles long, and has a cross-section of 102 sq. ft., and a carrying capacity sufficient to irrigate 100,000 acres of land. Notwithstanding the scarcity of labor and the difficulty of obtaining materials for construction, the work progressed steadily and rapidly under Government supervision and was completed without any serious delays or casualties other than those incident to works of this magnitude. The structure is lined with concrete throughout, and with the Corbett diversion dam, which is now nearing completion, will be one of the most permanent and satisfactory pieces of work now under way by the Service.

The Gunnison Tunnel in Colorado, which is under construction by the Service by force account, has now been excavated a distance of 22,000 ft., of which nearly 2,000 ft. is headings in advance of the full section of the tunnel. The distance between the headings is in round numbers 8,000 ft., and the rate of progress is 20 ft. per day. If nothing happens to delay the work it will probably be possible to receive water through the tunnel by the irrigating season of 1909.

This work is being watched with a great deal of interest by engineers throughout the country by reason of the fact that it is the longest and largest underground waterway of its kind in the world. Its total length will be over 30,000 ft., its cross section 10½ x 11½ ft., and its capacity 1,300 cu. ft. per second. It will be cement lined throughout.

Both ends of the tunnel are now in very hard granite, which sustains itself without any timbering. The chief difficulty in the past has been that the rock has been so soft that expensive timbering had to be inserted to hold the roof and sides in place. This timbering in turn necessitated the placing of concrete lining in order to render the work permanent. In the granite section, as lining is not necessary immediately, it has been decided to reduce the size of the tunnel temporarily and run headings in advance of the full-size portion of the tunnel. By so doing it will be possible to connect the two ends of the tunnel and allow a portion of the water supply to come through during each irrigating season until final completion. During the remainder of the year, when the water is shut off, work on the tunnel can be resumed to complete it the full size in the granite.

The wisdom of rejecting excessive bids on the work under the Reclamation Service has been strikingly exemplified in the results obtained by force account work on the Tieton irrigation project in Washington. The tunnel work is costing a third less than the lowest bid received, while on open canal excavation the saving is still greater, the actual work costing 80 per cent. less than the lowest bid. This construction was carried on under very unfavorable conditions, the price of labor being extremely high and the men continually shifting.

STEEL PILING FOR PITS.

The accompanying illustration shows the first of a series of eight pits which are being built for the Pittsburgh Plate Glass Co., at Crystal City, Mo., by Mr. S. Caspar's, the well known contractor of Columbus, Ohio. The steel cofferdam used in this pit is interesting on account of its tightness and the rapidity with which it was put down. The pit illustrated is about 22x26 ft. in plan and 40 ft deep. About 20 ft. below the surface there is a 12-in. vein of quicksand, the material penetrated elsewhere, both above and below the quicksand, being clay. This work was started with wooden sheeting carried down horizontally to a depth of 18 ft., and the lower part of this sheeting on one side of the pit can be seen in the engraving. The work proceeded rather slowly at first and the superintendent in charge, Mr. J. T. Nealon, decided to use interlocking steel sheeting of the Nye type. A line of steel waling of I-beams was constructed, the beams having holes bored in them every 2-in for a distance of about 2 ft. from all the ends, so that the dimensions of the waling could be adjusted from about 22x26 ft. to a foot less if necessary. It will be seen in the illustration that there are two courses of waling of this sort. The steel sheeting was driven with an ordinary pile driver, using an 1,800-lb. hammer. The piling was held in position in the leads of the driver with a follower cap made by the Curtis Steel Foundry of St. Louis. After this sheeting was driven, very little water entered the pit; a 2-in. siphon could empty the pit in the morning and there would be no more pumping necessary during the day. The channels used for the sheeting on this work were 15-in. 33-lb. 40 ft. long. It is understood that Mr. Nealon will follow the same method in sinking the remaining seven pits.

DEEP SHAFTS ON THE CATSKILL AQUEDUCT.

The engineers of the Board of Water Supply of New York City have discovered that to drive the Catskill aqueduct tunnel through solid rock under the Rondout Creek and Wallkill River south of Kingston, they will have to drive deep tunnels, the first to cost about $5,500,000, and the one under the Wallkill to cost about $4,500,000. These valleys are so far below the natural level at which the water would flow in the ordinary aqueduct that the water will have to be carried across them under pressure.

Leaving Ashokan reservoir in a deep trench near the middle of the chain of dams across the Esopus Creek and Beaverkill, the aqueduct crosses Esopus Creek and Tongore Brook, then 6 miles further pierces a nose of the mountains in a tunnel about one mile long, then runs 1¼ miles to the northerly side of the Rondout Valley. Here the water will drop down a shaft 750 ft. deep and flow for about 4½ miles to another shaft, where it will rise 750 ft. and pierce Bonticou Crag in the Shawangunk Mountains, passing through the ridge 2⅓ miles northest of Lake Mohonk.

Emerging onto the hillsides of the Wallkill Valley, the aqueduct follows the side of the valley for about 4 miles and then drops into a shaft 480 ft. deep and proceeds in a direct line across this broad valley for a distance of about 4 ½ miles to the little hamlet of Ireland Corners, where it rises through another shaft 410 ft., and proceeds southward in a trench along the hillside for many miles toward the Hudson River, crossing at Storm King, tunnelling under the Moodna Creek Valley on the way.

These deep siphon tunnels, because of the uncertainties of all work at great depths, must be undertaken at the earliest possible day. The work will take several years.

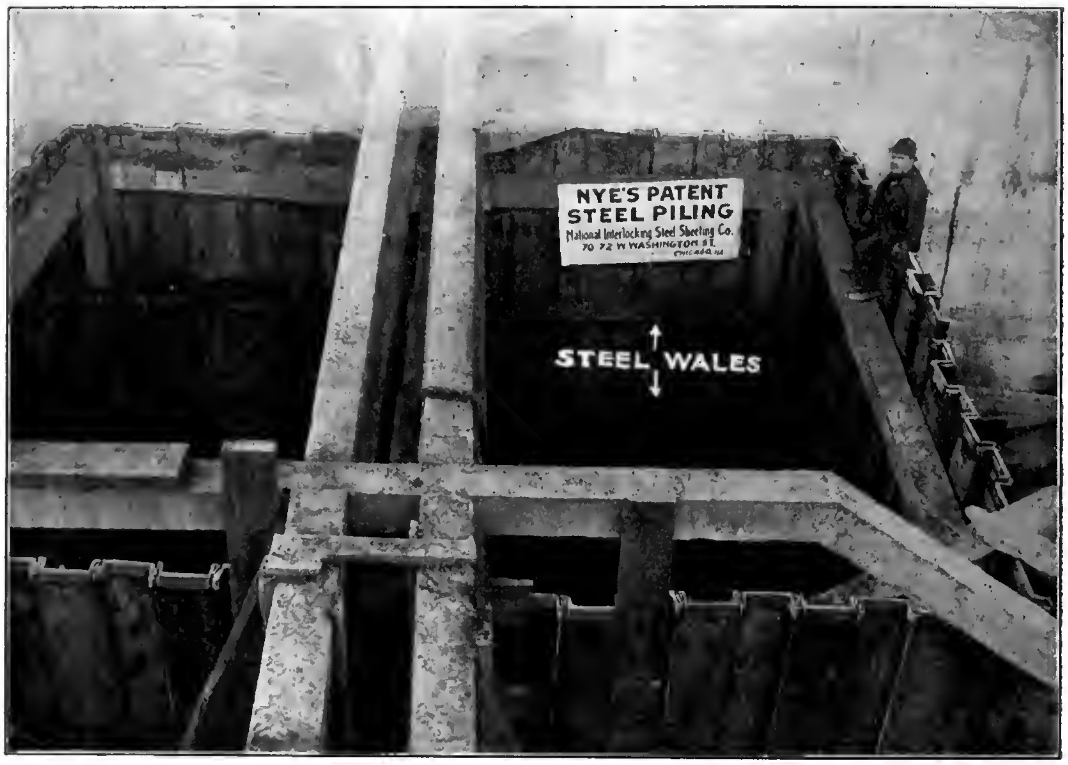
IMPORTANT HYDRO-ELECTRIC AND RAILWAY PLANS IN VIRGINIA.

On Dec. 13, an interesting engineering program for the development of Eastern Virginia was explained when Judge Alvin T. Embrey appeared before the Corporation Commission of the State and applied for a charter for the Fredericksburg & Southern Ry. Co. to build a railroad (to use any motive power) from at or near Fredericksburg, Spotsylvania Co., to Doswell, Hanover Co., with the privilege of extending the line 50 miles in any direction, together with the right to buy, lease, or merge with any other railway and water power companies. This line will practically parallel the Richmond, Fredericksburg & Potomac R. R. from Fredericksburg to Doswell When the latter was built the State Legislature, in order to encourage subscriptions, enacted a prohibition against paralleling this line for 35 years, and at the expiration of this time the act was renewed. The State took about one-third of the capital stock of this road, and owns it at present. On Dec. 16, the Corporation Commission listened to arguments concerning the granting of the charter, and of course the Richmond, Fredericksburg & Potomac R. R., as well as the State proxies, opposed it. The Commission reserved their decision. Should it refuse to grant this charter the case will immediately be taken to the State Supreme Court, and this tribunal will be asked to decide, as it did by what is known as the [illegible] case, by which the Richmond & Chesapeake Bay Ry. Co. received its charter, whether or not it is unlawful for the Corporation Commission to refuse to grant a charter for a line paralleling the Richmond, Fredericksburg & Potomac R. R. for a portion of its distance. Should the Supreme Court in January turn the company down, it will make a fight before the next Legislature to have the law against paralleling repealed.

All the water power in the Rappahannock River and most of the power in the James and Appomattox Rivers, together with all lighting, power and street railway, both urban and interurban, in Richmond, Manchester and Petersburg, are controlled by Mr. Frank J. Gould and Miss Helen Gould, of New York City. Mr. Gould also owns the Richmond & Chesapeake Bay Ry. Co., which in turn owns the Fredericksburg Power Co., and the latter is to own the Fredericksburg & Southern.

The Fredericksburg Power Co. has purchased more than 4,000 acres of land on the Rappahannock River, and is preparing to develop more than 30,000 h.p., which is more than the power furnished by both the James and the Appomattox Rivers. This power will be an inducement to new industries to locate at or near Fredericksburg and it will be used to operate the street railway in Fredericksburg and furnish power to the Fredericksburg & Southern road. Preparations are being made for a complete hydraulic electrical development on the Rappahannock River at and above Fredericksburg, and an application is soon to be made to the City Council of Fredericksburg for a franchise to sell light, heating and power. The Fredericksburg & Southern R. R. will be built along the same high-grade lines as the Richmond & Chesapeake Bay line, which, although only 17 miles long, cost $760,000. Its construction will give Richmond a much closer business connection with the country for a distance of 62 miles north of it. A line from Fredericksburg to Doswell, with the Richmond & Chesapeake Bay Ry. extending its line from Ashland to Doswell, will give Mr. Gould control of an electric line from Fredericksburg to Petersburg, a distance of 85 miles, together with street railways in the cities of Fredericksburg, Richmond, Manchester and Petersburg.

The officers and incorporators of the Fredericksburg & Southern are: Wm. C. Whitner, President; E. J. Smith, Vice President; Alvin T. Embrey, Secretary and Treasurer, and these gentlemen, together with A. P. Rowe, A. W. Embrey, C. W. Jones, and J. T. Lowrey of Fredericksburg, Va., form the incorporators and directors. The officers of the Fredericksburg Power Co. are: Wm. C. Whitner, President; Alvin T. Embrey, Secretary and Treasurer, and they, together with A. W. Embrey, A. P. Rowe, of Fredericksburg, Va., and W. L. Roddey, of Rock Hill, S. C., are the Directors. Mr. Whitner is chief engineer of hydraulics for Mr. Gould in all of his enterprises in Virginia.



STEEL COFFER DAM USED AT CRYSTAL CITY, MO.

Cement Manufacturers will find much to interest them in an unusually attractive book just issued by the Lehigh Car, Wheel & Axle Co., Fullerton, Pa. After an introduction on the development and processes of the Portland cement industry, the Fuller-Lehigh pulverizer mill is described in detail, with excellent illustrations, and plans are given for an "ideal" clinker department in a 3,000-bbl. mill. Illustrations and descriptions are then given of the installations of Fuller Lehigh pulverizer mills for different purposes in several cement works.

PERSONAL NOTES.

Mr. J. P. Claybrook has been reappointed city engineer of Louisville, Ky.

Mr. John Chambers, a civil engineer, has been appointed Building Inspector of Louisville, Ky.

Mr. G. H. Hazelhurst has been appointed chief engineer of the Georgia & Florida Ry. System.

Mr. E. Y. Allen has been appointed village engineer of South Orange, N. J., succeeding Mr. E. R. Halsey, resigned.

John E. Haight, city engineer of Shelbyville, Ky., was run down and killed by a railway train near Independence, Ky., Dec. 13.

Mr. Charles E. Wells, White Plains, N. Y., has been appointed a division engineer in the service of the Board of Water Supply of New York City.

Mr. W. H. Balch, engineer for the Aberthaw Construction Co., Boston, Mass., is now engaged on special work in Philadelphia for Mr. J. C. Trautwine, Jr.

The firm of Benedict & Sturgeon, mining engineers, Denver, Colo., has been dissolved. Mr. H. B. Benedict is continuing the business, engaging in general engineering. Mr. E. A. Sperry is associated with Mr. Benedict.

Mr. C. W. Dyott has resigned his position with the Westinghouse Electric & Mfg. Co., and has opened an office in the Westinghouse Building, Pittsburg, Pa., as engineer, making a specialty of electric motors and electrical mining machinery.

Mr. Howard Egleston, in charge of the construction of the eastern end of the Del Rio and Nogales branch of the Cananea, Yaqui River & Pacific R. R., has been transferred to Mazattan, where he will have charge of track laying and bridge work.

Mr. Vincent Salomone has retired from the contracting firm of Bruno, Salomone & Petitti, Boston, and the business will hereafter be carried on under the name of Bruno & Petitti in the Kimball Bldg., instead of at the former address of 23 Court St.

Lieut.-Col. George W. Goethals, Corps of Engineers, U. S. A., chairman and chief engineer of the Isthmian Canal Commission, and Mr. J. C. S. Blackburn, governor of the Panama Canal Zone and member of the Canal Commission, arrived in New York, Dec. 16, on a six-weeks' leave of absence.

The firm of Dow & Smith, chemical engineers, New York, have been retained by the City of Philadelphia to organize and carry on their inspection system covering all the asphalt pavements to be laid in that city during the coming year, about 1,000,000 sq. yd. Many other cities have already retained them in a similar capacity, recognizing that their services, by insuring the proper character of the workmanship and materials used, tend to eliminate many of the unsatisfactory features of the present much discussed system of guarantees.

The following have recently been appointed resident engineers in the office of the New York State Engineer and Surveyor: G. R. Winslow, Utica; H. E. Smith, Albany; Perry Filkins, Brewster; James Burden, Troy; R. S. Greenman, Albany; O. C. Richards, Sandy Hill; L. C. Hurlbard, Albany; O. J. Dempster, Herkimer; T. M. Ripley, Albany; and C. H. Hoyt, Albany. George

W. Bradley, Marcy, has been apponited an assistant engineer in the same office.

Thomas Fitch Rowland, one of the leading engineers this country has produced, died at his home in New York on Dec. 13. His greatest fame came to him as the financial backer of John Ericsson and the builder of the first monitor, but the construction of that famous vessel was but one achievement that made his Continental Iron Works noted among engineers. Mr. Rowland was born in New Haven, Conn., March 15, 1831. His early education was obtained at Lovel's School and at the Collegiate Preparatory School at New Haven. Instead of entering college he accepted employment with the New Haven & Farmington Railroad. Later he became associated with the New York, New Haven & Hartford Railroad, where he was employed as fireman and engineer. Subsequently he left this position to become second assistant engineer on the steamboat Connecticut, plying between Hartford and New York. In 1852 he accepted a position as draftsman with the Allaire works, in New York City, which he left in 1853 to become general superintendent of the Atlantic Dock Iron Co., in Brooklyn. In 1859 he established a business of his own at Greenpoint, which subsequently became the Continental Iron Works. Among his more important achievements was the construction of a quarter of a mile of wrought iron tube, 7½ ft. in diameter, which was placed on the top of the High Bridge to carry water from the Croton Aqueduct to the new reservoir in Central Park. At the outbreak of the Civil War the government gave him several contracts, and he constructed the gun carriages and mortar beds for the Navy Department and fitted out some of the steamers purchased of the merchant service, which took part in the capture of Port Royal. He also constructed all the vessels composing the Port Royal mortar fleet. In October, 1861, John Ericsson and his associates gave Mr. Rowland the contract to build an iron floating battery in accordance with Ericsson's plans, and the vessel was launched Jan. 30, 1862. In 1887 the business was incorporated as the Continental Iron Works, of which Mr. Rowland was president and general manager. Mr. Rowland was granted over fifty patents for machinery which he used in his own factory. Mr. Rowland became a member of the American Society of Civil Engineers in 1867 and was elected an honorary member in 1899. He was a director in 1871-73, vice-president in 1886-87, and established the Rowland prize in 1884. In 1882 he became a member of the American Society of Mechanical Engineers, and for many years took an active interest in its work.

BUSINESS NOTES.

J. G. White & Co., New York, engineers, constructors and purchasers for the Porto Rico Railways Co., Ltd., have ordered three Mogul locomotives from the Baldwin Locomotive Works for use on the San Juan-Caguas line and over the Caguas extension, which is now nearing completion. The locomotives are of one-meter gauge, have 44-in. drivers and have a total weight of 90,000 lb. The tender weighs 60,000 lb. They are intended principally for freight traffic, Caguas being the collecting center of the richest tobacco raising center of the island. The locomotives will be finished next month.

On account of the increase in business, the San Francisco office of the Independent Pneumatic Tool Co. has been moved to larger quarters at 61 Fremont St., in the machinery district, where a complete line of Thor air tools and spare parts will be carried in stock.

The Sandusky Portland Cement Co., of Sandusky, O., has started its new mill for "white" Portland cement for the highest grades of artificial stone objects. It is made from a vein of limestone having barely a trace of iron and by a process which is the result of many experiments and long study by Mr. S. B. Newberry, general manager of the company.

The plant of the Blanc Stainless Cement Co., Allentown, Pa., is now in operation, and Mr. J. Maxwell Carrere, treasurer and general manager of the company, has attained his long held ambition to make a strong cement of perfect color.

The Navy Bulletin, a booklet which should prove useful to everyone who sells motor-driven machinery to the U. S. Navy Department, has just been issued by the Cutler-Hammer Mfg. Co., of Milwaukee, makers of electric controlling devices. This company for many years has made a special study of Navy Department requirements, and in the booklet just issued, illustrations, descriptions, dimension diagrams and shipping weights are given on all Cutler-Hammer standard starting panels, speed regulating panels, machine tool controllers, resistances, circuit breaker panels, etc. Attention is called to the fact that Navy specifications preclude in nearly all instances the use of ordinary controlling panels and, furthermore, that apparatus acceptable for use in navy yards will not always be acceptable if supplied for use on shipboard. How to select the proper piece of apparatus in each case is explained, and numerous illustrations are presented of electric controlling appliances conforming to Bureau of Construction and Repair and Bureau of Equipment specifications.

CONTRACTING NEWS

OF SPECIAL INTEREST TO

CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Carbon Hill, Ala.—See "Power Plants, Gas and Electricity."

Eldorado, Ark.—Bids will probably be called for in the spring for the construction of water-works to cost about $30,000. Engineer, M. P. Jackson, of Eldorado.

Hope, Ark.—See "Power Plants, Gas and Electricity."

Vallejo, Cal.—The Bd. of Works is stated to have passed favorably on the report of City Engr. Noyes in which he asked for a new reservoir site and lake, to enlarge the local water system. An election will probably soon be held to vote on issuing $60,000 bonds to enlarge the system.

San Francisco, Cal.—At a meeting of the Public Utilities Com. of the Bd. of Superv. on Dec. 3, plans are reported to have been presented by City Engr. Woodward for an auxiliary water system for fighting fires in the district bounded by Devisadero, the Bay, Channel St. Treat Ave. and 20th St., and with a zone for the Potrero and part of North Beach; estimated cost of work $5,250,000.

Salida, Colo.—See "Power Plants, Gas and Electricity."

Madison, Ga.—Bids will be received by E. W. Butler, Mayor, until Dec. 31 for $50,000 water works, sewerage and electric light bonds.

Waycross, Ga.—A. M. Knight, Mayor, writes that the citizens on Dec. 13 voted to issue $20,000 bonds for water-works extension.

**Atlanta, Ga.*—We are informed that the Wisconsin Engine Co., of Corliss, Wis., has secured the contract for a 20,000,000-gal. vertical triple expansion pump; cost about $139,500 (bids opened Nov. 25).

Cottonwood, Idaho.—The Cottonwood Water & Light Co. is reported to have secured a franchise to establish a water system.

**Batavia, Ill.*—The Henry R. Worthington Co., of New York, N. Y., is reported to have secured contract for auxiliary pump for water works at $1,400.

Ft. Wayne, Ind.—Bids will be received by the Bd. of Pub. Wks. until Jan. 6 for the purchase of 4 tubular boilers, now in service at the city water works station, on N. Clinton St., as advertised in The Engineering Record.

Weleetka, Ind. Ter.—See "Power Plants, Gas and Electricity."

Sapulpa, Ind. Ter.—J. O. Fulp, City Recorder, writes that the citizens on Dec. 9 voted to issue bonds for the construction of water works; probable cost, $50,000.

Ft. Leavenworth, Kan.—Bids will be received until Dec. 27 by Capt. J. E. Normoyle, Q. M., U. S. A., for constructing water mains at this post.

New Orleans, La.—The Executive Com. of the Sewerage and Water Bd. on Dec. 10 adopted specifications for a 4,000,000 gal. pump for the Algiers water purification station.

Marion, Mass.—Col. Harry E. Converse has been selected as chairman of the Bd. of Water Comrs. which will have charge of the construction of the proposed water works. It is proosed to petition the State Legislature for permission to issue bonds for the construction; probable cost of plant, $75,000. Engineer, Louis E. Hawes, of Boston.

Mentone, Mich.—The Town Bd. is reported to be considering the construction of water works.

Marquette, Mich.—The City Council is reported to be considering the question of employing a sanitary engineer to examine water supply with a view to improving same.

St. Paul, Minn.—Specifications are reported to have been presented to the Water Bd. for another extension to the Centerville conduit. It is proposed to construct about 1,400 ft. next year.

Speed Addition (Vicksburg Postoffice), Miss.—The citizens are reported to have voted to issue bonds for the construction of water-works.

Lincoln, Neb.—There is some talk here of constructing a separate fire protection system. Nothing definite has yet been done. Wm. Grant, City Engr.

Camden, N. J.—Local press reports state that bids were opened by the Water Com. of City Council on Dec. 17, for improving the present artesian water supply system and adding to present supply of 17,000,000 gals. at least 5,000,000 gals. daily, and two propositions were received, one from J. L. Sweigard & Co., and the other from M. P. Quinn, both of Philadelphia, Pa. No action was taken in the matter.

Morris Plains, N. J.—Bids will be received until Jan. 9 by the Com. on Supplies of the New Jersey State Hospital at Morris Plains (Geo. W. Jagle, Chmn.), for furnishing supplies including 1,500 ft. 6-in. c. i. water mains, 7 6x6-in. water main tees, run, hub and spigot, branch hub, 2 6x6x4-in. water main tees, etc., 6 6-in. Kennedy improved fire hydrants, etc., also lumber.

Livingston Manor, N. Y.—See "Power Plants, Gas and Electricity."

**Buffalo, N. Y.*—The U. S. Cast Iron Pipe & Fdry Co., Buffalo, N. Y., is reported to have secured the contract for c. i. pipe and special castings for the year ending July 1, 1908, as follows: Cast iron pipe, 3-in., $40 per net ton; 4-in., $38; 6-in. to 48-in., $32.50.; ordinary specials 3-in. to 30-in., $60 per net ton, and from 24-in. to 48-in., $85. Flanged specials, all sizes, $100.

Syracuse, N. Y.—We are informed that maps and plans are now being prepared for the proposed reservoir and conduit line from Skaneateles Lake to the city of Syracuse; probable cost of work, $1,500,000. Henry C. Allen, City Engr.

Albion, N. Y.—The Village Clk, writes that a committee of five has been appointed to locate a new water supply; no engineer selected as yet.

Albany, N. Y.—Water supply bonds to the amount of $100,000 are reported sold.

**Rochester, N. Y.*—The following are reported to be the bids opened on Dec. 11 by the Bd. of Contract and Supply for the construction of a by-pass gate house at Cobbs Hill Reservoir, on Monroe Ave.: Dennison & Co., $15,947 (awarded contract); R. T. Ford Co., $16,238; Gorsline, Swan & Rice, $16,315.

Bids will be received until Dec. 25 by the Bd. Contracts and Supply (F. X. Pifer, Clk.) for constructing a gate house at Cobbs Hill Reservoir. J. Foster Warner, Archt., 1036 Granite Bldg.

Maxton, N. C.—F. L. Black, City Clk. and Treas., writes that the citizens on Dec. 9 voted to construct water-works and a seewrage system; probable cost, $50,000. Bids for construction will be called for about Jan. 15. R. M. Williams, Mayor. Engineer, J. M. Bandy, of Laurinburg.

Burlington, N. C.—A. F. Barrett, Mayor, writes that Gilbert C. White, of Durham, has been selected to prepare plans for water-works and a sewerage system; cost about $100,000.

Dayton, O.—The question of extending the water mains to Ohmer Park, at a cost of $12,000, is reported under consideration.

Guthrie, Okla.—Plans and bids will be received at the office of C. M. Barnes, Mayor, until Jan. 7 for the establishment of a filtration system having a capacity of 1,000,000gal. of water per day; also for furnishing 8, 4 and 6-in. c. i. pipe for extension of water mains.

Panama.—Bids will be received until Dec. 30 by Lieut.-Col. H. F. Hodges, Corps Engrs., U. S. A., Genl Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for furnishing c. i. pipe specials and gate valves as per circular No. 409-A.

Houston, Tex.—The Wm. A. Wilson Realty Co., is reported to have decided to lay about a mile of 8-in. water main, under supervision of its engineer, F. L. Dormant.

Sweetwater, Tex.—The proposed water works, for which Burns & McDonnell, Scarritt Bldg., Kansas City, Mo., are preparing plans, will cost about $75,000. Date not yet set for receiving of bids for construction.

Norfolk, Va.—See "Miscellaneous."

Spokane, Wash.—The lowest bid recently received for supplying the machinery required for the pumping station for the development of the underground flow, is stated to have been submitted by the Fairbanks-Morse Co., of Chicago, Ill., for $12,360.

Lynden, Wash.—D. W. Bender, Town Clk., writes that the citizens have voted to construct water-works. Bids will probably be called for in the spring.

Seattle, Wash.—See "Sewerage and Sewage Disposal."

Berlin, Ont.—This city is reported to have in contemplation the issue of $6,000 bonds for extending and improving the water works.

Gravenhurst, Ont.—This city is stated to have petitioned the Ontario Ry. & Municipal Bd., for permission to issue $15,000 bonds for extending and improving the water works.

Toronto Junction, Ont.—The Supt. of Water Works is stated to have presented to Town Council a report on improvements contemplated to the water works, which he estimates at $100,000.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

East Lake (Birmingham Postoffice), Ala.—The City Clk. writes that the proposed sewerage system will cost bet. $12,000 and $15,000. Nothing will be done until bonds are sold. Engineer, L. D. Lea, of East Lake.

Hartford, Conn.—Bids will be received until Dec. 30 by the Bd. Contract and Supply (Chas. E. Parker, Secy. pro tem.) for constructing Sec. B of the Homestead Ave. intercepting sewerage system, consisting of about 2,800 lin. ft. concrete or brick conduit 4 ft. 9 in. diam.; probable cost $35,000 to $40,000. F. L. Ford, City Engr.

Madison, Ga.—See "Water."

Albany, Ga.—The City Council is reported to have decided to call an election to vote on issuing $25,000 bonds to be added to $18,077 already laid aside to be expended in 1908 for the perfection of the city's drainage system.

Waycross, Ga.—A. M. Knight, Mayor, writes that the citizens on Dec. 3 voted to issue $10,000 bonds for sewers.

Silvis, Ill.—It is stated that estimates are being prepared for a sewerage system.

Elgin, Ill.—Carl E. Plum, City Engr., writes that bids will be received by the Bd. of Local Improv. (Arwin E. Price, Pres.) until Dec. 26 for the construction of storm and sanitary sewers in the West Side Dist., to consist of 3,104 ft. of 18 to 6 in. vitr. pipe sewers, 7 manholes, 10 catch basins and 8 inlets; cost $3,200.

Riverside, Ind.—The Town Trus. are reported to have decided to construct two additional sewers, one from the Jersey St. sewer bet. Sutton and Jarrett Sts., and the other between Jarrett and North Sts.

Columbus, Ind.—Lawrence F. Orr, City Clk., writes that about $15,000 will be expended for main and lateral sewers. Engr., Wm. H. Rights, of Columbus.

Evansville, Ind.—The following are reported to be the bids opened on Dec. 7 by the Bd. of Pub. Wks. for constructing a 7-in. sewer in 7th Ave.: (a) sewer per lin. ft.; (b) inlets, ea.; (c) manholes, ea.; Lamasco. The Zeller-Hughes Co., (a) 93 cts.; (b) $29; (c) $23; The Newman-Vineyard Co., (a) 69 cts.; (b) $30; (c) $25.

Clinton, Ia.—This city will on Jan. 14 receive bids for about 3,500 ft. of 12 to 36-in. pipe sewers. Engineer Chas. P. Chase, of Clinton.

Traer, Ia.—Chas. P. Chase, of the Iowa Eng. Co., of Clinton, is preparing plans for a sewerage system for Traer; probable cost, $30,000. Bids for construction will be received about Mar. 1. T. F. Stoakes, Town Clk.

**Items marked thus give the names of parties awarded contracts.*

[illegible], Kan.—Bids will be received until Jan. 15 by R. S. Spencer, City Clk., for furnishing material and constructing a system of sewers, including a septic tank. Burns & McDonnell, Engrs., 821 Scarritt Bldg., Kansas City, Mo.

[illegible], Kan.—The City Council is reported to be considering the question of improving the sewerage system.

North Andover, Mass.—E. W. Bowditch, 62 Devonshire St., Boston, is reported to have completed plans and specifications for a sewerage system for North Andover to cost about $300,000.

Hanley Falls, Minn.—It is stated that bids will be received until Jan. 6 by J. M. Hardy, Village Recorder, for constructing sewers.

Springfield, Mo.—The City Council is reported to have authorized the City Engr. to prepare plans, profiles and estimates for the construction of a system of surface drainage or storm sewers, with a view to submitting question to vote on the issue of bonds for same.

Forsyth, Mont.—Bids are wanted, it is stated, until Jan. 4 for $10,000 sewer bonds. S. H. Irwin, Town Clk.

Auburn, N. Y.—J. Walter Ackerman, City Engr., writes that all bids opened on Dec. 3 for constructing sewers in the 4th, 5th, 6th and 7th Wards Sewer Dist., and for disposal works have been rejected. The following are the totals of bids received:

Constructing sewers (a) tile 24 in. long; (b) tile 36-in. long; (c) tile 24 in. long, including rock; (d) tile 36 in. long including rock: Syracuse Excavating Co., *a* $77,147; *b* $79,350. Brayer Bros., *a* $98,328; *b* $99,702; *c* $121,743; *d* $123,288. D. M. Rosser Eng. & Constr. Co., *a* $144,682; *b* $144,970; *c* $288,551; *d* $290,984.

Disposal works: Berch & Beebe, $47,036, and D. M. Rosser Eng. & Constr. Co., $42,329.

Syracuse, N. Y.—We are informed that bids will be called for this spring for the proposed intercepting sewers to cost about $500,000. Glenn D. Holmes, of Syracuse, is Ch. Engr. of Intercepting Sewer Bd.; Henry C. Allen, City Engr.

Rochester, N. Y.—The Council is reported to have adopted an ordinance, providing for the grading and construction of sewers in the Driving Park Ave. tract to cost about $45,000.

Burlington, N. C.—See "Water."

Marion, N. C.—See "Water."

**Dayton, O.*—C. P. De Weese, Asst. Clk. Bd. of Pub. Service, writes that J. T. Reese, 19 W. 2d St., has secured the contract for constructing sanitary sewers in a portion of Dist. 3, North Dayton (bids opened Dec. 4), for $72,856. The work consists of 70,050 ft., 6 to 15-in. vitri pipe sewers, 68,250 ft. trench and back fill 6 to 28 ft. deep, 80 lamp holes, 75 flush tanks, flush tank connections, repaving 1,500 sq. yds. brick pavement, 100 sq. yds. asphalt, 6,000 lin. ft. boulder repaving, c. i. pipe and specials, etc.

Springfield, O.—It is stated that bids will be received until noon, Dec. 26, by the Bd. of Pub. Service for the construction of a sewer in portions of Ludlow Ave., Sheridan Ave. and Burt St. F. A. Crothers, Clk. Bd.

Youngstown, O.—Local press reports state that bids will be received by the Bd. of Pub. Service until Dec. 27 for the construction of the Mahoning Ave. sewer.

Oberlin, O.—The Village Council is reported to have passed an ordinance providing for the construction of sewers in Dist. No. 14, on N. Prospect St. O. F. Carter, Mayor.

Canton, O.—Bids will be received until Jan. 3 by the Bd. Pub. Service (B. F. Faust, Clk.) for constructing storm sewers in a portion of E. 4th St., and branch sewers in portions of several other streets. Approximate quantities: 1,335 lin. ft. 36-in. brick sewer; 3,965 ft. 12 to 24-in. vitrified pipe sewers, 5 manholes for brick sewer, 13 manholes for pipe sewer, 46 catch basins. W. E. Sarver, City Engr.

Cincinnati, O.—Bids will be received until Jan. 3 by the Bd. Co. Comrs. (Fred Dreihs, Clk.) for constructing two culverts, one on Cooper Ave. and the other on Wyscarver R., Sycamore Township, as per specifications Nos 697 and 699, respectively.

Guthrie, Okla.—We are informed that W. W. Miller, City Engr., is preparing plans for a main sanitary sewer estimated to cost $10,000, and storm sewers in Dists. 1, 2 and 3, to cost about $30,000. C. M. Barnes, Mayor.

Bradford, Pa.—It is proposed to issue $76,000 bonds to be used for sewers, street paving, 3 bridges, a hose house, etc.

Hot Springs, S. D.—Bids will be received until Jan. 3 by W. A. Tucker, Treas., Battle Mountain Sanitarium, N. H. D. V. S., Hot Springs, for furnishing and delivering vitrified pipe.

Paris, Tex.—The State Attorney-General is reported to have approved the issue of $6,000 sewer bonds.

Spokane, Wash.—Chas. McIntyre, City Engr., is reported to be outlining plans for the improving of the sewage system of the business portion of the city. He will be ready to report plans to Council in about 2 or 3 months.

Seattle, Wash.—An ordinance has been passed providing for the construction of sewers in Fuhrman Ave. to cost $21,900.

The estimated cost has been reported on property owners' majority petition for the improvement of Thorndyke Ave. to consist of grading, constructing concrete sidewalks, sewers and water mains, at $124,000. R. H. Thomson, City Engr.

Chester, W. Va.—John A. George & Sons, of East Liverpool, O., are preparing plans for a sewerage system for the Chester Improvement Co., to cost about $[illegible]. Nothing further will be done until the spring.

McMechen, W. Va.—Press reports state that all bids recently received for constructing a sewerage system here have been rejected and new bids will be called for.

[illegible]ville, Wis.—It is proposed to construct the main [illegible] sewer the coming season at a cost of $60,000. C. [illegible], City Engr.

**Toronto, Ont.*—Rutherford Cumming, of Toronto, is reported to have secured the contract for the erection of a corrugated iron building, on Clifford St., in which will be installed a plant for the experimental treatment of sewage and the testing of water by the provincial staff of bacteriologists and chemists. About $4,500 will be expended for the purchase of equipment.

Toronto, Ont.—The Bd. of Control and City Council are reported to be considering the construction of 3 1-2 miles of sewers in Parkdale.

BRIDGES.

Notes Arranged Alphabetically by States.

Attalla, Ala.—It is reported that bids will be received until Jan. 6 by the Bd. Co. Comrs. at Gadsden for constructing a steel bridge to replace the Rhea Bridge over Willis Creek near Attalla. Cost not to exceed $10,000.

Ocola, Fla.—Bids will be received until Jan. 8 by the Bd. Co. Comrs. (S. T. Sistrunk, Clk.) for constructing steel bridges across Blue River, near Dunellon; also Withlocooche River at Stokes Ferry.

Indianapolis, Ind.—It is reported that the Comrs. of Marion Co. will receive bids until Dec. 30 for the construction of concrete abutments and pier for bridge over Eagle Creek; for a concrete steel culvert on road in Section 21, and for a concrete steel culvert over Pfaff's Branch in West Newton. C. J. Clark, Co. Aud.

Peru, Ind.—Bids will be received, it is stated, until Dec. 26 by the Bd. Co. Comrs., for erecting two concrete arches. Chas. Griswold, Co. Aud.

Evansville, Ind.—Plans are stated to have been approved for the improvement of the Louisville & Nashville R. R. bridge over Pigeon Creek at Water St., at a cost of $40,000. W. H. Courtenay, Ch. Engr., Louisville, Ky.

Cedar Rapids, Ia.—It is stated that an election will be held in the Spring on the issuing of bonds for the construction of a bridge at 16th St.

Creston, Ia.—Bids will be received until Jan. 7 at the office of W. F. Craig, Co. Aud., for furnishing material and erecting all bridges and for all steel pipe and cement work in this county during the year 1908.

Tipton, Ia.—Bids will be received until Jan. 3 by the Bd. Co. Superv., for steel bridges, bridge piling and bridge lumber for the year 1908. P. H. Schneider, Co. Aud.

Topeka, Kan.—A. M. Patton, of Topeka, Gen. Supt. Topeka Street Ry. Co., writes that he will receive bids for the proposed steel viaduct to be constructed at Branner St.; cost, about $35,000.

Fitchburg, Mass.—The first step toward connecting the Water and Summer St. sections of the city is reported taken by the City Council in the form of an order instructing the Mayor and Aldermen to petition the County Comrs. for a location of an extension of Fourth St. and bridges spanning the Nashua River and the tracks of the Boston & Maine and New York, New Haven & Hartford R. R. at an estimated cost of $81,000.

Mohawk, Mich.—It is stated that the Keweenaw Central R. R. Co. is planning the construction of a bridge over the Mineral Range tracks near Mohawk, the structure to be 200 ft. long. T. E. Simer, Ch. Engr., Hancock, Mich.

**Minneapolis, Minn.*—The Minneapolis Steel & Machinery Co., of Minneapolis, is stated to have secured the contract for constructing a steel bridge over Minnesota River, at $37,500.

**Arcadia, Mo.*—A. D. Burnett Bridge Co., of Galesville, is reported to have secured the contract for constructing a steel bridge with concrete abutments near here, at $6,800.

Bethany, Mo.—It is stated that bids are wanted until Jan. 8 for constructing several steel bridges in this county. J. C. Howe, Bridge Comr.

Wayne, Neb.—It is stated that bids will be received until Jan. 10 by Chas. W. Reynolds, Co. Clk., for erecting and repairing bridges in this county during the year 1908.

Geneva, Neb.—Bids will be received until Jan. 14 by the Bd. Superv. (W. C. Peterson, Clk.), for furnishing material and erecting all county bridges, both bent and pile, steel and wooden, required by this county, during the 12 months beginning Jan. 14, 1908.

Mt. Holly, N. J.—Bids will be received until Dec. 27 (readvertisement) by Boards of Chosen Freeholders of the Counties of Burlington and Mercer at the Court House, Mt. Holly, for furnishing material and constructing a bridge over Crosswicks Creek from North Crosswicks in the County of Mercer, to Crosswicks in the County of Burlington. Bids to be submitted on 4 propositions, as follows: 1. For the construction and completion of concrete abutements, wing-walls and pier, steel superstructure and the necessary grading of approaches for a bridge; 2. For the construction and completion of concrete abutments, wing-walls, pier and steel superstructure for a bridge; 3. For the necessary grading of approaches for a bridge; 4. For the construction and completion of a two-span concrete arch bridge and approaches.

Princeton, N. J.—Andrew Carnegie is reported to have given an additional $20,000 for the construction of wings at the approaches of stone bridges over Princeton Lake.

**New York, N. Y.*—Bids were opened on Dec. 9 at the office of Jas. W. Stevenson, Comr. of Bridges, for the construction of the masonry piers, surface and sub-surface changes, and steel superstructure of the Manhattan and Brooklyn approaches of the Manhattan bridge, over East River, between the boroughs of Manhattan and Brooklyn, and the contract was awarded to John C. Rodgers, 1929 Amsterdam Ave., for $2,168,304.

Cohoes, N. Y.—Bids will be received until Dec. 28 for $18,000 bonds issued for the purpose of constructing a bridge across the first branch of the Mohawk River at Ontario St. Rich. Bolton, City Chamberlain.

Le Roy, N. Y.—Plans and specifications will be received until Feb. 1 for a bridge over Oatka River in Le Roy, as advertised in The Engineering Record. For further information address, Philo J. Sperry, of Le Roy.

Fargo, N. D.—See "Paving and Roadmaking."

West Union, O.—It is stated that bids will be received until Jan. 3 by S. S. Jones, Co. Aud., for constructing the superstructure of 2 bridges, one a quarter of a mile from Dunkinsville, and the other two miles from North Liberty.

Troy, O.—It is stated that bids will be received until Dec. 27 by E. E. Pearson, Co. Aud., for furnishing material and constructing the superstructure of a hand-lift bridge over the Miami and Erie Canal on Water St., said bridge to be a skew of 60 degrees, one roadway 20 ft. in the clear and 6-ft. walks on each side; 150 lbs. live load capacity.

Guthrie, Okla.—The City Engineer is preparing plans and specifications for the construction of 2 steel bridges across Cottonwood River, one on 5th St. and the other on 9th, same to have 16-ft. roadway, with sidewalk on one side; also the building of a concrete bridge across Cottonwood River at 5th St. C. M. Barnes, Mayor.

Washington, Pa.—See "Paving and Roadmaking."

South Bethlehem, Pa.—H. R. Fehr, of Easton, Pres. and Gen. Mgr. of the Easton Transit Co., states that it is proposed to build a bridge across the P. & R. Ry. Co.'s tracks, Northampton Heights Borough, near South Bethlehem, Pa., and is prepared to receive estimates for the work. Upon application to R. E. Neumeyer, C. E., South Bethlehem, the necessary information will be furnished.

Bradford, Pa.—See "Sewerage and Sewage Disposal."

Redfield, S. D.—It is reported that W. Bingham, Co. Aud., will receive bids until Jan. 10 for furnishing material and constructing all bridges that may be ordered during the year 1908.

Beaumont, Tex.—It is stated that plans are being prepared for the construction of a bridge over Pine Island Bayou to connect Jefferson and Hardin Counties, at an estimated cost of $15,000. J. A. Harrison is reported interested.

**River Falls, Wis.*—Bids were opened on Dec. 5 by Allen P. Weld, City Clk., for constructing a steel truss bridge at the Cedar St. crossing of the Kinnickinnic River, to be 140 ft. long, concrete floor, 20 ft. wide, cement sidewalks, 5 ft. wide and abutments, and the contract for same was awarded to the Minneapolis Steel & Machinery Co., of Minneapolis, Minn., for $12,250.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

**Mesa City, Ariz.*—The City Council has let contract for concrete walks and gutters to M. L. Vieux, of Phoenix, for about $3,500.

Hot Springs, Ark.—F. V. P. Ellsworth, City Engr., writes that the paving of Dists. 21 and 26 (bids for which were to have been opened on Nov. 20) has been postponed indefinitely. Expect to ask for new bids in the spring. The work consists of approximately 10,000 sq. yds. of asphalt, bitulithic or vitrified paving block on 6-in. concrete base; also about 5,000 sq. yds. vitri brick between tracks of Street R. R.

Ft. Rosecrans, Cal.—Bids will be received until Dec. 31 by Lieut. B. H. L. Williams, Constr. Q. M., U. S. A., for constructing macadam roadways and gutters at this post.

Jamestown, Colo.—It is stated that bids will be received until Dec. 28 by T. W. Jaycox, State Engr., Denver, for the construction and repair of about 2 miles of county wagon road, from Jamestown to Allen's Park.

Washington, D. C.—Bids will be received until Dec. 26 by the Comrs. D. C. (Henry B. F. MacFarland, Comr.), for furnishing the District Government 6x20-in. granite curbing during the remaining portion of the fiscal year ending June 30, 1908.

Lewiston, Idaho.—It is stated that bids will be received by W. L. Gifford, City Clk., until Jan. 16, for the construction of the J. Roth Rd. in Road Dist. No. 8.

**Rock Island, Ill.*—The Bd. of Local Improvements on Dec. 2 is stated to have awarded the contract for paving with asphalt a portion of 19th St. to the McCarthy Improvement Co. of Davenport, at $1.99 1-2 per sq. yd., estimated cost of improvement, $6,300.

Gibson City, Ill.—The Council is stated to have decided to expend $75,000 for street improvements.

Peoria, Ill.—The Bd. of Local Improvement is stated to have in contemplation the resurfacing of a portion of Adams St. with asphalt.

**Danville, Ind.*—D. D. Mills, Co. Aud., writes that the contract for constructing gravel road in Marion Township (Bids opened Dec. 15) has been awarded to Hicks Curry, of Danville, for $3,170.

Noblesville, Ind.—It is stated that bids will be received until Jan. 11 by the Bd. Co. Comrs., of Hamilton and Boone Counties, at Noblesville, for grading, draining and graveling 2 highways. N. W. Cowgill, Co. Aud., Noblesville.

Versailles, Ind.—It is reported that bids will be received by the Bd. Co. Comrs., until Jan. 7 for constructing 2 miles of macadamized roads. Nicholas Volz, Co. Aud.

Vincennes, Ind.—It is reported that Comrs. of Knox County will receive bids until Jan. 7 for the construction of 6,536 ft. of gravel road in Vincennes Township known as the Newton Rd.; the construction of 104,602 ft. of gravel road in Decker Township and 2 miles of gravel road in Vincennes Township known as the Beal Rd. John T. Scott, Co. Aud.

Crownpoint, Ind.—It is reported that bids will be received by the Comrs. of Lake County until Jan. 6 for the construction of a gravel road known as the Ruff Rd. No. 2, and a gravel road known as the Ruff Rd. No. 1, both in North Township. Chas. A. Johnson, Co. Aud.

**Cedar Rapids, Ia.*—M. Ford, of Cedar Rapids, is reported to have secured the contract for paving a portion of 15th St. at $1.48 per sq. yd.

New Orleans, La.—The Budget and Assessment Com. is stated to have reported favorably on the repaving of Napoleon Ave. and Magazine St.

Baton Rouge, La.—A. Swart, City Engineer, is reported to have estimated the cost of repaving pavement on Main St. and North Boulevard, at $12,000.

Ft. Washington, Md.—Bids will be received until Jan. 10 by the Constr. Q. M., U. S. A., for resurfacing macadam roads at this post.

**Items marked thus give the names of parties awarded contracts.*

Baltimore, Md.—Bids will be received until Dec. 27 by J. Barry Mahool, Pres. Bd. Awards, to grade, curb, gutter and pave with bitulithic asphalt blocks, vitrified bricks or sheet asphalt, a portion of Konig St.
*The contract for resurfacing a portion of 22d St. with bitulithic is reported to have been awarded to J. L. Robertson, 9 E. Lexington St., at $35,314.

Fitchburg, Mass.—See "Bridges."

Boston, Mass.—Bids will be received until Dec. 24 by the Boston Transit Comn. (B. Leighton Beal, Secy.), for furnishing and placing a thin layer of concrete surfaced with granolithic, for platforms, landings, passageway floors to various stations of the Washington St. tunnel.

Virginia, Minn.—It is stated that bids will be received until Jan. 7 by W. A. James, Clk. Town of Buyck, for constructing 6 miles of roadway from Crane Lake, Portage to Pelican.

Duluth, Minn.—The paving of a portion of 4th St. is reported contemplated at a cost of about $70,000.

**St. Joseph, Mo.*—The contract for paving a portion of King Hill Ave. is reported to have been awarded to the Phoenix Brick & Constr. Co.

**Salem, N. J.*—The Salem County Bd. of Chosen Freeholders is stated to have awarded to B. L. Tuft and Firman H. Lloyd the contract to construct a State road in Mannington Township, for $10,700.

Jersey City, N. J.—It is stated that bids will be received by Boulevard Comrs. John C. Sweeney, Clk., 580 Newark Ave., until Jan. 2, for furnishing supplies, during fiscal year, among which are the following. 2,500 yds. broken stone, as may be required, in sizes 2 1-2 to 1 1-2; 1,000 yds. road gravel, Roa Hook, Shark River, or equivalent; 1,000 yds. Pike County shale; 5,000 ft. No. 6 R. C. electric line wire; 3,000 ft. No. 6 twin (duplex) R. C. wire braided, 2 color cores; 1,000 ft. 1-4-in. galvanized guy wire; 1,000 1-4-in. mast arm wire; 2,000 arc light globes; 50,000 elliptical copper coated carbons, 1x 11 3-4 in.; 50,000 elliptical copper coated carbons, 1x7 1-4 in.; 50,000 round coated carbons, 1-2x12 in.; 250 chestnut poles, straight, clean and sound, 35 ft. long, butt 12 to 14 in.

**Flemington, N. J.*—The Bd. of Chosen Freeholders on Dec. 12 is stated to have awarded the contract for macadamizing about 34,200 ft. of public road between Hunterdon and Somerset Counties on the New Brunswick and Easton Turnpike to Delaware River Quarry & Constr. Co., for $48,852.

**Brooklyn, N. Y.*—The Barber Asphalt Paving Co., 114 Liberty St., N.Y. City, has secured the contract for regulating and repaving with asphalt on concrete foundation Irving Ave., bet. Suydam St. and Harman St., and bet. Greene Ave. and Myrtle Ave. (bids opened Dec. 4 by Bird S. Coler, Boro. Pres.) at the following bid: 11,860 sq. yds. asphalt pavment, $1.25; 100 sq. yds. old stone pavement relaid, 40 cts.; 1,660 cu. yds. concrete, $5.85; 3,130 lin. ft. new curb in concrete, $1.33; 2,500 lin. ft. old curbs reset in concrete, 83 cts.; total, $31,516. Totals of other bids: Cranford Co., 190 Montague St., $32,438, and Uvalde Co., 1 B'way, N. Y. City, $33,312.
*The Brooklyn Alcatraz Co., 407 Hamilton Ave., secured contract for regulating and repaving with asphalt on a concrete foundation of Skillman St. (bids opened Dec. 4) at the following bid: 7,370 sq. yds. asphalt pavt., $1.25; 10 sq. yds. old stone pavt. to be relaid, 40 cts.; 1,020 cu. yds. of concrete, $5.90; 3,685 lin. ft. of new curb, set in concrete, $1.25; 1,840 lin. ft. old curb, reset in concrete, 75 cts.; 22 noiseless covers and heads, complete, for sewer manholes, ea., $18; total, $21,617. Totals of other bids: Cranford Co., $22,516; Uvalde Co., $23,126, and Barber A. P. Co., $22,308.
*The Uvalde Co., 1 B'way, N. Y. City, secured the contract on Dec. 4 for regulating and repaving with asphalt on concrete foundation roadway of Ten Eyck St., at the following bid: 8,400 sq. yds. asphalt pavt., $1.24; 30 sq. yds. old stone pavt. relaid, 40 cts.; 1,170 cu. yds. concrete, $5.90; 3,840 lin. ft. new curbs, set in concrete, $1.30; 1,200 lin. ft. old curbs, to be reset in concrete, 80 cts.; 24 noiseless covers and heads, complete, for sewer manholes, ea., $18; total $23,715. Total of other bids: Cranford Co., $24,511, and Barber Asphalt Paving Co., $24,235.

Freeport, L. I., N. Y.—The Bd. of Trustees is stated to have decided to expend $54,000 on street improvements.

Mineola, L. I., N. Y.—Press reports states that work will probably begin in the spring on the Long Island motor parkway to be constructed from Garden City, Mineola, Hempstead, Meadowbrook, Westbury, Hicksville, Central Park to Lake Ronkonkoma, a distance of 34 miles, and thence to Riverhead; estimated cost about $2,000,000. Wm. K. Vanderbilt, Jr., of New York; A. R. Pardington, Ralph Peters, of Garden City, and others are reported interested.

Gouverneur, N. Y.—The State Surveyor is stated to have forwarded to the clerk of the Bd. of Superv. of this county detailed plans and specifications for the construction of three pieces of road in the county as follows: From Canton to Ogdensburg, 16 miles in length, estimated to cost $155,650; from Potsdam to Parishville Center, through the town of Pierepont, 5.12 miles in length, estimated to cost $47,500; from Potsdam to Colton, through the town of Pierepont, 7.90 miles in length, estimated to cost $76,500.

Rochester, N. Y.—Wetmore, Rauher & Vincennes, 270 South Ave., are stated to have submitted the lowest bid for paving portions of Atkinson St., at $14,921.
The paving of Meigs St. is reported contemplated.

Patchogue, N. Y.—The Village Trustees are reported to have authorized the Village Clerk to receive bids for constructing a boulevard by the bay extending from Bay to Cedar Ave.

Wheatfield, N. Y.—The Bd. Supervisors at Lockport is stated to have approved the estimate for constructing the Shawnee-Cambria Road, the improvement to cost $28,500. According to reports bids will soon be received by the State Engineer.

**Fargo, N. D.*—Jas. Kennedy, of Fargo, is reported to have secured the contract for paving with creosoted blocks the approach to the South Bridge, at $3,263.

**Cincinnati, O.*—The L. Drach Constr. Co., 206 E. 4th St., is stated to have secured the contract for macadamizing a portion of 1st Ave., at $15,651; also for paving with brick Valencia St., at $4,148.

Cincinnati, O.—Chas. N. Danenbower, City Engr., is reported to have estimated the cost of improving a portion of Clifton Ave. at $80,270.
The Bd. of Pub. Service is reported to have been directed to receive bids for improving a portion of Beechmont Ave.

Columbus, O.—Bids will be received by the Bd. Pub. Service (E. F. McGuire, Secy.) until Dec. 30 for grading and paving with hard burned brick or block or other substantial material on portions of numerous streets.

Delaware, O.—Bids will be received, it is stated, until Jan. 2 by F. D. King, City Aud., for $10,013 paving bonds.

Washington, Pa.—Bids will be received until Jan. 17 by the Co. Comrs. at Washington for the construction of an improved roadbed, culverts, bridges, etc., on Dry Run Rd., leading from Monongahela to Gingerhill, about 3 miles to be improved. Wm. Wylie Co., Road Engr.

Towanda, Pa.—It is stated that bids will be received until Dec. 31 by Jos. W. Hunter, State Highways Comr., Harrisburg, for constructing road in Wyalusing Township, Bradford County.

Bradford, Pa.—See "Sewerage and Sewage Disposal."

**Chehalis, Wash.*—Anderson & Robinson are reported to have been awarded the contract for paving Park, School, Washington and Adams Sts. for $8,500.

**Spokane, Wash.*—The Bd. Pub. Wks. is stated to have awarded contracts as follows: Grading, curbing and parking Carlisle Ave., Cedar St. and 18th Ave., to Mitchell Bros., at $5,100, $10,000 and $6,995, respectively; grading, curbing and parking 7th Ave., to Julia V. Costello, $8,500; sidewalks on Carlisle Ave., to Foster & Gardin, $2,300; sidewalks on Cedar St. and 18th Ave., to L. B. Handley, $2,624 and $1,970, respectively.

Seattle, Wash.—R. H. Thomson, City Engr., has reported the estimated cost on the following work: Prospect St. concrete walks, $14,900; paving alley in block 20, Borai's Addition, $3,000, and planking W. Stacy St., $1,300.
Ordinances have been passed providing for grading Graham Ave. at a cost of $27,000 ,and Davis Pl., to cost $30,200, and brick paving on Main St. to cost $4,100. R. H. Thomson, City Engr.

Seattle, Wash.—See "Sewerage and Sewage Disposal."

La Crosse, Wis.—Wooley & Hanson, of La Crosse, are reported to be the lowest bidder for the macadamizing of the Onalaska-North La Crosse Rd., at $3,900.

Janesville, Wis.—This city will purchase a new road roller next month.
Bids will soon be asked for 3,194 sq. yds. brick paving on E. Milwaukee St.

Wausau, Wis.—The paving of a portion of Fulton St. with macadam is reported contemplated.

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Carbon Hill, Ala.—Plans are being made to extend the transmission lines of the municipal electric lighting plant to the outskirts of the town. The water mains will also be extended. H. T. Butler, Supt.

Clanton, Ala.—The Clanton Light & Power Co. contemplates equipping its power house with new machinery. J. P. Van Derveer, Pres.

Dadeville, Ala.—The Mayor writes that the citizens on Dec. 9 voted to issue $10,000 bonds for improving electric light plant. Bids for bonds will be received on Jan. 1.

Argenta, Ark.—The managers of the municipal electric lighting plant propose establishing a commercial service and furnishing electricity for the street railway system. A. J. Trotier, Supt.

Hope, Ark.—Extensive additions and improvements are contemplated to the municipal electric light plant, which include the installation of 2 boilers, another engine and dynamo, and the construction of a new power house, and new water works system will also be built. Chas. M. Richards, Supt.

**Ft. Smith, Ark.*—The City Council is reported to have awarded to the Ft. Smith Light & Traction Co. a franchise to light the city with 181 lamps of 2,000 c. p., at $55 per lamp per year.

Sacramento, Cal.—Plans and specifications for a municipal underground conduit electric street lighting system have been presented to the City Trus. by Trustee Edw. J. Carragher, Chmn. of Com. having in charge the work of lighting the city streets. The plans have been prepared by C. L. Cory, of San Francisco, who estimates the cost as follows: Station building of fireproof construction, including foundation, $16,500; electrical machinery, $22,150; 600 arc lamps, $30,000; underground conduit system, $26,100; 184 cast iron posts, $18,600; copper wire, $39,350; engineer's plans and construction, $11,300; steam machinery installed complete, including 50,000-gal. oil tank, $73,200; total, $237,200.

Pasadena, Cal.—Early next year an election will probably be held to vote on issuing $200,000 bonds for an additional municipal and commercial lighting system. Heman Dyer, City Clk.

San Francisco, Cal.—The Northern California Power Co. is contemplating the construction of a hydro-electric station having an output of 20,500 h. p. E. V. D. Johnson, Mgr.

Fairfield, Cal.—E. D. N. Lehe, of Dixon, is reported to have decided to construct a transmission line up the valley from the substation near Cordelia.

Merced, Cal.—The Merced Falls Gas & Electric Co. contemplates constructing a new hydro-electric plant. H. H. Adams, Gen. Supt.

Oceanside, Cal.—The Oceanside Electric & Gas Co. contemplates extending its transmission line to San Luis Rey Valley to furnish electricity for pumping and irrigating purposes. Will furnish from 150 to 200 h. p. Eugene V. Griffes, Secry. and Mgr.

Salida, Colo.—The Salida Light, Power & Utility Co. is contemplating the construction of a hydro-electric plant, 10,000 ft. water pipe line, and installing a 750-kw unit. F. A. Sparks, Supt.

Durango, Colo.—The Standard Light, Power & Water Co. is planning to construct a 2,000 h. p. hydro-electric plant next year. M. Harrington, Mgr.

Berthoud, Colo.—The Northern Colorado Power Co. is planning to replace present direct-current street lighting system to alternating-current. Wm. J. Preston, Mgr.

Hartford, Conn.—The Hartford City Gas Light Co. is reported to be considering the advisability of construction of an electric light plant in connection with the gas works on Arch St. E. B. Bennett, Pres.

Washington, D. C.—See "Miscellaneous."

Washington, D. C.—Specifications are on file at the office of The Engineering Record, 239 West 39th St., New York, N. Y., calling for equipment for the heating, lighting and power plant for the U. S. Capitol and Congressional Buildings, bids for which will be received at the office of Elliott Woods, Supt. U. S. Capitol Bldg. and Grounds, until Jan. 15.

Quincy, Fla.—This city proposes to expend about $10,000 in the near future to improve the municipal electric plant. A new boiler of 150 h.p., one 75-kw. alternating-current, 2,300-volt generator and engine will probably be installed. J. B. Price, Supt.

Columbus, Ga.—Surveyors in the employ of the Columbus Power Co. are reported to have completed making a survey of the water power of Chattahoochee River between this city and West Point. In a distance of 35 miles the river falls 365 ft., affording an energy that is estimated to be over 100,000 h.-p. Most of this power is owned by the Columbus Power Co. It is said to be the policy of the company to develop these powers from time to time, to meet the demands from new industries being established in Columbus and vicinity. The company already has 3 plants in operation. Plans have been drawn for another dam and power house, 2 miles north of the city.

Caldwell, Idaho.—The Caldwell Power Co. contemplates installing three 100-kw. transformers in its plant. R. V. Sebree, Secy.

Emmett, Ida.—The Emmett Power & Water Co. is planning to change from steam to water power in the spring. W. A. Marshall, Mgr.

Delavan, Ill.—The Royal Light & Power Co. is said to be considering the installation of Tungsten lamps on its street lighting system. W. H. Few, Mgr.

Carterville, Ill.—H. C. Hope is owner of the Carterville electric light plant, and will probably purchase a 100-kw., alternating-current, 1,100-volt, 60-cycle generator, belted type.

La Harpe, Ill.—The La Harpe Electric Light & Power Co. is planning to increase the output of its plant by the installation of two direct-current generators having a rating of 40 kw. each. A. L. Blythe, Mgr.

Meredosia, Ill.—C. W. Skinner is owner of the Meredosia electric light plant and expects to install a complete new plant next spring.

Medora, Ill.—Frank Watson is owner of the Medora electric light plant, and expects to install a storage battery in his plant in the near future.

Harrisburg, Ill.—Chas. D. Stilwell, is Mgr. of the Peoples Water & Light Co., which is planning to make enlargements and extensions to its plant the coming year.

Sheffield, Ill.—The Sheffield Electric Light Co. contemplates making improvements to its plant during the year of 1908. H. W. Booth, Mgr.

Harvard, Ill.—The Harvard Electric Light & Power Co. contemplates the reconstruction of its entire overhead system. C. C. Condon, Mgr.

Ridgeville, Ind.—The Ridgeville Electric Light, Heat, Power & Water Co. contemplates the installation of a 30-kw. turbine in its plant. S. C. Lay, Mgr.

Decatur, Ind.—The city is said to be considering replacing the present street lighting system with alternating-current street lighting system in the spring. M. J. Mylott, Supt.

Winona Lake, Ind.—The Winona Electric Light & Water Co. is in the market for a 500-kw. turbo-generator set.

Crown Point, Ind.—The Crown Point Electric Co. is planning to increase the output of the plant by the installation of a 300-kw. turbine. F. H. Keeney, Mgr.

Farmersburg, Ind.—The Torr Electric Co. contemplates installing a larger engine in its plant in the near future. A. D. Torr, Mgr.

Ferdinand, Ind.—The Ferdinand Electric Light Co. contemplates installing a larger battery in its plant the latter part of next year. Wm. R. Sauer, Mgr.

Greencastle, Ind.—Paul H. White is reported to have petitioned Council for a franchise for furnishing light and power.

Garrett, Ind.—Plans are being prepared for extensive additions to the municipal electric lighting system, which include the installation of an engine, generator and a new arc lighting system.

Weleetka, Ind. Ter.—The Weleetka Light & Water Co. is planning to install another boiler having the same capacity of the present one, and either an 80,000-gal. tank or standpipe for city water works, or a second pump for direct pressure. D. F. Campbell, Mgr.

Des Moines, Ia.—The Des Moines Gas Co. (Jansen Haines, Mgr.) is reported to be preparing to enlarge and improve its plant; probable cost of work, $100,000.

Kansas City, Kan.—A company in which H. F. Wulf, Henry McGraw and others are interested, is reported to have applied to the City Council for a 30-year electric light franchise to do a general business in this city.

Morehead, Ky.—The Reliance Eng. Co., Cincinnati, O., is reported to have been selected to prepare plans for a municipal elctric light plant; cost about $10,000.

Flemingsburg, Ky.—O'Bannon & Son, owners of the electric lighting plant, are contemplating installing a storage battery to provide for a continuous service.

Lecompte, La.—W. H. Jones, City Clk., writes that bids will probably be received about Feb. 1 for the construction of an electric light plant to cost about $10,000. Baldwin Wood, of New Orleans, Engr. of construction.

Thibodaux, La.—The Improvement Committee is considering a proposition to do away with steam power and substitute gas producer outfits in the municipal electric

**Items marked thus give the names of parties awarded contracts.*

light plant, and changing the present system to alternating-current, installing larger units. A. R. Staunton, Supt.

[illegible], La.—The citizens are contemplating the installation of a new street lighting system to replace the system now in use. L. A. Larson, Mgr.

Fryeburg, Me.—The Fryeburg Electric Light Co. contemplates changing from steam to water power and building one mile of new line. C. E. Harris, Secy. and Mgr.

Ashland, Me.—C. A. Flint is owner of the Electric Light Co., and proposes changing plant from steam to water power; he also expects to build his own power plant.

Port Deposit, Md.—The Port Deposit Electric Co. contemplates replacing the present street lighting system with 40-c.p. Tungsten series street lamps. Walter Flint, Mgr.

Pocomoke City, Md.—The Stevenson Electric Light Co. will install a 100 h. p. boiler in its plant next summer. R. P. Stevenson, Owner and Mgr.

Winchendon, Mass.—The Winchendon Electric Light & Power Co. contemplates constructing an auxiliary water power plant. F. W. Nourse, Mgr.

Hyde Park, Mass.—The Hyde Park Electric Light Co. contemplates replacing its present street lighting system with enclosed arc lamps next spring. M. S. Rose, Supt.

Kalamazoo, Mich.—The Kalamazoo Power Co. is reported incorporated by Frank W. Armstrong, C. S. Smedley, and others with a capital of $50,000, to operate a power and steam heating plant in Kalamazoo, and furnish power to manufacturing plants. About 14 800-h. p. engines in pairs will be installed, ea. pair being directly connected to a 1,100 kw. generator making 7 in all, and equal to over 10,000 h. p. W. D. Ball, of Chicago, Ill., is the Elec. Engr. Active work is to begin in the spring.

Mt. Pleasant, Mich.—The Harris Electric Co. will install a new generator in its plant and change the system from single to the 3-phase system in about 6 weeks. E. O. Harris, Owner and Mgr.

Petoskey, Mich.—New boilers will be installed in the municipal lighting plant to take the place of the ones now in use. J. E. Niles, Supt.

Eaton Rapids, Mich.—Extensive additions and improvements are contemplated for the municipal electric light plant, which will include the installation of a 90-kw. dynamo, an 80-h.p. engine and a boiler of 125 h.p. W. H. Woodmausee, Supt.

Howard City, Mich.—The Howard City Electric Light & Power Co. contemplates making extensive improvements and additions to its plant, which will include the installation of new switchboard, possibly new generators and additional boiler capacity; also the rebuilding of its lines. L. W. Greene, Owner and Mgr.

Fenton, Mich.—The Fenton Electric Light & Power Co. is said to be contemplating extending its lines to the town of Linden. E. H. Bliss, Mgr.

Hobart, Mich.—The citizens are said to have in contemplation the installation of an additional engine and alternator in the municipal electric light plant. O. L. Shore, Mgr.

Holland, Mich.—The city is contemplating adding a 500-kw. directed unit to the municipal electric lighting plant. James De Young, Mgr.

White Pigeon, Mich.—It is reported that plans are being made, and bids will soon be asked, for rebuilding gas plant recently wrecked by an explosion.

Natchez, Miss.—Krumbhaar & Aiken, of New Orleans, La., are reported to be preparing estimates of cost of installing machinery at the water works, to generate electricity for public lighting, also lighting the municipal offices.

Sedalia, Mo.—The Sedalia Ice, Light & Fuel Co. contemplates the installation of a 700-h.p. water-tube boiler in its plant. E. R. Audler, Mgr.

Smithville, Mo.—Harry Gordon, owner of the Smithville electric light plant, contemplates replacing the present high-speed engine in his plant with a 14x36 Corliss engine.

Shelbina, Mo.—The citizens are said to be considering the installation of a new boiler in the municipal electric lighting plant next year. E. P. Weaver, Supt.

St. Louis, Mo.—The plant of The Laclede Power Co. is reported to have been sold by the Clark Syndicate of Philadelphia, to the Union Light & Power Co., for about $3,000,000. The plant will be operated as a branch of the plant of the Union Co. and will be under the management of W. U. N. Powelson, the new president of the Union Co.

Princeton, N. J.—R. M. Anderson, Asst. Treas., Princeton Theological Seminary, writes that it is proposed to install a central heating and lighting plant next year, and to have it ready in time for the opening in Sept. Contract will be let late this winter or in the early spring. The Richard D. Kimball Co., 6 Beacon St., Boston, Mass., has prepared the plans and will have charge of the work.

Newark, N. J.—Jas. M. Seymour, Jr., of Newark, is reported to have been selected by the Bldg. Com .of the Bd. of Freeholders to investigate conditions at the county jail and determine the advisability of establishing an electric light plant there.

Trenton, N. J.—Bids will be received until Dec. 31 by J. Williard Morgan, State Compt., for furnishing electric current needed for lighting and power purposes in and about the State House, W. State St., Trenton, for a period of 3 or 5 years. Maximum current required will be 1,500 amperes, 110 volts a. c. 60 cycle, single phase for lighting purposes, and desk fans motors; for elevators, motors, shops, blower fans, etc., a maximum current of 200 amperes 220 volts d. c. will be required. Bids must be submitted on a net flat meter rater per kw. hour for both classes of service. Current to be furnished by meter or meters furnished and maintained by the bidder.

Jersey City, N. J.—See "Paving and Roadmaking."

Falconer, N. Y.—E. W. Jordan, owner of the Falconer electric light plant, contemplates the installation of gas engines and furnishing a continuous service, and a direct-current service for power purposes. W. E. Cowden, Mgr.

Livingston Manor, N. Y.—The Livingston Manor Electric Co. is building a concrete dam, 1,400 ft. of pipe line 20 in. diam., and install two 60 h. p. impulse water wheels. W. R. Woolsey, Treas.

Bedford, N. Y.—The Pub. Service Comn. at Albany, on Dec. 12 granted permission to the Katonah Lighting Co. to construct an electric light line in the town of Bedford, and to issue $20,000 capital stock.

**Rochester, N. Y.*—The Bd. of Contract on Dec. 12 awarded contract for lighting the new convention hall to Jas. McDonnell at $2,163, and to R. T. Ford Co. for heating same, at $1,527.

**Buffalo, N. Y.*—Mayor Adam has sent to the Bd. of Aldermen a communication advocating a contract with the Welsbach Street Lighting Co. of America for the placing of incandescent gas burners throughout the city. The company will supply lampheads with the incandescent burners for 3 cts. per night per lamp, 5,000 or more heads to be installed, the contract to run 5 years.

Lamont, N. Y.—Jas. C. Horning, of Castile, will construct an electric light and power plant at Lamont to light Silver Springs, Castile and Gainesville; probable cost, $40,000. Bids will be called for about Apr. 1. Engineer, Chas. E. Collins, of Philadelphia, Pa.

**New York, N. Y.*—The Otis Elevator Co. of N. Y. City, has secured the contract for flash-light signals for the elevators at the N. Y. Custom House, for $7,280.

Salisbury, N. C.—The Salisbury & Spencer Ry. Co. has contracted with the Southern Power Co., of Charlotte, for three 100-kw. transformers, substation and motor generator set for operating the street railway system. The company will furnish electricity to city for commercial, lighting and power purposes. Work will commence on the construction of the substation in about 30 days. H. W. Frund, Mgr.

Salem, O.—The Salem Electric Light & Power Co. contemplates building a new plant next spring. D. L. Davis, Secry. and Mgr.

Fremont, O.—The Fremont Yaryan Co. contemplates the installation of a new engine, generator and boiler in its plant. B. J. Shockley, Supt.

Columbus, O.—Bids will be received until Dec. 30 by Edwd. F. McGuire, Secy. Bd. Pub. Service, for furnishing and delivering on or before Jan. 15, 1908, at the Municipal Electric Light plant, Dublin Ave., cable and wire for a 1,000 kw. generator and motor driven exciter.

Newton Falls, O.—The Electric Light & Power Co. is contemplating the construction of a new power house and boiler house. J. W. Carr, Mgr.

Portland, Ore.—A report and estimate of expenses of the city lighting department has been submitted to Mayor Lane by Thos. G. Greene, D. A. Pattulo and M. A. Fleischner, of the Executive Bd., and the report favors the establishment of a municipal lighting plant, from power furnished from Bull Run River. The present lighting contract expires on Dec. 31.

Panama.—Bids will be received until Jan. 6 by Lieut.-Col. H. F. Hodges, Corps Engrs., U. S. A., purchasing officer, Isthmian Canal Comn., Washington, D. C., for furnishing engine and generator switchboard, boring and turning mill, journal boxes, brick, lumber, etc., as per circular No. 408.

McDonald, Pa.—The McDonald Electric Heat & Power Co. is reported organized with a capital of $100,000, by A. Valentour, W. H. Young, and others.

Pittsburg, Pa.—The Dept. of Pub. Wks. (A. B. Shepherd, Acting Dir.) is said to be considering the extending of the municipal light system on Braddock Ave.

Reading, Pa.—The Supply, Janitors & Repairs Com. of School Bd. is said to be considering the installing of an independent electric light plant in the administration building at 8th and Washington Sts., to furnish light for the two high schools. The cost of a plant of 150 h. p. is estimated at $5,000.

Trappe, Pa.—The Collegeville Gas Co., of Collegeville, is reported to have secured a gas franchise from Town Council to extend its service to this borough.

**Easton, Pa.*—The Common Council is reported to have awarded to the Westinghouse Electric Co., of Pittsburg, the contract for lamps, at about $13,000.

Richmond, Va.—Bids will be received until Dec. 30 by W. P. Knowles, Supt. City Gas Wks., address to Chmn. Com. on Light, for furnishing pipe and labor and material for constructing 6, 10, 12 and 20-in. gas mains to be installed in certain streets.

Tacoma, Wash.—Donald Fletcher has filed a petition with the County Comrs. for a franchise to run transmission lines along roads and highways of Pierce County for the conveyance of electric current to be brought from a proposed power plant on Cle Elum River above Cle Elum Lake. Mr. Fletcher stated in his petition that he proposed to furnish power for electric lights, running of mills and factories, etc., for Pierce, Kittitas and King Counties. He further states that he can furnish to the extent of 110,000 h. p. from the current of the Cle Elum River.

Colton, Wash.—E. S. Aldrich, of Moscow, Idaho, Mgr. Idaho-Washington Light & Power Co., writes that about $3,000 will be expended for work required in Colton. The company will do its own work.

Puyallup, Wash.—Fuller & Manley, of Boston, Mass., are reported to have been selected to prepare plans for a municipal power plant, for lighting the city of Puyallup.

Hatfield, Wis.—J. G. White & Co., of New York, N. Y., have finished the closing of a new dam for the La Crosse Water Power Co., of La Crosse, on Black River at Hatfield. This is a concrete structure 50 ft. high at center, by 400 ft. long, containing about 24,000 cu. yds. There are still under construction the power house, which is located 2 miles below the dam and the canal between the dam and the power house. The installation will have 16,000 h. p., ultimate capacity, and will supply La Crosse and Winona with current over 90 miles of transmission lines. The pressure will be 45,000 volts.

Iola, Wis.—The planing mill and electric light plant of Frogner Bros. & Sons, are reported to have been destroyed by fire.

Waterloo, Wis.—F. E. Peschel, Village Clk., writes that about $5,000 will be expended on electric light improvements, the work to be done by day labor. Engineers, D. C. and Wm. B. Jackson, Coml. National Bank Bldg., Chicago, Ill.

Charlestown, W. Va.—It is stated that bids are wanted until Jan. 1 for lighting the town for one year from Feb. 1, 1908, with privilege of renewal of contract at the expiration of the same. Geo. T. Light, Mayor.

Claresholm, Alta.—The question of constructing a municipal electric light plant is reported under consideration.

Port Arthur, Ont.—We are informed that the city of Port Arthur has commissioned Smith, Kerry & Chace, Confederation Life Bldg., Toronto, to make a survey for power development at Silver Falls on Kaministikura River, about 25 miles distant from Port Arthur.

Edmonton, Alta.—A site is reported to have been selected for a municipal power plant, 5 miles from city, and plans are now being prepared for the buildings and transmission line. R. R. Keeley, City Engr.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Woodland, Cal.—The Northern Electric Ry. Co. is stated to have been granted a franchise to operate an electric railway on Main St. C. S. Compton, Ch. Engr., Chico.

Riverside, Cal.—It is stated that construction will begin on the electric railway which is to connect Riverside and Colton. The contract for the grading has been let to Garnsey & Pitzer, of Los Angeles. The franchise was awarded a year ago to the San Bernardino Valley Interurban Ry. Co. under the name of A. C. Denman, Jr., but it is understood that the line will be a Huntington road and will be a connecting link in the Huntington system between Riverside and Los Angeles. The road will be about 9 miles in length.

Pasadena, Cal.—It is reported that surveyors are working on the line of a new electric railway, supposed to be the line which H. Potter, of La Canada, intends to bring into La Canada and to North Pasadena. Starting from the short electric line to Verdugo, owned by the Harriman interests, the survey has been run to LaCanada through the Cottonwood Canon. From the canon another line has been run almost directly north to Millard Canon. Another survey has been run from the northeast corner of Lincoln Ave. and Montana St. in North Pasadena, to the mountains.

East St. Louis, Ill.—Articles of incorporation of the Red Bud & Belleville Interurban R. R. Co. are stated to have been filed at Belleville. The incorporators are Conrad Becker, Herman Schreiber and Dr. C. G. Smith, of Red Bud; John Keller of Hecker, Ill., and Ben A. Gundlach, of Belleville. The company proposes to construct and operate an electric railway from Belleville to Smithton, thence southeast to Red Bud, Ill.

Quincy, Ill.—The St. Louis, Terre Haute & Quincy Traction Co. is stated to have decided to increase the capital from $25,000 to $50,000. The company proposes to build an electric interurban railway from Quincy, Ill., to Terre Haute, Ind., via Roodhouse, Virden and Taylorville. Edward Yates, Pittsfield, Pres.; F. W. Knollenberg, Quincy, Secy. and Treas. It was also decided to move the headquarters of the company from Springfield to Quincy.

South Bend, Ind.—The County Comrs. are stated to have granted a franchise to the Indianapolis, Logansport & South Bend Ry. Co. to construct and operate an electric railway running along Michigan Rd. from the southern border of the county to a point a short distance south of the city, where the line will enter a private right of way.

Decatur, Ind.—The Ft. Wayne & Springfield Traction Co. is stated to have decided to extend the line south to Berne early next year.

Boston, Mass.—It is reported that the Railroad Comrs. had given their approval to an order granting the Boston & Worcester Str. Ry. Co. the right to lay its tracks in Worcester, Bacon, Middle Harvard and Sawin Sts., and North Ave., in Natick. Under this order the street railway company will be able to run a branch line to Natick and give the citizens of that town more rapid transit to and from Boston. E. H. Rogers, Ch. Engr., So. Framingham.

Salisbury, N. C.—See "Power Plants, Gas and Electricity."

Chambersburg, Pa.—It is reported that the Cumberland Valley R. R. Co. will electrify the Waynesboro Branch.

Tacoma, Wash.—Deeds for the right of way of the Puget Sound Electric Ry.'s new line to Puyallup are being taken, according to reports. Since the decision to build through the valley to Puyallup the company's plans have been enlarged. It is reported that the new line is to become part of the through line betwen Tacoma and Seattle.

Sedro Wooley, Wash.—It is stated that construction work will soon start on the electric railway between Ainacortes and Sedro-Wooley, surveys having been completed. B. J. Weeks is reported interested.

Buenos Ayres, S. A.—Bids will be opened May 1 at 2 P. M. in the office of the Secretary of the Intendency, Buenos Ayres, for the construction of 2 of the lines of underground electric railways which form the metropolitan network projected and approved by that Corporation, and for the exploitation of those lines under a lease from the date of completion of their construction. Further information can be obtained by addressing the Argentine Legation, Washington, D. C.

RAILROADS.

Notes Arranged Alphabetically by States.

Decatur, Ala.—Press reports state that the Southern Ry. Co. (J. A. Dodson, Supt. of Constr., Atlanta, Ga), will expend about $500,000 in rebuilding and double-tracking the Tennessee River and Swan Lake bridges and double tracking its road from Decatur to Decatur Junction. Much of the work has already been commenced; it will take 8 or 9 months to complete the work.

West Point, Ga.—The Secy. of State has granted an amendment to the charter of the Chattahoochee Valley Ry. Co. (L. Lanier, Pres. & Mgr., West Point), which proposed to extend its line from West Point through

**Items marked thus give the names of parties awarded contracts.*

Troup County to a point near Standing Rock, Ala., thence through Chambers and Randolph Counties, Ala., to Texas.

Chicago, Ill.—The Chicago, Joliet & Central Illinois Ry. Co. is reported incorporated, with principal office in Chicago, to construct and operate a railway from Chicago southeasterly through Lyons, Downers Grove, Dupage and thence south through Lockport and Joliet to other points in the counties of Cook, Dupage, Will, Bureau, Peoria, Kendal, Grundy, Lasalle, Livingston, Putnam, Marshall, McLean and Woodford. Incorporators Josiah Burnham, Hugo De Loeb, Geo. L. Turnbull and others.

Ft. Standish, Mass.—Bids will be received until Jan. 15 by the Quartermaster, at Ft. Banks, Winthrop, Mass., for fushnishing material and constructing approximately 1,500 ft. narrow gauge railroad extending from end of Engineer's wharf to Battery Burbeck, at Ft. Standish.

Mize, Miss.—It is reported that Eastman, Gardiner & Co., of Laurel, Miss., are making preparations to begin work on a railroad from Mize, on the Gulf and Ship Island R. R., to Morton, on the Alabama & Vicksburg R. R., a distance of about 41 miles.

Omaha, Neb.—The Chicago & Rock Island R. R. Co. (J. B. Berry, Ch. Engr., Chicago, Ill.), is reported to have decided to double track and completely reballast its Omaha-Lincoln line.

The double tracking will eventually be continued through Nebraska to Denver. The Missouri Pacific R. R. Co. (Jas. W. Way, Consulting Engr., St. Louis, Mo.), as was announced, is reported to have decided to expend $1,000,000 in Nebraska in rebuilding its road and in installing new equipment and stations.

The Chicago & Northwestern R. R. Co. (E. C. Carter, Ch. Engr., Chicago, Ill.) is said to be contemplating improvements on its lines through the State. The Webster St. Depot will either be rebuilt or all of the trains run out of the Union passenger station.

Niagara Falls, N. Y.—John L. Harper and Wm. D. Robbins, Engrs. of the Grand Crossing Comn., are reported to have been authorized to complete the details for an overhead crossing, on North Main St. over the tracks of the Central and the Erie Railroads.

Columbus, O.—The Sinking Fund Trustees are reported to have accepted the $1,000,000 issue of bonds to pay city's portion of expense of eliminating railroad grade crossings, which make it possible for the work of preparing for the elimination of these crossings to be continued.

Clearfield, Pa.—Press reports state that the New York Central R. R. (W. J. Wilgus, of New York, N. Y., Vice-Pres. Constr. Dept.) is reported to have completed surveys for a connecting line with the Lake Erie R. R. from Versailles to Clearfield.

Pittsburg, Pa.—Plans are reported to have been approved for continuing construction work on the Pittsburg, Binghamton & Eastern R. R. during 1908, and authority has been given to build the Oregon Hill branch, which will be 32.25 miles long. Extensions are also proposed from Powell to Binghamton, 60 miles, and from Cedar Lodge to Clearfield, 148.6 miles. H. A. Schwanecke, Vice-Pres. and Ch. Engr.

Philadelphia, Pa.—Mayor Reyburn, a sub-committee of the Special Committee on Grade Crossings, consisting of Chief Clerk Wm. J. Milligan, of Select Council; Geo. S. Webster, Ch. Engr., Bureau of Survey, and others, had a conference on Dec. 13 at the Broad St. Station with Chas. E. Pugh, 2d Vice-Pres., A. C. Shand, Chief Engr., and J. B. Baker, Supt. of the Philadelphia terminal division of the Pennsylvania R. R., with the object of having an understanding to serve as the basis of future negotiations for the abolition of grade crossings in South Philadelphia by the joint action of the city and the railway company especially the Washington Ave. crossings; it is estimated that it will cost about $4,000,000 to elevate the Washington Ave. tracks.

Chattanooga, Tenn.—The Louisville & Nashville R. R. Co. (W. H. Courtenay, Ch. Engr., Louisville, Ky.) is reported to have decided to extend its line from Etowahton, Ala., to Chattanooga, a distance of 50 miles. The line will cost about $1,000,000.

Fredericksburg, Va.—The application is reported to have been made to the State Corporation Comn. at Richmond, for a charter for the Fredericksburg & Southern R. R. Co.

Berne, Switzerland.—See "Miscellaneous."

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

**Birmingham, Ala.*—Evans Bros. Constr. Co., 2231 1st Ave., is reported to have secured the contract to make improvements to the county jail.

Berkeley, Cal.—J. V. Mendenhall, Town Clk., writes that all bids opened on Dec. 9 for the erection of a town hall of concrete and steel have been rejected, and plans will be revised; probable cost about $100,000. Architects, Bakewell & Brown, 417 Montgomery St., San Francisco.

Rice Lake, Wis.—The members of St. Joseph R. C. Church, it is stated, are considering the erection of a new edifice costing about $25,000.

SCHOOLS.

Notes Arranged Alphabetically by States.

Birmingham, Ala.—The erection of a high school in Jefferson County to cost $50,000, is reported under consideration.

Hoxie, Ark.—Moore & Ridgway, it is stated, have secured the contract to erect the school at about $18,000.

San Diego, Cal.—John C. Austin, of Los Angeles, is said to have completed plans for the 2-story school to be erected at 12th and E Sts., which is to cost about $85,000.

East St. Louis, Ill.—We are informed that bids will be called for by the School Board about Feb. 1 for the erection of a school, to cost about $65,000. Architects, Riester & Rubach, 412 Missouri Ave., East St. Louis.

Indianapolis, Ind.—The School Bd. is reported to be prearing for the construction of 2 new school buildings, one in Cerealinetown and one in Brightwood suburbs, each to cost about $50,000. Work to begin early next year.

Kirklin, Ind.—Amos L. Hiatt, Trustee Kirklin Township, it is reported has purchased a site and will soon ask for bids for the construction of a new High School, estimated cost $30,000.

Cedar Falls, Ia.—Proudfoot & Bird, Archts., write that the Des Moines Bridge & Iron Wks., of Des Moines, has secured the contract for the structural iron work for the library of the State Normal School (bids opened Dec. 10) for $7,350; and Arthur Watson, of Des Moines, the contract for the cut stone work for $24,500.

Viola, Kan.—It is stated that bids will be received until about Dec. 29 by Chas. J. Dalborn, Clk. Joint School Dist. No. 148-160, for erecting a 2-story 4-room brick school.

Orono, Me.—Bids will be received until Jan. 1 by Geo. E. Fellows, Univ. of Maine, Orono, for the construction, including plumbing, of an agricultural building at said univ. Wm. Hart Taylor, Archt., 50 Broomfield St., Boston, Mass.

Worcester, Mass.—The Joint Standing Com. of the City Council, it is stated, has decided to recommend the erection of a 12-room school on Meade St. to cost $60,000; 6-room addition to Dartmouth St. School, estimated to cost $25,000, and a 4-room and hall building to cost $25,000.

Melrose, Mass.—The citizens voted in favor of appropriating $75,000 to erect an addition to the high school.

Great Barrington, Mass.—Wm. D. Hill, Secy. School Com., writes that bids will probably be called for in the spring for the erection of a school to cost about $50,000.

Boston, Mass.—Bids will be received until Dec. 24 by the School House Comrs. (R. Clipston Sturgis, Chmn.) for installing a ventilating and heating apparatus in the extension to Francis Parkman School, Walk Hill St. Chas. F. Eveleth, 120 Boylston St., Htg. Engr.; Chas. B. Perkins, Archt., 15 Ashburton Pl.

South Hadley Falls, Mass.—The Special Com. appointed by the town to secure plans, has asked competitive plans to be submitted by Feb. 22 to M. J. Judge, Secy. The plans are to be of 2 kinds: One set to provide for a building containing 4 class rooms with a seating capacity of 48 ea., and an assembly room with a seating capacity of 200, lecture room, chemical laboratory, physical laboratory, principal's office, teachers' office, business room with adjoining typewriter room. The second plan calls for a combination town hall and school building. This building to contain town offices and committee rooms.

Flint, Mich.—It is reported that W. O. Lewis, Secy. Bd. Educ., will receive bids until Jan. 15 for erecting a 10-room grade school, complete, except ventilating and heating. Edward C. Van Leyen, Archt., 40 Fort St. W., Detroit.

Albert Lea, Minn.—The Bd. of Trus. of the Albert Lea Cottage, it is stated, is having plans prepared for a science hall and dormitory which they propose erecting next season.

Sydney, Neb.—It is stated that bids will be received until Jan. 1 by the School Bd. (Leroy Martin, Secy.) for $15,000 school bonds.

Superior, Neb.—The School Bd., it is reported, has decided to erect a $30,000 school.

Jersey City, N. J.—The Bd. of Educ. is stated to have awarded contracts recently for erecting an annex to School No. 14 (bids for which were received Nov. 14) as follows: Mason work, M. T. Connolly Constr. Co., $49,738; carpenter work, Jos. Jewkes & Sons Co., $26,490; painting, Chas. Rabe, $1,942; plumbing, F. T. Kelaher, $5,595; heating and ventilating, Baldwin Eng. Co., $15,940.

Ridgefield Park, N. J.—Bids will be received until Dec. 30 by Adolph Freud, Dist. Clk., Central Ave. and 2d St., for $50,000 school bonds.

Santa Fe, N. M.—Bids will be received until Jan. 13 by C. F. Larrabee, Acting Comn. Indian Affairs, Washington, D. C., for furnishing material and constructing an office building at the Santa Fe School. For further information apply to C. J. Crandall, Supt. school.

Dunkirk, N. Y.—The Bd. of Educ., it is stated, has decided to erect an addition to School No. 3.

Philmont, N. Y.—Bids will be received until Dec. 31 by J. F. Terrick, Clk. Bd. Educ., School Dist. 6, for erecting an addition to the school buildings.

New York, N. Y.—Bids will be received until Dec. 26 by C. B. J. Snyder, Supt. School Bldgs., N. Y. City, for alterations of present auditorium on the 2d and 3d floors of the hall of the Bd. of Educ., Park Ave. and 59th St., Boro. Manhattan.

Ithaca, N. Y.—The members of Cornell Univ. Club of Northern New Jersey are said to be considering the erection of a dormitory at Cornell Univ. to cost about $36,000. It is to be known as "Jersey Hall."

Rolla, N. D.—J. W. Ross, of Grand Forks, it is stated, has about completed plans for a school to be erected here at a cost of $25,000, contract for construction will probably be let in January.

Bryn Mawr, Pa.—Edwin F. Durang & Son, 1200 Chestnut St., Philadelphia, are completing plans for a school to be erected at Bryn Mawr for the parish of the Church of Our Lady of Good Counsel. The building will be brick and stone, costing $40,000.

Pittsburg, Pa.—The Trus. of the Western Univ. of Pa., it is reported, has bought 43 acres of ground in the Schenley Farms property, opposite the Carnegie Institute, and work will be begun at once on the erection of a group of 10 building in which the university will be housed when completed.

Providence, R. I.—The State Grange at a meeting on Dec. 11 voted to recommend the appropriating of $80,000 for the erection of a new building at the Kingston Inst., and for new boilers at Lippitt Hall at the State College, and a building in which to install the heating plant.

Hallettsville, Tex.—The issuing of $18,000 bonds to erect a school is reported under consideration by the Trus. of the Independent School Dist.

Richmond, Va.—The proposed high school bids for which will be received until Jan 20, will cost bet. $350,000 and $400,000. Architect Chas. K. Byant, 1014 E. Main St., Richmond.

Williamstown, W. Va.—It is reported that arrangements are being made to erect a $25,000 school.

Brillion, Wis.—It is statd that bids are wanted until Jan. 15 for erecting a 2-story and basement press brick school; prob. cost, $12,000. C. H. Tegen, Archt., Manitowoc.

Milwaukee, Wis.—Bids will be received until Jan. 2 by the Bd. of School Directors (Frank M. Harbach, Secy.), for furnishing material and erecting a school at Forest Home and 11th Aves., in the 11th Ward, to cost about $75,000. Bids are to be stated separately on the following, also a total bid to be submitted for the entire work: Mason, concrete and cement work; cut stone work; lath and plastering work; structural steel and iron work; carpenter work, including composition roofing; hardware; galvanized iron and tin work; electric work; painting and glazing; plumbing, sewerage and gasfitting; ventilating and heating; heat regulation apparatus.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Streator, Ill.—The Streator Ice & Cold Storage Co. is reported organized, with a capital of $50,000, to manufacture ice; also erect a cold storage plant. H. H. Dicus, Secy.

Danville, Ill.—Jas. O. Gordon, general contractor, 31 N. Vermillion St., proposes erecting a structural shop here, but details are not yet complete. He is making his own plans and doing his own building; the shop will be 80x200 ft., using electric power. He further states that he is in the market for a 10-ton crane.

Salem, Ind.—L. D. Fouts, of New Albany, and others are reported to have purchased a large area of shale and will engage in the manufacture of paving brick.

Harbor Beach, Mich.—It is stated that Edw. C. Van Leyen and Edw. A. Schilling, archts., 40 Fort St. W., have prepared plans and specifications for the reconstruction of the Huron Milling Co.'s starch plant at Harbor Beach, Mich., of which Geo. J. Jenks, of Detroit, is the Pres. Plans are also reported being prepared for a reinforced concrete dock, 40x300 ft.; warehouse, 46x250 ft.; and coal bunkers, with crane tracks for unloading boats, 40x250 ft., 16 ft. in height, to carry a supply of 5,000 tons of coal. Plans for buildings for the manufacture of bi-products are also in contemplation.

Detroit, Mich.—Dinan Bros., it is reported, will erect a plant at Michigan Ave. and 15th St. under plans prepared by B. C. Wetzel & Co. The building will be a combination warehouse and cold storage plant, will have solid brick walls, concrete floors, concrete columns reinforced with cast iron, iron window frames and wired glass, making the structure strictly fireproof. The plans will be ready for figures, it is stated, about the middle of January.

Newton, N. C.—H. F. Smith, Gen. Mgr. Ridgeview Cotton Mills, writes that contract has not yet been let for the power plant for the mills, to cost about $4,000.

Weldon, N. C.—Arrangements are being completed by the Shaw Cotton Mills of Weldon for the construction of a yarn plant. A 2-story brick building, 50x150 ft., is to be erected and an equipment of 5,129 frame spindles will be installed to be run by gas power. Two-ply 24x36 cotton yarns will be manufactured. Capital, $100,000.

*Items marked thus give the names of parties awarded contracts.

Cincinnati, O.—Albert L. Allen, Secy. and Treas. Pfau Mfg. Co., writes that the plant was partially destroyed by fire on Dec. 11. It is proposed to repair same and resume operation at an early date. The loss on buildings, equipment, etc., is about $100,000.

Hennessey, Okla.—The Hennessey Electric Light, Power & Ice Co. expects to install an ice plant in connection with its electric plant. F. Murch, Mgr.

Portland, Ore.—The National Wood Pipe Co., 404 Equitable Bank Bldg., Los Angeles, Cal., will erect a factory at Portland, to cost about $100,000.

STREET CLEANING AND GARBAGE DISPOSAL.

Notes Arranged Alphabetically by States.

Indianapolis, Ind.—Bids will be received until Dec. 27 by the Bd. Pub. Wks. (Jos. T. Elliott, Pres.) for the collection, removal and disposal of ashes and sweepings in this city for a period of 10 yrs. as per Miscellaneous Specification, No. 38; also same time and place for the collection, removal and disposal of sweepings in this city for a period of 10 yrs. as per Miscellaneous Specification No. 39.

Paducah, Ky.—The question of constructing a garbage reduction plant is reported under consideration here.

Minneapolis, Minn.—The Council Com. of Health and Hospital, is reported to be considering the installation of a traveling crane at the garbage crematory.

St. Louis, Mo.—Bids will be received until Feb. 11 by the Bd. Pub. Improv. (A. J. O'Reilly, Pres.) for furnishing material, machinery and buildings for the reduction of garbage for a term ending Sept. 1, 1918. Bidders are to erect and maintain 2 receiving stations ea. having a capacity of 300 tons in ea. 8 hours, and to consist of approaches, drives and unloading platforms; also erect within a mile of the city on not less than 5 acres of ground a reduction plant having a capacity of reducing not less than 400 tons daily.

East Liverpool, O.—The City Auditor writes that it is not proposed to construct a garbage crematory, as recently reported.

Philadelphia, Pa.—Bids were opened on Dec. 16 at the office of Geo. R. Stearns, Dir. Dept. Pub. Wks., for cleaning streets, alleys, inlets, public market houses, and for the removal of ashes, household waste, rubbish, etc., during the year 1908, and the following are the bids received according to districts: (*a*) 1st Dist.; (*b*) 2d Dist.; (*c*) 3d; (*d*) 4th; (*e*) 5th; (*f*) 6th; (*g*) 7th; (*h*) 8th; (*i*) entire city: Edwin H. Vare, *a*, $149,000 *b*, $285,000;*e*, $133,999; *i*. $1,087,000. Mack Co., *a*, $170,000; *b*, $331,000; *c*, $185,200; *d*, $126,600; *e*, $160,500; *f*, $98,200; *g*, $101,500; *h*, $79,700; *i*, $1,240,700. Reiter, Peoples & Co., *a*, $230,000; *b*, $330,000; *c*, $220,000; *d*, $120,000; *e*, $160,000; *f*, $98,000; *g*, $98,000; *h*, $79,000; *i*, $1,400,000. Wm. H. Achuff, *f*, $98,000. Howard E. Rueb, *c*, $164,800. Jas. Curran, *d*, $133,800. Jas. A. Mullen, *g*, $113,300; *h*, $67,800. David McMahon, *f*, $86,950. Johnson & Co., *g*, $119,000; *h*, $74,000. Laughlin & Dorney, *c*, $159,974. Reiter, Peoples & Co., *b*, $280,000.

Pittsburg, Pa.—Dr. J. F. Edwards, Supt. Health Bureau, writes with regard to the disposal of ashes, rubbish, etc., that an investigation is to be made with a view to preparing a report on same. No plans, specification or recommendations yet made. Engineer, Rudolph Hering, of N. Y. City.

Providence, R. I.—Bids were opened on Dec. 10 by the Com. of Health Dept. (Henry Fletcher, Chmn.) for the removal of swill, house offal and garbage for a period of 5 years from May 1, 1908, and the following are the bids received: (a) 1st year; (b) 2d yr.; (c) 3d yr.; (d) 4th yr.; (e) 5th yr; (f) total: Chas. E. Clarke, Seekonk, Mass., (f) $120,000; payable in monthly installments of $2,000; T. A. Sampson, of Fall River, (a) $23,875, (b) and (c), $24,000; (d) $26,000 (e) $27,000; (f) $124,875; Jos. J. Nugent, of Providence and Seekonk, (a) $25,000; (b) $25,597; (c) $26,625; (d) $27,739; (e) $29,000; (f) $133,961; Oneco Granite Co., Providence, (a) $27,900; (b) $35,250; (f) $142,150; Jas. H. Dillon, $28,850 ea. yr., (f) $142,850; Herbert R. Durfee, of Cranston, (a) $27,000; (b) $28,000; (c) $29,000; (d) $30,000; (e) $31,000; (f) $145,000; Geo. A. Field & Son Co., Cranston, (f) $150,000 in monthly installments of $2,500.

Milwaukee, Wis.—Local press reports state that Rudolph Hering, of New York, N. Y., estimates the cost of a reduction plant, equipped to dispose of rubbish, would cost $375,000, while an incineration plant would cost $325,000. It is stated that the city will probably adopt the contract system, and not construct a municipal plant at this time.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

**Mobile, Ala.*—The following are the bids opened on Nov. 25 by Maj. H. Jewey, Corps Engrs., U. S. A., for constructing locks and dams in Black Warrior River, and lock tenders' houses: (*a*) Dravo Contr. Co., Pittsburg, Pa. (awarded contract) (*b*) Lane Bros. Co., Lynchburg, Va.

Lock No. 14—

	*a	b
3 acres grubbing and clearing	$100.00	$100.00
56,000 cu. yds. common excav	.70	.56
3,300 cu. yds. rock excavation	3.50	2.90
3,690 cu. yds. stone fill	2.50	2.90

Ft. Huachuca, Ariz.—Bids will be received until Jan. 9 by C. A. H. McCauley, Ch. Q. M., U. S. A., Denver, Colo., for constructing a swimming pool at Ft. Huachuca.

**Berkeley, Cal.*—W. F. McClure, City Engr., writes that the Atlantic, Gulf & Pacific Co., Monadnock Bldg., San Francisco, has secured the contract for constructing the proposed municipal work at the following bid: Repair old wharf, 200 piles, per pile, $6; 100 M piles in place, per M, ft., $27; 760 ft. 3-pile bent, per ft., $6.80; 2,204 ft. concrete pile approach, per ft., $14.50; main wharf, 408x75 ft. (lump sum), $28,000; inner wharf, 4,040 sq. ft. (lump sum), $1,600; shed, 24x100 ft. (lump sum), $1,165; shed, 16x60 ft. (lump sum), $759, 4,400 ft. 4-in. water pipe, 50 cts total, $74.750. Totals of other bids: Burrell Constr. Co., San Francisco, $73,975; Cotton Bros. Co., Oakland, $80,115; Healey Tibbitts Constr. Co., San Francisco., $82,549; Mercer Frazier, $82,906; Pacific Constr. Co., San Francisco., $76,205.

**Greeley, Colo.*—I. L. Thompson, of Ft. Collins, is reported to have secured the contract for extending Eaton ditch, for $3,000.

Wilmington, Del.—At a meeting on Dec. 10 of the combined committees of City Council and the Bd. of Trade, appointed to look into the river front proposition, apppointed the six engineers who were to investigate conditions bearing upon selection of suitable location for terminal point and site for a pier, made their report. The report was signed by Chief Engineer Theo. A. Leisen, Water Dept.; Alex. T. Taylor and Harry L. Maier, of the Street & Sewer Dept.; Edw. R. Mack, of the Park Comn.; City Engr. Howard B. Griffith, and City Councilman Matthew L. Kyle. The plans as proposed showed a 1,000-ft. wharf at foot of 4th St. extended, and at base of pier a circular plot 1,000 ft. diam. which would be used as a terminus; along the entire river front extended a driveway 300 ft. wide, and from terminus extended to the north a 100-ft. boulevard, to be known as the North Boulevard, and connecting with Vandever Ave.; to the west extended another boulevard, known as 4th St. Boule., connecting with 7th St., and to the south, the South Boule., connecting with B St. extended to the Christiana River. No estimate of cost is given, nor is exact location recommended.

Washington, D. C.—Bids will be received at the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., until Jan. 2, to furnish at the navy yards and naval stations the following supplies: Puget Sound, Wash.: Sch. 579—Single frame steam hammer, 1 pattern maker's lathe, 1 horizontal boring, drilling and milling machine. Sch. 600—A quantity of Sanderson's steel, Mare Island, Cal. Sch. 615—1 power punch, 1 motor driven emery grinder, 1 groover, 1 double seaming machine and 1 hand beading machtne, 1 fresh water pump, 20 tons crushed ganister and 6,000 ganister brick; 25,000 lbs. galvanized sheet steel. Applications for proposals should designate the schedule desired by number. E. B. Rogers, Paymaster-Genl., U. S. N.

Bids will be received same time and place as above for the following: Puget Sound, Wash.: Sch. 439—3 pipe-bending machines. Sch. 579—Drills and rachets. Newport News, Va., and Quincy, Mass.: Sch. 614—40 motors, 40 master controllers, 40 shunt motors, 20 series motors, 20 complete controllers. New Orleans, La.: Sch. 616—29 M. ft. clear and 21 M. ft. common cypress, 130 M. ft. white pine. Sch. 617—Bar iron in commercial lengths, 3,900 lbs. bolt iron, 13,000 lbs. bar steel, a quantity of tool steel. Sch. 620—Sheet brass, copper rod, sheet copper, etc.; 5,000 lbs. ingot copper, 9,000 lbs. pig lead. Sch. 622—2,800 ft. seamless drawn brass pipe, 2,200 ft. black wrought iron or steel pipe and 2,200 ft. galvanized wrought iron or steel pipe, 2,600 ft. black iron pipe, a quantity of brass globe valves, check valves and cross valves, etc. Pensacola, Fla.: Sch. 620—8,100 lbs. sheet lead. Sch. 624—Metal saw machine, sheet steel, tool steel, etc. Bids will also be received same place until Dec. 26 for the following: Boston, Mass.: Sch. 601—Electric supplies, 60 tons Albany sand and 80 tons molding sand. Sch. 609—6,600 lbs. round rolled bronze, 19,000 lbs. seamless brass pipe. Sch. 610—20 doz. brass gate valves, 8 doz. brass check valves and 50 doz. brass globe valves. Brooklyn, N. Y.: Sch. 602—625 lbs. magnet wire, 165 lbs. Advance resistance wire, platinum wire, 20-volt meters, 15 ammeters. Sch. 608—28,800 lbs. G. I. sheet steel, 18,100 ft. leather belting. Sch. 609—About 58,000 lbs. bronze rod, 78,000 lbs. seamless brass pipe. Sch. 610—Brass angle valves, 50 doz. brass gate valves. Sch. 611—50 doz. brass unions, bushings, couplings, tees, etc. Sch. 612—12,750 lbs. sheet lead, 32,000 ft. wrought iron or steel steam pipe. Sch. 644—50 M. ft. spruce, 23 M. ft. white hickory, 55 M. ft. white oak. Annapolis, Md.: Sch. 406—10,500 pieces opalite tile. Charleston, S. C.: Sch. 608—3,000 lbs. galvanized medium steel plates, 22,660 lbs. structural plates and 560 lbs. steel angles.

Paxton, Ill.—W. B. Flood, Co. Clk., writes that C. F. Helman, of Paxton, is engineer for the drainage ditch to be constructed in Sugar Creek Drainage Dist.

Monticello, Ill.—Bids will be received until Dec. 28 by the Comrs. of the Lake Fork Special Drainage Dist. Counties of Piatt, Champagn and Douglas (T. J. Tucker, Chmn.) at Monticello, for cleaning out and repairing the main ditch of Sub Dist. No. 21, Lake Fork Special Drainage Dist., requiring 37,228 cu. yds. excavation. Address communications to Harvey Fay, Co. Clk., Monticello.

Ft. Wayne, Ind.—It is reported that bids will be received by David Sprindler (Supt. of Drains) until Dec. 28, for the construction of a ditch in Perry Township.

Princeton, Ind.—Geo. W. Smith, of Owensville, and Thos. J. Johnson, of Mt. Vernon, are reported to have petitioned for the construction of a drain 75 miles in length through Gibson and Posey Counties.

Council Bluffs, Ia.—W. C. Cheyne, Co. Aud., writes that bids will be received on Jan. 9 for the construction of the Avoca drainage ditch, probable cost $2,914.

Creston, Ia.—See "Bridges."

Forest City, Ia.—L. J. Nelson, Co. Aud., writes that bids will be received on Jan. 7 for constructing ditches 3 and 11; probable cost $8,464. Engineer, E. W. Burgitt, of Britt.

Louisa, Ky.—Bids will be received by Lieut.-Col. J. G. Warren, Corps Engrs., U. S. A., Cincinnati, O., until Jan. 20 for raising crest of Lock and Dam 3, Big Sandy River, near Louisa, Ky., as advertised in The Engineering Record.

**New Orleans, La.*—The State Board of Engineers is reported to have on Dec. 10 awarded the contract for earthwork on Waltzer levee to Pat H. Lyons, at 24.48 cts. per cu. yd. and to B. W. Borne for revetment at the Old Quarantine Levee, $1.23 per lin. ft.

Saginaw, Mich.—Bids will be received by Col. Chas. E. L. B. Davis, Corps Engrs., U. S. A., Detroit, until Jan. 16, for dredging in Saginaw River, as advertised in The Engineering Record.

Menominee, Mich.—It is reported that surveys are now being made in Menominee County for a new section of drainage canal.

Keweenaw Bay Mich.—The Chief of Engineers is reported to have recommended to Congress the construction of a harbor at th eastern entrance to Keweenaw Canal at a cost of $210,000, provided land can be secured at reasonable cost. The object is to provide a harbor where vessels may lie in time of storm, and where eastbound boats going through Keweenaw Canal may wait for clearing weather before passing out into open water of Lake Superior.

Grand Rapids, Mich.—Bids will be received until Jan. 15 by Maj. Chas. Keller, Corps Engrs., U. S. A., 57 Park St., Grand Rapids, for furnishing stone for pier filling and rip-rap at various harbors on eastern shore Lake Michigan.

Greenwood, Miss.—Bids will be received until Dec. 31 by the Drainage Comrs. (G. W. Holmes, Pres.) at the Court House, Greenwood, for constructing main drains in the Jones-Walton Drainage Dist., requiring the clearing of the right of way and digging about 6 miles of ditches, including the removal of about 66,000 cu. yds. of dirt; also separate bids same time and place, main drains in Ellsberry Drainage Dist., including clearing right of way and digging about 11 miles of ditches, requiring removal of 178,000 cu. yds. of dirt.

Morris Plains, N. J.—See "Water."

Atlantic City, N. J.—Prof. Lewis M. Haupt, of Philadelphia, Pa., is reported to have prepared and submitted to the business men plans for improving and deepening the channel to the Atlantic City harbor; he estimates the cost about $500,000.

Atlantic City, N. J.—Bids were opened by the Streets, Walks and Drives Com. (Wm. Riddle, Chmn.) on Dec. 9 for the construction of a concrete boardwalk along ocean front between Pacific Ave. and Connecticut Ave., to be about 2,900 ft. in length, and the lowest bid received was that of the Raymond Concrete Tile Co., at $53,535.

Jersey City, N. J.—See "Paving and Roadmaking."

Jersey City, N. J.—A contract is reported to have been filed here providing for the erection by the Pennsylvania Railroad Co. of a pier for the Adams Express Co. north of its station in this city. The pier is to be of steel frame, 120 ft. wide and 510 ft. long, and 3 stories high. Cost, about $85,000.

Brooklyn, N. Y.—There is now on file at the office of The Engineering Record, 239 W. 39th St., N. Y. City, specification No. 1,571 calling for the completion of a dry dock at the Navy Yard, also an inventory of plant, machinery, tools and appliances of Geo. B. Spearin, in possession of the U. S. Government at the Navy Yard, for use in the construction of the granite and concrete dry dock, recently under contract with him, and material on hand for prosecuting the work of construction, and bids for furnishing material and completing same will be received at the office of the Bureau of Yards and Docks, Navy Dept., Washington, D. C., until Jan. 18. R. C. Hollyday, of Washington, D. C., is Chief of Bureau.

Ft. Caswell, N. C.—Lieut. L. Cravens, Constr. Q. M., U. S. A., writes that the following are the bids opened on Nov. 30 for building creosoted bulkhead at Ft. Caswell: Alsop & Pierce, Newport News, Va., $12,000; A. J. Robbins, Southport, N. C., $8,640; Rich. Parrott, Newburgh, N. Y., $8,944.

Portsmouth, O.—It is stated that bids are wanted until Dec. 23 for $20,000 Kendall Ave. subway bonds. Filmore & Musser, City Aud.

Hamilton, O.—The Butler County Comrs. are reported to have decided to proceed at once with the diversion of Crawford Run. This will result in making it possible to sewer and pave the 4th Ward of the city; the cost will be about $75,000.

**Items marked thus give the names of parties awarded contracts.*

Cleveland, O.—Local press reports state that the city of Cleveland, the Detroit & Cleveland and the Cleveland & Buffalo steamship lines will expend jointly about $607,500 for new docks. Office buildings of brick and stone are to be built on the west pier, the land end, at a cost of $42,000. Adjoining the offices will be freight sheds, 600 ft. long, of iron and steel, and to cost $116,000. Improvements to the piers will cost $64,500.

Panama.—See "Power Plants, Gas and Electricity."

Erie, Pa.—Bids will be received until Feb. 4 by the Erie Dock Comn. (Clark Olds, Pres.) for furnishing material and constructing public steamboat landing at Port of Erie, about 548 ft. long and 100 ft. wide, as advertised in The Engineering Record.

Memphis, Tenn.—Capt. W. D. Connor, Corps Engrs., U. S. A., writes that no bids were opened on Nov. 25 by the Mississippi River Comn., 1st and 2d Districts, for about 190,000 cu. yds. levee work and 40,000 cu. yds. drainage ditch in Upper St. Francis Levee Dist., the advertisement having been withdrawn. New bids will probably be called for later.

Dallas, Tex.—Capt. W. P. Wooten, Corps. Engrs., U. S. A., writes that the following are the totals of bids opened on Nov. 18 for constructing locks and dams on Trinity River, Tex: (*a*) Lock and Dam No. 2, (*b*) No 4: D. C. McCord, Dallas, *a* $135,825; Ball-Carden Co., Dallas, *a* $125,482, *b* $126,330; Midland Bridge Co., Kansas City, Mo., *a* $232,842, *b* $236,448.

**Galveston, Tex.*—John D. Kelly, City Secy., writes that the contract for constructing concrete drain on 19th St. (bids opened Nov. 30) has been awarded to Kelso & Vantrell, of Galveston, for $17,735.

Galveston, Tex.—Local press reports state that the following are the bids opened on Nov. 21 by Capt. John C. Oakes, Corps Engrs., U. S. A., for jetty work at Aransas Pass, Tex.—(*a*) 80,000 tons riprap, per ton, (*b*) 23,000 tons stone, per ton; (*c*) track and trestle, per ft., (*d*) wharf, per ft.: Daniel M. Picton, *a* $3.50, *b* $4.37, *c* $6.25, *d* $2.10; Chas. Clarke & Co., *a* $4, *b* $5, *c* $6.75, *d* $2.20; Christie & Low, *a* $3.80, *b* $4.90, *c* $6, *d* $2.30.

Bids were opened same time and place for dredging through Turtle Cove, between Aransas Pass and Corpus Christi Bay, about 825,000 cu. yds. (price given per cu. yd.): Bowers Southern Dredging Co., 14 cts.; American Dredging Co., 14¼ cts., and the Home Dredging Co., of Mobile, Ala., 14⅞ cts.

Norfolk, Va.—Bids will be received until Dec. 26 by the Bureau of Supplies and Accounts, Navy Dept., Washington, D. C., for furnishing at the Navy Yard, Norfolk, the following supplies: Sch. No. 601, boiler tubes; Sch. 607, yellow pine; Sch. 609, brass and copper pipe; Sch. 611, pipe ttings; Sch. 612, machine tools. Applications for proposals should designate the schedule desired by number. E. B. Rogers, Paymaster General, U. S. N.

**Wausau, Wis.*—Bids were opened Dec. 3 by the Comrs. of the Daucy Drainage Dist. (Geo. H. Reynolds, Chmn.), at the office of the Clk. of the Circuit Court, at Wausau for constructing a main ditch and all its branches, and the contract for constructing same is stated to have been awarded to Chas. Forrestal, of Milwaukee, at 6.9 cts. per cu. yd.; total, $83,000. Engrs., the Harman Eng. Co., 109 S. Jefferson Ave., Peoria, Ill.

Eau Claire, Wis.—Lang & McAnulty, of Eau Claire, are reported to have been selected to prepare plans for a dam to be constructed across Chippewa River, in the 5th Ward, to cost about $10,000.

Peterboro, Ont.—Bids will be received until Feb. 1 by L. K. Jones, Secy. Dept. Railways and Canals, Ottawa, for the works connected with the construction of Sec. 2, Ontario-Rice Lake Div., Trent Canal.

Berne, Switzerland.—The National Council has approved the project of paralleling Simplon tunnel, thus providing double track construction.

ENGINE BUILDERS' ASSOCIATION OF THE UNITED STATES. Secretary, J. L. Lyle, 39 Cortlandt St., New York.

ELECTRIC TRACTION ON THE GREAT NORTHERN RY.

The Great Northern Railway Co. has closed a contract with the General Electric Co. for electric equipments to take care of all passenger and freight trains traversing the Cascade tunnel. This tunnel is approximately 2¾ miles in length with no ventilating shaft and a uniform grade east of 1.6 per cent. in the tunnel section, making the difficulties of ventilation with steam locomotive operation a very serious factor, both from the standpoint of safety and operating efficiency. Aside from danger of poisonous gases of combustion, the interior of the tunnel has become so fouled with soot as to reduce the tractive effort of the steam locomotives now used by reason of the slippery condition of the rails. The introduction of electric locomotives will do away with many of the evils now encountered in steam operation.

The electric locomotives will weigh 100 tons each, all weight being on the drivers, each locomotive being equipped with four three-phase induction motors of 325 h.-p. capacity mounted on two articulated bogie trucks. Each locomotive will have a capacity of hauling a 500-ton trailing load up a 2 per cent. grade at 15 miles per hour, and, the motors being reversible, will control the speed of the train down grade by regeneration. It is hoped by this means to introduce an additional feature of safety and eliminate the possibility of breakdown due to overheated wheel tires and brake shoes.

The locomotives will receive their supply from two 6,600-volt conductors fed from a step-down transformer station located at the entrance of the tunnel. The generating station will be located on the Wenatchee River, 30 miles from the tunnel, and power will be transmitted over duplicate transmission lines at 33,000 volts. The generating station will contain two 2,000-kw., three-phase, water-wheel-driven generators, operating at twenty-five cycles, and arrangements are being made to take care of excess power of regeneration due to an unbalanced load up and down grade.

The entire installation is under the supervision of Dr. Cary T. Hutchinson, who acts as consulting engineer to the Great Northern Ry., and the entire apparatus is being supplied by the General Electric Co. It is expected to have the road in operation in about one year, and work is already well under way on the water-power development as well as the electrical apparatus.

THE INVESTIGATION OF THE NEW YORK BOARD OF WATER SUPPLY.

The Commissioners of Accounts of New York City reported this week to Mayor McClellan that within a few days they would prefer formal charges against the Board of Water Supply, charging the members with incompetency and misconduct in connection with the award of the contract for the Ashokan dam. The misconduct referred to is "a manifest waste of the city's money in awarding the contract for the Ashokan reservoir dam for a price of $2,354,425 more than that for which the lowest bidder was willing to do the work." The charges have to be made in this form, since the law of 1905, under which the Board of Water Supply was created, says that no member of the Board shall be removed except on charges of incompetency and misconduct. It should also be stated that the investigation made by the Commissioners of Accounts was an entirely one-sided affair, like the investigations made by a grand jury. The Commissioners of Accounts would not print the statement prepared by the Board of Water Supply in its defense, nor would they permit the Board to make any such defense of its methods as is customary in a legal action. In taking this position, the Commissioners have apparently acted on the opinion that the actual trial of the case would be held before the mayor, and that it was merely their duty to ascertain if there were sufficient grounds for holding such a trial. The Commissioners' report is, therefore, merely an indictment and an ex parte statement like the arguments of a district attorney. This should be borne in mind in reading the following notes concerning the report.

The Commissioners state that the one reason of the Board of Water Supply for the rejection of the lowest bid for this dam, the fear of delay, rested on two causes, according to the testimony of the members of the Board, inexperience and a losing price. The Commissioners report that the Board had before it absolutely nothing to justify the conclusion that such causes existed or were sufficient, except general statements of opinion and experience. The Commissioners accuse the Board of failing to take such steps to satisfy itself of the accuracy of the statements made by its chief engineer and consulting engineers, as would be expected of ordinary business men of experience. It further accuses them of neglecting to bring out the facts from the lowest bidder and of authorizing a large expense upon a record which, it is claimed, bears upon its face the evidence of its insufficiency.

The report of the Commissioners states that the president of the Board of Water Supply, Mr. J. Edward Simmons, testified that he knew nothing of the engineering problems or questions involved in the award of the contract, for he had not inquired into these matters, believing that they were of such a nature as to be intelligible in detail only to engineers. He was satisfied with the reports of the chief engineer and consulting engineers, relied absolutely on their advice, and did not consider that it was necessary to go beyond their advice, in passing upon this matter. According to the report of the Commissioners, the second member of the Board of Water Supply, Mr. Shaw, did not ask the chief engineer to explain how he had arrived at his estimates, although he had asked on what facts the opinion that the Peirce prices were too low was based. It was his opinion, the report states, that he had no way of determining that the Peirce bid was in error and the engineers correct, other than the unanimity of opinion on the part of the engineers, except that the other bidders named figures higher still. The Commissioners report that the third member of the Board of Water Supply, Mr. Chadwick, testified to a general understanding of the preliminary investigation and the nature of the tests made by the engineering department. When the tabulated bids were examined by him, the contrast between the figures in the Peirce bid and the others caused him to believe that the former should be closely scrutinized. He testified that upon the ques-

INTERIOR VIEW OF ONE OF THE TWIN TUBES OF THE BATTERY TUNNEL, NEW YORK.

The first train was run through this tunnel on Nov. 27 from Bowling Green, Manhattan to the Borough Hall station, in Brooklyn. The design and construction of the tunnel have been fully described in past issues of The Engineering Record.

tion of price, he considered that the various bids submitted were the best expert advice and evidence of which he could conceive, four out of five of these bids approximated, corroborated and endorsed the engineer's estimate, while the fifth, the lowest bid, differed widely from it. Mr. Peirce had told him that he was unwilling to perform the work under his bid, that the prices were too low, and that he (Peirce) could not get anyone to justify and protect him in this bid.

The report of the Commissioners of Accounts summarizes in detail the statements of the witnesses examined by it and then makes this comment: "It becomes a question whether the members of the Board took all the steps and precautionary measures which business men of experience might be expected to take in the conduct of their private business, for this we consider to be the fair measure of their duty. We are of the opinion that they did not. There was no evidence before the Board that the Peirce prices were below cost. Their conclusion that such was the case rested solely upon inference and opinion, inference from other conclusions unsupported by evidence, and opinion unexplained and unanalyzed. Their conclusion that delay must result from a losing price rested also upon opinion, though in this matter on opinion qualified and unpronounced and upon two cases cited. What an analysis of the facts in one of these cases would have brought out the testimony taken before us shows. What a thorough and searching investigation by the Board would have devolved upon the whole question that testimony also demonstrates. It seems to us that the measure of care and application given by the members of this Board to this problem was not that measure which the people of this city have the right to demand of their servants in office charged with the duty of wisely and economically administering their funds."

The Commissioners of Accounts make these comments on the testimony of the engineers of the Board of Water Supply:

"The chief engineer did not know the rate of wages prevailing at Ashokan or what the contractor was, at the time of this hearing, paying his men. He did not know and could not estimate the detailed cost of any particular sub-division of the work of constructing the dams. He believed that such information would serve no purpose. In general he held that the estimating of engineers was purely a speculative science; that between estimates there is no way of telling which is right until the work is carried out; that cost cannot be determined in advance by any mortal, and that the only way to determine it is for a contractor to do the work and keep a record. Not being able to tell the cost of the work projected, he yet considered it wise to award a contract at an advance of $2,500,000 over the lowest bid, under the conditions presented.

"Professor Burr, after a very lengthy and detailed examination, in which an earnest effort was made to draw from him specific statements and facts, added absolutely nothing to the evidence of price, with the exception of two costs which he cited. These were of a rolled embankment of the water works at Waterbury and of a dam at Farrington, Conn. He formed his judgment of the Peirce prices from his general experience as an engineer, particularly that in this class of work, and from the experience of others communicated to him. His actual experience in the construction of rolled earth embankments confined itself to a reservoir 400 ft. in diameter in the outskirts of the city of Newark, constructed under his direction 34 years ago, and to the Harlem River driveway. He could not remember the cost in the former case and considered the conditions were too dissimilar to allow of a comparison with the Ashokan dam. He did not know the cost in the case of the Harlem River Driveway, which, in any case, was a different character of embankment. The remainder of his experience was as a consultant.

"Mr. Stearns had but little experience in steam shovel work. They had been very little used in the hydraulic work with which he had been connected. He did not know the cost of running a steam shovel for one day or for any other period of time. He never kept costs of steam shovels. He could not name the number of shovels which would probably be used at Ashokan, or the probable daily output of cubic yards per shovel. He did not know the details of steam-shovel work. He thought the cost of loading on board cars by steam shovel would be 20 cents per cubic yard at Ashokan, but could not show how he arrived at that figure.

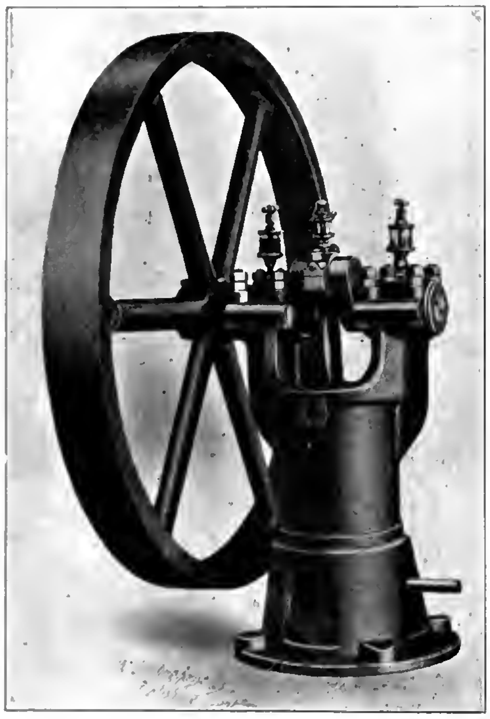
"Mr. Freeman's contributions to the evidence upon cost were exceedingly meagre. His judgment that Peirce's prices for earthwork were below cost were at one time during this testimony based mainly on the engineer's estimates, while at another it was based on his general experience, using former contract prices as a criterion, his judgment of the price for this work being a composite of his general experience. His judgment fixed the price for embankment at 60 cents per cubic yard."

"Mr. Freeman differs radically from his colleague, Mr. Stearns, and from Chief Engineer Smith, who were strongly of the opinion that the only safe guides in [illegible] were costs of former works and who con[illegible] earthwork [illegible] would serve as partial guides."

The Commissioners of Accounts make the following statements regarding the testimony by representatives of contracting companies:

"Of all the evidence submitted upon the questions of price and cost that contained in the testimony of Mr. John Peirce and his engineers was the most striking, because of the prevailing impression that Mr. Peirce believed his bid to be at losing figures. In explanation of his interview with Commissioner Chadwick Mr. Peirce stated that he had been invited to meet the chief engineer and the Commissioners. He had stated to the former that he considered that he was low on embankment, but had good prices on the masonry. The chief engineer agreed with him. His interview with Commissioner Chadwick occurred some three days later. He was not familiar with embankment work and was influenced in thinking his prices were too low partly by the other bids, partly by steam shovel people who were here at the time, partly by the opinion of the chief engineers and of the Commissioners. He did not remember that any one connected with the Board asked him how he expected to come out on the entire contract, or that he communicated his expectations to any one there.

"When called to the stand Mr. Peirce declared that his bid, in his own judgment, formed after his return from Europe, showed, as it stood, a net profit of 10 per cent. He stated that the figures from his engineers showed a profit of $2,000,000 to $2,500,000, and that his own judgment, independent of the engineers' figures, showed him a profit after he had gone over the matter. This profit was on the entire bid, but he saw none on the embankment item, viewed separately. He could not say that the embankment items at those



SMALL WESTINGHOUSE AIR COMPRESSOR.

prices would be done below cost, there being various opinions as to that. He did not consider that this profit of 10 per cent. was enough for a job extending over so long a time, and if the Commission was willing to pass his bid he was willing that it should do so. He had never abandoned a contract or refused to perform an obligation, and had the Commission held him to his bid it was his intention to perform the letter of his contract.

"W. J. Oliver, who had been associated with Mr. Peirce in the company organized to do work on the Panama Canal, considered that Peirce was too low on excavation, but wanted to become a partner and participate in the entire contract.

"Witness (Emil Deibitsch), the vice-president of the John Peirce Company, furnished the names of those who took part in the preparation of the Peirce bid. The cost estimate was prepared by Ernest C. Moore, an engineer in charge of certain contract work of the Peirce Company. That estimate amounted to about $8,000,000, and was submitted to Engineer Reed, of John B. McDonald's office, for his opinion. Mr. Deibitsch checked up this estimate.

"The only direct evidence upon the price of labor submitted was that given by James O. Winston, of the Winston Company, and Bruno Feder, the labor contractor. Mr. Winston stated that the MacArthur Company was paying $1.50 up a day of nine hours. Mr Feder testified that he was prepared to make an offer to the successful contractor to furnish labor up to the number of one thousand men, in a period of two weeks, at a rate of $1.35 a day of eight hours.

"The evidence submitted to prove that delay invariably results from a price below cost was inconclusive and meagre."

A NEW WESTINGHOUSE AIR COMPRESSOR.

The Westinghouse Air Brake Co. has been for some years supplying various industries using compressed air with its standard steam and motor-driven air compressors. In some industries, however, there is a demand for a compressor of smaller capacity and the company has therefore developed a small belt-driven compressor.

The compressor is of the vertical single-cylinder, single-acting, water-jacketed type, operated by power delivered to a 30-in. flywheel attached to a crank shaft, the rotation of which drives the piston in the cylinder by means of a connecting rod. The diameter of the air cylinder is 3 in., the stroke of the piston is 4 in., and the rated capacity of the pump is 4 cu. ft. of free air at 250 r. p. m. It is designed to operate if desired against any air pressure up to 250 lb. At 250 r. p. m. its speed of maximum efficiency, and against 200 lb. air pressure, approximately one brake horse power is required to operate the pump. Since the act of compressing air always raises its temperature, the cylinder is surrounded by a water jacket, through which a constant circulation of water is maintained.

THE WATER PURIFICATION WORKS AT PITTSBURGH.

It is generally known that the water purification works at Pittsburgh are so far advanced that in a few days water will probably be admitted to some of the filter beds, but there are some portions of the work which are still quite backward. In the pumping station which will supply water from the river to the sedimentation basins, half of the boilers, two of the three electric-generating units and two of the four main pumping engines are in service or ready for it. This will enable at least two shifts a day to be operated and plenty of water pumped to the settling basins. These basins have been filled and the conduits and pipe lines from them to the filters are now being tested. Twelve of the filters are entirely complete, with all their connections, and can be started as soon as water is delivered to them. Twelve more filters have all their filtering material in them and can be started as soon as a few connections are completed. The remaining filters are in various stages of progress; most of the concrete work is done, but only about half of the filtering material is in place and a good many adjustments will have to be made before the works as a whole are in a good state for use.

Connections have been made so that as soon as the filtered water reservoir is filled, at least two of the pumps at the Brilliant pumping station of the Pittsburg water-works can be supplied with filtered water, but it is impracticable to state at present just when the connections for the other pumps can be made, so that all of them will be in a position to receive filtered water. This work depends a good deal upon river conditions, and the length of time the pumps can be placed out of commission. It would not be surprising if this work remained incomplete until next fall.

A good deal of trouble is being experienced in securing good men for the maintenance of the works. The old ordinance governing such things prohibited the employment of men who had not lived six months in the city of Pittsburgh, prior to the time they received their appointment. This ordinance was not enforced during the construction of the filters, because the men were necessarily experts in their respective duties in one sense, but it is the desire of those at the head of the city's affairs to have the maintenance work done entirely by citizens. In order to ensure this, a new ordinance calls for preference to be given to those who have resided in the city for two years prior to the passage of the ordinance, which entirely prevents the appointment on the maintenance staff of men living in Aspinwall, where the filters are, who have been familiar with the construction of the work. Up to the present time it has been impossible to secure enough men through the local Civil Service Commission who had the technical qualifications for the places and could comply with the requirements as to residence.

The consolidation of Allegheny with Pittsburg is causing considerable discussion as to the water supply of the former place. At the present time there is a pumping station at Montrose which supplies Allegheny with about 40,000,000 gal. daily. To filter this amount of water will require from 22 to 24 more filters, at the present maximum rates, than the present plans for the Pittsburgh works contemplate. There is room for 10 more filters on land already owned by the city. It has been suggested by some that it would be best to build 10 additional filters for operation at the rate contemplated by the designers of the work and conduct a series of experiments to ascertain whether this rate can be increased by the use of preliminary filters or by coagulation. Inasmuch as no conclusive experiments have been undertaken to determine whether the Allegheny River water can be subjected to such preparatory processes with any economical success, it is manifest that the adoption of one of these methods without further trial would be at the risk of an expensive failure.

THE ACCIDENT AT THE VIRGINIA PORTLAND CEMENT WORKS.

The newspaper reports of the accident to the power house of the Virginia Portland Cement Co., at Fordwick, Va., have failed to state correctly the facts of this unusual occurrence. These mills were described in The Engineering Record of July 28, 1900. The power house is a 56x82-ft. building with a 43x78-ft. extension. It is a brick structure with heavy timber roof trusses, the latter made necessary by the impracticability of securing ironwork within any reasonable time when the plant was built. These trusses were carried on a plate girder 48 ft. long and 5 ft. deep, which had a 15x18-in. bearing at each end on a brick pilaster. The brickwork was laid in lime mortar and the 40-ton load on each bearing came directly on the brickwork, without a bearing plate or capstone.

For some weeks previous to the accident, blasting had been going on in the excavation for a condenser ditch outside the power-house, and it is believed that the series of shocks from the blasting weakened the brickwork until it failed, resulting in the wreck shown in the picture. The actual damage is much less than the picture would indicate. While the walls of the building are so badly cracked that they must be torn down, the machinery is undamaged. The girder fell on the transmission rope, which held it, and parts of the roof were held by the traveling crane. In reconstructing the building the girders will be supported on steel columns.

WRECK OF THE ROOF OF THE POWER HOUSE OF THE VIRGINIA PORTLAND CEMENT WORKS.

THE CHICAGO CEMENT SHOW.

The first annual cement show under the management of the Cement Products Exhibition Co., which was held in the Chicago Coliseum this week, was more largely attended than seemed probable a few weeks ago, when the flurry in the money market produced a feeling of unrest in the building trades. When the financial disturbance began, the directors of the company recognized that they would have to give their personal attention to the enterprise if it was to have the educational results desired, and the character and number of the exhibits demonstrated the hard work these men did. The company is an organization of manufacturers of Portland cement, with the following officers: President, Edward M. Hagar, Universal Portland Cement Co.; vice-president, Norman D. Fraser, Chicago Portland Cement Co.; secretary and treasurer, C. H. Wood, Wolverine Portland Cement Co.; directors, the gentlemen named above with A. St. J. Newberry of the Sandusky Portland Cement Co., Wm. Dickinson of the Marquette Cement Mfg. Co., Daniel McCool of the Newaygo Portland Cement Co., E. W. Shirk of the United States Cement Co., B. F. Affleck of the Universal Portland Cement Co., and J. U. C. McDaniel of the Chicago Portland Cement Co. The company is a permanent one, which proposes to hold a similar show every year for the purpose of enabling the manufacturers of materials and supplies for the concrete industry in the Chicago district to exhibit them under the most favorable circumstances. This year there were considerably over a hundred exhibits and the interest shown in them by the visitors was considered entirely satisfactory by those in charge and an indication of even greater success hereafter, for more time can be given to perfecting the arrangements for future shows and the experience gained in this first one will prove a guide to the work.

The exhibits made by the manufacturers of Portland cement were chiefly samples of art work. It is generally recognized at the present time that the architects are proving the main stumbling block in the way of a more extensive use of Portland cement in the better grade of residences. Their objection is not against the structural properties of the material, but rather against its alleged lack of artistic capabilities. This feeling is due to an absence of information concerning what can be accomplished with cement and concrete under proper treatment, and to furnish this information visitors to the show were given an opportunity to see some interesting and artistic samples of decorative concrete work. Naturally enough many present were particularly interested in the samples of the new white Portland cement for art work which the Sandusky Portland Cement Co. displayed. The Marquette Cement Mfg. Co. showed a model house of concrete blocks which was always surrounded by a number of visitors. Other cement manufacturers displayed pictures of their works which furnished a convincing proof of the extent and permanence of the manufacturing plants required in this industry.

The builders of machinery for cement mills took advantage of the show to be represented and to make known among the cement men present the advantages of their novelties and their standard apparatus. The makers of machines for moulding concrete building blocks were also in evidence, a special reason for their exhibits being the convention of the Northwestern Cement Products Association, which met during the week.

The exhibits of machinery for contractors' use were numerous. The Arthur Koppel Co. displayed a portable track and several cars. One of these was a 1-yd. steel dump car with a special fastener, roller bearings, and cast-steel wheels, which was designed particularly for conveying concrete from mixers to the forms where it is to be used. Another type of car shown is what is called a scoop car, made entirely of steel and used for charging a mixer. By the use of a fifth wheel or turntable, the box can be dumped to either side or end. The Continental Car & Equipment Co., of Louisville, showed a 6-yd. two-way diamond frame dump car for a standard-gauge road. This type of car is used in cement works and by contractors in handling the material excavated by steam shovels. The car weighs about 9,500 lb., and it was delivered at the show only with considerable difficulty, on account of the trouble in getting it transported quickly. The company reports that it is entirely satisfied with the results of its trouble, however, for a number of sales were made during the show. The Parker Hoist & Machine Co., of Chicago, exhibited its builder's derrick, which weighs only 450 lb. complete, with blocks and rope. The heaviest part of the machine weighs but 150 lb.

The manufacturers of cement mixers were naturally well represented. The Eureka Machine Co., of Lansing, displayed a steam power mixer and a gasoline engine outfit in actual operation. The McKelvey Machinery Co. not only showed contractors' machinery and tools, but also industrial cars and block machines. The Chicago Concrete Machinery Co. had one of its mixers in operation. The Chicago Builders' Specialty Co. showed the Koehring mixer. The various water-proofing methods were explained by representatives at the show, and the interest shown in this subject was decidedly marked.

The General Fireproofing Co., of Youngstown, showed its various types of reinforcement for beams and slabs by means of a model structure in which the manner of using these different materials was clearly indicated. The Expanded Metal & Corrugated Bar Co., of St. Louis, had a number of illuminated pictures of structures in which their materials had been used. The Inland Steel Co., of Chicago, displayed a collection of high-carbon twisted bars. The American Steel & Wire Co., of Chicago, displayed columns, beams and slabs reinforced by its new wire nettings. The American System of Concrete Reinforcing, of Chicago, exhibited its complete system of constructing beams, columns and slabs.

A feature of the show which caused considerable comment among visitors was the number of different types of concrete roof tiles which were to be seen. This is not a new cement product by any means, but its recent rapid strides into some prominence are noteworthy.

It is, of course, impracticable to give here a complete list of everything exhibited, but it can be gathered from what has been said that such a display of materials and products of the cement industry has a distinct educational value. There are many cement workers who are carrying on small undertakings successfully and wish to enlarge their operations, but hesitate to do so on account of unfamiliarity with some branches. The show furnished such visitors with much of the information they wished to obtain. In addition the architects and builders who saw the samples of artistic work in concrete were free to acknowledge their profit from an inspection of these things.

PERSONAL NOTES.

Mr. J. W. Wilcox has been appointed city engineer of Macon, Ga.

Mr. Charles W. Trumbull has been appointed city engineer of Schenectady, N. Y.

Col. William E. Cutshaw, city engineer of Richmond, Va., for the past 30 years, died Dec. 20, after an illness of several weeks.

Mr. W. P. Chrysler has been appointed superintendent of motive power of the Chicago Great Western Ry., a newly-created office.

Messrs. Kable & Kable, architects and engineers, Portland, Ore., announce the removal of their offices to the Chamber of Commerce Tower in that city.

Messrs H. C. Innes and E. A. Gast have been re-elected president and secretary and treasurer, respectively, of the Engineers' Club, of Cincinnati.

Mr. W. S. Menden, who has been acting superintendent as well as chief engineer of the Brooklyn Rapid Transit Co., has been appointed assistant general manager and chief engineer of that company.

At a recent meeting of the Washington Society of Engineers, the following were elected officers for the coming year: President, Arthur P. Davis; vice-president, D. S. Carll; secretary, John C. Hoyt; treasurer, John F. Hayford.

Col. William Crooks, assistant to the general manager of the Oregon R. R. & Navigation Co., at Portland, Ore., and one of the pioneer civil engineers in the Northwest, died recently at Portland, Ore., aged 76 years. Crookston, Minn., was named after him.

Mr. S. R. Fowler, formerly a resident engineer with the Kenefick-Hammond-Quigley Construction Co., Beaumont, Tex., has joined Mr. F. F. Kendall, of Houston, Tex., for the practice of general engineering. The name of the new firm is Kendall & Fowler.

Mr. J. W. Ager has resigned as electrical aide in the Bureau of Yards and Docks, United States Navy Department, to enter the employ of Muralt & Co., engineers, New York, as manager of that company's Southern office in the Title Guarantee Building, Birmingham, Ala.

Mr. J. C. Elliott, structural engineer and concrete-steel expert, has resigned as contracting engineer of the Berger Manufacturing Co., of Canton, Ohio, in the Chicago office of that concern, to accept a reappointment as superintendent of construction for the United States Treasury Department at Eau Claire, Wis.

At the nineteenth annual meeting of the Engineering Association of the South, held in Nashville, Tenn., Dec. 14, the following officers were elected: H. M. Jones, president; A. G. Gude, director. For the Nashville section: H. H. Trabue, president; W. M. Archibald, vice-president; S. M. McMurray, director. For the Atlanta section: Arthur Pew, president; R. H. Lawrence, vice-president; and T. P. Brant, director.

The Pennsylvania R. R. Co. has determined to continue its policy of furnishing to the public prompt and accurate information relative to its affairs, and for this purpose has engaged Mr. Ivy L. Lee to take charge of this work. Mr. Lee has been a member of the firm of Parker & Lee, who have acted as publicity managers for many of the largest interests in the country, including the Pennsylvania R. R. Co., so that there will be no interruption in the excellent methods of that company. Mr. Charles A. Bridge, manager of the firm of Parker & Lee, takes the place of Mr. Lee in it, the firm name becoming Parker & Bridge.

BUSINESS NOTES.

The Concrete Engineering & Supply Co. has moved to new offices at No. 1 Madison Ave., New York City.

The Artesian Well & Supply Co., of Providence, has been awarded the contract for sinking a well at Fort Terry, Plum Island, Long Island Sound, by the War department.

The Northern Engineeering Works, Detroit, Mich., has installed a No. 54 Newten cupola for the Standard Pulley Co., Cincinnati, O., and has also made shipments of Newten cupolas to Havre, France, and Genoa, Italy.

The Foos Gas Engine Co., of Springfield, O., have purchased the business of the Marinette Gas Engine Co., which comprises the line of Walrath multiple cylinder engines from 20 to 500 h.-p. for electric and power work. This engine has been on the market for over ten years, and with the company's horizontal engines from 2 to 90 h.-p. makes the Foos line very comprehensive.

B. F. Sturtevant Co., through Mr. F. R. Chinnock, manager of the New York office, reports the following sales of engines and electric generators: Board of Water Supply, Babylon, N. Y., one 9 x 8 vertical center crank engine, direct connected to a standard slow speed 25-kw. generator; Hanover National Bank, New York City, one 12 x 10 engine direct connected to 50-kw. generator; Eberhard Faber Pencil Co., Brooklyn, N. Y., one 16 x 14 horizontal automatic center crank engine direct connected to a 100-kw. generator; Booker Contracting Co., New York City, one 4½ x 4½ engine direct connected to 5-kw. generator; Central Union Gas Co., New York City, one 5 x 7 engine direct connected to 15-kw. generator; Vulcan Detinning Co., Sewaren, N. J., one 7 x 7 vertical engine; Hotel Takanassee, Long Branch, N. J., one 16 x 14 engine direct connected to 75-kw. generator, and one 13 x 12 horizontal engine direct connected to 50-kw. generator; H. J. McCoy, New York City, one 11 x 9 vertical engine; Washburn Bros., Saugerties, N. Y., one 25-h.-p. motor; N. Y. State Reformatory for Women, Bedford, N. Y., one 13 x 12 horizontal engine direct connected to 50-kw. generator; Isidor Fajans, New York City, one 6 x 6 engine direct connected to 10-kw. generator; Votey Organ Co., Garwood, N. J., one 3½ x 3 engine direct connected to 3-kw. generator; Johnson & Johnson, Steamer "Robert Johnson," one 10-kw. generator, direct connected to 6 x 6 vertical engine; Andrew McLean Co., Passaic, N. J., one 4 x 4 vertical engine; Royal Mfg. Co., Rahway, N. J., one 8 x 6 vertical engine direct connected to 6-kw. generator; New York Engineering Co., New York City, three 4½ x 4½ vertical engines direct connected to 5-kw. generators; Parker Engineering Co., one 14 x 14 engine direct connected to 75-kw. generator; Henry Steers, Inc., New York City, three 7½-kw. generators; Samuel Smith & Sons, Paterson, N. J., one 14 x 14 direct connected to two 50-kw. generators.

Ground has been broken for the enormous refinery to be constructed by the Standard Oil Co. on Staten Island Sound not far from Elizabeth, N. J.

The Wagner Water Still Co., 87 Washington St., Chicago, is pushing the sale of its water distilling apparatus for furnishing drinking water in places where the local supply is of questionable quality. The large stills, having a capacity of 2 to 15 gal. per hour are operated by steam, while the smaller sizes for laboratory and household purposes are operated by gas.

J. G. White & Co., New York, are buying freight cars for the Porto Rico Railways for carrying tobacco and sugar cane. The first order will include ten box and ten flat cars, all with steel underframes. This company has just ordered four 3½-ft. combination cars for the Philippine Ry. Co., making the seventh equipment contract for these lines placed by the company.

The Paterson oil eliminator, with make-up water softener, is described in a pamphlet recently issued by the Paterson Engineering Co., Ltd., Amberley House, Norfolk street, Strand, London, England. This apparatus is intended to free the condensation water from reciprocating engines from the emulsified oil which is found difficult to remove in the usual oil extractor in the exhaust mains. This is accomplished by a coagulation process which is fully described, the illustrations showing an equipment of 2,500 imp. gal. hourly capacity. Attached to the latter apparatus there is a water softener of 500 gal. hourly capacity for removing scale-forming substances from water which is added to the [illegible] for makeup purposes.

CONTRACTING NEWS

OF SPECIAL INTEREST TO CONTRACTORS, BUILDERS, ENGINEERS AND MANUFACTURERS

ENGINEERING AND BUILDING SUPPLIES

WATER.

Notes Arranged Alphabetically by States.

Headland, Ala.—See "Power Plants, Gas and Electricity."

Brewton, Ala.—See "Power Plants, Gas and Electricity.

Hartord, Ala.—See "Power Plants, Gas and Electricity."

Tropico, Cal.—The Tropico Water Co. is reported to have decided to purchase the water plant of the Dwight Briswood Land Co. and will improve same.

Daytona, Fla.—The City Council is reported to be considering the question of issuing $50,000 bonds for the construction of water works, to include fire protection.

Albany, Ga.—Bids will be received until Jan. 6 by Y. C. Rust, Clk. City Council, for $15,000 bonds to be issued for the purpose of extending the water mains and city sanitary sewerage system into Arcadia and other portions of this city; also $15,000 bonds for improving the surface drainage system of said city.

Boise, Idaho.—The Custer Land & Irrigation Co., of Boise, is reported incorporated, with a capital stock of $150,000. Incorporators: L. L. Folsom, W. W. Lynch, S. E. Vance and others.

Rockford, Ill.—The Water Com. is reported to be planning an expenditure of $30,000 for an extension of the water mains.

Evanston, Ill.—See "Paving and Roadmaking."

Springfield, Ill.—The City Council has passed an ordinance authorizing the Mayor and Supt. of Water Wks., to procure bids for the constructon of a dam and the diversion of the course of Spring Creek; the work to be done under supervision of Water Works Supt. and City Engr. Frank H. Hamilton.

**Wesley, Ia.*—The National Constr. Co., of South Bend, Ind., is reported to have secured the contract for constructing water works for $8,000.

Rockwell City, Ia.—It is stated that bids will be received until Jan. 6 by I. E. Dougherty, Town Clk., for constructing a 4-in. water main.

Versailles, Ky.—The Holmboe Co., Lincoln Savings Bank Bldg., Louisville, has been selected to prepare plans and specifications for water works and sewers; probable cost of work, $60,000.

New Orleans, La.—Geo. G. Earl, Gen. Supt. Sewerage and Water Board, writes that bids are about to be asked for a 4,000,000-gal. direct acting compound condensing pumping horizontal engine for the Algiers water purification station.

Baltimore, Md.—The city and county authorities are discussing an agreement for the construction of a 20-billion gallon reservoir in the Gunpowder River Valley and the application to the legislature for permission to raise $5,000,000 for acquoring the water rights.

**Cumberland, Md.*—The Fred. M. Prescott Steam Pump Co., of Milwaukee, Wis., recently received contract for furnishing and installing a pumping engine here. This engine if the Prescott Corliss cross-compound crank and fly-wheel type, with a capacity of 5,000,000 gals. per day of 24-hours; contract price, $23,410.

**New Bedford, Mass.*—The U. S. Cast Iron Pipe & Foundry Co., of New York, N. Y., is reported to have secured the contract for 481 net tons of 12,10, 8 and 6 in. c. i. pipe at $27.25 per ton and 44 tons specials, $57.50; total, $15,637. Totals of other bids: Warren Foundry & Machine Co., New York, N. Y., $15,796; Camden Iron Works, Philadelphia, Pa., $18,127 and Lynchburg Fdy. Co., Lynchburg, Va., $15,703.

Columbia, Miss.—The citizens are reported to have voted on Dec. 13 to issue $50,000 bonds for water works and sewers. W. L. Simmons, Town Clk. E. Blanchard, Engr., Columbia.

St. Louis, Mo.—The West St. Louis Water & Light Co. which supplies water to St. Louis County, is reported to have completed arrangements for erecting 2 water towers and laying 13 miles of pipe in the country. One of the towers will be erected on Stratman Hill, on the Link and Olive St. roads in the southern part of the county; the other will be placed near Normandy. Each tower will have a diam. of 65 ft. and will stand over 125 ft. high, their capacity being 750,000 gals. The new pipe will be laid over the Olive St. and Denny roads, to give a more direct line to Kirkwood and Webster Groves.

Harlowton, Mont.—See "Power Plants, Gas and Electricity."

Molma, Neb.—See "Power Plants, Gas and Electricity."

Burlington, N. J.—The Bd. of Water Comrs. is reported to be considering the question of constructing a filtration plant, to cost about $100,000.

Rocky Mount, N. C.—See "Power Plants, Gas and Electricity.

Forgo, N. D.—It is stated that bids will be received until Jan. 6 by N. C. Morgan, City Aud., for constructing a 6-in. water main in 10th Ave., S., and 4th and 8th Sts., N.

Minot, N. D.—Local press reports state that bids will probably be called for at once for the construction of water works, to cost about $150,000.

**Zanesville, O.*—The Fred M. Prescott Steam Pump Co., of Milwaukee, Wis., recently received a contract from the City of Zanesville, for a horizontal triple expansion direct acting water works pumping engine, with a capacity of 6,000,000 gals. per day.

Toledo, O.—The city officials are reported to be considering the construction this winter of conduits from the filter plant to the water works pumping station

Fostorio, O.—The Riggs & Sherman Co. of Toledo, is preparing plans for preliminary filters for Fostoria.

Warren, Pa.—The American Water Works & Guarantee Co., of Pittsburg (J. H. Purdy, Mgr.) owner of the Warren Water Works Co., is reported to be considering the question of constructing a filtration plant at Gladerun, to cost about $100,000.

Fairchance, Pa.—Jas. Farrell, Clk., of Council, writes that bids will probably be called for in March for the construction of water works, to cost about $20,000. Engineer Geo. Scudder, of Uniontown.

Newberry, S. C.—See "Power Plants, Gas and Electricity."

**Bay City, Tex.*—We are iformed that the John W. Maxey Constr. Co., of Houston, has secured the contract for constructing water works for Bay City at about $25,000.

Seattle, Wash.—R. H. Thomson, city engr., estimates the cost of laying water mains on 20th Ave., n., at $3,750; also for water mains on e. 65th, 15th Ave., n. w., and 23d Ave., n. e. at $12,100.

Tacoma, Wash.—Owen Woods, Comr. of Pub. Wks., is reported to have been instructed to procure bids for a 2-stage, 10-in. turbine pump, capable of handling 6,000,000 gal. of water daily at Station A.

Kenosha, Wis.—The City Council is reported to be considering the building of a new intake for the municipal water plant. It is proposed to extend the intake into the lake about 6,000 ft.; estimated cost, $75,000.

Morietta, Wis.—The Marietta Water Co. is reported to be planing considerable extension work next spring.

Lethbridge, Alta.—C. M. Arnold, City Engr., writes that water works have been installed here since 1904, but further extensions are in view for the future.

Edmonton, Alta.—Bids will probably be called for in April for water work improvements, to cost about $40,000. R. R. Kelly, City Engr.

Toronto, Ont.—C. H. Rust, City Engr., writes that bids will be opened on Jan. 28 for a 15,000,000 and a 6,000,000 imperial gallon triple expansion vertical engine for the main and high level pumping station.

Weyburn, Sask.—Edgar A. Chappell, City Treas., writes that a dam to hold 100,000,000 gals. has been put in this fall to catch the spring's water, and as soon as the season opens next spring it is planned to go on with the 3½-mile water main to bring the water to town. There will be astand pipe needed, and between 5 and 6 miles of pipe for distribution. Final plans are awaiting the action of the coming Council.

Hamilton, Ont.—Bids are wanted until Jan. 1., as a whole or separately, for the water works system requlred on Burlington Beach, including motor, pumps, tanks, pipes, hydrants and valves. For further information apply at the Beach Comrs.' office, Rm. 59, Federal Life Bldg.

SEWERAGE AND SEWAGE DISPOSAL.

Notes Arranged Alphabetically by States.

University, Ala.—Bids are wanted until Dec. 31, for constructing a sewerage system for the University of Alabama, consisting of approximately 4,960 ft 8 in., 1,260 ft. 10 in., 1,110 ft. 12 in., and 2,160 ft. 15-in. sewer, and 25 manholes. John W. Abercrombie, Pres. of the University.

San Jose, Cal.—Bids will be received, it is stated, until Jan. 2 by the City Clk. for constructing an intercepting sewer in the 1st, 2d and 4th wards.

Bakersfield, Cal.—Bids will be received, it is stated, until Jan. 6 by the Bd. City Trus. for constructing a main land outfall sewerage system.

Albany, Ga.—See "Water."

**Belleville, Ill.*—We are informed that Reeb Bros. of Belleville has secured the contract for constructing sewers on Race, High and Church Sts. at 65 cts. per lin. ft. for 12 in., 80 cts. for 15 in.; $40 for manholes and $35 each for catch basins. The Stoltz Supply Co. of Belleville secured the contract for 12-in. pipe sewers on 2d Av. and D Sts., alley bet. High and Jackson Sts. and Jackson St. at 72 cts., 54 cts. and 57 cts; manholes, $36 and $35 and catch basins, $34.50.

Woodstock, Ill.—Lynn Richards, City Clk., writes that it is proposed to construct a sewerage system, to cost about $80,000. Engineer, W. S. Shields, 1201 Hartford Bldg., Chicago. Geo. H. Hoy, Mayor.

South Bend, Ind.—Bids will be received by the Bd. of Pub. Wks. until Jan. 7 for the construction of about 4 miles of pipe sewers up to 30-in. diam., with manholes, flush tanks, etc. A. J. Hammond, City Engr.

Indianopolis, Ind.—Chas. A. Brown, Asst. City Engr., is reported to have completed plans for the Spring St. sewer, to be about 4,800 ft. long, and cost about $6,500.

Ft. Wayne, Ind.—It is stated that bids will be received until Jan. 2 by the Bd. Pub. Service (Edw. J. Lennon, Chmn.) for constructing sundry sewers.

Charles City, Ia.—The City Council is reported to have decided to issue $14,000 sewer bonds.

Galena, Kan.—The City Council has authorized W. L. Ricksecker, City Engr., to prepare plans and specifications for lateral sewers, to cost about $30,000.

Caney, Kan.—It is stated that bids are wanted until Jan. 7 for $50,000 sewer bonds. W. E. McMillan, City Clk.

Versailles, Ky.—See "Water."

**Boston, Mass.*—John J. Leahy, Supt. of Sewers, writes that Timothy J. O'Connell, 158 Adams St., Dorchester, has secured the contract for rebuilding Stony Brook condnit in Bryant St., for $17,219.

**St. Paul, Minn.*—The Board of Public Works, on Dec. 16, awarded contracts for a sewer on Armstrong St. to Chatsworth St. to John Lind, 34 E. 2d St., for $7,600, and for sewers on Stickney, Gates and Page Sts. to O'Neill & Preston, for $12,457.

*H. Thornton Bros. are reported to have secured the contract on Dec. 10 for constructing about 2 miles of sewer on Dayton's Bluff, for $37,883.

Columbia, Miss.—See "Water."

**Items marked thus give the names of parties awarded contracts.*

Billings, Mont.—The city will probably let two contracts for sewers on Feb. 4, one to cost $14,000, the other about $17,000. Henry Gerharz, City Engr.

Morristown, N. J.—Mayor Alex. Bennett has signed the contract awarding to J. B. Salmon the contract for the erection of the disposal plants for the Morristown sewers on the Whithall tract.

Newark, N. J.—Press reports state that Edw. S. Rankin, Engr. Sewer Dept., is making surveys, etc., which will be presented to the Bd. of Wks. in Jan. for the construction of drains to carry off surface work in that section of the city south of S. Orange Ave and west of S. 12th St., taking in the Vailsburg Dist., probable cost, $250,000.

Millville, N. J.—The City Council is reported to be considering the question of constructing a sewage disposal plant.

Louisville, Ky.—The following are the bids opened on Dec. 7 at the office of the Comrs. of Sewerage (P. L. Atherton, Chmn.) for the construction of Sec. B of the Southern outfall sewer, Contract 2, of the comprehensive system of sewerage (J. B. F. Breed, Ch. Engr.): (*a*) T. B. Jones & Co., St. Louis; (*b*) Henry Bickel, Louisville; (*c*) E. H. Abadie Co., St. Louis; (*d*) Kirshener Const. Co., Cincinnati, O.; (*e*) Westwater & Casey, Columbus, O.; (*f*) N. Y. Continental Jewel Filtration Co., New York, N. Y.; (*g*) American Eng. & Constr. Co., Chicago, Ill.; (*h*) E. G. Nave Bro. & Co., Portsmouth, O.; (*i*) Irwin Bros., Greenville, O.; (*j*) Metropolitan Constr. Co., Boston, Mass.; (*k*) Luck Constr. Co., Roanoke, Va.

Dunkirk, N. Y.—The Council is reported to have decided to construct 10-in. tile sewers on Beaver, Zebra and E. 2d Sts.

New York, N. Y.—Bids will be received until Jan. 7 by Louis F. Haffen, Pres. Bronx Boro., for furnishing material and constructing sewers in portions of Anderson Ave., E. 163d St., Grand Boule. and Concourse, E. 181st St., and Jerome Ave., repairing and extending a drain in White Plain Rd. and in Bartholdi Rd.; receiving basins inCreston Ave. at E. 193, E. 197, and E. 198 Sherman Ave. and E. 162d St., E. 164th St and Sherman Ave., and E. 160th St. and Trinity Ave. Engineer's estimate: 877 lin. ft. 15-in. and 3,764 lin. ft. 12-in pipe sewers; 1,270 lin. ft. 18-in. pipe drain; 6,350 cu. yds. rock to be excavated and removed; 9 M. ft. timber; 53 manholes, etc, also for constructing a sewer in a portion of Truston St., Leggett Ave., E. 156th St., Whitlock and Longwood Aves. Engineer's estimate: 1,025 lin. ft. of concrete sewer, 11 ft. 6 in. x 7 ft. 3 in. 1,678 lin. ft., 11 ft. x 7 ft. 2 in. 10 lin. ft., 11 ft. x 5 ft. 10 in. 1,584 lin. ft., 6 ft. 3 in. x 6 ft. 1½ in. 10 lin. ft., 6 ft. 3 in. x 5 ft. 10 in. 2,874 lin. ft., 6 ft. x 5 ft. 11 in. 626 lin. ft. of pipe sewer, 30, 24, 18, 15 and 12 in. Items given above include the furnishing and placing all materials entering into construction thereof, as shown by stanodard and typical sections of same on plan, together with all special construction at manhole openings, reducers, etc. 952 spurs for house connections, over and above the cost per lin. ft. of sewere. 38 manholes, complete. 8 receiving basins, complete. 15,300 cu. yd. of rock to be excavated and removed. 150 cu. yd. of Class "A" concrete, in place, additional to that shown on the plan. 1,800 cu. yd. of Class "B" concrete, in place. 5,900 cu. yd. of broken stone for foundations, in place. 100,000 lb. of steel bars; 5-8-in. and ¾-in., furnished and in place in foundations, and ½-in. to 1¼-in. furnished and placed in standard sections additional to those shown on the plan. 1,265 M. ft. timber, furnished and left in place. 85,000 lin. ft. of piles. 2,150 lin. ft. of 6-in. pipe, as risers for house connections, including the supporting and surrounding Class "A" concrete. 100 lin. ft. of 12 to 24 in. drain pipe, furnished and laid.

Charlotte, N. C.—R. Goodwyn Phett, Mayor, in his address to Council recommends the completion of the sewerage system; also the enlarging of the present city hall.

Canton, O.—Bids will be received, it is stated, by Armstrong Ashbrook, City Aud., until Jan. 6 for $10,000 storm water sewer bonds.

Canal Dover, O.—It is stated that bids will be received until Jan. 11 by J. F. Defenbacher, City Aud., for $14,500 sewer bonds.

Steubenville, O.—It is stated that bids will be received until Jan. 13 by the Bd. Pub. Service (T. W. Vance, Clk.) for constructing sewers in 5th St. and Alley E.

**Youngstown, O.*—John Grady is reported to have secured the contract to construct the E. Federal St. sewer for $8,850.

Wyoming, O.—The Riggs & Sherman Co. of Toledo, are engineers for the proposed sewerage system to be constructed here, to cost about $50,000.

Springfield, O.—The following are the totals of bids opened on Dec. 18 for furnishing material and constructing a portion of the high level intercepting sewer. to consist of the following approximate quantities: 2,096 ft., 24-in. vitr. pipe, plain or reinforced concrete sewer; 5,554 ft. 30-in. vitr. pipe, plain, or reinforced concrete sewer; 2,166 ft. 33-in. vitr. pipe, plain or reinforced concrete sewer; 9,376 ft. 6-in. pipe house connections, average depth 10 ft; 71 6-in. on 24-in. Y branches; 158 6-in. on 30-in. Y branches; 64 6-in. on 33-in. Y branches; 800 ft. 8-in. sanitary sewer; 50 ft. 18-in. sanitary sewer; 10 ft. 30-in. sanitary sewer; 32 round manholes 8 single drop manholes; 1 double drop manhole; 1 regulator; 41 manhole covers and frames; 475 manhole steps; 115 cu. yd. Class A concrete and 17,875 cu. yd. rock excav.: (*a*) plain concrete; (*b*) reinforced concrete; (*c*) vitr. pipe; (*d*) Jackson reinforced concrete; (*e*) pipe of Ohio Pipe Co. Paul & Kershner, Dayton (*a*), $53,993; (*b*) $53,993; (*c*) $60,546. Bowman & Co., McKeesport, Pa.; (*a*) $46,881; (*b*) $53,425; (*c*) $53,892; (*d*) 51,835; (*e*) $48,457. C. I. McCracken Co., Columbus, (*a*) $56,396; (*c*) $59,622; (*d*) $56,396. Danl. Doyle, Springfield, (*a*) $48,844, (*b*) $50,263, (*c*) $60,650. W. E. McHugh, Springfield, (*a*) $53,491; (*b*) $55,130; (*c*) 62,341; (*d*) 54,330; (*e*) $53,491. Cyrus M. Long, Springfield, (*a*) $37,208; (*b*) $38,620; (*c*) $46,110; (*d*) $43,370. Thos. P. Strack, Cincinnati, (*a*) $46,792; (*b*) $48,651; (*c*) $51,660. Huonker & Williams, Springfield, (*a*) $50,327; (*b*) $52,188; (*c*) $59,007; (*d*) $54,230; (*e*) $52,585. To each of the above grand totals for various materials bid upon add about $35,750 for about 17,875 cu. yd. stone. W. H. Sieverling, City Engr.

**Orrville, O.*—Bids were opened on Dec. 9 for constructing sewerage system and disposal plant, and the contract for constructing the sewerage system was awarded to John Skeels, of Canton, at the following bid: For 6-in. sewer, 50 cts.; 54,700 ft. 8-in. sewer, 38 cts.; 8,900 ft. 10-in., 44 cts.; 9,500 ft. 12-in., 49 cts.; 1,000 ft. 15-in., 61 cts.; 5,000 lin. ft. 6-in. drain tile, 3 cts.; 5,000 ft. 8-in. 4 cts.; 1,200 ft. manhole, per lin ft., $1.95; 52 flush tanks, $25; 100 cu. yds. rock excav., $5; 500 cu. yds. earth excav., 25 cts.; 50 cu. yds. concrete, $2; 10 M ft. lumber, $10 per M ft.; total, $34,683. Totals of other bids. Post E. Gibson, Cambridge, $54,458; H. J. Glover, Lorain, $46,551; L. D. Burd & J. A. Rippeth, Canton, $53,499; J. C. Beasley, Columbus, O., $58,965; Price & Hurley, Marion, $48,144; McGarry & McGowan, Akron, $49,845; Wm. N. Perry, Canton $56,831; Jas. Brown & Co., Akron, $74,370; Clifford & Co., Martins Ferry, $55,622; Nitschke & Gibbins, Cleveland, $53,712; Turnbull Bros., Canton, $52,768; Ralston & Blinn, Mt. Vernon, $56,476; Gubbins & Hayes, Muncie, Ind., $47,412; Beers & Lehman, Cleveland, $62,382; Wildes & Davidson, Akron, $47,227; S. W. Parshall, Akron, $51,315; Weage & Swonk, Coldwater, Mich., $55,480; C. T. McCracken & Co., Columbus, $62,755; John B. McLane & Co., Newport, Ky., $57,899; E. McShaffrey & Son, Akron, $50,858; Campbell & Haskell, Canton, $43,105; Wm. H. Hunt, Akron, $45,393.

*S. W. Parshall, of Akron, secured the contract for constructing the sewage disposal plant at the following bid: 7,500 cu. yds. earth embankment, 25 cts.; 330 cu. yds. concrete, $7; 400 lin. ft. 12-in. sewer pipe, 35 cts.; 376 ft. 10-in., 30 cts.; 108 ft. 8-in., 25 cts.; 600 ft. 6-in., 18 cts.; 350 ft. 4-in., 10 cts.; 1,300 ft. 3-in., 6 cts.; 5 manholes, each, $22; 4 lampholes to set, each 90 cts.; 4 siphons to set, lump sum, $700; 1 pump house complete, $300; 2,000 cu. yds. slag, $1,60; 400 cu. yds, cinders, 90 cts.; 5,000 cu. yds. sand, $1.60; 20 cu. yds. concrete, $7; total, $17,499. Total of other bids: J. C. Beasley, Columbus, $18,961; Jas. Brown & Co., Akron, $29,324; Nitschke & Gibbins, Cleveland, $18,523; Turnbull Bros., Canton, $30,799; Ralston & Blinn, Mt. Vernon, $22,546; Beers & Lehman, Cleveland, $17,971; E. McShaffrey & Son, Akron, $23,706; Fauver & Renick, Findlay, $21,045; Wm. E. McHugh, Springfield, $20,744; Pittsburg Constr. Co. Pittsburg, Pa., $21,894; W. I. Kennedy, Medina, $28,968. Chapin & Knowles of Canton, are Consulting Engrs.

McKeesport, Pa.—Bids will be received, it is stated, until Jan. 7 by C. E. Soles, City Compt., for constructing a 24-in. terra cotta sewer in W. 6th St. and a 15-in. terra cotta sewer in Beech St.; also a sewer at No. 4 fire station.

Camden, S. C.—Bids are wanted until Jan. 15 for $50,000 bonds, to be issued for installing a sewerage system. J. J. Goodale, City Clk.

**Galveston, Tex.*—A. T. Dickey, City Engr., writes that Kelso & Vantrim, of Galveston, on Dec. 12 secured the contract for constructing 66-in. reinforced concrete drain on 10th St., from Ave. D to water front at $17,735. M. D. Carr, of Galveston, bid for this work $17,934.

Seattle, Wash.—City Engr. R. H. Thomson, estimates that cost of constructing sewers on Atnaltis St. at $69,000 and W. 64th St. at $6,590.

Edmonton, Alta.—Bids will probably be called for in the spring for sewer work to cost about $200,000, and septic tank, to cost about $100,000. R. R. Kelly, City Engr.

BRIDGES.

Notes Arranged Alphabetically by States.

Dunnellon, Fla.—It is stated that bids will be received until Jan. 8 by the Bd. Co. Comrs. (S. F. Siptrunk, Clk.) at Ocala, for constructing a steel bridge across the Blue River near Dunnellon.

Rossville, Kan.—Bids will be received, it is stated until Jan. 3, by the Bd. Co. Comrs. at the office of L. G. Zimmerman, Co. Clk., at Topeka, for constructing a low truss steel bridge over Cross Wreck at Rossville, to consist of one span, 98 ft., between centers of piers, 14-ft approach and roadway 16 ft, in width.

Alexandria, La.—Bids will be received by the Police Jury, of Rapides Parish, at Alexandria, until Jan. 16, for constructing a steel highway bridge on concrete piers at the race track crossing of Bayou Rapides, as advertised in The Engineering Record. Ira W. Sylvester, Consulting Engr., Rapides Bank Bldg., Alexandria.

Minneapolis, Minn.—The City Council is stated to have appropriated $2,500 for the repair of the bridge over Minnehaha Creek at Nicollet Ave.

Crookston, Minn.—The construction of a steel structure replacing the Sampson's Addition Bridge is reported contemplated, at a cost of $10,000.

Gulfport, Miss.—Plans and specifications will be received by the Bd. Co. Superv. (F. S. Hewes, Clk.), until Jan. 6 for constructing a draw-bridge across the Tchontacaboriffa River.

Kansas City, Mo.—W. H. Dunn, Supt. of Parks, writes that preliminary plans have been ordered prepared for constructing 2 bridges over Blue River in Swope Park. No definite arrangement yet made for construction. F. R. Nossard, Secy. Park Bd.

Albany, N. Y.—The Common Council is stated to have passed an ordinance authorizing the construction of a viaduct over N. Lansing St.

Washington, N. C.—Bids will be received, it is stated by Gilbert Rumley, Clk., Bd. Co. Comrs., until Jan. 6, for $50,000 bridge bonds.

Logan, O.—It is stated that bids will be received until Jan. 11 by the Bd. Co. Comrs. for constructing a bridge across Heicking River in Green Township. Jas. L. Martin, Co. Aud.

Norwood, O.—Engineer Jas. A. Stewart, 712 Traction Bldg., Cincinnati, O., writes that the following are the bids opened on Dec. 14 by the Bd. of Pub. Service for furnishing material and constructing sub-structure of a viaduct over the B. & O. S. W. Ry. and Section Ave. to consist of 1,700 cu. yds. concrete (price given per cu. yd.): John Snyder, Norwood, $8.90; Jones Bros., Columbus, $12.50; L. Eid Concrete Steel Co., Cincinnati, $9.84; Thos. J. McRiver, $12; Concrete Steel Co., Cincinnati, $9.90; Frank Foley & Co., Cincinnati, $8.50; Tuppan & Son, Peru, Ind., $7; Ferro Concrete Co., Cincinnati, $9.19; J. B. McLane & Co., Newport, Ky., $8,50; C. D. Bennett, Cincinnati, $9.68; Louis Drach Constr. Co., Cincinnati, $8.70.

Nashville, Tenn.—Bids will be received by the Cumberland Bridge Com. (J. K. Rains, Chmn.) until Jan. 22 for furnishing material and manufacturing and erecting steel spans for two bridges across Cumberland River, as advertised in The Engineering Record.

Hudson, Wis.—Bids will be received by the Common Council until Jan. 6, for constructing a steel bridge and foundations, across Willow River, at the north end of 2d St. Loweth & Wolff, Engrs., First Natl. Bank Bldg., St. Paul, Minn.; A. Karbas, City Clk.

PAVING AND ROAD MAKING.

Notes Arranged Alphabetically by States.

Montgomery, Ala.—Bids will be received by the City Treas. until Jan. 6, for paving sidewalks on a portion of Hull St. with hexagon blocks, and for all necessary granite curbing and storm water sewers in connection therewith.

Compton, Cal.—The Compton Electric Light & Power Co. contemplates extending its lines to Watts and Willow Brook. G. R. Fulton, Secy.

Albany, Ga.—Bids will be received until Jan. 6 by Y. C. Rust, Clk., Council for $10,000 bonds to be issued for the purpose of paving a portion of Broad St., also $5,000 bonds for reopening up and grading Davis St.

Rathdrum, Idaho.—The A. O. Skinner Electric Light & Power Co. contemplates constructing 5 miles of high-tension transmission line. H. R. Saunders, Secy.

Grangeville, Idaho.—The Grangeville Electric Light & Power Co. is planning to double its present output, and extend its transmission lines to Cottonwood, 20 miles distant. D. C. Van Buren, Mgr.

Evanston, Ill.—The City Council has passed an ordinance providing for paving with granite top macadam Colfax St. from Sheridan Road to Ridge Ave.; also for laying 6-in. water main in Milburn St.

Gibson City, Ill.—Wm. A. Davidson, City Clk., writes that it is preposed to lay about 36,087 sq. yds. brick pavement at a cost of $60,000 to $70,000. Engineer, C. F. Helman, of Paxton. C. W. Knapp, Mayor.

Chicago, Ill.—The Bd. Pub. Improvements is stated to have approved ordinances providing for the paving of portions of Wentworth, Greenwood, Lexington and Woodlawn Aves., Maxwell, Lock Sts.

Peoria, Ill.—The paving of a portion of Garden St. is reported contemplated, at a cost of about $30,000.

Champaign, Ill.—G. C. Fairclo, City Engr., writes that bids will be received by the Bd. of Local Improv. on Jan. 8 for improving Daniels St., to consist of the following: Excav., 5,950 cu. yds.; asphalt pavt. on concrete foundation, 8,320 sq. yds; combined curb and gutter, 5,700 lin. ft.; retaining and false curb, 442 lin. ft.; 40 gutter plates, 12 catch-basins, and 1,820 lin. ft. 8-in. vitr. pipe.

* *Items marked thus give the names of parties awarded contracts.*

Indianapolis, Ind.—The Union Asphalt Co. is stated to have secured the contract for paving E. 21st St. with asphalt, for $8,997.

Indianapolis, Ind.—The Bd. of Pub. Wks. will soon ask for bids for grading, graveling roadway, brick gutters, cement walks and curb in Sleete and Union Sts., for brick roadway in first alley north of 12th St.; and alley north of 12th St., and for cement walks in Butler Ave.

West Lafayette, Ind.—It is reported that the Town Trus. will receive bids until Jan. 20, for the paving of South St. and North Western Ave. Chas. T. Stalland, Town Clk.

Vevay, Ind.—The Bd. Co. Comrs., it is reported, will receive bids until Jan. 6, for the constructing of 3,870 ft. of gravel road in Cotton Township. L. J. Woolen, Co. Aud.

Paoli, Ind.—The Bd. Co. Comrs. it is reported will receive bids until Jan. 7, for the constructing of 9,971 ft. of gravel road.

Columbus, Ind.—It is reported that the Bd. Co. Comrs. will receive bids until Jan. 7, for constructing 3 free gravel roads in Wayne Township as follows: Wright Rd., 8,317 ft. length; Thompson Rd., 7,160 ft.; Waynesville Rd., 10,621 ft. John M. Davis, Co. Aud.

Washington, Ind.—The Bd. Co. Comrs., it is reported will receive bids until Jan. 7, for the constructing of the Edwards gravel road in Steele Township. Thos. Nugent, Co. Aud.

Buffalo, N. Y.—The Common Council has ordered that Rhode Island St. be repaved, 30 ft. wide, from Niagara St. to Richmond Ave., and that F. G. Ward, Comr. of Pub. Wks., make plans and specifications for same.

Patchogue, L. I., N. Y.—It is stated that plans, specifications and bids will be received by the Bd. Trus. until Jan. 14 for the construction of a shore driveway along the bay front between Rider and Cedar Aves., the driveway to be about 1,425x6 ft. and about 4 ft. above high water mark. J. Fred Flugrath, Village Clk.

Lockport, N. Y.—The Bd. of Superv. is stated to have passed a resolution to improve the Pekin and Sanborn Rd. in Cambria and Lewistown, a distance of 3 miles, at a cast of $21,300.

New York, N. Y.—Bids will be received until Jan. 7 by Louis F. Haffen, Pres. Bronx Boro., for paving with granite block on a portion of Burnside Ave. and setting curb where necessary. Engineer's estimate: 18,200 sq. yd. of granite block pavement on a sand foundation, laid with sand joints, and keeping the pavement in repair for one year from date of acceptance. 1,400 lin. ft. curbstone; 4,850 lin. ft. of old curbstone, rejointed, recut on top and reset; 2,340 sq. ft. ofnew bridgestone for crosswalks, furnished and laid; 3,840 sq. ft. of old bridgestone, rejointed and relaid.

Elyria, O.—It is stated that Frank R. Fauver, Secy. Road Comrs., will receive bids until Jan. 14 for $100,000 road improvement bonds.

Sidney, O.—It is stated that bids will be received by Chas. Counts, Co. Surv., until Jan. 4, for constructing the Brandewe Pike, McLean Township; said pike is 23,216 ft. long.

Youngstown, O.—Bids will be received until Jan. 25, by North Newton, Secy. Bd. Co. Comrs., Special Rd. Dist. No. 1, Rm. 215, Dollar Bank Bldg., for $60,000 bonds, to be issued for the purpose for constructing and improving the roads in said district.

Hamilton, O.—The City Council is reported to have authorized L. A. Dillon, City Engr., to prepare plans and specifications for the paving of a portion of Market St.

McKeesport, Pa.—It is stated that C. E. Soles, City Comp., will receive bids until Jan. 7 for grading, curbing and paving portions of several streets with vitrified brick.

Titusville, Pa.—The City Council is reported to have passed a nordinance providing for the paving of S. Franklin St.

Memphis, Tenn.—Bids will be received until Jan. 8 by the Bd. of Fire & Police Comrs. for furnishing material and paving with vitrified brick on a concrete foundation on Mississippi Boule. from Iowa to Walker Aves. and from Walker Ave. south with cemented gravel and brick gutters, at a cost of about $10,000, Jas. H. Malone, Mayor.

**Dallas, Tex.*—The Coffeyville Brick Co. is reported to have received the contract for furnishing brick blocks for Main St., at $14,400.

Dallas, Tex.—The City Secretary is reported to have been instructed to receive bids for paving with brick a portion of Akard St.

**Galveston, Tex.*—A. T. Dickey, City Engr., writes that Kelso & Vantrin, of Galveston, have secured the contract for paving Ave. D with brick (bids opened Nov. 30) at the following bid: 3,516 sq. yds. vitr. brick on sand base, $1.50; 2,290 sq. yds. vitr. brick on 4-in. concrete base, $2.25, and 229 cu. yds. extra concrete, $8; total, $12,258.

Phoebus, Va.—It is stated that bids are wanted by L. P. Furness, Mayor, for $20,000 street improvement bonds.

**Tacoma, Wash.*—Owen Woods, Comr. of Pub. Wks., is stated to have awarded on Dec. 12 contracts as follows: S. 19th, 21st, S. 23d and 24th Sts., with sandstone blocks, to F. A. Keasal at $61,400. N. 7th, 9th, 10th, 11th, N. 13th, N. 1st, N. 21st and Steele Sts. with asphalt and sandstone to Barber Asphalt Paving Co., $146,200, cement sidewalks on S. 38th St., to Fred Essman, for $2,4[illegible].

Seattle, Wash.—Ordinances have been passed ordering the improvement of Washington St., by paving same with vitr. brick, at an estimated cost of $2,900, and for grading Depot St. at a cost of $5,510.

City Engr. R. H. Thomson estimates the cost of grading and planking W. Brandon St., at $8,600; and paving alleys in blocks E and F, 14, 107, 26 and 27, at $[illegible].

Wheeling, W. Va.—See "Miscellaneous."

POWER PLANTS, GAS AND ELECTRICITY.

Notes Arranged Alphabetically by States.

Dadeville, Ala.—Bids will be received until Jan. 10 by the Town Council for $8,500 bonds to pay for additional equipment and for the improvement of the municipal electric light and power plant. J. B. Rylance, Mayor.

Headland, Ala.—J. L. Kelly, Mayor, writes that the citizens on Dec. 16 voted to issue $23,500 bonds for the construction of water works and an electric light plant.

Hartford, Ala.—The citizens are contemplating making extensions to both the water and light plants during the next year. W. H. Whatley, Supt.

Troy, Ala.—The Pea River Power Co. is planning to develop water power on Pea River at this point and will erect a 3,000-h.p. plant. The company owns 7 miles of water rights and 100 ft. of right of way from its power site to Elba. H. D. Boyd, Secy.

Brewton, Ala.—The citizens are contemplating installing 2 new boilers of 150 h.p. each in the municipal electric light plant and water works, and erecting a 100,000-gal. stand pipe. G. E. McCants, Mgr.

De Queen, Ark.—The De Queen Light, Ice & Cold Storage Co. proposes establishing a day service and installing a meter system. Paul Coleman, Mgr.

Fordyce, Ark.—The Fordyce Light & Water Co. contemplates the construction of a new power station. C. A. Parsons, mgr.

Santa Rosa, Cal.—The Santa Rosa Lighting Co. contemplates changing its system from 2- to 3-phase and rewiring the town. R. Leo Van de Naillen, Mgr.

San Jose, Cal.—It is stated that bids will be received until Jan. 2 by the City Clk. for lighting the streets with either gas or electricity for 1, 3 and 5 years, beginning July 1, 1908.

Holtville, Cal.—The Holton Power Co. contemplates increasing the output of its plant by the installation of two 300-kw. alternating-current generators direct connected to water wheels. C. E. Paris, El Centro, Gen. Supt.

Delta, Colo.—The Delta Electric Light Co. is contemplating the installation of a 100-h.p. engine and an alternating-current generator. J. E. Shue, Treas. and Mgr.

Washington, D. C.—Bids will be received at the office of Bernard R. Green, Supt. of Constr. National Museum of Congress, until Jan. 21 for furnishing, delivering and installing in place, complete, the electric wiring required for the new building for the National Museum, as advertised in The Engineering Record.

Savannah, Ga.—The Savannah Lighting Co. contemplates installing a 500-kw. steam turbo-generator set in February or March. S. Brown, supt.

Carrolton, Ga.—The Carrolton Electric Co. is making estimates on cost of installing a 3-phase alternator and Corliss engine, also starting a day service some time next year. J. G. Cheney, Mgr.

Pocatello, Idaho.—The Idaho Consolidated Power Co. contemplates the installation of a 2,500-h.-p. horizontal turbine water wheel. F. C. Stanford, mgr.

Rexburg, Idaho.—The Falls Power, Light & Water Co. (J. H. Brady, Pres., Pocatello) is reported to have decided to extend the high-tension line from Blackfoot to Rexburg.

Monticello, Ind.—See "Electric Railways."

Frankfort, Ind.—The city is contemplating installing a 600-kw. generator direct connected to a cross-compound engine in the municipal electric light plant. W. H. Garter, Supt.

Tipton, Ind.—The Tipton Electric Light Co. is considering the question of installing a 500-h.-p. water tube boiler next year. J. H. Stewart, Mgr.

Osage, Ia.—The Osage Electric Light, Heat & Power Co. is planning to install an additional water wheel soon. Thomas Ferris, Mgr.

Humboldt, Kan.—The managers of the municipal electric light plant contemplate establishing a day service next spring. W. A. Moore, Supt.

Herington, Kan.—The Water and Light Com. contemplates rebuilding the electric lighting plant soon. C. E. Stromquist, Gen. Mgr.

Harper, Kan.—We are informed that the city contemplates the installation of an additional generator and 2 new boilers in the municipal electric light plant in the spring or summer. Horace A. Lee, Supt.

Richmond, Ky.—The Richmond Electric Power Co. will install an additional boiler next summer. The General Eng. Co. of Cleveland has charge of the plant.

Central City, Ky.—The Central City Light & Power Co. contemplates increasing the equipment of its plant for the purpose of furnishing a day service to operate fans. T. Q. Fortney, Mgr.

Midway, Ky.—The Versailles Electric Light Co. is making arrangements to extend its transmission line to Midway, a distance of 6 miles. The company has a franchise in Midway, and private right of way is nearly completed. Harry Reid, Pres.

Crowley, La.—An additional boiler will be installed in the municipal plant next summer. Armas Durio, Supt.

Crisfield, Md.—The Crisfield Ice Mfg. Co. will make extensive additions and improvements, which will include the installation of new engines, dynamos and boilers, and 10 miles of extension. C. O. Mills, Ch. Engr.

**Baltimore, Md.*—The Bd. of Awards is reported to have on Dec. 18 awarded the gas and naphtha lighting contracts to the American Street Lighting Co., of Baltimore, for one year at $10.85 per lamp per yr., for maintaining 7,200 gas lamps and for 1,100 naphtha lamps, $25 ea.

New Bedford, Mass.—The New Bedford Gas & Edison Light Co. contemplates making extensions to its electric lighting system. Chas. R. Price, treas.

Holyoke, Mass.—The Bd. of Aldermen is reported to have on Dec. 17 authorized the Lighting Dept. to secure a $160,000 loan for additions and improvements to the electric lighting station.

Bellaire, Mich.—It is proposed to increase the output of the municipal light plant; the dam will be raised next season, putting in cement core, cement flume and bulkhead. Chas. J. Evans, supt.

Gladwin, Mich.—Schulz & Brindle, owners of the local electric light plant, are contemplating establishing a day service. F. L. Prindle, Mgr.

Mancelona, Mich.—The Antrim Light & Power Co. proposes increasing the output of its plant. F. R. Joslin, Mgr.

Sault Ste. Marie, Mich.—We are informed that the Edison Sault Electric Co. is contemplating the installation of a new dynamo next spring. Alex. Dow, Mgr.

Osakis, Minn.—The Osakis Milling Co. contemplates increasing the output of its plant to meet the increased demand for electricity. About 75 h.-p. will be needed. Wm. A. Olen, Mgr.

Wadena, Minn.—The Trustees of the village electric light plant and water works system contemplate installing a district heating system, but nothing as yet has been decided. Geo. S. Chrysler, Supt.

Blackduck, Minn.—The Blackduck Electric & Telephone Co. is in the market for a 35-kw., 250-volt, direct-current outfit with compensating set, or outfit to work on 3-wire system of 125 and 250 volts. C. W. Jewett, Mgr.

New Prague, Minn.—The citizens contemplate putting in a 15-ampere storage battery in the municipal electric light plant next spring. A. K. Adams, Supt.

Princeton, Minn.—The village contemplates installing an air lift pump, fire pump and induced draft system in the electric light and water works system. C. A. Dow, Supt.

Nashwauk, Minn.—The Village Trus. are reported to be receiving bids for the installation of an engine, 80-kw. alternating-current generator, switchboard, etc. G. A. Lindsay, Mgr.

Waseca, Minn.—The Water and Light Board is contemplating changing the system of the municipal electric light plant from direct to alternating current in the spring. E. G. Guy, Supt.

St. Peter, Minn.—Plans are being made to change the system of the municipal electric light plant from single phase, 1,000-volt to 3-phase, 2,300-volt, and from belted to direct-connected machines. H. A. Hildebrandt, Supt.

Faribault, Minn.—The Faribault Gas & Electric Co. contemplates installing a producer gas engine plant. B. W. Cowperthwait, Secy. and Mgr.

Pontotoc, Miss.—The Pontotoc Light & Power Co. proposes increasing the output of its plant and will install an 85-h.-p. tubular boiler and establish a direct-current power service. R. L. Campbell, Mgr.

Magnolia, Miss.—The Magnolia Electric Light Co. proposes installing a 100-kw. generator and a 150-h.-p. high-speed engine in its plant. Xavier A. Kramer, Supt.

Brookfield, Mo.—The Brookfield Electric Light Co. proposes installing a 3-phase power service and will establish a 24-hour service in the spring. Percy W. Markham, supt.

Lees Summit, Mo.—L. Schreechfield & Son, owners of the electric light plant, are negotiating with the town of Greenfield, 4 miles distant, to furnish electricity for lighting in that town.

Higginville, Mo.—The citizens contemplate rebuilding the overhead system of the municipal electric light plant. Frank Monser, Supt.

Harlowton, Mont.—A. C. Graves, of Harlowton, proposes constructing water works and an electric light plant here, the cost about $20,000, and bids for construction will probably be called for in March. Engineer not yet selected.

Malmo, Neb.—The Village Trus. are reported to have appointed a committee to investigate cost, etc., of installing water works and an electric light plant.

Sparks, Nev.—Engineer E. Talbot, of Carson, writes that the proposed power plant to be constructed on Truckee River, 18 miles east of Reno, will cost about $250,000. The matter has been held up by litigation until July, 1908. Nothing definite will be done until after that time.

Hammonton, N. J.—The Hammonton Electric Light Co. is planning to remodel its street-lighting system in the spring. P. H. Garrison, Supt.

Roslyn, N. Y.—At a recent meeting of the stockholders of the Nassau Light, Heat & Power Co. the proposition to issue $1,000,000 of 5 per cent. bonds is reported to have been ratified and confirmed. L. A. Howland, Supt., Roslyn.

Glens Falls, N. Y.—The Public Service Comn. at Albany has approved the application of the Hudson River Electric Power Co. (E. A. Wakeman, Mgr. and Supt., Glens Falls) to extend its plant, and for authority to issue $3,232,000 bonds to cover the cost of the proposed improvements and extensions. This company proposes to construct and operate a storage dam, power dam, and electrical power plant on Sacandaga River. It also plans to construct and operate electrical transmission lines for the proposed plant to Saratoga, Ballston, Mechanicsville, Troy, Albany, Watervliet, Schenectady, and Amsterdam.

Croton Falls, N. Y.—Geo. Juengst & Sons, owners of the Croton Falls electric light plant, contemplate the reconstruction of its plant and its system at Brewster and Purdys. Geo. Juengst, Jr., Mgr.

Rhinebeck, N. Y.—The Dutchess Light & Power Co. proposes making some line extensions in the spring. R. Raymond Rikert, Mgr.

Oswego, N. Y.—The People's Gas & Electric Co. contemplates installing a 500-kw. steam unit in its plant. J. M. Dickenson, Mgr.

Gouverneur, N. Y.—The Hannawa Power Co. is reported to have purchased the Gardner property on the west side and will construct its transforming station upon that site.

** Items marked thus give the names of parties awarded contracts.*

Sodus, N. Y.—The Public Service Comn. is reported to have granted permission to the Sodus Gas & Electric Light Co. to extend its lines from Sodus to Webster and to Sodus Point and to increase its capital stock from $15,000 to $90,000 for this work.

Rocky Mount, N. C.—The city has voted bonds to the extent of $80,000 for the construction of an entire new electric light plant and improvements to water works. When bonds are sold the city will be in the market for electrical machinery, engines and boilers. A. S. Lyon, Supt.

Hendersonville, N. C.—The Hendersonville Light & Power Co. will develop water power not far distant from its present plant, which will practically double the present output. Orders have been placed with S. Morgan Smith, of York, Pa., for water wheels. W. H. Bangs, Supt.

Enderlin, N. D.—The Enderlin Electric Light & Power Co. contemplates installing a gas producer and extending its lines to Sheldon. M. A. Abbott, Mgr.

Edgeley, N. D.—There is reported to be a movement on foot here for the installation of an electric light plant in connection with the proposed water pumping plant.

Wauseon, O.—H. H. Williams & Co., owners of the Wauseon electric light plant, contemplate installing new boilers in their plant to take the place of the ones now in use. W. F. Hubbell, Mgr.

Cherokee, Okla.—The Cherokee Ice & Power Co. contemplates the installation of a 90-kw. alternating-current generator in its plant. Robert T. Lyon, Mgr.

Homestead, Pa.—Bids will be received until Feb. 3 by And. Hill, Boro. Clk., for lighting the streets of this borough for a period of 1, 3 and 5 years.

**Franklin, Pa.*—The Allis-Chalmers Co., of Milwaukee, Wis., is reported to have secured the contract for installing an additional engine and generator for the borough electric light plant, for $8,600.

Blairsville, Pa.—The Citizens' Heat, Light & Power Co. contemplates the installation of an 80-arc dynamo. R. H. Wiggins, Secy.

Olyphant, Pa.—The borough electric light committee contemplates establishing a day service and will install a new engine, generator and boilers in the municipal electric plant. W. J. Lynott, Ch. Engr.

Titusville, Pa.—The Titusville Electric Light & Power Co. contemplates rebuilding its entire plant next spring. Fred. Woodring, Mgr.

Gettysburg, Pa.—The Keystone Electric Light, Heat & Power Co. contemplates constructing suburban transmission lines in the spring, taking in two towns. T. P. Turner, Mgr.

Danville, Pa.—Plans are being made by the Standard Electric Light Co. to increase the output of generators and to change its system from 133 to 60 cycles. Geo. M. West, Supt.

Newberry, S. C.—Plans are being considered for enlarging and improving the electric light plant and water works system, which will include the installation of a new 200-kw. generator and a well pump. H. W. Schumpert, Supt.

Summerville, S. C.—The Crystal Ice Co. is planning to install a 125-kw. generator and a 175-h.p. engine and boiler in its plant next fall. Milton P. Skinner, Pres.

Yankton, S. D.—A new gas company has been organized by Isaac Piles, Fred Schnauber, John Holman, Mr. Springer and F. L. Van Tassel. It has taken over the old plant and will, according to reports, erect a new plant in the spring.

Beresford, S. D.—Extensive additions and improvements are being made to the local electric light plant. Another generator will be added to the plant next summer. L. Wagner, Owner and Mgr.

Hartford, S. D.—The Hartford Electric Light & Telephone Co. contemplates the installation of a storage battery in its plant. Fred E. Harris, Mgr.

Jefferson City, Tenn.—The Jefferson City Electric Co. contemplates installing a compound engine, a three-phase, direct-current generator to furnish power for a large woolen mill, and installing a street arc lighting system. I. M. Coile, Supt.

Ft. Worth, Tex.—The following are the 3 lowest bids opened on Dec. 20 at the office of the Superv. Archt., Washington, D. C., for the installation of a conduit and electric wiring system in the extension to the U. S. Post Office and Court House at Ft. Worth: Roberts Electric Co., Sherman, $1,795; W. A. Conrad, St. Louis, Co., $1,664, and L. H. Melson, Pittsburg, Pa., $1,900.

Ft. Covington, Vt.—The Ft. Covington Light, Heat & Power Co. is considering the question of building a new dam and establishing a day service next summer. W. S. H. Keefe, Mgr.

Roanoke, Va.—The Roanoke Water Power Co. contemplates the installation of a 1,000-kw. Allis-Chalmers generator as an auxiliary to its present plant. R. C. Camp, Gen. Mgr.

Medicine Hat, Alta.—The Red Cliff Realty Co. is contemplating enlarging its plant next summer and increasing the equipment to 400 kw. C. W. Jewett, of Blackduck, Minn., can give further information.

Toronto, Ont.—Bids will be received until Jan. 9, by H. F. McNaughton, Secy., Pub. Wks. Dept., Toronto, for rewiring the Parliament Bldgs., Toronto.

**St. Catherines, Ont.*—The City Council is reported to have on Dec. 19 accepted the bid of the Falls Power Co. to light the streets for the next 20 years at $30.50 per lamp per yr. The company also accepts all the liabilities here against the defunct Stark Co.

Campbellford, Ont.—John S. Fielding, 15 Toronto St., Toronto, Ont., writes with regard to the proposed municipal power plant for Campbellford, that bids are wanted for turbine wheels, 1,350 h.p., at 25 ft. head. He further states that Bogue & Buchanan, of Peterboro, have secured contract for head race, power house and tail race, and th Allis-Chalmers-Bullock Co. the contract for electric equipment; total cost of proposed plant, $60,000. E. C. West, City Secy.

ELECTRIC RAILWAYS.

Notes Arranged Alphabetically by States.

Los Angeles, Cal.—The construction of an electric railway to connect Ontario, Pomona, Chino and Newport is reported under consideration. The proposed new line is said to be the project of the Ontario Land & Improvement Co. of Ontario, of which Chas. Frankish is president.

Ventura, Cal.—J. B. McCloskey, County Clk., writes that Julian P. Jones and F. M. Packard, 506 Citizens Natl. Bank Bldg., Los Angeles, have secured a franchise for an electric railway (bids opened Dec. 5).

Los Angeles, Cal.—Chas. Frankish, of Ontario, Cal., is reported to be promoting a new electric railway to run from Ontario, through Pomona and Chino, to Newport Beach, where it will connect with the present terminus of the Pacific Electric Ry. Co., a distance of 35 miles. Rights of way are now being secured. At Ontario the Ontario Interurban Ry. Co. is being organized with a capital of $500,000 to carry out the project.

Pueblo, Colo.—The Pueblo & Arkansas Electric R. R. Co. is reported incorporated to build an electric railway from Pueblo to Fowler down the Arkansas Valley. The line will pass through Avondale and Vineland. Capital, $300,000. Incorporators: M. J. Varnar, Lester Wolf and others.

Colorado Springs, Colo.—It is reported that work on the Manitou-Crystal Park Electric Ry. Co.'s line will begin in a few weeks. The proposed electric railway will be built from Manitou to Crystal Park at a cost of $500,000. J. K. Vannatta, Pres.

Atlanta, Ga.—It is stated that the Georgia Railway & Electric Co. is preparing to begin in the near future the extension of its lines to Buckhead.

Danville, Ill.—The Danville & Southern Ry. Co. is stated to have filed an application for a franchise from the public square to the city limits on the Perryville Road. The Danville & Southern Railway Company is part of the Illinois Traction System.

Monticello, Ind.—The Tippecanoe Electric Power Co. is reported incorporated with a capital of $75,000 to improve a power dam in the Tippecanoe River, erect and equip a modern power plant for the manufacture and distribution of electric light and power, and also to furnish a portion of the power for the operation of an electric railway to be constructed between Frankfort, Ind., and Chicago, by way of Monticello. A. S. Strauss and Henry Meyer, of Chicago, and J. G. Smith, of Monticello, are directors of both the Tippecanoe Co. and the Frankfort & Chicago Electric R. R. Co.

**Terre Haute, Ind.*—The contract for the building of the line of the Terre Haute & Merom Traction Co. has been awarded to the Central States Constr. Co. of Chicago, according to reports. It is expected to begin construction work this month. The road will extend from Terre Haute to Merom, Ind., also to Robinson, Ill., and will be about 10 miles in length. L. Brown, Terre Haute, Pres.; J. Warren Brown, Terre Haute, Secy.; and H. L. Bartlett, St. Louis, Mo., Treas.

Ft. Dodge, Ia.—The Spirit Lake, Emmetsburg & Fort Dodge Ry. Co. expects to begin construction work in the near future according to reports. Practically all of the right of way has been secured. The railway, which it is estimated will be 110 miles long, will connect and run through Ft. Dodge, Clare, Lizzerd, Pocohontas, Havelock, Mallard, Emmetsburg, Spirit Lake, Grottinger, Terrill and Milford. The repair shops are to be located at Emmetsburg. T. F. McCartan, Pocohontas, Pres.; M. H. Miller, Ft. Dodge, Vice-Pres. and Acting Gen. Mgr.; P. O. Refsell, Emmetsburg, Secy., and D. O. Johnson, Emmetsburg, Treas. Capital, $500,000.

Paducah, Ky.—It is stated that C. A. Harrington, of the American Engineering Company, of Indianapolis, Ind., and a corps of engineers, have been surveying a route out of Paducah to Mayfield, a distance of 25 miles, for the Paducah Southern Electric Ry. The corps will survey routes and work of building the road will be pushed rapidly.

Minden, La.—H. A. Davis and J. B. Story have applied to the Town Council for a street railway franchise.

Lewiston, Me.—The Lewiston, Augusta & Waterville St. Ry. Co. (E. D. Reed, Gen. Mgr.) expects to place contracts during the next two months for the construction of two sub-stations, according to reports.

**Boston, Mass.*—Coleman Bros., 15 Court Sq., Boston, have secured the contract for concrete and granolithic platforms, landing, etc., in Washington St. tunnel, bet. Lagrange St. and Haymarket Sq. (bids opened Dec. 24 by the Boston Transit Comn.), at the following bid: Furnishing and putting in place 750 cu. yds. concrete masonry for base, 2 in. or more deep, $8.40; 9,200 sq. yds. granolithic wearing surface, 1 in. deep, 53 cts.; 2 tons ⅜ in. square twisted steel rods, furnished by Comn., $15; and furnishing and placing 170 reinforced granolithic covers, 12 in. x 7¾ in., over drains, 20 cts.; total, $11,240. Totals of other bids: Coughlan & Sheils Co., 104 Hanover St., $17,464; Thos. J. Hind, 19 Milk St., $17,101; John F. Gill Co., Winter Hill, Mass., $15,240; W. A. Murtfeldt Co., 161 Devonshire St., $15,155; Peter F. Connolly, 70 Perkins St., Jamaica Plain, $14,939.70; Frank Williams Co., 19 Willard St., $14,459; Aberthaw Constr. Co., 8 Beacon St., $14,059.50; Simpson Bros. Corpn., 166 Devonshire St., $12,534.30; Chas. R. Gow Co., 79 Milk St., $12,405.

Corinth, Miss.—It is stated that the Corinth & Shiloh Electric Ry. Co. plans building an electric railway from Corinth to the National Park at Shiloh. The total length of the road will be 22 miles and the overhead trolley system will be installed. The power station and repair shops will be at Corinth. Capital, $250,000. A. Rubel, Corinth, Pres.; S. H. Rubel, Vice-Pres. and Treas.; M. T. Bynum, Secy.; and W. J. Lamb, Gen. Mgr.

Nevada, Mo.—Report states that all the surveys have been made for the Kansas City & Sprinfield Southern Ry., to build an electric railway between Nevada and Springfield with a branch line to Carthage. Capital, $3,750,000. The total length of the line, including sidings, will be 140 miles and cars will be operated by electricity. The necessary current will be furnished from a power station which is to be built near Arcola, Mo. In addition, the company will also own and control an amusement park near the Sac River. The officials of the Kansas City & Springfield Southern Ry are as follows: W. B. Forsyth, Pres.; S. A. Wight, Secy.; J. W. Creekman, Treas.; C. C. McFann, of Nevada, Mo., Gen. Mgr.

Burlington, N. C.—The Bd. of Aldermen is stated to have granted a franchise to the Burgrahaw Traction Co. to construct and operate a street car system over any or all of the streets of Burlington. J. N. Harden, J. M. Cook and J. W. Murray are reported interested.

**Asheville, N. C.*—It is reported that the Carolina Constr. Co. has been awarded the contract to build and equip the electric railway which is to connect Asheville and Hendersonville. J. D. Murphy, C. F. White and J. H. Tucker are interested in the interurban railway.

Minot, N. D.—It is reported that P. O. Dowd, of Kansas City, Mo., will soon apply for a street railway franchise in Minot.

Gibsonburg, O.—It is reported that the Toledo, Fostoria & Findlay Electric Ry C., T. W. Adams, Gen. Mgr., Fostoria, is behind a plan to build an electric railway from Gibsonburg to Jersey City by way of Bradnor and Prairie Depot. This would open up a lot of new territory for the company and would probably prove a good feeder. It is said that the road will be built the coming summer.

Portland, Ore.—It is reported that a large plan of electric railway development in the Willamette Valley and Central Oregon is being launched by A. Welch and the Willamette Valley Co., owners of the electric light plant at various points, and builders of the Eugene Street Ry. and other projects. With a capital of $1,000,000 they will incorporate the Portland, Eugene and Eastern Ry. Co. for the purpose of building an electric railway from Portland to Salem, Eugene, Prineville, Yaquina and Ontario, with branches to numerous towns.

Pittsburg, Pa.—It is stated that the Hebron Street Ry. Co. will soon ask the city for a franchise to construct a traction line through the 41st Ward and a portion of the 37th Ward.

Newtown, Pa.—The Bucks County Electric Ry. Co. is contemplating the entire reconstruction of the street railway line and installing modern equipment. W. H. Janney, Mgr.

**Fredericksburg, Va.*—A charter is stated to have been prepared for the Fredericksburg & Southern Ry. to be presented to the State Corporation Commission. The charter authorizes the company to construct and operate an electric railway from some point in Hanover County to Fredericksburg and northwestwardly and also authorize the running of a street railway in the city of Fredericksburg. W. C. Whitner, Pres.; Alvin T. Embrey, Secy. and Treas.

Cobalt, Ont.—The Municipal Council is stated to have granted a franchise for an electric railway to the Central Ry. Co. A start on the construction of the Cobalt-Liskead section will probably be made next spring. This section will cost about $250,000.

London, Ont.—The City Engr. is reported to have been instructed by the Bd. of Wks. to prepare plans for a new electric belt line in the north end of the city.

Montreal, Que.—Announcement is reported made to the effect that a large English concern will expend $10,000,000 in the development of Canadian electrical railways. The company will assist in developing the plants of the Montreal Light, Heat & Power Co., the Quebec Railway, Light & Power Co. and the Electric Development Co. Electric railways will be constructed in the rural districts of Ontario and Quebec, and engineers have already completed a tour of inspection.

RAILROADS.

Notes Arranged Alphabetically by States.

Philadelphia, Pa.—The following are reported to be the bids opened on Dec. 17 at the office of W. Hunter, Ch. Engr., Philadelphia & Reading Ry Co., for contract 26 for temporary engine yard at Wayne Junction: F. M. Nolan, $63,500; Edw. Fay & Son, $47,500; Kelly & Co., $47,400; F. J. Boas, $44,460; Henry E. Baton, $43,790; W. Steele & Sons Co., $43,034; Jas. McGraw Co., $41,034; Fred. A. Havens & Co., $39,991, and Armstrong & Latta, $39,900.

Fredericksburg, Va.—The City Council is reported to have adopted a resolution in favor of the granting of a charter by the Corporation Comn. to the Fredericksburg-Southern R. R. Co.

Spokane, Wash.—The Spokane & Inland Empire Ry. Co. is reported to be considering the construction of a branch line from Spokane to Nine Mile bridge, to be oprated by steam or electric power.

PUBLIC BUILDINGS.

Notes Arranged Alphabetically by States.

Washington, D. C.—The following are the bids opened on Dec. 11 at the office of the Supt. U. S. Capitol Bldgs. and Grounds for about 100,000 lbs. of 16-oz. cold rolled, annealed sheet roofing copper required for the roof covering of the Office Building, U. S. Senate, Washington, D. C. (price given per lb): C. G. Hussey & Co., Pittsburg, Pa., 15.9 cts.; Rome Brass & Copper Co., Rome, N. Y., 16.04 cts.; Clendenin Brothers, Baltimore, Md., 17.05 cts.; U. T. Hungerford Brass & Copper Co., New York, N. Y., 17.1 cts.; Merchant & Evans Company, Philadelphia, Pa., 17.2 cts.; Lewis H. Jones, Detroit, Mich., 17.5 cts.; Taunton-New Bedford Copper Co., New Bedford, Mass., 17.5 cts.; Crucible Steel Co. of America, Pittsburg, Pa., 17.75 cts.

The Chief of Staff of the Army, it is stated, has recommended the construction of officers' quarters at the Army War College at an expense of $100,000. He also asks $197,000 for the construction of necessary buildings for 2 companies of the Signal Corps at Forts Riley and Leavenworth.

Vare, 710 Betz Bldg., the contract for cleaning streets, alleys, inlets, public market houses and for the removal of ashes, household waste, rubbish, etc., during the year 1908 throughout the entire city for $1,087,000. W. R. Benson, Chief Bureau of Highways.

Reading, Pa.—Bids will be received at the office of Caleb Weidner, City Clk., until Jan. 7 for the collection, removal and disposal of all garbage and offal in this city for the period of 1, 2, 3, 4 and 5 years, as advertised in The Engineering Record. Elmer H. Beard, City Engr.

Milwaukee, Wis.—Rudolph Hering, of New York, N. Y., in his report to Council on Dec. 23 recommends the construction of a garbage incineration plant, capable of destroying 300 tons of garbage daily, to cost about $200,000.

NEW INDUSTRIAL PLANTS.

See also "Business Buildings."

Ft. Smith, Ark.—C. W. L. Armour, of Ft. Smith, writes that nothing definite has yet been done toward the construction of a cement plant at Ft. Smith.

Calhoun, Ga.—It is stated that plans have been completed by the Echota Cotton Mills, of Calhoun (T. W. Harbison, Pres.), for the plant to be erected, and a factory of 10,000 spindles and 300 looms has been decided upon. The product will be 41-inch print cloths, and about 14,000 yards will be the daily output. Steam power will be used.

Kosciusko, Miss.—J. O. Ashworth, of Kosciusko, is architect for the rebuilding of the plant of the Kosciusko Oil Mill & Fertilizer Co., recently burned. Building to be of brick and steel. 40 x 140 ft. Will likely need 20 x 48 Corliss-engine; no boilers required.

St. Louis, Mo.—The American Fdy. & Mfg. Co., 10th, Herbert and Wright Sts., will on Jan. 5 let contract for the power plant work, needed in connection with repair of plant, recently damaged by fire. The contract for repair of buildings was to have been let on Dec. 27; probable cost of improvements, $30,000.

Hackettstown, N. J.—See "Public Buildings."

Charlotte, N. C.—It is reported that the cotton mill company recently proposed for organization here by Sumner B. Sargent will be incorporated in January. He has planned a concern with $100,000 capital stock to build a plant which will be equipped with 5,000 spindles.

Tulsa, Okla.—P. De C. Ball, 3003 N. Broadway St., St. Louis, Mo., is engineer of the Tulsa Corporation which is said to have in contemplation the installation of a cold storage plant in Tulsa.

MISCELLANEOUS.

Notes Arranged Alphabetically by States.

Colorado Springs, Colo.—Bids will be received until Jan. 15 by E. D. Marr, Secy. Cripple Creek Drainage & Tunnel Co., Mining Exchange Bldg., Colorado Springs, for driving about 14,000 ft. of deep drainage tunnel, 7x10 ft.; also sinking about 600 ft. of shaft, 5x10 ft. in the clear, in Cripple Creek Mining Dist.

Springfield, Ill.—The City Council has passed on ordinance appropriating $6,000 as the city's share of the expense of constructing Eastman Ave. subway.

Ft. Wayne, Ind.—The Ft. Wayne & Wabash Traction Co. (H. L. Weber, Ch. Engr., Ft. Wayne) is completing plans for a dam in St. Joseph River and Robson Park, to be of reinforced concrete; also controlling works and three concrete culverts; estimated cost, $38,000.

Kokomo, Ind.—Thet Comrs. of Howard County are reported to be planning to let a contract for the construction of the Cook and Butler ditch, 8 miles in length.

Princeton, Ind.—Geo. W. Smith, Drainage Comr., writes that only a preliminary report has been filed for the construction of a drainage ditch, about 75 miles in length, through Gibson and Posey Counties; nothing definite will be done for about 4 or 5 months.

Burlington, Ia.—The Des Moines Co. Bd. of Superv. at Burlington, are reported to be considering the construction of a drainage system in the eastern sections of Burlington, Benton and Huron townships.

Clarion, Ia.—Bids will be received until Jan. 7 at the office of E. M. Callender, Aud. Wright County, at Clarion, for constructing a joint ditch and drain, known in Humboldt County as Humboldt-Wright Joint No. 1 and in Wright County as No. 27, to be divided into 4 sections requiring 14,466 ft. 14, 16, 20 and 24-in. tile.

Jefferson, Ia.—Bids will be received until Jan. 3, it is stated, by E. S. Gose, Co. Aud., for furnishing and laying vitrified tile drain from 6 to 22-in.

Rockwell City, Ia.—It is stated that bids will be received by B. E. Stonebreaker, Co. Aud., until Jan. 2 for constructing a tile drain in Dist. No. 25.

Ft. Dodge, Ia.—It is stated that H. S. Holm, Co. Aud., will receive bids until Jan. 14 for constructing drainage Ditch No. 40.

Benson, Mich.—It is stated that Michael Romstad, Co. Aud., will receive bids until Jan. 21 for constructing Ditch No. 9.

**Ada, Minn.*—D. E. Fulton, County Aud., writes that the contract for constructing Ditch No. 33 (bids opened Dec. 20) has been awarded to J. L. Baker, of Willmar, for $15,222.

Redwood Falls, Minn.—Bids will be received until Jan. 10 at the office of L. P. Larson, Co. Aud., for constructing Ditch No. 3, requiring 6,518 ft. 10-in., 14,907 ft. 8-in., 25,123 ft. 6-in. tile; est. cost, $7,700; also Ditch No. 4, requiring 7,100 ft. 15-in., 5,054 ft. 12-in., 7,230 ft. 10-in., 23,600 ft. 8-in., and 50,720 ft. 6-in. tile; est. cost, $16,180.

Ellis Island, N. Y. H., N. Y.—Bids will be received at office of Comr. of Immigration, Robt. Watchorn, until Jan. 4, for furnishing material and repairing fender piles, shocks, etc., at southwest face of dock, Barge Office, U. S. Immigrant Station, Ellis Island.

Buffalo, N. Y.—It is reported that bids will soon be called for by Col. Henry Adams, Corps Engrs., U. S. A., 540 Federal Bldg., Buffalo, for the construction of locks, cofferdams, etc., to be built at foot of Bridge St.; probable cost, $1,750,000.

Ft. Hamilton, Brooklyn, N. Y.—Bids will be received until Jan. 15 by Capt. Chas. T. Baker, Constr. Q. M., U. S. A., for grading and removing stonewall at this post.

Hamilton, O.—L. A. Dillon, County Surveyor, writes that bids will probably be received about Mar. 1 for the diversion of Crawfords Run, to cost about $70,000. It will be constructed jointly by Hamilton and Butler Counties.

Cincinnati, O.—Bids will be received until Jan. 21 by Lieut.-Col. Wm. T. Rossell, Corps Engrs., U. S. A., for building cabin and upper works on steel dredge.

** Items marked thus give the names of parties awarded contracts.*

Coshocton, O.—It is stated that bids will be received until Jan. 16 by the Bd. Pub. Service (W. S. Hutchinson, Secy.) for furnishing f. o. b. Coshocton, and setting up, a horizontal tubular boiler, 18 ft. long, 72 in. diam.

Panama.—Bids will be received until Jan. 17 by Lieut. Col. H. F. Hodges, Corps Engrs., U. S. A., Genl. Purchasing Officer, Isthmian Canal Comn., Washington, D. C., for furnishing Portland cement as per circular No. 410; also until Jan. 13 for sanitary fixtures, pipe fittings, flexible joints, valves, etc., as per circular No. 411.

Panama.—The lowest bid opened on Dec. 21 by the Isthmian Canal Comn. at Washington, D. C., for furnishing 4 steel dump barges is reported to have been submitted by the Maryland Steel Co., of Sparrows Point, Md., at $19,800 each.

Coraopolis, Pa.—Bids will be received until Jan. 3, by F. J. Booth, Co. Compt., Pittsburg, for furnishing material and building 2,300 lin. ft. of fencing along the improved road between Coraopolis and Stoops Ferry. Geo. T. Barnsley, Co. Rd. Engr., Rm., 26 Court House, Pittsburg.

Providence, R. I.—Bids will be received by Jas. Knox Taylor, Superv. Archt., Treas. Dept., Washington, D. C., until Jan. 18 for the installation of a vacuum cleaning system for the U. S. Post Office, Court House and Custom House, Providence. Clark & Howe, Archts., 72 Weybosset St., Providence.

**Providence, R. I.*—Walter F. Slade, Com. of Pub. Wks., on Dec. 18 opened bids for dredging about 20,000 cu. yd. on west side of Providence harbor, bet. Sassafras and Field's Points, and awarded contract to the Packard Dredging Co.

**Galveston, Tex.*—Kelso & Vantrin, of Galveston, are reported to have secured the contract for constructing reinforced concrete drain on 19th St. from Av. D to wharf front at the following bid: 1,323 lin. ft. of regular section A, at $10.46; 112 lin. ft. of special section B, at $12.50; 16 catch basins and connections, complete, $29 ea.; 2 manholes, complete, $20 ea.; 50 cu. yd. extra concrete, $7.45 and 60 m. ft. B. M. lumber, at $27; total, $17,735. M. D. Carr, of Galveston, bid for this work $17,934.

Wheeling, W. Va.—Bids will be received by Capt. F. C. Boggs, Corps Engr., U. S. A., until Jan. 25, for constructing guide walls, grading, paving, etc., at Dam 13, Ohio River, as advertised in The Engineering Record.
